Office of Regional Commissioner.

Reference : LR/AGE/S.1 20 November 1945.
Subject : Continuation of Forestry School,
Piazza Torre - Bergamo.
To : Executive Commissioner,
HQ. - Allied Commission.

1. Reference enclosures A and B which outline the circumstance and procedure whereby a School for training Forest Guards was opened at Piazza Torre, Bergamo Province, 1 Aug 1945. This course was set up for a period of four months and is about to be concluded after graduating a class of 340 men. I consider the operation of this project most satisfactory and am anxious that another course be started at once. May I therefore please request that this recommendation be presented to the competent Italian Governmental Authorities.
2. My Regional Agriculture Officer informs me that the work of the School has been noteworthy, and that a group of very fine men have been trained and are ready to be used in filling up the ranks of the Forestry Corps, so seriously depleted by apurition. He urges that the School be continued.
3. My Regional Public Safety Officer is also anxious that the School be not allowed to close, since he regards the efficient functioning of the Forest Guards as an essential contribution to the Public Safety situation. He, like all of us, is very aware of the gravity of the fuel situation in this area and that a lack of an adequate fuel supply may be a vital factor in Public Safety during the coming winter.
4. I am informed that the faculty of the School - ten in number - is of a very high calibre. The ²⁰¹⁵ submitted a course of study which has been approved by the the Commander of the Regional Forestry Corps.
5. It is proposed to enroll a maximum of 250 men,

- 2 -

such enrollments to be secured through the Commanders of the various Regional Forestry Corps. Of this number, one half to come from A.M.G. territory, the others from regions to the South and under the control of the Italian Government. The same facilities used by the present School will be available for this proposed new course of study. Uniforms and clothing will need to be provided for the new students. Applications for these will go forward through the regular Forestry Guard channels to the Ministry of Industry and Commerce. The application will have the strong support of the Public Safety Division.

6. Ratings and manner of performance of the present graduates are being forwarded to the Ministry of Agriculture and Forestry - Rome - who will assign the men to the territories most in need of Forest Guards. This same procedure will of course be followed if the concurrence of the Italian Government can be secured for continuing the School.

7. I am advised that the Ministry of Agriculture and Forestry wishes to transfer the School to Citta Ducale near Aquila, the former site of the Forestry School. The Faculty at Piazza Torre states that, if this is done, the work of training men for the Forestry Corps will be stopped. They state that the facilities in Citta Ducale are in disrepair and that valuable time will be lost while the move is being carried out. They point out that the facilities of Piazza Torre are available and ample for continuing the School, at least until the location at Citta Ducale is in shape.

8. The Regional Finance Officer has advised me that the budget for the School has been approved through the normal channels whereby budgets for A.M.G. projects are submitted. He has assured me that this procedure can be continued.

9. Mr. Dickemann, in charge of Forestry Agriculture Sub-Commission, has been in touch with the situation and has presented the need for continuing the School in its present location both to us and to the Italian Ministry of Agriculture and Forestry. 2014

10. In view of all these facts we trust that you will present these views to the competent Italian Govern-

- 3 -

mental Authorities and secure their concurrence. I am anxious to have the School continue, but of course realize that, in view of the fact that A.M.G. administration in Northern Italy may terminate on short notice, certain modifications of its operation may be necessary, such as for example, the procedure for enrolling new students, which has in fact been notified.

1. Reference our conversation relative to the continuation of the Forestry School at Piazza Torre. With this letter we are enclosing copies of letters setting forth the conditions under which the school was established and also describing the equipment available at Piazza Torre, where the school has been in operation since 1 August 1945.
2. We are very desirous that the school be continued for at least another term. Mr. Dickermann Chief of Forestry Section - Agriculture Sub-Commission also wishes the school to be continued at its present locality under AMG supervision. Sufficient students for the next course can be enrolled from North Italy territory under AMG plus Emilia and Toscana Regions. The school at its present location has ample equipment and is located in an area where sufficient forest lands are available for field trips and lessons in forest management. The Italian Government at Rome wishes to transfer the school to a locality near Aquila. *W. O. D. J. 12*
3. We are advised that at Aquila the buildings are not in order, that there are little facilities for field trips etc. The Director of Studies at Piazza Torre states that at least two years will be required to put the establishment at Aquila in order. He predicts that, if the school is transferred to Aquila, the work of training men to qualify as members of the Forestry Guard will be stopped for at least that period of time.
4. Capt. Cutbertson, the Chief of the Finance Division AMG, states that up to now the budget for the school has been approved through the normal channels whereby projects approved by AMG are financed. He sees no reason why this procedure could not be continued.
5. Lt. Col. D. Morley Fletcher, Provincial Commissioner Bergamo Prov., is very enthusiastic about the work of the school. All other equipment for the course is available, and its use could be continued.

7. On 13/11/1945 we visited the school at Piazza Torre. We inspected the students and the school facilities. They receive a maximum of one hour military drill per day, mainly for physical training purposes. Two days a week are spent in field trips on forestry management. We found a healthy fine looking body of men, an interested enthusiastic faculty of ten members who were obviously working together. The quarters of the men were clean. They have had very little sickness, have a well equipped infirmary and the whole atmosphere was one of cooperation and team work. We marvelled at the amount that has been accomplished with so little.
8. When the men complete their work in the near future, their records are graded and forwarded to Rome where the Ministry of Agriculture and Forestry will assign them to service in various Provincial Forestry Corps. At least one third of the present student body, are residents of Lombardia Region.
9. We recommend that a letter go forward to the High Commissioner Allied Commission stating that we wish to continue the school for at least another term of four months and that the concurrence of the Ministry of Agriculture and Forests be secured. It would be tragic to close the school at present, when all parties have worked together to establish a going concern: especially when there is such a need for training men of the right kind for filling up the ranks of the Italian Forestry Service.

- 4°)- il III° Gruppo Autonomo con sede a Roma assunse la denominazione di XIV° Legione annettendovi i Gruppi di Rieti Terni che fino allora facevano parte della VII° Legione (Abruzzi e Marche)
- 5°)- L'VIII° Legione fu smembrata in due e, mentre la Campania continuò a dipendere dal suddetto comando, la Lucania e le Puglie passarono alle dipendenze della XV° Legione con sede in Bari. L'VIII° Legione d'altro canto annesse il Gruppo di Campobasso alla propria giurisdizione.
