RESISTANCE

I. Patriot Formations

4th ZONE

The nickname of the Commander of the 2nd Ligurian Division (Cento Croce) is now given as VALODIA and not, as previously reported, Collodi. His real name is Captain BERGO.

Bands previously reported as in process of formation or detached from 4th Zone, and which are now organised are:-

1. The Pontremolese Bn. A band of about 180 men under "SALVATORE" is located in the ZERI valley with H.Q. at COLORETTA and operates in that valley and above Pontremoli as far as the CISA Pass. Although separated from the area under direct control of the 4th Zone Command, it nevertheless takes its orders from the British Mission, in collaboration with Col. FONTANA.

2. A band of 40 men under "TIGRE" (BALDINO BLANDINI). This is purely military and is located at PONTEREGGIO and works under the British Mission.

3. The MUCCINI Bdes. of about 160, operating under 4th Zone orders when possible.

4. The Coastal Bde, between the sea and the Via Aurelia, Route 1; this band is not yet armed.

5. The Coduri Bde which has only lately begun to operate to the west of the SESTA GODANO-VARESE road.

Comando Unico Emilia-Romagna

26th Garibaldi Brigade.

The 7th Bn of this Brigade is composed of the following

"ITALIA" Brigade. Up to 22nd March this was known as the Garibaldi Brigade of the Modenese Demo-Christians and was commanded by "CLAUDIO". On that date "LINO" left the command of the Div. MODENA, where he was substituted by "WAINER", a Communist Army Lieutenant, and took over the "ITALIA" Brigade from "CLAUDIO", who has been appointed political chief of all Christian Democrat formations and organisations in the district.

The Brigade is organised in three Bns, but source only knew particulars of his own Bn. which is called the "ALFREDO" from the name of its commander, Army Lieutenant Alfredo. The Bn numbers about 150 men in three groups. H.Q. of the Bn. and the Bde. are in FRASSINORO.

III. Recent Patriot Activities.

General Situation The whole of North Italy appears to be seething with revolt. From every quarter come reports of raids, attacks on Fascist and German garrisons and columns, sabotage of bridges, trains and railways. Patriot formations are being swelled daily by new recruits and deserters. New bands are springing up like mushrooms. Meanwhile on the front of the Allied advance partisan bands have given valuable essistance to the Allied troops. Now that the collapse of the Reich is evident, it may be impossible any longer to hold back the general explosion.

Recent activities have been so numerous and widespread that it is impossible to give many details. Results for March are tabulated as follows:

LIGURIA enemy (not specified) killed 78, captured 264.

EMILIAN APPENINES AND EMILIA

Germans killed 293 (14 officers)

Recent operations in conjunction with the Allies

These have been highly successful, so far. A Garibaldi Brigade co-operating with the Allies in the C.R.R.R. zone captured 280 prisoners. On 8th April about 4,000 patriots attacked the Germans in the VAL DI TARO, between PONTREMOLI-SALSOMAGGIORE and [illegible] made on the enemy in BORGO VAL DI TARO, OSTIA, ROCCAMURO, [illegible] and these towns were occupied by the patriots who captured upwards of 500 prisoners.

FASCIST FORCES

III. 10th MAS.

It is reported that after the quarrel between Mussolini and Prince BORGHESE over METZASOMA's order to suppress the newspaper of the 10th MAS, relations between the 10th MAS and the Government are strained and the Germans are very distrustful of the 10th MAS.

It is also said that Borghese has cancelled the order of departure for the front of two units and has concentrated the Division of about 12000 around his H.Q. at BASSANO DEL GRAPPA. A field officer of the 10th MAS is reported as having stated that it is probable that Borghese will negotiate with the Government of the Luogotenente for the 10th MAS to join the partisan movement. Borghese, it is said, told his friends that "to remain in the 10th MAS is today the best insurance for one's future.

IV. Littorio Division.

Deserters report morale is extremely low. Desertion is rife. Of the 160 men of the 1st Company of the 3rd Grenadier Regt. only 35 remain. Men sent on leave never return and units in the front line have had no reinforcements since their arrival.

The following names of Brigades are known. It is possible that they may be those of some of the above list of units:

"Facchini"	Bologna zone
"Piacentini"	Pinerolo "
"Tupin"	Rebigo "
"Manganiello"	Tuscan elements.

VI. New Deputy Chief of Staff of G.N.R.

ASVERO GRAVELLI, Colonel of G.N.R. has been nominated Sottocapo (Deputy Chief) of the General Staff of the G.N.R. It is rumoured that he is much distrusted by the Germans.

VII. Last stand of the Fascists.

Fascists assert that at the right moment they will collect into the various Provincial capitals where they will put up staunch resistance to partisans until the arrival of the Allies, to whom they will surrender, as they trust in their clemency.

GERMANS.

VIII. Withdrawal of Troops.

While no further withdrawals of complete Divisions have been reported, it is quite possible that the cream of the fighting men of some divisions may have been skimmed off and possibly replaced by inferior elements. Thus it is reported that during February the Wehrmacht evacuated 30,000 men from Italy. These were withdrawn from 6 or 7 various divisions and moved either by railway through POSTUMA, PIEDICOLLE, TARVISO or by road from TRIESTE, LUBLIANA, or by TARVISO or the BRENNER, or COL DI TONALE.

IX. The Defence of N. Italy.

With the victorious advance of the Allied Armies to the Po and the establishment of bridgeheads on the further bank the whole Po-Ticino defence line is gravely compromised. At the same time General VIETINGHOFF's retreat into "Fortress Germany" is threatened by an immanent Italian insurrection and the blocking of his escape routes by Allied Airforces.

Various Movements. It seems probable that even before the Allied advance, orders had been given to withdraw over the Po, as the following reports appear to indicate:

RAPALLO On 10th March the Germans abandoned hotels in Rapallo (24 km S.E. of Genova) and removed the barbed wire round them. The inhabitants of the district were told they could return to their homes along the coast.

CREMONA-PIACENZA. No one without a pass may enter the zone north of the Po between CREMONA and PIACENZA under pain of death. Every night

(Deputy Chief) of the General Staff of the G.N.R. It is rumoured that he is much distrusted by the Germans.

VII. Last stand of the Fascists.

Fascists assert that at the right moment they will collect into the various Provincial capitals where they will put up staunch resistance to partisans until the arrival of the Allies, to whom they will surrender, as they trust in their clemency.

Divisional H.Q. is at present at FROSSASCO. Sources held that the 5th and 34th Divs would very shortly be concentrated in the PINEROLO-CUMIANA, ALMESE, PIVOLI and ORBASSANO zone.

CARMAGNOLA. An unusual movement of German officers has been noticed Gen. SCHRANK, G.O.C. 5th Alpine Div. was among them.

GENOVA. The Communal Printing Press has prepared notices ordering a curfew of 72 hours. In TORRALBA station 60 passenger coaches are kept at the disposal of the German H.Q.

IX. Escape Routes.

Since 25th March the transport of material through the BRENNER Pass, owing to interruptions has to be effected by rail from MILAN to LONATO (22 km S.E. of BRESCIA); by lorry from LONATO to PESCHIERA DEL GARDO; and from PESCHIERA DEL GARDA to RIVA DI TRENTO by barges and lighters.

Hundreds of political prisoners, whose transfer to Germany had begun, have not been able to continue the journey owing to the difficulties on the lines of communication, and they have been lodged in concentration camps in BOLZANO.

XI. Atrocities.

REGGIO EMILIA. In reprisal for patriot attacks at FABBRICO 40 men picked at random were shot; at VILLACIDE 21 men. In REGGIO 4 political prisoners were shot and their bodies exposed for some days in Via Porta Brenone.

IMPERIA. MOLINE DI TRIORA. 27 persons burnt alive in a house

The villages of BADALUCCO, PIGNA, CASTEL VITTORIO, ANDANIA, VILLA TALLA, CERIANA, POGGIO DI S. REMO have all lost over ten inhabitants each, shot in reprisal.

BELLUNO

1. In one week 49 people were hanged in reprisal.
2. In consequence of a mine explosion which killed three Germans 10 political prisoners were hanged. Amongst them was Doctor Montagna of Bologna whose leg became gangrenous through ill-treatment by a German Sergeant-Major. The day previously the same Sergeant-Major beat a woman to death.
3. A few days later four more people were hanged in the main square of Belluno. As usual the population was forced to witness the execution, children of under 10 years included. Two other prisoners were forced to act as hangmen. One of the victims, seeing that his friend who was holding the rope, was trembling, threw himself off before the ladder was removed. 4. At the same time 35 people were hanged in various small towns and villages round Belluno.
5. The reason given for all these reprisals was that 200 partisans had repulsed 1000 Germans on the TRICHIANA road.
6. General SCHOLL is O.C. of the district. This is the man responsible for the massacres carried out in Naples before the Allies arrived.

POLITICS

XII. The Opposition Group.

The efforts of Mussolini to give the impression that Fascism is no longer totalitarian, but allows free criticism and opposition, has produced queer camouflage. Mussolini has compelled his own paper "Repubblica Fascista" to put a printing press at the disposal of CIONE's paper "Italia del Popolo", its direct competitor. The Repubblica Fascista of 4th April fiercely attacked "Italia del Popolo" for"criticising the Government at a moment when all Italians ought to clench their teeth ".

On 11th April "Intelligence Suisse" reported that the Minister of the Interior had suspended the Italia del Popolo because, according to him, the paper had not kept its promise to limit itself to fair and constructive criticism. The Editorial office had already been militarily occupied by disabled ex-servicemen following an attack by the newspaper on the President of Disabled Ex-Servicemen's Association.

XIII. Mussolini's Last Ditch.

Popolo e Liberta of 12th April states that Mussolini's idea of a Fascist Redoubt in the Valtellina, communicating with the German redoubt through the Tonale Pass is gradually taking shape. The Under-Secretary of the Ministry of the Interior,Giorgio PINI, recently visited the region, as well as PAVOLINI (now residing in Como and engaged in mysterious activity) who frequently inspects the area.

It is rumoured that the Federal Commissioner of COMO, PORTA, has been charged with mopping up in the Valtellina, as the patriots are quite active in the region.

XIV. More Fascist Trickery?

Some time ago it was rumoured that Mussolini was intriguing with Leftish elements to save his own position. Apparently he was approached by emissaries of the National Republican Socialist Group, said to be MARCO VISCONTI and MICHELINO VIGORELLI, and granted them interviews at GARGANO SUL GARDA on 10th and 11th March. Their proposals shortly were as follows:

In the event of a German defeat:

1. The most important thing was to prevent the Bonomi Government from spreading into N. Italy.

2. Mussolini and the Fascist Forces were too weak to stop this.

3. Therefore a fake revolt would be staged and Assemblies of workers, technicians and farmers' councils would seize power in the large centres. These would be supported by G.N.R., 10th M.S, Airforce, "Muti" Legion and the police.

4. This would automatically nip in the bud any Communist coup and would cut out the Committees of Liberation, which do not have the confidence of the anti-Fascist masses as they are formed by Reactionary Monarchists and British Agents (Sic).

5. The Allies would not sacrifice their soldiers' lives to fight such a government just to support the Bonomi Government, and would probably fall back on Mr. Churchill's and Mr. Macmillan's declarations, which suspend any plan for the settlement of Italy until the people of the North could be consulted.

6. The Allies would then invite the two Governments to negotiate

7. From the negotiations would emerge a Republic and Socialisation and Mussolini again.

It is believed that Mussolini turned down the scheme because he was not convinced that Germany might not win and did not think the aforesaid " Councils" were properly prepared as yet.

FARINACCI Farinacci is reported to have moved to a large villa in COMO.

The Antifascists.

The parties have struggled on with difficulty ever since, particularly the Communists, who, according to the source, always find their leaders arrested after every contact they make with the Slav Communist Party. TRIESTE is promised prosperity after the war as a Slav port and the Italians are promised good treatment.

The other Italian parties are much depressed because the Rome Government will not or cannot make any statement on TRIESTE, and the Italian inhabitants feel they have been abandoned.

XVI. S. REMO

The Committee of Liberation was well organised and maintained daily contact by courier with the main Committee of Genova. The many small Ligurian bourgeois in these parts with their modest, but well-husbanded wealth tend much more towards a mild Socialism. In fact the S. REMO area contains many more moderate Socialists than Communists. Of the five Parties in the C.L.N. the Christian Democrats were definitely the more numerous. The bulk of the farmers and peasants belonged to this party, as the clergy were very influential. The 2nd Garibaldi Division contained few Communists. The majority were "Independent", ie. prepared to swing either Left or Right according to the way things went.

Since MONTECATINI were compelled to reduce their output of artificial fertilisers the harvest in N. Italy is expected to be much reduced in 1945. At present grain reserves in PAVIA, CREMONA, MANTUA and MILAN areas are so much reduced that there is little hope of tiding over until next harvest, unless the bread ration is greatly reduced.

The Maize and rice situation is moderately good and this will enable the population to subsist except in the over-populated area of MILAN. Great numbers of cattle have been killed, particularly near MANTOVA and sent to Germany by train and even aeroplane, but recently the drain has been slowed down owing to the resistance of Italian officials.

SUPPLEMENT TO
SPECIAL REPORT ON CLANDESTINE PRESS IN ENEMY-OCCUPIED ITALY
DATED 13 FEB 45.

I. INTRODUCTORY

1. Sources: Unlike the original report, this Supplement is based mainly on examination of actual copies of clandestine newspapers. Such items are distinguished by having the title typed in capitals (e.g. DEMOCRAZIA). In each case a brief description of the paper and a summary of contents is given.

A few items have been taken from News Digests and from the Occupied Italy Reports of "D" Section, PWB, for FEB and MAR 45. These are indicated in the same way as in the original report.

In addition, several items have been used which have not as yet been included in the Occupied Italy Reports, obtained by interrogation of persons who have recently crossed the lines. These are indicated by initials followed by a date; the latter shows when the informant left the area concerned.

2. Scope : These reports claim only to give a picture of the clandestine newspapers printed and circulated in enemy-occupied Italy. The following closely related categories have accordingly been excluded as far as possible:

(a) Newspapers printed in Liberated Italy, Switzerland, France etc. for circulation in occupied Italy.

(b) Clandestine pamphlets, leaflets, hand-bills, proclamations, etc.

For ease of reference, an alphabetical index of newspapers, covering both the Report and the Supplement, has been added.

For the same reason the system of paragraph numbers adopted in the report has been carried over to the Supplement (e.g. para 3 in each case deals with Party Papers and para 11 with Genova). Where no new information has come to light the paragraph has simply been omitted (e.g. para 10 FIUME). It has been necessary to insert two new paragraphs to deal with circulation and EMILIA-ROMAGNA editions respectively; these have been numbered 3 bis and 9 bis to fit into the general scheme.

"'L'Illustrée', 15 MAR 45: Northern Italy is teeming with clandestine newspapers. The most important are 'Democrazia', the organ of the Christian Democrats, 'Uomo', the organ of the Catholics of the extreme Left, 'Il Ribelle', belonging to the partisans, the Communist 'Unita', and 'La Sferza', which is not connected with any party and which issues 5,000 copies. This is a large number compared with the other forbidden newspapers, which issue about 1500 copies, and all the more remarkable in view of the difficulty of obtaining newsprint, and

the necessity of camouflaging the printing.

Today the Fascist press is printed on the poorest paper and its circulation is constantly reduced owing to lack of paper. On the contrary 'La Sferza' appears with four pages. A recent number reproaches MAGISTRATI, CIANO's brother-in-law, who until recently was Italian Minister in BERNE, with having married a German from BREMEN, and with speculating in stamp issues from Campione. It asks patriots who have taken refuge in Switzerland to return to Northern Italy and share the dangers faced by the resistance movement. It attacks the parties which already believe that the time has come to fight against each other or merely to exist.

'La Sferza's' success is symptomatic. It proves that northern Italy tends toward calm, is disgusted with adventures and wishes for both social and international preace. After liberation, though a short outburst against the torturers mus be expected, the active, practical Milanese will certainly be more concerned with the work of reconstruction than with dreams. This is what 'La Sferza' emphasizes. It writes...These lines are written by a famous journalist still compelled to remain anonymous." (ND 10 MAR 45).

"(In PIEDMONT and LOMBARDY) 'Il Ribelle' (of the Fiamme Verdi), 'Il Combattente', 'L'Italia Libera', 'Il Partigiano Alpino' and many other party pamphlets circulate. They have quite a high circulation."
(L.S. 2 FEB 45)

"'La Patria', FLORENCE, 23-4 MAR 45: Among these publications of the clandestine press publications relating to women and to feminine partisan activity as a whole in Occupied Italy also have a place.

Interesting facts as to women's contribution to the resistance and liberation struggle are given in a recent number of the paper 'Noi Donne', published clandestinely in northern Italy.

At the end of last DEC, states the paper, on the completion of the first year of life of the 'Gruppo di Difesa delle Donne', the organization, from the first small initial nucleus had gathered in about 30,000 women, and this figure was still steadily increasing...The members are of all political trends and of every religious creed. The 'Gruppi di Difesa delle Donne', which in Liberated Italy have been fused in the 'Unione Donne Italiane', have been present in all the struggles, strikes, agitations against the raids and deportations on the part of the Nazis, and have reacted in every way against all forms of enemy violence. The 'Volontarie della Libertà' have given and give their services in the patriot formations as doctors and nurses, and carry on liaison activities, taking part in dangerous actions... At

The "Marcello" Band, previously reported as forming part of the Modena Div., is now disowned by that formation owing to the behaviour of its commander "Marcello", a captain from PARMA. It numbers about 300 men and operates in the M. S. MARTINO Area.

General Situation

In North Italy a feverish state of expectation reigns among the patriots. General Clark's last message has roused all hopes, and an Allied advance will in all probability be the signal for a general insurrection. Italians claim that armed patriots now number 200,000, of whom 60,000 are in organised formations, 40,000 are in small independent groups, and the rest are scattered throughout all the cities and towns of N. Italy. The workers of MILAN and TORINO are in a constant ferment. In MILAN alone 14 strikes were recorded from 5th to 10th February, and the agitation has spread to LIGURIA. Surprise attacks on Germans are increasing.

II. Recent Partisan Activities.

PIEDMONT

VAL GRANA On the night of 11/12 February elements of the "Paolo Braccini" Brigade attacked the last evening train from TURIN to CUNEO in S. Benigno station. Eighteen prisoners were taken, including a German Captain, a lieutenant of the Littorio Div., a Warrant Officer, and four German N.C.Os and 2 soldiers. Two Germans were killed in the fighting and an unknown number blown up when the train ran on to mines. The patriots took many arms and suffered no losses.

On the 13th German detachments and elements of the "Aldo Resega" Black Brigade of MILAN, of the Lidonnici Black Brigade of CUNEO, of the Littorio and M. Rose Divs and of the R.A.P. of TORINO, attacked the 1st Alpine Justice and Liberty Div. in the VAL GRANA and lateral valleys, especially VAL MAIRA Most of the attacks were beaten off with loss and it was only when "Gino" the chief of the Predieves band of the "P. Braccini" Brigade was killed that the band retired in good order. On the 17th the attackers abandoned the valley. In the VAL MAIRA the enemy was attacked and driven off with loss. Enemy losses amounted to over 100 killed, wounded and missing. Patriots lost "Gino", a Russian Major Kanoh, and two other partisans killed, no wounded or prisoners.

On 20th February a German column attacked a detachment of the C. Rosselli Brigade in the VAL STURA. After four hours fighting the patriots retired without loss, having killed two Germans and seriously wounded 2 others.

On the night of 22/23 February patriots of the Val Grana Brigade and 20th Brigade blew up the railway track together with

Garbagna (18 km E of Novi Ligure) Black Brigades from Tortona and Novi Ligure sent into the Garbagna zone about mid-March to mop up, suffered heavy losses in men and material.

Varzi-Ponte Nizza (28 km & 18 km S.E. of Tortona). About mid-March Turcoman, G.N.R. and "S.Marco" Div. detachments were driven off by patriots and lost an armoured car and many automatic weapons.
Brianza (24 km N. of Vercelli) The Republican garrison was overwhelmed. 6 Fascists were killed and 6 captured.

Guarna (14 km W of Stresa Borromeo) On 15th March the entire Republican garrison of 40 men was captured, as well as much material, by a surprise attack.

LOMBARDY

The only information available for this period comes from the Swiss press, which reports the following:-

Milan 15th March. An encounter occurred in Milan between Nazi-Fascist groups and partisans who tried to disarm the former. Two partisans were captured and shot, the Nazi-Fascists lost two killed and four wounded. The Fascist Press reports that recently small groups of partisans have repeatedly tried to disarm German and Fascist soldiers in the streets of Milan.

Castel San Giovanni (Piacenza) 400 Vlasov Russians joined the Maquis.

Caponago (Milan) 200 partisans attacked a store, killed five German soldiers, wounded ten and captured important material.

Maddalena Lombarda (Varese). 17 partisans captured 153 men in the Fascist barracks and seized food supplies and much material.

Milan. Partisans raided Niguarda civil hospital, liberating 25 political prisoners and disarming 40 policemen.

FASCIST FORCES

III. New Divisions and Battalions

The Staff of the Fascist Army is reported to have studied the possibility of forming new Divisions out of the G.N.R., but the lack of arms, equipment, the shortage of efficient officers, especially in the senior ranks, and the very low fighting spirit of the G.N.R., have proved to be insuperable obstacles.

Several odd battalions have been scraped together out of G.N.R. elements and one or two have been used in operations against partisans. An armoured group "Leoncello" is said to be in process of formation in some locality, as yet unidentified. It is suspected that this will proved to be the barracks of the 24th Legion G.N.R., Milan. In VARESE a "Tevere" battalion has been formed out of individuals from Latium and Umbria, residing in N. Italy.

IV. Black Brigades.

The 35th Black Brigade "Italo Barattini" was formed in

Declassified E.O. 12356 Section 3.3/NND No. 788021

February in APUANIA. It consists of a weak Bn. commanded by General BIAGIONI, former Consul of MVSN and Federal of Apuania. 2nd in C is Lt. Col. LODOVICI, a lawyer of CARRARA.

V. Warning against Partisan Infiltration.

It is reported that the Staff of the Republican Army has issued a circular reminding units of previous instructions on the prevention of infiltration by numerous partisan elements, who may try in this way to avoid being mopped up and preserve themselves for a more suitable occasion.

VI. Desertions

Desertions from the "Monte Rosa" Div.

In the night of March 16th an entire company, stationed in the zone CESANA TORINESE-BARDONECCHIA, deserted. This probably is part of the "Tirano" Bn.

Desertions from "Littorio" Div.

A report dated 17th March states that 200 men of the "Littorio" Div. deserted to the 1st Alpine Justice and Liberty Div, bearing P.W.B. leaflet No F/I1. As a result of our leaflet operation, units of this Div are forbidden to have H.Q. located in towns or villages.

VII. Morale of Italian Divs.

The interrogation of deserters and P.Ws from "Monte Rosa", "Littorio" and "Italia" all agree that the essential reason for the miserable morale of these Divisions is not based on any ethical or political principles, but is simply the sheer and utter war-weariness of the men. Typical is the P.W. who, when assured by his German Sergeant Major that the war would end in 1946 with a German victory, was much distressed, not at the thought of a victorious Germany, but by the appalling idea that he must wait until 1946 for peace. The only influence that keeps them together is their fear of their German N.C.Os, fear of ill-treatment by partisans and fear that the Allies will keep them under arms to fight the Japanese.

This depression is not relieved by the attitude of the population. When the Italia Div. passed through MANTOVA, the only city traversed in the day-time, the troops marched through the streets amid the icy silence of the people. The only words uttered were words of pity and commiseration from a woman who cried out "Poor boys - poor Mothers".

VIII. Mussolini's Socks and Shoes for the "Italia" Div.

A P.W. of the Italia Div. states that the following letter from Mussolini to Gen. MAINARDI was circulated among the "Italia" Div. As far as he can remember it ran thus.

"Dear Mainardi,

The bearer of this letter will bring to you 2,000 pairs of shoes and 30,000 pairs of socks. Vehicles, arms, munitions and clothing will follow. Tell your Bersaglieri just to have a little

more patience (They have already had so much)

The uniform for the entire "Italia" Division will be the Blackshirt and the helmet with plumes.

Yours devotedly.
Mussolini".

IX. The Ettore Muti Legion.

The Duce has conferred the Military Cross on the Legion as a reward for recent operations against partisans. A communiqué published on this occasion announced that the Legion had lost 85 killed and 300 wounded. As is well known, the Legion is only employed in fighting the Italian maquis. It appears, nevertheless, that the Legion is not entirely trustworthy, as it is reliably reported that a large proportion is ready to go over to the Communists with arms and equipment when the Germans withdraw.

X. Mopping-up Operations.

The "Regime Fascista" of 13th March claims that mopping-up operations in the ..STI region liberated certain localities which had been Partisan H.Q. and inflicted heavy losses, with hundreds of dead and prisoners and large captures of arms and ammunition. This seems to be the Fascist version of the fighting round CISTERNA and ..STI.

"Transocean" states that up to date the losses of the G.N.R. have been 2,763 killed and 3,707 wounded.

XI. Kesselring's Successor.

Since our last report Kesselring has left the Italian theatre, and speculation is rife in regard to his successor. Four candidates have been mentioned.

(1) General Oberst Von VIETINGHOFF, commanding the 10th Army, has been in Italy since the earliest days of the Italian campaign, and took over from Kesselring during his illness. Under his command German troops suffered heavy and unnecessary losses.

(2) Gen. Von LEMEISEN, commanding 14th Army.

(3) General HEIDRICH, commanding 1st Paratroop Corps, is a more junior commander, but has much to recommend him. He is a staunch Nazi and full of the offensive spirit. At least

(4) Waffen S.S. General WOLFF. This mysterious individual is Himmler's Plenipotentiary in N. Italy, a friend of Rahn the German Ambassador and appears to have a finger in many pies such as partisans, Fascist Forces, Loot, Demolitions, Administrative problems etc. While he does not appear to be a very suitable person for a Military Command, he is not to be excluded. Italian circles in the North rather incline to think he may be the eventual successor, especially as he seems to have left for Germany very recently.

XII. The Defence of N. Italy

While no doubt it is an essential part of German policy to cling as long as possible to N. Italy as the last remaining source of food and war materials outside Germany, it can be no part of German strategy to permit 24 Divisions to be cut off and lost.

Kesselring certainly has done everything humanly possible in the way of fortification and demolition to cope with the problem set him by this general policy, but in view of the drain on his resources of manpower owing to the recall of troops to Germany, no other solution is apparent except that of contracting his front and abandoning territory.

Four Divisions have already left and it seems that a fifth is already on its way. The first reasonable step to take would appear to be the abandonment of Piedmont, Liguria, Emilia and a withdrawal to the fortified lines of the Po and the Ticino. It seems that the movement of Republican Divisions into the valleys of the Lanzo and of Susa and Aosta, the requisitioning of quarters in the Pinerolo-Cumiana-Orbassano zone by billeting officers of the 34th Division and the exceptional police measures ordered, all point to the withdrawal of the 5th Alpine and 34th Divisions from Piedmont at an early date, which must lead, sooner or later, to the abandonment of the Apennine line.

On the other side of the theatre Kesselring has always shown a certain nervousness in regard to possible Allied landings on the N. Adriatic shore and operations in combination with Jugoslav forces. To cope with this threat it seems that PERNUMIA (about halfway between PADUA and MONSELICE) which was already the site of a considerable H.Q. may be transformed into an Army H.Q. or at least an Army Corps H.Q., which could co-ordinate the troops already stationed in the Veneto and use them to cope with any Allied landing. Troops movements are reported as having taken place towards the PADUA area in accordance with this plan.

Whether there will remain enough Divisions to hold the line of the Po or whether indeed it will be at all possible eventually to effect a retreat through the Brenner or by TARVISIO, are problems that Kesselring's successor will have to solve.

XIII. German and Fascist relations.

From GENOVA it is reported that after a year and a half of occupation the German troops are beginning to be tolerated and even, in some houses, to arouse a certain sympathy, which contrasts with the violent hostility of which the Republican Fascist troops are the object. Relations between these troops and the Germans are generally not good. The Germans do not attempt to hide their scorn for what they consider to be - not an army - but armed bands capable of any kind of betrayal and baseness. In September last, Capt. Wagner, Commandant of the SS in Genova, said in front of numerous witnesses, to the Prefect of Genova that he would be glad to see the war ended so as to be able to make a clean sweep of all

XIV. Atrocities.

CAVOLA (commune of Toano) in September 1944. The Germans captured 11 Modenese partisans. After a summary interrogation, one was hanged by a hook in his throat. A second man, who asked for a less horrible death, was beheaded. A third who asked to be shot, was disembowelled. The rest were killed by bayonetting and shooting in the same room. The German SS who were responsible for this atrocity are now (March 1945) stationed at S. POLO D'ENZA.) The name of the officer in charge was communicated to the Allies by the Partisan Intelligence Section.

CELLA (On Via Emilia) In January/February 1945 German SS with some Mongolian assistants removed 20 hostages from PARMA prison and returned to REGGIO. Passing through Cella, they began to kill the hostages and to throw the corpses out of the lorry, along some ½ of a kilometre. The bodies were left for 3-4 days as no one was allowed to move them.

VILLA SESSO (R. Emilia) Some Period. As a reprisal for a partisan attack on a German car the Germans shot 17 picked at random from passers-by.

MINOZZO July 1944 A young man, son of the local elementary school mistress, was arrested by the Germans on suspicion of being a partisan. Actually he was a Fascist. He was tied to a lorry and dragged for 10 kilometres. Then finding him still alive, they put a cord round his neck and, passing it under his legs, drew it tight until his spine was broken. The body was left exposed for a week. When at last his mother was allowed to bury the body it was unrecognisable.

In the same village, in August 1944, a number of men were rounded up. One of them, a well known mental deficient, began to toy with a German's rifle, whereupon they immediately selected 5 of the men and shot them out of hand.

CERVAROLO March 1944. During a round up the whole male population of the village, 26 in number, were shot. 24 were killed, 2 were wounded and escaped after feigning death among the corpses. Among the victims was the parish priest, 70 years of age. He was arrested, together with two old sisters who kept house for him. They were all stripped naked and the priest was forced to walk for an hour round the Church with his hands up. The women were released, but the priest was shot.

REGGIO EMILIA. In the Servi barracks political prisoners were tortured with the "giro della scala". The victims were forced to go up and down stairs and at every landing a uniformed Fascist thrashed them until blood flowed. This was done by order of the Maresciallo SISTOLI, who was eventually executed by patriots in February 1946. The above system lasted during the spring of 1944

This torture is often repeated even over the wounds caused by previous treatment.

XV. German Looting of N. Italy

The following figures give the amount of foodstocks supplied to the Germans by the Fascist Government in 1944 (period ending July 1944) and partly consigned already and partly promised for the same period in 1945 (Aug 44-July 45)

	Up to July 44	Aug 44 - July 45
Wheatflour	800,000 Quintals	1,197,000 quintals
Rye flour	800,000	1,197,000
Rice	55,000	73,000
Pasta	210,000	300,000
Maize	-	24,000
Oats (flakes)	1,000	1,000
Various flour	48,000	52,000
Rusks	7,200	7,200
Biscuits	7,200	7,200
Beef	288,000	408,000
Pork	36,000	49,800
Cheese (hard)	12,000	16,000
do (other kinds)	45,000	82,000
Condensed milk	2,400	2,400
Potatoes	400,000	700,000
Tomato concentrates	7,000	35,000

Until March 1944 part of the German troops' rations, e.g. Margarine, tinned vegetables came from Germany; since that date practically everything has been drawn from Italian resources.

The following Italian machines were exported from Italy to Germany through one transit station during 1944:

Machines	No of goods trucks	No of tons
Typewriters, calculating machines	113	678,6
Stoves, economic cookers, refrigerators, field kitchens	1,112	875.8
Electric machines and equipment (motors, vehicles etc)	96	1,431.3
Weaving machines and spare parts	24	180.2
Ball-bearings	2	22.5
Sewing machines	206	1,300.0
Photographic Equipment	1	5.3
Tools, such as spades, pick-axes etc.	9	180.8.
Measuring instruments (meters, pressure guages, scales)	8	66.9
Miscellaneous and precision instruments	28	507.0
Carbons for electrotechnics	61	865.3
Insulating materials	2	6.5

Minerals and Metals.

The following Italian Minerals were exported from Italy to Germany through the transit station:-

Minerals	No of goods trucks	No of tons
Iron pyrites	50	878.4
(During the last quarter of 1943)	474	12,509 .0
Fluorspar	649	12,980.0

Lead cakes, scrap	8	117.5
Quicksilver	10	162.0
Empty containers (wood and iron barrels, casks)	65	259.6
Sulphur	5	92.0

In view of these figures it is not surprising that at the end of January Reichsminster Speer made the following pronouncements the importance of North Italy and its industry for the Germen war effort

1. In case North Italy is given up the Reichs-ministry for armament and war production will be forced to restrict execution of orders in a number of war production lines, which according to current declarations of the CKH and OKL are indispensable.

2. Currently 2 8 million people are engaged in North Italy in war production, exclusive of agricultural workers. Half of these engaged in war production are of direct service to the German armament production. The use as well as the maintenance of these people outside of North Italy will not be considered.

POLITICS

XVI. The Fascists

Reports from the North indicate a chaotic situation and growing anxiety among the Fascists. The new "opposition group" seems to have been a bitter pill for FARINACCI. In an article attacking the

Declassified E.O. 12356 Section 3.3/NND No. 758021

the group he was forced to admit that "our implacability in support of the single Party and the totaliterian Fascist State has suffered a blow", but nevertheless he predicted "sooner or later a natural or violent death" for the group.

Some indication of the terror inspired by the patriots is given by the following Regulations which were posted on the walls in MODENA during the past winter.

(1) Overcoats were prohibited. This in spite of the rigours of winter, but Fascists suspected a Tommy-gun under every overcoat.

(2) Bicycles were prohibited.
(3) It was forbidden to walk in the streets with one's hands in one's pockets.
(4) On being challenged one must halt and put one's hands up.
(5) Unusual moustaches, whiskers, and coiffures were forbidden. This was presumably a precaution against the wearing of disguises and not an attack on "Liberalism".
(6) Wearers of spectacles had to produce a medical certificate regarding their visual inability.
(7) Double-breasted jackets were prohibited. These could also harbour tommy-guns.
(8) Heavy boots, particularly Alpine or skiing type were prohibited Presumably one's patriotic ardour would fade before the prospects of mountain walks in slippers.

To avoid molestation a wise man would wear a citizen-like shirt, high collar and a smart tie. Thick woollen sweaters betray the partisan.

Passengers' luggage was carefully checked. Any excess was dangerous; it might reveal one's position as a Partisan's medical officer. It was imprudent to walk in the streets wearing a bandage, a possible souvenir of some fracas with Fascists.

The New "Opposition" Newspaper.

We have been promised a new newspaper, the "Italia del Popolo". This, the official organ of the legitimate Opposition in Fascist Italy, is to appear for the first time at the end of March. The Editor-in-Chief is Edmondo CIONE, Leader of the Opposition. The appointment is a novelty in itself, since Cione is not a registered journalist.

XVII. Growth of Communism in the North.

The Communist Party is making a great drive in the North to recruit adherents. Their clandestine paper "Unita" claims that by the end of 1944 90,000 members were enrolled. The exact results of the new campaign are not yet known, but the number of members is [illegible] Though some resistance was encoun-

ECONOMICS

XVIII. Food Situation

Salt. It is rumoured that the salt sent from Germany to Milan is exclusively reserved for members of the Fascist Party, and that this is the reason why recent trains bringing salt had to be escorted by G.N.R. units.

Maize for Bread. Corriere della Sera 9th March announced that maize flour instead of bread would be distributed on Sundays, March 11,18th and 25th at the ration of 200 grammes per person. Civilian and Military canteens, messes etc. are not excluded.

XIX Industry.

Socialisation On the 22nd March the Council of Ministers of the Fascist Republic announced that the Social programme of the Fascist Party will be carried out during the war. Therefore by April 21st all industrial concerns, with at least 100 workers and capital of at least 1,000,000 lire, will be socialised. And the present tenants, provided they have the necessary moral qualifications of loyalty to the Fatherland and to Labour, shall become the owners of the flats belonging to the Institutes of People's Houses (Istituti delle Case Popolari) and to other concerns which have built houses for war-disabled, ex-servicemen, workers and public officials. In MILAN alone this measure affects 15,000 flats belonging to the Istituti delle Case Popolari.

The E.I.A.R. at Bologna The E.I.A.R. transmitting station at BUDRIO, with 50 K.W. aerials, functioned regularly under German control up to the end of September, when it was hurriedly dismantled by them and it is rumoured taken to TRIESTE. The two towers which supported the radiating system were blown up. The studios, situated in BOLOGNA, were also completely dismantled and all equipment transferred to MILAN.

The E.I.A.R. moreover had a 250 watt station in the city itself and a jamming centre in the IDICE area, but both these have been completely demolished and removed.

The move North was not followed by E.I.A.R. personnel, who are presumably still available in BOLOGNA.

APPENDIX I

The Political Situation in Piedmont.

The Communist Party.

The Communists are by far the most powerful and best organised political force in the city of TURIN and find their adherents amongst the majority of the industrial workers. Their leaders are "Nogarville" (Rossi), who is at present in Rome and is a member of the directorate of the Communist Party, and Professor Jaymonat, Doctor of Philosophy and Higher Mathematics. The latter is about 40 years of age and is an energetic, intelligent and highly cultured man.

The Socialist Party.

The Socialists are few in number and have rallied to the Party out of loyality to the old names and traditions of Socialism. For all practical purposes they make common cause with the Communists. Their leaders are Piero Fassoni, Bonfantani and Chiaramello (who was in prison last autumn).

The Party of Action

As is well known, the Party of Action has lost many of its members to the older parties, when these were able to raise their heads once more on the fall of Fascism. The Party of Action, however, still has considerable influence in Piedmont, which has been enhanced by the very determined resistance put up by them against the Germans and Fascists after the Armistice and has a wide following among the younger professional men, intellectuals and students. Their leaders are Avv. Ducio Galimberti (recently captured, tortured and murdered)

Avv. Andreis
Avv. Bianchi
Avv. Pacci
Sig. Scamuzzi and several judges and magistrates.

Christian Democrats.

The Christian Democrats, although they support an agrarian policy with some tendency towards Collectivism, are inclined to ally themselves with the Liberal Party. The Christian Democrat Party is still in progress of re-organisation, but it is expected to be able to count on the adhesion of ex-members in the province of Cuneo and also in the country districts of the province of Turin The "Catholic Action" has always been very strong in Piedmont and is also likely to provide adherents. The leaders are:

of the majority of the middle class. In the province of Cuneo (a stronghold of the old Liberal Party) it has considerable adherents among students and professional men. There is still a minority which favours monarchical institutions; the majority are either republican or merely sitting on the fence. In any case hostility to the person of the present King is practically unanimous. The leaders are:

S.E. Soleri (now in Rome. Minister of the Treasury in Bonomi's Government)

Prof. Greco (of Turin University)
Marchese Fracassi

Relative Strength of the Parties in Piedmont.

Generally speaking the masses in Piedmont are divided, like the rest of Italy, into two main groups. The industrial population of the cities, which is Communist and the rural population of the country which is Christian Democrat, with enclaves of Liberals and Party of Action. Thus in Piedmont, the Liberal Party predominates in Cuneo and Mondovi. The districts of Saluzzo, Bra and Alvese, which are generally agricultural are predominantly Christian Democrat, though the Communo-Socialists have small nuclei in the towns of Mondovi, Savigliano, Fossano. In Turin the Communo-Socialists are of course in the great majority and are supported by the Party of Action. While the Party of Action may not be very numerous, their moral influence at least is very great. After the Communist Party the Party of Action has been the most active and determined opponent of Nazi-Fascism. If we take into account that of the armed and organised Partisan formations, while the Communist Party has raised 60%, the Party of Action has raised 30% in their Justice and Liberty bands, that the losses among their devoted leadership have been enormous, and that the bulk of the Anti-Fascist propaganda printed emanates from their very able writers, then it must be admitted that proportionately to their numbers, the Party of Action has far and away been the leading element in the struggle for Liberty.

Division of Municipal Offices between the Parties.

In Turin the Communo-Socialists and the Party of Action claim the entire local Government. In Cuneo the Liberals and Christian Democrats claim the Prefecture and the Municipality, while the Party of Action have been allotted the Presidency of the Province.

Probable Reaction to the Allies on Liberation.

Probable Reaction to the Allies on Liberation.

There is not the slightest doubt that the Allies will be received with joy and gratitude, but these feelings are likely to change quickly enough if

(1) Local administrations nominated by C.L.N. are not recognised or at least not treated with tact by the Allies,

Political Situation In Piedmont 3.

(2) Any attempt at wholesale disarming of partisans is made. A large number of Fascist gangster elements are likely to remain in possession of arms and Fascist leaders have advertised the fact that in Torino they have been organising a "maquis" resistance movement to come into action after liberation. The existing "patriot" formations would be an ideal foundation on which to base a sort of corps of "vigilantes" to copes with this nuisance and to free Allied man-power for other tasks,

(3) The Allies make any effort to protect notorious Fascists from the vengeance of the people. It must be remembered that since the Armistice the inhabitants of N. Italy have endured the long agony of Nazi-Fascist occupation. There is not a single Anti-Fascist family that has not had some member imprisoned, starved, robbed, tortured or killed. Wholesale starvation, forced labour, deportation requisitioning of food, cattle and property has been their daily fate. It would not be human if these victims were to content themselves with the slow procedure of "Epurazione" or the niceties of Anglo-Saxon Common Law,

(4) If, in the event of wholesale destruction of power-stations, industries and communications, the Allies do not give every assistance to or at least remove all bureaucratic restriction on the very capable leaders of the North in their efforts to restore order, and combat starvation and unemployment.

The Communists and the Italian Government.

Many fears have been expressed over the possible revolt of the northern C.L.N. against the Government. Such a move is most unlikely seeing that the majority of the "violent and agressive politicians of the north" are at present in Rome, and many of them are actually in the Government. If these men are not allowed to proceed North on liberation and take over control of their parties, then the Allies will have to deal with men of second or third rate ability, and the political situation may quite easily degenerate into disorder and party warfare.

Economic Situation in Piedmont.

It is impossible to forecast what the position will be when N. Italy is liberated. If the Germans destroy the power stations and industries, then the economic position of the cities and towns will be disastrous and unemployment will be wholesale. In any case there will be little or no food reserves in the North owing to German requisitions until the next harvest in June-July. It is probable also that the harvest will be deficient owing to lack of tractors, petrol and oxen for ploughing. It is more than probable that transport facilities will be non-existent. Allied bombardment and patriot saboteurs have thoroughly disrupted rail communications,

APPENDIX 2.

Political and Economic Conditions in the town of Genoa

General

The Germans have been occupying this area for over 18 months; the population has adapted itself to the presence of the Germans in their midst and on the whole gets on quite well with them. Fascist Republican troops are, on the contrary, universally hated and despised. The Germans themselves are not on very good terms with the Republicans. Capt. Wagner, Chief of the SS in Genoa, in December proclaimed loudly to the Prefect and a number of other people present, that he would welcome the end of the war so that a clean sweep could be made of all the Fascist rabble.

Resistance

Partisan resistance inside Genoa has not been possible on a large scale owing to very strong repressive measures taken by the Germans. However the C.L.N. of Genoa controls a number of organisations of fighting partisans which extend throughout the region of Liguria. Here are the main parties with some of their representatives.

Liberal Party Heads Avv. Martino; Prof. Sello; Prof. Falqui Giorgio (pseudonym); Ferdinando Mer, Chief of the Military organisation of the party, regular Italian Army captain; Saveretti. This party claims about 4,000 members recruited chiefly amongst the "upper classes". Only 300 of the members are armed.

Communist Party Led by Marioni; Avv. Messa; Avv. Giusti (youth organisation) "Spartaco", terrorist activity. This is the strongest party in Genoa and claims a membership of about 12,000. The large industrial population of Genoa has always been very Communist in tendency; the C.L.N. controls the activities of this rather violent working population only up to a certain point. Discipline of the party is not as strong here as it is in other parts of the country, especially in Milan. This is due partly to the ruggedly independent character of the Genoese people. The Party has displayed a very marked activity in all spheres, especially welfare and Fascist "executions". Their propaganda has of course been very pro-Russian. The party has under its control, "for the execution of obnoxious Fascists", 12 G.A.P. Sections. 4000 Communists in Genoa are reputed to be armed, mainly with pistols but a certain number of automatic weapons is also available.

Christian Democrat Party Representative members: Taliani,

This party, as in other parts of Italy, is gaining influence and ascendency, and its numbers are increasing daily. It is by far the most important party in Genoa after the Communist Party. It is, of course, well supported by higher and lower clergy; it is reported not to have a military organisation in the town. Its membership is about 4,000, and it is interesting to note that this is increasing, especially among the workers.

Political and Economic Conditions in Genoa 2

Socialist Party The Socialist Party is suffering all over Italy from a severe handicap, that of poor leadership. This applies to Genoa also. Its representative members are De Franceschi, Quarello, Venturini, Badano. The party is very weak in Genoa and seems to have no appeal for the younger generation. A fusion with the Communist Party was attempted, but without success. It has a declared membership of 2,800. The military side of the party is headed by Remo Poggio, who is an ex officer of the Italian army. 600 of its members are said to be armed, and it controls 3 G.A.P. formations, which are fairly active.

Action Party. Leaders. "Lino", Prof Bo. It has suffered a good deal from German and Fascist persecution; many of its members have been shot or arrested, and the party is, allegedly, on the verge of breaking up.

The C.L.N. of Genoa controls, through other C.L.Ns in the various main towns of Liguria, a fairly large number of armed bands. It is likely that these armed bands, recruited from local elements, will gravitate towards the nearest towns, i.e. Spezia, Chiavari, Voghera etc. But it is not excluded that, in the event of political developments not taking the desired turn, the C.L.N. of Genoa may order these "Divisions" and "Brigades" to concentrate on Genoa. The main formations likely to be met with are the 2nd Lunense Division, the 1st Ligurian Division, the Division "Centrocroci" (also called 2nd Liguria), the 3rd Garibaldi Division "Cichero" and the 2nd Garibaldi Division "Liguria" -Felice Cascione"

In the hinterland of Liguria, extending in a belt south of the road Voghera-Piacenza-Parma (highways 10 and 9) operate other important divisions, which although not strictly under the command of the C.L.N. of Genoa, may eventually gravitate towards Genoa or Spezia and Chiavari. These are the 3rd Lombardy Division, a Giustizia e Liberta Division "Fausto" and a Garibaldi Division also known as the Divisione "Mac".

Economic Situation

Life in the country surrounding Genoa has become increasingly difficult owing to the movement of troops, partisan activities and the bombing of roads. People have therefore been streaming into the town of Genoa itself for the past few months. Lodgings are very scarce and the Fascist authorities have tried to remedy this by instituting a special "Provincial Commission for Lodgings", which has not met with much success.

The food situation is even worse. Staple foodstuffs are shipped to Genoa from Alessandria, Tortona, Pavia, partly by rail and partly by road. The German railway-transport commander, Major Kalling, has put 15 railway trucks weekly at the disposal of S.E.P.R.A.L. But it seems that these can not be used to the full because of the state of disorganisation reigning in the Piedmontese agricultural centres, where the trucks are waiting to be loaded. This, in its turn, is due to the appalling conditions of transport facilities. In Genoa itself it is reported that only about 40

APPENDIX 3.

The Political and Economic Situation in Milan.

State of Parties.

As is to be expected in all large Italian industrial centres, the City of Milan harbours a numerous Communist Party. Proportionally, however, this is not so powerful as that of Turin, as Milan was the citadel of the old Socialist Party, which can still count upon a large following and should exercise a moderating influence. In contrast to Piedmont the Communist Party can muster many adherents throughout the province of Lombardy, owing to the existence of a highly industrialised population living in many busy cities like Varese, Como, Brescia. Throughout the countryside, however, the Christian Democrats are supreme and claim to be gaining followers daily. It is quite possible that, as the Communists and Party of Action were the first to enter the fray and have borne the brunt of the fighting, they are now feeling the effects of the drain on their man-power and the loss of so many of their best leaders. The Christian Democrats have been slow to organise themselves, but on the other hand have managed to conserve their energies and will probably be the political heirs to the heritage won by the extremist parties. It must be remembered that they can count upon the immense propaganda machine represented by the mass of the lower clergy and parish priests.

The Action Party have given their best men to the cause, and are depressed by their heavy losses. The Liberals find support among industrialists and also claim to have/the durable progress. It is possible that, owing to the wealth and personal influence of its members, the Liberal Party may spring an electoral surprise and display unexpected strength.

Resistance Organisations.

Latest reports from Milan are to the effect that the C.L.N.A.I. has decided not be increase the strenght of the partisan bands. This decision seems to have been taken for two mains reasons: (a) the desire on the part of the C.L.N.A.I. to save the lives of as many promising young democrats as possible, especially in view of the probable early end of the war, (b) in order to reduce the heavy cost of keeping a large force of partisans mobilised for a long period. The activity of underground parties in Milan is directed more towards supplying information of a military and political character to the Allies rather than actual fighting.

Partisan Formations

The fighting formations of the CLNAI which are most likely to turn up after the liberation are GAPs, SAPs and the Brigate Verdi of the ADDA Valley commanded by Maj. Sacchi. The 1st and 2nd Garibaldi Divs "Lombardia" in the Valtellina, north of Milan, and the 3rd Garibaldi Div. "Lombardia" in the Pavia-Voghera area, south of Milan, are Communist led and are likely to converge on Milan when the Germans clear out, from which Command they depend and from which they get most of their subsidies. The Commander of the 3rd "Lombardia" is an ex-Italian Navy Officer who calls himself "L'Americano". Little is known of the 1st and 2nd "Lombardia" Divs. The 3rd, according to reports which are not fully confirmed, consists of a force of about 3,000 men divided into "Brigades", 1st Brigata Casotti; 2nd Brigata Cappellini; 3rd Brigata Matteotti; 4th Brigata Crespi; 5th Brigata Val Staffora. They are at present operating under the command of Sixth Zone.

Milan and the Fascists.

Milan has always been the real political capital of Italy and centre of political thought and just as it was the stronghold of Socialism, so it was the birthplace of Fascism.

It seems that the Fascists have selected Milan as their last citadel and are preparing to defend the city to the end. Large numbers of Fascists have taken refuge here when they fled before the advancing Allies. The Republican Government has been at great pains to treat Milan as a privileged centre and much to the discontent of other great cities of N. Italy, there has been no lack of food or raw materials. All the existing industries in Milan are fully

Partisan Formations

The fighting formations of the CLNAI which are most likely to turn up after the liberation are GAPs, SAPs and the Brigate Verdi of the ADDA Valley commanded by Magg. Sacchi. The 1st and 2nd Garibaldi Divs "Lombardia" in the Valtellina, north of Milan, and the 3rd Garibaldi Div. There was a lack of fuel during the winter, when trees in the squares and public gardens were cut down, and transportation problems are acute, but it seems that the Fascists are ready to sacrifice the other cities in favour of their new capital

Political and Economic Situation in Milan 3.

The Economic Situation

Nevertheless, even more than Piedmont, Lombardy depends for its industries upon electric power. If the Germans are allowed time to destroy the sources of such power, then the situation in N. Italy will become really catastrophic.

The Committee of Liberation are fully aware of the danger. The Partisan bands have been warned to give the utmost protection within their power and it is claimed that in Milan alone 40,000 citizens are prepared to defend the city utilities and services from destruction. It however their efforts are unavailing, then the Allies must be prepared to cope with wholesale unemployment and distress.

General.

Latest reports from Milan are very optimistic. The town gives the impression of being very active and alive, throbbing with renewed vigour and purpose. Unemployment is an unknown thing, in fact there is a great demand for skilled and unskilled labour. Damaged buildings are rapidly being repaired, and the situation of the town is practically back to normal. Although partisans are being sought and often tracked down, the great mass of the population is on fairly friendly terms with the Germans. Far more disliked than the Germans are the Fascists, who are rapidly making large fortunes which they convert into foreign currency at the earliest possible opportunity. The dollar is said to fetch 500 lire the pound 600-650. The enormous difference between pound and dollar is said to be due to the vast number of forged Bank of England notes in circulation.

Morale.

Hatred of the Fascists transcends all other passions, but the Allies are by no means popular in Milan. The chief reasons are the alleged lack of assistance to the partisans (the case of Val d'Ossola is cited), the slowness of Allied operations, the apparent reluctance to organise a large Italian Army of liberation, and most of all the bombing of non-military objectives in some towns and the destruction of some industrial plants which were already inactive.

While most of these complaints will be forgotten in the exultation of liberation, the air bombardments will always rankel. When the mass funeral of the school children killed in the last big raid took place, many thousands of Milanese citizens participated, and they were by no means all Fascists.

Fascist propaganda avidly snatches at this heaven-sent opportunity to make the Allies hated, while Communist agents point out the superior conduct of Soviet operations. Milan will certainly require very tactful handling.

I. METHOD

1. Sources - Three main sources have been used in preparing this report :

a) "Annuario della Stampa Italiana" 1939-40 and 1937-38, for framework and general background.

b) PWB "D" Section Reports on Conditions in Enemy Occupied Italy (whole series).

c) News Digests - 1 September 1944-26 January 1945.

In order to distinguish recent news from background information items from the second and third sources are given in quotation marks. Sources and dates are quoted. (OIR = Occupied Italy Report; ND = News Digest).

2. Conventional Signs - + indicates control by Fascist organization or prominent Fascist individual; % indicates representation on the Fascist National Federation of Newspaper Editors and Press Agencies. (Both references to 1940).

II. GENERAL INFORMATION

3. Nationalisation - "All newspapers have been socialized. A paper of the VENETO in PADUA anticipated the law and, on its own initiative, turned itself into a joint stock company with its staff as shareholders. The press is making good profits. Advertisments yield sufficient profits for the workers to receive normal dividends. Losses have up to now been met by the State." (OIR 30, PWB Florence, 18 September 1944)

"Italian Home Service (enemy-controlled), 24 January 1945: In six months the following undertakings have been socialized- publishing and press; 32 undertakings with 6000 employees and 185,000,000 lire capital; printing: 20 undertakings with over 5000 employees and 50,000,000 lire capital; paper: 5 undertakings with over 10,000 employees and 500,000,000 lire capital."
(ND 26 January 1945)

4. Circulations - "New dailies are springing up in Fascist Italy like mushrooms after the rain. A region which a year ago had only 31 papers now has 48. Every town with more than 50,000 inhabitants has its own paper. The large number of new papers in the provinces is indirectly due to transport difficulties. The big papers in MILAN, TURIN and VENICE find it difficult to reach the smaller towns in time for early morning sale. Hence the provincial press is experiencing an unprecedented boom. The provincial cities are over-crowded with air-raid refugees and thus the number of readers has grown.

Stefani reports: Owing to the necessity of using paper exclusively for indispensable publications, the Ministry of Popular Culture has decided to suspend for an indifinite period the following sporting periodicals: 'Cacciatore Italiano', 'Grandi Prove Ippiche', 'Moto', 'Motociclismo' and 'Tempo Sportivo'. The only sporting publication allowed is 'Gazzetta dello Sport', which will become a weekly. The following cinema publications are also suspended for an indefinite period: 'Primi Piani', and 'Arcobaleno'. The only cinema publication authorized is 'Film', and the only theatre publication is 'Dramma'." (ND 26 January 1945)

"The paper which has to make the greatest efforts to remain above water is 'Resto del Carlino' of BOLOGNA. It is produced in the front zone on a village near BOLOGNA, as the city printing-offices have been bombed out. The provision of paper, transport and news material is extremely difficult. The staff is constantly in danger ...Giorgio PINI, the Editor-in-Chief, narrowly escaped an anti-fascist attempt on his life." (OIB 30; PWB FLORENCE 18 SEP 44)

"Italian Home Service" (enemy-controlled) 27 DEC 44: Ezio Maria GRAY has been able to obtain...some numbers of the 'Resto del Carlino' of the last fortnight... Its format is reduced to 50 cms. by 35 cms... It fears no competition. In fact, papers from other towns no longer reach BOLOGNA, but the 'Carlino', unperturbed; continues to appear... The 'Carlino' today is even more interesting than when the articles of Giorgio PINI made of it a lively and bold tribune of pure fascism." (ND JAN 45)

The clandestine newspapers published in North Italy may be divided, generally speaking, into two classes: papers

Declassified E.O. 12356 Section 3.3/NND No. 785021

published by political parties or groups, headed by the CLN and including labour; and papers published by or in connection with partisan groups.

Both types share the same general characteristics: small size - a single sheet or four sides of small or medium format; and lack of 'frills' - photographs, general news, advertisements, etc.

Two main kinds of article are to be found in both types of paper: local politics, including considerable space for the activities and decisions of the northern CLN; and news of partisan activities. News from southern Italy is almost totally absent, attention being focussed entirely on the matter in hand - i.e. the liberation of the North. The Rome Government, for instance, came into prominence only in connection with its delegation of powers to the northern CLN. Curiously enough, articles on the neighbouring countries of France and Yugoslavia are not infrequent, for they have been until recently, or are still, facing the same problems as the Italian partisans.

In Part III of this report extracts from articles in the various papers are reproduced to give a further idea of the type of subject-matter.

The clandestine press shows a strong sense of solidarity; frequently the only advertisement carried by a newspaper is that for another clandestine paper, even of a different party. Rarely are political differences aired, as when "Stella Rossa", the organ of the dissident Communists, attacks the Action Party as an upstart, reactionary group. (See under).

Information regarding printing facilities and circulations is almost entirely lacking. Some of the papers are undoubtedly still being printed in the large urban centres, despite the constant efforts of the Fascist police to prevent it. Cases are known of papers appearing regularly over a period of months; and there are few cases on record of police discovering clandestine presses. As to circulations, these, in the circumstances, can never be very large; at the same time a paper like "Avanti", with editions in almost all the provinces of occupied Italy, must be fairly widely read. One source gives a figure of 15,000 for the 'northern' edition of this paper. It is interesting to note that in a

Information regarding printing facilities and circulations is almost entirely lacking. Some of the papers are undoubtedly still being printed in the large urban centres, despite the constant efforts of the Fascist police to prevent it. Cases are known of papers appearing regularly over a period of months; and there are few cases on record of police discovering clandestine presses. As to circulations, these, in the circumstances, can never be very large; at the same time a paper like "Avanti", with editions in almost all the provinces of occupied Italy, must be fairly widely read. One source gives a figure of 15,000 for the 'northern' edition of this paper. It is interesting to note that in a large percentage of the reports of arrests of anti-Fascists contained in the Fascist press one of the charges is that of 'being in possession of subversive literature'.

Finally, the Fascist press makes no attempt to deny or play down the importance of the clandestine papers. "Corriere della Sera" calmly discusses the relative merits of the various editions of "Avanti". "Gazzetta del Popolo", reporting the discovery of a clandestine printing-press, gives the names of five clandestine papers printed on it as a matter of common knowledge.

3. Party Papers. "Popolo e Liberta", BELLINZONA, 5 APR 44, reports from the frontier: The clandestine press is the most powerful weapon of the partisan movement. The newspapers published are: "Democrazia" in MILAN . . . organ of the Christian Democrat Party. The Socialist Party's organ "Avanti" is issued in Veneto, Lombardy, Piedmont, Emilia . . . The Communist Party publishes "Unita", the Action Party publishes "Italia Libera", while the Movement for Liberal Reconstruction issues "Risorgimento". The National Liberation Committee has its own paper "Liberazione", while the Partisans direct "Combattente". Two other papers, "Fabbrica" and "Voci d'Officina", are printed particularly in connection with the strikes. In addition, proclamations, pamphlets and manifestoes complete the journalistic activities. (OIR 5; ND 10 APR 44).

There are clandestine pamphlets, edited mostly by the Parties, but few copies are printed. The "Risorgimento Liberale" and "L'Italia Libera" come out and two other Communist and Demo-Christian pamphlets that are not known. Their circulation is difficult owing to the scarcity of numbers, and the risk which is serious for the readers. There is not a lack of paper, and the question is only expense, but the printers are scarce on account of the rigorous control. The compilation of the articles is worthy of praise, and from this aspect not to be compared with the pamphlets of the Tuscan parties. The news of the Partisan activities in Northern Italy, of the activities of the Parties, the dispositions of the Committee are clear and complete. But news of liberated Italy is either missing altogether or is incomplete, and this would be of great interest to the people. It is necessary to intensify the wireless transmissions, and if possible to recommence the courier service which existed once between ANCONA, then occupied by the Germans, and BARI. (OIR 28, 18 OCT 44; Apprndix 'D' Section Bulletin 12).

4. Socialist Papers. "Libera Stampa", LUGANO, 26 JUL 44, publishes the following extract from the clandestine newspaper "Avanti" No. 36, 10 JUL 44: New newspapers have come to join "Avanti" in the battle, and to fight on the right side. Edited by the Italian Socialist Party, under difficulties and with sacrifices which it is easy to imagine, there are "Rivoluzione Socialista" and "Giornale della Federazione Giovanile" ((sic; but probably mis-reading for ' "Rivoluzione Socialista" il giornale della Federazione Giovanile')). "La Terra" is the newspaper of the agricultural workers, "La Citta Nuova" that

and "Voci d'Officina", are printed particularly in connection with the strikes. In addition, proclamations, pamphlets and manifestoes complete the journalistic activities. (OIR 5; ND 10 APR 44).

(OIR 19, 9 AUG 44).

Agence Telegraphique Suisse, 24 AUG 44: The clandestine press in northern Italy is continually increasing. The northern clandestine edition of "Avanti", has trebled its circulation, now standing at 15,000, while the Socialist Party has six new papers:- "L'Operaio", "La Terra", "Rivoluzione Socialista", "La Campagna", "Il Partigiano" and "Edificazione Socialista". 6. Control. "Libera Stampa", LUGANO, 30 DEC 44: One of the most recent measures ((against the Partisans)) taken by the police is the assumption of complete control over printing firms. The keys of the premises must be delivered to the Questura every evening. (ND 4 JAN 45)

"Corriere della Sera", MILAN, 7 APR 44: "Giramondo" writes: "It would seem that among the regional editions of the leading clandestine newspapers the Milan and Lombardy ones do not at present excel, at least as far as the Socialist paper is concerned. The Bologna and Emilia edition, however, is noticeable for a greater objectivity, for a full-blooded spirit of Italianity, for political and moral pride, and independence in face of enemy propaganda, for passionate Socialism in its idea of a solidarity uniting all the working classes in a brotherhood, regardless of frontiers. It interprets and exalts the dignity, the importance and the glory of the nation." We have no information to rely on, but we think we can guess that this detached assessment of the clandestine paper comes from the influence of the neighbouring town of MOLINELLA, where men still live who were brought up in the revolutionary but constructive, the internationalist but patriotic Socialism of Giuseppe MASSARENTI.

Patriots who control a large zone of southwest Piedmont are commanded by MAURI, a regular Army major with no strong political views though he is reported to have leanings towards the monarchy...

MAURI's divisions produce a weekly newspaper "La Rinascità d'Italia" on a hand printing press. The paper consists of two pages. It gives instructions and appeals to discipline, and news of local partisans' activities, but not general war news (this is obtained from the wireless). One of the collaborators is a priest. On the same press the patriots produce leaflets in Czech, German and Italian, and could do so in English if necessary. Russian leaflets are written by hand, in Russian characters, on ordinary stencils, and reproduced on a duplicator. On one occasion a leaflet raid produced 15 deserters, of whom 4 were Germans led by a Prussian Major, and the rest 'Monte Rosa' Italians. (OIR 28; PWB Special Service 7 OCT 44)

II. Recent Partisan Activities.

According to Italian Resistance circles, incidents are multiplying in the north, where the Soviet victories have caused lively activity. In TURIN partisans attacked the police HQ, killing 30 police, while six Germans were killed, and 16 wounded in a restaurant. In MILAN a real battle occurred in the Piazza Fiume where five Fascists were killed. PAVOLINI has arrived in MILAN to deal with the situation, which is extremely tense.
(Agence Telegraphique Suisse 25.1.45).

The MILAN newspapers report a new bomb incident on the evening of February 4th. A bomb exploded in the Fossati Bar in the Corso Garibaldi. The bar was destroyed and the building badly damaged. Twelve people were killed, including two members of the Fascist Muti Legion, and 16 people were injured. On the evening of February 5th four strangers, including two women shot at a soldier of the Fascist Railway Militia. The victim died of wounds.

This information is released by Military Censorship for all propaganda except for items side-lined.

A traveller returning from Italy gave the following details regarding the partisans in northern Italy: north of Milan the resistance centre of the partisans is hidden in the neighbouring mountains between ARONA and BAVENO along LAKE MAGGIORE. Hitherto all German attempts to eliminate these patriots have failed. Above OMEGNA about 1,000 men belonging to the "Garibaldi" Division are continuing to wage guerrilla warfare under Captain CUCCO. Nearly 400 partisans under Captain MOSCATELLI continue to harass the Germans near PIEDIMULERA. All these partisans belong to Communist bands.

In the VAL D'AOSTA the occupying troops have expelled the partisans from most districts between AOSTA and the Great Saint Bernard. Quite a large number of partisans have succeeded in reaching the frontier; others continue the struggle. They have established airfields at CUNEO and PINEROLO.
(La Suisse, Geneva 2.2.45).

A woman closely connected with the Italian authorities gave the following details regarding the present situation in the northern provinces of Italy. All the clandestine CNL's have just met somewhere in LOMBARDY in order to intensify the struggle against the enemy. In VENETIA the "MATTEOTTI" Division has been formed. It comprises not only partisans belonging to all social classes, but also many workers who escaped before being sent to Germany. In LIGURIA, where calm had reigned for several weeks, the situation has suddenly changed. The patriots have carried out attacks again, particularly in the SAVONA region, where a murderous battle was recently fought against German troops and Fascist formations. In EMILIA the German SS were ordered to annihilate the partisans at any price. The inhabitants had to suffer terrible reprisals from enemy shock troops. In MILAN the resistance movement has an increasing number of adherents and 45% of the local workers are members. On almost all the buildings and on every wall there are posters encouraging young men to enlist in the Italian SS or the O.T. Those applying to the recruiting offices are numerous, but once they are incorporated in the army they only think of taking the first opportunity to cross to the Allied lines.
(La Suisse, Geneva 31.1.45).

The small German garrisons hitherto holding the OSSOLA zone have been withdrawn and replaced by Republican units. According to information received, the captain commanding the DOMODOSSOLA Fascist forces recently joined the partisans with all his men. Consequently DOMODOSSOLA, MALESCO and other OSSOLA localities are believed to be free again.
(Popolo e Liberta Bellinzona 5.2.45).

Rail traffic has been cut between DOMODOSSOLA and MILAN and DOMODOSSOLA and TURIN. Only two trains still run daily between one station on LAKE MAGGIORE and DOMODOSSOLA. The whole region is completely isolated.

According to a report from DOMODOSSOLA the situation in that district is alarming. The population is on the eve of famine and the transport of food supplies is impossible owing to the interruption in the communications with other parts of PIEDMONT. There had been no bread for a whole week and there was not sufficient milk for the thousands of undernourished children.
(Agence Telegraphique Suisse 2.2.45).

In EMILIA a group of four patriots destroyed a hangar in the CORREGGIO airport (Reggio province) containing two bypianes, two motor vehicles and some petrol.

According to recent information, between January 1st and 5th patriot bands in MODENA killed 25 of the enemy, including a German officer; they also destroyed two vehicles and sabotaged enemy lines of communication.
(P.W.B. Rome 4.2.45).

During a recent action in the VAL BARBERA, planned and executed with great bravery 70 patriots of the "Cichero" ambushed and captured an enemy column consisting of a German officer, 5 N.C.Os and 19 soldiers, together with 7 Fascists.
(P.W.B. Rome 6.2.45).

On December 10th 200 patriots attacked two barracks at GONZAGA, north-west of MANTOVA, inflicting on the enemy losses amounting to 60 men, including those killed and taken prisoner. In the same action 5 enemy vehicles were destroyed and three captured (P.W.B. Rome 5.2.45).

III. Mopping-up Operations.

After the encounters at FARINI D'OLMO last November, the VAL NURE and VAL D'ARDA have been comparatively quiet, while mopping-up has continued in VAL TREBBIA and VAL TIDONE. Last December the German command decided to resume large-scale operations against the VAL NURE patriots with two infantry regiments of the "Turkestan" Division, a few reinforcement units, practically no artillery and only a few mortars. Italian participation consisted of a battalion of the "San Marco" Division under Major Giuseppe BIOTTO, and Capt. BRUNETTI.

In the second week of January operations began against the VAL D'ARDA and neighbouring areas, which are held by the 11th Garibaldi Brigade. While the patriots evacuated the LUGAGNANO and GROPPARELLO zones, their resistance apparently stiffened in the MORFASSO and VERNASCA zones. Numerous wounded Germans have been taken to the PIACENZA military hospital. According to a reliable source, German and Fascist casualties during the fighting in the neighbourhood of the TIDONE and TREBBIA valleys totalled about 700 killed and wounded.
(Libera Stampa, Lugano 5.2.45).

Between January 20th and 26th, enemy troops, amounting to several thousand men, launched an offensive against SPEZIA and VARESE LIGURE. Part of these forces later returned to base.

Another attack, comprising about 4,000 Germans and Fascists was launched at the beginning of February against the patriots of the VAL GESIA.
(P.W.B. Rome 2.2.45).

Fascist sources reported in the Italian Home Service of 28.1.45 "During the past few days, in the GORIZIA region, detachments of the Italian Alpini have dispersed groups of outlaws, inflicting

strength of the Italian resistance forces living amid the cold, hardships and dangers of the Piedmontese plain. Exceptionally important clashes are succeeding one another in the INCISA, SCAPACCINO and MONFERRUZZO zones. MONFERRUZZO is defended by some 200 men who fortified NIZZA MONFERRATO, turning it into a veritable stronghold. In various clashes the attackers suffered huge losses, but failed to dislodge the partisans. Other clashes occurred in CALAMANDRANA, SAN BERNARDO, MONASTERO BORMIDA, PIANGRASSO and Hill 667 (in the Copali? region) During these clashes the Fascists succeeded in taking some dozen prisoners including some British, Dutch and Greeks.

Operations are in progress in the province of SAVONA, and in the ASTI and ALESSANDRIA regions. Special attention should be paid to those just concluded in the San Sebastiano da Po, Casalborgone, Lauriano Po and Campiglione regions. IV. Gold Medal Awarded to Patriot.

The Gold Medal for Military valour has been awarded by General McReary, Commander-in-Chief of the 8th Army to the famous patriot leader known to friends and enemies for a long time under the name of BULOW.

It may now be revealed that his real name is Lieut Arrigo BOLDRINI, head of the military Giunta of the Committee of Liberation of RAVENNA, and Commander-in-Chief of the 28th Brigade of G.A.P. The ceremony took place in a small town near the front. The medal was handed by a senior Italian officer in the name of the Italian High Command to General McKeery, who pinned it on the breast of Commander Bulow. 150 Italian patriots fighting in the ranks of the 8th Army, withdrawn from their front-line positions for the occasion were drawn up in square formation.

Sergeant-Major Francesco Scami of Dualchi (Nuoro), belonging to an Italian Combattant unit operating with the 8th Army has been awarded a bronze medal for military valour in recognition of his bravery in patrol actions on January 14th, 15th and 16th.

On January 14th Scami, who was in command of a patrol, was approaching a chosen-point when he was attacked by the Germans surrounding the position held by the Italians. While returning the enemy fire the N.C.O. kept in contact with his battalion command by telephone and they sent reinforcements. On the same day Scami volunteered to take part in an attack on the same position and helped to retake it. On the following day he made his way into the enemy lines and succeeded in bringing back valuable information about German movements.

VI. Conflicting German and Fascist Views.

There is a complete contrast between the points of view of the German and Fascist Commands as regards the present conditions and possibilities of the partisan movement. The Fascists are convinced that their various mopping-up operations have practically wiped out the partisans, while the Germans consider that the movement is still alive and dangerous, especially as it enjoys much support from the civilian population. The German Command has consequently decided to carry out repressive action without asking for Fascist cooperation. In order to reinforce anti-partisan action, two armoured trains are now ready on the Borgomanero-Santhia line.

The armoured group of the "Leonessa" (G.N.R) was stationed at TORINO in early January.

IX. Plans in the Event of German Evacuation.

Certain circles of the Republican Army in PIEDMONT foresee that in the case of a sudden military collapse in the Reich the greater part of the Fascists would be concentrated in the principal centres of population to put up resistance to the bitter end, while the rest would take to the "macchia" and form partisan bands.

According to enemy newspapers the German/Republican troops stationed in PIEDMONT and LIGURIA form the Armata Liguria Group (previously known as the Armata Liguria) under the command of Marshal GRAZIANI. It is reported from reliable sources that in the case of evacuation from this region, Marshal Graziani will take command of the Republican and German troops intended to protect the retreat. GERMANS

XIII. Dispositions and Evacuation Rumours.

Speculation has been rife in all quarters as to the possibility of Kesselring withdrawing from North Italy.

Volksrecht, Zurich 31.1.45 writes "Recent indications and the fact that the Germans have now lost their military prestige would render the evacuation of northern Italy understandable. A few factories there can continue only as long as the Germans provide coal. If the coal supply is discontinued, the last factory installations and groups of factory workers will be transported to Germany.

The food situation is such that the population can hardly be guaranteed a mere existence, especially since all reserves of wheat and rice as well as 25,000 head of cattle have been transported across the Brenner. After the completion of the present large-scale requisitions in progress in northern Italy, the German and Fascist locusts will have completely eaten bare the rich Po Plain

Along the Swiss frontier the Germans have already abandoned their control posts, leaving them only occupied by the Fascists. Railway traffic in Lombardy is reported to have come to a complete stand-still in the day time, whereas at night only German military transports and trains loaded with requisitioned industrial installations are running.

La Suisse of 3.2.45 reports "An important military Fascist personality whose name is kept strictly secret has just joined the Italian resistance movement. According to his declarations, the Germans' plans for their withdrawal from the north Italian front will be carried out before the end of February. The general withdrawal of Kesselring's troops will be covered by Wehrmacht forces quartered on the La Spezia-Bologna line. The Fascist army under Graziani will thus have the task of defending Italy. Resistance circles display the greatest reserve on this.

The Germans are believed to have recently withdrawn only two divisions from northern Italy, leaving 28 powerfully armed and perfectly equipped. The two divisions withdrawn came from Liguria and Piedmont.
(Popolo e Liberta, Bellinzona 5.2.45).

The Germans are organising sabotage and information groups to leave behind in liberated territories or to send thither secretly afterwards. The personnel is chiefly drawn from parachute detachments. Some elements of these groups tried to make contact with partisans, pretending to be Allied emissaries, but were discovered immediately.

Marshal Graziani's inspections along the Alpine frontier have lately become more frequent, which would appear to confirm the movement of major Republican units towards the French border to relieve German troops there, as has been reported.
(Italian Official Source 8.2.45).

SECRET

Declassified E.O. 12356 Section 3.3/NND No. 778021

This information is released by Military Censorship for all propaganda except for items side-lined.

The German retreat continues from the VAL DI SUSA and the MONTCENIS sector; it is noticeable by the number of trains taking soldiers towards TURIN. The German troops leave in companies of small numbers and assert that they are going back to Germany on leave, whilst it is known that the O.K.S.W. has suspended all leave There are evident symptoms that the units of the 5th German Alpine Division are removing from the VAL DI SUSA (about 700 Alpenjager parties by two troop trains from Bussoleno for Milan during the first fortnight of this month).
(Italian Official Source 17.2.45)..

It seems that wherever it may become necessary to evacuate Liguria and Lombardy the Germans intend to leave a few German and other Fascist units, whose essential task would be the defence of the principal cities. Units of the S. Marco Division appear to be in the course of transfer towards the front at Ventimiglia. This news may mean the probable substitution of Italian troops for the German forces drawn up in the Maritime Alps (34th Inf. Div.), as has been done in Piedmont.
(Italian Official Source 28.1.45).

While the rumours regarding the thinning out of German forces in Italy are more and more insistent, the only information which might be considered as a partial confirmation of such intention is the following:

(1) In the Val d'Aosta the relieving of German troops by Republican forces is still proceeding, contrary to previous reports which seemed to indicate that the operation had been completed.

(2) All along the Alpine frontier can be noted clear indications of further withdrawals of German troops after they have been relieved by Republican units.

(3) In Lombardy in the Province of Milan, German SS HQ have received written orders to evacuate the zone by the 15th of the current month (February)

(4) The transfer of the H.Q. of the Todt Organisation in Italy from Sirmione and Peschiera del Garda to Rovereto and Riva di Trento (50 Km north and 51 Km North-West of Verona respectively) is now complete.

(5) Minor enemy H.Q.s have been transferred from Verona to the Venice area. A.A. Batteries posted in the Verona area, numbering 14 guns and an unidentified Technical H.Q. at S. Pietro in Cariano (10 km north-west of Verona) are in process of transfer to the Venice area.

(6) To support these rumours, there is the news that imports of coal from Germany have almost entirely ceased (this confirms a previous report) while the export to Germany of every kind of materials has been intensified as well as the transfer of all sorts of workers as they become available. It would appear evident that once everything that can be of use to the war effort has been carried away

Declassified E.O. 12356 Section 3.3/NND No. 785021

It seems that wherever it may become necessary to evacuate Liguria and Lombardy the Germans intend to leave a few German and other Fascist units, whose essential task would be the defence of the principal cities. Units of the S. Marco Division appear to be in the course of transfer towards the front at Ventimiglia. This news may mean the probable substitution of Italian troops for the German forces drawn up in the Maritime Alps (34th Inf. Div.), as has been done in Piedmont.
(Italian Official Source 28.1.45).

While the rumours regarding the thinning out of German forces in Italy are more and more insistent, the only information which might be considered as a partial confirmation of such intention is the following:

(1) In the Val d'Aosta the relieving of German troops by Republican forces is still proceeding, contrary to previous reports which seemed to indicate that the operation had been completed.

(2) All along the Alpine frontier can be noted clear indications of further withdrawals of German troops after they have been relieved by Republican units.

(3) In Lombardy in the Province of Milan, German SS HQ have received written orders to evacuate the zone by the 15th of the current month (February)

It would appear evident that once everything that can be of use to the war effort has been carried away from North Italy, then Italian territory would be eliminated as a source of supply and would become the theatre of successive German retirements.

Since the 23rd January the road traffic between Turin and Milan has increased considerably and continues only at night and almost exclusively in the direction of the last mentioned locality.

POLITICS.

XV. Political Situation in Lombardy and Piedmont (end of Jan44) (Anti-Fascist.

LOMBARDY The most effective political party throughout the region is the Communist Party, thanks to the "quadri" already in existence which continued to function during the Fascist period. The Communists have thus almost monopolised communications between the bands and the central organisation. The Christian Democrats are also very strong, and at the cessation of hostilities this party will probably have more political influence than the Communists. At present it lacks representatives. The Christian Democrats in Lombardy probably have no partisan bands of their own in the mountains, but they have S.A.P. bands in the towns.

The Liberal Party is fairly active, and above all, owing to its traditional prestige, exercises considerable influence among all classes, and especially among the upper classes.

The Party of Action has many partisan bands in the mountains (25/30% as compared to 60% Communist, while the remaining 10-15% is mainly non-political, such as the "Fiamme Verdi" of the Val Camonica) This party plays a large part in the direction of military events. The Party of Action adopts a policy of conciliation between the opposing ideas of the Liberals and Communists. Its prestige is very high in Lombardy, as it is throughout Northern Italy.

The Socialist Party has a few bands at its disposal and appears to have some influence among the working classes, but to a much lesser degree than in southern Italy

The Democratic Labour Party does not exist, and is not represented in the Northern Committee of National Liberation

PIEDMONT The situation is similar to that in Lombardy, with slight variations in favour of one or two parties. The position of the Communists in Turin, for example, is stronger than in Milan, while on the other hand, the provincial masses in Lombardy are more Communist than those in Piedmont. In Turin, however, the Liberals are powerful and they are mostly monarchist. In Piedmont the monarchist position appears to be discredited. This applies also in the country, which is often wrongly thought to be very pro-monarchist. The Christian Democrats are powerful, particularly in Canavese. The Party of Action has been one of the principal organisers of the partisan movement in Piedmont, especially in the eastern region, and in the Val d'Aoste.

XVI. Fascist Political Moves in Piedmont.

In autumn 1944 a curious split became evident between the uncompromising attitude of FARINACCI and a group with liberal tendencies headed by Concetto PETTINATO of the Turin "Stampa" and, it is thought, Rino PARENTI, ex-Federale of Milan. The latter carried on a regular press campaign, insisting that it was essential to allow the parties to take part again in political life, since they had proved themselves to have a considerable following among the masses. This move was certainly made with the hope of saving their own skins. The public merely laughs at them. Typical likewise is the recent attempt to win the favour of certain sections of the

population by nominating the Podesta of big towns from amongst the lower classes. The present Podesta of Milan is a printer. (P.W.B. Rome 6.2.45 S).

XVII. Activities of Mussolini and Pavolini.

Transocean on 29.1.45 reported "Mussolini has just concluded a tour of the front which lasted three days, in the course of which he inspected the Apennines and the Ligurian seaboard as far as the German-Italian fighting positions. In the area between the Poretta Pass and La Spezia the Head of the Italian State visited the Bersaglieri and the Alpini, who are here carrying on successful operations against the 92nd U.S. Negro Division.

Popolo e Liberta Bellinzona reports from the Italian frontier; "Mussolini recently visited the "Italia" Division. Explaining this resumption of activity after many months of eclipse the "fedelissimi" say that Farinacci and the "intransigenti", who had succeeded in regaining German support, were rumoured to be preparing a Putsch with the aim of eliminating Pavolini and "stellenboschning" the Duce whom they considered to be a dead weight. Mussolini's quiescence had convinced the Germans that he was no longer of any use. Mussolini, Bufferini-Guidi and Pavolini, having been informed of the plot, reacted vigorously and immediately. Mussolini's speech at Milan and the spectacular demonstrations there improved his position in the eyes of the Germans as he still appeared as a leader and as indispensable, while Farinacci lost every hope of ever becoming a Duce. But Mussolini will be obliged in future to come into the limelight periodically in order to retain his regained popularity.

The recent rumours that Pavolini had been superseded as Secretary of the Party appear to have been false, as reports of his activities as such continue to be received. The Italian Home Service of 20.1.45 says for instance "The Secretary of the Fascist Party, PAVOLINI, presided over a meeting of its members at GORIZIA again on 26.1.45 "Pavolini, Party Secretary, visited UDINE, where he addressed a meeting of Fascists, during which the Duce was enthusiastically acclaimed." And on 20.1.45 Pavolini visited TRIESTE for the first time since September 8th 1943, and was received with enthusiasm by Republican Fascists." On 31.1.45 "The Fascist Party Secretary Pavolini today paid tribute to FIUME's war dead and then visited all the armed forces in the town and in the neighbourhood.

XVIII. Transfer of Ministries.

Italian resistance circles report that the Fascist Government has just decided to regroup in a single town all the Ministries hitherto distributed among several localities, notably VENICE, VERONA, CREMONA and BRESCIA. The new HQ will be somewhere in the region of the Alps.

At the present moment part of the Ministry of Finance and the E.N.I.T. is in MILAN. It seems probable that the Ministry of the Interior will also move to Milan. It is said that Mussolini intends to set up his head-quarters in the Palazzo Tribulzio in MILAN.

XIX. Fascist Funds abroad for Fleeing Hierarchs.

It is learned that recently there has been increased influx to Switzerland of Fascists and financiers and profiteers who have benefited through Fascism. There are people in Switzerland who, in view of their relations with the Fascist Government, are carrying out financial operations on behalf of Mussolini's hierarchs It is affirmed that hitherto one million fr., the fruits of Fascist Government transactions, have been transferred to Switzerland, where they have been sub divided into booklets of cheques worth 30,000 Swiss fr. each. These booklets are reported to be at the disposal of Fascist hierarchs who will shortly leave Italy in order to seek refuge in Switzerland.

The North Italian CNL at a recent meeting passed a resolution in which, denouncing the above facts, it called attention to the Italian Minister in Berne to such manoeuvres in order that he might intervene with the Federal Authorities and ask them to refuse shelter to persons who, after having helped to ruin Italy, are already not only preparing to take refuge from judicial action, but also for an opportunity to plot from abroad against the democratic Italy of tomorrow.
(Libera Stampa, Lugano 25.1.45).

XX. The Milanese Look to Moscow.

In northern Italy dissatisfaction regarding the methods used by the Bonomi Government is increasing. The Milanese are obliged to suffer such terrible oppression, hunger and cold that political squabbles in Rome seem meaningless. The "old crowd" and such words, were those recently used by the Milanese when referring to the Rome leaders. The Milanese do not want to hear anthing about politics or proportionate party representation in the Cabinet: no party, either Socialist or Communist, neither Bonomi nor Togliatti, but men from the north who have suffered under the German domination and who have fought for liberation. Sforza, who last December was considered a national hero, has now lost much of his prestige, but it would be wrong to imagine that Britain is much more popular. The Italians now look to Moscow. This week, a red flag was hoisted twice in Milan, where the inhabitants pointed out that the Russians never bombed Italy, and that, if they reached Trieste, they would soon expel the Germans from Italy.
(Feuille d'Avis, Neuchatel 1.2.45).

XXI. Internecine Party Strife Increases.

The conflict between extremist Fascists and Fascist reformists and also between extreme and orthodox Fascists round Mussolini, Graziani and Pavolini seems to have increased. This is shown by the polemic between Farinacci and Enzo Pezzato, editor of Repubblica Fascista, whose close relations with Mussolini were underlined a few days ago by a visit from Mussolini to the newspaper at the end of the first year of publication.

You could hardly imagine the life one has to lead in the "little Republic" The worst thing of all is undoubtedly the lack of food. There is nothing left to eat. All restaurants have been suppressed. In December a reasonably good meal cost 350 lire. Now it costs 900 or 1000 lire. The poor devil of a workman who earns his 70-80 lire a day is thus reduced to the "communal" "war" and factory canteens which the Government has forced on the large firms, half of which have already been socialised. MILAN

Bread is of a very inferior quality and is not distributed every day. Meat has not been on sale since December of last year. Sugar is scarce and the little that is distributed is very impure. (Italian Official Source 8.2.45).

Sera, Milan, 30.1.45 complains of the lack of milk even for sick children, who should enjoy absolute priority. If fresh milk is unobtainable owing to the cold and for other reasons such as transport difficulties, powdered milk should be easily available. However, this is not the case because dealers on the black market succeed in buying it before it reaches the chemists shops where it is normally sold.

The following report received at the Italian frontier from a Milanese is given by Tribune de Geneve 29.1.45: "They may be complaining in Rome, but in Milan life is impossible. You could hardly imagine the life one has to lead in the "little Republic" The worst thing of all is undoubtedly the lack of food. There is nothing left to eat. All restaurents have been suppressed. In December a reasonably good meal cost 350 lire. Now it costs 900 or 1000 lire. The poor devil of a workman who earns his 70-80 lire a day is thus reduced to the "communal" "war" and factory canteens which the Government has forced on the large firms, half of which have already been socialised. What is the food like there? There are now two classes - one where a meal costs six lire and another where it costs 17.50 lire without wine and 32 lire including an alcoholic drink. The latter meal consists of six spoonfuls of hot water sold under the name of soup, a ladleful of vegetables or one and a half potatoes boiled in water without salt, and 15 g of meat (once or twice a week) "

This description is confirmed by Spinelli, the newly appointed Minister of Labour, formerly Podesta of Milan, who, in an interview with Repubblica Fascista, admitted the food crisis.

As regards the recently created war canteens, the first course is generally soup consisting of four grains of rice in dish-water, or a small handful of risotto; the second course is the thinnest portion of omelet made with vegetable meal and egg powder, or small freshwater fish, or a tiny portion of cheese. The fiercest opponents of the new system are the waiters themselves, who no longer get tips and who therefore do everything in their power to treat customers badly. That is Fascist socialisation.

The queues outside the restaurants begin to form before 11.00 and consist mostly of idlers, all Fascists naturally, since otherwise they would be sent to Germany. Workers and employees leaving work at 12.00 or later for the lunch interval find the day's food allowance to the canteen exhausted, or must form long queues. They sometimes wait so long that the time to resume work comes before they have had their lunch.

Of the 2000 restaurants in MILAN a little over 200 have been converted into war canteens. The others have been closed, or are only allowed to serve refreshments.

Shortage of Salt Explained.

Salt has become very scarce lately because all the salt deposits are in invaded Italy, excepting those in Comacchio, which is in the front line today. National production is therefore nil.

Germany has, during the last few months, sent considerable quantities of mineral salt for the civilian population, for war and factory canteens, and for industrial requirements. These supplies have diminished of late owing to persistent transport difficulties which explain the present scarcity. The population is perfectly aware of the reasons for this.

New Food Requisition Commissions Hampered by partisans.

Faced with the threat of reprisals the partisans released the members of the Commission.

Bread Laws.

Bakers have succeeded in obtaining permission to make two kinds of bread in future, that is white "rich man's bread" in the shape of 50 g rolls, and brown "poor man's bread" containing all kinds of nondescript ingredients, ill baked and indigestible

This creates discriminatory treatment in favour of wealthy people, i.e. the Fascists and their henchmen, thus practically legalising the black market, because white bread, whose official price is five lire a kg is notoriously sold at 50 lire. Bakers are under compulsion to make the same quantity of brown bread and white, but after long hours of queueing up poor people are invariably told that there is no more ordinary bread at 2.6 lire the kg.

The concession made to bakers by allowing the two types and the two prices of bread means the defeat of FARINACCI, who always opposed this on political grounds, while FABRIZI, who held the opposite view, is now triumphant thanks to Mussolini's support. Though also opposed to this measure owing to its unpopularity, Mussolini finally agreed to it only out of spite against Farinacci.
(Popolo e Liberta 1.2.45).

XXV. Transport

Situation of Railways in Bologna.

Bologna central station has been destroyed by air raids. Only one single track has been repaired and traffic is very much reduced.

The station of Borgo Panicale on the Bolgna-Pistoia line (105-A 5287) has been destroyed by an air raid and has stopped working.

The Bologna-San Rufillo station (87-L-9044) at the beginning of the direct line Bologna-Firenze has been raided and is not working.

The Bologna-Corticella station (87-L-8954) on the Bologna-Ferrara branch has been hit, but is still working

Owing to the air raid damage inflicted on the main lines and branches in the centre of the city the Germans pass the bulk of their traffic over lines which by-pass the city.

Owing to the air raid damage inflicted on the main lines and branches in the centre of the city the Germans pass the bulk of their traffic over lines which by-pass the city.

In May 1944 the Germans began the work of construction of a branch to connect the Bologna-Modena (86-L-5666) with the Bologna-Verona (49-F-6554). This connection avoids the dangerous holding-up of trains in the city and shortens the flow of traffic between Emilia and the Veneto. The loop begins at the little station of Lavino di Mezzo.

The railway bridge over the R. Reno near S. Viola, called Ponte Lungo has been slightly damaged by air raids and immediately repaired. Intense German traffic passes over this bridge almost exclusively by night.

The Germans have taken away to Germany almost all the railway material existing in Bologna, particularly passenger coaches and locomotives. In September 44, in anticipation of an early liberation of the city by American troops, the Germans blew up what railway material remained in the area. They also burnt office documents and technical diagrams of the German Railway H.Q. in Bologna.

German Exploitation of War Industries.

The socialisation of the Fiat, Montecatini and Falck works is a sign that the Fascists are trying to spread their tentacles over heavy industry which is notoriously controlled by the Germans, who have their own production programme for which they have selected a number of firms classified as "protected" which are considered outside the scope of the Fascists. German reactions to the socialisation of the three big industrial firms must therefore be expected.

Italian industrial activity is directed and supervised by special offices organised under a central command entrusted to General LYERS, who is in constant contact with Berlin. The Germans have apparently no intention of abandoning northern Italy, judging from the production programme already drafted for the whole of 1945.

The atrocities and mass executions carried out by the Germans had so exasperated the population that the German High Command was warned that for every civilian who was shot they would reply with German methods, i.e. the shooting of ten German soldiers. And in fact, when the Germans ignored the warning and shot seven civilians, on the following day they found seventy dead German soldiers.

The control now being exercised over the entry of German soldiers into the town is made easier by the barbed wiring which the Germans themselves had put round the town.
(P.W.B. Florence Feb 3. 45).

The summer of 1944 witnessed the return of evacuated citizens to Bologna, accompanied by many refugees from Florence and other Tuscan cities. The C.L.N. had accumulated large reserves of food in secret storehouses, but owing to the lull in the Allied advance part of these store-houses have been discovered by the Germans who have in some cases carried off the contents, and in others made it useless by sabotage (e.g. by wetting the wheat or rice or mixing it with broken glass).

For some time now no enemy troops or motor-transport columns have been seen in the city.

Industry is at a complete stand-still, both in the town and the province owing to Allied bombing. What was spared by this has been wrecked by the Germans.

Most of the autumn ploughing and sowing have been neglected. There are no tractors and no cattle. However, a certain amount of farm machinery has been hidden. All trees and bushes used for agricultural purposes have been wilfully damaged."

RESISTANCE

Partisan Bands in the region of Genova.

Six Garibaldi Brigades, forming the Cichero Division, are operating in the zone (the 6th), between Genova-Torriglia-Bobbio-Bettola-Bedonia-Varese Ligure.

Recent Partisan Activity.

The recent Soviet victories have greatly encouraged patriot hopes in the North, and there has been a notable increase in clashes and bomb incidents in Turin and Milan. In Milan itself the situation is said to be tense. In the mountains between Arona and Baveno along Lake Maggiore, the patriots have resisted all attempts to dislodge them. Above Omegna a Garibaldi Division, under Captain Cucco, and near Piedimulera, a band under Captain Moscatelli, continue to harass the Germans.

In the Val d'Aosta the enemy has succeeded in clearing most of the country between Aosta and the Great S. Bernard, but large numbers of patriots have escaped over the frontier.

In Venetia the "Manneth" Division has been formed out of all classes of patriots.

In Liguria, after several weeks of calm, the countryside has flared up again, particularly in the Savona district, where a violent clash took place recently.

In the Val d'Ossola region, German garrisons have been withdrawn and replaced by Fascist units. It is reported by a Swiss source that the Domodossola Fascist garrison has deserted to the patriots and that, in consequence, several localities are believed to be free again. Other reports say that rail communication between Domodossola and Milan and Turin has been cut and that the food situation in the region is very alarming. Considerable raiding has occurred in Emilia.

Enemy Moves and Claims.

After the encounter at Farini d'Olmo last November, The Val Nure and Val d'Arda have been comparatively quiet, while mopping up proceeded in Val Trebbia and Val Tidone.

Last December the Germans decided to resume operations against the Val d'Arda and neighbouring zones, held by the 11th Garibaldi Brigade. The patriots evacuated the Lugagnano and Groparello zones but held the Morfasso and Veruasca areas. The Germans have

Other enemy offensives were launched January 20-26 against La Spezia and Varese Ligure, and in early February against the Val Sesia.

Fascist radio claimed that Republican Alpini had dispersed groups in the Gorizia region and that at Pordenone 2000 famished outlaws had surrendered. Other operations have taken place in the provinces of Savona, Asti and Alessandria, apparently without much success.

SUMMARY 2.

This information is released by Military Censorship for all propaganda except for items side-lined.

FASCIST FORCES

A New Division.

Deserters from the "Italia" Division say that a new Republican Division, the "Roma", will be ready by March 1st. It will include young men combed out of Black Brigades and Italian workers from 17 to 50 years of age, already in Germany.

A New Anti-Tank Arm.

Elements of the Monte Rosa Division are being trained in the use of a new anti-Tank arm. This possesses four barrels and fires incendiary and fragmentation bombs.

Fascist plans in the event of German evacuation.

Republican Army circles in Piedmont foresee that in the case of the military collapse of Germany the bulk of the Fascists will concentrate to defend the chief cities to the bitter end, while the rest would take to the maccnia and become guerillas.

Desertions.

Numerous deserters from the "Italia" Division, quartered near the CISA pass have joined the patriots with arms and equipment. Apparently the grave risk involved in crossing mine-fields prevents more desertion from this unit to the Allies.

GERMANS

The Evacuation of N. Italy.

The general opinion in N. Italy appears to be that the Germans will abandon N. Italy as soon as they have extracted everything that might be of use to their war effort and that by now that particular stage has been reached. Swiss sources say that practically all reserves of wheat and rice, as well as 25,000 head of cattle have been sent over the Brenner.

Actual movements of withdrawal after the gradual substitution of German by Fascist troops, have been observed in many sectors, while several H.Q and offices have moved north and German soldiers on leave from Italy are said to have received orders not to return there.

In any case, though Piedmont may be abandoned by the Germans at an early stage as being eccentric to their general line of retreat, the existence of fortified lines, e.g. along the Ticino and Po, portends a step by step defensive of Lombardy and later the Veneto, until the foothills of the Alps are reached.

Atrocities.

Some details have arrived in connection with the massacres in the villages of Bardine S. Terenzo and Vinca, on or about 14th August 1944. About 400 people were killed, amongst them women and young children. At Vinca the dead body of a woman was impaled.

POLITICS.

In Lombardy according to one source, the most effective party is the Communist Party. The Christian Democrats are also very numerous and will probably have even more influence than the Communists when hostilities cease. The Liberal Party is fairly active, and finds considerable adherents among the upper classes. The Party of Action is very active in regard to the formation of Partisan Bands- 25-30% as compared to Communist Bands - 60% and has a large share in the direction of military operations. Its prestige is high in Lombardy. The Socialists do not appear to influence the working classes as much as in S. Italy.

In Piedmont the Communists of Turin are more powerful than those of Milan. The Liberals in Turin are also strong. The Christian Democrats are powerful in country districts, particularly the Canavese. The Party of Action is strong in East Piedmont and also in the Val d'Aosta.

Fascist Party.

Mussolini and his henchmen Buffarini-Guidi and Pavolini, are said to have strengthened their positions against the intrigues of Farinacci and the pro-Germans.

ECONOMICS.

The Food Situation.

In Emilia the situation is reported as not unfavourable. As usual Salt and Olive Oil are lacking. In Milan there is much complaint that the situation is now intolerable: the Black Market prices quoted in December compare very favourably with those in Rome, but apparently the last two months has seen a decided decline.

Fuel and Power.

From all parts of N. Italy there comes the same tale of factories closing, railway schedules being cancelled, gas supplies being curtailed owing to the lack of coal.

Situation in Bologna.

A reliable source reported that Bologna was entirely under the control of anti-Fascist organisations, and that even Germans had to obtain permission to enter the city. It is possible that this situation may have prevailed during the winter, but later information which arrived too late for incorporation in this Report, speaks of the Turcoman Division's appearance in the line on the Bologna front, and the presence of its rear echelons in the city.

SUMMARY

Resistance.

Partisan Bands in Piedmont.

News is now available regarding partisan bands in Piemonte. It is interesting to note that some 2,000 partisans have returned to the VAL D'OSSOLA in spite of the complete mopping up inflicted on that zone towards the end of October 1944.

Owing to recent enemy operations in the VAL D'AOSTA and the CRESCENTINO (North of Turin), news from these two regions is incomplete.

There is some difference in the method of guerilla warfare as carried out by the various bands. The Autonomous groups, naturally enough, judging by their military origin, tend to occupy given zones and settle down to defend them; the Justice and Liberty bands were the first to apply a war of movement and constant displacement; the Garibaldi and Matteotti bands go even further, and on occasion their greater freedom of action has rendered them unpopular with the local population.

In Lombardy. The 3rd Lombardy Div. of 5 Brigades and a Justice and Liberty Div. were involved in a great mop up in November and are temporarily dispersed.

Other formations - in Liguria, Tuscany and Emilia are also reported.

Recent Partisan Activities.

There has been a considerable recrudescence of partisan activity on a larger scale lately particularly in Lombardy and Piedmont. A Swiss source attributes this to the constant supply of arms and stores by Allied Airmen. The chief exploits reported were the blowing up of a bridge over the Dora Baltea on December 24th, thereby interrupting communications between IVREA and AOSTA; considerable damage to an aeroplane factory in Genona (Udine Province) on 25/26th December and sabotage to trains and railways in Trieste and Udine Provinces.

Lombardy groups claimed to have captured many arms in their raiding operations while Ligurian patriots have made several surprise attacks on "S. Marco" detachments who surrendered and handed over their weapons. From Turin continual terrorist outbreaks are said to take place.

Enemy Operations.

Fascists claimed successes against the partisans in the PARMA region with the infliction of heavy losses, 446 killed and 213 captured. In the zone of MIDUSSINA and VIPACCO it was claimed that 600"outlaws" were killed and many captured. The CHIVASSO and the PINEROLO garrisons co-operating with Black Brigades and other units of the Republican Army, also claimed minor successes.

Between January 6th and 22nd the enemy began an offensive in the zone of PAVULLO (EMILIA) Patriots state their losses were slight and those of the Germans considerable.

FASCIST FORCES.

The "Italia" Div. (Bersaglieri) has lately arrived on the LA SPEZIA front. It has therefore gone to swell the number of Republican Divisions which have concentrated in N.W. Italy.

Morale. The morale of the "Italia" Division, like that of the "Monte Rosa" and "Littorio" is very poor, and desertions have been frequent

GERMANS.

Atrocities.

A Swiss report states that in BOLOGNA on the 14th January, the Germans publicly hanged 35 hostages as a reprisal for the shooting/UP a German lorry.

A partisan girl who escaped from a prison camp at FOSSOLI after 6 months confinement reports on conditions there and on the tortures inflicted on prisoners.

Anti-desertion measures.

Civilians state that Italian troops in the line have diminished desertions owing to German retaliation on deserters' families. Recently two men from a company were taken to witness the execution of the families of deserters and sent back to spread the news.

Propaganda.

German propaganda to partisans has been very active. The usual line is continued - The Allies have abandoned you. If you do join up with them, they put you in concentration camps or send you to fight the Japanese. Surrender to the Germans and nothing will be done to you.

Germans want Gold.

A Swiss source says that German officers and officials who accept bribes from industrialists to prevent the destruction of machinery etc. refuse to accept paper money, but demand gold instead.

ALLIED PROPAGANDA.

Between 10th October and 30th December 1944 77% of German P.Ws stated they had seen our leaflets in the month previous to their capture.

The general feeling among some P.Ws interrogated in late October was that while it was dangerous to keep safe-conducts, the "Frontpost" would not be considered too noxious.

The Fascists would not allow the dissemination of the Pope's Christmas message. The broadcast was badly jammed and the Press was allowed to publish only a few harmless phrases.

Food Situation.

MODENA. Practically nothing can be obtained through the rationing system, but anything can be had on the Black Market, except soap and oil. Meat is plentiful at 70-80 lire the kilo.

GENOVA 100 grms of bread are distributed daily. Black Market prices are high. Flour 60 lire the kilo . Bread 80 lire the kilo

MILAN A sudden shortage of bread has occurred which is causing much exasperation, as up to Mussolini's visit, white bread was available on the Black Market at 40 lire the kilo. The Fascists attribute the shortage to the transport breakdown, but the people accuse them of exhausting reserves on purpose so as to blame the Allies later on.

VARESE The influx of Fascists, principally Tuscans, has been so great recently that local stocks are exhausted.

Black Market. German sources claim that as a result of the control of restaurants, the Black Market has practically disappeared On the other hand they are forced to admit that butter, cheese, meat and flour, formerly easily obtainable on the Black Market, have disappeared.

Transport.

For lack of coal Turin passenger-train service is suspended. On the Genove-Milan line - one train a day for civilians. Genova Imperia - irregular service, and the line is interrupted in parts.

Industries.

The Fiat, Montecatini and Acciaierie and Ferriere Lombarde are the latest Companies to be "socialised".

LABOUR

The general situation in Milan is still very tense. Although the drastic fascist measures and the continual deportation of workers to Germany seem to have got the strike under control, the population is very restless and serious outbreaks are feared.

REPORT ON CONDITIONS IN ENEMY OCCUPIED ITALY - NO 37.

This report does not in any way represent the political views of the compilers, but is an effort to present an accurate picture of conditions in enemy occupied Italy, and of the state of public opinion there, compiled from Italian eye-witness accounts and other information. Sources of information are quoted in brackets. This information is released by Military Censorship for all propaganda except for items side-lined.

I. Disposition of Partisan Bands.

PIEDMONT.

The most important formations of partisan bands in Piedmont, from east to west, are as follows:

1. The bands of the VAL D'OSSOLA (Garibaldini, Monarchist and Giustizia e Liberta)(now numbering about 2000 men, reorganised after the big mopping-up operation of the end of October last.

2. The formations of the VAL SESIA (Garibaldi groups) comprising about 5000 men under the command of CINO MOSCATELLI.

3. The BIELLESE bands. A group of Garibaldi bands commanded by "QUINTO" and a Giustizia e Liberta Brigade of 200 men commanded by "MONTI".

4. Formations of the BASSO CANAVESE A "Matteotti" Division of 800 men under the command of "PIERO" and including the 76 Garibaldi Brigade under the command of "TIM"; also a body of partizan police commanded by "DIAVOLO ROSSO".

5. Bands of the VAL D'AOSTA. These are difficult to enumerate owing to the recent mopping up operations. It is imaginged that they still include Giustizia e Liberta formations at CHAMPORCHER, VALCHIUSELLA and VAL GRANDE.

6. Bands of the CRESCENTINO (North of TORINO) Here again precise details are not at present known owing to recent mopping up operations.

7. Formations of the LANGHE (ALESSANDRIA, ASTI, CUNEO) under the command of Major MAURI (there were about 8000 men up till the end of November 1944).

8. Giustizia e Liberta formations of the VAL STURA, VAL MAIRA and VAL VARAITA. Precise details of present numbers not known.

The following is a report by the HQ of the GIUSTIZIA E LIBERTA Bands in PIEDMONT on their formations in that area up to the 15th December 1944:-

At the beginning of October 1944 there were 10 Giustizia e Liberta divisions in PIEDMONT, six of which were Alpine. Under the Division come Brigades, columns and squads.

It is very difficult at this time of the year to give an exact idea of the positions and strength of the formations, and the following table is therefore only approximative:

I. Div. Alpina	Valli Stura, Grana, Gesso, Roia, Vermenagna and Risalte. 1,200 men	
II Div. Alpina	Valli Maira and Varaita	800 men
III Div. Alpina	The Cuneen plain	800 men
IV Div. Alpina	Val di Susa	700 men
V Div. Alpina	Valli Pellice, Germanasca and the plain of the Pinerolo 1,200 men	
VI Div. Alpina	Valli Orco and Soana	1,000 men
VII. Div. Alpina	Aosta region	700 men
VIII. Div.	Alessandria region	1,500 men
IX Div. Alpina	Monferrato region	1,100 men
X Div.	Asti, Alba and Canale regions 500 men (this division is in process of formation)	

These figures include only those living in active detachments. There are many more adherents who live at home, but who have arms hidden and are only awaiting orders to come out into the open. Owing to the difficulty of feeding and arming large numbers of men our HQ tends to restrict the numbers on "active service" to the essential minimum. The efficiency of formations containing relatively the same numbers depends on their training and armament. The Alpine units which have been engaged in partisan warfare since the Armistice are of a higher quality than some of the others. These older formations are also better armed as they were able to seize material from the disbanded army and have also received drops from the Allies. For example the V. Div. has over 500 automatic arms, while the IX Div. has less than 100.

I Div. Alpina The "Carlo Rosselli" Brigade of this Div. is now in the line with American and French troops on the Alpes Maritimes front.
II. Div. Alpina has several well-armed and well-trained groups. The Division is preparing to move several groups to the Langhe area, where partisan activity has languished since the severe mopping up operations there last November.
V. Div. Alpina is in liaison with an Allied mission and operates under the orders of an American officer. It is certainly the most efficient and mobile of our formations. From its HQ in the PINEROLO area it now operates in the flat country round Turin, carrying out acts of sabotage on the main lines of communication and attacking German units. It acts in conjunction with the IV Div.
VI. Div. Alpina. The commander has recently received arms and ammunition from the Allies and his men have reached NOVARA, where they blew up a barracks. In an engagement near CANAVESE they killed 87

VII. Div. Alpina includes the Cattaneo Brigade which is very active in the BIELLA area. This brigade has many acts of sabotage to its credit and also the death of a German divisional general, killed during an attack on an enemy column.
VIII. Div. has survived large scale mopping up operations and still controls several valleys leading from the Alessandrian plain to LIGURIA.
IX. Div. is probably fusing with V. Div. in view of the increase in sabotage and other activities around Turin.

The regional commanders of the Giustizia e Liberta, the Garibaldi, Matteotti and Autonomous bands form part of the military committee of the CLN Piedmont, which attempts to coordinate partisan action and settle disciplinary and organisational questions and prepare the

operational plans for the insurrection. The Comando Militare Regionale Piementese (C.M.R.P.) is really the military expression of the CLN of Piedmont, which groups all the anti-Fascist forces and which is the only authority recognised by all partisans of whatever political party. Under the C.M.R.P. there exist Zone Commands which coordinate operations within the zone and alongside these are the partisan Tribunals which judge partisans guilty of military or civil crimes as well as spies and collaborators.

The partisan formations differ in some ways. For example the Autonomous bands tend to occupy a given zone and then sit down to defend it, as at DOMODOSSOLA and ALBA and the Mauri bands in the MONDOVI area; Giustizia e Liberta bands were the first to apply the war of movement and constant diplacement. The Garibaldi and Mattecttti bands have gone even furtner and allow their units great freedom of movement and action, which on occasion has led to unpleasant incidents with the local population. Giustizia e Liberta bands have always refused any overture from the enemy for the delimitation of "zones" Alongside their military activity they carry on an active propaganda by means of handbills, leaflets and papers (Il Partigiano Alpino, Il Pionere, Quelli della Montagna and Giustizia e Liberta').

The geographical formation of Piedmont, the almost exclusive recruitment of mounteineers in the first formations and the especial support of the population in the mountain valleys all helped to retain the formations in the Alps for the winter 1943-44. But the Allied landings in Southern France and the consequent increase of German troops, (infinitely superior in discipline and armament to the Fascists) along the Alpine frontier has radically changed the situation With the presence of German troops (mostly Alpenjuger) on the passes, reinforced Fascist posts at the valley entrances, the consistent spoliation of the already needy civilian population by both, and the transport crisis, these valleys no longer constitute secure bases. Defense of the valleys is unfeasible, not only because of the climate, but also because ammunitions is too scarce. The partisan war of position has had its importance in the general picture of Allied operations, in that it has almost entirely prevented the consolidation of the Neo-Fascist Republic and has provided asylum for deserters from the call-up, whether German or Fascist army, for political refugees from the big towns and for workers on strike. Today the larger German forces in the area and the slowing down of operations on the Italian front necessitate a return to the war of movement. After the Allied landings in Southern France our Command forsaw this situation and laid its plans accordingly, scattering small units over the Piedmont plains. Today Giustizia e Liberta forces can be grouped in three categories:- (1) Territorial units doing local police duties and composed of the older partisans. They assist the clandestine communal councils in the maintenance of order and defend the workshops and rest areas of the mobile formations (2) mobile groups consisting of not more than ten men, armed with automatic weapons and intended for sabotage and commando work. They cover a large area in several weeks, after which

These men are dressed in civilian clothes and furnished with false identity cards so as to pass the traffic blocks that now abound on the principal highroads. (3) ordnance units which provide the mobile units with equipment etc.

Finance The partisan who lives in the plain, far from his Alpine base where he lived in a camp, and perhaps had his family nearby, costs much more. He has to live with peasants he does not know and generally has to pay highly for it. He has to organise his own intelligence service, which costs him more money. Also he has to buy more clothing, sometimes as a disguise, sometimes because in a sudden move he had lost all his effects. Calculating on the actual cost of living, a partisan living on the plain needs at least 3000 lire a month, whereas six months ago a partisan could live easily in the Alpine valleys for

1000 lire a month. As is known the funds available to the CLN of Piedmont have been for some time exhausted and the possibility of obtaining other funds from local resources becomes increasingly limited, partly through the steady impoverishment of industrial, agricultural and comm ercial activities, partly because the few firms that are still making money are working for the Germans. The lack of funds causes the partisans to resort to hold ups in banks and business offices. This sets up a vi cious circle; the population considers it is the victim of unlawful actions and refuses to contribute to the partisan movement; the partisans have not enough to eat and are forced to help themselves from the population. Our HQ has up to date condemned all attempts to obtain money by violent means, but our orders in this sense have small chance of being obeyed if they are not accompanied by adequate remittances. To reduce the number of men on active duty would only serve to demoralise the whole partisan movement and hearten the Germans and the Fascists, already sufficiently emboldened by the winter and the course of the war in Italy. Moreover there are certain technical drawbacks to a disbandment: no-one believes in the Fascist amnesty; the partisan who leaves his formation has almost no possibility of fitting into a civilian job. He is faced with the alternative of deportation to Germany, enrollment in one of the many German or Fascist military formations, or penury. Under these conditions dissolution of the bands would lead at once to the formation of authentic gangs of robbers and brigands, forced to sack their neighbours' goods so as to live.

The "CARLO ROSSELLI" Brigade -Giustizia e Liberta - CUNEO

This unit has since the middle of September 1944 been located on the Southern Alpine front at BELVEDERE, near ROQUEBILLIERE, as an independent Italian unit under the command of the FFI. It was founded immediately after the Italian Armistice by Avv. Duccio (Tancredi) GALIMBERTI of CUNEO. It started with some four non-career officers of the Italian army and about thirty seven men at MADONNA DEL COLLETTO in VAL GESSO. It later migrated to PARALUPO in the VAL GRANA and then to SAN MATTEO, by which time it counted about 100 men.

Members of this band are at present being used for action by at least two Allied agencies.

GENOVA

The principal partisan formations under the CLN of GENOVA are the Garibaldi Division which works in the region of TORRIGLIA and the partisan brigade which has its zone of activity towards FINALE LIGURE-VENTE and BARDINETO -CALIZZANO. The "G & L" brigades worked rather towards SPEZIA, commanded by a certain BOJA, a dentist of SPEZIA.

In GENOVA, when source left (21.12.44) there was a strong military movement led by a Major of Artillery STIMOLO who possessed a radio transmitter with which he established contact with the 5th Army. After the arrest of some of his collaborators, however, he is believed to have changed his zone of activity.

TOSCANA

CARRARA and MASSA

At the end of the month of November on the Apuanian Alps and particularly in the region from ANTONA to CASTELPOGGIO, there were about 25,000 armed partisans. On the 29th November, however, the Germans, coming from CARRARA, began a mopping up operation aimed at COLENA. Their attack was held and repulsed with grave losses for the Germans, who left in the hands of the partisans four machine-guns and about 10 prisoners. By the 3rd December the situation, after further attacks from all sides, had become so bad that the Commander of the partisans decided to try and cross the lines with the whole

formation. However, the enemy's vigilance on the roads to the front prevented this; some of the partisans succeeded in getting over, but the rest were obliged to hide their arms and return to their homes. Having completed the operation the Germans abandoned the zone, which remained, from that date until the first 10 days in January, relatively calm. But in the mountains the bands are reforming; one in the CAVE DI CARRARA region, in the zone of CANAL GRANDE, and another in the FORNO DI MASSA region. Both these formations numbered, in the first 10 days of January, 200 men each. Round the first band are grouped the partisans of the "G. Mencori" Brigade; round the second, commanded by "Vico", those of the Apuanian Partisan Group. The G. Mencori Brigade is commanded by by "Nenne".

MODENA Division.

Commander: formerly "ARMANDO" now "DAVIDE". Strength: was first about 5000 men; after the mopping up operation of MONTE FIORINO 2 to 3000 men; now about1,500 men, but a great increase is expected from men belonging to GAP and SAP organisations of MODENA, CARPI, SASSUOLO and REGGIO EMILIA.

Brigades: Brigata MINGHIN
FULMINE
BARBA NERA
FRANCIA
TITO.

Average strength of each brigade 150 to 300 men.

Area of Operations: The Division is expected to operate during the next few weeks astride of Route 47, from PAVULLO to MODENA, ambushing and machine gunning convoys and isolated cars etc; however, the Germans are not using this road much. Bridges have been blown on the MONTEFIORINO-CASTELLARANO road. On December 22nd a very good "drop" of clothing, food, blankets, weapons and ammunition was made.

(P.W.B. Florence 3.1.45).

II. Recent Partisan Activities.

Renewed large-scale partisan operations are reported from northern Italy. In TREVISO, German and Fascist troops were defeated by a strong partisan group, losing 60 dead, including a German colonel. The partisans took 50 prisoners and sentenced to death and executed 46 Fascist traitors. On the UDINE-TREVISO line, partisans destroyed, by a daring attack, two locomotives and 26 trucks loaded with war meterial, afterwards blowing up parts of the

(Volksrecht, Zurich 18.1.45).

According to a recent arrival from northern Italy, though the situation is more or less normal again in LIGURIA and the VENETO, this is not the case in LOMBARDY and PIEDMONT. In the two latter regions there has been a recrudescence of activity on the part of the partisans who are now fairly regularly supplied by air. The partisans have greatly facilitated the task of Allied airmen by arranging numerous landing grounds on plateaux in the AOSTA valley. Automatic arms, warm clothing and medical stores are continually parachuted down behind the German front. Acts of sabotage are increasing in all regions and cause heavy losses to Kesselring's army, in spite of terrible reprisals by the occupying Power.

Members of the "Matteotti" Brigade blew up a bridge over the DORA BALTEA on December 24th, interrupting rail traffic between IVREA and AOSTA for a long time and making it difficult for the Germans to export machinery from COGNE.

On the night of 25th and 26th December parties of patriots attacked an aeroplane factory in GENONA., in the Province of UDINE. The production of wings for fighter machines must have been begun there on December 26th, but the transformer and 18 principal machines were blown up; other vital parts were also destroyed.

The latest number of the Lombardy edition of the clandestine newspaper "AVANTI" contains the following reports of patriot activities in occupied Italy: "Matteotti" Brigade groups operating in LOMBARDIA conducted a series of operations in the MILAN zone, aimed at disarming the maximum number of armed men. Many arms were seized during these operations, including two machine-guns, six tommy-guns, ten rifles, 20 revolvers, ten hand-grenades and a large quantity of ammunition. In the VIA SALVINI and the PIAZZALE LORETO in MILAN two German garages were attacked after the Nazi guard had been overcome. High explosives were thrown inside the premises damaging all the vehicles kept there, as well as a large search-light plant.

In some LIGURIAN valleys where "San Marco" detachments were stationed, there have been frequent surprise attacks on garrisons which soon surrendered and handed over their arms to the partisans. The partisans have shorn the hair of some women in CALICE and PIETRA LIGURE who had acted as spies.

Members of the "Matteotti" brigades captured five Fascist spies and sentenced them to death after a regular trial. The execution took place in ALBARDEO where the spies usually worked.
(Libera Stampa, Lugano 18.1.45).

At GARFAGNO on the night of the 31st December and 1st January a bridge south of SILLANO was blown up by the patriots.

III. Mopping-up Operations.

During Fascist mopping-up operations in the PARMA region 213 partisans were arrested and 446 killed in the fighting. 91 wounded partisans were captured and 200 persons were imprisoned in the NOVARA and VERCELLI prisons. Operations along the Swiss frontier have started against smugglers, two of whom have been killed.

A formation of the Italian SS last week attacked the 53rd Garibaldi Brigade near LOVERE in BERGAMO province. After two hours of firing 30 Garibaldians were encircled and their numbers were reduced by half. The remainder, some of them wounded, were obliged to surrender. These wounded included Lt. They also captured near Castagneto Po a British, an Australian, and two South African escaped prisoners of war. The PINEROLO garrison, operating in the BURIASCO and ROSSASCO regions, captured nine bandits and a hugh quantity of arms and ammunition. Co-operating with elements of the Republican Army, it mopped up the CAMPIGLIONE FENILE zone where, in two successive clashes, four rebels were killed and two others captured, together with 11 defaulters and deserters. These papers are not only addressed to the fighting elements of the divisions operating in the Cuneense, but also to those elements which, separated from the former by the vicissitudes of the war and strategical movements of the Germans have been obliged to cross the frontier into France. This happened to the "Carlo Rosselli" Brigade, which having fought hard in the Valle Stura and after having manoeuvred cleverly among the German forces, went into France, where it has continued to fight.

Galimberti was put to death by the Fascists, and the paper prints an Order of the Day from the G & L Command calling upon the members of bands under its jurisdiction to avenge their leader's death. There are also interesting letters of condolence from the Commando of the Brigate d'Assalto Garibaldi of Piedmont and the Commando of the Bruno Buozzi Brigade addressed to the Command of the G & L Brigades. The Command of the Autonomous Formations of Piedmont also writes an article on the famous patriot's death.

VI. The Italia Division

The ITALIA BERSAGLIERI DIV. is the fourth Fascist-Republican Division of Marshal GRAZIANI's Ligurian Army to be identified in Italy. Unlike the other Republican divisions the ITALIA is composed of draftees and a few volunteers who answered to the Republican draft call of March 1944. In March and April the component elements of the division were formed at VERCELLI and NOVARA from Italian recruits between the ages of 19 and 24. Among those recruited by Fascist Brigades in Northern Italy were numerous ex-partisans who had been captured by these brigades. In May the ITALIA DIV. reached its organic strength and was then transferred to a training camp near SINGLRINGEN, Germany. Here, the troops received weapons and other equipment in preparation for their training which began in early June 1944. During the following months the ITALIA Div. trained 10 to 12 hours a day under Fascist and German officers and NCOs. On 23rd November 1944, after six months of training the first elements of the ITALIA DIV began moving into Italy. In addition to the Engr Bn which is believed to be in CASTELNUOVO (L 1308) source knew only that the Rcn Bn and one Arty Bn of the ITALIA DIV are in Italy. The Rcn Bn and the Arty Bn were in bivouc near COLLECCHIO (L0180) on about 8th December 1944. The other components of the ITALIA DIV have supposedly re-entered Italy, but source did not know their present location or intentions.

The strength of the ITALIA DIV was about 15,000 officers and men when it completed its training in Germany. It is composed of the 1st Bersaglieri Regt, the 2nd Bersaglieri Regt (with 3 bns each) and an Arty Regt with 4 Bns. There are also an Engr Bn, a Rcn Bn, a Signal Bn, an anti-tank Co, a Medical Co (possibly 2 cos) and a transport group in the division. The troops of the ITALIA DIV have German weapons, with the exception of the Artillery Regt, which has some Italian pieces. As in other Republican units the soldiers from the first elements of the ITALIA DIV to arrive in Italy began deserting a few hours after they set foot on Italian soil.

The soldiers of the ITALIA DIV wear the Italian blue-green uniform. The Bersaglieri can be recognised by the array of "cock-feathers" which they wear on the left side of the helmet and on the Bersaglieri Fez. The soldier's branch of service or arm can be recognised by the "collar patch" he wears on the lapels of his field [illegible]. The Republican authorities have adopted a new design and

The troops of the ITALIA DIV have German weapons; with the exception of the Artillery Regt, which has some Italian pieces. As in other Republican units the soldiers from the first elements of the ITALIA DIV to arrive in Italy began deserting a few hours after they set foot on Italian soil.

The soldiers of the ITALIA DIV wear the Italian blue-green uniform. The Bersaglieri can be recognised by the array of "cock-feathers" which they wear on the left side of the helmet and on the Bersaglieri Fez. The soldier's branch of service or amm can be recognised by the "collar patch" he wears on the lapels of his field uniform. The Republican authorities have adopted a new design and a new system of colouring the "collar patch". This has been done to distinguish Italian Republican uniforms from that of the Italian army. The Engineers wear a black "collar patch" with a red border; the artillerymen wear a "three-pointed" yellow patch, and the Bersaglieri (infantrymen) wear a "three-pointed" crimson patch. VII. The Private Bn of Ten. Riccardi.

Two PW were recently captured on the 8th Army Front (8.1.45) belonging to a Republican Fascist Bn, with a strength of 85 men and led by Tenente RICCARDI. The Bn appears to be more or less the private army of Ten Riccardi and not part of the organised Republican Fascist Army. Ten Riccardi, early in September 1943, started recruiting young men in FORLI with the intention of forming a "Compagnia della Morte". He was not very successful, but managed to group together 80 - 90 youngsters and took them to AREZZO for one month's training. In October the Bn returned to FORLI. While in FORLI the Bn's activities were confined to guard duties and only once was it employed in a mopping up operation in the area of POLENTA, when apparently only one partisan was captured. When the Germans withdrew from FORLI the Bn was used in the rear areas to protect the German lines of communication from partisan activities. On 20th November the Bn was sent to MASSA LOMBARDA where it remained until it was sent to the front line on 2nd January. The two prisoners, together with one comrade who was killed, volunteered to join a German patrol, and that was how they were captured.

Ten RICCARDI is presumably a very compromised Fascist of the worst type, and has built up the Bn to have a private body guard. His men are all very young and believe blindly in whatever their O.C. tells them. They also have a great admiration for him. Riccardi told them that his father, mother and sister were killed by partisans in BOLOGNA, nevertheless he himself did not want to fight the partisans. His policy, he claimed, was purely nationalistic. He has no sympathy with the Republican Fascists because they all spend their time trying to find soft jobs and do nothing to help the fightin troops.

Riccardi also persuades his boys that he supports the Bn from his own private funds. Men are meant to be paid 50 lire a day, but Riccardi puts 30 lire aside for them and pays only 20. He told his men that being very young they will need that money after the war.

S. Ten FEDERIGHI the 2 i/c is apparently a hero of this war and also a millionaire, who shares with Riccardi the expenses of the Bn.

Serg. IANUZZI was born in Egypt and is a fanatical Fascist. He runs a weekly newspaper for the Bn called "Canta il Mitra".

Apparently the two millionaires are running short of money now, and the Bn will shortly be attached to the "CAPANNI" Black Brigade of FORLI.

The members of theBn gave their word of honour that they would fight to the end with Riccardi. In Forli one of them deserted, but he was captured and executed.

The two prisoners firmly believed that when captured they would be shot by the Allies: that is why, at their first interrogation, they said that they belonged to the TODT organisation, and that they were pushed into the line by the Germans.

VIII. The Littorio Division.

The LITTORIO INFANTRY DIV. was named after the LITTORIO ARMOURED DIV (Italian Royal Army) which was destroyed in North Africa in December 1942. The Div was reactivated in training camps near DETMOLD, Germany in April 1944. Its personnel was recruited from (1) former members of the Royal Army who were interned in Germany at the time of the Italian armistice (2) from recruits who were drafted in Italy and sent directly to Germany, also after the Italian armistice.

The Div. underwent three months Infantry training in Germany. Although it was not adequately trained and equipped, the Div was scheduled to go to Italy in late July 1944 with the MONTE ROSA ALPINE DIV. and SAN MARCO INFANTRY DIV. These plans were changed when the attempt on Hitler's life was made (20th July 1944). At that time the Div. was immediately disarmed and the training camp was put under the command of SS troops. On about 25th August 1944 the weapons and equipment were re-issued and the Div. moved to the training camp at Munsingen where the Monte Rosa Alpine Div. trained. The Div remained at Munsingen until it was ordered to Italy in late October 1944. The LITTORIO INFANTRY DIV. arrived in the VOGHERA (k-0712) and TORTONA (P-9502) areas with only 40% of its weapons and equipment on about 2nd November 1944. PWs say that the division was going to ALESSANDRIA or TORINO to fight partisans in the adjacent mountains.

PWs say that Mussolini and Graziani promised the soldiers that the LITTORIO INFANTRY DIV. was to be motorised. However, this promise did not materialise and the Div. was made an Infantry unit. When the Div left Germany its strength was 14,000 men and officers. The soldiers began to desert as soon as their train passed through the BRENNER PASS into Italy. The Div. lost 1500 men through desertions during its first week in Italy.
(P.W.B. H.Q. 15th Army Group 10.12.44).

IX. Conditions and Morale.

Two deserters from the MONTE ROSA Division said that they deserted because of lack of food; also that they had been in concentration camps until they agreed to volunteer.
(P.W.B. News Section Rome 27.1.44).

German officers in the MONTE ROSA Div. have only a supervisory role; they do not give orders to the men. Morale in the MONTE ROSA Div. is bad and there is no will to fight. Most of the men called up in the ALTO ADIGE had volunteered for German rather than Italian units. Men granted leave from the MONTE ROSA Div. take the opportunity to "disappear" by hiding in friends' or relatives' houses, or even, as source did, to desert. Food in this Division was better than in German units. The rations were 700 grms of bread, soup for lunch, pasta asciutta in the evening, coffee for breakfast and 8 cigarettes a day. Meat was served two or three times a week. Desertion would be much more frequent were it not that the men do not know the exact location of their own minefields. Italian and German officers try to frighten the men by telling them that they will be shot by the Allies if they desert, but this is not believed by many.

Source's papers were never checked during his journey southward (From BOLZANO to ARCOLA) (which took about 6 days as it had to be done mostly by bus because of constant interruptions to the railway

X. Dispositions.

The 34th Inf. Div. which was formerly in the area VENTIMIGLIA -CUNEO was transferred during December 1944 to the area SAN REMO-CUNEO-CESEBA. The 80th Inf. Regt. of this Div. is at CESEBA. On the 9th of December 1944 the Commander of the 80th Inf. Regt. and his staff were killed by patriots near Ceseba.

The 5th Mountain Div. is in the area to the N and NW of CUNEO.

The 157th Inf. Div. formerly in Western Piedmont, was moving during the first half of December towards the UDINE area. The auxiliary services of the Div. reached the area DESENZANO-PESCIERA about 17th December 1944. The advance command post of the Regts. had already arrived in the area UDINE -SAN GIORGIO.

The 188th Inf. Div. which has been for some time in the TRIESTE area should soon be transferred to the area PIACENZA-ALESSANDRIA.

The 136th Supply Regt, for special use, is to be removed to the MANTUA-CREMONA-PIACENZA supply area, and staff quarters are to be prepared at TREVIGLIO (between BERGAMO and MILAN).

The staff of the 15th Police Regt. is now at MILAN.

German Terrorism in Bologna.

Refugees from BOLOGNA report on the German regime of terror in the city which even increased after the suppression of the partisan revolt which took a large toll of Germans and Fascists. When on January 14th a German military lorry was fired on outside the city, the local German Commander ordered the public hanging of 35 hostages, including numerous elderly people, mainly professors, who had never done anything against Fascism.
(Volksrecht, Zurich 18.1.45).

Conditions in German Concentration Camps in Italy.

The following is an account of conditions in German concentration camps as related by a partisan girl who escaped from the prison at FORLI L 5487 in July 1944 after 6 months internment.

"I was arrested on 8th February 1944 charged with having helped the partisans. At first they took me to the prison at FORLI, where I was kept until the middle of March. Then I was transferred to BOLOGNA where I was shut up in the cellar of a villa in via Albergati. The house had been damaged by bombs and there were no windows in the cellar. I slept on a board with one blanket. They gave me one plate of soup a day.

One night two soldiers and an officer came into the cellar with revolvers in their hands and forced me to strip naked. They beat me with ropes and ordered me to tell them all I could.I think I was lucky to get off so lightly, because I know that several other girls, who were with me in prison, were beaten so mercilessly that the marks remained for many months. Some girls, whose names I cannot give for obvious reasons, were raped and others had the nipples torn from their breasts with pincers.

I was next transferred to the prison of S. GIOVANNI in MONTE at BOLOGNA, for interrogation and was then sent to the concentration camp at FOSSOLI. 4893

This camp was in two parts - one for Jews, and one for political prisoners. The men there were kept in filthy conditions. They were ragged and underfed. I noticed several scarred with the marks of the flogging they had received, one with a broken arm, andone who had gone mad.

The prisoners were made to work from early morning till dusk, the men in the fields and the women in the camp kitchens etc. The

Declassified E.O. 12356 Section 3.3/NND No. 785021

daily routine was: 0600 Reveille: 0700 Roll call: 0730 black coffee without sugar: 1200 soup with potatoes and greens. Work started again at 1400 until 1900, when there was another meal similar to that at midday. Lights-out was at 2100 hrs.

There were many methods of persuading prisoners to talk when they came up for interrogation. In some cases the Germans bound the legs and arms of the prisoner and pumped water up his nose. Others were strung up by their hands to the ceiling and left there for many hours. Many were whipped and beaten till their limbs were broken. and sometimes they tore out the nails from prisoners' hands and feet.

Interrogation was not the only occasion for cruelty. In my presence a German sergeant called RIEKOFF shot dead a Jew who had failed to obey an order promptly, presumably because he was deaf or failed to understand. Another prisoner, who had been recaptured after trying to escape was beaten for half an hour, until he was a mass of blood, in the presence of the other prisoners. Even the women were obliged to attend the punishment by the German officers, although BALDINI, the vice-commendant, had asked that they might be excused.

On the 24th June 1,000 men were picked and sent to BRANDENBURG and the mines at MATHAUSA (?) According to the Germans their train was attacked by partisans near MODENA. This was not true, but the Germans accused Avv. GASPARCTTO of MILAN of complicity and on this pretext executed him immediately.

On the 12th July reprisals were taken for the killing of seven members of X Flottiglia MAS. Seventy men were picked from the concentration camp. They were lined up by their graves and machine-gunned.

The white strips for recognition from the air were painted by the Germans on the roofs of their own quarters instead of the prinsoners' compound. For this reason, and because the Germans permanently kept AFV's in the confines of the camp, allied aircraft have machine-gunned it more than once. On one occasion they flew a large black flag, with the letters SS, from a mast in the camp. Allied planes machine-gunned the camp that day.

The most important members of the staff, as far as I can remember their names, were :-

Lt. "TITO" commandant
Lt. LESNER Adjutant.
Sgt.Majors HANS, GRETTWENIGER, HUBBER, HENING
Anna Maria HULMANN, a German girl aged about 21, with a taste for bloodshed, i/c discipline of women.

XIII. Anti-Desertion Measures.

According to civilians the Fascist Italian troops facing us have diminished their desertion rate because of the stringent retaliatory measures taken by the Germans against their families. Recently two Italian soldiers, whose homes were in North Italy deserted. The following day 2 men of the same company were taken by the Germans to

Declassified E.O. 12356 Section 3.3/NND No. 785021

the homes of these deserters in order to witness the execution of all members of the family. These witnesses returned to their organisation and naturally revealed the tragic event to their barrack-mates.

The Germans have also adopted an effective method of tightening the control of movement of civilians and the available sources of labour in certain parts of Northern Italy. They placed placards on the front doors of each house showing the number of men, women and children residing in the house. If at any time a check is made and the prescribed number of people are not present the head of the household is executed.
(P.W.B. Italian Intelligence Report No 92/4 22.1.45).

XIV. Propaganda.

German propaganda is very active, making great use of recent troubles in Greece. Leaflets are dropped on the Partisans. One was headed "Poor Partisans", and continued "What are you doing in the mountains? The winter has come, and, with it the snow to add to the troubles you already have. The British have betrayed you; the Germans and Republicans haunt you day and night. Partisans, go back to your homes. Surrender, and report to the nearest German unit. You will not be shot, but will be allowed to return to your families and to your work. You will not be forced into military service, and you will not be sent to Germany. What have the Allies done for you? Were you expecting an easy and rapid victory? On no front have the Allies achieved decisive results. What have been the results of your sacrifices? This is the answer - in Republican Italy, cold, hunger and misery; in Allied Italy, your liberators are sending your comrades to concentration camps or to fight the Japanese. This is the fate of all partisans "POOR PARTISANS"
(Italian Intelligence Report No 92/4 P.W.B. 15th Army Group 22.1.45).

XV. German Officials Demand Gold Payments.

North Italian industrialists have sometimes been forced to make agreements with the Germans in order to prevent the destruction of machines and equipment and the disruption of workers' families. The German officials and officers will not take paper money, but only gold. One industrialist had to pay 1.5 million paper lire in order to obtain the 100 marengoes (Napoleons) demanded by a German official for a certain "insurance".

XVI. P.W. reactions to Propaganda.

Between 10th October and 30th December 1944 2,497 PsW were asked whether they had seen leaflets in the month previous to their capture. 1,805, i.e. 77% answered, Yes. This is the highest percentage recorded in this theatre since June last.

After a period of laxity on the part of German officers, there has been a definite tightening up of attempts to prevent German soldiers from reading leaflets. They are still, however, far from general.

4892

There was a general feeling among some 100 PsW interrogated in the last week of October that though it was against regulations to keep leaflets, nothing much would happen to a soldier found with "Frontpost", while "Safe-conducts" were dangerous things to keep.

There is considerable evidence of German measures to counter Allied propaganda in general and even special leaflet themes, by means of articles in German Army newspapers, propaganda directives to officers and political lectures to the troops. There is even an instance of a Div. HQ order to believe in victory by the 12th Dec. Officers would come round after that date, and, as the P/W who related this commented, "God help you if you didn't have the right answers".

One PW aged 31 from Flensburg, Schleswig, stated that their Lt. devoted an entire lecture to "Frontpost". Amongst other things he said that it was"cleverly presented" in contrast to the German Communique, which sometimes gives the impression of being too one-sided."

Another P/W interrogated at the beginning of November said they had had no news of any kind for a month, neither the communiques nor the German Army newspaper, and Allied leaflets were therefore their only source of information.

"Frontpost is having the effect it aims at - said a P/W interrogated on 27th November - the soldiers are beginning to doubt their own propaganda and in some cases to disbelieve it entirely."

A labourer from near Lewitz, interrogated 28th November, carried a Safe-Conduct, which he thought might be useful if he were captured by colonial troops. He said he would have tried to desert if it had not been for his fear of coloured soldiers.

A P/W interrogated at the end of December, saw Safe-Conducts shelled into Ravenna on 3rd December. He was told that the following night a number of German soldiers deserted across the Uniti River.

On 11th October in the vicinity of IL POGGERI an MG platoon was approached in the early dawn by a German NCO waving a PWB leaflet. He asked permission to bring in 6 other soldiers with him on the one leaflet. Permission being granted he left and returned shortly with six of his men.

One P/W did not believe the Safe-Conducts because they, the Germans, had dropped similar leaflets on the Russians, and afterwards he himself had seen how badly Russian Ps/W were treated.

A deserter aged 35 from Cologne interrogated 30th December, had seen the leaflet "The Allies are in Germany - Why Fight on in Italy?" His comment was "It makes sense". Its good propaganda, especially for Rhinelanders".

Another deserter interrogated mid-November had been carrying the leaflet "The Attack on Hitler - Do you Agree?" about with him for three months. He said it finally convinced him that if generals like von Witzleben thought the situation hopeless, it must be so, and the leaflet, was directly responsible for his deciding to desert.

There are several statements from signal corps men who listen in on their sets, particularly in artillery units. From these it appears that sets with medium-wave range are available only from Regt. Hq upwards. With sets in Bn Hq and artillery Observation Posts, one can only listen to broadcasts on 350 to 600 kilocycles. Though this is the general rule, exceptions are found.

XVIII. Alleged Attempt on Mussolini's Life.

A series of reports and investigations render it increasingly certain that an attempt was made on Mussolini's life during his visit to MILAN in December. The plot is reported to have been the work of a terrorist band composed of anti-Fascists and Communists who succeeded in placing a machine-gun on the third floor of a house in the Via Dante. When the Duce was approaching and the partisans prepared to fire, two soldiers of the "Muti" Legion discovered them. The alarm was sounded and the Militia succeeded in disarming the anti-Fascists. According to reports, this attempt was hidden from the population by order of the Fascist Government. (La Suisse, Geneva, 20.1.45).

XIX. Political Situation in the Province of IMPERIA.

ONEGLIA: Politics flourish in this town, which has always contained a strong anti-Fascist movement. Communists predominate.
PORTO MAURIZIO: Socialists, Liberals and Christian Democrats are all active, but they are readier with words than deeds, according to source.
SAN REMO: Political activity is hindered by deep apathy caused by Fascism. The strongest natural tendency in this town is undoubtedly the Liberal Democrat, but the lack of resolution shown by its supporters has cast the more active anti-Fascist elements into the arms of the parties of the extreme left.
BORDIGHERA: The atmosphere is very similar to that of San Remo.

(Italian Intelligence Notes No 7.).

XX. The Pope's Christmas Message.

The Fascists did not allow the dissemination of the Pope's Christmas message in Mussolini's Republic. The broadcast was made almost unintelligible by jamming, and the newspapers published only a few innocuous phrases contained in the Stefani report.

The Catholic Newspaper "Italia" had the whole text ready for publication when a peremptory order was received from the Ministry

The Catholic Newspaper "Italia" had the whole text ready for publication when a peremptory order was received from the Ministry of Popular Culture prohibiting its printing and threatening that otherwise the newspaper would be sequestrated, suspended and its editorial staff arrested. Unable to continue its Catholic mission, and in protest against censorship, the newspaper itself suspended daily publication and became a weekly paper for religious news alone, acting merely as a kind of diocesan bulletin.

The official reason given was that of paper shortage. But nobody was deceived, as paper has never been wasted as much as it is today on Fascist newspapers, illustrated magazines and reviews. (Popolo e Liberta, Bellinzona 18.1.45).

MILAN

Popolo e Liberta, Bilinzona, reports from the Italian frontier 23.1.45 "The Fascist leaders are very preoccupied with the food problem. They are especially anxious to maintain the supply of bread, the shortage of which is arousing anger among the well-to-do sections of the public. Women and boys who wait in long queues formed in front of the bakeries very early in the morning threaten to make a "hunger march" through the streets of MILAN. The Fascists fear that "the usual elements in the pay of the enemy" will organise processions of poor people to demand bread at the Prefectural Palace in the Corso Monreforte and at the Fascist HQ in the Piazza San Sepolcro. The exasperation is all the more acute because the crisis has suddenly grown more urgent after a period of relative abundance, coinciding more or less with Mussolini's visit. Up to a few weeks ago white bread could be obtained at all bakeries without ration cards at a price of 40 lire the kilo.

The Fascists wanted to exhaust reserves so that when the Allies arrived they would find everything consumed and the people would be obliged to regret Mussolini's regime. Instead the reserves have given out too soon. Nothing remains and the Allies are still a long way off. Mussolini and the Fascists have to deal therefore with the situation. Hence the new decrees, including the establishing in every commune of special commissions supported by armed Fascists for requisitioning agricultural products. This means that Fascists with arms in their hands will seize the peasants' small remaining stocks.

The Fascist explanation of the situation is given in Sera, Milan 16.1.45:

The supply of bread recently has been somewhat irregular; transport difficulties, in particular, have prevented the daily arrival of flour to such an extent that some bakers have not always been able to meet the demands of their normal clientele. On the whole, however, there has been no shortage of bread, but the momentary scarcity worried the consumers affected by it, who not only rushed in crowds to the shops that had some, but, in the fear of worse happening, tried to set aside a reserve supply of the precious food by expending in one day the coupons for two, three, or four days.

VARESE

The latest number of the Lombardy edition of the clandestine newspaper "Avanti" states that in VARESE, following the concentration of many Fascists, coming chiefly from Tuscany the food distribution services have exhausted all local stocks and the population will be lucky if they have enough to eat for 20 days.

But the ration card is not issued directly the child's birth has been notified to the registrar. A reader informs us that, instead, there is a delay of 10 days. What is the little one supposed to live on if it cannot be fed by its mother during this period? Its parents must perforce have recourse to the black market.

Half a litre is not enough for a baby; nor is it easy to find "Nestogen" at the cooperative, even with a doctor's certificate. After standing in a queue for hours and hours, one mother tells us six hours, one returns home empty-handed. How is one then to feed one's children".

A report from the Fascist radio on the food situation in MILAN and northern Italy in general reads as follows:.

"The black market in food in northern Italy has practically disappeared in the last two weeks since all restaurants, which were the chief customers of the black market traders, have been placed under government control. Butter, cheese, meat, and flour which were formerly easily obtainable on the black market in MILAN, are hardly to be had now, or at prices which only a few can afford. Also, private households are no longer customers for the black market dealers since restrictions of the gas supply and lack of fuel compel most people to eat in restaurants. In Milan the gas supply is completely cut off two days a week while on the remaining five days gas is available only for a single hour each day. State-owned restaurants are still having some difficulties, aggravated by heavy snowfalls which have been sweeping northern Italy for two weeks and greatly delaying transports. Bills of fare are therefore small, but the restaurants are very crowded. In Milan you pay seventeen lire, in Turin twenty, and in Venice twenty-five for a meal consisting of about fifty grams of spaghetti, about thirty grams of meat with a little vegetable dish and about fifty grams of bread. In food kitchens one gets a meal of an equivalent nutritive value for about three to five lire. (Transocean 28.1.45).

MILAN. In view of the extreme need for wood in the city, it is to be hoped that orders will be sent to these communes.

XXVI. Finance.

Banking circles assert that no less than 100 million forged 1000 lire banknotes are already in circulation in northern Italy, and that the clandestine issue appears to be increasing. Such forged notes have also been discovered on the foreign market and can easily be identified. The paper is coarse, the printing less clear and the filigrees are super-imposed. Zeros in the forged notes are round instead of oval.
(Popolo e Liberta, Bellinzona 17.1.45).

Measures taken by the Fascist Government in northern Italy to support the lira have resulted in a fall in share prices. In two days since the publication of these Government measures, prices have fallen by eight to 13 points. FIAT shares fell from 3,000 to 2,700 Snia Viscosa from 2,950 to 2,700, Montecatini from 1,050 to 910. Government securities remained firm. It has only now become known that under certain conditions, the State can force joint stock companies to increase their capital. By this financial policy it is hoped to control liquid cash. It must also be remembered that a 20% tax is imposed on the increase of original capital of joint stock companies.
(Transocean 22.1.45).

XXVII. Industry.

By a decree in course of publication, the Ministry of Corporative Economy has ordered the socialisation of the following firms: FIAT Company, Ltd, Montecatini, Acciaierie e Ferriere Lombarde. After the socialisation of Burgo Ltd. of the paper industry, a new step for the socialisation of paper production has been made by the decree ordering the same change for the Italian paper factory of Serravalle and those of Verona and of Donzelli Ltd. The socialisation of many other firms, entrusted to a commissioner, has also been ordered.
(Italian Home Service 21.1.45).

XXVIII. Air Raid Damage.

Civilians who worked until December last in the San Bartolameo factory (LA SPEZIA) report that during that period:

The SPEZIA arsenal was almost completely destroyed. The workshops for the submarines still worked for the maintanence of a few MAS and motorvedette. The machinery of the workshops for the fitting of ships was left almost intact. The port was functioning in a very reduced measure.

Composition of Patriot Bands.

Details are given of the composition and disposition of patriot bands in REGGIO EMILI.. Province. Their chief preoccupation is the defence of the LIGONCHIO Central Power Station, which supplies electricity for PI..CENZ.. and MODEN.., REGGIO EMILI.. and P..RM.. and even FLORENCE.

A member of a band in the M..SS.. area reports that the band is now much reduced in numbers and is composed mostly of ill-educated men of most extreme Communist views, who behave like bandits towards the local population.

Recent Partisan ..ctivities

In MIL..N there has been a considerable increase in the number of attacks on German and Fascist soldiers and several bombs have been successfully exploded in caf.. ..s a result various persons were tried; twelve were shot and others sentenced to imprisonment and curfew hour was advanced from 20.30 to 1500 hours.

In LIGURI.. continual railway sabotage is taking place. Patriots in this zone have had several clashes with the enemy in his attempts to encircle the bands.

In the VENETO the damage inflicted on railway tracks and rolling stock is continuing and the attempts are widely spread.

From the 8th ..rmy Front come details of the co-operation of the 28th G..P Brigade in the Coastal Sector and of the 8th Garibaldi Brigade and Corbera Bands in the F..ENZ.. area with the ..llies.

Enemy Operations.

The enemy began an offensive on the 6th January in BORGO V..L DI T..RO zone. Two patriot brigades suffered losses, but the offensive now seems to have been abandoned.

Further to the east, in the areas between the rivers Secchio and Dolo, enemy columns on the 7th January began to move towards G..TT..

In MILAN there has been a considerable increase in the number of attacks on German and Fascist soldiers and several bombs have been successfully exploded in cafes. As a result various persons were tried; twelve were shot and others sentenced to imprisonment and curfew hour was advanced from 20.30 to 1900 hours.

In LIGURIA continual railway sabotage is taking place. Patriots in this zone have had several clashes with the enemy in his attempts to encircle the bands.

In the VENETO the damage inflicted on railway tracks and rolling stock is continuing and the attempts are widely spread.

From the 8th Army Front come details of the co-operation of the 28th GAP Brigade in the Coastal Sector and of the 8th Garibaldi Brigade and Corbara Bands in the FAENZA area with the Allies.

Enemy Operations.

The enemy began an offensive on the 6th January in BORGO VAL DI TARO zone. Two patriot brigades suffered losses, but the offensive now seems to have been abandoned.

Further to the east, in the areas between the rivers Secchio and Dolo, enemy columns on the 7th January began to move towards GATTA from various points. The column operating from LIGONCHIO was thrown back, but fighting continues at that point.

Political Activity among the Patriots.

The Fiamme Verdi Bands in VAL CAMONICA have decided not to affiliate themselves to any political party.

In PIEDMONT on 18th December the Liberal Party moved that a government be formed for liberated Italy out of elements of the 6 parties composing the CLN. This was approved by the Committees of Liberation.

SUMMARY 3.

POLITICS

Swiss sources consider that Mussolini was not too pleased at being practically a prisoner of the Germans in his Villa on Lake Garda. His views, it is said, are in complete opposition to those of Himmler and Kesselring. His journey to MILAN and his enthusiastic reception by the numerous Fascists assembled in that city, has encouraged him in the idea that he personally still counts for something in Italy and may induce him to make Milan his HQ.

Appointments.

It is reported that Himmler was responsible for the dismissal of PAVOLINI from his post as Secretary of the Fascist Party. No successor has yet been nominated.

ECONOMICS.

Food Situation

North Italy is seriously threatened by food shortage. In COMO communal restaurants have only potatoes to serve to their clients, in MILAN they can only provide two courses, including soup.

Fuel and Power.

In the North generally and in MILAN particularly production of electricity has declined so much owing to damage, sabotage etc. that various restrictions have had to be introduced.

Industry.

The shortage of raw materials is now being seriously felt. For example, the production figures of the Fiat Company are ludicrously low - 7000 units for the whole of 1944. The Biellese woollen industry is held up for lack of electric power.

Conditions in Modena and Bologna.

An 8th Army Report draws a very reassuring picture of the present situation in Modena. In spite of considerable air-raid damage to industrial undertakings the city services are functioning normally. The food situation is excellent owing to the result of large-scale distribution of stocks, made in anticipation of an Allied advance.

In Bologna up to the 15th December it is reported that the population has been increased by refugees and evacuated persons to almost 1,000,000. Even cattle have been brought into the city. Senitary conditions are not good.

4885

The strikes in Turin, Geneva and Venice are now petering out. under threats of deportation and withdrawal of ration cards. It is reported that there was no political motive for the outbreak, only desperation born of starvation and cold. Turin was the core of the movement. There 75% of the workers struck, whereas in Milan the proportion was 40%.

REPORT ON CONDITIONS IN ENEMY OCCUPIED ITALY - NO 36.

This report does not in any way represent the political views of the compilers, but is an effort to present an accurate picture of conditions in enemy occupied Italy, and of the state of public opinion there, compiled from Italian eye-witness accounts and other information Sources of information are quoted in brackets. This information is released by Military Censorship for all propaganda except for items side-lined.

RESISTANCE.

I. Disposition of Partisan Bands.

The 1st MUCINI Brigade has been operating ever since the 8th September 43 in the M. SAGRO area (P 91). Originally 700 men strong, the 1st Mucini Brigade is now operating with about 200 men. From September 43 to December 44 the Brigade was subdivided into the following formations, which took the names of their leaders: ALIBERTI, BOZZI, PELLICCIA, ELIC, MAZUCCHELLI, CAPPE, ROSAMUNDA, RIGHETTO. Each of these formations was approximately 100 men strong.
(P.W.B. Florence.)

The "FIAMME VERDI" Brigade of REGGIO EMILIA was formed following roundups carried out on the 31st July last in the area of LIGONCHIO, VILLA MINOZZO, TOANO and MONTEFIORINO (REGGIO EMILIA and MODENA provinces). It has no political leanings and is commanded by CARLO a priest of POIANO, near REGGIO. Owing to this latter fact the Garibaldi Brigades are inclined to consider it as belonging to the Christian Democrat Party. The Brigade is largely formed of regular soldiers and is led by army officers. Up to the 23rd December 1944 the Brigade numbered 300 men, besides a battalion of 150 men in process of formation. It is composed of three battalions of 100 men each, which are commanded by

"VICENZO" of Scandiano (Reggio Province) 2nd Lt.
"PEK" of Scandiano, Flt. Lt. of the regular Italian Air Force.
"FERRO" of Maro (Reggio Province)- Brigadiere of the Carabinieri.

The Brigade is commanded by "Carlo" and by a vice-commander "MANNELLI", Capt in the Alpini, and other officers are Capt. "SELVA." and Lt. "ZAGO". Moreover there is an Intendente, a Lt. of Artillery "ENRICO" of QUARA (Reggio Province). The Brigade also has a health service, directed by "DR ANDREA", 2nd Lt. of Reggio Emilia, assisted by another physician "ABELE", also of Reggio Emilia.

The 32nd Brigade commanded by "ZORRO" (an officer of Montelagno R.E.) and is composed of 500 men. Its disposition is in the RAMISETO area.

The Intendenza is to be found at SECCHIO and the Police Corps at MIPOZZO. The latter is commanded by a Lt. of the Carabinieri "VALORI". It is disposed in the various small towns where the Brigades are operating.

Activities and Duties of the Brigades. The above Brigades are entrusted with the general task of defending the LIGONCHIO central Electricity station, which is most important for the electricity distribution of northern Italy, especially during periods of frost or drought. Electric power for PIACENZA, MODENA, REGGIO, PARMA and even FLORENCE might be assured by avoiding the destruction of this installation. The transformers and the machinery which might eventually be used for building up a smaller local power station, should the present installation be destroyed, have already been removed and hidden. Moreover arrangements have already been made for defending the power station. The defence of the FARNETA central power station, the importance of which is only second to that of the LIGONCHIO station, is a subsidiary task of the Brigades. Another is that of safeguarding the Campo di Lancio of COSTALUNGA (GOVA), which might be used (apart from being a receiving base for supplies dropped by allied aircraft for the Brigades) for a landing ground for parachutists. The Brigades also concentrate on the task of watching and hampering German movements along route 63 and Via GIARDINI

Experiences of a Student with the partisans of MASSA

Source and his Father, a doctor, escaped to our lines from the MASSA area on the 26th December, making use of a small fishing boat. He had joined the partisans in order to escape forced labour in Germany. He declared that, being a student, the partisans were ill-disposed towards him. On that account they made him do all the heavy work. His father being a doctor of reputation in the area was

useful to them to look after the wounded after skirmishes with the Germans. It was also his role to listen to BBC broadcasts every other day and to keep partisans informed of the main items of news. Source seemed very disillusioned about the partisans with whom he had been in contact. At one time last summer there were about 500 men in his group. Many had since left and there were at the present time not more than 50 or 60 partisans in the district. He stated that the great majority of these partisans were poorly educated men who tended to a Communism of the most violent type. Most of their activities were concerned with stealing food, threatening the inhabitants, and violating the girls. While they had great admiration for Russia they had no love for the Anglo-Americans As regards the post-war period, none of the partisans with whom source was in contact had any ideas except that of establishing Communism.

The picture source gave of life in MASSA was one of complete desertion, with only a few old inhabitants left, living on what had not been stolen by local partisans. He considered that life on the other side of the lines was quite unbearable, as those who were not partisans of one kind or another were exploited by the partisans or were informants to the Germans.

MILAN As a result of a number of attacks recently made against Fascist and German soldiers in MILAN, which caused the advancement of the curfew from 20.30 to 18.00 hours, the Fascist authorities have carried out many arrests. Corriere della Sera reports that the Special Tribunal in Milan tried 27 persons accused of participation in several attacks. Twelve were sentenced to death and immediately executed, three condemned to life exile and the rest to imprisonment, the terms varying from 20 to 30 years. The newspaper reports that immediately after the trial, a bomb placed by unidentified persons exploded in a cafe in Via Cusani, killing two German soldiers and six Italians, including four Fascist soldiers, as well as wounding several people.

Serious sabotage has been carried out at the power stations which provide Milan with electric current. The Municipal and Edison power stations have been forced to limit the electricity supply.

A time bomb placed by unidentified persons behind the door of the Cafe Centrale in the Viale Vittorio Veneto, at the corner of Piazzale Fiume, exploded on Saturday, December 30th, at 21.00 hours. About 20 people, mostly members of the 10th MAS Flotilla, were in the cafe. Three members of the 10th were killed and eight wounded, of whom two subsequently

The Republican Prefecture of Milan announces: "Whereas, especially during the Christmas period, some people who evidently aimed at disturbing the calm and sense of discipline of the Milanese by acts of violence, have suddenly broken into public establishments and meeting places, scattering manifestos inciting to acts of violence against the public peace:

Firstly, all public establishments without exception must from today shut at 19.30 hours. Proprietors of public establishments who do not implicitly comply with this order will have their licences withdrawn and will be sent to the compulsory labour service.

Thirdly, between the hours of 19.00 and 05,00 no one may travel by bicycle within the city boundaries for any purpose whatsoever. Those who do not comply with this regulation will be fired on without warning. (Repubblica Fascista, Milan 3.1.45).

APUANIA and LIGURIA

In the zone between Apuania and Liguria there is continual sabotage on the part of the patriots and enemy attacks. A group of patriots at PONTREMOLI were attacked by the enemy whilst mining a railway tunnel, but other patriots in the SPEZIA area, eluding the enemy guard, succeeded in blowing up part of the GENOVA-SPEZIA road at ESTE DI BORGHETTO DI VARA. In the region of PASSO MADONNA DI NEVE a patriot brigade fought the enemy, inflicting considerable losses and succeeded in getting away.

VENETO The formations of patriots in the Veneto are feeling the effects of the bad weather and lack of food, but notwithstanding this they continue their work. On the night of 15th-16th December a train was destroyed near the station of PONTE DI PIAVE (TREVISO) and the following night two German convoys were damaged in the same locality. Near CASTELFRANCO a motor vehicle loaded with ammunition was destroyed during the night of 20-21 December. Recent news specifies that during the period October-December patriots of TREVISO have in all disarmed 47 Fascists and 12 Germans, executed 43 Fascists, a German Colonel and another three Germans. They interrupted the TREVISO-UDINE line for 200 hours and destroyed 28 loaded trucks and 6 locomotives. A patriot of the "Martiri del Grappa" group killed a Colonel of the Fascist Republican Army near ASCLO.
(P.W.B. Rome 16.1.45).

Patriots of a "Giustizia e Liberta" Division sabotaged 400 metres of the ASTI-CHIVASSO line in December. The Second-in-Command of the XIXth Black Brigade of ALESSANDRIA was captured, together with the Vice-Federale of Alessandria, 2 Captains, 1 Lt. and 5 soldiers.

Groups of the GAP in PIEDMONT have sabotaged the railway line five times, interrupting the traffic for a total of 142 hours.
(P.W.B. Rome 18.1.45).

TURIN It is reported from Turin that, on the initiative of the Gestapo and Scrlonetti, Chief of the SPI (Servizio Politico Investigativo) in Via Asti, an attempt has been made to infiltrate into the partisan formations fake patriots. These spies, in order to spread confusion, made the partisans themselves eliminate elements distasteful to the Fascists and denounced to the partisan Command people who were above

LIGURIA In Liguria the Germans and fascists are trying to conclude a pact with the partisans: In IMPERIA they asked the Second Garibaldi Division "F. Cascione" for a truce; in SAVONA, high officers of the Fascist "San Marco" Division, alarmed by continual desertions, are proposing "pacification pacts"; in GENOA the German Command is trying with promises to induce the Third Garibaldi Division "Cichero" to permit the free transit of German transports along the GENOA-MILAN road.

The General Command of Volunteers announces that the Garibaldians indignantly rejected all these offers.

Partisan Activity on 8th Army Front.

Coastal Sector.

Partisans of 28th GAP Brigade, organised by the RAVENNA Committee of Liberation and commanded by Major BULOW had been active in RAVENNA Province since the beginning of last year.

Owing to the nature of the terrain the partisans could not live together as a unit. Instead, the Province was divided into sectors, for each of which a detachment was responsible. Members of the detachment were recruited from the local inhabitants and continued to live as civilians. At the beginning of August the partisans' chance came when, as a result of extensive flooding of the coast northward from PORTO CORSINI, it became possible to create a small detachment of some 120 men to operate as a unit in the marshes. Early in September contact was made with this detachment, and arms and supplies sent in. It was a tribute to the organisation and communications of the RAVENNA partisans that within a fortnight of supplies arriving the numbers in the marshes had trebled. During the succeeding months more supplies were got in and the partisans were used with considerable success as an intelligence service for the front South of RAVENNA.

In the second half of November BULOW, who had set up his headquarters in the marshes, came across the lines to discuss the co-ordination of operations by his partisans with our attack on RAVENNA. An outline plan was agreed on.

The partisans started operations on 2nd December. On the nights of 1/2 Dec and 2/3 Dec ambush parties began to operate across Route 16 and E and NE of RAVENNA. During the main operations 3 Dec- 6 Dec, 27 German PW were taken by the partisans, and 37 dead were counted on the ground; but it is certain, according to various accounts, that a much larger number were in fact killed and wounded. The Liaison officers' estimate is 75 - 125 killed and 30-50 wounded.

On 7th Dec. the bulk of the partisans were withdrawn to RAVENNA The partisan detachment who had come down from RAVENNA on 28th Oct. and since then had been with British units, rejoined the parent formation and a reception centre was set up at which partisans were re-equipped and refitted. The partisans were anxious to be formed into a regular unit to hold a sector of the line and continue to the Brenner. However, after a period of somewhat delicate negotiations, it was finally agreed that the reorganised 28th GAP Brigade should be put under command of the British Brigade in the area, and that BULOW, who has been given the honorary rank of colonel, would sub-allot partisans to units as required; in addition a band of partisans was given an independent role, with a British officer and W/T set, to

reccing to the shores of the lake. As a result of this advance, contact was made with a number of partisans from 28 Brigade who had been cut off by the German advance down, and had since then operated on the various islands in the lake. They brought through two pilots who had force-landed in the area, bringing the total of escaped prisoners rescued by the partisans of 28 Brigade to five pilots and two Army CRs.

FAENZA area.

8 Garibaldi Brigade and the CORBARI Band which had operated for a year in the hills South of FORLI was finally dissolved at the beginning

of December, having first paraded in the town and listened to an address by a senior British officer who, as an escaped prisoner of war, had been with them during the Spring. A small number of partisans were however kept on as guides for forward troops and useful intelligence, particularly about the crossings of the LAMONE, was obtained from partisan sources. They were also given the rather unusual job of driving bullocks which were being used to get anti-tank guns across the LAMONE and which, under shell fire, refused to comply with orders given in English.

A number of attempts were made to get partisans across the LAMONE before the capture of FORLI, with the task of contacting partisans in the town and collecting intelligence. Owing to the difficulty of crossing the river, all the attempts were unsuccessful, though in one case the partisan courier was actually in the river when spotted by a German MG position on the other side and compelled to swim back.

Partisan guides were used by troops entering FAENZA, and the battalion concerned expressed satisfaction with them. From the partisan side perhaps the main excitement was a short sharp bout in the main square between one of the guides and a Fascist who had informed on him to the Germans some months ago.

Apart from the usual GAP and SAP underground organisations, there are few partisan bands in the PO valley on the 8th Army front. The numerous but ill-organised and ill-armed bands in the marshy and wooded country at the mouth of PO were largely mopped up during the first half of December, but in view of the very difficult country in which they operate and the strong anti-Fascist sentiments of the peasantry, and fishermen in the area they may be expected eventually to come together again.

FERRARA is a Fascist centre with a very active Black Brigade, and the Committee of Liberation has never recovered from the arrests of most of its members last Spring. However, there are a certain number, (possibly 2/300)GAP members and they may have a certain amount of arms and explosives since considerable stocks are known to have been handed over to the Communist Party by the military leader of the FERRARA area before he had to escape to Allied territory as a result of the Spring arrests.

On the North bank of the PO in ROVIGO Province there are considerably more partisans, but they have been mainly driven underground by German and Fascist authority. They are, however, reported to have good stocks of hidden arms.

The organisation of S GARIBALDI BRIGADE was as follows:-

Brigades, Battalions and Detachments, as well as/commander have a political commissar. The name, with its echoes of 1917, is somewhat misleading, since most bands, whatever their political colour, have a commissar. It is apt to be forgotten that partisans are volunteers, lacking the cohesion afforded by military discipline and military law.

SECRET

Declassified E.O. 12356 Section 3.3/NND No. 785021

morale, therefore, depends on their continuing to believe in what they are fighting for. The main function of the commissar is to keep up the anti-Fascist faith of the members of the band. Though political problems always exist in partisan bands, there is no doubt that the intention of the Committee of Liberation is that the commissar should be a unifying force, and not impose a particular ideology. Both commander and commissar are elected by the band. The Commissar usually relieves the Commander of responsibility for administration and supply.

In partisan warfare intelligence and communications are perhaps the most important factors. The intelligence section is responsible for collecting information to be passed to the Allies by any Allied wireless set in the area, and for keeping a watch on any indications that the enemy is preparing a "rastrellamento". The liaison unit, consisting of runners (usually women), is responsible for communications between units of the Brigade which may be scattered over a wide area, and for keeping in touch with other patriot units and with the provincial Committees of Liberation who are in turn in touch with the higher command of the "Corps of Volunteers for Liberty" (CVL)

28 GAP BRIGADE.

The organisation of 28 GAP Brigade was similar to that of 8 GARIBALDI BRIGADE. However, since GAP units operate in the towns or the plains, the organisation remains, in effect, embryonic till either the Brigade is able to concentrate in a safe area, as was the case with 28 Brigade, or the close approach of our troops makes it possible for the partisans to come into the open. While they are working under cover the Brigade is organised on a system, each group consisting of a leader and 2-3 men. In theory, each man only knows his immediate superiors and units are only brought together for particular sabotage actions. The GAP is in touch with, and provided recruits for, the local partisan brigade in the mountains.

SAP Organisations.

The main task of the SAP organisation was to enlist the support of sympathisers for the particular tasks of slowing down industrial production and preventing the Germans removing food stocks, by refusal to thresh the harvest and, if possible, saving public utilities etc. from demolition. The more active members may be recruited into the GAP, and when the time comes for overt action as many of the SAP who can be armed are incorporated into the GAP brigade. In ROMAGNA this was assisted by the fact that in any area the senior GAP leader was also sector or sub-sector commander, controlling both GAP and SAP.

III. Mopping-Up Operations.

The latest information on the enemy offensive in the region of VAL DI TARO says that simultaneous attacks took place on the 6th January from BORGO VAL DI TARO through FORCIGATORE, OSACCA and BARDI (in the Province of PARMA), while other forces moved from the BORGALLO tunnel in the same direction. Other German units attacked towards BARDI via FERRIERE, BETTOLA, LUGAGNANO, BORE and CASTELLARQUATO in the Province of PIACENZA. Two patriot brigades have had losses. It seems that the offensive is now finished and that the enemy is retiring across the PASSO DEL BOCCO, but further east, artillery and morters arrived at BUSANA and COLLAGNA (REGGIO EMILIA). In this vicinity the enemy controls the region to the south of Route 63
(P.W.B. Rome 24.1.45).

On January 2nd, units of the Pavia "Alfieri" Black Brigade under their Deputy Commander, Fausto PIVARI, and their Chief of Staff, LT. Col, BIANCHI, successfully concluded mopping-up operations against outlaws in the LONGAVILLA district, killing four partisand and capturing numerous outlaws and a large quantity of arms and ammunition.
(Sera, Milan 5.1.45).

Italo-German units finished mopping up operations in the SPLUGA APUANIA area in the middle of December and dispersed the outlaws, who lost about 500 killed and 1,000 prisoners. Many weapons of anglo-American make were abandoned on the battlefield.
(Italian Home Service (enemy controlled) 24.12.44).

Four German and Fascist troop columns attacked the region of Route 63 north of the Valley del SECCHIO on 7th January. One column operated in the region of FONTANALUCCIA (MODENA) towards the north; another in the direction of TOANO and in the region east of the DOLO river, towards GATTA (In the province of Reggio Emilia). III. Mopping-Up Operations.

The latest information on the enemy offensive in the region of VAL DI TARO says that simultaneous attacks took place on the 6th January from BORGO VAL DI TARO through FORCIGATORE, OSACCA and BARDI (in the Province of PARMA), while other forces moved from the BORGALLO tunnel in the same direction. Other German units attacked towards BARDI via FERRIERE, BETTOLA, LUGAGNANO, ECRE and CASTELLARQUATO in the Province of PIACENZA. Two patriot brigades have had losses. It seems that the offensive is now finished and that the enemy is retiring across the PASSO DEL BOCCO, but further east, artillery and mortars arrived at BUSANA and COLLAGNA (REGGIO EMILIA). In this vicinity the enemy controls the region to the south of Route 63

After being concentrated in the region of MODENA, SASSUOLO, SERRAZZONI and the PASSO DELLE RADICI in Emilia the Germans have made an attack on CERRE SOLOGNO, renewing the attacks on LIGONCHIO and VILLAMINOZZO in the Province of Reggio Emilia. The enemy, who has temporary control of the region, has forbidden all civilian movement. The battle continues at LIGONCHIO, where a Garibaldi Brigade has resisted strongly.

IV. Political Activity Among Partisan Groups.

Powerful Fiamme Verdi Bands in the VAL CAMONICA area have decided not to affiliate with any political party to gain representation in CLNAI, but to remain non-political and autonomous.

Piedmont. On the 19th December the CLNAI approved a motion by the Liberal Party requesting the formation of a Government for Liberated Italy containing elements of the 6 parties of the CLNAI, with a President of Council nominated by the CLN.

A Commissar from a Garibaldi Brigade which moved from the CARNIA area due to German activity declared that all the Garibaldini in the CARNIA sector are following the directive of the Communist Party for NE Italy and are under the operational control of the Slovenes. The UDINE CLN has passed a resolution censoring this action. A Slovene Bn in RESIA (C 4533) alleges that they have received orders to arrest and disarm all Italian partisans. RESIA is thereby cut off from the line of action RESCITTA (C 3855) to TARVISO. The Slovenes refuse to take action against the enemy in that area.

Following an agreement reported with the CLN of TURIN for the period immediately following the German withdrawal, Education and Public Order is to be in the hands of the Christian Democrats, Justice in the hands of the Action Party, Transport and Food in those of the Communists; Press and Finance are to be run by all parties jointly. The Military Command is to be under a Liberal General, with special clandestine sabotage anti-scorch organisation under the Communists. Two main partisan areas are to be created under each command. (P.W. B. H.Q. 15th Army Group 17.1.45).

Contrary to certain reports, there is no separatist; but rather an autonomist movement in the AOSTA VALLEY, existing separately from the local National Liberation Committees. The movement largely consists of monarchist elements who do not belong to the CNL. Both groups collaborate in the struggle against Fascism. The Val d'Aosta autonomists keep in close contact with the Waldensians. The autonomists combat the excessive Fascist centralisation and wish to preserve their language, establish cultural autonomy, and elect as magistrates people living in the valley; all this within the framework of the Italian State, of which, geographically and economically, the Aosta Valley admittedly forms a part. V. Disposition.

The Germans and fascists are increasing with some precision their attacks against patriots in PIEDMONT, singling out in particular the MAURI bands, where they believe Allied parachutists to have been dropped. A German command for anti-partisan operations was formed in the middle of November, 1944 with its HQ at the Royal Palace of TURIN and under the command of Capt. STOLBE. 8879

Anti-partisan operations in the CUNEO area are entrusted to the RESEGA unit of the Brigate Nere. This unit is reported to contain about 3,000 men, and to be well armed.

The HQ of the 1st and 2nd Coys of the armoured group "LEONESSA" are at the Castello di MONCALIERI (J. 033213). This group is engaged in mopping up operations against the patriots.

Description of a M.S

The following information was obtained from the Italian Radio Operator of a M.S, captured off the French coast while attacking a destroyer on 20th December 1944:

3 M.S, including the one sunk on 20th December 44, were stationed at PORTO MAURIZIO, IMPERIA. These vessels were registered 561, 556, and 581 (the latter sunk).

The M.S are 15 m long and 4 m broad.
2 engines Isotta Fraschini (Asso 1000 type.)
Fuel - gasoline with 4,000 litres reserve.
Armament - 2 side torpedoes, 2 anti-submarine grenades
4 AA MGs situated as follows: 20 mm MG on the rear.

A radio set ultra short wave.
The crew consists of the Captain, 3 engineers, 3 steersmen, 8 machine gunners, 2 signalmen (one of them a German NCO), 2 radio operators, and 2 torpedomen. The Captain is generally a 1st or 2nd Lt. The radio is used only for intercommunication; they do not communicate with base. During transmissions they do not use code. There is neither ammo nor petrol dump at port of departure. New torpedoes come by road from GENOA. Petrol is brought by German trucks. Orders to leave port are given by the port commander who is German.
(Italian Intelligence Notes No 8.)

The First Assault Company of the Second Volunteer Bersaglieri Battalion returned from the Apennine front, where it was twice mentioned in German despatches. After being incorporated in a German infantry Division on November 15th, the company had its first baptism of fire at MONTECUCCO, and subsequently fought elsewhere, suffering severe casualties and losing two of its three officers. Thirteen Bersaglieri were killed, 32 wounded and 16 missing. Twenty-two were awarded the Iron Cross, Second Class.
(Stampa, Turin 20.12.44).

The German Command in Italy handed over to the Fascist "Muti" Legion an armoured train. And a senior German officer harangued the troops, declaring that German and Fascist soldiers did not only differ from civilians by reason of their uniforms, but chiefly by their belief in the final victory of the Axis, which, unfortunately, was not shared by civilians. The armoured train will be used for fighting the partisans and also in order to protect threatened railway lines.
(Volksrecht, Zurich 13.1.45).

VI. The Littorio Division.

Fifteen soldiers of the Littorio Division came over the lines to St. Martin Vesubie on December 28th 1944. They belonged to the 2nd Platoon 13th Coy, 3rd Bn, 3rd Regt. The 2nd platoon constituted a garrison of two forts on the COLLE DELLE FINESTRE (2471 metres).

Officers. Platoon commander - Tenente [illegible]RINARO - said to be ready to desert. Has a German NCO, Oberfeldwebel WACH

VIII. Preperations for Evacuation?

The Wehrmacht evacuation of northern Italy has been constantly rumoured during the past year, but now rumours are more persistently based upon convincing observations. Information in Fascist circles is based upon the conference a few days ago at the Fuhrer's GHQ and attended by Kesselring, who has not yet returned to Italy, at which it was decided that the 28 Wehrmacht divisions engaged in Italy had now fulfilled their task of allowing the western and eastern armies to withdraw without being threatened from the south. Some of these divisions would be used for the defence of the Austrian and Italian Alpine frontiers, the remainder strengthening the German flank in Croatia.

Moreover the internal situation in Italy is becoming worse daily, less for political reasons than owing to the shortage of food. The food situation will not improve during the winter, as the hungry populace is becoming more disorderly and the task of the occupation troops is hourly more difficult. A rapid Wehrmacht retreat from northern Italy would throw the difficult problem of feeding and administering the country on the Allies.

Supplying 200,000 soldiers from Germany is also becoming very complicated, demanding enormous efforts. The evacuation of the whole of Italy would free the Germans from long supply lines which would fall to Clark. If such an evacuation had actually been decided upon, the present moment is the most favourable. The winter would handicap the Anglo-American pursuit. Owing to the curtailment by winter conditions of partisan activity and the strong German and Fascist offensive, they would not be able to threaten the retreat seriously, as they could if the evacuation were to occur next spring.

The same Fascist circles assert that certain troop movements

The same Fascist circles assert that certain troop movements recently made, and the intensification of the evacuation of industrial machinery from Piedmont and Lombardy to the Reich, are considered as the first symptoms of the change in German strategy in the peninsula.

IX. German Spoliation of Italy- Use of Fascist Agents.

There is a certain appearance of prosperity in Fascist Italy, owing to the policy of throwing all reserves on the market so that the Allies, on arriving, will be blamed for the ensuing scarcity. Many goods are obtainable, and not even at astronomic prices, considering the debasement of the currency - 1000 lire cost 4.50 Swiss fr., but purchase far more than this amount in Switzerland. The Germans dislike this Fascist policy, as it renders their requisitions more difficult. So long as the Fascists, although leaving large margins for evasion, enforced discipline over the deliveries of produce and cattle, the Germans knew where to lay their hands on goods. But now production flows

Declassified E.O. 12356 Section 3.3/NND No. 785027

away into many channels and they cannot effectively prevent this dissipation. The Germans themselves exclude the possibility of making wheat supplies last until the next harvest.

A high up German military personage, discussing the situation during the last few days with one of the biggest Italian industrialists, textually declared: "If things continue as they are at present, it will be a great deal if stocks hold out till April. We can hope for no food supplies from Germany, but must trust to local resources. When there is no longer anything to eat we shall be obliged to withdrew". The Germans have received orders to avoid disgusting the population by excessive irritation and, if necessary, to defend it against Fascist vexations. This does not prevent them from seizing everything available, but they use highly paid Italian agents whom they are ready to disavow in case of scandal. The clandestine anti-Fascist newspapers attack these jackals, naming them and citing incidents. Thus, Commendatore Giovanni Battista Testolini, whom the Germans familiarly call "Titta", acquires everything on the black market, from string to motor vehicles, food, clothing, cocaine and bicycles, and then blackmails vendors, threatening to denounce them to the Germans if they ask for prices which he finds inconvenient. Titta then resells his purchases to the Nazis, making enormous profits. From a begger he has become a multi-millionaire.
(Popolo e Liberta, Bellinzona 3.12.44).

X. Atrocities.

Massacre in Bologna University. News from various sources suggests that the Gestapo were informed by the Rector of the University himself that 500 students were hidden underground in the University. When the Germans entered they found two clandestine radios. The 500 students and four professors were immediately shot.
(P.W.B. Florence 4.1.45)

CASTEL-SESTE New German crimes have recently come to light in the Castel-Seste region where, last June, groups of enemy soldiers massacred innocent inhabitants. The first episode was the assassination of 7 men who were found in an open trench, which they had obviously been forced to dig themselves. The second was of three German soldiers who forced their way into a house, and not finding enough to eat, killed the owner with a revolver shot and then attempted to violate the 12 year old daughter. They were held off by the mother and the child managed to escape, but on returning to the house found the bodies of her mother and two younger brothers.

XI. Anti-Partisan Orders.

The following is a translation of a German order entitled

The Fight against the Partisan Bands.

With reference to the appeal by Fieldmarshal Kesselring to the Italian population, the following orders given to the German Armed Forces concerning the war against the bandits must be noted:

1. The announcement of the war against the bands, with the most severe measures, must not be an empty threat. THESE MEANS MUST REALLY BE ADOPTED.

2. Any aggression whatsoever must be immediately suppressed.

3. In the regions where there are the greatest number of bands a certain percentage of the population (men) must be arrested, house by house; these will be shot as soon as acts of sabotage are verified.

4. Those villages where there are attacks against Germans soldiers etc. must be burned and the culprits or instigators publicly hung.

5. For sabotage against lines of communication and the placing of nails etc on the road to cut tyres the nearest village must be held responsible. The most efficacious counter-measure is to force the population of the place to keep a watch.

1. The announcement of the war against the bands, with the most severe measures, must not be an empty threat. THESE MEANS MUST REALLY BE ADOPTED.

2. Any aggression whatsoever must be immediately suppressed.

3. In the regions where there are the greatest number of bands a certain percentage of the population (men) must be arrested, house by house; these will be shot as soon as acts of sabotage are verified.

4. Those villages where there are attacks against Germans soldiers etc. must be burned and the culprits or instigators publicly hung.

5. For sabotage against lines of communication and the placing of nails etc on the road to cut tyres the nearest village must be held responsible. The most efficacious counter-measure is to force the population of the place to keep a watch.

XII. VI and V 2 Preparations.

It is learned from a Fascist source that the Germans have constructed several places in northern Italy as launching sites for VI and V2. Through the large-scale use of flying bombs the Germans intend not only to embarrass the Allied advance in the PO plain, but to support the offensive which they will shortly launch from Croatia in order to prevent any Russian penetration into Austrian territory By this manoeuvre the Germans would aim at driving a deep wedge in the flank of the Soviet dispositions. Preparations are said to have been progressing for some time already, and it is asserted that Wehrmacht resistance in the Faenza region and the counter-offensive launched in the Serchio Valley are only diversions to distract Allied attention from the preparations in the north. The German manoeuvre in Croatia would be supported not only by flying bombs, but also by big artillery and tank reserves.

XIII. Reactions from Correggio.

London and New York are heard very well in CORREGGIO, but are subject to a good deal of disturbance. Radio Bari cannot be heard. Rome Radio also cannot be heard from REGGIO EMILIA, but a station at LIGOVCHIO is easily received.

A number of copies of the leaflet "Italia Combatte" were received by patriot bands on the mountains. They found it very interesting, above all for its precise indications of Fascist criminals and spies. (P.W.B. Rome Capt S.).

XIV. P.W. Reactions to Propaganda.

Among the reactions of the past weeks it is noted that German soldiers continually tend to compare Allied propaganda leaflets with their own communiques. The general prevailing opinion is that the former is reliable and much more cleverly presented. Several PWs have stated that maps are more effective than anything. else. The reactions that FRONTPOST produced among parachutists vary from angered contempt to tearful regret. There are increasing reports that leaflets become torn during dissemination. The percentage of PWs who have listened to "The Voice of the 8th Army" remains small, but there are definite signs that it is on the increase.

Several PWs from 98 Div had Frontpost of the 10th December in their pockets. An officer from the same Division thought leaflets had considerable effect. The actual war news, he said, was believed by even the most fanatical Nazis on the principle that when you are doing well, the truth pays, just as in 1940 the German communiques had been extremely conservative.

PW from 29 PG Div. found Frontpost in FAENZA and said it was much read by soldiers who always looked forward to a new edition. It is so widely known that they say "The postman brings it".

3 PWs interrogated on 21st December stated "Frontpost is widely read and discussed. The only complaint is that it is usually dropped too far in front or too far behind the lines.

A 19 year old Alsatian from 334 Div carried several leaflets when captured. He reported that he read at the bottom of the little slip "LATEST NEWS" "for further news see FRONTPOST". Next day FRONTPOST was shot over. This he said greatly impressed all soldiers.

POLITICS.

XV. Divergencies between Germans and Fascists.

Mussolini's stay in MILAN and his speeches have given rise to various contrasting rumours and reports regarding the present relations between the Fascists and Germans. It is learnt from a person still in the Duce's suite and in daily contact with him, that the conflict between Mussolini and the German forces, whose prisoner he feels himself to be, is very acute. There has been lively correspondence between Hitler and Mussolini over the most important problems and relations between the Social Republic and Germany. Whereas Hitler is reported to retain his old esteem and friendship for his partner, Himmler, on the contrary, wants to have nothing more to do with Fascism or Mussolini.

His three day trip to MILAN and his speech at the Lyric Theatre were intended to prove to Germany that the Italian people still favour Mussolini, and to foster greater confidence in the Republican soldiers whom Mussolini would like to see employed at the front line for the defence of the Po Valley. There has been considerable exchange of correspondence on this subject between Mussolini and Kesselring. Mussolini insisted on the mass employment of Fascist soldiers; Kesselring evaded the request several times, finally answering that he had decided against it, declaring that it was already a miracle that the Germans, accustomed to much harder fighting than the Italians were still resisting.

On reaching Milan Mussolini immediately felt himself still head of something, especially when he heard the cheering and saw the crowd again after so many months of isolation and solitude. He suddenly thought of not returning to imprisonment: In Milan, amidst the "Muti" and "Resega" Black Brigades, the Tenth MAS and refugee Fascists from all over Italy, the Nazis would not have been able to prevent him from staying. Two tendencies immediately arose among his suite; one favouring his remaining in Milan, the other favouring his return to the Lake Garda villa. If the former decision had been taken, it would have rendered obvious, even to the blindest people, the divergencies between the Fascists and Germans; the latter opinion prevailed as it was the most reasonable and less dangerous.
(Libera Stampa, Lugano 9.1.45).

XVI. The Koch Band.

Although the Koch band has not returned, Mussolini's followers have not abandoned their traditional methods. The torture of political prisoners has been resumed at San Vittore and other more or less improvided prisons, if it was ever suspended. Bufferini-Guidi has substituted for the Koch band a new secret police organisation mainly composed of Venetians, with HQ at a small villa in the Via Polizza da Volpedo, MILAN, where those arrested are subjected to "scientific"

In Regime Fascists, FARINACCI resumes his polemics against Cardinal SCHUSTER, accusing him of complaining to the Pope of the atrocities committed by Koch's band and of the Fascist persecution of the partisans. Farinacci declares that Koch is still in a MILAN prison, adding that he never acted as a Fascist authority, but simply as a functionary of a secret police organisation, and that he never received orders from the Fascists.

XVII. Clemency to Traitor Generals explained.

The trial of the Italian Generals which has just been concluded occurred exactly a year after the trial of CIANO. Immediately after the latter's death FARINACCI demanded the same fate for the Generals whose trial he had announced as imminent. The fact that no death sentences have been carried out now might be considered a setback for Farinacci. Reports from northern Italy, however, indicate other reasons that have played a role. The severe measures against collaborationists in France have had a reaction in Italy. Since the number of personalities whom the Germans will permit to seek refuge across the Alps when Italy is entirely occupied will be small the judges apparently prefer not to expose themselves to reprisals. (Tribuna de Geneve 14.1.45).

XIX. Food Situation.

Food shortage seriously threatens northern Italy. Apparently this shortage is the origin of a rumour regarding the German evacuation of Italy. Signs of famine are revealed by the newspaper "Provincia di Como", which announces that supplies for communal restaurants have now become very difficult and that in COMO they can only serve potatoes. Many people took rooms in boarding houses in order to obtain meals. There is only 28% wheat in bread. Communal restaurants in MILAN serve only two dishes including soup. On the black market, an egg costs 90 lire, a kg of butter 1,200 lire, a kg of salt 300 lire, when available. Food cards could only partly be used owing to the lack of supplies in December and January.

It is reported that the acute shortage of salt is one of the major reasons for the famine, since the peasants were unable to preserve meat and were obliged to sell it at any price in the autumn when the markets were well supplied. The famine is also due to the Wehrmacht mass requisitions. The peasants try in all ways to escape the regulations ordering the immediate delivery of cereals under the threat of very severe penalties, including the death sentence, because the cost price is higher than the official price, while the Germans willingly pay black market prices.
(Tribune de Geneve 17.1.45).

Milk Situation. Thanks to abundant stocks of fodder, milk production in northern Italy remains unchanged. However, it is not easy to carry out the distribution. The long expected new regulation of dairy prices has not yet been accomplished so that the disproportion between official and free prices is steadily increasing. All proposals made by producers to increase the prices owing to the increased production costs have been rejected, only an increase in the price paid to the producer for condensed milk has been granted for MILAN. An industry utilising milk complains of the increasing shortage of salt.

Soaring Wine Prices Explained. Answering criticisms published in the Corriere of December 29th as regards the price of wine in MILAN, Dr. Camuretti, Chairman of the Wine Merchants' Association, said that, under ministerial plans, Milan's wine supply must preferably come from the most distant provinces and in any case all from beyond the Po, which explains why the transport cost is heavier for wine than for any other commodities. Nobody knows the reasons for this decision, nor why no authority ever pointed out this fact. As regards the Provinces of Modena and Reggio, which, under the ministerial plan, should contribute to the Milan wine supply, not one drop could be expected from there "owing to false returns sent by producers". As regards the Province of Pavia, Milan wine merchants are under compulsion "to leave in the province of Pavia a fifth of the wine at a price less than half that actually paid by Milan traders." The same applies to Alessandria Province where 30% of the wine purchased must be left at #half the price paid to buy it". Dr. Camuretti adds that 30% of the wine which the wholesaler succeeds in importing to Milan "must be handed over to the military hospitals, factory canteens and various communal feeding places, according to the orders of SEPRAL, not at cost price, but at 33 lire." Therefore the wine left to the wholesaler for free disposal costs him more than 60 lire. To this should be added other expenses such as risks, waste, warehousing, war excess profits and [illegible]

XXIV. Industry.

The lack of raw meterials is ever more accentuated and is allowed in very limited quantities to the factories by the Germans The LANCIA works in TURIN, for example, are completely without raw meterial, and without any hopes of getting any. The FIAT venicle production for the year 1944 was about 7,000 units, a number vastly inferior to the productive power of the factory. The wool factories of BIELLA are in serious difficulties on account of shortage of electricity. In the ANSALDO arsenal (GENOVA-SESTRI) the building of submarines which come from Germany in pieces is still in progress.

XXV. Conditions in Modena and Bologna. to mid-November 1944.

MODENA. The city has suffered notable damage as a result of repeated Allied air raids. The railroad installations have been completely destroyed (with the exception of the station building, which, is, however, damaged). A large part of the industrial zone adjacent to the railroad station has also been destroyed. The ORSI, BELLUCCI, and RIZZI plants (steel and iron) have been demolished, as have the MASERATI workshops, the plants of the MONTECATINI Society and the State Monopoly (salt refinery) Plants of other industries have suffered the same fate. Monuments that have suffered major damage are the S. Vincenzo, Servi and S. Domenico churches and the seat of the Military Academy (the part overlooking Via 3 Febbraio) The number of destroyed or damaged buildings in the centre of the city has been estimated at about one hundred. Electric power, gas and water distribution function normally. The provincial railroads (operated electrically) still perform regular service.

The food situation is satisfactory. The population, already stocked with private supplies accumulated previously, was recently furnished with large quantities of food. The distribution was done by the rationing bureau in anticipation of the emergency believed to be imminent. The population can, besides, draw daily from private concerns and food stores. The resupplying of these concerns and stores is already under way because of the proximity of production centres to the city. There is a black market, but only in goods harder to procure. Other food products of larger consumption are obtainable because of the availability of the agricultural products of the region and the undiminished productivity of the local dairy and meat industries.

The physical condition of the population (about 110,000) corresponds with that existing during normal times. A typhus epidemic broke out during the summer (attributed to polluted water) but was quickly controlled with few occurrences of death. The agricultural situation can be considered normal in the MODENA Province. The grain was sown in all zones notwithstanding the bad season. The products of the last harvest and part of the excess remained with the producers due to lack of transportation. Despite the fact that the harvested crop was exposed to eventual looting and destruction by German troops, it is believed that large enough quantities can be withheld to cover more than the local necessity. The lumber situation has not deteriorated. In the woods there are large amounts of lumber, cut during the previous year and left for lack of transportation. Many trees have been cut down on the city streets and the outskirts. This was done to overcome the fuel difficulties. In the mountainous regions almost all cattle have been carried off as reprisals against the population for favouring the partisans. In the plains 30 per cent of the marketable oxen were carried away, all horses were requisitioned and about 10 per cent of beef and pork taken. All mechanical and horse-drawn transport has been carried away. Likewise all mechanical farm equipment.

The Germans encouraged local industries until production became paralysed after the recent Allied air raids. Actually, a good part of the working classes are employed in the Fiat workshops and other mechanical construction plants in the S. LAZZARO area. The Comm. Ferrari motor factory in MARANELLO, supplied and operated by the Germans, employs about 500 workers. The subsidiary plants of the tobacco factory of SASSUOLO and environs are also very busy. Just recently the SPILAMBERO gunpowder factory closed down on orders by the Germans, who carried away the machinery and stores. During the first days of November, the deportation of the physically fit to Germany ceased, following an agreement between the Republican Government and the German occupation authorities. As an alternative the Republican prefect commissioners will, in cases of necessity, furnish from their own provinces the number of men and kinds of skill called for.
(Appendix to 5th Army G2 Report No 495).

BOLOGNA A source who left Bologna on the 15th December gives the following details: The population of Bologna is now almost 1,000,000 persons. Even the cattle have been brought into the town, and sanitary conditions are not good. There are few or no Germans in uniform in the city, but the Black Brigades are there in force. In order to enter the town everyone has to submit to a strict inspection at the German block-posts. Only four main roads are open and controlled. The Germans are camped outside the town. Two P.Ws captured in December declared, however, that there were many German SS in civilian clothes in the town; they controlled all the factories working for Germany.

XXVI. Strikes in the North.

The strikes which since the New Year have broken out in TURIN, GENOA and VENICE are now decreasing. The Germans handed the workers an ultimatum threatening them with deportation or despatch to the front if they did not resume work immediately. The strikes have no political character, but broke out purely owing to lack of food and heating. 4878

The strike movement has been much more widespread in TURIN, where 75% of the workers have struck, than in MILAN, where only 40% struck. In order to break the strike movement, the Fascist authorities withdrew ration cards from the strikers. This measure had some success though it can only be applied during the winter when it is difficult for dissidents to join the maquis.

XXVII. German Razzias in Milan.

It is reported that the Wehrmacht has resumed its press gang methods. On January 5th, some 10,000 men of all ages, caught in the main streets of MILAN, were arrested after the police had thrown out a cordon to prevent their escape. The men will be sent to Germany.
(Agence Telegraphique Suisse 6.1.45).

XXVIII. Deportees Escape on Way to Germany.

On the BRENNER a large number of the many PIRELLI workers who were sentenced to deportation to Germany for the strikes at the end of November have succeeded in escaping from the train which also carried a load of munitions.

PRESS

XXIX. Survey of Fascist Press.

In MILAN besides Corriere della Sera (which has inherited the semi-official functions of Popolo d'Italia), Sera, Italia and Repubblica Fascists, the following newspapers are published; Camicia Nera, the weekly of the Italian Volunteer Movement; Brigata Nera, the weekly of the "Aldo Resega" Black Brigade edited by G.L. Gatti and Nino De Lisi; Sveglia, the weekly of "Combattentismo" (published in the Corriere della Sera printing works); Avanguardia, the bi-weekly of the Italian SS; Brianza Repubblicana, a Monza paper printed and distributed in Milan, the Editor of which is Leonardo Mastrandrea, and it contains editorials by Pietr Rost; Popolo di Alessandria, a bi-weekly also printed and distributed in Milan; Marcia Rivoluzionaria the fortnightly publication of Cremona Fascism, printed in Cremona, but distributed in Milan, like Regime Fascista.

The consumption of paper is enormous. All the above periodicals appear in large format. Avenguardia (Editor-in-Chief Ermanno Schramm; Editor Marcello Morabito) and Marcia Rivoluzionaria (Editor Angelo Sampietro) are subsidised by the Germans and appear respectively with 16 and 10 sides.
