PSYCHIATRIC REPORT.

TSPC/2671/45.

1917 Civ Int. CHART.

W. Interro Camp. Age 32.

Admitted 26 Apr 45 to 7 BPC.

History as recorded on AF B256A - "started 5 days ago with signs of mental disturbance in the 'block' - stated that he had lost his memory for recent events and appeared very excited. I thought that he was just showing hysterical manifestations and isolated him for the night. The next day he was seen by Lt Col XXXX Pearce, Adviser in Psychiatry, who confirmed the diagnosis. Patient was released from isolation and put back in the block but immediately started to create a disturbance in the block by throwing himself on the floor. I therefore recommended isolation of case.

7 BPC - 26 Apr 45. Admitted here in "handcuffs" - very restless and over-active and requiring restraint.

On exam. General condition very poor. Much emaciated but it is impossible to say whether this is a recent or chronic wasting. Multiple small bruises on body and limbs, consistent with having knuckled himself about during his restless phases.

Mentally. Quite unco-operative. With aid of an experienced interpreter, he could not be induced to speak. His attention could never be held for more than 3 or 4 secs. Restless, throwing his arms and legs about, grinds his teeth and throws himself into epileptiform outbursts of shouting. Mentally very suggestive of gross hysteria can be persuaded to take fluids.

26 Apr 45. Placed on "Dangerously Ill" list.

27 Apr 45. R. normal; P. 74; Respns. 20.

Rather quieter this morning but when approached, he started to throw himself about. Physical exam. General condition poor with dehydration and wasting but no gross organic disease that I can find. Urine clear. To be seen by Med. Spec. 100 (Br) G.H. Took some lunch today and eating fairly well.

28 Apr 45. Still apyrexial - no elevation of pulse rate or increased respirations. Eating well - took a very good breakfast - taking adequate fluids. Mentally ~~changed~~ restless and over-active, unco-operative except at meal times. Seen later in the morning by an interpreter and he was fully co-operative and rational. He talked freely about his troubles - he is worried about his wife and her state of health. When he talked about home or touched any 'nostalgic' subject, he had an outburst of hysterical weeping. Conduct is typical of 'grande hysterie'.

28 Apr 45. Med Spec's Report.

Unco-operative - under effects of sedative. Will available in the way of history from the patient.

Unit affecting arrest.	<u>ASV 500</u>	Arrested at.	<u>PARAGUAY</u>		
Reason for Arrest.					

From January to May 1944, subject was an active informant of the German in Florence. In May 1944, she was interviewed by Dr. Harn and admits having accepted his invitation to act as a stop-behind agent in 1943. The Allied occupation of Rome prevented her from carrying out her mission. Considered a menace to security.

Recommendation for length of internment.

Exemption, release subject to review.

Signal.

The Board are of the opinion that subject should be released for the following reasons:-

- There is no evidence to support the serious allegations that subject was an active informant of the Germans in Florence. The Board is of the opinion that if the story of her having accepted an invitation to Russia in 1943 as a stop-behind agent is correct, then she should have been prosecuted.
- It is unlikely that the Germans would select a girl as a stop-behind agent in Rome who had no knowledge of the city whatsoever, especially when it is known that they already had many agents in Rome with residential qualifications, and adequate local knowledge.
- This girl has been employed as a nurse in the Gap Hospital where her behaviour has been exemplary, and the Board does not consider that she is likely to constitute any danger to Allied security.

Any authority for her release please be given.
