1. Communications are sometimes possible by sea between Foggia Province and ports in King's Italy, and at times it would be convenient to send Italians by this means.

2. We understand it is proposed to utilise sea transport for Carabinieri and their household effects on being transferred, also for numbers of Italian troops on demobilization.

3. Would you please inform us what regulations, if any, govern the travel of Italians by coast-wise shipping, and what procedure is necessary to obtain permits should special regulations apply in such cases.
