COAL MINING

a. Production

(1) Production for the week ending 9.3.1946 totaled 18.030 tons of washed coal.

(2) Production for the week averaged 3005 tons per day which represents an average of 0.918 tons per man underground per day. North Group average was 0.443 tons, South Group 0.551, Sirai Group 0.530.

(3) Total average number of men actively engaged underground was 3797.

b. Timber :

Consumption of pit props as of 9.3.1946 was :

	North Group	South Group	Sirai Group	Total
ln	7423	2691	2387	11901
tons	3762	8668	5600	18030
aver.	1.973	0.241	0.427	0,660

8133

c. Coal shipments :

(1) Colliers loaded as of 9. 3. 1946

s/s "Edera"	7850 tons	- Genoa/Savona	Sig.No.560/6. 3. 46
" "Zarembo"	5950 "	Savona	" " 553/ 9.3. 46
" "Tarvan Schiaffino"	7350 "	Genoa	" " 555/9. 3. 46

The latter two colliers were not mentioned in today's signalled report No. 560 because they were not shown on Carbosarda's report.

./..

0457

Declassified E.O. 12065 Section 3-402/NNDG NO. 795021

(2) Colliers under loading as of 12. 3. 1946

s/s	"Fortunata"	5000 tons -	La Spezia
"	"Capo Mele" (FIAT)	5000 "	Savona
"	"Gaeta"	8000 "	Civitavecchia

(3) Colliers on schedule as of 12. 3. 1946

s/s	"Albissola"	4500 tons -	Genoa/Savona
"	"Caterina Gerolimich"	7500 "	"
"	"Pertusola"	2000 "	Porto Empedocle
"	"Pallade"	1650 "	Messina
"	"Edera"	8000 "	Genoa/Savona

Signals : Your enclosed signal, which appears to have been dispatched from Rome on the 6th, reached here the 7th inst. Contents noted. A claim has been placed with the local telegraph office requesting that signals be written more clarly. Since receiving your above information signals seems to come through more rapidly

Office : The writer wishes to thank you for kind support given in re-obtaining a suitable office here. As signalled (Sig. No. 004), when back from Rome the writer found that his office had been moved to an [illegible]tely unsuitable small room with no telephone and light. Nobody seemed to be responsible for this and as on request no steps were taken, he was compelled to signal his position to you so that he should be again placed in condition to carry on his duties promptly and efficiently. Signals 549 and 552, respectively dated 8th and 9th inst., will have informed you that the matter has been settled.

s/s "CAPO MELE", for FIAT Works. Enclosed wire was sent to this office by "Ufficio Centrale Carboni", signed Notarboletti.

On receipt the writer, who generally checks all cargo loadings, and indicates quantities of the various sizes to be loaded according to tonnages in stock, arranged with Carbosarda's Port Official at S. Antioco to load the s/s "Capo Mele" as follows :

No. 1 hold - 1110 tons	}	500 tons	No.	1
		610 "	"	2
" 2 " 1575 "			"	3
" 3 " 1425 "			"	4
" 4 " 860 "			"	3 - Total 4970 tons

In reply to the above message the enclosed was dispatched in order to show that the utmost was being done at this end to meet their requirements.

After a few hours the writer was informed that Carbosarda had cancelled such arrangement and had ordered that s/s "Capo Mele" be all loaded with No.3 size of Sulcis coal, which is being done.

The above for your information.

REF : L30/503 28 February 1946

SUBJECT: Shortage of Coal

TO : The Minister of Labour and Social Security
Italian Government
Rome.

1. With reference to your letter of 15th February (Prot. No. 3440/88-C) and our reply of 15th February, it is suggested that you might care to arrange, with the Ministry of Industry and Commerce, for a representative of your Ministry to serve on the Coal Requirements and Allocations Committee. The Committee meets under the Chairmanship of Pottore Lombardo and is under the control of the Italian Government.

2. A representative of your Ministry serving on the Committee would no doubt be able to give the Ministry of Industry and Commerce useful advice and information on the unemployment position in relation to coal allocation. He would also be able to ascertain the extent to which the limitation of the supplies of coal that are available to Italy are likely to affect the work of your Ministry.

W.E. BRAIM

SUBJECT: Shortage of coal

TO : The Minister of Labour and Social Security
Italian Government
Rome.

Receipt is acknowledged of your letter of 13th February, Prot. No. 3440/88-C regarding the effect of coal shortage on the employment situation.

As you are aware the Coal Allocations and Requirements Committee of the Ministry of Industry and Commerce is now responsible for coal supply in Italy, and it is noted that you have forwarded a copy of your letter to that Ministry.

In the meantime, this Sub-Commission will continue to stress, on all possible occasions, the serious effect that coal shortages are having on the employment position.

: Effect of Coal Allocations on Unemployment

: Industry and Utilities Sub-Commission
(Fuel Department, Coal Division)

1. The attached letter received from the Minister of Labour and Social Security is the most recent of many representations we have received from Minister Barbareschi on the same problem.

2. The Minister has previously been informed of the procedure for coal allocation and it will be noted that he has sent a copy of his letter to the Ministry of Industry and Commerce.

3. In view of the prime importance of fuel in the Italian employment problem it is suggested that Minister Barbareschi might be invited to nominate a representative of his Department to serve on the Coal Requirements and Allocations Committee. Would this suggestion be best submitted by you (subject to your agreement) to Signor Lombardo, or should Minister Barbareschi be advised to make application to the Ministry of Industry and Commerce for representation?

COAL COMMITTEE

MINUTES OF THE MEETING HELD 3 JANUARY 1946 AT THE MINISTRY OF INDUSTRY AND COMMERCE

The Allocations and Requirements Committee met at the Ministry at 0930 hrs on 3 January 1946. Mr.Lombardo was in the Chair and the following were present:

Col. Walker
Mr.Beckingham
Maj.Fewings
Maj. Robson
Capt. Christian
Mr.Allardice
Mr.Hansen
Mr.Rombert
Capt.Clinging
Mr.Hind

Prof. Gorbella
Dott.Bianchini
Ing.Sandalli
Ing.Fassi
Dott. Mastrocinque
Ing.Notarbiorti
Ing.Finocchi
Ing.Donalisio
Sig. Castelli

1. The minutes of the preceding meeting of 6 December 1945 were approved.

2. The proposed allocations for Sardinia were discussed and approved.

3. Mr. Lombardo asked to be given the position concerning the matter of the transport of coal lying at S. Antioco to the Mainland. As in accordance with the meeting held at the Allied Commission it was decided to arrange to charter at least 2 ships from the foreign Pool to supplement this transport.

The reply was given by Dott. Mastrocinque who stated that so far nothing had been arranged as the Ministry of Treasury has not yet arranged the payment of freight out of the Italian dollar credit frozen in America.

Mr. Lombardo asked Dott. Mastrocinque to look personally into this matter with a view to arriving at a prompt solution.

The Allied Commission on their part communicate that 2 ships now discharging from America are to be used to load at S. Antioco for the Mainland.

4. The programme of the State Railways of Sicily and Sardinia and secondary railways in Central-South of Italy was studied.

In reply to a question from Mr.Lombardo, Ing.Sandalli stated that it was agreed previously to keep the actual industrial requirements separate in order to have a clear picture of the individual requirements. This was considered advisable inasmuch as on the total [illegible]

Mr. Lombardo asked Dott. Mastrocinque to look personally into this matter with a view to arriving at a prompt solution.

The Allied Commission on their part communicate that 2 ships now discharging from America are to be used to load at S. Antioco for the Mainland.

4. The programme of the State Railways of Sicily and Sardinia and secondary railways in Central-South of Italy was studied.

In reply to a question from Mr. Lombardo, Ing. Sandulli stated that it was agreed previously to keep the actual industrial requirements separate in order to have a clear picture of the individual requirements. This was considered advisable inasmuch as on the total tonnage of imported coal allocated to the Central and Southern Regions, the railways requirements - continually increasing owing to the operating of new lines - are already weighing on as much as 22% whilst Railway requirements for the North represent about 3% of the total tonnage allocated to North Italy.

In view of this therefore, it was decided from now onwards, to keep all railways requirements for the Central-South Regions distinct from those of the North.

With regard to the detailed examination of the requirements, Ing. Notarberti proposed an increase of 200 tons per month for the State Railways in Sardinia so that the monthly requirements will be increased from 1850 to 2050 tons. This was approved.

Col. Walker stated that the Italian railways require the following quantities of coal:

State Rlys (excluding Sardinia, Sicily and Reggio Calabria zone)	105.000
Military Railways	25.000
State Rlys. Sardinia, Sicily, Reggio Calabria and Secondary railways of Central-South	20.830
Secondary Railways - North Italy	10.000
Total	160.830

Declassified E.O. 12065 Sec. 3-402/NNDC NO. 785021

The programme for the railways of Central-South was approved by allocating 20.830 tons of imported coal and 1.900 tons of Sardinian to Central South Railways.

5. Col.Walker read some reports from America, the meaning of which was that due to the Christmas holidays, the coal loading programme for Italy would suffer a curtailment although it is hoped the situation will improve. It is therefore safer to presume that during the current month of January arrivals will not exceed 300.000 tons which means that leaving the railways unchanged, only 50% of the above mentioned figure will be available for industrial use.

Mr.Lombardo states that the situation is very disturbing and that it is necessary to increase the production and transport of Sardinian coal to the maximum.

6. The allocations for Sicily were approved.

7. The Programme for Naples and the advisibility or otherwise of starting up the Bagnoli Coke plant were discussed. Prof.Gorbella stated that these steel Works are able to obtain the raw material necessary to operate a blast furnace by transporting the ore from their own mines in the Island of Elba thus giving incidentally employment to about 500 men.

In view of the obvious reduction in coal arrivals during this month, Mr. Beckingham proposed that a meeting should be held at Coal Division A.C. to examine the general situation of all Italian Coke Plants. At that meeting the questions of the Bagnoli Coke plant will be discussed.

It was decided to invite representations from the Confederation of Italian Industry and from the Confederation of Work. After some discussion about the dump to be created by the Naples Merchants and the anticipated needs of Sezione Autonoma di Escavazione Porti, the Naples programme was approved subject to the meeting to be held concerning the Coke Plant at Bagnoli.

8. The programme of the requirements of Rome Region was examined. Sig. Castelli stated that during the month of December no cargo of Sardinian Coal arrived at Civitavecchia and on that account it has been necessary to supply foreign coal to some consumers such as cement works which could have used Sardinian coal. He asked that at least one ship per month of Sardinian coal should be sent to that Port.

Dott. Montecinque stated that on account of arrangements made between the Marina Mercantile and U.N.R.R.A., every available ship has been allocated to other traffic leaving the Central Coal Office without a chance of being able to charter any ship for the carriage of coal. On the suggestion of Mr.Beckingham, Mr.Lombardo asked that a special request be made on behalf of the Coal Committee to Transportation S/C to obtain two or three ships on time charter to Central Coal Office. With regard to the coke plant at Nora Mentore, as this Plant has so far not received any coal during November and December against allocation

Declassified E.O. 12065 Section 3-402/NNDC NO. 785021

furnace by transporting the ore from their own mines in the Island of Elb this giving incidentally employment to about 500 men.

In view of the obvious reduction in coal arrivals during this month, Mr. Beckingham proposed that a meeting should be held at Coal Division A.C. to examine the general situation of all Italian Coke Plants. At that meeting the questions of the Bagnoli Coke plant will be discussed.

It was decided to invite representations from the Confederation of Italian Industry and from the Confederation of Work. After some discussion about the dump to be created by the Naples Merchants and the anticipated needs of Sezione Autonoma di Escavazione Porti, the Naples programme was approved subject to the meeting to be held concerning the Coke Plant at Bagnoli.

8. The programme of the requirements of Rome Region was examined. Sig. Castelli stated that during the month of December no cargo of Sardinian Coal arrived at Civitavecchia and on that account it has been necessary to supply foreign coal to some consumers such as cement works which could have used Sardinian coal. He asked that at least one ship per month of Sardinian coal should be sent to that Port.

Dott. Mastrocinque stated that on account of arrangements made between the Marina Mercantile and U.S.A., every available ship has been allocated to other traffic leaving the Central Coal Office without a chance of being able to charter any ship for the carriage of coal. On the suggestion of Mr. Beckingham, Mr. Lombardo asked that a special request be made on behalf of the Coal Committee to Transportation S/C to obtain two or three ships on time charter to Central Coal Office. With regard to the coke plant of Nera Montoro, as this Plant has so far not received any coal during November and December against allocation and is consequently still ill, a decision will be reached at the meeting on Saturday 5 inst. as to whether this plant should be started up or not.

Subject to the above, the Rome programme was approved.

9. The programmes regarding the regions of Livorno, Ancona, and Bari were approved. Only for the latter, Mr. Castelli remarks that the quantity allocated directly to the secondary railways is being deducted from the quantity of the Merchants Group with evident financial loss for the Group.

Mr. Lombardo stated however that it is necessary to concern oneself for the present with the more important matters of the general economies and for that reason it is not possible to consider the request of the Merchants, however praiseworthy they may be.

10. Upon the proposal of Mr. Beckingham it was decided to use a stock of 1900 tons of coal which is at the disposal of the Chamber of Commerce of Rieti, and allot it perhaps to the Coke Plant of Nera Montoro always subject to the decisions which will be reached at the meeting to take place on 5 inst.

Declassified E.O. 12065 Section 3-402/NND NO. 785021

11. The programme for North Italy was examined and after discussion and certain explanations by Ing.Fassi, was approved. The following points were particularly to be noted:

a) that the increase of 5000 tons for the hospitals (after discussion) against the planned programme for January.was considered to be a necessity and therefore approved,

b) that the increase of 3000 tons for the non ferrous metals is justified in view of the considerable increase in aluminium work,

c) that the quota for the lime and cement is reduced in view of the probable availability of about 5000 tons of gas coke suitable to be used in cement manufacture,

d) that in the case of the textiles a considerable increase in coal is necessary for cotton recently arrived and for a quantity of cotton and wool expected shortly,

e) that the increase for rubber is in view of arrivals of raw materials

f) that the proposed quota of 38.000 tons for the coke plants will be discussed at the meeting on 5 inst,

g) that 3000 tons of Sardinian coal shall be allotted to Soc. FIAT Mirafiori over and above that already suggested for the operating of their electric power stations.

Finally Mr. Lombardo wishes to have, from the Coal Office Milan, precise information concerning the increase of 2000 tons of coal for iron work for January.

With regard to the requirements of the steel industry, Mr.Lombardo remarked that it is necessary to examine the possibility of importing also semi worked steel if the present coal crisis should continue.

Col. Walker and Maj. Fowings agreed and Mr. Lombardo requested Prof. Corbella to call a meeting to draw up a plan for the future programme of the Italian Steel Industry. At this meeting Col. Parker and Mr.J.Harris should be invited.

12. The programme for Sibolla lignite allocations was approved.

13. The following figures were given concerning the production and needs of metallurgical coke for the current month:

Production:

Cokitalia	5000
Votrocoke	4000
Ansaldo coke	3000
Fornicoke	4000
	16000

Requirements:

North Italy

Declassified E.O. 12065 Section 3-402/NNDC NO. 785021

c) that 3000 tons of Sardinian coal shall be allotted to Soc. FIAT Mirafiori over and above that already suggested for the operating of their electric power stations.

Finally Mr. Lombardo wishes to have, from the Coal Office Milan, precise information concerning the increase of 2000 tons of coal for iron work for January.

With regard to the requirements of the steel industry, Mr.Lombardo remarked that it is necessary to examine the possibility of importing also semi worked steel if the present coal crisis should continue.

Col. Walker and Maj. Fewings agreed and Mr. Lombardo requested Prof. Gorbolis to call a meeting to draw up a plan for the future programme of the Italian Steel Industry. At this meeting Col. Parker and Maj.Harris should be invited.

12. The programme for Ribolla lignite allocations was approved.

13. The following figures were given concerning the production and needs of metallurgical coke for the current month:

Production:

Cokitalia	5000
Votrocoke	4000
Ansaldo coke	3000
Fornicoke	4000
	16000

Requirements:

North Italy	
Steel Industry	6000
Pig Iron Foundries	3000
Foundries (Other metals)	2000
Lime	2000
Sundry	1000
	14000
Italy Central-South	4162
Total Requirements	18162

There would thus be a deficit which could be met by prolonging the programme into the early part of February next all the more that with the starting up of the second battery of Votrocoke plus the normal working of the first battery of Cokitalia, the production should increase.

8111

Declassified E.O. 12065 Section 3-402/NNDC NO. 785021

14. "Other business" was then discussed. It was decided to use existing stocks at those works where it is not thought that such stocks will be utilised for 3 or 4 months.

15. A request has been received from the High Commissioner for Sicily that he may be relieved of the supply of coal to the Province of Reggio Calabria it being understood that the quantity to be allocated to that Province be deducted from the quota to be allocated to Sicily. The province of Reggio Calabria will therefore be included under the Bari Group as from the month of March next. The request was accepted.

16. The proposal of the Soc.Gondrand to be allowed to organise the transport of coal from Germany and Poland to Italy as well as to assume in Northern Italy the transport of coal on the River Po from Venezia to Mantova and Cremona was not agreed to in view of the high cost which would fall on the price of the fuel.

17. The quota of coal required for bunkering Italian ships on regular lines and for port work must be taken from the allocations made monthly to the Chamber of Commerce and High Commissioner.

18. The duties to be given to Dott.Mastrocinque as Italian Coal specialist with ECO and with the title of "alternative representative and technical adviser" were specified.

19. On the question which has arisen between Associazione Generale Commercio Carboni Fossili and the Regional Group of Emilia and Ancona concerning the unloading of the portion of coal destined for the eastern part of the Emilia Region Mr.Lombardo laid down that the Milan Coal Office must call together the interested parties and reach agreement it being understood in any case, that the above mentioned parties must be discharged in the Port of Ancona.

20. Ing.Fassi asked that a request may be made by Coal Division to obtain permission to discharge coal in Spezia destined for the area served by that Port. Col.Walker gave an assurance that this matter is already in hand and that he will continue to press the matter.

21. The next meeting was fixed for 1 February 1946 at 0930 hrs.

Declassified E.O. 12065 Section 3-402/NNDC NO. 785021

Chamber of Commerce and High Commissioner.

18. The notice to be given to Dott.Montrasingno as Italian Coal specialist with ECO and with the title of "alternative representative and technical adviser" were specified.

19. On the question which has arisen between Associazione Generale Commercio Carboni Fossili and the Regional Group of Emilia and Ancona concerning the unloading of the portion of coal destined for the western part of the Emilia Region Mr.Lamberis laid down that the Milan Coal Office must call together the interested parties and reach agreement it being understood in any case, that the above mentioned portion must be discharged in the Port of Ancona.

20. Ing.Fassi asked that a request may be made by Coal Division to obtain permission to discharge coal in Spezia destined for the area served by that Port. Col.Walker gave an assurance that this matter is already in hand and that he will continue to press the matter.

21. The next meeting was fixed for 1 February 1946 at 0930 hrs.

14 January 1946.

SUBJECT: Report, weekly.

TO : Hq Alcom, Industry S/C, Mining Division, APO 394

COAL MINING

a. Production :

(1) Production for the week ending 12.1.1946 totaled 12358 tons of washed coal.

(2) Production for the week averaged 2060 tons per day which represents an average of 0.391 tons per man underground per day. North Group average was 0.290 tons, South Group 0.430 tons, Sirai Group 0.420.

(3) Total average number of men actively engaged underground was 5261.

b. Timber :

The situation is again critical. Actual stocks are under 10.000 lineal meters. While it is recommended that the utmost consideration be given to this item, this office would appreciate receiving information as to eventual shipments of pit props to Carbosarda.

3134

c. Coal Shipments :

S/S "Colabee" - completed her loading 12.1.46 - 7800 tons destination Genoa - signal No. 457.

S/S "Gaeta" - has arrived at S. Antioco and is now under loading.

Whit this last boat all colliers advised have been loaded and a signal No. 450 was sent to you on the 12th inst., asking for more boats to be sent for loading at S. Antioco.

COAL MINING

a. Production :

(1) Production for the week ending 29.12.45 totaled 8806 tons of washed coal. 5 days work - North Group only 4.

(2) Production for the week averaged 1761 tons per day which represents an average of 0.428 tons per man underground per day. North Group average was 0.235 tons; South Group average 0.478 tons; Sirai Group 0.497.

(3) Total average number of men actively engaged underground was 4109.

Delay in sending this and next report due to holidays and closing up of Carbosarda's stock accounts. Am hurrying Carbosarda as much as possible and recommend that you communicate to this office your decision as to query made with signal No. 432, dated December 1945.

8131

b. Timber :

S/S Miseno finished unloading. Discharged 795 tons of pit-props. Trust that, as arranged during writer's visit to Rome, this boat will be used only for transportation of pit-props for Carbosarda from Crotone and/or Reggio Calabria and mineral concentrates from Cagliari and eventually from S. Antioco-Carloforte.

Please confirm as supplies of pit-props are always urgently required.

Inclosure

0495

Declassified E.O. 12065 Section 3-402/NNDG NO. 785021

c. Coal shipments :

Since report dated 19.12.45, up to date the following colliers have been loaded :

S/S "Rubicone" . . . . . completed loading 19.12.45 6160 tons - Civitavecchia - Signal No. 416

S/S "Edera" . . . . . completed loading 24.12.45 7100 tons - Taranto and R. Calabria, signal 425.

S/S Marionga De thermotis" - completed loading 2.1.46 7350 tons Catania& P.Empedocle - signale 439

S/S "Teresa Schiaffino" completed loading 31.12.45 7100 tons Naples - Signal No. 435.

This office has on schedule, up to date, the following colliers:

S/S "Gaeta". . . . . expected ready at S. Antioco 11.12.45 7600 tons M/R Mix. - 400 tons No.4 - T.8000 Destination: Palermo. She has not as yet arrived.

S/S "Cygnet" . . . . . 2500 M/R Mix - 2000 tons No.4 - 4500 tons Destination Genoa.

S/S "Zarembo" . . . . . 2250 tons M/R Mix - 2500 No. 4 - 4750 tons Destination: Civitavecchia.

It is still strongly recommended that more colliers be sent to S. Antioco as stocks on pier are always more than 60.000 tons. Coal temperature is rising and the menace of internal combustion is getting greater. Furthermore it is of the greatest importance that such stocks be removed in order to enable Carbosarda to have the necessary cash to pay labor on hand at the mines.

Assurance from you in this connection will be highly appreciated.

d130

Liberty Boat :

An urgent signal was dispatched to Comm. Mastrocinque Ministero Trasporti, Rome; repeat to Hq. A.C., Mining Div., asking tor information as to progress made and decisions

0496

Declassified E.O. 12065 Section 3-402/NNDC NO. 785021

taken concerning the payment at Washington of freight for release of one Liberty Ship to be used for the transportation of Sulcis coal from S. Antioco to Italian mainland. Signal was sent on December 30th, 1945, but no reply has as yet reached here.

As the above mentioned Italian Ministry does not seem to grasp the importance of this matter - although same was thoroughly explained when the writer was in Rome - the writer takes the liberty of requesting you kindly to contact with such Ministry (possibly Comm. Mastrocinque) and hurry both decision and reply.

Telephone and Garage :

On January 2nd, 1946, by signal No. 436 addressed to Società Mineraria Carbonifera Sarda, Rome, repeated to Hq. A.C. for Mining Division, and for the attention of Ing. Rostan, this Mining Office asked that, with no further delay a repeatedly promised telephone and garage should be at once arranged for at Mr.Calli's private house. The writer being "fed up" with asking, begging and praying for days, weeks and months, shall thank you if you will kindly back his request which is based on the determination of doing his work here more rapidly and more accurately for the benefit of all concerned and especially for Carbosarda.

Carbosarda's address in Rome is : Via Lucullo, 16
Tel. 487048

The writer will thank you for a prompt reply on this matter.

COAL MINING

a. Production

(1) Production for the week ending 5.1.46 totaled 11996 tons of washed coal. 5 days work.

(2) Production for the week averaged 3399 tons per day which represents an average of 0.412 tons per man underground per day. North Group average was 0.256 tons; South Group average 0.456; Sirai Group 0.467.

(3) Total average number of men actively engaged underground was 5818.

b. Timber :

Confirm last week's report.

c. Coal Shipments :

8127

S/S "Zarembo" - completed loading this evening - 5750 tons - destination Civitavecchia - Signal No. 447.

S/S "Collabec" instead of "Cygne", cancelled - 3950 tons R/M Mix. + 3000 tons No. 4 - 6950 tons Destination : Genoa - Not yet arrived.

S/S "Gaeta" - Is this boat to be cancelled?

REF. : L90/203 5 January 1945

SUBJECT : Supply of coke for "Navalmeccanica - C.M.F."

TO : The Joint Secretariat, Italian General Confederation of Labour.

Reference is made to your letter of 26th December, Prot. No. 16494 - V/13.

You will be aware that the question of supplying coke is for decision by the Coal Allocations Department of the Italian Ministry of Industry & Commerce. It is understood that the needs of Navalmeccanica are receiving careful consideration within the quota of coke that is available for the type of work on which that Company is engaged.

MINISTERO INDUSTRIA E COMMERCIO
Direzione Generale Industria

Comitato Carboni

QUESTIONI VARIE PER LA RIUNIONE DEL 3/1/1946

1) Ripercussioni nelle lavorazioni dell'industria centro-meridionale per la mancata fornitura di coke metallurgico durante tutto il mese di dicembre.

2) Ripercussioni come sopra per le ritardate forniture di carbone nel mese di novembre 1945, per essere stati i programmi di detto mese completati solo nella seconda quindicina di dicembre.

3) Convenienza o meno di utilizzare gli stocks di carbone esistenti presso taluni stabilimenti.

4) Domanda dell'Alto Commissariato per la Sicilia tendente ad essere esonerato dalla materia riguardante la fornitura del carbone alla provincia di Reggio Calabria, ora aggregata al gruppo Sicilia.

5) Proposta della ditta Gondrand di organizzazione del trasporto del carbone dalla Ruhr, della Saar e della Polonia in Italia.

6) Proposta della stessa ditta Gondrand di assumersi il trasporto del carbone in Alta Italia per via fluviale attraverso il Po da Venezia fino a Mantova ed a Cremona.

7) Contingenti di carbone per le FF.SS. e ferrovie secondarie da tener separati da quelli per usi industriali.

8) Organizzazione delle forniture di carbone per bunkeraggio navi alleate e nazionali, per servizi di linea, portuali e piropeschere. Relativi contingenti da tener separati come sopra.

9) Decisione definitiva circa l'avviamento della Cokeria di Bagnoli

Declassified E.O. 12065 Section 3-402/NNDC NO. 785021

nel mese di novembre 1945, per essere stati i programmi di detto mese completati solo nella seconda quindicina di dicembre,

3) Convenienza o meno di utilizzare gli stocks di carbone esistenti presso taluni stabilimenti.

4) Domanda dell'Alto Commissariato per la Sicilia tendente ad essere esonerato dalla materia riguardante la fornitura del carbone alla provincia di Reggio Calabria, ora aggregata al gruppo Sicilia.

5) Proposta della ditta Gondrand di organizzazione del trasporto del carbone dalla Ruhr, della Saar e della Polonia in Italia.

6) Proposta della stessa ditta Gondrand di assumersi il trasporto del carbone in Alta Italia per via fluviale attraverso il Po da Venezia fino a Mantova ed a Cremona.

7) Contingenti di carbone per le FF.SS. e ferrovie secondarie da tener separati da quelli per usi industriali.

8) Organizzazione delle forniture di carbone per bunkeraggio navi alleate e nazionali, per servizi di linea, portuali e piropeschere. Relativi contingenti da tener separati come sopra.

9) Decisione definitiva circa l'avviamento della Cokeria di Bagnoli il cui preriscaldo può iniziarsi alla fine di gennaio.

10) Convalida dell'incarico affidato al Dott. Mastrocinque quale esperto per i carboni distaccato presso la R.Ambasciata a Londra. Trattamento di missione.

11)Questioni inerenti alla discarica, nel porto di Ancona, del carbone destinato ad approvvigionare l'Italia settentrionale.

Declassified E.O. 12065 Section 3-402/NNDC NO. 785021

VARIE (PROPOSTE DELL'ING. FASSI).

a) Caratteristiche del carbone da gas non idonee per distillazione (basso tenore di sostanze volatili, poca agglomerabilità, elevato contenuto in ceneri).

b) Richiesta della Camera di Commercio di Spezia affinchè il carbone destinato alla zona di Spezia venga sbarcato in quel porto, anzichè a Genova, allo scopo di ridurre le spese di trasporto (per i due mesi di dicembre e gennaio le assegnazioni per quella zona ammontano a 4.055 t).

Pare che la Royal Navy di Napoli si opponga all'invio di un vapore per scarico parziale a Spezia, perchè il canale libero del porto sarebbe troppo stretto. Si chiede urgentemente l'interessamento della "Coal Division" per ottenere il "nulla osta" da parte della Royal Navy.

c) Nuova richiesta della Soc. Cokitalia per iniziare il preriscaldo della 2^ batteria, il cui fabbisogno di coking coal è di 20.000 t/mese.

Declassified E.O. 12065 Section 3-402/NNDC NO. 78502

1. Please note that the above meeting for March allocations will be held at the Ministry of Industry and Commerce, Rome at 9.30 a.m. Wednesday 6 February 1946.

2. Agenda:

a) Approval of the minutes of the last meeting
b) Examination and take in consideration the coal and coke allocations program for March 1946, for Sicily, Sardinia and Northern, Central and South Italy.
c) Distribution of coke of indigenous production.
d)
1. Increase by 800 tons per month Sicily Electricity Works
2. Italian Shipping Bunkers
3. Sardinia Railway Allocation increase
4. Spica Coy, Castello request for 100 tons monthly, Porto Potenza Picena demands
5. Discharge of Coal at Ravenna.

e) Date of next meeting.

COAL MINING :

a. Production :

(1) Production for the week ending 19. 1. 1946 totaled 15528 tons of washed coal.

(2) Production for the week averaged 2588 tons per day which represents an average of 0.468 tons per man underground per day. North Group average was 0.341 tons, South Group 0.495 tons, Sirai Group 0.543.

(3) Total average number of men actively engaged underground was 5526.

b. Timber :

Statement made in report dated January 14th is confirmed.

c. Coal shipments :

We confirm our signal N. 468 of to-day's date which is self explanatory and trust to receive your prompt news.

Subject : Meeting of Coal Requirements and Allocations Committee.

To : Industry and Utilities S/C
Industry Dept., Industry and Utilities S/C
Labour S/C
Transportation and Shipping S/C
UNRRA.

Further to our AC/CD/1334/I.&U. of 28 December, the following are additional points for discussion at the meeting of the above committee to be held on 3 January 1946.

1. Effect upon industry in Central - South Italy due to lack of metallurgical coke during the month of December.

2. Effect upon industry in Central - South Italy due to delayed coal supplies during November 1945. The programme for November was only completed in the second half of December.

3. Advisability or otherwise of using coal stocks lying at certain Works.

4. Request from the High Commissioner of Sicily to be relieved of the coal supply in the Province of Reggio Calabria, at present forming part of the Sicilian Group.

5. Proposal from the Firm COMMAND to arrange the transport of coal from the Ruhr, Saar and Poland to Italy.

6. Proposal from the Firm Gondrand to take over the transport of coal in North Italy on River Po from Venice to Mantova and Cremona

COAL MINING

a. Production

(1) Production for the week ending 15.12.1945 totaled 10035 tons of washed coal.

(2) Production for the week averaged 1672 tons per day which represents an average of 0.380 Tons per man underground per day. North Group average was 0.279 tons; South Group average 0.429 tons; Sirai Group 0.414 tons.-

(3) Total average number of men actively engaged underground was 4394.

b. Timber

No pitprops arrived; situation very difficult.

c. Coal Shipments

s/s "CATERINA GEROLIMICH" completed loading 15 Dec. 7260 tons - Genoa (Signal No. 409 - 17.12.1945)

s/s "RUBINONE" now loading.

MEMORANDUM

SUBJECT: Coal Requisitioning and Allocations Committee.

1. At a meeting of the above described Committee which was held on Monday, the 12th November 1945, allocations of coal supplies for the month of December 1945 were agreed as follows:-

Regions	Imports tons	Sardinian tons	coke tons
Sardinia	2,000	13,090	—
Sicilia	19,475	11,000	44
Napoli	18,895	1,380	1,034
Roma	20,655	5,410	194
Livorno	7,790	6,740	2,124
Bari	8,015	—	75
Ancona	3,170	—	87
TOTAL:	80,000	37.620	3,558
Northern Regions (including Emilia)	300,000	22,500	—
GRAND TOTAL:	380,000	60,120	3,558

2. In addition a total of 11,250 tons of lignite was allocated throughout Central and Northern Italy.

3. The revised allocation of coal supplies for the month of November which was necessitated by the large cut in deliveries of coal from the United States as a result of the strike of coal miners is shown on Appendix A) attached hereto.

4. It will be seen that the revised figure for Northern Italy was 112,000 tons, as compared with the original

0565

Declassified E.O. 12065 Section 3-402/NNDC NO. 785021

allocation of 246,000 tons. Shipments actually received or known to be en route have resulted in 50,000 tons of coal shipped in excess of the revised allocation for the Northern territory. The additional shipments are being allocated by the Northern Coal Committee in proportion to the difference between the original and the revised allocations.

Rome, 13th November 1945.

TO : HQ. Alcom, Ind. Sub-Comm., Mining Division
APO 394

COAL MINING

a. Production.

(1) Production for the week ending 1.12.1945 totaled 15.028 tons of washed coal.

(2) Production for the week averaged 2.504 tons per day which represents an average of 0.477 tons per man underground per day. North Group average was 0.418 tons. South Group average 0.477 tons. Sirai Group 0.532 tons.

(3) Total average number of men actively engaged underground was 5.254.

b. Timber.

Since last week's report a signal was sent : N. 388, dated 29.11.45. No reply as yet received. Situation here considered almost desperate and unless pit-props are received with utmost haste, production of coal shall have to be stopped.

c. Coal Shipments :
Collier "Gaeta" completed loading 28 November - 8.100 tons - Catania. (Signal N. 386 - 28.11.45)

All other collier advised, viz:

Declassified E.O. 12065 Section 3-402/NNDC NO. 785021

(2) Production for the week averaged 2.504 tons per day which represents an average of 0.477 tons per man underground per day. North Group average was 0.418 tons. South Group average 0.477 tons. Sirai Group 0.532 tons.

(3) Total average number of men actively engaged underground was 5.254.

b. Timber.

Since last week's report a signal was sent : N. 388, dated 29.11.45. No reply as yet received. Situation here considered almost desperate and unless pit-props are received with utmost haste, production of coal shall have to be stopped.

c. Coal Shipments :

Collier "Gaeta" completed loading 28 November - 8.100 tons - Catania. (Signal N. 386 - 28.11.45)

All other collier advised, viz:

Marionga De Thermotis	6.500 tons
Katingo Hadjipteras	5.000 "
Rubicone	7.000 "

not yet arrived at S. Antioco.

d. Transportation, Italian Jeep.

No news from any source whatever on this most important item.

MINISTRY OF LABOR AND SOCIAL SECURITY

Minister's Office

Prot. N. 2369/G.90

Rome, 23 November 1945

LSC/1002

TO : ALLIED COMMISSION
Labor Sub-Commission,
ROME

SUBJECT: Deficiency of fuel. Dismissal of personnel.

1. Your Sub-Commission will certainly be aware that one of the outstanding problems connected with the reorganization of the national economy in general, and particularly of the industrial branch, is that of the scarcity of fuel.

2. This Ministry receives continuelly from different parts urgent communications relating to the serious prospects of coming personnel dismissals, due to the fact that the industrial establishments are unable to accelerate their production to reach a satisfactory output. The reason for this is, among others, the deficiency of raw materials and fuel. This Ministry asks, therefore, your Sub-Commission to make once more representation to the superior Allied Authorities with respect to the alarming situation which is summarized above.

SUBJECT: Sardinian Coal Production, October.

TO : Office of the Quartermaster General
Attn. : Chief Coal Section,
Solid Fuels Branch,
Washington, D.C.

1. Reference CAL 1343 of 13 March 1943.

2. One copy is attached of the Consolidated Report on Sardinian coal production and sales for October 1943.

3. Production reached 63,000 metric tons, the highest since February 1943.

4. Shipping amounted to only 34,000 metric tons, leaving a stockpile of 32,000 tons.

5. It is understood that this reduced shipping was caused by pulling several boats off the coal run. It is desired to point out that if shipping further reduced stockpiles will accumulate to the point that production will be curtailed. There is also the danger of spontaneous combustion and loss of valuable coal with continued large stockpiles.

COMMITTEE MEETING

The ordinary monthly meeting of the Coal Requirements and Allocation Committee was held at 1900 hrs on 12 November at the Ministry of Industry & Commerce.

Sig. Lombardo was in the Chair and there were present:

Mr. SULLIVAN
Col. WALKER
Maj. HARRIS
Maj. FEWINGS
Mr. RUMBERT
Mr. PROCTOR
Mr. BECKINGHAM
Prof. GERBELLA
Dr. BLANCHINI
Eng. SANDULLI
Eng. NOTARLOBERTI
Dr. MASTROCINQUE
Dr. TERLIZZI
Eng. DONALISIO.
Mr. CASTELLI
Eng. FERRERO

1. The Minutes of the previous Meeting of 15 October 1945 were approved.

2. The programme of Foreign and Sulcis Coal, and Metallurgical Coke allocation for Central and South Italy and the Island was examined commencing with that for Sardinia. Col. Walker stated that the Allied Commission has no objection that an equal quantity of Sulcis Coal replaces the 2000 tons of Seui anthracite to be supplied as an additional quantity to the Sardinian electric power stations and that this quantity be shipped to the Mainland. Once the pithead is cleared of the existing stock of about 4.000 tons which is hindering production, the Seui mine should produce as much anthracite as possible.

3. With regard to the 650 tons of metallurgical coke allotted in the schedule for the lead industry to the Montevecchio and Monteponi plants it was decided to cancel this allocation having in view the recent arrival of 3.000 tons of metallurgical coke which will suffice for several months.

Col. Walker expressed the wish that the coke required for the reduction of the ore should be allotted to the S. GAVINO foundry of the Soc. Montevecchio as this one is the most modern.

Prof. Gerbella mentioned however that the foundry at S. GAVINO is better equipped only so far as mechanisation is concerned, whilst the forced draft furnaces are the same as those of Soc. MONTEPONI, therefore it is presumed

1. The Minutes of the previous Meeting of 15 October 1945 were approve

2. The programme of Foreign and Sulcis Coal, and Metallurgical Coke allocation for Central and South Italy and the Island was examined commencing with that for Sardinia. Col. Walker stated that the Allied Commission has no objection that an equal quantity of Sulcis Coal replaces the 2000 tons of Seui anthracite to be supplied as an additional quantity to the Sardinian electric power stations and that this quantity be shipped to the Mainland. Once the pithead is cleared of the existing stock of about 4.000 tons which is hindering production, the Seui mine should produce as much anthracite as possible.

3. With regard to the 650 tons of metallurgical coke allotted in the schedule for the lead industry to the Montevecchio and Monteponi plants it was decided to cancel this allocation having in view the recent arrival of 3.000 tons of metallurgical coke which will suffice for several months.

Col. Walker expressed the wish that the coke required for the reduction of the ore should be allotted to the S. GAVINO foundry of the Soc. Montevecchio as this one is the most modern.

Prof. Garbella mentioned however that the foundry at S. GAVINO is better equipped only so far as mechanisation is concerned, whilst the forced draft furnaces are the same as those of Soc. MONTEPONI, therefore it is presumed that there will be no greater economy of coke at the first named foundry for an equal quantity of mineral treated. Further, in view of the fact that the ore of S. Gavino has an strata predominately whereas that available at Montepon is of a chalky siliceose nature it is probable that the consumption of coke will be definitely inferior in the latter case.

In any case he suggested comparative tests of consumption and proposed that in the meanwhile, for the reason given, that the coke be equally divided between the two undertakings.

The Committee agreed and with that approved the proposed allocations for Sardinia.

4. The Sicilian programme was next discussed and Maj. Harris pointed out that the quantity of Sardinian Coal allotted to the Palermo electric plant is too low in proportion to foreign coal as from his experience this plant can use up to 50% Sardinian Coal.

Declassified E.O. 12065 Section 3-402/NNDC NO. 785021

Ing. Sandulli pointed out that such a division does not depend on the characteristics of the plant but on the decision taken earlier to allocate a certain quantity of Sardinian coal to North Italy to replace an equal quantity of Foreign coal. This means that it was necessary to alter the previous proportions of foreign and Sardinian coal for Central and South Italy.

The Sicilian programme was then agreed to.

5. The Naples programme was then discussed and approved after Maj.Harris had been given certain explanations concerning the use of lignite from the MORCONE mine (Benevento) in the Campobasso gas works.

6. Col.Walker mentioned that he had noticed a tendency on the part of Italian Industry to use foreign coal as much as possible even in those plants where nationally produced fuels could be used. He suggested that every effort should be made to use lignite and other nationally produced fuels to the utmost even should the importation of foreign coal increase.

Upon this point Ing.Sandulli stated that for many years, through the medium of the National Association of Combustion Research, and in accordance with Government Legislation, every effort has been made to adapt existing plants and those under construction in such a way that they are capable of using foreign and nationally produced fuels, always so long as this is technically possible and economical. For that reason he emphasized that it is possible today to find plants capable of the highest efficiency.

Bearing on this, Maj.Harris asked if the engineers belonging to the National Association for the Combustion Control, are being used to the best advantage in supervising the use of nationally produced fuel as well as giving assistance to industrial consumers in North Italy as well as in Central and South Italy.

Mr.Lombardo mentioned that Ing.Sandulli is the technical chief of this Association and asked if having in view that the Association is under the control of Ministry of Industry and Commerce its engineers of the North Italian Branch could assist the Ufficio Carboni of Milan.

Ing,Sandulli replied that this is possible and that the request should be sent to the head office in Rome of A.N.C.C. which will give the necessary instructions.

7. Dr.Mastrocinque referred to the emergency stock to be kept with the FF.SS. of Naples as oulined in the programme and stated that the FF.SS. have no means of carrying out a strict watch over this; he asked therefore that the stocks should be under the charge of the industrialist group and that they should assume full responsibility.

Mr.Castelli agreed to the proposal but in view of the extra cost of discharge, supervision, ground rent, reloading into trucks which will fall on them asked that a different price should be agreed to on all coal lifted from "stocks".

Col.Walker stated in general he has no objection but requested that time be given to look into this matter.

8. The programmes were approved for Rome, Bari and Leghorn and Ancona.

9. The programme of allocation of lignite from the Ribolla mine was approved.

Mr.Castelli complained that on the basis of these programmes often

Declassified E.O. 12065 Section 3-402/NNDC NO. 785021

and economical. For that reason he emphasized that it is possible today to find plants capable of the highest efficiency.

Bearing on this, Maj.Harris asked if the engineers belonging to the National Association for the Combustion Control, are being used to the best advantage in supervising the use of nationally produced fuel as well as giving assistance to industrial consumers in North Italy as well as in Central and South Italy.

Mr.Lombardo mentioned that Ing.Sandulli is the technical chief of this Association and asked if having in view that the Association is under the control of Ministry of Industry and Commerce its engineers of the North Italian Branch could assist the Ufficio Carboni of Milan.

Ing,Sandulli replied that this is possible and that the request should be sent to the head office in Rome of A.N.C.C. which will give the necessary instructions.

7. Dr.Mastrocinque referred to the emergency stock to be kept with the FF.SS. of Naples as oulined in the programme and stated that the FF.SS. have no means of carying out a strict watch over this; he asked therefore that the stocks should be under the charge of the industrialist group and that they should assume full responsibility.

Mr.Castelli agreed to the proposal but in view of the extra cost of discharge, supervision, ground rent, reloading into trucks which will fall on them asked that a different price should be agreed to on all coal lifted from "stocks".

Col.Walker stated in general he has no objection but requested that time be given to look into this matter.

8. The programmes were approved for Rome, Bari and Leghorn and Ancona.

9. The programme of allocation of lignite from the Ribolla mine was approved.

Mr.Castelli complained that on the basis of these programmes-even the supply of lignite is passing away from the merchants which is causing them serious financial loss. He pointed out that out of 24.000 tons discharged at Civitavecchia only 4.000 tons was handled by the merchants and that about 100 merchants have to make a living out of this. He fears that the allocation of lignite direct to consumers will constitute a precedent detrimental to the interest of the merchants.

Declassified E.O. 12065 Section 3-402/NNDC No. 785021

Mr. Lombardo drew Mr. Castelli's attention to the fact that the present is an interim period but once imports increase sufficiently it is expected that the Ministry will not have to enter into the [illegible] allocation which will then leave the trade in a position to engage in its proper work.

10. Mr. Beckingham asked why in the allocations of lignite, only that of Sibolla is considered.

Prof. Garbella replied that at the present moment the distribution of all lignite is being studied, the reason that this has not been undertaken before is due to the precarious condition of transport. It is hoped at the next meeting to be in position to approve a distribution programme for all other lignites.

11. The proposed allocations for North Italy were next discussed.

Col. Walker did not agreed to the proposal to create a stock of 20,000 tons of coal for the electric power stations in North Italy.

Mr. Lombardo gave an assurance however that this quantity is obviously to be used only in case of need. Col. Walker then agreed.

12. Ing. Ferraro asked that in addition to the allocation of coal for the secondary railways, an allocation of 500 tons should be made to the port services.

Major Harris stated that up to the present, a monthly quantity of 600 tons had been supplied through the FF.SS. It was agreed to follow the same procedure in the future.

13. Ing. Materloberti asked if coal allocations for the FF.SS. in North Italy should, as in the past, be made by the Allies or by the Italian Administration seeing that with effect from 1 November 1945 the railways have passed under the Italian Government. It was decided to follow in the future the same procedure of direct supply on the part of the Allies.

14. Distribution of metallurgical coke produced nationally was next discussed.

At the request of Sig. Lombardo, Ing. Ferraro stated that due to a modification of the plan, only 12,000 tons of coke would be produced during November. Of this quantity however, 2,700 tons would be required to meet the October requirements which latter cannot be cancelled in view of the importance of the work in hand and, also, according to Major Harris no reliance can be given to any coke being imported. The programme for the current month must therefore be based on 9,300 tons only.

In view of the importance of the manufacture of calcium carbide it has been decided to supply during December this industry with the following quantities to the detriment of the lime kilns,

Calcium carbide	3,000 tons
Pig iron foundries	3,000 "

Declassified E.O. 12065 Section 1-402/NND 785021

Major Harris stated that up to the present, a monthly quantity of 600 tons had been supplied through the FF.SS. It was agreed to follow the same procedure in the future.

13. Ing. Notarloberti asked if coal allocations for the FF.SS. in North Italy should, as in the past, be made by the Allies or by the Italian Administration seeing that with effect from 1 November 1945 the railways have passed under the Italian Government. It was decided to follow in the future the same procedure of direct supply on the part of the Allies.

14. Distribution of metallurgical coke produced nationally was next discussed.

At the request of Sig. Lombardo, Ing. Ferrero stated that due to a modification of the plan, only 12,000 tons of coke would be produced during November. Of this quantity however, 2,700 tons would be required to meet the October requirements which latter cannot be cancelled in view of the importance of the work in hand and, also, according to Major Harris no reliance can be given to any coke being imported. The programme for the current month must therefore be based on 9,300 tons only.

In view of the importance of the manufacture of calcium carbide it has been decided to supply during December this industry with the following quantities to the detriment of the lime kilns,

Calcium carbide	3,000	tons
Pig iron foundries	3,000	"
Steel industry	2,500	"
Non-ferrous metal foundries	800	"
	9,300	"

Sig. Lombardo asked Ing. Ferrero to bring to the next meeting more precise information concerning the ripartition of coke.

At the next meeting the Committee will decide whether to start up the Bagnoli coke ovens or a second battery of Vetrocoke.

8079

Declassified E.O. 12065 Section 3-402/NNDC MD.
435021

15. Item No. 4 on the Agenda "any other questions".

At the Committee meeting held on 15 October it was decided that as from 1 December 1945 the allocation of coal to the secondary railways should be made by the Ministry of Industry and Commerce instead of by FF.SS.

However, certain strong representations have been made by the National Association of railway and internal navigation to the effect that the previous procedure be continued.

Col. Walker stated that as the matter is one of a primarily economic nature this is one to be decided entirely by the Italian Government.

It was therefore decided to leave this to a Commission composed of Ministry of Industry and of the Central Coal office as well as the Treasury and Inspectorate General of civil travel which will meet in the near future at the Secretariat of the Coal Committee.

16. The request of the Istituto Poligrafico dello Stato at Foggia for an increase from 650 to 1,000 tons of Sardinian coal was approved which will however be substituted by an equivalent quantity of foreign coal i.e. 750 tons (the difference coming from the dump to be created at Naples) in view of the fact that due to transport reason only foreign coal will be sent to the Bari region commencing in December.

17. The request from the High Commissioner for Sicily for an increased quantity of coal for the railways was turned down and was followed by a statement by Col. Walker that Sicily is receiving already about 75% of its normal coal requirements whereas the rest of Italy is receiving only 33% about.

18. The request of the Soc. San Giorgio di Pistoia for a monthly allocation of 75 tons of foreign coal was agreed to, to be drawn from the Naples dump and to be used for construction and repair work of railway vehicles.

19. The request of Soc. Solvay for an increase of coal in order to increase by 50% the production of hydrated and carburated soda was approved in principle but the decision was put back to the next meeting.

20. With regard to winter heating it was agreed that this could be carried out only on a very limited basis and with the following categories:

1. Public health institutions
2. Diplomatic Corps
3. Public offices and schools

After discussion it was decided to give 11,000 tons coal to North Italy to be taken from the 45,000 tons suggested for the coke plants. Over and above the use of this coal for the it

Declassified E.O. 12065 Section 3-402/NNDC No. 78502

17. The request from the High Commissioner for Sicily for an increased quantity of coal for the railways was turned down and was followed by a statement by Col. Walker that Sicily is receiving already about 75% of its normal coal requirements whereas the rest of Italy is receiving only 33% about.

18. The request of the Soc. San Giorgio di Pistoia for a monthly allocation of 75 tons of foreign coal was agreed to, to be drawn from the Naples dump and to be used for construction and repair work of railway vehicles.

19. The request of Soc. Solvay for an increase of coal in order to increase by 50% the production of hydrated and carburated soda was approved in principle but the decision was put back to the next meeting.

20. With regard to winter heating it was agreed that this could be carried out only on a very limited basis and with the following categories:

1. Public health institutions
2. Diplomatic Corps
3. Public offices and schools

After discussion it was decided to give 11,000 tons coal to North Italy to be taken from the 45,000 tons suggested for the coke plants. Over and above the use of this coal for the items mentioned must be supplemented by the use of lignite.

Also for Central and South Italy it was agreed on the proposal of Prof. Gerbella, the use of Ribolla lignite for the use of items above mentioned.

8078

21. The allocation to the pumping station of Codigoro was omitted from the list, the previous allocation of 500 tons is confirmed for December and to be taken from the emergency stock.

Declassified E.O. 12065 Section 3-402/NNDC NO. 785021

22. Having regard to the heating requirements for the month of December the quantity of coal to be allocated to the coke plants is reduced from 45,000 tons to 36,500 tons which it is decided to split up as follows:-

Ansaldo coke	4,500	tons
Fornicoke	6,500	"
Cokitalia	15,000	"
Vetrocoke	6,000	"
Genoa Gas Works (December only)	4,500	"
	36,500	"

8,500 tons are thus taken from the coking plants for heating in December in North Italy whilst the other 2,500 tons needed to make up the 11,000 tons as per para 19 shall be taken from the winter emergency reserve, which latter will be reduced accordingly from 26,500 to 24,000 as shown.

23. Col. Walker points out that a serious shortage of ships will occur during December for the carriage of Sardinian coal and therefore suggests that the Italian Government should make every effort with the respective Allied Authorities to obtain from the "pool" an allocation of ships at present engaged in the carriage of other merchandise.

Col. Walker stated that in view of the increased amount of coal to be imported including that for Switzerland, it will be impossible to discharge the full amount in North Italian ports and that the ships will have to be split up between the ports of Central and South Italy and stocks created at Venezia, S. Giuseppe di Cairo and with industrial concerns.

Dr. Mastrocinque remarked the difficulty does not lie in the discharging but only in the setting up of the stocks. This question should be studied at a meeting with the Allied Commission and with the assistance of the Importers with a view to reaching a conclusion on this important matter.

24. Col. Walker recommends that as far as North Italy is concerned the programme of allocations should be made out not only by category but also by regions and separately for foreign and Sardinian coal as well as for coke. This is necessary in order to arrange the shipping programme.

25. The next meeting of the Committee was fixed for 1 December at 0930 hrs at the Ministry of Industry and Commerce.

Declassified E.O. 12065 Section 3-402/NNDC No. 785021

COMMITTEE MEETING

The ordinary monthly meeting of the Coal Requirements and Allocation Committee was held at 1000 hrs on 12 November at the Ministry of Industry & Commerce.

Sig. Lombardo was in the Chair and there were present:

Mr. SULLIVAN
Col. WALKER
Maj. HARRIS
Maj. FENNINGS
Mr. REMBERT
Mr. PROCTOR
Mr. BECKINGHAM
Prof. GERBELLA
Dr. BLANCHINI
Eng. SANDULLI
Eng. NOTARIBERTI
Dr. MASTROCINQUE
Dr. TEDLIZZI
Eng. DONALISIO.
Mr. CASTELLI
Eng. FERRERO

1. The Minutes of the previous Meeting of 15 October 1945 were approved.

2. The programme of Foreign and Sulcis Coal, and Metallurgical Coke allocation for Central and South Italy and the Island was examined commencing with that for Sardinia. Col. Walker stated that the Allied Commission has no objection that an equal quantity of Sulcis Coal replaces the 2000 tons of Seui anthracite to be supplied as an additional quantity to the Sardinian electric power stations and that this quantity be shipped to the Mainland. Once the pithead is cleared of the existing stock of about 4.000 tons which is hindering production, the Seui mine should produce as much anthracite as possible.

3. With regard to the 650 tons of metallurgical coke allotted in the schedule for the lead industry to the Montevecchio and Monteponi plants it was decided to cancel this allocation having in view the recent arrival of 3.000 tons of metallurgical coke which will suffice for several months.

Col. Walker expressed the wish that the coke required for the reduction of the ore should be allotted to the S. GAVINO foundry of the Soc. Montevecchio as this one is the most modern.

Prof. Garbella mentioned however that the foundry at S. GAVINO is better equipped only so far as mechanisation is concerned, whilst the forced draft furnaces are the same as those of Soc. MONTECATINI, therefore it is presumed that there will be no greater economy of coke at the first named foundry for an equal quantity of [illegible]

1. The Minutes of the previous Meeting of 15 October 1945 were approved.

2. The programme of Foreign and Sulcis Coal, and Metallurgical Coke allocation for Central and South Italy and the Island was examined commencing with that for Sardinia. Col. Walker stated that the Allied Commission has no objection that an equal quantity of Sulcis Coal replaces the 2000 tons of Seui anthracite to be supplied as an additional quantity to the Sardinian electric power stations and that this quantity be shipped to the Mainland. Once the pithead is cleared of the existing stock of about 4.000 tons which is hindering production, the Seui mine should produce as much anthracite as possible.

3. With regard to the 650 tons of metallurgical coke allotted in the schedule for the lead industry to the Montevecchio and Monteponi plants it was decided to cancel this allocation having in view the recent arrival of 3.000 tons of metallurgical coke which will suffice for several months.

Col. Walker expressed the wish that the coke required for the reduction of the ore should be allotted to the S. GAVINO foundry of the Soc. Montevecchio as this one is the most modern.

Prof. Garbella mentioned however that the foundry at S. GAVINO is better equipped only so far as mechanisation is concerned, whilst the forced draft furnaces are the same as those of Soc. MONTEPONI, therefore it is presumed that there will be no greater economy of coke at the first named foundry for an equal quantity of mineral treated. Further, in view of the fact that the ore of S. Gavino has a strata predominately whereas that available at Montepon is of a chalky siliceous nature it is probable that the consumption of coke will be definitely inferior in the latter case.

In any case he suggested comparative tests of consumption and proposed that in the meanwhile, for the reason given, that the coke be equally divided between the two undertakings.

The Committee agreed and with that approved the proposed allocations for Sardinia.

4. The Sicilian programme was next discussed and Maj. Harris pointed out that the quantity of Sardinian Coal allotted to the Palermo electric plant is too low in proportion to foreign coal as from his experience this plant can use up to 50% Sardinian Coal.

Declassified E.O. 12065 Section 3-402/NNDC No. 485021

Ing. Sandulli pointed out that such a division does not depend on the characteristics of the plant but on the decision taken earlier to allocate a certain quantity of Sardinian coal to North Italy to replace an equal quantity of Foreign coal. This means that it was necessary to alter the previous proportions of foreign and Sardinian coal for Central and South Italy.

The Sicilian programme was then agreed to.

5. The Naples programme was then discussed and approved after Maj.Harris had been given certain explanations concerning the use of lignite from the MORCONE mine (Benevento) in the Campobasso gas works.

6. Col.Walker mentioned that he had noticed a tendency on the part of Italian Industry to use foreign coal as much as possible even in those plants where nationally produced fuels could be used. He suggested that every effort should be made to use lignite and other nationally produced fuels to the utmost even should the importation of foreign coal increase.

Upon this point Ing.Sandulli stated that for many years, through the medium of the National Association of Combustion Research, and in accordance with Government Legislation, every effort has been made to adapt existing plants and those under construction in such a way that they are capable of using foreign and nationally produced fuels, always so long as this is technically possible and economical. For that reason he emphasized that it is possible today to find plants capable of the highest efficiency.

Bearing on this, Maj.Harris asked if the engineers belonging to the National Association for the Combustion Control, are being used to the best advantage in supervising the use of nationally produced fuel as well as giving assistance to industrial consumers in North Italy as well as in Central and South Italy.

Mr.Lombardo mentioned that Ing.Sandulli is the technical chief of this Association and asked if having in view that the Association is under the control of Ministry of Industry and Commerce its engineers of the North Italian Branch could assist the Ufficio Carboni of Milan.

Ing.Sandulli replied that this is possible and that the request should be sent to the head office in Rome of A.N.C.C. which will give the necessary instructions.

7. Dr.Mastrocinque referred to the emergency stock to be kept with the FF.SS. of Naples as outlined in the programme and stated that the FF.SS. have no means of carrying out a strict watch over this; he asked therefore that the stocks should be under the charge of the industrialist group and that they should assume full responsibility.

Mr.Castelli agreed to the proposal but in view of the extra cost of discharge, supervision, ground rent, reloading into trucks which will fall on them asked that a different price should be agreed to on all coal lifted from "stocks".

Col.Walker stated in general he has no objection but requested that time be given to look into this matter.

8. The programmes were approved for Rome, Terni and Leghorn and Ancona.

9. The programme of allocation of lignite from the Ribolla mine was approved.

Mr.Castelli complained that on the basis of these programmes even

8071

Declassified E.O. 12065 Section 3-402/NNDC NO. 785021

and economical. For that reason he emphasized that it is possible today to find plants capable of the highest efficiency.

Bearing on this, Maj.Harris asked if the engineers belonging to the National Association for the Combustion Control, are being used to the best advantage in supervising the use of nationally produced fuel as well as giving assistance to industrial consumers in North Italy as well as in Central and South Italy.

Mr.Lombardo mentioned that Ing.Sandulli is the technical chief of this Association and asked if having in view that the Association is under the control of Ministry of Industry and Commerce its engineers of the North Italian Branch could assist the Ufficio Carboni of Milan.

Ing,Sandulli replied that this is possible and that the request should be sent to the head office in Rome of A.N.C.C. which will give the necessary instructions.

7. Dr.Mastrocinque referred to the emergency stock to be kept with the FF.SS. of Naples as outlined in the programme and stated that the FF.SS. have no means of carrying out a strict watch over this; he asked therefore that the stocks should be under the charge of the industrialist group and that they should assume full responsibility.

Mr.Castelli agreed to the proposal but in view of the extra cost of discharge, supervision, ground rent, reloading into trucks which will fall on them asked that a different price should be agreed to on all coal lifted from "stocks".

Col.Walker stated in general he has no objection but requested that time be given to look into this matter.

8. The programmes were approved for Rome, Bari and Leghorn and Ancona.

9. The programme of allocation of lignite from the Ribolla mine was approved.

Mr.Castelli complained that on the basis of these programmes even the supply of lignite is passing away from the merchants which is causing them serious financial loss. He pointed out that out of 24,000 tons discharged at Civitavecchia only 4,000 tons was handled by the merchants and that about 100 merchants have to make a living out of this. He fears that the allocation of lignite direct to consumers will constitute a precedent detrimental to the interest of the merchants.

Declassified E.O. 12065 Section 3-402/NND No. 785021

Mr. Lombardo drew Mr. Castelli's attention to the fact that the present is an interim period but once imports increase sufficiently it is expected that the Ministry will not have to enter into the allocation which will then leave the trade in a position to engage in its proper work.

10. Mr. Beckingham asked why in the allocations of lignite, only that of Ribolla is considered.

Prof. Garbella replied that at the present moment the distribution of all lignite is being studied, the reason that this has not been undertaken before is due to the precarious condition of transport. It is hoped at the next meeting to be in position to approve a distribution programme for all other lignites.

11. The proposed allocations for North Italy were next discussed.

Col. Walker did not agreed to the proposal to create a stock of 20.000 tons of coal for the electric power stations in North Italy.

Mr. Lombardo gave an assurance however that this quantity is obviously to be used only in case of need. Col. Walker then agreed.

12. Ing. Ferrero asked that in addition to the allocation of coal for the secondary railways, an allocation of 500 tons should be made to the port services.

Major Harris stated that up to the present, a monthly quantity of 600 tons had been supplied through the FF.SS. It was agreed to follow the same procedure in the future.

13. Ing. Notarloberti asked if coal allocations for the FF.SS. in North Italy should, as in the past, be made by the Allies or by the Italian Administration seeing that with effect from 1 November 1945 the railways have passed under the Italian Government. It was decided to follow in the future the same procedure of direct supply on the part of the Allies.

14. Distribution of metallurgical coke produced nationally was next discussed.

At the request of Sig. Lombardo, Ing. Ferrero stated that due to a modification of the plan, only 12,000 tons of coke would be produced during November. Of this quantity however, 2,700 tons would be required to meet the October requirements which latter cannot be cancelled in view of the importance of the work in hand and, also, according to Major Harris no reliance can be given to any coke being imported. The programme for the current month must therefore be based on 9,300 tons only.

In view of the importance of the manufacture of calcium carbide it has been decided to supply during December this industry with the following quantities to the detriment of the lime kilns,

Calcium carbide	3,000 tons
Pig iron foundries	3,000 "
Steel industry	2,500 "

Declassified E.O. 12065 Section 3-402/NRDC No. 785021

Major Harris stated that up to the present, a monthly quantity of 600 tons had been supplied through the FF.SS. It was agreed to follow the same procedure in the future.

13. Ing. Notarloberti asked if coal allocations for the FF.SS. in North Italy should, as in the past, be made by the Allies or by the Italian Administration seeing that with effect from 1 November 1945 the railways have passed under the Italian Government. It was decided to follow in the future the same procedure of direct supply on the part of the Allies.

14. Distribution of metallurgical coke produced nationally was next discussed.

At the request of Sig. Lombardo, Ing. Ferrero stated that due to a modification of the plan, only 12,000 tons of coke would be produced during November. Of this quantity however, 2,700 tons would be required to meet the October requirements which latter cannot be cancelled in view of the importance of the work in hand and, also, according to Major Harris no reliance can be given to any coke being imported. The programme for the current month must therefore be based on 9,300 tons only.

In view of the importance of the manufacture of calcium carbide it has been decided to supply during December this industry with the following quantities to the detriment of the lime kilns,

Calcium carbide	3,000	tons
Pig iron foundries	3,000	"
Steel industry	2,500	"
Non-ferrous metal foundries	800	"
	9,300	"

8070

Sig. Lombardo asked Ing. Ferrero to bring to the next meeting more precise information concerning the ripartition of coke.

At the next meeting the Committee will decide whether to start up the Bagnoli coke ovens or a second battery of Vetrocoke.

Declassified E.O. 12065 Sec. 3-402/NNDC NO. 785021

15. Item No. 4 on the Agenda "any other questions".

At the Committee meeting held on 15 October it was decided that as from 1 December 1945 the allocation of coal to the secondary railways should be made by the Ministry of Industry and Commerce instead of by FF.SS.

However, certain strong representations have been made by the National Association of railway and internal navigation to the effect that the previous procedure be continued.

Col. Walker stated that as the matter is one of a primarily economic nature this is one to be decided entirely by the Italian Government.

It was therefore decided to leave this to a Commission composed of Ministry of Industry and of the Central Coal office as well as the Treasury and Inspectorate General of civil travel which will meet in the near future at the Secretariat of the Coal Committee.

16. The request of the Istituto Poligrafico dello Stato at Foggia for an increase from 650 to 1,000 tons of Sardinian coal was approved which will however be substituted by an equivalent quantity of foreign coal i.e. 750 tons (the difference coming from the dump to be created at Naples) in view of the fact that due to transport reason only foreign coal will be sent to the Bari region commencing in December.

17. The request from the High Commissioner for Sicily for an increased quantity of coal for the railways was turned down and was followed by a statement by Col. Walker that Sicily is receiving already about 75% of its normal coal requirements whereas the rest of Italy is receiving only 33% about.

18. The request of the Soc. San Giorgio di Pistoia for a monthly allocation of 75 tons of foreign coal was agreed to, to be drawn from the Naples dump and to be used for construction and repair work of railway vehicles.

19. The request of Soc. Solvay for an increase of coal in order to increase by 50% the production of hydrated and carburated soda was approved in principle but the decision was put back to the next meeting.

20. With regard to winter heating it was agreed that this could be carried out only on a very limited basis and with the following categories:

1. Public health institutions
2. Diplomatic Corps
3. Public offices and schools

After discussion it was decided to give 11,000 tons coal to North Italy to be taken from the 45,000 tons suggested for the coke plants. Over and above the use of this coal for the items mentioned must be

Declassified E.O. 12065 Section 3-402/NNDC NO. 785021

was followed by a statement by Col. Walker that Sicily is receiving already about 75% of its normal coal requirements whereas the rest of Italy is receiving only 33% about.

18. The request of the Soc. San Giorgio di Pistoia for a monthly allocation of 75 tons of foreign coal was agreed to, to be drawn from the Naples dump and to be used for construction and repair work of railway vehicles.

19. The request of Soc. Solvay for an increase of coal in order to increase by 50% the production of hydrated and carburated soda was approved in principle but the decision was put back to the next meeting.

20. With regard to winter heating it was agreed that this could be carried out only on a very limited basis and with the following categories:

1. Public health institutions
2. Diplomatic Corps
3. Public offices and schools

After discussion it was decided to give 11,000 tons coal to North Italy to be taken from the 45,000 tons suggested for the coke plants. Over and above the use of this coal for the items mentioned must be supplemented by the use of lignite.

Also for Central and South Italy it was agreed on the proposal of Prof. Gerbella, the use of Ribolla lignite for the use of items above mentioned.

21. The allocation to the pumping station of Codigoro was omitted from the list, the previous allocation of 500 tons is confirmed for December and to be taken from the emergency stock.

Declassified E.O. 12065 Sec. 3-402/NNDC No. 785021

22. Having regard to the heating requirements for the month of December the quantity of coal to be allocated to the coke plants is reduced from 45,000 tons to 36,500 tons which it is decided to split up as follows:-

Ansaldo coke	4,500	tons
Forniccke	6,500	"
Cokitalia	15,000	"
Vetrocoke	6,000	"
Genoa Gas Works (December only)	4,500	"
	36,500	"

8,500 tons are thus taken from the coking plants for heating in December in North Italy whilst the other 2,500 tons needed to make up the 11,000 tons as per para 19 shall be taken from the winter emergency reserve, which latter will be reduced accordingly from 26,500 to 24,000 as shown.

23. Col. Walker points out that a serious shortage of ships will occur during December for the carriage of Sardinian coal and therefore suggests that the Italian Government should make every effort with the respective Allied Authorities to obtain from the "pool" an allocation of ships at present engaged in the carriage of other merchandise.

Col. Walker stated that in view of the increased amount of coal to be imported including that for Switzerland, it will be impossible to discharge the full amount in North Italian ports and that the ships will have to be split up between the ports of Central and South Italy and stocks created at Venezia, S. Giuseppe di Cairo and with industrial concerns.

Dr. Mastrocinque remarked the difficulty does not lie in the discharging but only in the setting up of the stocks. This question should be studied at a meeting with the Allied Commission and with the assistance of the Importers with a view to reaching a conclusion on this important matter.

24. Col. Walker recommends that as far as North Italy is concerned the programme of allocations should be made out not only by category but also by regions and separately for foreign and Sardinian coal as well as for coke. This is necessary in order to arrange the shipping programme.

25. The next meeting of the Committee was fixed for 1 December at 0930 hrs at the Ministry of Industry and Commerce.

MEMORANDUM

SUBJECT: Coal Requisitioning and Allocations Committee.

1. At a meeting of the above described Committee which was held on Monday, the 12th November 1945, allocations of coal supplies for the month of December 1945 were agreed as follows:-

Regions	Imports tons	Sardinian tons	coke tons
Sardinia	2,000	13,090	—
Sicilia	19,475	11,000	44
Napoli	18,895	1,380	1,034
Roma	20,655	5,410	194
Livorno	7,790	6,740	2,124
Bari	8,015	—	75
Ancona	3,170	—	87
TOTAL:	80,000	37,620	3,558
Northern Regions (including Emilia)	300,000	22,500	—
GRAND TOTAL:	380,000	60,120	3,558

2. In addition a total of 11,260 tons of lignite was allocated throughout Central and Northern Italy.

3. The revised allocation of coal supplies for the month of November which was necessitated by the large cut in deliveries of coal from the United States as a result of the strike of coal miners is shown on Appendix A) attached hereto.

4. It will be seen that the revised figure for Northern Italy was 112,000 tons, as compared with the original

8064

Declassified E.O. 12065 Section 3-402/NNDC NO. 785021

allocation of 246,000 tons. Shipments actually received or known to be en route have resulted in 50,000 tons of coal shipped in excess of the revised allocation for the Northern territory. The additional shipments are being allocated by the Northern Coal Committee in proportion to the difference between the original and the revised allocations.

Rome, 13th November 1945.

1. COAL MINING

a. Production:

(1) Production for the week ending 27.10.45 totaled 15373 tons of washed coal.

(2) Production for the week averaged 2562 tons per day which represents an average of 0.526 tons per man underground per day. North Group average was 0.470 tons. South Group average 0.545.

(3) Total average number of men actively engaged underground was 4870 for the week. It will be noted that the number of men underground has increased.

b. Coal shipments:

s/s "Itu", s/s "Teresa Schiaffino", s/s "Miseno", s/s "Gaeta" : Loading instructions for these colliers have been received for a total of 18.000 tons. The boats however have not as yet arrived at Sant'Antioco.

Capt. Charles G. McNaron from Washington was here last week. All available information mainly concerning facilities of food, clothing, shoes, has been given to him together with indications of production, labor, etc. Nuraxeddu shaft was visited, also new Hospitals, stores and Hotels.

Declassified E.O. 12065 Section 3-402/NNDC NO. 785021

(2) Production for the week averaged 2002 tons per day which represents an average of 0.526 tons per man underground per day. North Group average was 0.470 tons. South Group average 0.545.

(3) Total average number of men actively engaged underground was 4870 for the week. It will be noted that the number of men underground has increased.

b. Coal shipments:

Subject coal for ITALY.

AGWAR advises in COM 261 of 26 current that, as a result of recent US coal strikes, 52 out of 90 coal cargoes for ITALY, scheduled for September and October loadings failed to sail. Result will be to reduce November coal arrivals for ITALY by 200,000 tons or approximately 50%. This reduction will have most serious affect on Italian economy principally in industrial north where it is estimated unemployment will be increased 1 million. Main industries affected will be cement and brick making (for reconstructions purposes), textiles, rubber, heavy industries (turning out trucks and industrial machinery), chemicals, pharmeceuticals and fertilizers (for next years crops). Industry has no stocks of coal on hand as all imports have had to be consumed as soon as received. In addition, there will be no coal for domestic heating.

AGWAR has promised resumption of shipments as soon as possible but state that no pickup in shipments can be expected until 1 November. In view of repercussions of unemployment problem, the essential nature of industries affected and the lack of domestic ~~heat~~ heating, the November coal position for ITALY is causing us greatest concern. Immediate requirements are 200,000 tons run of the mine coal for general purposes similar to American high volatile coal now being shipped.

Please advise if release can be made of 200,000 tons coal for ITALY. If total amount not available, request any portion that can be released. Also, request dates and locations of release. In view of the extreme urgency of the situation, we will undertake movement to ITALY by the use of rolling stock and locomotives of this theater which would have been used to move coal from ports in ITALY if the coal had been shipped from the US and by seriously cutting our essential commitments. Upon receipt of your reply as to amount available, plan will be submitted to you for movement of coal to ITALY.

This is sent to you because the situation may become so critical as to involve the military and, also, because we understand that ECO does not control the entire coal production from the RUHR. Request, therefore, that you press this matter urgently on our behalf.

MEMORANDUM

26 October 1945

Subject: Coal Requisition and Allocation Committee

1. At the fourth meeting of the abovedescribed Committee, which was held on Monday, 15 October 1945, allocations of coal supplies for the month of November 1945 were agreed as follows:

	Imports	Sardinian Coal
Northern Italy, including Emilia	246,000 tons	- - -
Other Regions	54,000 "	52,310 tons
	300,000 tons	52,310 tons

2. An extraordinary meeting of the Committee was convened today, 26 October 1945, when it was reported that owing to the strike of coal miners in the United States of American, which had been in progress for about 20 days, it will not be possible to make the necessary shipments of coal to meet the allocations mentioned in Para 1 above.

3. It was announced that a cut of 136,000 tons was to be expected, this figure together with a shortage arising out of previous allocations of a further 68,000 tons, would involve an overall deficit of 206,000 tons for the month of November 1945.

4. It was stated that one tons of coal provided work for six men for one month, and on this basis it would seem that this cut in coal supplies would reduce the opportunities of employment of approximately 1,230,000 work people.

5. It is hoped that normal shipments of coal from the United States of American will be resumed in November, but these shipments will not, of course, arrive in this country until December and even then there is no possibility of making up the arrears.

6. A telegram is being dispatched to Washington today pointing out the seriousness of the situation and indicating the short deliveries in the month of November will undoubtedly result in widespread unemployment, particularly in the steel, mechanical, building materials, testiles, cotton, rubber, chemical and other industries.

8359

Declassified E.O. 12065 Section 3-402/NNDG NO. 785021

7. The Labor Sub-Commission representative recommended that if the cuts could not be avoided they should be spread over as wide a field of industry and localities as possible so as to avoid creating disproportionate pockets of unemployment. The Chairman, Colonel Evans of the Commerce Sub-Commission, took note of this suggestion and agreed that if no adjustment or curtailment of the proposed cuts could be secured, he, together with Dott. Lombardis of the Italian Ministry of Industry and Commerce, and a representative of Labor Sub-Commission, should consider the revised allocation of the coal supplies available with a view to minimizing the effect of the shortage from the point of view of unemployment.

8. At the same time it was decided to ask Washington to allocate 76,000 tons of anthracite coal which could be used in the manufacture of briquettes. It was stated that large quantities of anthracite were available in the U.S.A., and these could be shipped to this country subject to their economic use in Italy. This ancillary supply of anthracite coal would in some small measure offset the reduction in supplies of normal steam and coking coal.

1. COAL MINING

Following news given concerning "white strike" here, with report dated October 15, beg to inform :

(1) Ing. Rostand has returned to Carbonia.

(2) Strike virtually ended since Tuesday 16 October when South Group production went up again to 1806 tons.

(3) Miners not having the support of the "Camera del Lavoro" and of the Internal Committee restarted working regularly.

(4) Carbosarda on the other hand decided and informed the miners that those that were slackening the output would not be paid.

1. COAL MINING

a. Production :

(1) Production for the week ending 13.10.45 totaled 12,622 tons of washed coal.

(2) Production for the week averaged 2104 tons per day which represents an average of 0.468 tons per man underground per day. North Group average was 0.449 tons. South Group average 0.474.

(3) Total average number of men actively engaged underground was 4498 for the week. It will be noted that the number of man underground has increased.

b. White strike :

Since the 11th inst. there is a "white strike" at some of the South Group pits. The following figures indicate the production per man per day for the week.

	North Group	South Group	Total
Mon. 8th	0.424.	0.566	0.528
Tue. 9th	0.427	0.598	0.554
Wed. 10th	0.443	0.627	0.579
Thu. 11th	0.437	0.506	0.489
Fri. 12th	0.474	0.374	0.400
Sat. 13th	0.492	0.160	0.246

Declassified E.O. 12065 Section 3-402/NNDG NO. 785021

Carbosarda's officials fear that other pits will follow the example of those that have already slackened production. Dr. Chieffi left Carbonia some days ago and is now in Rome. Ing. Routan, who has been advised of the situation, is expected here to-day. The reason of the strike is mainly based on request for more food, secondly the men want clothes, shoes, etc. Also increased cost of bread and "pasta" has something to do with it. A certain number of men stretch their request to abolition of piece-work and some even ask that wages be paid without the reduction of income tax.

From latest news had it would appear that the "Camera del Lavoro" does not support this movement and that the Mine Committee throws the responsibility on a few miners who are causing the trouble.

c. Coal shipments :

The s/s Gaeta arrived today at S.Antioco. Lacking orders this office referred to Ministry of War Transport, Cagliari (Dr. Pernis) who, through CO.GE.NA., obtained and gave the following instructions :

6000 tons r/m mix -
2000 tons No. 4 - Destination GENOA

Same were immediately past on to S. Antioco.

APO 394

1. COAL MINING

a. Production.

(1) Production for week ending 8.9.1945 totaled 9.854 tons of washed coal.

(2) Production for the week averaged 1971 tons per day which represents an average of 0.432 tons per man underground per day. North Group average was 0.446 tons. South Group average 0.509.

(3) Total average number of men actively engaged underground was 4565 for the week. It will be noted that the number of men underground has decreased.

(4) Supply

The pit-props supply - with the arrival of s/s "Bornholm"(abt. 1020 tons), s/s 'Campidoglio' (abt. 130 tons), "Maria S." (abt. 70 tons), is for the time being satisfactory.

(5) The shipping situation is unsatisfactory. S/S Wisla is still at S. Antioco awaiting for orders and this office has not yet received any information as to desired cargo and destination.

2. METAL MINING.

No change.

(*) Giusta gli accordi presi con laCoal Division sono state detratte per novembre, 800 t. dall'assegnazione normale di fossile estero alla S.G.E.S. - Risulta, però, che, a tutto il 10 ottobre 1945, l'assegnazione straordinaria di carbone fossile estero di 5.500 t. relativa al mese di settembre non è stata soddisfatta. Data la ben nota grave situazione, è necessario che tale quantitativo venga fornito alla S.G.E.S.,oltre le 2.700 riconosciute in più sull'assegnazione di ottobre

Declassified E.O. 12065 Section 1-402/NNDC No. 8033

SUBJECT: Reports, weekly.

TO : Hq. Alcom, Industry Sub-Commission, Mining Division, APO 394

1. COAL MINING

a. Production:

(1) Production for the week ending 29.9.45 totaled 15245 tons of washed coal.

(2) Production for the week averaged 2540 tons per day which represents an average of 0.585 tons per man underground per day/ North Group average was 0.514 tons. South Group average 0.609.

(3) Total average number of men actively engaged underground was 4339 for the week. It will be noted that the number of men underground has increased.

(4) Coal Shipments:

Above figures indicate a steady increase in production which Carbosarda cohsiders can maintain in future. Actual stock at S. Antioco over 30.000 tons. S/S "Katingo" (5000 tons) completed loading this morning. Only boat advised to load is "Gaeta" (8000 tons) after which further colliers should be sent to S. Antioco and signalled in advance.

(5) Supply.

In consideration of the increased output of coal it is again recommended that special attention be given to supply of pit-props.

14 September 1945.

SUBJECT: Sardinian Coal Production, August 1945.

TO : AFHQ, Quartermaster Coal Section
APO 512, U.S. Army

1. Five copies are attached of the Consolidated Report on Sardinian Coal Production for August 1945.

2. A further small increase is noticed in the production. The average number of underground workers per day has increased to 4029.

3. Many of the new recruits arriving at the mines from Continental Italy are unsuitable for underground work. On the other hand an improvement in the number of suitable local recruits has been noticed.

4. During the month an acute shortage of mine timber was felt owing to delay in shipments from Calabria. This position was relieved at the beginning of September. The future timber position given rise to some anxiety since the change over from Military to Civilian procurement channels may possibly be attended by a period of inertia in excess of that for which provision has been made. The possible period of inertia is not counterbalanced by a reserve at the mines.

8021

0678

Declassified E.O. 12065 Section 3-402/NNDC NO. 795021

5. Attention is again drawn to the coal stock on hand which has increased by about 5,000 tons.

6. Loading of ships has been delayed through a lag in the receipt of shipping instructions owing to a complete breakdown in telegraphic and telephonic communications between the mainland and Sardinia. The most serious lag was the case of S/S "Wisla" which berthed at S. Antioco on 29 August and shipping instructions had not reached Sardinia by 10 September. It is understood that Coal Division, A.C. has made the strongest representation on the subject.

1. COAL MINING

a. Production :

(1) Production for the week ending 22.9.1945 totaled 13910 tons of washed coal.

(2) Production for the week averaged 2318 tons per day which represents an average of 0.546 tons per man underground per day. North Group average was 0.475 tons. South Group average 0.571.

(3) Total average number of men actively engaged underground was 4248 for the week. It will be noted that the number of men underground has increased.

(4) Supply.

Carbosarda indicated a stock of about 48.000 lin. meters of pit props, sufficient for about 20 days work.

(5) Coal allocation, Sardinia.

Maj. Pirola, High Commissioner's office, Cagliari, stated that Mining Division increased the Sulcis coal allocation from September to December to 15.000 tons monthly. This office and Carbosarda would appreciate receiving confirmation.

(6) Coal shipments:

All advised steamers excepting the "Iberia" have been loaded. It is recommended that more tonnage be sent to S. Antioco to load and instructions be forwarded in advance. S/S "Edera" now at S. Antioco but no loading instructions have as yet been received.

27 August 1945

Ref: 319.13212

Subject: Reports, Weekly

To: Hq Alcom, Ind. Sub-Commission, Min. Div, APO 394

1. COAL MINING

a. Production.

(1) Production for week ending 25 August 1945 totaled 14,493 tons of washed coal (7 days worked).

(2) Production for the week averaged 2070 tons per day which represents an average of 0.503 tons per man underground per day. North Group average was 0.418 tons. South Group average 0.533.

(3) Total average number of men actively engaged underground was 4116 for the week. It will be noted that the number of men underground has increased.

(4) Supply.
The mines have now been without pit-props for a full week. Local mine timber is being used where possible. A sixty day reserve should be provided without delay. Approximately 200,000 lin meters should be provided for this purpose. This in addition to normal requirements.

If channels for procurement of supplies are changed from military to civilian, full consideration should be given to the inertia of civilian channels. Adequate supplies of expendable items should be arranged for the bridge over the change-over period.

Sulla

0 6 8 7 1

Declassified E.O. 12065 Section 3-402/NNDG NO. 785021

Attention invited to situation on fuse. Approximately one week's supply on hand as of even date.

b. Administration.

The financial condition of the Coal Company remains critical pending an increase in the sellin g price of coal. The clerks were due to be paid today (27 Aug.) but they cannot be paid because of insufficient funds.

It was recommended some 18 months ago that consumer items of goods such as clothing, shoes, dress goods, notions, etc. be placed in the local stores and sold under strict control in order to restore in some degree the purchasing value of the money received by the miners as wages. Until this is accomplished it is absolutely useless to continue raising wages or giving the miners outright gifts of cash as premiums under one pretext or the other. At present large quantities of fuse are being stolen from the mines and unraveled to obtain the cotton thread from which they are making cloth tops for shoes and other articles which the people urgently need. Explosives are also being stolen for sale to the fishermen who use the explosive to illegally procure fish.

Control of these items is practically impossible since there exists little or no discipline in the mines. Normally the miners could be required to pass through the wash-house for a bath and change of clothing before going home but since they have no soap or the necessary change of clothing it is useless to process them through the wash-house. This procedure would minimize thefts.

Infant mortality and the venereal rate are far above normal in the area because of shortage of suitable food for special diets and medicines. The number of Doctors available is adequate but they are helpless without the necessary drugs and medicines, therefore the majority of them have gone vacationing.

The above information may explain in part why labor from the Continent is unwilling to remain here. The majority of the workers who came from the Continent recently have been subsequently provided transport back to the Continent. The experiment was very costly to the Coal Company. Incidently the Coal Company was in no way at fault.

0888

Declassified E.O. 12065 Section 3-402/NNDG NO. 785021

As a matter of information to all concerned the prospects of a substantial increase in the production rate of coal from Sardinia in time to meet the heavy demands of the coming winter are practically nil and from the personal observation of this Officer the situation shall remain status quo until the Italian Government decides to give coal production priority over politics. Drastic immediate action must be taken to provide labor and facilities for taking care of the new men if coal production is to be achieved.

PROGRAMMA DI RIPARTIZIONE DEL COKE METALLURGICO CHE SARA'
PRODOTTO IN ALTA ITALIA DURANTE LA FINE DEL 1943 DI
~~CUI~~ VALUTATO IN TONN. 24.000 COMPLESSIVE

(secondo gli accordi intervenuti nella riunione indetta dai Comitati interessati)

Siderurgia	tonn.	12.000
Lavorazioni del ferro	"	5.000
Materiali non ferrosi	"	1.300
Pietre e terre	"	3.200
Chimica	"	1.000
Elettrotecnica	"	600
Varie	"	900
	tonn.	24.000

Questa produzione dovrebbe essere ottenuta facendo funzionare per 40 giorni complessivi fino alla fine di ottobre le cokerie :

Vetrocoke con un consumo di tonn. 7.500 di carbone da coke
Fornicoke " " " " " 15.00 " " " "
Ansaldocoke" " " " " 7.500 " " " "

La decisione di no, accendere la cokeria della Fornicoke e di fare funzionare invece quella dell'Azienda Municipalizzata del Gas di Genova per un consumo mensile di sole 4.200 tonn. porta alla conseguenza che invece di tonn. 24.000 ne avremmo 14.400 sole di coke disponibili; quindi è necessaria una revisione del programma, anche nel caso che l'Azienda Municipalizzata si facesse funzionare per tonn. 3.400 mensili, nel qual caso la produzione di coke da 14.400 sarebbe di 17.500.

Per vedere di sopperire alla produzione di coke che verrebbe a mancare si vedrà se sia possibile far funzionare parzialmente la Fornicoke in modo da fornire solo il gas necessario per la Centrale e non quello che l'Assegno non può consumare.

Declassified E.O. 12065 Section 3-402/NNBC NO. 785021

Subject : Coal Requisition and Allocation Committee

To : See Distribution

1. Please note that the third meeting of the Coal Requisition and Allocation Committee will be held at this Headquarters at 11:30 hrs on Saturday 15 September 1945.

2. Agenda:-

1) To invite the Representative of the Italian Government to take the chair.
2) To confirm Minutes of the last Meeting.
3) To receive and consider Coal & Coke Allocations for the month of October for Sicily, Southern & Central Italy and North Italy, to be laid before the Meeting by the Italian Government Representative.
4) To discuss the distribution and control by Italian Government of Coke to be produced by cokeries of the North.
5) To confirm handing over to Italian Government the distribution, control and recording of lignites production as from 1st August. A.C. to be provided by 15th of each month, commencing Sept. 15th, with following informations:-

(a) Programme for following month
(b) Statement of output and disposals for previous month
(c) Forecast of output for next three succeeding months.

6) To discuss provision by Italian Government to A.C.H.Q. of the following informations:-

(a) By noon every Tuesday by areas according to ports of entry: (viz : Sicily, Naal, Naples, Rome, Leghorn/(Piombino), Ancona, Genoa/Savona and Venice) weekly consumption and stocks by categories of consumers, pluscoal undischarged remaining on board ships in port ;

2. Agenda:-

1) To invite the Representative of the Italian Government to take the chair.

2) To confirm Minutes of the last Meeting.

3) To receive and consider Coal & Coke Allocations for the month of October for Sicily, Southern & Central Italy and North Italy, to be laid before the Meeting by the Italian Government Representative.

4) To discuss the distribution and control by Italian Government of Coke to be produced by coke ries of the North.

5) To confirm handing over to Italian Government the distribution, control and recording of lignites production as from 1st August, A.C. to be provided by 15th of each month, commencing Sept. 15th, with following information:-

(a) Programme for following month
(b) Statement of output and disposals for previous month
(c) Forecast of output for next three succeeding months.

6) To discuss provision by Italian Government to A.C.H.Q of the following information:-

(a) By noon every Tuesday by areas according to ports of entry: (viz : Sicily, Moel, Naples, Rosc, Leghorn/(Piombino), Ancona, Genoa/Savona and Venice) weekly consumption and stocks by categories of consumers, plus coal undischarged remaining on board colliers in port .

(b) By 15th day of every month, a summary, based upon Completion Reports, showing distribution of all coal discharged in the previous month, by port areas as in (a) above and classified according to categories of consumers, both civil and military, for comparison with approved plan. Detailed instruction to be issued by Coal Division.

7) Any other business.

8) Date of next Meeting. (N.B. The Italian Government will, in future, be responsible for calling meetings of this Committee, and for providing all relevant papers).

Cutts

1. The minutes of the 1st meeting on July 31st were approved.

2. September Allocations

Schedules of allocations of imported and Sardinian coal by categories of Industry and Regions were laid before the Meeting and approved. It was agreed that in making detailed allocations, Regional Commissioners might make minor adjustements providing that the total quantity allotted to the Region was not exceeded, and priorities were not departed from.

The programme of coke and coking coals was approved.

3. October Allocations

No information was yet available on October deliveries, but it was agreed that plans for October allocations should be made by the Italian Government on the same quantity basis as for September.

4. Gas and Domestic Coal

The Chairman explained that coal was being provided by the Allies in order to reduce unemployment. It was estimated that one ton of coal used in Industry would provide employment for one man for 6 months. Any coal taken away from Industry would therefore increase unemployment correspondingly.

Both questions were referred to the Italian Government representatives for discussion and decision at the next meeting. It was agreed however that in any case reactivation of Gas Works in the North would not take place before November 15th, but Regional Commissioners may at their discretion use small

Declassified E.O. 12065 Section 3-402/NNDC NO. 78502

quantities of coal for pre-heating prior to that date.

5. It was stated by the Chairman that Allied Commission would, on 15 September, hand over the responsibility of coal distribution throughout Italy, except Venezia Giulia and certain other small areas, to the Italian Government.

Dr. Lombardo stated that the Italian Government were actively engaged in preparing for this transfer. He explained that it was the intention to retain the present system whereby:-

a) in Central and Southern Italy and Sicily, the Ministry of Industry and Commerce would prepare plans for the distribution of coal, coke and lignite, and
b) a Government Coal Office would perform the same duties for the North.

Both would submit their recommendations to the Rome Requirements and Allocations Committee for final decision at its monthly meeting.

The Allied Commission would continue to be available for advice and any necessary assistance. It would remain responsible for procurement of coal and coke from the supplying Governments, and for notifying the Italian Government as early as possible of tonnages available monthly for civilian purposes.

Collection of payment would continue to be done by the Agenzie Marittime of the Central Coal Office and this system would be extended to the Northern Ports.

6. The date of the next meeting was fixed for September 15th at AC Headquarters, at 1200 hours for the purpose inter alia of approving October allocations for the whole of Italy. At that meeting the chair would be handed over to the representative of the Italian Government.

1. COAL MINING

a. Production.

(1) Production for week ending 1.9.1945 totaled 12,888 tons of washed coal.

(2) Production for the week averaged 2148 tons per day which represents an average of 0.519 tons per man underground per day. North Group average was 0.470 tons. South Group average 0.537.

(3) Total average number of men actively engaged underground was 4135 for the week. It will be noted that the number of men underground has increased.

(4) Supply

The mines continue to remain w/o pit props. However a shipment was expected to arrive at S. Antioco on 3 September 1945.

(5) The shipping situation as pertains to coal carrying transport has again deteriorated. The last three ships which have arrived at S. Antioco found this office without advance information as to desired cargo or destination. The most recent example of the unsatisfactory situation is the s/s "WISLA" which arrived 19 August 1945 and as of the date of this report no instructions have been received although requests went forward by signal when we were unable to call Rome by 'phone.

2. METAL MINING.

Subject : Coal Negotiation and Allocation Committee

To : See distribution.

1. Please note that the second meeting of the Coal Negotiation and Allocation Committee will be held at this Headquarters at 1200 hrs on Thursday 30th August 1945.

2. Agenda:-

1) To confirm minutes of first meeting held on July 31st 1945.
2) To consider:-

(a) Allocations for September - Appendices "A" & "B"
(b) Coking programme August/October - Appendix "C"
(i) Coke 15,000 tons
(ii) Coking coals 6300 plus 8,900 September arrival

3) To consider October allocations (if received)
4) To consider reactivation of Gas Works in Northern Italy from October 1st.
5) To consider policy to be followed on domestic heating for winter months in Northern Italy
6) To receive proposals of Italian Government on the takeover by them of distribution of civilian supplies of coal in Italy from September 15th excluding Venezia Giulia
7) Date of next meeting
8) Any other business.

Ref. AC/5651/IND 8 August 1945

SUBJECT: Supply of Electric Power and Coal to Nero Montoro Plant, Terni Co.

TO : Director
Agriculture Sub-Commission

1. This refers to yours of 7 August.

2. We have on numerous occasions already pointed out both verbally and in writing to this company that there is no coal at present available in quantities large enough to permit reactivating their coke ovens at Nero Montoro, the minimum monthly requirements of which are 6000 tons.

3. Terni Co. has recently appealed also to the Labor Sub-Commission, through which channel we have already given a similar reply. Industry Sub-Commission's desire to produce as much nitrogenous fertilizer as possible is well known to all concerned, and no further importuning by Terni can alter Italy's misfortune in lacking coal.

4. Unfortunately for this company it is not placed favorably from the standpoint of either transportation or of utilization of its coke by satellite industries, and, therefore, the coke ovens at San Giuseppe di Cairo and Porto Marghera in the North have both been given a higher priority. These two plants are slated for reactivation at half capacity by next September. Thereafter, if a third coke oven in Italy is reactivated, it will be Terni's plant at Nero Montoro.

5. The supply of coal to Nero Montoro is not to be confused with the 600 tons of coke which this Sub-Commission has been vigorously trying to get allocated to subject company's other plant at Papigno where calcium carbide and calcium cyanamide can be made.

6. However, in view of the critical shortage of calcium carbide and the fact that calcium cyanamide is the heaviest consumer of electric power, it is not proposed to make the latter until the minimum essential demands for calcium carbide have been covered.

Sig. Landi	do			

1. The Chairman apologized for the unavoidable absence of Brig. D.L. Anderson, CBE, Deputy Vice-President, Economic Section, who was attending a conference in London. He regretted that the meeting had been called so late in the month but explained that the procurement authorities in Washington and London had been late in forwarding importation programme.

2. July Allocations

It was explained that owing to late notification of importation figures it had not been possible for the Committee to meet and discuss July allocations, and recommendations submitted by the Milan Coal Committee for the North had been acted upon to save time.

7993

3. August Allocations

A schedule of allocations by categories of industry and by regions representing the Milan Coal Committee's views for the North was before the meeting. Pending further reports, it was agreed to transfer 5,000 tons in Lombardia and 4,000 tons in the Piemonte Regions from chemicals to general engineering, and to approve the schedule as thus amended.

Declassified E.O. 12065 Section 3-402/NNDC NO. 785021

4. Coke

The Chairman explained that the policy was to import coking coal instead of coke for three reasons :-

(i) to save shipping space,
(ii) to obtain valuable bye-products, and
(iii) to provide employment for the Italian cokeries.

The coke would be largely utilized for the steel programme starting in September. It had been ascertained from tests that U.S. Low Volatile Coal was suitable for coking and one cargo of such coal was being set aside for this purpose in August. There was also one cargo, approximately 8,000 tons, of coke arriving during August.

5. September allocations

It was reported that a quantity of over 200,000 tons was likely to be made available for the North. There would be no increase in the usual 40,000 tons programmed for the South. The Ministry of Industry & Commerce were requested promptly to prepare recommendations for the allocations of the latter tonnage.

6. October through December

The Ministry of Industry & Commerce were requested to prepare forward estimates for the South & Centre. Any requests for reactivation of further plants would be discussed by them with Industry Sub-Commission and if approved, included in the forward estimates.

7. Electricity

It was reported that Public Utilities and Works Sub-Commission had

Declassified E.O. 12065 Section 3-402/NNDC NO. 185021

to be made available for the North. There would be no increase in the usual 40,000 tons programmed for the South. The Ministry of Industry & Commerce were requested promptly to prepare recommendations for the allocations of the latter tonnage.

6. October through December

The Ministry of Industry & Commerce were requested to prepare forward estimates for the South & Centre. Any requests for reactivation of further plants would be discussed by them with Industry Sub-Commission and if approved, included in the forward estimates.

7. Electricity

It was reported that Public Utilities and Works Sub-Commission had agreed that there was no necessity, owing to the ample availability of hydro-electric power in North Italy to supply coal to Thermal Stations.

8. Gas and Domestic Coal

It was stated that the question of reactivating Gas Works in the North would be the subject of a recommendation of the Milan Coal Committee at the next meeting. In Southern & Central Italy a quantity of 18,000 tons of Gas Coal monthly was being supplied to Gas Works giving a daily ration

Declassified E.O. 12065 Section 3-402/NNDC NO. 785021

of approximately 5 hrs gas. The question of domestic coal for the North would also be investigated by the Milan Committee. No domestic coal apart from surplus lignite had been supplied for the South. All coal used for gas production and domestic purposes meant less for industry, with consequently increased unemployment.

9. Channels for Demands - Southern & Central Italy

The Chariman emphasized the necessity for requests for coal by private firms and others being properly channeled. It was agreed that the following procedure be adopted:-

Requests to be made to the Ministry of Industry & Commerce who will screen them and pass them on with recommendations and comments to Industry Sub-Commission. The latter in turn will pass them to Coal Division with their recommendations.

Similar demands for Northern Italy should be sent to Regional Commissioners for transmission with recommendations to the Milan Coal Committee.

10. Mr. Sachs expressed satisfaction that the coal allocations were being made on a basis of giving the fullest possible employment. He emphasized the necessity of allocating coal to industries engaged in reconstruction work e.g. steel and cement.

DISTRIBUTION :-

20 August 1945.

SUBJECT: Labor, Recruitment.

TO : Hq Alcom, Industry Sub-Commission , Mining Division

1. Further to the comments conveyed in our weekly report of 18 Aug., the following information is fowarded.

2. Three hundred and seventy-nine (379) men arrived in Sardinia presumably to work in the coal mines. Of these, three hundred and thirty nine (339) reported to the mined and registered. Forty are therefore unaccounted for and it is believed they are actively engaged in thievery and/or black market operations.

3. Two hundred and thirteen (213) of the men who did arrive and register have requested transportation back to the mainland. The forty unaccounted for are also to be returned if and when they may be rounded up by the local authorities. This adds up to the loss of two hundred and fifty-three (253) of the original three hundred and seventy-nine (379).

4. Generally the men have refused to accept employment because of promises to give them clothing and shoes which are absolutely not available. Others were told they would be given clerical positions and too many clerks are already employed.

5. It may be said, however, that this large group of enthusiastic workers did accomplish one outstanding feat. They immediately organized a sub-section of the Associazione Nazionale Partigiani d'Italia which seems to have been the only political faction mission in this area prior to their arrival.

APO 394, U.S. Army

1. COAL MINING

a. Production.

(1) Production for week ending 18 August 1945 totaled 8,044 tons of washed coal (4 days worked).

(2) Production for the week averaged 2011 tons per day which represents an average of 0.[illegible]60 tons per man underground per day. North Group average was 0.447 tons. South Group average 0.518.

(3) Total average number of men actively engaged underground was 4023 for the week. It will be noted that the number of men underground has increased.

(4) Supply situation re pit props critical. Mines are currently using anything they may find as pit props. Delivery of a steady supply of mine timber is absolutely essential to continued production of coal. Fatality rate is up perhaps because of inexperienced timber-men.

b. Administration.

7980

(1) The recent arrival of 379 men from the Continent to work in the coal mines is not reflected in the number of men reported as underground workers. Investigation as to why a corresponding increase was not reflected disclosed that men that were recruited on the Continent were promised complete outfits of clothing including shoes and the coal company at this time is not in position to carry out promises made to these men. Many of these men

0737

Declassified E.O. 12065 Section 3-402/NNDG NO. 7850021

were clerks. We do not need clerks. Approximately 250 of the 379 men who arrived a few days ago have already requested transportation for return to the Continent. This same group of some 250 men have refused to go to work until promises made have been fulfilled. In the meantime they must be fed and quartered at coal company expense. During the 90 day period prior to the arrival of workers from the Continent approximately 1800 new men had been employed locally. Statistics indicate a net gain of approximately 700 men for the same period. On the basis of the record to date the recruitment of labor for work in the mines is unsatisfactory..

2. METAL MINES.

a. Although we have demands for additional production of paint pigments it is becoming increasingly difficult to negotiate equitable prices because of the current inflationary situation. The supplies of paint pigments are now asking for prices well above world market prices in order to gain at least an even break on actual costs. Increased wages, premium for this and that declared by the Italian Government and directly reflected in the selling prices of all products from the mines. The latest Premium declared by the Italian Government is called "Premium for Liberation" which amounts to 3000 lire per worker. This sum to the individual is relatively small as far as the individual is concerned but collectively for all of Italy it represents a factor which may only render more serious the present inflationary cycle. Demands are currently being made for a so called "Peace Premium" which would be followed by the usual gratuities for the Holiday Season at Christmas. Christmas gratuities amount to one week's pay for workers and one month's pay for clerks.

b. As a matter of information we are advised that the Commissariato Prezzi Alta Italia located in Milano have established the following prices on minerals: Zinc 68, Lead 62, Silver 10,000, Copper 180, Aluminium 150, Pig Iron 12, Steel 16, and Sheet steel 29. All prices in lire per kilogram.

1. COAL PRODUCTION.

a. Production

(1) Production for week ending 11 August 1945 totaled 12.244 tons of washed coal.

(2) Production for the week averaged 2041 tons per day which represents an average of 0.526 tons per man underground per day. North Group average was 0.483 tons. South Group average 0.541.

(3) Total average number of men actively engaged underground was 3881 for the work. It will be noted that the number of men underground has increased.

(4) Supply situation generally satisfactory with the exception of pit props. Carbosarda reports as of even date 4000 lin. meters imported mine timber and 2000 lin. meters local timber remaining in stock. This is sufficient for about three (3) additional days production.

b. Administration.

(1) We attache copy of June operating statement for your information. Please note that coal is currently being sold at approx. 50% of its production cost.

(2) Visitors during the past week were

gaged underground was [illegible] that the number of men underground has increased.

(4) Supply situation generally satisfactory with the exception of pit props. Carbosarda reports as of even date 4000 lin. meters imported mine timber and 2000 lin. meters local timber remaining in stock. This is sufficient for about three (3) additional days production.

b. Administration.

14 August 1945.

SUBJECT: Sardinian Coal Production, July.

TO : AFHQ, Quartermaster Coal Section
APO 512, U.S. Army.

1. Reference the attached copies of Consolidated Report from Sardinia, month of July.

2. Production for the month was the highest reached since Allied control. The average number of inside workers per day has increased to 3,750 with more being shipped from the Mainland to Sardinia at regular intervals.

3. Mine timber still remains the chief supply necessity. Shipments have been slow in arriving and to date the small amounts delivered have never allowed a stockpile of over three weeks supply to accumulate.

4. All possible reclaimed coal has been recovered.

5. Attention is called to the stock on hand, 37,198 metric tons. Because of the financial conditions of the coal company, the continued maintenance of stocks above 20,000 metric tons creates a financial hardship.

7374

Unclassified E.O. 12065 Section 3-402/NNDG NO. 785021

6. The political situation appears to be fairly well under control and the present management are to be complimented for their success in increasing production and controlling labor.

1. COAL MINING.

a. Production.

(1) Production for week ending 4 August 1945 totaled 12.187 tons of washed coal.

(2) Production for the week averaged 2031 tons per day which represents an average of 0.532 tons per man underground per day. North Group average was 0.469 tons. South Group average 0.557.

(3) Total average number of men actively engaged underground was 3817 for the work. It will be noted that the number of men underground has decreased.

(4) Supply situation generally satisfactory with the exception of pit props. Estimated six days stock now on hand.

b. Administration.

(1) Repeated requests have been made to the Management of the coal company to furnish this office with an operating statement covering either the month of June or July. The information is desired to assist the Management in taking immediate action to solve their present financial difficulties. Apparently this information is either not available or the management is reluctant to

Declassified E.O. 12065 Section 3-402/NNDC NO. 785021

underground per day. North Group average was 0.469 tons. South Group average 0.557.

(3) Total average number of men actively engaged underground was 3817 for the work. It will be noted that the number of men underground has decreased.

(4) Supply situation generally satisfactory with the exception of pit props. Estimated six days stock now on hand.

b. Administration.

(1) Repeated requests have been made to the Management of the coal company to furnish this office with an operating statement covering either the month of June or July. The information is desired to assist the Management in taking immediate action to solve their present financial difficulties. Apparently this information is either not available or the management is reluctant to provide the requested data. Partial information has been promised for delivery today.

(2) The pit props situation is currently worse than usual due to non-delivery of operating requirements. The North Group of mines have show slow but steady improvement in the production rate. If pit props are not made available before present limited stocks are exhausted it may set North Group back a full month in their efforts to increase the production effort.

2. METAL MINES.

No change from previous report.

Ref. 319.13032

SUBJECT : Reports, Weekly

TO : Lt Alman, Industry Sub-Commission, Mining Division, APO 394, U.S. Army.

1. COAL MINING

a. Production.

(1) Production for week ending 28 July 1945 totaled 11,753 tons of washed coal.

(2) Production for the week averaged 1966 tons per day which represents an average of 0.580 tons per man underground per day. North Group average was 0.420 tons. South Group average 0.542 tons.

(3) Total average number of men actively engaged underground was 3376 for the week. It will be noted that the number of men underground has increased.

(4) Supply situation generally satisfactory with the exception of pit-props.

1864

(5) Administration :

a) Recent checks on wages being paid the men indicate maximum total earnings of 14,000 lire per month, average monthly earnings of 8,000 lire per month, and minimum wages of 4,500 lire per month. These figures include all earnings from bonuses, piece-work and home fire. Knowledge of high wages in the coal mines is causing an unfavorable reaction among employees in other industry, especially the metal mines.

b) Reference is made to previous reports on the unsatisfactory financial situation of Carbosarda. The office workers were not paid on the 27th as is customary. As of the date of this report they still had not been [illegible]. It is understood by the

Declassified E.O. 12065 Section 3-402/NNDC NO. 795021

day which represents an average of [illegible] underground per day. North Group average was 8.422 tons. South Group average 8.542 tons.

(3) Total average number of men actively engaged underground was 3870 for the week. It will be noted that the number of men underground has increased.

(4) Supply situation generally satisfactory with the exception of pit-props.

(5) Administration :

a) Recent checks on wages being paid the men indicate maximum total earnings of 14,000 lire per month, average monthly earnings of 6,000 lire per month, and minimum wages of 4,500 lire per month. These figures include all earnings from basic pay, piece-work and bonus ffts. Knowledge of high wages in the coal mines is causing an unfavourable reaction among employees in other industry, especially the metal mines.

b) Reference is made to previous reports on the unsatisfactory financial situation of Carbonaria. The office workers were not paid on the 27th as is customary. As of the date of this report they still had not been paid. It is not difficult to understand why the situation exists when we assume that some 7500 persons are on the payroll at an average of about 8,000 lire monthly which make a payroll of 60,000,000 lire monthly. Against this we may assume 10,000 tons production at 1,000 lire per ton which make 10,000,000 lire or a monthly deficit of 20,000,000 lire. This does not take into consideration the other very extensive obligations of the Company.

2. MENTAL ATTITUDE:

A demand has been received requesting that contracts be placed for a further 9 months supply of pulpit pigments. The conditions under which this may be accomplished has been forwarded in a separate letter.

RRF : L&C/503

31 July 1945

MEMORANDUM TO MR. BRAINE:

Subject: Coal Committee Meeting.

1. Mr. Proctor and I attended the first meeting of the Coal Requirements and Allocations Committee.

2. This committee is the top allocation committee for coal in Italy. Tentative allocation for Central and Southern Italy are submitted to the Italian Government for comment, while similar allocations for Northern Italy are submitted to the Milan Committee through AMG. Attached hereto are the allocations already delivered for July and the allocations for August. The allocations for July were met with a slight overage. There was a slight change in the allocations for August for reasons not material here.

3. It is the policy of the committee to make allocations on the basis of obtaining the greatest amount of employment. In this connection I suggested that top priority should be given to industries manufacturing raw materials for public works and reconstruction, particularly cement and lime. The officer representing Industry Sub-Commission stated that these materials consisted of cement, lime and steel. With respect to cement and lime these could be produced by turning on the tap. He guaranteed that adequate coal had been allocated to this industry and that should the public works program expand, there would be a re-allocation sufficient to produce all the cement and lime for which there is a demand. The steel program, however, was a little more difficult inasmuch as it involved the phasing of other factories such as pig iron and coke. Plans were being made to produce as much construction steel as they possibly could.

4. Colonel Evans stated that for September the import program would probably consist of 370,000 tons of which 200,000 would be available to the North as against 149,365 for August.

TEL. : Ext. 204

REF. : LSC/503 10 July 1945

SUBJECT : Carbide Manufacturing Plant at Terni

Gentlemen:

You wrote to this Sub-Commission on 16 July requesting our assistance in arranging for the allocation of 2,500 tons of coal per month for the production of carbide at Papigno (Terni).

You will be aware that coal is one of Italy's most pressing needs, and the demand far exceeds the supply. Such supplies as become available are allotted very carefully in the light of the importance of the particular industries which have made demands, the number of people employed by those industries, and the relative value of these industries in the general economy of Italy.

The correct procedure is for any requests for coal allocation to be presented for consideration to the Coal Committee of the Ministry of Industry and Commerce. Perhaps, therefore, you will stress to the Ministry the importance you attach to the supply of coal to Terni. In the meantime this Sub-Commission has noted your representations and should we be approached by the Coal Committee we shall be glad to comment on the application.

Yours very truly,

K. H. BRAINE
Director,

Subject : Coal supplies for Rapigno (Terni)

To : Brigadier ARDERON
Deputy Vice President
Economic Section.

1. I enclose original and translation of letter dated 16th July from the Italian General Confederation of Labour regarding allocation of coal to the carbide manufacturing plant at Terni.

2. Agriculture Sub Committee are assume interested in the firm's products and may wish to support the request for coal allocation.

3. In view of the allegation that unemployment is imminent at the Terni works and of the relationship between the Labour Sub-Commission and C.G.I.L. I should be glad if you could give me the basis of a reply to the Confederation's letter.

W. H. Evans

ITALIAN GENERAL CONFEDERATION OF LABOUR
GENERAL SECRETARIAT

Prot.n°10650 V/Ind/5 Rome, 16 July 1945

TO : the ALLIED COMMISSION
Labour Sub-Commission

and, for information:

TO : the MINISTRY OF INDUSTRY AND COMMERCE
LABOUR
RECONSTRUCTION
AGRICULTUR

A plant for the production of carbide and the transformation of this product in calcio-cyanamide is operating in Papigno, a suburb of Terni, since a few days after the liberation.

This has been possible by making use of a few stocks of fuel which were available for the "Terni" Co at the moment of the liberation of that region. But now there is the danger that = as soon as the fuel stocks are exhausted = the operation of the plant may stop, reducing to unemployment its 1.500 employees.

It must be reminded that the production of cyanamide is needed for our agriculture! Therefore, to the damnage of the workers' unemployment there would be added that of endangering the agricultural production of the country.

The CGIL, being as much zealous for the workers' interest, who would suffer unemployment, as it is anxious about the agricultural economy of the country, is endorsing the request made by the Confederal Labour Chamber of Terni, of an allotment of at least 2.500 tons of coal per month. This amount of fuel is necessary to go on with the production of carbide and of cyanamide in the plant of Papigno (Terni).

With thanks and kind regards, we remain

Yours truly

SUBJECT: Shipment of Labour from Mainland to Sardinian Coal Mines.

TO : Naval Sub-Commission, HQ. AIOOM

1. Aziende Carboni Italiani has recruited on the Italian Mainland four hundred men for the Sardinian Coal Mines.

2. It is understood that the Ministero della Marina (Italian Admiralty) is willing to transport this labour on a vessel of the Royal Italian Navy from Civitavecchia towards the end of the present month. It is also understood that Comandante Gaslini of the Ministry is on the point of approaching Naval Sub-Commission regarding approval of this scheme.

3. A.Ca.I is the State organization controlling all State owned coal mines including those of the Sardinian coalfield. The four hundred men in question are part of a force of 2500 additional workers needed to boost up production of coal from ~~between~~ 40-45,000 to 70-80,000 tons per month. The batch of 400 men will permit an initial increase of 5000 tons per month of this commodity. It will be appreciated if favourable consideration may be given to this scheme.

A. F. RADCLIFFE, Capt. RE

1. COAL MINING

a. Production.

(1) Production for week ending 7 July 1945 totaled 10,996 tons of washed coal.

(2) Production for the week averaged 1830 tons per day which represents an average of 0.507 tons per man per day (underground). North Group average was 0.388 tons. South Group average 0.560 tons.

(3) Total average number of men actively engaged underground was 3610 for the week. It will be noted that the number of men underground has increased.

(4) Supply situation generally satisfactory. A further shipment of pit-props arrived at S. Antioco on the S/S Cantakeit, now discharging cargo. A further report shall be made covering the shipment.

b. Management.

The Distillation Plant continues to operate. Major Pirola reported upon his return from Rome that arrangements had been made to increase the Sardinian allocation of Sulcis coal to 15,000 tons. In the absence of official instruction the Mining Office shall insist that shipment in excess of 10,300 tons shall not be made to Sardinia unless instructed otherwise by Hq A.C.

1. COAL MINING:

a. Production

(1) Production for week ending 30 June 1945 totaled 10,002 tons of washed coal. A further 68 tons of 0/10 coal was reclaimed from old stocks at S.Antioco.

(2) Production for the week averaged 1667 tons per day which represents an average of 0.474 tons per man per day (underground). North Group average was 0.473 tons. South Group average 0.475 tons.

(3) Total average number of men actively engaged underground was 3513 for the week. It will be noted that the number of men underground has increased.

(4) Supply situation generally satisfactory. A shipment of approximately 37,000 lin meters of pit-props arrived S.Antioco 1 July 1945. With this new shipment we now have on hand our timber requirements to 20 July 1945.

b. Management

The High Commissioner's Office strongly objects to closing down the Distillation plant. Although Eng. Rostan had previously stated that it would cease operation as of 30 June the plant was still operating as of 3 July. A conference with Dr. Chieffi and Eng. Rostan was held to discuss the Distillation Plant situation and it was agreed that:

(a) If coal could be allocated to the Distillation Plant without exceeding the 10,300 tons allocated to Sardinia, the Plant could operate pending a final decision.

(b) Carbosarda would not ship in excess of 10,300 tons

Declassified E.O. 12065 Sec. 3-402/NNDC No. 78502

was increased.

(4) Supply situation generally satisfactory. A shipment of approximately 37,000 lin meters of pit-props arrived S.Antioco 1 July 1945. With this new shipment we now have on hand our timber requirements to 20 July 1945.

b. Management

The High Commissioner's Office strongly objects to closing down the Distillation plant. Although Eng. Rostan had previously stated that it would cease operation as of 30 June the plant was still operating as of 3 July. A conference with Dr. Chieffi and Eng. Rostan was held to discuss the Distillation Plant situation and it was agreed that:

(a) If coal could be allocated to the Distillation Plant without exceeding the 10,300 tons allocated to Sardinia, the Plant could operate pending a final decision.

(b) Carbosarda would not ship in excess of 10,300 tons allocated to Sardinia during July. 2934

(c) Any change in the quantity of coal allocated to Sardinia could be made only in Rome.

(d) If any over-run occurs the Mining Office will recommend a corresponding reduction in the imported coal equal to the amount of the over-run.

2. METAL MINES

We have requested the Bureau of Mines, Iglesias, to call a meeting of all concerned in connection with the receipt of supplies for the metal mines to work out all details of the procedure for receipt and payment. A representative of this Office shall be present and a further report shall be made.

6 July 1945

Ref: Mines-923.2

SUBJECT: Sardinian Coal Production, June

TO : AFHQ, Quartermaster, Coal Section
APO 512, U. S. Army

1. Reference attached copies of consolidated report from Sardinia, month of June.

2. The mines worked steady during the month without any outward show of labor trouble. Discipline over the workers was poor or non-existant, however, production for the month was the highest since the Allies have been in Italy.

3. There were an average of 3,374 underground workers entering the mines each day. This is an increase of 200 men over last month and is the explanation for the increased production since the ton per man produced remained essentially the same.

4. The shipments of timber did not arrive as expected and as a result difficulty was experienced in some shafts. Back timbering will be required when the alloted timber arrives. Present information is that a timber boat is now unloading in Sardinia with sufficient timber for two weeks operations.

5. The stock of reclaimed coal has now been practically exhausted. This month recovery of 1,214 tons can be considered the last.

6. The new organization is functioning as well as can be expected. The only adverse comments are from some of the engineers held over from the old organization.

-1-

7933

Declassified E.O. 12065 Section 3-402/NNDG NO. 785021

7. As previously stated the chief need now is for increased labor. Plans for utilizing German Prisoners of War for this purpose are feasible but may need approval from the High Commissioner of Eritrea for political reasons.

" " AMG Region

1. Methods of requisitioning coal require alteration and allotted coal available require alteration in view of change of circumstances. The following revised arrangements will be put into operation forthwith.

2. LONG TERM REQUISITION

Requisitions for Coal and Coke for Italy for Civilian purpose will be submitted to Coal Division, Commerce Sub-Commission Allied Commission HQ, by the first day of every month for the 3rd through 7th succeeding month, (i.e. 1 Aug. for estimated requirements November/December 1945, January/February/March 1946) by the following agencies:-

a) For Italian Government Territory, by an Italian Government Coal Office representing all interested Ministries.

b) For AMG Territory, by the AMG Coal Committee, Milan composed of the Senior Coal Division Officer (in the chair), of Representatives of Regional Commissioners, Italian Importers and of the AMG Coal Office.

3. MONTHLY ALLOCATIONS

The above agencies will be advised six weeks ahead of the tonnage of coal expected to be available in any month and will submit suggested alloca-

Declassified E.O. 12065 Section 3-402/NNDC NO. 785021

arrangements will be made to overtime work at [illegible].

2. LONG TERM REQUISITION

Requisitions for Coal and Coke for Italy for Civilian purpose will be submitted to Coal Division, Commerce Sub-Commission Allied Commission HQ, by the first day of every month for the 3rd through 7th succeeding month, (i.e. 1 Aug. for estimated requirements November/December 1945, January/February/March 1946) by the following agencies:-

a) For Italian Government Territory, by an Italian Government Coal Office representing all interested Ministries.

b) For AMG Territory, by the AMG Coal Committee, Milan composed of the Senior Coal Division Officer (in the chair), of Representatives of Regional Commissioners, Italian Importers and of the AMG Coal Office.

3. MONTHLY ALLOCATIONS

The above agencies will be advised six weeks ahead of the tonnage of coal expected to be available in any month and will submit suggested allocation of Coal and Coke for civilian purposes for Italy to Coal Division, Commerce Sub-Commission A.C. HQ, by the first day of every month, for the next succeeding month (i.e. 1 Aug. for Sept. allocation).

4. For Civilian purposes, both long Term Requirements and suggested monthly allocations will be submitted according to Regions, Provinces and ports of entry under the following categories of consumers:-

7930

a) Railways
b) Public Utilities
c) Industry
Cement, Iron and Steel etc.
d) Domestic including hospitals, bakeries and foodstuff.

The coal requirements will be further subdivided into qualities viz:

Declassified E.O. 12065 Section 3-402/NNDC NO. 785021

i) Locomotive
ii) Gas Coal
iii) Electricity Smalls
iv) Coking Coal
v) Producer Gas Coal
vi) Steam Coal

5. COAL REQUIREMENTS AND ALLOCATION COMMITTEE, A.C. HQ.

There will be set up in Allied Commission HQ, a Coal Requirements and allocation Committee consisting of:-

- Deputy Vice President, Economic Section - Chairman
- Representative of Italian Government Coal Office,
- do Italian Coal Importers,
- do Industry Sub-Commission,
- do Transportation Sub-Commission,
- do Public Works & Utilities Sub-Commission
- do Labour Sub-Commission,
- do Commerce Sub-Commission, Coal Division

Commerce Sub-Commission will provide the Secretariat, jointly with the Italian Government Coal Office. The Coal Requirements and Allocation Committee will meet on or about the 7th of each month as required by the Chairman, and will:-

i) consider Long Term Requisitions before submission to AFHQ and
ii) recommend monthly allocations to the agencies named in para 2, i.e. the Italian Government Coal Office, for Italian Government Territory and the Milan AMG Coal Committee for the North, upon a territorial basis, and according to category of consumer set out in para 4 above.

6. SUB-ALLOCATIONS

The Sub-Allocations to individual consumers will be made as follows:-

a) in Italian Government Territory - by the Italian Government Coal Office after consultation with Coal Division AC. The latter will notify all concerned of the overall monthly allocation programme.

b) in AMG Territory by the AMG Coal Committee. The Senior Officer AC Coal Division will notify all concerned of the overall monthly allocation programme.

c) Coal Division, AC, HQ., will notify epected arrivals with names of steamers, quality and tonnage to the Italian Coal Office, Re

Commerce Sub-Commission will provide the Secretariat, jointly with the Italian Government Coal Office. The Coal Requirements and Allocation Committee will meet on or about the 7th of each month as required by the Chairman, and will:-

i) consider Long Term Requisitions before submission to AFHQ and
ii) recommend monthly allocations to the agencies named in para 2, i.e. the Italian Government Coal Office, for Italian Government Territory and the Milan AMG Coal Committee for the North, upon a territorial basis, and according to category of consumer set out in para 4 above.

6. SUB-ALLOCATIONS

The Sub-Allocations to individual consumers will be made as follows:-

a) in Italian Government Territory - by the Italian Government Coal Office after consultation with Coal Division AC. The latter will notify all concerned of the overall monthly allocation programme.

b) in AMG Territory by the AMG Coal Committee. The Senior Officer AC Coal Division will notify all concerned of the overall monthly allocation programme.

c) Coal Division, AC, HQ., will notify expected arrivals with names of steamers, quality and tonnage to the Italian Coal Office, Rome and the AMG Coal Committee, Milan and it will be the responsibility of the latter agencies, after consultation with the respective AC Coal Division Officers, to allocate cargoes on arrival according to the agreed programme.

7. The Milan Coal Committee is established for the period of Allied Military Government only. Upon withdrawal of AMG it is proposed to transfer the activities of this Committee to the Italian Coal Office in Rome.

1. COAL MINING

a. Production

(1) Production for week ending 23 June 1945 totaled 10,644 tons of washed coal. A further 111 tons of 0/10 coal was reclaimed from old stocks at S. Antioco.

(2) Production for the week averaged 177½ tons per day which represents an average of 0.507 tons per man per day (underground). North Group average was 0.412 tons. South group average 0.531 tons.

(3) Total average number of men actively engaged underground was 3500 for the week. It will be noted that the number of men underground has increased.

(4) Supply situation as previously reported. Situation on pit-props rapidly becoming critical.

b. Management.

Nothing new to report. The new management is purposely moving slowly, to avoid creating too much of the reaction to their proposed changes.

COAL MINING

1. Production.

Production for week ending 9th June 1945 totaled 10,312 tons of washed coal. A further 108 tons of 0/10 coal was reclaimed from old stocks at S. Antioco previously unreported.

2. Production at the South Group improved substantially during the week.

3. The production for the period averaged 1719 tons per day; the output during the period averaged 0.368 tons per man underground for the North Group, 0.599 tons per man for the South Group, 0.519 tons per man underground for the combined production.

4. Management.

Dr. Francesco Chieffi returned to Rome on 5th June.

5. Eng. Giulio Rostan has not yet instituted any sweeping changes and he is still making his survey of the situation.

7919

Declassified E.O. 12065 Section 3-402/NNDG NO. 785021

6. Labour Force.

The underground labour force averaged 3316 men during the period.

7. Supplies.

No change from last report.

SEUI COAL MINE

8. No steps have been taken in Sardinia to re-open the Seui coal mine. Eng. Rostan states that Carbosard have not been permitted by the Italian Government to complete the purchase. The present owners lack both in funds and supplies to re-open the mine.

METAL MINES

10. Paint Pigments.

The following paint pigments were shipped to 40 Ordnance Paint Factory, Naples, on S/S Campidoglio, date 9th June.

Firm	Designation	Weight
Carbosard	Barite	70 tons
Malacalzetta	Barite	58 "
"	Yellow Ochre	17 "
Monteponi	Zinc Oxide X	38 "
"	" " CP	26 "
	Total	209 tons

Ref: Mines-319.6

16 June 1945.

SUBJECT: Report on Visit to Sardinian Coal Mines
9 June - 14 June.

TO : Economic Section, HQ. A.C.
Attn. Brigadier ANDERSON.

PRESENT PRODUCTION.

Present production split between the two mine groups is:

North Group (Bacu Abis)	450	m/tons per day
South Group (Serbariu)	1185	"
Total	1635	"

REMARKS.

Bacu Abis mine (North Group) is in poor physical condition. Development has been neglected and there is but limited possibility for immediate production increases even with additional labor. However, with a progressive increase in the labor force and developing, the mine production of 800 metric tons per day can be reached within six months. The required labor increase will amount to 350 to 500 men, to produce 800 metric tons per day.

Serbariu mine group (South Group) is in fairly good physical condition. The mine managers feel that present production of 1185 tons per day

0 8 2 01

Declassified E.O. 12065 Section 3-402/NNDG NO. 785021

is low and can be increased to 1400 tons per day with the same labor force. Ultimate production increases to 3,000 tons per day can be made with the addition of approximately 2,000 workers. Moreover, production increases will be immediate upon the arrival of these increases in the labor forces.

LABOR FORCE.

Consists of appreximately:

North Group	1150	inside	workers -	300	outside workers
South Group	2185	"	" -	560	" "
TOTAL	3335	"	"	860	" "

These are the workers concerned only with the actual handling or production of coal and does not include clerks or shp employees.

The tons per man is averaging .30 tons per man, broken down as: .39 tons per inside worker for the North Group and .54 tons per inside worker for the South Group.

REMARKS.

7915

Labor relations and discipline ever workers are very poor. Going through the mines, it was noticeable that the men were making no effort to be working and when one of the directors called an individual for laying down on a pile of timber he received a surly reply. Conferences were held with some of the prominent labor agitators to effect a solution of this situation but no satisfactory conclusion was reached. It was learned that the

0821

Declassified E.O. 12065 Section 3-402/NNDG NO. 795021

Camera di Lavoro, the Italian Trade Union , was powerless and that the men followed Mistroni, a paid agitator of no government or coal company connections.

PRESENT MANAGEMENT.

The present management consists of the following technical men:

Engineer Rostan	General Director,
Engineer Carta	General Tech. Director,
Engineer Fioretti	Director South Group of mines.
Engineer Bosonero	Director North Group of mines.

These men, excepting Engineer Rostan, are the same men who have been in technical charge of the mines during the past six months. Engineer Rostan was made General Director during the recent re-organization of the coal company. Engineer Rostan is a man of considerable experience and is taking what steps he is permitted to take, in effort to solve the difficult situation. In all, these men are capable by Italian standards and can be considered as good or better than possible replacements.

MATERIAL NECESSARY TO INCREASE PRODUCTION.

Injectors and cylinders pistons for injection pumps on Diesel locomotives.

Of 39 Diesel locomotives, 26 are in operating conditions and 13 are without spare replacement parts. All locomotives must be put in operation to produce 75,000 tons of coal per month.

0822

Declassified E.O. 12065 Section 3-402/NNDG NO. 795021

These locomotives are of German make and to date no replacement parts have been found. Officers were sent to Milano in effort to procure them but they were not available. Investigation will be made by both the Mining Division and the A.Ca.I., to have these necessary parts made in Milano or where ever it is found that they can be made. The other need is for pipe, various diameters, this is on requisition and should arrive shortly.

TRANSPORTATION FACILITIES.

Railroad: The present production is all hauled by locomotives burning Sardinian coal. Increased production will require the placing in service of locomotives which burn imported coal. The estimated required quantity of imported coal is 150 tons per month to handle production of 75,000 tons per month. By triple shifting the railroad service, this production can be hauled with present available rolling stock.

Port facilities: Present port loading facilities are adequate to handle tonnages of 100,000 tons per month without difficulty.

POSSIBLE USE OF GERMAN PRISONERS.

Records show that 1500 prisoners were worked in these mines during 1942. These prisoners were Yugoslavs and Greeks. There is a prisoner Camp established near Bacu Abis mine that can accomodate 2000 to 2500 prisoners. This Camp was not visited by the writer, but assurance was given that adequate shelter was available.

0 8 2 3

Declassified E.O. 12065 Section 3-402/NNDG NO. 785021

It is assumed that the guarding and controlling of prisoners will come under the Italian Army and that the working prisoners will be segregated, in separate mines, from the Italian workers other than supervisors.

The Mining Division wishes to point out that working prisoners in the mines will require food, shoes, and clothing in accordance with the rules of land warfare. This may be in excess to that now being received by the Italian workers and if so will develop into a very awkward situation. At this time it cannot be predicted just how successful this endeavor will be, or the political complications that may evolve, however, the great need of coal for Italian economy should be evident to all, and that, as a source of quick labor, this is the only solution available at present.

15 June 1945.

SUBJECT: Sardinian Coal Production, May .

TO : AFHQ, Quartermaster, Coal Section,
APO 512, U.S. Army.

1. Reference attached copies of Consolidated Report from Sardinia, Month of May.

2. The mines worked steady during the month without any general strike. There were twenty four working days during the month. The remaining seven days being either Sundays or holidays.

3. Daily production averaged 1,593 metric tons per day. The average number of underground workers was 3,174 men. Average tons produced per underground worker was .504 metric tons.

4. There were 4,612 metric tons of reclaimed coal recovered from old stocks near the pier. It is estimated that only approximately 5,000 more tons of this coal will be available for future recovery

5. The new directors, Dott. Chieffi and Ing. Rostan arrived in Sardinia. Dott. Chieffi's position is that of Commissioner of the A.Ca.I. and he will remain in Rome. Ing. Rostan, the General director, will remain in Sardinia as actual director

2818

Declassified E.O. 12065 Section 3-402/NNDG NO. 785021

of the mines. Ing. Rostan is endeavouring to take positive control of production and increase production if possible. His position is difficult since there is virtually no control over labor at this time.

6. The situation with regards mine timber reached a critical state during the month. So critical in fact, that when a small shipment arrived it found the mines virtually without timber.

7. The present requirement necessary for production increases is an increase in labor. As previously stated, 2,500 more workers are needed to increase production to the desired levels. Attempts to obtain these men from either the Italian mainland or Sardinia have been unsuccessful. Consideration is now being given to the possibility of utilizing German prisoners of war for work in the mines.

SUBJECT: Prices of coal-lignite

TO : HQ Tuscania Region
AMG
Attn: Regional Commissioner

1. Reference your letter RVIII/77/13& dated 12 May 1945 to our Headquarters.

2. The prices of lignite as established by this office are:

Lignite (lumps 10 mm and up)	925 lire per ton
Lignite (less than 10 mm)	775 " " "

The above mentioned price for lignite is based on lignite with a 25 per cent moisture content. This price is subject to a 20 lire deduction per ton for each one per cent in moisture content over 25 per cent.

3. This price is for sales at the mine and applies to Army purchases in Italian Territory and to all purchases in AMG territory south of the former "freeze line".

4. The procedure to be followed regarding directives issued by HQ AC on wages is the same as the procedure which applies to foods and other goods.

5. The directives are enforced by the Regional Commissioner. They are not published by HQ AC as Regional Orders. Regional Orders are those orders, or directives, which emanate from the Regional Commissioner himself.

4 June 1945.

SUBJECT: Reports, Weekly.

TO : Headquarters, Allied Commission,
Industry Sub-Commission, Mining Division,
APO 394, U.S. Army

COAL MINING.

1. Production.

Production for week ending 2nd June 1945 totaled 8090 tons of washed coal. A further 1109 tons of C/10 coal was reclaimed from old stocks at S. Antioco previously unreported.

2. Production at both groups of mines proceeded normally throughout the week, but was somewhat affected by a holiday on 31st May.

3. A railway track scale and car hoist have been installed at the Serbariu Washing Plant in order to make certain that the daily production figures are in future correct.

4. The production for the period averaged 1618 tons per day. The output during the period averaged 0.4 tons per man underground for the North Group, 0.54 tons per man for the South Group and 0.49 for the combined production.

7984

0832

Declassified E.O. 12065 Section 3-402/NNDG NO. 785021

5. Management.

Dr. Francesco Chieffi expects to return to Rome on 5th June.

6. It is understood that Eng. Giulio Rostan will make sweeping changes in the administration. These changes are expected to include the elimination of the head office at Cortoghiana and the re-institution of the independend organization of the South and North Groups. A reduction in the number of clerks is probable.

7. Labour Force.

The underground labour force averaged 3309 men for the period.

8. Supplies.

The S/S Pallade arrived on 28th May bringing 717 cubic meters of pit props which have not yet been completely taken into store. Timber, nafta and compressor oil are still in very short supply. The usual monthly statement on the supply position is being forwarded under separate cover.

9. Financial position.

Carbosard hope to relieve the financial situation by collecting the difference between the old and the new price of coal for the period from 1st October 1944 to 2nd January 1945 as the new price was made retroactive to the former date.

7903

0833

Declassified E.O. 12065 Section 3-402/NNDC NO. 7850211

SEUI COAL MINE.

10. Stocks.

Major Hatch visited Arbatax and the Seui coal mine on 2nd and 3rd June. The coal stocks at Arbatax Port were measured and sampled. Measurements indicate that the total stocks at Arbatax are 1000 tons of fine unwashed coal and not 5000 tons as stated by the mine manager at Seui. The figure for the stocks at Arbatax contained in Major Hatch's report dated 5th May 1945 should therefore read 1000 tons and not 5000 tons. The stocks at the Seui mine remain unaltered. Samples of the Seui at Arbatax stocks are being analysside locally and samples will be sent to Rome for analysis there.

METAL MINES.

11. S.A.F.I.S.

Arrangements have beeri made to provide the ceramic industry of S.A.F.I.S. with a small quantity of explosive to enable them to mine kaolin for the manufacture of fire bricks for the Italian railways.

Industry Sub-Commission, Mining Div.,
APO 394, U.S. Army.

COAL MINING

1. Production.

Production for week ending 26 May 1945 totaled 10,069 tons of washed coal. A further 850 tons of 0/10 coal was reclaimed from old stocks at S. Antioco previously unreported.

2. Production at both groups of mines proceeded normally throughout the week, with the exception of 24th May when the electric power was cut off for several periods owing to a strike at the Elettrica Sarda. This strike has not yet been settled but no further interference with the power supply has taken place.

3. The output during the period averaged 0.34 tons per man underground for the North Group, 0.58 tons per man for the South Group and 0.50 tons per man underground for the combined production.

4. The low output for the Bacu Abis or North Group, together with the fluctuating nature of the production, indicates that the miners at Bacu Abis are not yet working normally.

0837

Declassified E.O. 12065 Section 3-402/NNDG NO. 785021

5. Management.

Dr. Francesco Chieffi, the new Commissario, arrived on 22nd May. Eng. Rostan, the new General Director, arrived on 26th May.

6. Dr. Chieffi intends to return to Rome as soon as Eng. Rostan has completed a general survey of the mines and is ready to take over the management.

7. Labour relations.

An agreement has been made between Carbosard and the Italian General Confederation of Labour, by which a Committee consisting of five members; elected by the various categories of workers, will be set up to examine proposals made by the workers for improvements in organization and working conditions.

8. This Committee will consist of three delegates from the workers, one from the employees and one from the supervisors. The Committee will collaborate with the Commissario and the General Director.

9. Labour Force.

The underground labour force averaged 3352 men during the week.

10 Supplies.

A ship expected to contain approximately 1,000 cubic meters of timber arrived today. Timber stocks are sufficient for about one week's work. A small quantity of timber arrived recently on the S/S Abbadia, but does not substantially affect the situation as it is not more than two or three days supply. Compressor oil and nafta are still in very short supply.

7898

0838

Declassified E.O. 12065 Section 3-402/NNDG NO. 785021

11. Financial situation.

Dr. Chieffi requested that the stocks of coal at S. Antioco should be immediately shipped to relieve the situation. It was explained to him that the policy of the Allied Commission was to maintain a stock of 20,000 tons at S. Antioco in order to facilitate loading and to turn around shipping as fast as possible.

METAL MINING

12. Paint Pigments.

212.5 tons of paint pigments were shipped to 40 Ordnance Paint Factory on the S/S Abbazia which left Cagliari on 26th May.

Firm	Designation	Weight
Monteponi	Zinc Oxide X	40.8 tons
"	Zinc Oxide CP	21.2 "
"	Red Lead	14.0 "
"	Litharge	1.0 "
Malacalzetta	Yellow Ochre	16.6 "
"	Barite	17.0 "
Carbosarda	Barite	101.9 "
	Total	212.5 tons

13. Thirty days notice of the cancellation of all contracts for yellow ochre has been given to the Firms concerned.

SUBJECT: Miboila Lignite Mine -

TO : His Excellency Gronchi
Minister of Industry, Commerce & Labor

1. Recent conversation with the Director of the above mentioned lignite mine indicated a shortage of workers.

2. This mine is most important to industrial Italy and as you know every Kilogram of coal produced is in great demand. Present estimates call for 400 additional workers before production of 400 tons per day can be reached.

3. Application has been made to the Camera del Lavoro for the additional workers. Any assistance that your office can give in this matter will be greatly appreciated.

21 May 1945.

Ref: 319.13212

SUBJECT: Reports, Weekly.

TO : Hq Alcom, Industry Sub-Commission,
Mining Div., APO 394, U.S. Army

1. COAL MINING.

a) - Production for week ending 19th May 1945 totaled 9928 tons of washed coal. A further 1116 tons of 0/10 coal was reclaimed from old stocks at S. Antioco previously unreported.

b) - Comparison figures on last week and this week's production are as follows:

Week ending 12 May 1945

Daily average production washed coal	1467 tons
Daily average number of men underground	2891 men
Daily average production per man	.507 tons

Week ending 19 May 1945

Daily average production washed coal	1655 tons
Daily average number of men underground	3355 men
Daily average production per man	.493 tons

c) - It is noted that total tonnage increase during this week is due to increased number of men underground, while the daily average production per man dropped slightly.

2. LABOUR RELATIONS.

a) - The situation regarding increase of pay for the high cost of living seems to be settled. No comments have been heard during the week on the subject.

7891

0843

Declassified E.O. 12065 Section 3-402/NNDC NO. 785031

b) - The outstanding dispute on the price to be paid for cloth, mentioned in paragraph 6 of last week's report, is solved. An administrative head for the Carbonifera Sarda is still lacking. It has been reported that the new Commissario of the Coal company will arrive today.

c) - Detonation of improvised firecrackers made out of mine explosives has subsided somewhat, however, one or two detonations are heard nightly. The Chief of Police is working as well as his force permits. Ten carabinieri are not considered adequate for the policing of this coal basin. The Chief of Police has reported this fact many times to superior authorities with no results.

d) - On the evening of 17th May a demonstration and a threatened strike took place on the piazza in Carbonia. The reason for this demonstration was because of the situation on clothing distribution by the Myron Taylor and the Vatican Group through the local Government. For the moment it appeared that such demonstration would result in a general strike by the miners in objection to the method of distribution by the local Government. The local Government immediately discontinued distribution with a view of examining the situation and the allegation made by the local citizens. This apparently satisfied all concerned. Normal work was resumed in the mines without any loss of time.

3. LABOUR FORCE.

The underground labour force increased during the week from a daily average of 2691 men for last week to 3355 men for this week. But it is also noted that production per man dropped slightly.

7890

0846

Declassified E.O. 12065 Section 3-402/NNDG NO. 785021

4. SUPPLIES.

a. No word had been received on the timber situation. Something must be done at once. Timber is only available with strictest economy for two or three weeks . Stocks at Bacu Abis reported exhausted.

b. No word has been received whether or not POL allotments had been set up by the Italian Government for the mines. Supply is very critical .

5. FINANCIAL SITUATION.

The situation is unchanged as reported last week. Unless ships can be laid on to take away the available stock, no improvement in the situation can be foreseen.

6. METAL MINING.

No report has been received from the 40 Ordnance Paint Factory on the shipment of 425 tons of paint pigments shipped on the S/S ABBAZIA which left Cagliari on 11th May. Therefore it is not known whether or not the system of safe-guarding this cargo will work or not.

SUBJECT: Present Situation Sardinian Coal.

TO : Brigadier D. L. ANDERSON,
Deputy Vice President Production,
Economic Section, A.C.

The latest rumor is that a general strike is contemplated because of an unfavorable reaction to Chieffi's appointment. Apparently this strike is planned for the entire Carbonia-Iglesias District. Why Iglesias should be in it I do not know but the principal gripe is that the Commission for 'A.Ca.I' was made up of two Socialists and the remainder of Christian-Democrats which gave the Sards and Communists no representation at all.

LA SARDEGNA SOCIALISTA

CARBONIA

Politica di tornaconto

Sua Eccellenza Bonomi, per l'insediamento della Consulta Sarda ha mandato un vibrante messaggio augurale con le solite belle parole e con tante promesse per i Sardi. Ma nello stesso momento che Egli - il Capo del Governo - ne compilava il testo, il suo collega dell'Industria - Sua Eccellenza democratica cristiana Gronchi - gli giocava un tiro mancino nominando l'amico (democratico cristiano) di un alto papavero (pure democratico cristiano) Amministratore Delegato della Azienda Carboni Italiani e allo stesso tempo, per non lasciarlo con una sola carica e, naturalmente, con una sola prebenda, anche Commissario della Carbonifera Sarda.

Chiaro, come la luce del sole, che si tratta di un minestrone preparato in famiglia, in barba alla consulta regionale e a tutte le pretese dei sardi che vorrebbero avere un pò di voce in capitolo ed esprimere eziandio il loro modestissimo parere quando si tratti di cavoli che li riguardano.

Ma tant'è: il fascismo è crollato, ma i pessimi costumi sono rimasti.

Il nuovo Commissario arriverà, ma già si sente nell'aria l'odore di grossa battaglia. Saranno accoglienze tutt'altro che cordiali e vi sarà di sicuro uno sciopero diverso da ogni altro, perchè troverà stavolta l'incondizionata solidarietà di tutti i sardi ben pensanti ed ormai stanchi delle romane soluzioni arbitrarie per gli interessi isolani.

Il nostro punto di vista è questo: il governo morituro di Bonomi non doveva decidere con eccessiva fretta su una questione di tanta vitale importanza senza sentire il parere degli interessati e alla vigilia dell'insediamento della consulta regionale.

T-R-A-N-S-L-A-T-I-O-N

CARBONIA POLITICAL INTEREST

His Excellency Bonomi, for the appointment of the Consultive Body for Sardinia, has sent a vibrant message of good will with the usual nice words and with many promises for the Sards. But at the same moment he, the Head of the Government, was compiling the draft, his colleague of Industry, His Excellency Demo-Christian Gronchi, plays him an under-handed trick by appointing his friend (Demo-Christian) who is a high Poppy, Administrative Delegate for the Firm Carboni Italiani and, at the same time, in order not to leave him with only one appointment, and naturally with only one salary, also Commissario of Carbosarda. It is clear as the sun itself that it was a prepared soup in the family, notwithstanding the existence of a Consultive Body in Sardinia and in spite of all the Sards who desire to have a voice in the administration of the Island. But inasmuch as fascism has collapsed the bad habits still remain. The new Commissario will arrive but it is felt in the air that a big battle is impending. The reception will not certainly be cordial and there will surely be a strike different to any other because it will be found that Sards are now tired of decisions made for them arbitrarily by the Roman clique, covering the interest of their Island. Our point of view is the following: Bonomi's dying government should not have decided with haste a question of vital importance without hear the view of the interested parties and just before the appointment of the Regional Consultive Body for Sardinia

COAL MINING

1. Production.

Production for week ending 5th May 1945 totaled 8256 tons of washed coal. A further 839 tons of 0/10 coal was reclaimed from the old stocks at S.Antioco previously unreported.

2. Production at both groups of mines proceeded normally throughout the week, but no work was done on 30th April, 1st and 3rd May, but 29 April and 6 May, which were Sundays, were both worked.

3. Labour relations.

The situation regarding the agreement between the National Confederation of Labour and the National Confederation of Industry at Cagliari, appears to have clarified to some extent. An agreement has now been reached, which for the moment, at any rate, satisfies the majority of the workmen and may be expected to avert strikes in the near future.

4. The table of wage increases given in last week's report is correct with the following munifications:

a) that, for the workmen, piece rates will not be taken into consideration in calculating the critical wage of 3600 lire per month;

b) that for engineers, clerks and other such employees, no reduction will be made for salaries over 3600 lire per month;

c) rates will be made retroactive for all classes as follows:
for the period 15th February to 31st March 1945, 40 lire per

Declassified E.O. 12065 Section 3-402/NNDC NO. 785021

from the old stocks at S.Antioco previously unreported.

2. Production at both groups of mines proceeded normally throughout the week, but no work was done on 30th April, 1st and 3rd May, but 29 April and 6 May, which were Sundays, were both worked.

3. Labour relations.

The situation regarding the agreement between the National Confederation of Labour and the National Confederation of Industry at Cagliari, appears to have clarified to some extent. An agreement has now been reached, which for the moment, at any rate, satisfies the majority of the workmen and may be expected to avert strikes in the near future.

4. The table of wage increases given in last week's report is correct with the following munifications:

a) that, for the workmen, piece rates will not be taken into consideration in calculating the critical wage of 3600 lire per month;

b) that for engineers, clerks and other such employees, no reduction will be made for salaries over 3600 lire per month;

c) rates will be made retroactive for all classes as follows:

for the period 15th February to 31st March 1945, 40 lire per day, not including 24 lire per day which has already been paid;

for the period 1st April onwards 72 lire per day;

5. The rates quoted here apply to the first figure in the table in last week's report and the other figures are in proportion.

6. The additional allowances for the extra costs of bread and living have now been fixed at 95 lire per month for each member of the family.

7870

7. Labour Force.

The labour force during the period was normal, although it was temporarily affected by the holidays and the celebrations connected with the cessation of hostilities on the Italian Mainland.

8. Supplies.

A monthly statement of the supply position as of 28th April has been sent under a separate cover. It will be noted that timber, compressor oil and nafta are in very short supply. Efforts are being

Declassified E.O. 12065 Section 3-402/NNDC NO. 785021

made to economize in timber and an Engineer has been sent to round up local supplies. It is not anticipated that any appreciable quantity of mine timber can be obtained from local sources. Information is anxiously awaited regarding the 6,000 cubic meters reported still available from the Continent, as our present stocks will be exhausted before the end of this month.

9. Financial Situation.

The financial situation is none too good. It is estimated that sufficient funds are readily available to carry through until the 20th of the current month. At the time of writing it is not clear if there exists any management at all of the mines and, under existing circumstances, it is just a question of time before a complete collapse of all management functions may occur due to the absence of an administrative head.

METAL MINING

10. Paint Pigments.

407 tons of paint pigments will be shipped to 40 Ordnance Paint Factory on the S/S Abbasia which is expected to leave in a few days time.
