1. Analysis of reports received from various intelligence agencies indicates a lack of evaluation of information by the reporting agency.

b. It is desired that upon the receipt of information the recipient shall make such checks of the source and the information as are consistent with prompt despatch of the report.

2. Intelligence Reports are being received containing information from various independent agencies not directly under military jurisdiction. In particular references have been made to notices in the Italian press of a revival of neo-fascist activity and the organisation of various right wing para-military groups, and in some cases detailed information of the names of leaders, organisation, clandestine process etc. It is clearly undesirable that such information should reach this Headquarters without collation and evaluation by formations and Districts concerned.

3. It is essential that reports such as subversive activities, riots, strikes, demonstrations, incidents, explosions of munition dumps, sabotages, attacks against Allied personnel, thefts of large amounts of arms or ammunition and anti-allied propaganda be reported directly.

SUBJECT:- X MAS Gruppo GAMMA - LIVORNO
S/Ten. Vascello Arrigo ANGELILLI, di Amadeo.
C/o, Dott. QUARTI, Via S.Lucia 16, Bergamo.

TO:- N°3 S.C.I. Unit.

1. Subject, who was a regular officer in the Italian Navy up to 8 September 1943 (Identity Card 4221 - Ministero Marina Roma), visited this R.S.O. following a conversation with the Provincial Safety Officer, Bergamo (Capt. WHYMAN) in company with Dr. Bruno QUARTI, a former Vice-Questore of Bergamo, both residing at the a/m address.

2. Subject is in possession of a special temporary permit issued by FSS Bergamo and which states that he is engaged in special police duties with V Army FSS, he is authorized to carry arms when on duty, to carry out arrests under instructions, to travel in motor vehicles in the Region of Lombardy, to be out of doors after curfew. This certificate is dated 22 June 1945, in Brescia.

3. Subject admits that he was a member of the X MAS Gruppo GAMMA, Livorno. He states, however, that he was an instructor with the X MAS only up to 8 September 1943, when he escaped. He asserts that on 28 January 1944 he was arrested by the German Police and O.P.I. of Bergamo, and imprisoned up to and including 16 April 1945 on the charges of being an active anti-fascist and anti-nazist.

4. The purpose of his visit was to report that the Gruppo GAMMA was issued with a special type of Respirator or Diving apparatus, similar to the DAVIS, which enabled the wearer to remain under water and at a depth of from 20 to 30 meters for a two-hour period. He added that this type of Oxygen-Respirator was composed of three parts :

- a) the mouth-piece and tubing;
- b) the bellows and apparatus epurating device;
- c) the oxygen bottle.

He pointed out that the chief advantages of this Respirator were the fact that he showed no discharge on the surface and that it could be used in the open air on the principle of the gas-mask.

This Respirator was first issued in 1943 and Subject claims that it was a similar, if not actually the same type, which was used during a mission carried out against the port of Algiers in September-October 1942. He adds that the Submarine which he claims actually entered the port was commanded by Commander ARILLO who subsequently received the "Medaglia d'Oro". Subject states that all ten or twelve men taking part in operation were made prisoners. These men belonged to the Gruppo GAMMA and the Submarine was based at LA SPEZIA.

5. Subject states that one of the constructors of this apparatus was a certain Maj. BELLONI who was responsible for the technical side. A certain Capt. WOLK, Commanding Officer of the GAMMA Group in Livorno, and who afterwards joined the Fascist Republic, was transferred to a place (not better identified) near Brescia, where he assumed command of the same group. Approximately 20 of these Respirators, part of which are said to have been manufactured by the PIRELLI firm on orders from the Italian Navy, were also transferred to Brescia. Subject adds that he understands that several more were stored in a laboratory or work-shop, in the Muggiano quarter of LA SPEZIA.

6. Subject concluded by saying that Admiral VAROLI FIAZZA was present during at least one of the tests

carried out with this type of apparatus which, he claims, would revolutionize under water work (salvage, repairs to under structures, etc.). This information is communicated in case either the apparatus itself or plans have not been made available to the Admiralty.

7. Subject requests that this information should be treated in strictest confidence.

8. It would be appreciated if this R.S.O. could be informed whether there is any security interest in Subject or any advantage in pursuing enquiries with regard to the apparatus.

INTELLIGENCE REPORT B-62

Relations between the JAPANESE representatives in ROME
for the NAVY and the ARMY, throughout the period of
GERMAN occupation.

Source:- A confidential source of the Stato Maggiore
Generale (SM).

1. Office Layout.

In ROME, the offices were arranged as follows:-
the military and airforce attachés, headed by General
SHIMIZU, in Via ASMARA,
the Naval and Fleet air arm attachés headed by Commander
MITSUDOU in Via CLITUNO.

Admiral ABE had his Headquarters in the offices of the Naval Attaché.
His duties were not at all defined.

2. Relations.

Apparently there existed the maximum of cordiality, both
offices were trying to have an upper hand in the control of the
Embassy as far as propaganda organisation was concerned.

Particularly clever was General SHIMIZU to whose activities
was due the higher prestige which the Army enjoyed.

3. Propaganda.

General SHIMIZU's main link with the ITALIAN press was
professor Gino TERRA, who has now followed the General up North.
TERRA signed many of General SHIMIZU's or even General SHIMIZU's
officers' articles. TERRA also gave an ITALIAN colouring to the
written articles and conferences of General SHIMIZU.

On the other hand the Naval attaché had no such clever
support; hence the reason for the poor quality of his propagandist
efforts.

It was not simply a case of emulation; but the diversity
of political views was also apparent. Even in their relations with
the ITALIAN authorities the militarist group had closer contact with
the Fascist Party than the Navy.

Admiral ABE had his Headquarters in the offices of the Naval Attaché.

4. Recognition of the Fascist Republican Government.

It is possible that the recognition by JAPAN of the
Fascist Republican Government is due more to General SHIMIZU's
support than the Ambassador's.

Intimately connected with General SHIMIZU is Colonel
(now General) Guglielmo SCALISSE, at present in the North of ITALY.

In addition, activities of the Division and control, through the economic functions of the Division, a number of "second-line" sources on the industrial situation, both formal, such as those anti-secessionists called "INDUSTRIAL and FINANCIAL LINE," and "MILITARY LINE," made available to the secretaries, and to those who were not members of the cell groups; and to some of those who were not members of the cell groups.

On 25th July 1943 the School of Plastic Training (Institute) founded by President, Mr. J. F. McDonald, and the chairman of the board was constituted. It appears certain that the members of the school consist of the secretaries, the object of serving in touch with members of the secretariat, directed to the organization of patriotic industrial districts. c. An exception will be made in the case of Soldbucher of Protected Personnel. See Paragraph 9 below.

6. Signal Documents.

All captured codes, cyphers, signal plans and signal documents, and any equipment which appears to be a mechanical cyphering, or coding device or part of such a device, will be passed with all possible speed to the nearest Signal Intelligence Unit. Every effort will be made to prevent tampering with signal equipment, as it is essential to avoid interference with the original settings on the instruments.

7. Enemy Mail.

The exploitation and disposal of captured Enemy Mail will be dealt with in conjunction with the Censorship authorities.

8. Documents of the G.A.F. Ground Forces.

Documents relating to G.A.F. Ground Forces, e.g. G.A.F. Field Documents, will be handled in accordance with the instructions contained in the accompanying circular.

5. Soldbucher - Paybooks.

Soldbucher are important military documents. Proper security precautions will be taken that information of impending collection of soldbucher does not reach the prisoners of war, thus permitting them to destroy either parts or the whole of the soldbucher. The following procedure will be employed with respect to their collection:

- a. Soldbucher will not be taken from prisoners of war until all interrogations (including CSDIC) and essential personnel processing requirements have been met.

b. Subject to the above, the soldbucher will be collected from the prisoners of war and will be forwarded by the fastest means to the A. C. of S., G-2, Document Section, AFHQ, for processing by intelligence channels. (See Changes Number 1, dated 2 May 1944, of Administrative Instructions for United States Prisoner of War Enclosures in NAMOUS, Chapter V - Personal Effects; and British Instructions in Letter G1/B/2143/A2, dated 5 March 1944.)

c. An exception will be made in the case of Soldbucher of Protected Personnel. See paragraph 9 below.

6. Signal Documents.

All captured codes, cyphers, signal plans and signal documents, and any equipment which appears to be a mechanical ciphering, or coding device or part of such a device, will be passed with all possible speed to the nearest Signal Intelligence Unit. Every effort will be made to prevent tampering with signal equipment, as it is essential to avoid interference with the original settings on the instruments.

7. Enemy Mail.

The exploitation and disposal of Captured Enemy Mail will be dealt with in conjunction with the Consorship authorities.

8. Documents of the G.A.F. Ground Forces.

Documents relating to G.A.F. Ground Forces, e.g. G.A.F. Field Divisions and Flak Units, will be dealt with by Ground Force and not Air Intelligence staffs.

9. Identity Documents of Protected Personnel.

No identity documents belonging to Protected Personnel, i.e. doctors, chaplains, medical orderlies, stretcher bearers, etc. will be taken from them. As it is intended to use this personnel for medical duties in connection with prisoners of war, it is most important that full means of identification be readily available to Commandants of Prisoner of War Camps.

SUBJECT: Collection and dissemination of intelligence obtained in Italy.

TO : U. Allied Control Commission, Principal (2 copies)
U. M.A.C. Army Group
U. AGO (AM) CO, Inferno (2 copies)

Reference is made to the attached copies of AFN Intelligence Instruction No. 33, of 13 November 1943. Two copies both of the instructions and of the covering letter are forwarded each to U. Allied Control Commission, and to U. AGO (AM), with the request that one copy of each document shall be passed to the Displaced Persons Sub-Commission, or to the local representative thereof.

1. Every assistance and aid available in function should be given to G-2 (Advanced Intelligence) AM. Similarly, in order to ensure maximum efficiency and to obviate the supply of redundant information, U. Allied Control Commission and U. M.A.C. Army Group are requested to contact the same section, and to indicate what types of information they most require. U. Allied Control Commission will also represent the requirements of U. AGO (AM) in this matter, and thus save the section receiving initial and un-coordinated policy requirements for information from all three Headquarters.

2. The stage at which the Displaced Persons Sub-Commission will become responsible for personnel, excepting Allied crew, is defined in paragraph 5 g to c of the attached instruction. Whilst at first it may be necessary for the Displaced Persons Sub-Commission to assume responsibility for individuals of Italian nationality after such personnel have passed through A.I.P., for screening, vice paragraph 5 g, responsibility should be passed to the Italian Government so soon as the organisation which the Italian authorities have appointed for that purpose is capable of functioning. In this connection reference is made to a message number 340 of 9 November from U. Allied Military Mission.
