SUBJECT : Construction of General Order No. 29 (Revised).
TO : Regional Commissioner (Attn: Regional Legal Officer),
UMBRIA-MARCHE Region.

1. In reply to your R5/511/26 of 12 April 45 it is thought that the wording of General Order No. 29 (Revised) leaves no possible room for doubt as to correct interpretation.

2. Art. I of that order repeals in toto General Order No. 29 and therefore repeals any provisions included in Art. III of that order. Obviously, therefore, Section 3 of Art. IV of the revised order does not apply to the old order which has been repealed.

3. If you desire a full list of the "existing regulations" pertaining to commodities not listed in Section 2 of Art. IV of the revised order, you can no doubt obtain these from Commerce Sub-Commission. However, by way of illustration, I shall draw your attention to the Ministerial Decree of 21 October 1944 appearing in Gazzetta Ufficiale No. 78 which has been implemented in AMG Territory and which confers upon the Italian Government control of certain materials.

4. It is understood that this opinion was not that which was tentatively put forward by Lt. Col. Thackrah on his recent visit to your Hq, but there can be no doubt that this is the correct interpretation of the order.

 SUBJECT : Construction of General Order No 29 (Revised)
 REF. : R5/511/26
 DATE : 12 April 1945

Art I of above Order repeals old General Order No 29. Art IV (3) however states that 'This article does not affect existing regulations pertaining to any commodities not listed in Sec 2.' It is not clear whether the expression 'existing regulations' includes the provisions of Art III of old General Order No 29 so far as they affect commodities not listed in new art IV (2) or whether what is meant is any existing local regulations. If the former one would have expected there to have been some saving expression in the clause repealing the old Order. This matter, which is one of considerable interest to the Army Authorities, was discussed with Lt Col Thackrah when he called yesterday and he suggested that it be officially put up to Headquarters for aruling. May I be favoured with your views please?

9 December 1944

SUBJECT: General Order No 29.

TO : Regional Commissioner, Piemonte Region.
(Attn. Lt.Col. Reiter.)

1. Reference your letter PIE/3/GEN/27 dated 5 Dec. 44.

2. The question of applicability of General Order No 29 to Piemonte Region (or any other Region) when the Regional Officers take over, can relate only to the period when the Region is AMG territory because:

- (a) General Order No 29 is not ^{always} acceptable in Army territory where materials are blocked and released in accordance with operational requirements.
- (b) It is an AMG order and, therefore, not applicable to Italian Government territory.

3. The terms of G.O. No 29 are ~~obsolete~~ in so far as concerns NON-SUBSISTENCE materials for the following reasons:-

- (a) The list of AFLRS controlled materials has been shortened and, therefore, certain items detailed on the order are redundant.
- (b) Certain materials have become "Restricted" and these are not included in the order.
- (c) Certain materials are controlled by the Italian Government even in AMG territory, since the ^{MINISTERIAL} Decree of ~~21 Oct 44~~ giving them such control, was implemented in AMG territory in the Gazzetta Ufficiale No 78. Such Italian controlled materials do not appear

- 2 -

on the list of materials detailed on G.O. N° 29.

4. The Decree referred to in sub-para 3 (c) above provides for the blocking and reporting of the various categories of controlled and restricted materials mentioned in sub-para 3 (a) (b) and (c). The Decree also details the channels through which the blocking and reporting shall be done, namely the Uffici Provinciali dell'Industria e Commercio (UPIC). These U.P.I.C. have been legalized by Decree N° 315, shortly to be implemented in AMS territory. All Regions have received copies of Decree N° 315 and have been urged to lose no time, once they are on the ground, in setting up these U.P.I.C.-

5. Consideration of the above will show that all the purposes for which G.O. N° 29 was drawn up in so far as relates to NON-SUBSISTENCE materials will be achieved by the Decrees mentioned in para 4 above, and further that machinery for handling the work entailed is provided for at the same time. For these reasons it is considered that G.O. N° 29 so far as NON-SUBSISTENCE materials are concerned is redundant and not applicable to Piemonte or other Regions yet to be taken over.

6. It is emphasized that the above comments refer to G.O. N° 29 only in so far as it concerns non-subsistence materials, as this Sub-Commission does not exercise control over the blocking and reporting of Food.

2. We return herewith draft of General Order No.29 with the words "wheat (produces) seed and family allowance" deleted together with certificate of Acting Chief Legal Officer.
3. Your attention is directed to the fact that we have added the word "Nil" after the words "Linseed and Linseed oil" (pg 2 of the added item 5 under heading of " other building materials"). This should carefully be checked because in so doing we have merely assumed, since no quantity appeared following this item, that the intention was to prohibit all transfers thereof. If the contrary is true the order must again be revised by inserting the desired quantity. This was the only item which was not followed by either the word "Nil" or a specified quantity and we have assumed that the omission of the word "il was merely a stenographic error.
4. Care should be taken that all prior signed and unsigned copies of General Order 29 are destroyed which include the matter now deleted.

SUBJECT: General Order No. 29

TO : Acting Head, Adm Sec

1. Enclosed is a copy of General Order No. 29 as prepared in the Legal Sub-Commission and transmitted, with my certificate as to form, to the Director, Industry and Commerce Sub-Commission.
2. When the signed form of G.O. No. 29 came back to Legal Sub-Commission in connection with proof reading, it was discovered that changes had been made at the beginning of "Foodstuffs" in Art. III, Sec 2. References to "wheat" were added in wording not easily understandable. The subject "wheat", because of various other orders and decrees on this subject is a controversial one and before any reference should be made to it in general orders, such as No. 29, it would necessitate a research to avoid conflict.
3. From the RC & MG Section I understand the change was made in the Economic Section. How much the RC & MG Section knew of the change before submitting the order with my certificate to Brigadier Lush, I cannot say.
4. In view of the foregoing, after the alteration was discovered, the General Order was sent back to the RC & MG Section with comment. I have heard nothing more about it and do not know whether the order is being printed or merely reconsidered. 25
5. You are familiar with the letter I wrote to the Executive Commissioner advising him of the alteration unauthorised by me after I had given my certificate. I have had no reply to that and none is required.

- 1 Attached is copy of ACC/4074/6/L of 22 Jul 44 addressed to the Executive Commissioner by the CLO.
- 2 You will no doubt agree that alterations to certified drafts without reference to the certifying officer is a most dangerous practise and nullifies the purpose of certification, it also puts the certifying officer in a very unfortunate position to say the least of it.
- 3 As General Order No 29 was initiated in your Section, I would be glad if you could issue instructions to your Sub-Commissions:
 - (i) That certified drafts will NOT be altered without first reference to the certifying officer, his branch or Sub-Commission.
 - (ii) That any alterations to original drafts are initialled by the certifying officer or his representative.

SUBJECT: Revised General Order (Declaration of Essential Supplies, etc.).

TO : Director Industry and Commerce Subcommittee.

1. Pursuant to your letter of 28 June 1944, ref ACC/5021/1c and several telephone conversations between Col. Todd and Lt. Col. Grossman, enclosed herewith revised General Order.

2. You will note that the words "effective date" are used in Section I of Article I and Section 1 of Article III. Obviously the 30 day period referred to can not begin to run until the General Order is published (posted) irrespective of the actual date on which the Order is signed. "Effective date" is defined by Article VIII. The effective date will have to be filled in at the bottom of the Order by those in charge of posting it in any locality.

3. Your letter 28 June 1944 (ref ACC/5021/1c) failed to indicate that the required declaration applied only when stocks were held in excess of the amount specified. We have so provided in the new draft, and have further amended Article I as requested.

4. We have not been able to follow the suggestion contained in Para 4 of your letter (above) with respect to the use of the phrase "and permissible stocks". This follows because all stocks are "permissible". The only prohibition is against transfer, removal etc. thereof.

5. Attached to Order is certificate of the Acting Chief Legal Officer. If you find that the Order meets with your approval, the same may be presented by you to the Executive Commissioner for signature. The RC & MC Section will then direct the translation, printing and distribution thereof. In connection with distribution and directions for publication the interested subcommittees will probably wish to give directions to RC & MC Section where this General Order shall be posted.

1. We refer to your ACC/4074/2/L, and, after consultation with the Food Subcommittee and Agriculture Subcommittee, now forward our comments thereon which carry the approval of the two subcommittees above referred to.

AC/12/2/2

Revised General Order (Declaration of Essential Supplies and Fixing of Prices).

Economic Section, HQ., ACO.

1. I enclose a draft of a revised General Order.

2. I draw your attention on the following points:

(a) Art. IV of this order at the request of Col. Arce and Col. Logg imposes a complete prohibition on transfers, etc. of the commodities therein referred to and not merely on the export of a certain amount as was done in the old Vicelli Order No. 5. I question the practicability of this without an imposing large police force to enforce the regulations.

(b) The regulations as to declarations contained in Art. I seem to envisage the collection of an enormous large clerical staff to register declarations of commodities. For the reasons mentioned in para (a) I think you will agree that every quantity however small must be declared. Apart from the staff, have you the stock of paper required for printing the forms of declarations?

(c) The question arises as to whether the limit of 15 days in Art. I is practicable in view of the fact that in large concerns the volume of work required for making declarations will be considerable and companies may be quite unable physically to comply with the order. It is also pointed out that the clerical staff of companies required to obtain permits from A.C.O. 15 the course of their business may be considerable.

(d) Art. IV contains references to wheat and other agricultural products (at the request of Col. Logg) but this would appear to not harmonize the policy and decrees passed by the Italian Government at the request of the Agricultural Subcommission. Will you please discuss with them.

(e) Art. IV also contains reference to a large number of materials and it is in fact the current Local Resources Board list. You will recall that the Local Resources Board list has of itself no legal force in any part of Italy (either Military Government or Italian Government territory) and I have therefore struck out of the list everything other in substance as the draft General Order only applies to Military Government territory, of course.

(f) So far as is known to this Subcommission the Italian Government has no corresponding decrees in substance the same law in Italian Government

- 2 -

(K7P)

territory. Bearing in mind that rapid transfers of fresh territory may be expected ought not a plan coordinated with the Italian Government so as to be applicable throughout Italy be discussed with them.

(g) The materials set out in Art. IV differ considerably from those set out in the original Sicily Order No. 5.

(h) It is added for your information that so far as is known nothing on the lines of G.O. No. 5 Sicily was issued in Italy though it is possible that Region 3 may have issued some Regional Order thereon.

3. In the light of the foregoing your early consideration of the above draft is requested. If you approve of the draft in principle or have any comments thereon in detail, please let us know as soon as possible.

SUBJECT: Revision of General Orders.

TO : Legal Sub-Commission.

1. This refers to discussion on 10 May concerning revision of general orders.

2. Attached is a note of items for inclusion in the proposed general order concerning amassing of wheat and barley. There are two suggested appendices, A concerning prices and B concerning retentions. Schedule B presents considerable difficulty. It would be much simpler to use Article III of the Decree of 2 May in its entirety and that would be much more complete in definition of persons entitled to retentions. If you think Article III is not too lengthy perhaps it could be included as Schedule B.

3. When you have had an opportunity of studying these papers I should be glad to discuss with you any points arising.

4. In so far as a revised edition of General Order No. V is concerned we do not think that Agriculture Sub-Commission need be involved. We hope eventually to tie up control of all products up to the Amasso by the Decree of 2 May and further control measures. We consider that thereafter it is a matter for Food and other Sub-Commissions.

ITEMS FOR INCLUSION IN PROPOSED
GENERAL ORDER.

10/13
4B

The title of the order would be the "Granaries of the People."

The main purpose of the order will be to bring into effect immediately the principal clauses of the Ministerial Decree of the 2nd May 1944 which deals with regulations for the collection of wheat and barley. It will also deal with the price to be paid to the producer for wheat and barley.

The order should state that ALL wheat and barley should be delivered to the "Granaries of the People" with the exception of retentions permitted under Schedule B. It should state also that all products delivered should be paid for immediately at the prices indicated in Schedule A. The permitted retentions for family consumption and for seedings should be outlined in abbreviated form in Appendix B. The order should make clear that no one person shall be entitled to more than one retention.

No wheat or barley retentions are authorized for animal feed. Farmers should be told to go to the offices of the Sindaci to study the full details of the decree of 2nd May 1944.

It should be stated that further orders and decrees may be issued from time to time regulating or controlling other farm products.

One article of the decree should state that the Consorzio Agrario is empowered to continue its functions in connection with collecting and storing of wheat and barley and is the sole agency authorized for such collections.

Any person failing to obey the provisions of this order will, on conviction by an Allied Military Court, be liable to imprisonment or a fine or both and any goods forming the subject of such a conviction may be confiscated.

The order will become operative in each Province or part thereof as it is occupied by the Allies as the intention is that the Ministerial decree will be applicable to all territories of occupied Italy.

MEMORANDUM OF MEETING WITH ECONOMIC SECTION AND REPRESENTATIVES OF SUB-COMMISSION CONCERNED WITH REVISION AND CONSOLIDATION OF GENERAL ORDERS.

The conclusions reached:

1. The following General Orders or portions thereof will in no case be duplicated:

- a. Title I of General Order 5 (Italy) having to do with wage adjustments;
- b. Art. 3 of General Order 3 (Sicily) having to do with claims for refund;
- c. All of General Order 14 (Sicily) having to do with temporary wage adjustments;

2. Agriculture seemed very much confused as between the need of function of General Orders and the proposed new Italian decrees. They apparently have some idea that pending the publication of the latter, they can function through administrative orders. We are, however, promised prompt report as to their wishes in the premises.

3. Colonel Evans is to inform us not later than Monday as to the wishes of his sub-commission as to particular emphasis on declaration of commodities and the prohibition against removal or transfer of special commodities;

4. Labor Sub-Commission apparently desires incorporated in new General Orders only the substance of Title 2 of General Order 5 (Italy) having to do with the abolition of certain fascist institutions, creation of labor offices, etc.

5. We should get special consideration to the effect in the case of Agriculture in particular of Article 7 of General Order No. 5 (revised (Sicily) reading as follows:

"The provisions of this General Order are in addition to the provisions of Italian law relative to the 'amassing' holding or possession of commodities and do not supersede or otherwise

5. We should get special consideration to the effect in the case of Agriculture in particular of Article 7 of General Order No. 5 (revised) (Sicily) reading as follows:

"The provisions of this General Order are in addition to the provisions of Italian law relative to the 'amassing, holding or sale of any such commodities and do not supersede or otherwise affect the same.'"

6. It was decided that because of the complicated nature of the subject the wages of merchant seamen and other shipping employees would not be covered by General Orders.

7. So far as price fixing and wages, rationing, schedule of charges for commercial services, rates for public utilities, rationing of electric power, rates of transportation and the like are concerned, the state of the thinking of the sub-commissions was so fluid, to put it kindly, that it would seem desirable if General Orders on the subject are to be published short of six months merely to provide therein in substance that any violation of ceilings or limitations placed upon the foregoing by subsequent orders of Allied Military Government, shall be punishable, etc. In that connection it will seem expedient to provide for the nature and character of the publication of such subsequent orders. It is doubtful how any designated place of posting could be specified since our prime interest in connection with the new General Orders, in the first instance, will be the forward areas and any building so designated might be destroyed.
