NUMBER 5)

Introduction of UNCLASSIFIED Signal Messages

1. In accordance with AFHQ letter AG 311.5/215 GRI-C, dated 20 July 1945, the following information concerning the classification of Signal Traffic is published for compliance by all originators of traffic within this Headquarters.

a. Effective immediately, outside the zone of operations in Pacific-Far East Area certain subjects may now be treated as UNCLASSIFIED, and signal messages concerning them may be sent in clear by any means, including radio. The operational zone is defined as the area bounded on the west by Longitude 60 degrees east and on the east by the Pacific coast of North and South America. Appendix "A" is issued as a guide to Originators in subject matter that may be sent as UNCLASSIFIED, and will be considered as a supplement to US Army Regulations 380-5 and War Office Pamphlet "Classification and Handling of Protected Documents, 1944."

b. No relaxation of the now existing security rules is permitted in messages to any address within the operational zone, or the subject matter concerning the war with Japan. This includes multiple address traffic which may be addressed both to the operational zone and the non-operational zone.

c. An unclassified message referring to a previous cipher message may quote only the reference number and date of such ciphered message, but cannot quote the time of origin or the subject matter therein.

d. Originators are still entirely responsible for the classification of Signal Traffic. Originators of unclassified messages will include the instruction "UNCLASSIFIED" as the first word of the text. The classification "IN CLEAR" is now obsolete and will not be used. "Signatures" will not be used in the texts of unclassified messages.

2. Documents as well as messages relating to subjects listed in Appendix "A" may similarly be treated as unclassified. Such documents, however, must bear the instruction "UNCLASSIFIED."

4422

3. The above instructions are issued as supplementary to the instructions for Preparation of Outgoing Signal Messages contained in Office Memorandum No. 1, this Headquarters, dated 12 January 45, as amended.

INSTRUCTIONS FOR THE PREPARATION DISPATCH AND HANDLING OF OUTGOING SIGNAL MESSAGES.

1. The following instructions for the preparation, dispatch and handling of outgoing signal messages are published for the information and guidance of all personnel at this Headquarters. All previous instructions, including Office Memorandum No.9, are hereby rescinded, and the procedure herein described will be strictly adhered to.

The instructions contained in PART I, unless specifically excepted, will be applicable to all outgoing signals; those in PART II to TOP SECRET messages only.

PART I

2. PREPARATION.

(a) The standard message form will always be used for the first sheet of the text. For second and subsequent sheets normal onion skin 8"x10½" size paper may be used as a measure of economy.

(b) Seven copies of outgoing messages (excepting TOPSEC - see PART II) are required by Message Centre, plus one extra copy for each addressee not reached by electrical means (see sub para (c) below). The number of additional copies will be determined by the requirements of each office. Copies delivered to the Message Centre will be clearly legible.

(c) In the 'TO' space will be inserted only those addresses to whom the signal can be transmitted by electrical means. Additional local addressees or those to whom the signal cannot be transmitted by electrical means will be listed at the bottom left hand corner immediately above the line forming the office of origin space. (See specimen at Appendix 'A').

OFFICE MEMORANDUM)
NUMBER 6)

TRANSMISSION OF SIGNAL MESSAGES
WRITTEN IN ITALIAN.

1. The extract below from CSO L of C Italy letter 311.4/4 dated 23 July 45 is repeated for information and compliance by all concerned:

"Although there is no objection from a security viewpoint to the handling of telegraph traffic written in Italian, there are other considerations which make the passing of such traffic through military channels undesirable. These considerations are,

(a) The impossibility of checking for transmission errors when the operators do not understand the language;

(b) the obvious impossibility of enciphering such traffic;

(c) the general policy of reducing commitments to enable redeployment, repatriation schemes to be effected with the minimum reduction in the efficiency of the military communication system.

Under these circumstances traffic in Italian will not normally be accepted by Allied Signal Offices or Message Centres for electrical transmission, but will be handled through normal ELS channels. In the exceptional circumstances where it is absolutely essential that a message in Italian must be delivered within a matter of hours and there is no obvious means of delivery by Italian Government telegraphs then such a message may be handed into an Allied Office with a covering note to the Signalmaster or OIC Message Centre explaining the attendant circumstances and signed by a responsible Allied Officer who is a member of an Allied Commission department or organisation. It is pointed out that the Allied Signal Services cannot be held responsible for the correct transmission of such traffic."

Declassified E.O. 12356 Section 3.3/NND No. 789021

1. The extract below from CSO L of C Italy letter 311.4/4 dated 23 July 45 is repeated for information and compliance by all concerned:

"Although there is no objection from a security viewpoint to the handling of telegraph traffic written in Italian, there are other considerations which make the passing of such traffic through military channels undesirable. These considerations are,

(a) The impossibility of checking for transmission errors when the operators do not understand the language;

(b) the obvious impossibility of enciphering such traffic;

(c) the general policy of reducing commitments to enable redeployment, repatriation schemes to be effected with the minimum reduction in the efficiency of the military communication system.

Under these circumstances traffic in Italian will not normally be accepted by Allied Signal Offices or Message Centres for electrical transmission, but will be handled through normal ELS channels. In the exceptional circumstances where it is absolutely essential that a message in Italian must be delivered within a matter of hours and there is no obvious means of delivery by Italian Government telegraphs then such a message may be handed into an Allied Office with a covering note to the Signalmaster or OIC Message Centre explaining the attendant circumstances and signed by a responsible Allied Officer who is a member of an Allied Commission department or organisation. It is pointed out that the Allied Signal Services cannot be held responsible for the correct transmission of such traffic."

2. The above is supplementary to the instructions contained in Office Memoranda Nos.1 and 5 dated 12 Jan 45 and 27 July 45 respectively.
