ADMINISTRATIVE ORDER)

NUMBER

INSTRUCTIONS TO A.C.C. PERSONNEL

1. Effective on a date to be announced, probably in the near future, the Allied Military Government will turn over to the Italian Government certain portions of territory occupied by the Allied Forces. At that time Allied Military Government will cease and the Italian administration will assume full responsibility for civil government in such territory.

This will involve the withdrawal of Allied Military Government personnel from the territory or their employment under the Allied Control Commission. This memorandum is to outline certain general principles which will guide A.C.C. personnel in the territories administered by the Italian Government.

Present Status - Co-Belligerency

2. Effective September 5, 1943 the Italian Government concluded an Armistice with the Governments of the United States and Great Britain acting in the interests of the United Nations. On 1943 the Italian Government signed an instrument of surrender governing the relations between the United Nations and Italy, in which instrument there were both military and other provisions designed to protect the interests of the Allies and to promote the war effort, and calling for the appointment of a Control Commission to enforce and implement those provisions.

Present Status - Co-Belligerency

2. Effective September 3, 1943 the Italian Government concluded an Armistice with the Governments of the United States and Great Britain acting in the interests of the United Nations. On 1943 the Italian Government signed an instrument of surrender governing the relations between the United Nations and Italy, in which instrument there were both military and other provisions designed to protect the interests of the Allies and to promote the war effort, and calling for the appointment of a Control Commission to enforce and implement these provisions.

5993

3. The effect of the fore-mentioned *instruments* ~~instruments~~ is to give the Allies the opportunity through the Allied Control Commission of converting the economic resources of Italy into an effective instrument of war against Germany.

4. Following the declaration of war on Germany, Italy was accorded the status of co-belligerent.

5. According to the tripartite statement of 13 Oct. 1943 "the relationship of co-belligerency between the Government of Italy and the United Nations' Governments cannot of itself affect the terms (of the Instrument of Surrender) recently signed,

0270

which retain their full force and can only be adjusted by agreement between the Allied Governments in the light of the assistance which the Italian Government may be able to afford to the United Nations' cause."

The situation of a co-belligerent does not mean that Italy is recognized as one of the United Nations or is admitted as an ally. It means that the Italian Government is fighting the same enemy and that the United Nations support it for that purpose.

General Functions Armistice Control Commission

6. The general functions of the Armistice Control Commission, as prescribed by the Combined Chiefs of Staff, are as follows:
- (a) To enforce and execute the instrument of surrender under the orders and general directives of the Allied Commander-in-Chief.
 - (b) To insure that the conduct of the Italian Government conforms to the requirements of an Allied Base of Operations, especially transportation and communications.
 - (c) To be the organ through which the policy of the United Nations towards the Italian Government is conducted and the relations between the United Nations and the Italian Government are handled.

Organization of the Armistice Control Commission

7. The Allied Commander-in-Chief will be ex officio President of the Commission. The Deputy President is the active senior officer of the Commission. The Acting Deputy President is Major General Kenyon A. Joyce, U.S.A.
8. The Commission will be divided into four Sections: Military, Political, Economic and Administrative and Communications. Each Section will be in charge of a Vice President and comprise a number of Subcommittees, which

Functions and General Duties of A.C.C. Officers in the Field

10. The nature and extent of the duties of A.C.C. field officers will depend on the *Sub* Commission to which they are specifically assigned. *15992*
 over the following guides are applicable to all:

- (a) The primary function of A.C.C. officers in the field will be to give assistance and guidance to the local Italian officials on matters *authorized in either specific instances or generally.* within their competency and to convey such instructions as may be ~~appropriate~~ under this and further directives of A.C.C.
- (b) A.C.C. officers will also carefully observe the local operation of the Italian Government in their field in order to determine whether the terms of the surrender are being vigorously and effectively enforced. The

results of such observations will be the subject of periodic reports to higher headquarters.

(c) A.C.C. field personnel will have no power to command or direct Italian officials in connection with the performance of their duty. In this respect their ~~present~~ ^{power and} duties are to be sharply contrasted with those of officers of AMG. In administrative matters the function of AMG officials is constantly to observe, assist and report to higher headquarters in order that representations may be made to the Italian Government at the appropriate level.

(d) Particularly during the transition stage and until the authority of the Italian Government is fully established as an administrative machine is functioning smoothly, the Italian officials will probably require ~~the~~ ^{considerable} ~~advice~~ ^{information} and assistance of A.C.C. officers. It is entirely proper in this way to support the authority of the Italian officials. Great care should be taken, however, not to interfere directly or give the appearance of interfering directly in the local administration.

(e) A.C.C. personnel must also take great care to avoid becoming involved in political disputes or conflicts. An early resumption of political activity and discussion is to be anticipated. A.C.C. officers will deal only with the officials selected by the Italian Government. The competency of these officials and the quality of their administration is ~~not~~ ^{now the} responsibility of the ~~Italian Government~~ ^{Italian Government}. However, when ~~local~~ officials behave in a manner likely to prejudice the position of the Allied Forces by violation of the terms of surrender or otherwise ~~A.C.C.~~ will promptly submit a report and recommend action to higher headquarters. ^{and, to the extent that authorities may have been delegated to them, in action.}

submit a report and recommendations to higher headquarters, *and to the extent that authority may have been delegated to them, take action.*

(f) In order to harness the economic potential of Italy to the war effort, it will be necessary for the Italian Government to rigidly to control many private industries and the use of much private property. Whenever an authorized Italian official requests the assistance of A.C.C. field officers in order to render this control more effective, such requested assistance should be rendered. On occasions the authority of A.C.C. may be persuasive in securing the necessary cooperation of the Italian citizen or property owner.

11. The specific duties of A.C.C. field personnel of the various Subcommittees will be separately set forth in a memorandum supplemental to this general instruction. These specific instructions will be in accordance with the following:

(a) Generally there will be no A.C.C. field offices in the command or in a position comparable to that of the C.A.C. or C.A.E.C. under AMG. General administration will therefore be subject to A.C.C. control at the provincial level. Such local inspection as may be required will be worked out from A.C.C. provincial HQ.

(b) In the transition stage and until the Italian administration is functioning satisfactorily A.C.C. personnel will, subject to subparagraph (a) above, be disposed on a basis approaching that of AMG. An effort will be made to reduce numbers as quickly as conditions permit. Probable exceptions to the foregoing will exist in the case of personnel in (i) transportation *shipping* and communication fields by reason of military requirements (ii) in the supply field, including fuel, because of the responsibility of the Allied Forces for assisting in provision of adequate civilian supplies and the necessity of coordinating the supply program with the military supply and shipping requirements.

(c) Close coordination will be necessary between A.C.C. and military tactical and administrative forces in the area. Certain committees have already been established (i.e. Local Resources Boards and Transportation Coordinating Committee). The scope of the activity of these committees and other inter-service agencies will be communicated to field personnel. It is essential that confusion be avoided and that the channels of communication with the Italian authorities remain as few and as simple as possible.

(d) Personnel engaged in the supply services of the Communications Section and the Industry and Commerce and Public Works and Utilities Subcommittees will also be required to maintain close liaison with the Commissions of the military section who are responsible for war material production and war material disposal. The competency of and lines of authority between these

The competency of and lines of authority between these Subcommittees within A.C.C. will be specified.

Regional Organization

12. It is anticipated that A.C.C. will in certain areas establish regional headquarters under a Regional Control Commissioner who will act as a counterpart to and work with the Italian Regional Commissioner who, it is understood, will be appointed to function until the national government is established at Rome or elsewhere and can effectively communicate with the provinces.

13. In areas where Allied Commissioners are appointed the following principles will apply:

(a) Personnel. The Regional Commissioners will command all personnel assigned to their respective regions. Together with the senior regional officer of the opposite nationality, they will have the power to discipline personnel under their command and will make recommendations for promotions and transfers to and from the Region.

~~In the case of most officers and some HQ/GRs assigned to regions, the field of activity in which they are to be engaged will be specified, and assignments of such specialist personnel must be observed except in cases of emergency and then only for the duration of the emergency.~~

(b) Communications. Orders to personnel in the Regions, including specialist personnel, will be issued only by the Regional Commissioner. Communications on technical matters must be sent from headquarters to the specialist personnel in the Regions through the Regional Commissioner.

~~Officers from A.C.C. HQ and will make inspection trips within the Regions. On such occasions they will make their presence and the nature of their mission known to the Regional Commissioner, or where impracticable, to the nearest Provincial Commissioner. No orders or directives will be communicated by such officers to the specialists in the field; technical observations may, however, be so communicated either from personnel at headquarters to officers in the field or vice versa. If such are in written form, copies will be furnished to the Regional Commissioner.~~

(c) Procedure. For obvious reasons it will be desirable that procedure adopted by Regional Commissioners, particularly in dealing with the Italian administration, shall be uniform throughout Italian territory. In cases where uniform procedure has been or is hereafter prescribed by A.C.C. HQ, such procedure will be binding uniformly on the staffs in each Region.

14. Where Regions exist it will be necessary for A.C.C. Regional

14. Where Regions exist it will be necessary for A.C.C. Regional Commissioners to keep in close touch with their counterparts under the Italian regional set up. Some control will be exercised under the Italian administration at this level, which control may vary in accordance with the needs of the different Subcommissions. In cases where no Regions have yet been established lesser control may be exercised over the Italian administration at the provincial level, but in general matters requiring the execution of any pressure on the Italian administration will be referred to headquarters in advance.

15. Details in regard to the division of functions ~~between~~ ^{between} headquarters and any such Regional Headquarters will be worked out and specified in further instructions, depending upon the exact powers and functions of the Italian regional administration.

Attitude toward Italian Officials.

16. The members of the Commission, whether acting officially or otherwise, should maintain a correct attitude toward members of Italian Government, neither autocratic on the one hand nor familiar on the other. They should bear in mind that the provisional arrangements between the Allied Governments and that of Marshal Badoglio are dictated by war needs and are not to stand in the way of the Italian people, after the elimination of Fascism and the eviction of the German Forces, having a government of their free democratic choice. In the meantime it is important that there be built up an anti-Fascist Government on the broadest base possible. It is, therefore, desirable that all healthy elements which can deliver some good be rallied to the common effort.
