For the Regional Commissioner.

/s/ Wm. H. Savin
/t/ W H SAVIN Capt,
Regional Public Welfare Officer.

ELEMENTARY SCHOOL ENROLMENT

The data presented is as of the 15th of April, 1944, and is based upon the estimate of school directors in the various provinces. As this was a period of unstable weather it is quite possible that an earlier sampling would have shown more absences due to the cold weather. Warmer weather might cause a slight reduction in absences.

Approximately 85,600 children, or 20% of those inscribed in the elementary schools are not attending school at the present time. It is estimated that slightly more than one half of these, or 12%, are not attending school because of poverty, i.e., lack of clothing such as shoes, etc.

There appears to be no great variation as to provinces as the per cent of absences estimated due to poverty ranges from 13% in Palermo and Messina provinces to 9% in Trapani and Enna.
