A small collection of medieval M.S.S. and other documents, all of which was evacuated to Venice in 22 boxes,of which 2 have been returned at the special request of a local student. The librarian Dott.Aldo Tassini (see A.Comunale) does not appear to be a person of much scholarship or learning. He recently superseded Dott.Guarantotti Gambini (epurised) Reliable local information suggests that circumstances of this substitution ought to be inquired into with some thoroughness. 4-7 12 45	A. Storico Morelliano. In Museo Civico. The theft of a portion of this precious archive by the Germans and the steps taken by the undersigned for its recovery in May 1945 have been the subjects of previous reports. The object of this visit was to ascertain the extent of the losses and to make plans if necessary for further searches to be made for the missing material. The undersigned was accompanied by Professor Ranieri Cossar, a local historian now living in Trieste who has spent 6 years of research on the archives in question.	THB	1283	20905/C/14

The archive consists of M.S.S.and transcripts collected by Morelli, an 18th century scholar of Gorizia, bound in uniform volumes and numbered 1-365 (2).Numbers 1-154 were not removed by the Germans.Those that were removed, and which have since been recovered, were unfortunately still in a state of confusion on the day of the visit (dec 7), stacked on the floor in the disorder in which they had been dumped. The small amount of work necessary to rearrange the whole series and to check up on what is missing had not been attempted. Neither the Director of

Allowing for some duplicated numbers it seems that the collection once consisted of 372 volume. At present there are 359 either on the shelves or stacked on the floor, so that at most 13 are missing. It is impossible however to say how many exactly remain to be looked for in the neighbourhood of Tarvisio as there are apparently several gaps	THB 20905/C/14 1287

Undersigned called on the Sindaco, Avv.Giovanni Stecchina, and explained to him the urgency of making a through check without further delay. It was agreed that the officials concerned should be told to do this, and that one of them should be detailed to organise a search in the area of Tarvisio for any volumes that	THB	20905/E/14 1286

As to report received from the superintendency of Trieste and forwarded by Major H.E.Bell, to the effect that further volumes were be found at Cave del Predil, this emanated from the librarian of Udine, Professor Corgnali. The latter was interviewed by the undersigned on 4 December and stated that he had heard that this "might" be so from an inhabitant of Pontebba.
