P. Safety S/C

1. In order to prohibit illegal possession and traffic in unauthorized arms and munitions in military government territory, the Allied military authorities carry out a systematic system of checks and control. In the territory in which this action, in the interests of public safety, takes place, there are stationed elements of the Italian armed forces including the CC.RR. In order that there should be no doubt in the minds of the military authorities as to when genuine despatches of arms and ammunition are being made by the Italian Government to outlying CC.RR. posts or elsewhere in the military area both while the items are in movement or when dumped, it is necessary that timely information be made available.
2. It is desired that you explain to the Italian Government the necessity for the action herein directed, and request that the following information be furnished in respect of Ugene Province:
 - a. Quantities and location of all arms and ammunition now held by Italian army including the CC.RR.
 - b. Full particulars of any future movement of arms and ammunition into the subject area.
3. The desired information should be furnished to Headquarters XIII Corps, with copy to AMG Headquarters, Ugene Province. Any movements into, out of or within the area should be notified at least one week prior to implementation. In as much as periodic spot checks will be made of movements it is most desirable that those making authorized shipments shall be possessed of properly authenticated documents to prevent interference by the Allied military authorities.
4. You will ascertain the approximate date when the report of present holdings will be forthcoming, and will inform AMG thereon.

BY COMMAND OF LIEUTENANT GENERAL MORGAN:

/S/A.L. HAMILTON
Colonel, G.S.C.
Assistant Chief of Staff, G-5

SECRET

MINUTES OF A MEETING HELD IN THE OFFICE OF VP, CIVIL
AFFAIRS SECTION ON MONDAY, 27 MAY 1946 AT 1430 HRS TO
DISCUSS CONTROL OF PRODUCTION OF ARMS, AMMUNITION AND
WARLIKE STORES.

In the Chair: Brigadier M. CARR

Present : Commander, J.O. RIEK, Navy Sub-Commission.
Colonel W. PIDGEY, Land Forces Sub-Comm. (MIA)
Lt. Col. H. MICHALL, do.
Lt. Col. R. CURTIS, do.
Major R.C. VAN KIRK do.
S/Ldr. M.E. REID, Air Forces Sub-Comm.
Colonel E.M. WALKER, Ind. & Util. Br, Econ. Sec.
Capt. T.E. ELLIOTT do.
Lt. Col. F.J. WILSON Public Safety Sub-Comm.
Major N.W. HIND-SMITH, Office of Ex. Commr.
Major J.S. REAKES, CSO to VP, CA Section.

Background.

Brig. Carr said he had called this meeting in the capacity of an individual officer. It was not proposed that CA Section should take over the control of armaments; no staff was available and the Section was awaiting liquidation. The Executive Commissioner had asked him to review the situation and make any recommendations considered necessary.

He had taken A/HQ Secret letter AG 388.3/037 GEC-C of 2nd August as a starting point. This letter must be read in the light of the present situation and in some aspects it was out of date as regards policy. It provided for production of arms and ammunition only to the extent required by the Allied Forces.

Brig. Carr said that a good deal of confusion had arisen as various letters had been issued by HQ AC which gave the impression that all necessary action as regards control was being taken. One letter stated it was considered that sufficient control was being exercised through Italian laws and lack of raw materials but this did not take into account any manufacture undertaken by using existing stocks, scrap

 Lt. Col. F.J. WILSON Public Safety Sub-Comm.
 Major W.W. HIND-SMITH, Office of Ex. Commr.
 Major J.S. REAVES, CSO to VP, CA Section.

Background.

Brig. Carr said he had called this meeting in the capacity of an individual Officer. It was not proposed that CA Section should take over the control of armaments; no staff was available and the Section was awaiting liquidation. The Executive Commissioner had asked him to review the situation and make any recommendations considered necessary.

He had taken AMHQ Secret letter AG 388.3/087 GEC-0 of 2nd August as a starting point. This letter must be read in the light of the present situation and in some aspects it was out of date as regards policy. It provided for production of arms and ammunition only to the extent required by the Allied Forces.

Brig. Carr said that a good deal of confusion had arisen as various letters had been issued by HQ AC which gave the impression that all necessary action as regards control was being taken. One letter stated it was considered that sufficient control was being exercised through Italian laws and lack of raw materials but this did not take into account any manufacture undertaken by using existing stocks, scrap or salvaged materials and irregular transit of arms. An AMHQ letter dated 8 November 1945 particularly referred to manufacture of arms in the North, as this arose out of a report GGC 2 District. In the last paragraph of that letter AC was directed to inform the Italian Government that warlike stores must not be manufactured without Allied approval and that existing stocks must be recorded and guarded. Apparently no action had been taken by AC. Brig. Carr went on to say that a subsequent letter issued by AC stated that the withdrawal of AMHQ from the North would be an appropriate time to remind

SECRET.

the Italian Government of the prohibition in regard to the production of arms and ammunition. Here again nothing had been done.

Matters had come to a head recently because certain elements in the Italian police forces were being supplied with quantities and types of arms and ammunition beyond those considered necessary or desirable. Although this HQ had acquiesced in the policy of issue of automatic weapons to certain elements of the Police, it had always been considered that control of issue should be maintained, which would have been the case if authorized releases from stocks and factories had been made.

Knowledge of present extent of arms and ammunition.

Brig. Carr said he understood that Economic Section were getting particulars. Capt. Elliott stated that a list of special machinery which could not be converted to civilian use had been compiled for G-5, AFHQ.

Col. Pidsley stated that the Italian Army and the CC.RR. unlike the Civil Police Forces, had scales of armaments laid down and any Italian arms or ammunition required to complete those scales were authorized by Land Forces S/C and contracts given to recognized firms by the War Minister: this arrangement only applied to War Ministry contracts, however, and attention had been drawn to the fact that army contracts at the Beretta factory were being held up by private contracts.

S/Ldr. Reid stated that the Fiat factory was making transport aircraft and Air Forces S/C was satisfied that no unauthorized production of military aircraft was going on. In answer to Col. Pidsley, S/Ldr. Reid stated that he could give no information on small arms for aircraft and said these were usually put on after the aircraft was completed; their source was unknown.

Exercise of Control.

Brig. Carr said it was apparent from discussion on the first item of reference that control was only being exercised

production of arms and ammunition. Have again been done.

Matters had come to a head recently because certain elements in the Italian police forces were being supplied with quantities and types of arms and ammunition beyond those considered necessary or desirable. Although this HQ had acquiesced in the policy of issue of automatic weapons to certain elements of the Police, it had always been considered that control of issue should be maintained, which would have been the case if authorised releases from stocks and factories had been made.

Knowledge of present extent of arms and ammunition.

Brig. Carr said he understood that Economic Section were getting particulars. Capt. Elliott stated that a list of special machinery which could not be converted to civilian use had been compiled for G-5, AFHQ.

Col. Pidsley stated that the Italian Army and the CC.RR. unlike the Civil Police Forces, had scales of armaments laid down and any Italian arms or ammunition required to complete those scales were authorised by Land Forces S/C and contracts given to recognised firms by the War Ministry; this arrangement only applied to War Ministry contracts, however, and attention had been drawn to the fact that armaments at the Beretta factory were being held up by private contracts.

S/Ldr. Reid stated that the Fiat factory was making transport aircraft and Air Forces S/C was satisfied that no unauthorised production of military aircraft was going on. In answer to Col. Pidsley, S/Ldr. Reid stated that he could give no information on small arms for aircraft and said these were usually put on after the aircraft was completed; their source was unknown.

Exercise of Control.

Brig. Carr said it was apparent from discussion on the first term of reference that control was only being exercised over the contracts of the various Service Ministries and control was being affected by Allied authorities on any production which might be taken place outside such contracts.

Recommendations as to action to be taken in AC to implement policy laid down.

Brig. Carr said it had been pointed out in correspondence that AC had not the necessary technical staff to administer control. He recommended that it was a matter to be taken over by one of the Service Sub-Commissions, in view of recent developments and the future of AC. In view of the fact that Land Forces was the largest Service Sub-Commission he considered it might be their responsibility.

SECRET

- 3 -

Col. Pidsley replied that the views of his Sub-Commission were mainly as expressed in their letter Q.009 dated 1 May. The opinion was then given that if it was felt that restriction was necessary under the terms of the Armistice the responsibility on the Italian side should be that of one Ministry, possibly the Ministry of War. If this was done then it would be necessary for one authority to take responsibility for supervision on the Allied side.

Col. Pidsley considered that the Navy would have to be separate in the matter, but all other arms could come under War Ministry. The situation rather pointed to a section composed of technical experts in addition to military personnel. Provided suitable technical assistance was forthcoming, Land Forces Sub-Commission might assume the responsibility for control.

Brig. Carr agreed, that so far as this HQ was concerned the question of the production of arms and ammunition should be taken over by the Land Forces Sub-Commission, depending on the Italian Government centralising responsibility to the War Ministry and Land Forces Sub-Commission being suitably augmented.

Action to be taken with AFHQ and Italian Government.

Brig. Carr said that following on the last recommendation the question arose as to how control would be exercised on the Italian Government side, and whether any action should now be taken on the AFHQ letter dated 8 November. This would be linked up with the question of the Ministry of War taking over production because the attention of the Italian Government could then be drawn to control of arms. The situation was difficult, especially at the present time.

Land Forces Sub-Commission suggested that the Chief Commissioner should ask the Italian Government about their present machinery for control on the Italian side, where responsibility rested and suggesting that it might be made the responsibility of the Ministry of War. It was unadvisable to do more than this at the moment.

Brig. Carr expressed agreement with this suggestion.

Col. Pidsley undertook to prepare a draft letter to the

37.7

was done then it would be necessary for one authority to take responsibility for supervision on the Allied side.

Col. Pidsley considered that the Navy would have to be separate in the matter, but all other arms could come under War Ministry. The situation rather pointed to a section composed of technical experts in addition to military personnel. Provided suitable technical assistance was forthcoming, Land Forces Sub-Commission might assume the responsibility for control.

Brig. Carr agreed, that so far as this HQ was concerned the question of the production of arms and ammunition should be taken over by the Land Forces Sub-Commission, depending on the Italian Government centralising responsibility to the War Ministry and Land Forces Sub-Commission being suitably augmented.

Action to be taken with AFHQ and Italian Government.

Brig. Carr said that following on the last recommendation the question arose as to how control would be exercised on the Italian Government side and whether any action should now be taken on the AFHQ letter dated 8 November. This would be linked up with the question of the Ministry of War taking over production because the attention of the Italian Government could then be drawn to control of arms. The situation was difficult, especially at the present time.

Land Forces Sub-Commission suggested that the Chief Commissioner should ask the Italian Government about their present machinery for control on the Italian side, where responsibility rested and suggesting that it might be made the responsibility of the Ministry of War. It was unadvisable to do more than this at the moment.

Brig. Carr expressed agreement with this suggestion.

Col. Pidsley undertook to prepare a draft letter to the Italian Government.

As regards the strength and armament of the Police Forces other than SO.F.R., Col. Pidsley felt that AFHQ and GCS had not the same view of the picture as HQ and there was a danger of orders being issued based on incomplete information. It was therefore necessary to give them all the information we had available. Brig. Carr agreed and said he would prepare a letter to AFHQ in consultation with Col. Pidsley, based on a letter prepared by Land Forces Sub-Commission.

SECRET.

Commander Risk entered the meeting and Brig. Carr reviewed what had been discussed and the recommendations made. Commander Risk said that the Navy-Subcommission had refused permission for the Ministry of Marine to acquire additional weapons except in cases of emergency. A survey of naval munition factories had been carried out with a view to ascertaining those that could be converted to civilian use. No complete control was exercised, the only form of control being on a voluntary basis.

Brig. Carr said it should not be the whole case to Brig and if they were prepared to provide the necessary staff there was no reason why control could not be exercised.

Col. Piddley suggested that it was necessary to obtain from the Italian Government a full resume of the existing laws for manufacture of weapons, including sporting weapons.

Brig. Carr concluded the discussions by saying that the recommendations made would be submitted to the Executive Commissioner.

The meeting closed at 1515 hrs.

SUBJECT: Control of Production of Arms and
Munitions.

24th May, 1946

Reference to para 4 of the Minutes of the Executive Commissioner's
meeting 14th May:-

The Vice-President, Civil Affairs Section will hold a
meeting on May 27th, at 14.30 hrs in the Vice President's Office
to discuss the question of control of production of arms and
munitions.

Brigadier Carr, Vice President, Civil Affairs Section
will preside:

The following are requested to send a representative:

Naval Sub-Commission,
Land Forces Sub-Commission,
Air Forces Sub-Commission,
Economic Section,
Executive Commissioner,
Public Safety Sub-Commission.

Terms of reference for the meeting:-

1. With reference to AFHQ Secret letter 388.3/087 GB2-0
of 2nd August 1945* to consider in general the present
extent of production of arms and munitions so far as
is known at this Headquarters.
2. To consider what control, if any, is being exercised
in accordance with the directions contained in the
above mentioned letter.
3. To make recommendations as to:-
 - (a) What action should be taken within this Head-
quarters to implement the policy laid down.
 - (b) What action should be taken with AFHQ or the
Italian Government in this matter.

Latol Wilson

ALLIED FORCE HEADQUARTERS.
ADD 512.

8 November 45

SUBJECT: Violation of Armistice Terms.

TO: Chief Commissioner,
Headquarters, Allied Commission,
APO. 38.

1. The Supreme Allied Commander is disturbed by the info. portion contained in a signal sent to you by the GXC No. 2 District on 17 October which states that there is unauthorized manufacture of warlike stores taking place in his district.

2. Your attention is invited to paragraph 3 of letter from this Headquarters, subject policy on Italian maritime protection file AG 388.3/087 GSC-O dated 2nd August 1945, and to Article 13 of the Terms of Armistice.

3. The potential danger of the existence of warlike stores which may not be adequately protected from illegal seizure and the continuation of that danger by unsupervised manufacture is so apparent as to need no detailing.

4. There is no reason to believe that the present existence of warlike stores or their continued manufacture is a deliberate evasion of the Armistice terms. The failure is more likely to be one of omission rather than commission. It is desired, therefore, that you inform the Italian Government that it must take steps to insure that no warlike stores are to be manufactured without the express approval of the authorized agencies of the Supreme Allied Commander and that any existing stocks must be taken under adequate guard and declared to the proper agency.

By Command of Lieutenant General MERRILL:

G. W. OPPENHEIMER,
Colonel, AGO.
Adjutant General.

(b) AFHQ SECRET ltr. AG 328.3/087 GEO-3 of 2 August 1945.
(c) Navy Sub-Commission, AC, TOP SECRET ltr. HSC/3910 of 25 October 1945 to Executive Commissioner only.

1. It is noted that the two drafts forwarded by reference (a) merely established procedures to be followed in the event Italian plants are found to be engaged in the manufacture of munitions. Paragraph (4) of the draft outlining the procedure to be followed by Allied Force Headquarters specifically states it is not required that investigations be made de novo of plants manufacturing or capable of manufacturing warlike stores. It is not considered that the policy established by Allied Force Headquarters in reference (b) can be effectively implemented until such time as complete information is collected at Allied Commission Headquarters in central files concerning Italian plants which are capable of manufacturing munitions and a survey is made of Italian warlike stores.

2. It is recommended that the Industry Sub-Commission, AC, be made responsible for the compilation of the data required to implement paragraphs 4 (a), (b), (c) and (d) of reference (b) and that the War Materials Disposal Sub-Commission, AC, make the survey of Italian warlike stores required by paragraph 4 (e) of reference (b).

3. It is pointed out that a survey of Italian plants must be made in order to comply with reference (c).

SUBJECT: Manufacture of warlike stores

TO : All R.Os, L.Os

1. It is the policy of AFHQ that no armaments, munitions or implements of war will be produced in Italy except as directed by the US and British Armed Forces. This policy is applicable to plants for the production or repair of such warlike stores, whether state or privately owned. (Authority AG 388.5/087 GSG-O of 2 Aug 1945).

2. Recent reports indicate that a certain amount of uncontrolled military construction is being carried out in the North of Italy. AFHQ directs that AG take steps to implement the policy set forth above.

3. Any manufacture of warlike stores which are discovered or reported will be investigated with a view to ascertaining whether they are taking place at the direction of or by permission of the US and British Armed Forces or (in the case of production for the Italian Armed Forces) of the Land, Naval and Air Sub-Commission of the Allied Commission.

4. R.Os and L.Os will, wherever possible, obtain the cooperation of District commanders in such investigations.

5. If the manufacture concerned is taking place by permission of one of the authorities referred to in para 3 it will be permitted to continue and the circumstances will be reported to this HQ.

6. If the manufacture is not authorized in writing by one of the authorities mentioned in para 3, the work will be stopped at once and the

circumstances reported to this HQ. Such unauthorized manufacture taking place in territory not under USC control will be referred to this HQ for action.

7. To avoid unnecessary investigations, this HQ will advise RAs and LOs of interested regions of plants now authorized to engage in such manufacturing.

CONCLUSIONS

6A

2. The question of the extent to which such production is to be permitted in the future is under consideration in this HQ. Any manufacture of warlike stores which are discovered or reported to you will be investigated by you with a view to discovering whether they are taking place at the direction of or by permission of the U. S. and British Armed Forces or (in the case of production for the Italian Armed Forces) the Royal Land and Air Arm of the UNITED KINGDOM. If the manufacture concerned is taking place by permission of one of these authorities, it will be permitted to continue and the circumstances will be reported to this HQ together with a statement as to why the manufacture concerned is necessary. If the manufacture is not authorized in writing by one of the above mentioned authorities, you will instruct the Italian Govt. to cause the manufacture to cease immediately and will report the circumstances to this HQ.

AG. 388.3/087 GRI-0

2 August 1945

SUBJECT: Policy on Italian Munitions Production.

TO: Chief Commissioner.
Allied Commission.
APO. 394.

1. As directed by the Combined Chiefs of Staff in TAC 638 dated 21st July 1945, AFHQ letter file and subject as above dated 11 February 1945, is rescinded and the following substituted therefore as an interim policy pending the negotiation of a peace treaty when this policy will be reviewed.
2. Pending receipt of a policy directive from Combined Chiefs of Staff, the following interim policy will govern the disposition of Italian industries required for production or repair of arms, munitions or other implements of war. This policy is applicable to all such plants, tools, equipment, facilities and production in such plants, whether State owned or privately owned.
3. No armaments, munitions or implements of war will be produced except as directed by the US and British armed forces.
4. The allied Commission will:
 - (a) Encourage the maximum utilization of all arms and munition plants, tools and equipment essential to the Allied military effort.
 - (b) Encourage the manufacture of equipment and material directed by the Allies as being necessary for the maintenance of the interim Italian army.
 - (c) Impound all tools and equipment which can produce only prohibited warlike stores, pending decision of possible use in the Allied military effort.
 - (d) Insure operation of industries required for production or repair of arms, munitions or other implements of war only to the extent required by the Allied armed forces and Merchant Marine services. The output of Italian arms or munition plants will NOT be furnished to the Italian Navy without the prior consent of the Commander in Chief, MEDITERRANEAN.
 - (e) Make a survey of Italian warlike stores in arsenals, factories, depots, dumps and in the hands of the Italian armed forces.

SUBJECT : MANUFACTURE OF WAR-LIFE STORES IN ITALY
 From : THE CAPTAIN IN CHARGE, TARANTO
 Date : 14th January 1946 No. 2/63
 To : DEATH OFFICER, ALLIED COMMISSION, BARI

With reference to your letter No. 12/3 of 23rd December, 1945, the following firms have been analyzed for general and optical work in connection with gun-sighting:-

- (a) GALILEO - Via Mazzini 216, Taranto (described as "Officina Galileo, Firenze").
- (b) SAN GIUSEPPE - Spadina Road
- (c) MARCONI - Via Viale Virgilio, Taranto.

The firms carry out work mainly of a repair nature for British and Italian ships but it is not known whether they are capable of manufacturing new instruments.

2. The only other firm mentioned is a small one viz:
- OFFICINA MECCANICA PERI - Via Costantinopoli 43 Taranto.

34 January 1946

- 5 FEB 1946

SUBJECT: Italian Arms and Ammunition Industry and the Re-equipping
 of the Italian Armed Forces.

TO : Headquarters, Allied Commission,
 APO 542.

Reference is made to your letter 5012/143/SS of 2 November 1945.

1. In regard to para 4 (a) thereof, you should advise the Italian Government to press on with their study of the arms and ammunition industry with a view to turning over as much as possible of this industry to civil production.

2. The initiative in recommending any reactivation of the Italian arms and ammunition industry will be left to the Italian Government, who will be advised and controlled as necessary by the appropriate Service Sub-Commission of Allied Commission. They should be informed accordingly and notified that a directive will shortly be issued as to the extent to which the Italian Government will be required to provide arms for their forces.

From: O.C. 315 F.S. Section (Int. Corps)

Subject: ARMS FACTORIES: "VOLUGRATO"

The above mentioned firm, whose address is Corso Belgio, 107, Turin, was visited by this Section, and was found to have at the establishment 33,000 - 35,000 Magazines for the "Breda" Machine Gun.

The above stocks had been placed at the disposal of the R. Arsenale.

This information is reported to you for any action you may consider necessary.

Office of the Executive Commissioner

Ref: 5012/145/10

23 NOV 1945

22 November 1945

SUBJECT: Italian Armament Industry and the Re-equipment of Italian Armed Forces

TO : Assistant Chief of Staff, 1-5 AFHQ, APO 512

1. Reference is made to letter 1-5, 091, 740-2 Italy AFHQ, dated 3 November 1945 to Headquarters Allied Commission, above subject, and reference 736 AFHQ 28 October 1945, same subject.

2. Four problems are presented:

a. Present situation in arms manufacture.

b. Capacity of the Italian armament industry with respect to the part it can play in re-equipping the Italian Armed Forces.

c. Steps that the Italian Government should be advised to take to ensure that all arms manufactured are delivered to the armed forces.

d. What action should be taken to render investigative or to convert to other purposes armament factories not to be used for re-equipping the Italian Armed Forces.

3. With reference to present situation in arms manufacture:

a. Air Re-Order in Northern Italy have been directed that any manufacture of various stores that is discovered or reported to them will be investigated by AMC. Instructions were to the effect that if the manufacture concerned is taking place by violation of the (i.e. or British Armed Forces or (in the case of production for the Italian Armed Forces) by written permission of the Naval, Land or Air Sub-Committee of the Allied Commission, it will be permitted to continue and AMC will report all facts to the Allied Commission. If the manufacture is not authorized in writing by one of the above-mentioned authorities, AMC in its territory will cause the manufacture to cease immediately and report will be made of the circumstances. In Italian Government territory the facts and circumstances will be reported to Allied Commission. You will recognize that with the present almost total lack of arms in Italy it will not always be able to furnish the Allied Commission to comply with the instructions adequately or expeditiously.

b. The reports required by paragraph 1b of 20 October 1945 will be submitted to AMC.

c. Special investigations are now being made by District and AMC relative to cases mentioned in paragraph 4b of 30 October 1945. District dated 17 October 1945. Results of such investigations will be forwarded to 6-5 Section AMC.

TO : Assistant Chief of Staff, G-3 AFHQ, AFHQ 512

1. Reference is made to letter G-3, 001, 711-1, dated 3 November 1945 to Headquarters Allied Commission, above subject, and reference 736 AFHQ 23 October 1945, same subject.

2. Your problem is presented:

a. Present situation in arms manufacture.

b. Capacity of the Italian armament industry with respect to the part it can play in re-equipping the Italian Armed Forces.

c. Steps that the Italian Government should be advised to take to ensure that all arms manufactured are delivered to the armed forces.

d. What action should be taken to render unproductive or to convert to other purposes armament factories not to be used for re-equipping the Italian Armed Forces.

3. With reference to present situation in arms manufacture:

a. Arms factories in Northern Italy have been directed that any manufacture of warlike stores that is discovered or reported to them will be investigated by AFHQ. Instructions were to the effect that if the manufacture concerned is taking place by written permission of the U.S. or British Armed Forces or (in the case of production for the Italian Armed Forces) by written permission of the Royal, Land or Air Headquarters of the Allied Commission, it will be permitted to continue and AFHQ will accept all facts by the Allied Commission. If the manufacture is not authorized in writing by one of the above mentioned authorities, AFHQ in its territory will cause the manufacture to cease immediately and report will be made of the circumstances. In Italian Government territory the facts and circumstances will be reported to Allied Commission. You will recognize that with the present almost world-wide strike in AFHQ it will not always be able to report all violations to comply with the instructions adequately or expeditiously.

b. The reports required by AFHQ on 20 October 1945 will be submitted to AFHQ.

c. Special investigations are now being made by AFHQ and AFHQ relative to conditions mentioned in AFHQ 66/3736 from G-3 No. 2 District dated 17 October 1945. Results of such investigations will be forwarded to G-3 Section AFHQ.

d. Reports are made of G-3, and J. H. above should indicate whether or not a general investigation of arms manufacture in AFHQ territory should be initiated.

e. The control of industrial production, allocation of imported and indigenous raw materials, coal and petroleum products in Northern Italy is under the jurisdiction of the North Italy Industrial Council, headed by the Italian Government Minister of Industry and Commerce and subject to AFHQ approval. There has been no allocation for current production.

f. There has been no indication that there is any unauthorized manufacture of warlike stores in Italian Government territory. As a matter of security precautions, it would seem advisable to remind the Italian Government of the prohibition of manufacture of explosives, munitions or implements of war. The transfer of northern provinces to Italian Government jurisdiction would appear to be an opportune time for such reminder, and this will be done at that time.

4. Relative to the capacity of the Italian armament industry with respect to the part it can play in re-equipping the Italian Armed Forces, the following observations and recommendations are made:

a. Attached as Inclosure No. 1 is compilation of general information relative to Italian industry, period 1939 to 1942, taken from old records of the Italian Ministry of War Production.

b. A careful examination has been made of records of this Commission with respect to the Italian Armament Industry. The files indicate that during 1944 inspections and station reports were made by officers of the Industry Sub-Commission covering a vast array of firms and plants located in Southern and Central Italy previously engaged in the manufacture of armament. The industry suffered extensive damage from bombing and German sabotage; nevertheless, a number of these plants were found to be virtually intact and under the control of their owners, who in most cases are attempting to restore the plants to an operating condition. Some have been converted to civilian purposes. Requisitioning of general purpose machines-tools, motors, etc., and the occupation of the premises by Allied Forces have to a great extent diminished the possibilities of restarting a complete operation in most of the plants.

c. Southern and Central Italy has been under Italian Government jurisdiction for a considerable length of time and the control, conversion and rehabilitation of industry has been a responsibility of the Government. Definite information as to the extent to which the armament industry has been activated or is capable of rehabilitation is not in the hands of this Commission, nor does the staff exist to initiate an effect an investigation now.

d. Special surveys of industrial capacity, including the Italian Armament Industry, have not been made by the Commission in Northern Italy. It was found by general surveys, upon the liberation of the North, that the manufacturing industry in the North was virtually intact and that there was much more capacity available than it would be possible to provide coal and raw materials for. It is known that a large portion of the Italian Armament Industry was located in Northern Italy and that much of it is in operating condition.

e. The Minister of Industry and Commerce, Italian Government, at present, on his own motion, is having a study prepared which will show the present situation of the Italian Armament Industry with respect to the portion which should be reconverted to civilian use and the portion left for other purposes. This study should be complete by 1 December 1945. The Minister has agreed to make a copy available to Allied Commission which will be forwarded to AFHQ.

f. It is not considered that the study mentioned in e. above will provide all the information necessary to meet the requirements of AFHQ letter dated 28 October 1945. The Ministry of Industry and Commerce, Italian Government, working with the service ministries of the Government, agrees to be the best available authority to answer and submit the information requested by AFHQ.

relative to Italian industry, period 1939 to 1942, taken from old records of the Italian Ministry of War Production.

1. A careful examination has been made of records of this Commission with respect to the Italian armament industry. The files indicate that during 1942 inspections and status reports were made by officers of the Industry Sub-Commission covering a great many firms and plants located in Southern and Central Italy previously engaged in the manufacture of armament. The industry suffered extensive damage from bombing and German sabotage; nevertheless, a number of these plants were found to be virtually intact and under the control of their owners, who in most cases were attempting to restore the plants to an operating condition. Some have been converted to civilian purposes. Requisitioning of general purpose machine-tools, motors, etc. and the occupation of the premises by Allied Forces have to a great extent diminished the possibilities of restarting a complete operation in most of the plants.

2. Southern and Central Italy has been under Italian Government jurisdiction for a considerable length of time and the control, conversion and rehabilitation of industry has been a responsibility of the Government. Definitely information as to the extent to which the armament industry has been activated or is capable of rehabilitation is not in the hands of this Commission, nor does the staff exist to initiate or direct an investigation now.

3. Special surveys of industrial capacity, including the Italian armament industry, have not been made by the Commission in Northern Italy. It was found by general surveys, upon the liberation of the North, that the manufacturing industry in the North was virtually intact and that there was much more capacity available than it could be possible to provide coal and raw materials for. It is known that a large portion of the Italian armament industry was located in Northern Italy and that much of it is in operating condition.

4. The Ministry of Industry and Commerce, Italian Government, at present, on his own motion, is having a study prepared which will show the present situation of the Italian armament industry with respect to the portion which should be reconverted to civilian use and the portion left for other purposes. This study should be complete by 1 December 1945. The Minister has agreed to make a copy available to Allied Commission which will be forwarded to AFHQ.

5. It is not considered that the study mentioned in 4. above will provide all the information necessary to meet the requirements of AFHQ letter dated 28 October 1945. The Ministry of Industry and Commerce, Italian Government, working with the service ministries of the Government, appear to be the best available source to prepare and submit the information required with respect to the armament industry. Due to limited personnel available, the Allied Commission is not in position to make an independent survey on the ground to determine the facts.

6. The information required by para. 4 (a) of DGC, AFHQ letter, 28 October 1945, can best be obtained by Allied Commission from the Italian Government. This will be done. Will you outline in more precise detail exactly what is required. It is considered that the Government can make the information available in such form that the dependability and accuracy can be ascertained by Allied representatives from a few sample spot checks.

5. In connection with the question as to what steps the Italian Government should take to ensure that all arms manufactured and delivered to the Armed Forces, it is considered that the existing Italian laws relating to the manufacture of arms and munitions when enforced will provide proper safeguards. The fact that a considerable part of the raw materials required for arms and munitions manufacture must be imported into Italy, especially when the immediate post war period, will afford a useful and control. Fuel and raw materials will be allocated under government control for a considerable period of time. It is also felt that the urgent need of essential civilian production will give as difficult to obtain the required fuels and materials for manufacture of civilian stores. It is suggested that the present used for providing a system of control to ensure that all arms manufactured are delivered to the Armed Forces be called to the attention of the Government in the communication referred to in para. 5.2. hereof.

6. Action necessary to render investigation as to consent to other purposes of arms factories not to be used for manufacturing the Italian Armed Forces is dependent upon the facts as they are established as discussed in para. 4. hereof. As indicated in para. 4.2, the Italian Government is at present preparing a study relative to the reorganization of that section of the industry which in the Government's opinion should be turned to civilian use.

FOR THE CHIEF COMMISSIONER:

Trillick
Executive Commissioner

Encl. as per para. 4.2.

GENERAL INFORMATION RELATIVE TO ITALIAN AMMUNITION INDUSTRY
PERIOD 1939 to 1942

SOURCE: Records of Italian Ministry of War Production

1. Current Expansion of Italian Industry

	1940	1941	1 April 42
auxiliary plants existing	732	1094	1910
labor employment	806,239	1,018,254	1,800,030

New installations of 778 plants required the recruitment of labor by 374,311 men.

2. Increment of Production Capacity from 1939 to 1942

Item	Quantity	Incremented Capacity
Produced		
Pistols and Revolvers	241,455	85.7%
Rifle cal. 6.5 and 9	266,505	22.3%
Automatic arms cal. 6, 12, 20 mm	130,000	107.5%
Artillery light	3434	24.4%
Artillery medium	666	600%
Artillery heavy	32	206%
Tanks	5186	800%
amp. cal. 6.5 to 15	144,694,222	100%
Artillery charges	35,000,000	100%
Artillery projectiles	34,000,000	100%
Small constructions	8750 Tons	85.7%
Cast iron	354,654 Tons	62.9%
Steel	771,973 Tons	40%
Aluminum	149,139 Tons	61.3%
Lead	118,527 Tons	52.2%
Cadmium		
Antimony		
Metallic Magnesium	18000 Tons	65%
Tin		

3. General Index of Production

6. General Statistics

- The coordinating agency within the Italian Government during the war was the Ministry of War Production (Ministero Fabbricazione di Guerra).
- Clothing, shoes, tents, blankets, blankets and other items of personal equipment for the Italian Army, Navy and Air Forces were provided by private-owned industries. The only limiting factor as to the capacity of these industries to furnish the full requirements of the above items was the availability of raw materials.
- Armaments such as portable and heavy arms, ammunition, vehicles, planes, ships and tanks were produced partly by private owned plants, part by plants controlled by the state through IRI, and part in army and navy arsenals under the direct management of the respective ministers.
- Under Italian law all production of arms was made on a license basis. Each factory received an order for a definite number of specified items and the control of production was exercised and through the allocation of raw materials, and the presence of inspectors at the plant. All manufacture of arms outside the license was illegal.

HEADQUARTERS
FLEMONTE REGION
ALLIED MILITARY GOVERNMENT
APO 39A

OFFICE OF THE REGIONAL PUBLIC SAFETY OFFICER

REF : PR/PS/24/62
SUBJECT : Italian munitions production and warlike stores.
TO : A.C. Hors (Attn: Director Public Safety Sub-Commission)
DATE : 22nd November 1945

1. Reference signals 8435, 8436, and 8437 of 15th November, and reply signals P226 and P227 of 20th November 1945.

2. Forwarded herewith are documents resulting from a survey made in the Region in October to determine, as far as possible, what manufacture of arms, etc., if any, was being carried on.

3. The case of suspected clandestine arms manufacture referred to in Signal 8437 was investigated by 315 P.S. Section, with the result that the Fiat Mirafiori Factory, Turin, was raided by British troops under command 7 AGRA, with PSS and AMB assisting, on 6 November 1945, whilst the night shift was at work. The result of the raid was the discovery of 2 Italian rifles, 1 rifles in pieces, 370 rounds S&W, and 3 "red devil" grenades. No evidence of clandestine manufacture of weapons was found, but it will be readily understood that in an enormous factory like the Fiat works there are machines and tools of many descriptions and the manufacture of a Sten gun, for example, would apparently be a simple matter.

It is understood that during the period of German occupation Sten parts were made clandestinely in many factories, large and small, and assembled by the partisans.

4. The contents of Signal 8435 have been noted and will be acted upon; copies have been sent to Provincial Commissioners for the attention of Provincial Public Safety Officers.

5. Signal 2436 refers to matters which are outside the experience of most Public Safety Officers and to comply with the directive I suggest that Officers with considerable technical knowledge are required. It would appear, also, that for the directive to be successfully implemented a large staff of highly skilled inspectors constantly visiting factories and workshops will be needed. The Regional Industry Officer has received a copy of the signal and will no doubt be rendering a report in due course; I understand that he is making certain enquiries in the matter.

For the Regional Commissioner

/s/
W. ROWE
Major,
Regional Public Safety
Officer

1. Reference signals 2435, 2436, and 2437 of 15th November, and reply signals P226 and P227 of 20th November 1945.
2. Forwarded herewith are documents resulting from a survey made in the Region in October to determine, as far as possible, what manufacture of arms, etc., if any, was being carried on.
3. The case of suspected clandestine arms manufacture referred to in Signal 2437 was investigated by 315 F.S. Section, with the result that the Fiat Mirafiori Factory, Turin, was raided by British troops under command 7 AFHQ, with ESS and AMG assisting, on 6 November 1945, whilst the night shift was at work. The result of the raid was the discovery of 2 Italian rifles, 1 rifles in pieces, 370 rounds SA8, and 3 "red devil" grenades. No evidence of clandestine manufacture of weapons was found, but it will be readily understood that in an enormous factory like the Fiat works there are machines and tools of many descriptions and the manufacture of a Sten gun, for example, would apparently be a simple matter. It is understood that during the period of German occupation Sten parts were made clandestinely in many factories, large and small, and assembled by the partisans.
4. The contents of Signal 2435 have been noted and will be acted upon; copies have been sent to Provincial Commissioners for the attention of Provincial Public Safety Officers.
5. Signal 2436 refers to matters which are outside the experience of most Public Safety Officers and to comply with the directive I suggest that Officers with considerable technical knowledge are required. It would appear, also, that for the directive to be successfully implemented a large staff of highly skilled inspectors constantly visiting factories and workshops will be needed. The Regional Industry Officer has received a copy of the signal and will no doubt be rendering a report in due course; I understand that he is making certain enquiries in the matter.

THE QUESTORE OF CUNEO

TO : Major Gardner
A.M.G. CUNEO

Subject: Arms manufacturing

The inquiries made by the chief factories and engineering works of the Province had a negative result and the inquiries made amongst metallurgic workers of the two main centers, viz. Savigliano and Mondovi. Were also negative up to day it doesn't therefore result that arms of any kind, are manufactured or repaired in the Province.

As from verbal agreement, within next Saturday, I will refer on the less important engineering works.

The Questore

PROMEMORIA

In Montechiaro esistono due stabilimenti impiantati, per sfollamento da Torino, uno di proprietà del Sig. Giovanni Farina e l'altro del fratello PININ. Quest'ultimo nel periodo della lotta di liberazione ha fabbricato armi (stenk) per le formazioni partigiane e sarebbe in grado anche attualmente di fabbricare armi sempre che gli siano concessi una quindicina di giorni per procedere all'attrezzatura necessaria, gli siano dati i permessi del caso e gli siano fatte le assegnazioni di materiale.

Il detto stabilimento offre garanzia di serietà e capacità.

TRANSLATIONMemorandum

In Montechiaro there are two establishments, transferred from Turin, one of property of Farina Giovanni and the second of property of Brother Pinin. This last, during the fights for the Liberation manufactured arms (sten) for the partisans and they are still in the condition to manufacture arms, in a fortnight time, if the necessary materials are allotted and the permits are given.

O.C. 37 P.S. Section
C.M.F.

Sir,

Factories Previously Employed on Munitions

In accordance with instructions, inquiries were made of the present activities of the following establishments, which were previously engaged in the manufacture of munitions and their accessories.

On the six factories only one, (Fratelli MAINA of 36/38 Corso Alessandria, Asti) actually produced munitions i.e. medium calibre shells and breeches for gun. P.S. was satisfied with the truth of the statement of the managing director, that production of such materials ceased three years ago, and that the stocks and raw material in hand were taken away by the Germans.

The other five establishments are:

- 1) BERTORELLO Sebastiano of Corso Torino 26 Asti. This firm made ammo. boxes; they now make articles to supply civilian requirements e.g. wooden house-fittings, boxes etc.
- 2) SABBIONE Giovanni Corso Littorio 66. He previously made ammo. boxes, but is now engaged on ordinary carpentry. 3745
- 3) Figli di VISCONTI of Corso Alessandria are in the same category as Bertorello and Sabbione.
- 4) FERRIERE ERCOLE of Via Lamarmora 12 was engaged in making wire for ammunitions. The wire was made for civilian requirements.
- 5) WAX ASSAULT Ltd. of Corso Felice Cavallotti Asti made iron and steel plates and firders for munitions. They now make the same things for civilian purposes.

TO : Major H. MICHALL R.P.S.O. via P.C. Alessandria.

All factories in this province shown in attached list 2 A have been searched and checked. The results are as shown in F.S.S. report 1 A, and declarations 3 to 3H.

About all I can add to the F.S.S. report is that the factories with residual stocks have already been informed by the Italian War Ministry that these stocks are blocked, and must not be disposed of.

I can find no trace of any firm having reported the existence of materials to any A.M.G. Officer in this Province.

SECRET

To: O.C. P.S. Section
 From: Sgt. BYRNE J.C.
 Subject: ARMS FACTORIES

In execution of your instructions I organised a tour of inspection of Factories in the Province of ALESSANDRIA which were formerly engaged in the production of armaments for the Italian and/or German Government as per 7 AGRA List. I was accompanied by an Accountant and four CO.RR. provided by AMG. The inspections were carried out between 3rd and 6th Oct 45. The following points emerge from the investigations made.

1. In each case a thorough physical search of the Factory was made in company with CO.RR. and residual stocks of unassigned armaments noted these being later checked against the Companies' books when they were inspected by me in company with the Accountant --- RAVASOTTI, ALDO of the BANCA D'ITALIA, ALESSANDRIA;

2. Attached herewith is a statement from each firm containing the history and ultimate disposal of each Arms contract as gleaned from the company's books with a certificate of veracity from the Director of the Firm further verified by a signed certificate from the Accountant RAVASOTTI. In the case of FIMI MORANDI of BORGO SAN MARTINO however the firm has changed hands since the arms contracts have been completed and the accounts relating to these contracts were not available. A certificate was obtained, nevertheless, from the accountant who was employed by the Firm at the time the contracts were carried out to the effect that all material ordered had been consigned.

3. In all cases where unassigned armaments, whether in the form of finished articles or rough castings, were held by Firms particulars of this material had already been notified either to AMG, ITALIAN WAR MINISTRY, or the "ISTITUTO per la RICOSTRUZIONE INDUSTRIALE (UFFICIO RICOUPERO MATERIALI e IMPIANTI DEBESCHI) Via Dogana 1 MILANO

4. It was evident from perusal of most of Firms' books that up to September 1943 arms production proceeded at normal rate but after that date there was a considerable falling off of production especially during the last few months of the war.

5. Attached are particulars also regarding the Firm of "OLVA" which though not included in the 7 AGRA List was found to have manufactured machine-gun parts.

./.

- 2 -

6. In the case of S.A. ILVA of NOVI LIGURE no certificate could be obtained as all accounts relative to arms contracts carried are at the Head Office of the Firm at GENOA.
