LAB 091.46142

SUBJECT: Agricultural Wage Enforcement

TO : Executive Commissioner (AIRU: Economic Section)

1. Despite regulations promulgated by this Sub-Commission, fixing the harvest labor wage on a scale to avoid conflict with essential military labor wage scales, it has been determined through agricultural channels that the following maximum wages have been fixed by the relative Prefects, etc.:

Catania.....	L. 120
Enna.....	150
Mazara.....	100
Trapani.....	100
Matera.....	225
Catanzaro.....	125

2. These prices bear no apparent relationship to any factor except the availability of labor in the respective areas.

3. The Labor Sub-Commission recommends, in light of the above that the following instructions be sent to all Regional Commissioners:

a. The legal wage for harvest work is L. 65 per 8-hour day with time and one-half for overtime, plus certain food provisions. This wage must be enforced.

b. Immediately inform all Prefects in your region to collect the names of all potential harvest workers, instruct such workers to proceed under proper arrangements with necessary harvest work.

c. If anyone refuses to work, on the grounds that the wages are too low, make arrangements to lift the ration cards of the worker and his family.

LAB 091.46142

SUBJECT: Wages for Harvesters in Region II

TO : Executive Officer, Economic Section

1. Reference your memorandum of 6 June, file ES/144, on subject of wages for harvesters in Region II. It is quite apparent that the Regional Commissioner's office either failed to understand the import of instructions forwarded them from the Executive Commissioner, or yielding to local pressure, determined to take individual action in defiance of higher authority.

2. It is thoroughly understood by all who have studied and are familiar with similar situations, that farmers customarily meet, as far as possible, current demands both for wage and for food in order to insure for themselves an adequate supply of seasonal labor. The period involved is short, and the prices at which farmers can sell their wheat, either legally or otherwise, are very high. Obviously, no wage announced officially will be adhered to. This state of affairs in relation to the quick harvesting of a money crop is traditional and universal.

3. Under the circumstances the only possible action for A.C.C. to take was the announcement of a wage not in excess of the established Army Wage Scale. This was done, first, to protect officially that scale, and, secondly, to set a limit at which Italian soldiers used for this purpose would be paid. Someone in Region II must be incredibly naive in believing that anyone was promulgating or that anyone believed that an 8-hour harvest day was being advocated. Wires sent out covered the fact of time and a half for overtime.

4. The Regional Commissioner for Region II on his own cognizance announced a wage at a much higher level than his official instructions called for. He was quite properly ordered by the Executive Commissioner to cancel his act. It will be seen, therefore, that most of the confusion and consultations were due to the Regional Commissioner's misinterpretation and disobedience of orders.

5. The action that obviously suggests itself is a strong directive from the Executive Commissioner making imperative strict adherence to official orders from higher authority.

1098

J. T. R. BAIN,
Colonel,
Director, Labor Sub-Commission

Col. Smith .

BS/MA

SUBJECT: Wages for Harvesters in Region II.

TO : Executive Commissioner

1. Your attention is drawn to the following extract from the May report of the Economics and Supply Division Region II.

+++++

3(c) Labour. The wages for harvesters were set, cancelled, set again, and finally cancelled in favor of a free market. Generally speaking, this is likely to be around 150-160 lire for an 8 hour day, with steep rises for overtime, and free food. Since in the past the harvester has always regarded his as a 12 hour day, it is unfortunate that the 8 hour idea was allowed currency. It is estimated that the cost to the farmer for labour alone in getting in the harvest will be from 300-350 lire per quintal.

+++++

2. No doubt this is a matter on which you will wish to take further action.

MATERA, MAY 29, 1944

SUBJECT: Agricultural harvest wages

TO : Director, Labor subcommission.

1. Supplementing my report of May 24 on the above subject the ROG has sent the following telegram to ACC HQ: "REFERENCE 5535 OF 27 MAY FOR LUSH FROM ZELLARS ALL PROVINCIAL COMMISSIONERS TODAY NOTIFIED PRICE IS SIX FIVE LIRE PLUS OVERTIME FOR ALL HARVEST WORKERS."

2. first we received a telegram setting a figure of sixty-five lire for civilian labor; later we received another telegram advising this figure was only for military labor and that "we do not propose to name a figure we cannot enforce." Later the chief of staff of region II phoned the labor subcommission and got the definite impression the first telegram was accurate and the second one confused. The ROG held a conference and decided to take the responsibility of suggesting an agricultural wage of 110 lire plus 20 lire overtime. He wired the prefects to this effect and instructed me to wire the labor syndicates in Apuglia which I did.

3. on today the ROG has sent the above quoted telegram which revokes his previous telegram and changes for the FIFTH time the official information which this office has been required to give to the syndicates in Apuglia.

4. you can easily realize the position in which the regional labor office has been put by being required to give FIVE different instructions to the people in Apuglia with whom we have been dealing in our efforts to get agricultural labor.

Robert Frazer
 ROBERT FRAZER, Captain
 regional labor officer.

SUBJECT: Agricultural harvest wages

TO: Director, Labor Subcommittee

1. There is attached hereto the original telegram we received with reference to harvest labor. This indicates the figure set is for civilian labor. Later we received the second telegram attached saying that the figure set applied only to military labor. Still later the chief of staff phoned the Labor Subcommittee and got the definite impression that the first telegram was accurate and the second one some what confused.

2. The ROC held a conference this morning and decided to suggest an agricultural wage of 110 lire for eight hours and 20 lire per hour overtime. Accordingly he has telegraphed the preffetti along these lines. He instructed the Labor Officer to notify the syndicates of this action and this suggestion on his part. The labor officer has accordingly carried out the instructions of the ROC.

3. This is a very brief synopsis of a very complicated situation and is sent only for the sake of the record and to keep the Subcommittee advised of what is taking place in region II.

SUBJECT: Proposed Draft from RC & MG Section regarding
Italian Harvest - 1944.

TO: Colonel Adams, Economic Section

1. The attached draft and note reached me today. I presume they have been passed to this Sub-Commission for approval of Paragraph 5.

- a. The wages suggested are not approved by this Sub-Commission. The addition of 35 lire per day for hard living is regarded as a subterfuge covering ~~an~~ rise in wages. If it is necessary to pay 100 lire per day to a farm laborer, we should at least be honest about it and say so. Such an increase will, of course, involve complete revision of wages paid in general. In the meantime, my instructions from General MacFarlane are to "hold the line" on wages. This I propose to do.
- b. I shall be interested to learn how the figure of 100 lire per day came to be suggested without consultation with this Sub-Commission.

SUBJECT: Italian Harvest - 1944

TO : Headquarters,
Allied Armies in Italy.

1. The harvesting of cereals in this territory will begin on 15th May. Successful efforts have been made to induce Italian farmers to sow a maximum amount of seed. The present estimates give expectations of a good crop.

2. The successful harvesting and sowing of this crop is vital to the Allied war effort. On it depends the feeding of the population of this country and the release of shipping for other operations and purposes. Every endeavour is being made in occupied and liberated territory to help the farmers at harvest time.

3. In some regions extra civilian labour must be found. In Foggia Province, for instance, from which a total crop of 270,000 tons of wheat and barley alone is expected, 25,000 people must be imported from other provinces in order to reap the harvest. In accordance with Italian custom, the bulk of these people will be recruited from Bari Province and other Provinces in Apulia. The greatest care will be taken to ensure that military labour is not affected. Similar numbers may have to be imported from Campobasso and Matera Provinces. In addition to the above it is desired that the customary agricultural leave should be granted to a maximum of 5000 Italian soldiers from 15th May to 15th July 1944.

TO : Headquarters,
Allied Armies in Italy.

1. The harvesting of cereals in this territory will begin on 15th May. Successful efforts have been made to induce Italian farmers to sow a maximum amount of seed. The present estimates give expectations of a good crop.
2. The successful harvesting and amassing of this crop is vital to the Allied war effort. On it depends the feeding of the population of this country and the release of shipping for other operations and purposes. Every endeavour is being made in occupied and liberated territory to help the farmers at harvest time.
3. In some regions extra civilian labour must be found. In Foggia Province, for instance, from which a total crop of 270,000 tons of wheat and barley alone is expected, 25,000 people must be imported from other provinces in order to reap the harvest. In accordance with Italian custom, the bulk of these people will be recruited from Bari Province and other Provinces in Apulia. The greatest care will be taken to ensure that military labour is not affected. Similar numbers may have to be imported from Campobasso and Matera Provinces. In addition to the above it is desired that the customary agricultural leave should be granted to a maximum of 5000 Italian soldiers from 15th May to 15th July G.O.C. Army Sub-Commission is prepared to take the matter up at once with S.M.R.S. if you will give approval.
4. These and other civilian labourers will be furnished with a ration which is on a par with the heavy workers' ration. This is customary and the harvesters will not come unless such a ration is given.

5. The harvesters will be paid at the basic rate of L.65 per day with an allowance of L.35 per day for hard living. Your agreement on this point is also requested.

6. I hope that military formations, especially No. 2 District, may be instructed to give every facility both as regards recruitment and transport, to these imported harvesters, and that all military formations be advised of the importance of a successful harvest.

7. The Italian Government has already issued a decree regarding the harvesting of the grain. Similar measures will be taken in AMG territory. The aim of the decree is 43% of the crop and it is requested that every facility should be given to assist the execution of this decree. It will undoubtedly be necessary to ask military formations to vacate granaries and warehouses for the storage of the grain. It is requested that orders be issued that such requests be met.

8. I would also ask that the greatest attention be paid to prevent destruction or damage to crops by units in the rear areas and especially in the provinces of Foggia and Matera.

MSL/JJ

Brigadier,
Executive Commissioner,
Lt. Gen.,
Chief Commissioner.

Subject: Labor for wheat harvest

To: Director, Labor Subcommittee,
NAPLES

U-5455 Econ Sec
MATERA, April 27, 1944 Labour
46142

1. The new ROC had me come to his office this morning for a conference on the above subject. It is necessary for us to take some immediate preparatory action and having had no replies to my memos of April 12 and April 21 to the Labor Subcommittee requesting a decision on policy, I have recommended to the new ROC that we proceed to handle the matter exactly as it has been handled in previous years. We shall contact the syndicates (which are still in existence in Apulia) and arrange through them to get the necessary labor into Matera Province. Much of this labor can then be used later in Potenza province where the crop is much later. It is estimated that it will be necessary to import about 10,000 laborers as in the past. There is practically no unemployment in this province at present. We are informed that the workers will demand 180 lire a day plus food. 150 lire a day plus food was paid last year and it is hoped the labor can be obtained for this figure this year. The price of wheat will of course enter into this matter of pay. The first workers must be in this province by the end of May.

2. I plan to take directors Bruni and Rotunno to Bari tomorrow to make preliminary arrangements with the syndicate representatives in Bari and we are sending telegrams to the other Apulian representatives asking them to meet us in Bari next Thursday for the purpose of making arrangements with reference to their respective provinces.

1061

3. In my memo of April 21 on this subject I brought out the fact that Col. Gordon-Smith, the DDL, insists that we must clear through the DADL's before importing any labor at all. With this in mind I shall call on the DADL in Bari tomorrow and discuss the matter with him. I shall then call on the other DADL's later.

JOB/tbw

LAB 091.411

21 April, 1944

SUBJECT: Registration of Labor for Wheat Harvest
TO : Regional Labor Officer, Region ~~IX~~ II

1. It is believed that time will not permit institution of a new registration system between now and wheat harvest. Hence, suggest use of old Italian conscription system to obtain workers.

2. In working out conscription system, be careful to avoid competition with Armed Forces. Armed Force labor must have first priority. Harvest work should be second priority. To avoid possibility of competition, work closely with the following offices in the development of a plan:

- a. Colonel Gordon-Smith, D.A.D.L., Hq. Bari
- b. Major Vedreno, D.A.D.L., Hq. Bari
- c. Major Horsbrough, D.A.D.L., Bari Province
- d. Major Whitworth, D.A.D.L., Taranto
- e. Major Gamm, D.A.D.L., Brindisi
- f. D.A.D.L.'s in Foggia and Barletta

3. Manpower shortages in major centers of Armed Force work may have either a geographic or an occupational aspect, but more probably occupational according to information here. Inquire into this possibility in working with D.A.D.L.'s.

4. It is reported that movement of civilians is restricted by Army order in Foggia and other areas. Such restrictions may have to be lifted if workers are to follow wheat harvest. Consult with proper Army officials through D.A.D.L.'s and report results.

5. What is the transport situation for transporting civilians? How do you intend to solve the problem of a possible shortage of transport?

6. Do not pay higher wages than legal wages under any circumstance.

7. Use Labor Offices wherever possible. There is attached a Ministerial Circular reactivating the Italian conscription law for your guidance.

J. T. R. Bain
J. T. R. BAIN,
Colonel,
Director, Labor Sub-Commission.

1060

subject: registration of labor.

TO: THE DEPUTY DIRECTOR
LABOR SUBCOMMISSION

MATERA, April 12, 1944

1. In the agricultural provinces it is going to be necessary to have considerable labor to harvest the early wheat crop. Under the old Italian law labor was conscripted for this purpose and it was the custom to bring large numbers of farm laborers from Apuglia into the agricultural provinces of Matera and Potenza for this work. This situation brings up the question as to how the matter shall be handled this year. When I was in Naples last I learned that a plan of labor conscription is being contemplated and when I talked with Minister Corbino in Vietri there seemed to be a considerable difference of opinion as to how it is to be handled. The Minister felt it should be handled by the Consiglio dell'Economia and Capt. Albright said the Labor Subcommission felt labor should be registered by the provincial labor offices. I thoroughly agree with the Labor Subcommission in view of the fact we have the employees and the collocamentos. Director Gruni left with the Ministry of Labor an estimate on the cost of registration in the province of Matera and asked for approval for necessary funds to provide cards for registration. It is estimated 40,000 cards will be needed for the province and the estimated cost is 60,000 lire. The Italian government has made no reply.

2. I respectfully request instructions from the Labor Subcommission in this regard. Shall we proceed to handle the matter as it was handled last year, under old Italian law, and register labor through the collocamentos and transport the workers from Apuglia - or shall we wait until the proposed plan of labor registration can be agreed on by the Labor Subcommission and the Italian government? Or shall we endeavor to handle the matter by offering a sufficiently high wage to attract labor without conscription? If so what authority would we have here to set the wage? Whatever plan is followed, it is necessary to start soon as the early wheat will be ready in about two months.

TRANSLATION PFC. PIRANI

CIRCULAR TO THE PREFECTS ON THE MOBILIZATION OF CIVILIANS

AS is known, the mobilization of Italian citizens for war labor is regulated by laws regarding the discipline of citizens in time of war, approved by M.D. 31 October 1942 No. 1611, and in the regulation for the execution of said text, approved by R.D. 31 October 1942 No. 1612.

Since all of the above mentioned regulations; as they are formulated, do not seem to fulfill requirements, be it because, they presupposed the mobilization for important and numerous war industries that do no longer exist, be it because they proportioned according to said activities, the rate of civil mobilization to take place by grade, with the understanding that new regulations will emanate, we think it opportune- for the moment - to maintain in a limited fashion the machinery of said mobilization.

In fact the necessity to reestablish it, be it in reduced proportions, and according to the existing changes in the nation, the instrument of civil mobilization now that matters are being straightened out in liberated provinces, appears more urgent each day, not only for the satisfaction of the Commands of the Allied and Italian Armed Forces, who are continually meeting difficult obstacles in engaging labor necessary to them, but even above all else to make available for other activities those workers that, employed directly or indirectly by the Commands, seek to abandon their work in fields other than their regular professions.

Therefore, having to reactivate immediately, even though in a limited way, the drafting of citizens, we order that until new regulations are issued, said

- 2 -

mobilization be activated in the following manner:

- 1) With suppression of the National Fascist Party, all the powers, functions, and duties administered by it through regulations contained in the text of the laws governing the discipline of citizens in time of war, approved by R.D. 31 October 1942 No. 1611, and in the regulations for the execution of said text, approved by R.D. 31 October 1942 No. 1612, are to be considered transferred to the Ministry of Industry, Commerce and Labor.
- 2) In accordance with the above, the Ministry of Industry, Commerce and Labor, exercises the powers, functions, and duties attributed to it by the abovementioned dispositions, and including those given to it before the suppression of the National Fascist Party, through the prefect commissioners of the Provincial Economic Council; they may also avail themselves of the services of the provincial labor offices wherever they exist.
- 3) The provincial labor centers, the results of the merging of 1886 federal centers and provincial offices of labor; have to interest themselves however pressed; and their functions, as stated previously, attributed to the provincial economic council which they will fulfill exclusively through the personnel council.
- 4) In expectation that there will be a provision of a general character, which will declare demobilized all or part of the establishments mobilized by Art. 9 in the previously mentioned text, the citizens that work or did work for these establishments, except those dependent on public administration or public service, are to consider themselves demobilized.
- 5) There can be mobilized through the prefect commissioner of the provincial economic council, the citizens by name and number

1057

- 3 -

as requested by the ~~Residential~~ Command of the Allied Armed Forces and Italian, and by the central public administration office, and subsidiaries of the State operating under them, or else those dependent on firms and services operating under their control;

6) The prefects, having examined the requests and decided on the total or partial drafting, make the following provisions:

a) all specific requests by name making assignments to the various Commands, and associations, are to proceed immediately to the respective Economic Council;

b) for requests by number, requesting of the respective employment offices the number of citizens desired for assignment to the various Commands and associations the employment office, will select nominations from those available, advising the prefect who will provide assignment and mobilization as is stated in section a) above.

Whenever the employment office has not available disoccupied citizens, by name, of the requested category, they will immediately contact the prefect who will in turn revert the case to a neighbouring provincial prefect to obtain - when possible - a voluntary migration of citizens from province to province for the purpose of working.

The abovementioned migration will have to be reported from time to time to this Ministry - Labor Service - with the indication as to number, and the category of the migrated citizens, and to what assigned, and even what provinces migrated from and to.

7) The Commands and the administrations referred to in No. 5, in order to maintain their proper dependencies or the dependencies of firms or services operating under their control, where citizens are already employed, can require the mobilization of the latter

1056

- 4 -

according to procedure and dispositions aforementioned.

- 8) The cessation of mobilization is brought about when:
 - a) enlisted in the service;
 - b) if requested by the Command or Administration as per No. 5 and 7;
 - c) on receipt of a request sent by the interested party.

The cessation of the mobilization will from time to time be declared by the prefect commissioner of the provincial economic council, to whom the Commands and the Administrations aforementioned are required to pass on, the names of conscripted citizens, and for those for which a request for declaration of cessation of mobilization conditions has been made, limited instead to the requests advanced by the interested parties in the Commands and Administrations on which they are dependent directly or indirectly, the prefect will make decisions, heard by the Command of the same Administration.

- 9) Although not effected by the present circular there remains in force, where applicable, the dispositions contained in the only text of the law concerning ~~discipline of citizens~~ discipline of citizens in time of war, approved by R.D. 31 October 1942 No. 1611, and in the regulation for the execution of said text, approved by R.D. 31 October 1942 No. 1612.

HEADQUARTERS
ALLIED CONTROL COMMISSION
Agriculture Sub-Commission
A.P.O. 394

29 April 1944

ITALIAN AGRICULTURAL ORGANIZATIONS INCLUDING WHEAT AND
BARLEY AMASSING PROGRAM AND DEFECTS AS AGREED UPON BY
HQ/ACC/AGRIC/SUB COMMISSION AND ITALIAN MINISTRY OF
AGRICULTURE.

(In accordance with agreement in RC Conference April
1944 these documents outline first priority program
of work for Allied ACC-AM Officers)

MINISTRY OF AGRICULTURE AND FORESTS

SALERNO, 28 April 1944

TO: Their Excellencies the Prefects,
Compartmental Agricultural Inspectorates,
Provincial Agricultural Inspectorates
National Association of Economic Bodies of Agriculture

Copy to:

His Excellency the High Commissioner for Sicily
His Excellency the High Commissioner for Sardinia
Office of the Commissioner General for Alimentation
Italian Federation of Agricultural Consorzi

In view of the unusual conditions and necessities with which our country is
faced at this time, this Ministry deems it advisable and indispensable to re-
arrange its peripheral organization and coordinate it accordingly, in order to
insure maximum efficiency, especially as regards the amassing of such crops as
will be ordered whenever necessary.

The enclosed instructions define the particular tasks assigned to each of the
offices addressed herein in connection with the operation of AMASSI; these tasks
and attributes may be summarized as follows:

- a. Compartmental and Provincial Inspectorates represent the highest
agricultural authority within the scope of their respective jurisdictions, and
shall assume full responsibility for the proper execution of amassing operations
and for the performance of all agricultural activities;
- b. Provincial Committees for Agriculture, which shall be advisory
bodies upon whom the Chiefs of the Agricultural Inspectorates may call for advice
concerning all problems affecting agriculture within their respective provincial
sphere;
- c. Communal Committee for Agriculture, which in each Comune shall be

MINISTRY OF AGRICULTURE AND FORESTS

Salerno, 28 April 1944

TO: Their Excellencies the Prefects,
 Departmental Agricultural Inspectorates,
 Provincial Agricultural Inspectorates
 National Association of Economic Bodies of Agriculture

Copy to:

His Excellency the High Commissioner for Sicily
 His Excellency the High Commissioner for Sardinia
 Office of the Commissioner General for Alimentation
 Italian Federation of Agricultural Consorzi

In view of the unusual conditions and necessities with which our country is faced at this time, this Ministry deems it advisable and indispensable to re-arrange its peripheral organization and coordinate it accordingly, in order to insure maximum efficiency, especially as regards the amassing of such crops as will be ordered whenever necessary.

The enclosed instructions define the particular tasks assigned to each of the offices addressed herein in connection with the operation of Ammassi; these tasks and attributes may be summarized as follows:

a. Departmental and Provincial Inspectorates represent the highest agricultural authority within the scope of their respective jurisdictions, and shall assume full responsibility for the proper execution of amassing operations and for the performance of all agricultural activities;

b. Provincial Committees for Agriculture, which shall be advisory bodies upon whom the Chiefs of the Agricultural Inspectorates may call for advice concerning all problems affecting agriculture within their respective provincial sphere;

c. Communal Committee for Agriculture, which in each Comune shall be the organs charged to deal with all activities pertaining to amassing and assistance to Ammassi, and shall act as fair arbiters in all controversies arising from the execution of Ammassi.

d. Provincial Agricultural Consorzi, which constitute the executive organs for the carrying out of amassing operations.

All offices and agencies addressed herein shall, with the aid of the instructions attached hereto, and within the sphere of their respective jurisdiction, insure that these instructions are immediately complied with by all concerned, and that their offices are placed in full working order.

IN THE "A" ABOVE:

e. Uffici Provinciali Statistico-Economici dell'Agricoltura (U.P.S.E.A.) which shall be charged with organizing the Ammassi under the supervision of the Chief of the Provincial Agricultural Inspector; with the collection and review of production returns and all other activities concerning the supervision of Ammassi

The foregoing is subject to issuance on the part of this Ministry of more detailed instructions concerning each office and each of the respective tasks.

In facing the stupendous task of reconstruction, the reorganization of agriculture, which has begun with the adoption of these initial emergency measures prepared in agreement and with the cooperation of the Agriculture Sub-Commission of the Allied Control Commission, will receive the fullest measure of support from all officers of said Commission, who will join with us in the effort to achieve our common goal.

Signed: PAUSIO GULLO
Minister

DIRECTIONS OF ORGANIZATION AND OF OPERATION

This Ministry, reserving the right to issue full regulations in regard to the organization and operation of its Compartmental and Provincial Inspectorates, and to define their respective responsibilities, issues now in general terms proper instructions on the subject as has been agreed upon with the Allied Control Commission - Agriculture Sub-Commission. The especially critical food situation in which our country finds itself, undermining at the same public order and safety, requires the hardest and most conscientious effort on the part of all Government bureaus, each operating within its respective jurisdiction.

The Ministry of Agriculture has the task, heavy with responsibility, of organizing the ammasso or the control of those agricultural products which it is considered feasible to submit to such compulsion.

The Allied control Commission attributes the greatest importance to the success of this program and only if it can be convinced that everything has been done at our end to maximize crop production and to insure that the ammassing program shows maximum results, will the Italian Government be in a position to approach it with a request for adequate aid, so far as possible.

In view of the above, this Ministry can have no hesitation in ordering that its country offices give all their help so that the returns of the ammassed correspond to the imperative needs of the moment.

Therefore, the foremost activity of Compartmental Inspectorates, as also of Provincial Inspectorates, must be, during the period of accumulation of the various products for which this measure will have been ordered, that of contributing to the utmost to the attainment of the goal indicated.

Within each Inspectorate, the Head of the Inspectorate himself is responsible to the Ministry for the proper operation of the ammassi in his respective compartmental and provincial sphere. For that purpose instructions will be issued at once to the "Associazione Nazionale degli Enti Economici dell'Agricoltura" - which, due to modifications of organization and assignment will henceforth be called "Ufficio Nazionale Statistico - Economico dell'Agricoltura (U.N.S.E.A.)" to place under the technical direction of the Provincial Agrarian Inspectorates their Provincial Offices and their respective zone offices, so that the organi-

Minister

DIRECTIONS OF ORGANIZATION AND OF OPERATION

This Ministry, reserving the right to issue full regulations in regard to the organization and operation of its Compartmental and Provincial Inspectorates, and to define their respective responsibilities, issues now in general terms proper instructions on the subject as has been agreed upon with the Allied Control Commission - Agriculture Sub-Commission. The especially critical food situation in which our country finds itself, undermining at the base public order and safety, requires the hardest and most conscientious effort on the part of all Government bureaus, each operating within its respective jurisdiction.

The Ministry of Agriculture has the task, heavy with responsibility, of organizing the Amasso or the control of those agricultural products which it is considered feasible to submit to such compulsion.

The Allied control Commission attributes the greatest importance to the success of this program and only if it can be convinced that everything has been done at our end to maximize crop production and to insure that the amassing program shows maximum results, will the Italian Government be in a position to approach it with a request for adequate aid, as far as possible.

In view of the above, this Ministry can have no hesitation in ordering that its country offices give all their help so that the returns of the amassi correspond to the imperious needs of the moment.

Therefore, the foremost activity of Compartmental Inspectorates, as also of Provincial Inspectorates, must be, during the period of accumulation of the various products for which this measure will have been ordered, that of contributing to the utmost to the attainment of the goal indicated.

Within each Inspectorate, the Head of the Inspectorate himself is responsible to the Ministry for the proper operation of the amassi in his respective compartmental and provincial sphere. For that purpose instructions will be issued at once to the "Associazioni Nazionali degli Enti Economici dell'Agricoltura" - which, due to modifications of organization and assignment will henceforth be called "Ufficio Nazionale Statistico - Economico dell'Agricoltura (U.N.S.E.A.)" to place under the technical direction of the Provincial Agrarian Inspectorates their Provincial Offices and their respective zone offices, so that the organization of assessment and location of products subject to the amasso will take place under the Agrarian Provincial Inspectors who, consequently, will themselves assume direct responsibility for operation and success of the amassi.

Present conditions have, for the time being, made it inadvisable to proceed with the absorption of U.P.S.I.A. Offices by the State administration, but if, on the one hand, this will keep said offices separate from the Agricultural Inspectorates from an administrative and jurisdictional standpoint, it must not, on the other hand, result in a separation in anything pertaining to the technical side or even less in that which concerns, more immediately, the technique of amassing or any other activity involving propaganda, statistics, or assistance to farmers, concerning which Compartmental Inspectorates might wish to avail themselves of the services of these offices.

So that control on the part of the Inspectorates be complete, it should extend also to the Provincial Agrarian Comandari in their function of executive agencies, for account of the State, of the amasso. To guarantee to farmers that the amount of produce to be delivered to the amasso be suitably appraised in proportion with the production obtained, in every Commune there will be constituted an appropriate Committee which will function as arbitrator between the farmers and the agencies charged with amasso activities. Instructions are enclosed (Appendix 4) in regard to the manner of cooperation among the various agencies charged with amasso activities a cooperation which must be close and full, for on harmonious action depends the success of the amasso.

Attached as Appendix 13 is a copy of the proposed wheat and barley amassing and retention decree. Supplies of the necessary schedules agreed upon by the Ministry of Agriculture and the Agriculture Sub-Commission will be available as the statistical basis for this work.

While awaiting the proper moment to get their own work and that of their officials going, to make the organization of the amasso and the relative returns as efficient as possible, the Departmental and Provincial Inspectorates should not full meanwhile to carry on in respect to the farmers a work of persuasive publicity, verbal and printed, to induce them to accept the amasso control as an inescapable and also sacred and humanitarian duty, on the fulfillment of which, one cannot hesitate to say so, depends under varying aspects our future both near and distant.

This Ministry will arrange to fix, in agreement with the Allied Control Commission, the prices of wheat and of the other products which are to be placed under amasso control, in a quite remunerative measure so that the price will not constitute an incentive to evasion, but to delivery.

The fulfillment of these tasks, as well as of all those incumbent upon our subordinate Agricultural Inspectorates, brings out the absolute need for means of transportation. Present conditions do not enable this Ministry to supply motor transportation directly, however, the Ministry of the Interior will be approached in order that, through the intermediary of the Prefects everything possible be done to furnish Inspectorates with the necessary means of transportation, even if only temporarily.

After this introduction, in view of contingent necessities, following are provisions of regulatory character for the organization and operation of the Inspectorates.

I. Departmental Agricultural Inspectorates

As has already been stated in previous ministerial communications, it is the intention of this Ministry that the Departmental Agriculture Inspectorates assume full and effective responsibility to the Ministry for the coordinated execution of all activities within the field of agrarian technique in general.

Therefore, the Departmental Agrarian Inspector represents within his compartment the highest hierarchical agrarian authority and is responsible with respect to the Ministry, both for the carrying out of the specific tasks institutionally required of the agrarian Departmental Inspectorates, and also for the proper

attached as Appendix "B" is a copy of the proposed wheat and barley amassing and retention decrees. Supplies of the necessary schedules agreed upon by the Ministry of Agriculture and the Agriculture Sub-Commission will be available as the statistical basis for this work.

This Ministry will arrange to fix, in agreement with the Allied Control Commission, the prices of wheat and of the other products which are to be placed under amassment control, in a quite remunerative measure so that the price will not constitute an incentive to evasion, but to delivery.

The fulfillment of these tasks, as well as of all those incumbent upon our subordinate agricultural Inspectorates, brings out the absolute need for means of transportation. Present conditions do not enable this Ministry to supply motor transportation directly, however, the Ministry of the Interior will be approached in order that, through the intermediary of the Prefects everything possible be done to furnish Inspectorates with the necessary means of transportation, even if only temporarily.

XXXXXXXXXXXXXXXXXXXX

After this introduction, in view of contingent necessities, following are provisions of regulatory character for the organization and operation of the Inspectorates.

I Compartmental Agricultural Inspectorates

As has already been stated in previous ministerial communications, it is the intention of this Ministry that the Compartmental Agriculture Inspectors assume full and effective responsibility to the Ministry for the coordinated execution of all activities within the field of agrarian technique in general.

Therefore, the Compartmental Agrarian Inspector represents within his compartment the highest hierarchical agrarian authority and is responsible with respect to the Ministry, both for the carrying out of the specific tasks institutionally required of the agrarian Compartmental Inspectorates, and also for the proper functioning of the services of the Provincial Inspectorates, both as regards the activity and the control of personnel, as also to assure execution and coordinated application of directives, rules and regulations issued by the Ministry to the Provincial Inspectorates for the organization and promotion of agriculture.

To attain such purpose, the Compartmental Inspector is authorized to issue regulatory provisions to his Provincial Inspectorates, of which, ~~1884~~ prior notification will always be made to this Ministry for proper approval.

In connection with the above, this Ministry reserves the right, in accordance with the Allied Control Commission, to define what should be in accordance with the requirements of each Inspectorate- the respective personnel setup, which in each case will be kept within the limits of strict necessity.

The following directives define likewise the tasks expected of the Compartmental Agrarian Inspectors.

1. As already recommended by prior ministerial communication, to the limit and without reserve must be the cooperation with the Allied Liaison officers, so that, through the combined action of this Ministry and of the Allied Control Commission, reorganization and re-constitution of our agriculture may be attained.

2. The service of statistical information assumes utmost importance at the present moment. The Compartmental Inspector will entrust a suitable official with the service of agrarian statistics and will see to it:

a. That the Statistical data requires of the Provincial Inspectorates, both periodical ones consisting of standard forms and schedules and those that may be required in case of necessity, be collected and worked out with utmost care and promptly forwarded by proper channels to the Ministry and the Allied Control Commission on the prescribed due-dates.

b. The Compartmental Inspector shall summarize and prepare provincial data in relation to his own Compartment before transmittal to the Ministry and to the Allied Control Commission. This also applies to those inquiries for data and information which may from time to time be requested by this Ministry and the Allied Control Commission, and you are reminded that any communication of the kind to be made to said Commission or its components, must be forwarded for information also to this Ministry. Unchanged remains the instruction that information gathered for agrarian statistical purposes must not in any way and for any motive be divulged and communicated for fiscal purposes.

3. In view of present convergences and by virtue of the fact that Italy is almost bereft of all that which constitutes material of supply of technical and instrumental means for agriculture and that only a part thereof can be obtained through the Allied Control Commission, the Compartmental Inspector must seriously undertake to advise this Ministry of relative needs, with such advance notice, in respect to the time of use, as will permit to provide supply at the proper time.

The Compartmental Inspectorate, in drawing up at once a suitable program of coordinated work, in relation to various cultural needs and the various operations of seed and harvest, will request at the proper time data and information from Provincial Inspectorates under his jurisdiction and will forward same to this Ministry after combining and elaborating same in respect to the Compartment.

4. A further task of the Agrarian Compartmental Inspector will be to follow the activities of the various Agrarian Institutions under and supervised by the Ministry, which are operating within the Compartment, submitting, if needed, proposals so as to obtain coordination of the scientific and technical work undertaken by them, as also the utmost correlation of their activities to the needs of agriculture which must be appraised with respect to the present moment.

II. Provincial Agricultural Inspectorates-

2. The service of statistical information assumes utmost importance at the present moment. The Compartmental Inspector will entrust a suitable official with the service of agrarian statistics and will see to it:

a. That the Statistical data required of the Provincial Inspectorates, both periodical ones consisting of standard forms and schedules and those that may be required in case of necessity, be collected and worked out with utmost care and promptly forwarded by proper channels to the Ministry and the Allied Control Commission on the prescribed due-dates.

b. The Compartmental Inspector shall summarize and prepare provincial data in relation to his own Compartment before transmitting to the Ministry and to the Allied Control Commission. This also applies to those inquiries for data and information which may from time to time be requested by this Ministry and the Allied Control Commission, and you are reminded that any communication of the kind to be made to said Commission or its components, must be forwarded for information also to this Ministry. Unchanged remains the instruction that information gathered for agrarian statistical purposes must not in any way and for any motive be divulged and communicated for fiscal purposes.

3. In view of present contingencies and by virtue of the fact that Italy is almost bereft of all that which constitutes material of supply of technical and instrumental means for agriculture and that only a part thereof can be obtained through the Allied Control Commission, the Compartmental Inspector must seriously undertake to advise this Ministry of relative needs, with such advance notice, in respect to the time of use, as will permit to provide supply at the proper time.

The Compartmental Inspectorate, in drawing up at once a suitable program of coordinated work, in relation to various cultural needs and the various operations of sowing and harvest, will request at the proper time data and information from Provincial Inspectorates under his jurisdiction and will forward same to this Ministry after combining and elaborating same in respect to the Compartment.

4. A further task of the Agrarian Compartmental Inspector will be to follow the activities of the various Agrarian Institutions under and supervised by the Ministry, which are operating within the Compartment, submitting, if needed, proposals so as to obtain coordination of the scientific and technical work undertaken by them, as also the utmost correlation of their activities to the needs of agriculture which must be appraised with respect to the present moment.

II. Provincial Agricultural Inspectorates-

Within the province under his jurisdiction the Agrarian Provincial Inspector represents the highest agrarian authority inasmuch as he is the direct executor of and is responsible for the carrying out of provisions, directives and regulations of the Ministry, as also of those which the Compartmental Inspectorate, who have jurisdiction over the section, will see fit to impart for the purpose of obtaining coordination and utmost results of services. In case that through war events one only of the Provinces belonging to a certain Compartmental section be liberated and administered by the Italian Government or by the Allied Military Command, the Agrarian Inspector thereof will communicate directly with the Ministry and will undertake temporarily also the responsibilities incumbent upon the Compartmental Inspector.

With respect to the tasks which are below specified, this Ministry, in agreement with the Allied Control Commission, reserves the right to determine the personnel of each Provincial Inspectorate, which however, will be in strict relation with the real operational needs.

The Provincial Inspectors will adhere in their activities, and those of the offices under them, to the following instructions: (1) Collaboration must be to the utmost and unreserved with the Allied officials who have to discharge responsibilities entrusted to them by the Allied Control Commission or who in the Allied Military Commands of the Provinces are charged with functions which render such collaboration necessary. (2) The Inspector must insist that all his officials carry out their jobs with earnestness and alacrity, also seeing to it that in carrying out the required activities there be no lack of guidance, assistance, and encouragement on his part. (3) It has already been made known and is repeated that it is the intention of this Ministry that the Provincial Agrarian Inspectorates resume an activity similar to that carried on with so much success for Italian agriculture, by the former *Carattere ambulant d'agricoltura*. This is particularly necessary in this period in which for known and obvious reasons there can be no issuing of technical agricultural directives of general character, and every farmer needs particular assistance with respect to the specific situation which has been developed on his farm.

Therefore, the Provincial Inspector will arrange the operation of his office in such fashion as to set aside a large part of its activity for publicity and assistance, in this fashion there being attained also the purpose of removing the agriculturalist from an isolation, harmful in various respects, from the State Agricultural Organs. Always with relation to such a criterion, there will be re-established the separate offices of the Section in an amount adequate to the requirements, and for the purpose the Provincial Inspectors will submit studied proposals to the appropriate Departmental Inspectors, who, if they approve, will forward same on to the Ministry with arguments in support. (4) As regards the service of statistics and notification of technical and instrumental agricultural needs, the above mentioned regulations for the Departmental Inspectorates apply. It is considered appropriate, however, following recent sizing up of data requested, to insist on the necessity:

a. That statistical data be gathered with utmost care so that absolute guarantee of reliability be given and that, therefore, they represent essentially a true picture of the object of the survey and not a forced adaptation of the statistical representation of the subject matter to assumed objectives or opportunism.

b. That appraisals of needs of materials required for agriculture be made following careful examination so as to avoid exorbitant or deficient requests which in either case cause difficulties entailing distrust and perplexity.

5. For the purpose of placing at the disposal of the Provincial Agrarian Inspectorates an adequate advisory body in every province, on new bases and with increased functions the Provincial Agricultural Committees will be reconstituted. Precise instructions will be issued, also as regards appointment of members of said Committees (Appendix "A").

6. With respect to the operation of the office and discharge of their various

In addition, the Zootechnical Section will supervise and control activities in regard to distribution of fodder, including in its activities also the supervision and control with respect to milk collection, and the transportation thereof to centers of distribution, as also in regard to cattle destined for the slaughterhouse. It will be the particular care of the Zootechnical Section to make notification, whenever required, of the seeds in sera and vaccines in relation to the manifestation of particular cattle diseases.

b. The section assigned to cereal cultivation and field crops in general, will see to it that a maximum increase in the area to be sown to wheat will be attained, taking care that for wheat as well as for any other field crop the best cultivation methods possible under present conditions be applied.

To report requirements of seeds and fertilizers, of material for the fight against animals harmful to crops and parasiticides, constitutes similarly a special task for that Section.

c. The Section which has charge of services of tree crops, will discharge similar functions as regards the cultures under its own technical jurisdiction.

There are hereby confirmed the instructions issued previously, concerning the abolition of the Provincial Offices of the Economic Bodies of Agriculture (Cereali-culture, Viticulture, Oliviculture, Ortofrutticoltura, Pastorizia e Zootecnia) and the absorption on the part of Provincial Agricultural Inspectorates of their respective tasks, subject to further announcements by this Ministry concerning the abolition or revamping of other agencies, such as the "Associazione Nazionale Coltivatori piante erbacee oleaginose, Consorzi Provinciali Frutticoltori, etc.

X X X X X X X X

This Ministry and the Allied Control Commission while expressing the most understanding appreciation of the work carried on by the Agrarian Compartmental and Provincial Inspectorates, in their own fields of action, during the tumultuous period undergone by liberated Italy, have the utmost confidence in the will to workable ability of the Ministry's Officials, so that after completion of the current agrarian campaign--which thru forces beyond control has had to be carried on practically without supervision and in almost complete absence of adequate productive means--Italian agriculture may be reorganized and reestablished on that basis of sound technique which at all times has been the aim of this Ministry and the object of passionate and assiduous efforts of all central and peripheral officials.

APPENDIX "A"

ORGANIZATION OF "AMASSI"

1. The National Association of Economic Bodies of Agriculture which, through a change in its organization and tasks, will assume the name of "Officio Nazionale Statistica Economica dell'Agricoltura" (U.N.S.E.A.), shall function as an organ of the State, directly under the Ministry of Agriculture and Forests.

The general duties of U.N.S.E.A. shall include statistical surveys and the assessment and location of agricultural products subject to amassing or blocking as well as to the corresponding controls.

There are likewise attributed to U.N.S.E.A. all functions of a general nature which law No. 566 of 5/18/42 assigns to the Economic Bodies of Agriculture, which functions shall be performed by U.N.S.E.A. in the name and for account of said Bodies.

2. Departmental Agricultural Inspectorates shall be responsible for the coordination of all technical and economic activities which are carried on within the scope of their respective jurisdiction.

3. Within their respective provinces the Provincial Agricultural Inspectorates shall perform all technical and advisory tasks which in any way affect growing crops, livestock, and agricultural products, and which include those previously assigned to peripheral economic organizations.

It is furthermore incumbent upon said Inspectorates to supervise and coordinate all activities of which the aforementioned peripheral organizations are still in charge.

4. Institutions and specialized technical agencies operating under or controlled by the Ministry of Agriculture and Forests shall continue to perform their activities.

5. The Provincial offices of the Association (Offici Accertamenti Agricoli) are hereby re-oriented in accordance with new principles defined hereunder and shall be called Uffici Provinciali Statistico - Economici dell'Agricoltura (U.P.S.E.A.).

These offices shall arrange for the organization and control of the amassing of such products as shall be specified by this Ministry, for the collection and checking of production returns, for the regulation of the amassi themselves, for the assessment and location of products subject to amassing or blocking, for the regulation of transports and for the reporting of violations occurring in connection with amassi.

The functions of said offices include assistance to producers in the fulfillment of tasks and the exercise of rights arising from compliance with amassing and blocking regulations.

U.P.S.E.A. offices constitute likewise agencies at the disposal of Provincial Inspectorates of Agriculture for inquiries and surveys of a statistical and economic nature as well as for the performance of special technical, economic and advisory tasks which this Ministry might assign to them upon the recommendation of said Provincial Inspectorates.

104

There are likewise attributed to U.P.S.R., all functions of a general nature which Law No. 566 of 5/18/42 assigns to the Economic Bodies of Agriculture, which functions shall be performed by U.P.S.R., in the name and for account of said Bodies.

2. Departmental Agricultural Inspectorates shall be responsible for the coordination of all technical and economic activities which are carried on within the scope of their respective jurisdiction.

3. Within their respective provinces the Provincial Agricultural Inspectorates shall perform all technical and advisory tasks which in anyway affect growing crops, livestock, and agricultural products, and which include those previously assigned to peripheral economic organizations.

It is furthermore incumbent upon said Inspectorates to supervise and coordinate all activities of which the aforementioned peripheral organizations are still in charge.

4. Institutions and specialized technical agencies operating under or controlled by the Ministry of Agriculture and Forests shall continue to perform their activities.

5. The Provincial Offices of the Association (Officii Accertamenti Agricoli) are hereby re-created in accordance with new principles defined hereunder and shall be called Offici Provinciali Statistico - Economici dell'Agricoltura (U.P.S.R.).

These offices shall arrange for the organization and control of the assessing of such products as shall be specified by this Ministry, for the collection and checking of production returns, for the regulation of the ammassi themselves, for the assessment and location of products subject to assessing or blocking, for the regulation of transports and for the reporting of violations occurring in connection with ammassi.

The functions of said offices include assistance to producers in the fulfillment of tasks and the exercise of rights arising from compliance with assessing and blocking regulations.

U.P.S.R. offices constitute likewise agencies at the disposal of Provincial Inspectorates of Agriculture for inquiries and surveys of a statistical and economic nature as well as for the performance of special technical, economic and advisory tasks which this Ministry might assign to them upon the recommendation of said Provincial Inspectorates.

The peripheral organization shall be completed with the creation of the Zone offices which are to operate directly under the Provincial Offices, with carefully selected personnel kept within an indispensable minimum.

Zone Offices shall be sufficient in number to insure maximum efficiency in the entire economic organization. The jurisdiction of each Office may extend to one or more Communes, according to the agricultural importance of said Communes and to liaison possibilities, and shall be located in the Commune which is most favorably situated from the standpoint of maintaining relations with the entire controlled zone, and which might be the assessing center, or a market place, or a fair town, or any place farmers might have reason to visit frequently.

6. There shall remain in force current provisions which establish Provincial Agricultural Consorci as the executive organs for the voluntary and compulsory marketing of agricultural products, and, if necessary, for the protection of growing crops and agricultural products against harmful influences.

In compliance with the provisions contained in this circular, U.R.S.E., shall immediately place the proposed central and peripheral offices in working order, and shall arrange for the most accurate selection of the respective personnel, both from the standpoint of efficiency and of political reliability.

Moreover, since U.R.S.E. will be called upon to manage the assets of agencies which it represents, it shall set up within its organization a service completely separate from an administrative standpoint, for the management of said assets in accordance with instructions to be issued for this purpose.

-C-C-C-C-C-C-C-C-C-C-C-C-C-C-C-C-

In accordance with directives hereunder, there are restored the Provincial committees for agriculture who are to furnish advice concerning the coordination of all measures to be enacted in the province in connection with the regulation of production, the distribution of technical means and all promotional activities affecting agricultural activities; there shall likewise be restored the Provincial Committees to whose tasks shall be added that of furnishing advice and of settling any controversies which might arise in connection with the observance of existing regulations.

Provincial Committees for agriculture shall be appointed immediately in each Province, as follows:

President— The Chief of the Provincial Agricultural Inspectorate.

Members

- a. a representative of the Prefecture
- b. a representative of the Provincial Economic Council, for the agriculture and Forest Section thereof.
- c. The Director of the Provincial Agr. Consorcio
- d. a farmer representing owners and tenant managers
- e. a farmer representing owners and tenants who are personal operators.
- f. a representative chosen from among workers in agriculture.
- g. a farmer representing agricultural technicians
- h. The Director of U.R.S.E., (ex officio "accertamenti Agricoli") who shall act as Secretary.

The Chief of the Provincial Agricultural Inspectorate shall appoint such persons as he deems eligible for membership in the Committee, after obtaining the Prefect's approval in respect thereto.

The same procedure shall be followed by the President in appointing the Vice-President.

In each Comune there shall be constituted a single Committee which shall be named Communal Committee for agriculture and which shall perform the following:

Membership - Local Government Commander

The head of the ISM zone office, who shall act as secretary.

Two representative cases of the workers in horticulture, distinguishing in season, are shown in figure 5.11. The first case is a worker in the horticulture sector, who is a member of the horticulture sector union.

The mayor shall appoint such persons as he deems eligible for membership in the Committee, after obtaining the approval of the Provincial Committee for agriculture, in respect thereto.

APPENDIX B

TRANSLATION

Draft of Ministerial Decree regulating the amassing of wheat and barley produced in 1944.

BY VERGEE CT: R.D.L. No. 397 of May 10, 1943 containing provisions for the comprehensive regulation of the 1943 production of cereals and dried horse beans.

N.D. of May 26, 1943, fixing retention rates, on cereals and dried horse beans
 M.D. of June 11, 1943 concerning wheat retentions authorized for farm operators,
 M.D. of June 15, 1943 regulating the milling of cereals retained for family use,
 Order No. I of the Commissioner General for Alimentation, dated September 24, 43.
 R.L.D. No. 63 of February 25, 1944 ordering the absorption of the Office of the
 Commissioner General for Alimentation by the Ministry of Agriculture and Forests,
 R.L.D. No. 245 of April 22, 1943 concerning penalties for failure to deliver
 grains to Amassat.

WHEREAS, due to the present emergency it is absolutely necessary to insure vital supplies to the Armed Forces and to the civilian population,

WHEREAS, therefore, it is deemed advisable to restore the amassing of wheat and barley - subject to issuing subsequent directives regulating the amassing or control of other crops - produced during the 1943 - 1944 season; and to regulate the delivery, transport, processing and distribution thereof,
 The Minister of Agriculture and Forests HEREBY DECREES

ART. 1

The following products, by whomsoever and for whatever reason held, shall be subject to amassing; wheat and barley. Provisions of R.D.L. No. 397, of May 10, 1943, concerning the amassing of wheat and barley, shall remain in force.

All products delivered to Amassat shall be paid for immediately in compliance with Art. 10 of the above mentioned Decree, at prices fixed in relation to present costs of production as evidenced by cost analyses.

ART. 2

There are hereby restored the provisions governing the milling of wheat and barley produced in 1944, to be retained for family consumption, as directed by Ministerial Decree of June 15, 1943 with the exception of Art. 4 relating to amounts to be retained for family consumption, which are fixed in Art. 3 hereunder.

There are hereby abrogated the provisions relating to the expiration in advance of milling permits covered by order No. I of the Commissioner General for Alimentation. All amounts retained for family food requirements must be accounted for by means of the milling permits issued by Communal authorities, in accordance with existing regulations. Such amounts cannot be bought or sold.

ART. 3

R.D. of May 28, 1943, fixing retention rates, on cereals and dried horse beans
 M.D. of June 11, 1943 concerning wheat retentions authorized for farm operators,
 M.D. of June 15, 1943 regulating the milling of cereals retained for family use,
 Order No. I of the Commissioner General for Alimentation, dated September 24, 43.
 R.L.D. No. 63 of February 25, 1944 ordering the absorption of the Office of the
 Commissioner General for Alimentation by the Ministry of Agriculture and Forests,
 R.L.D. No. 245 of April 22, 1943 concerning penalties for failure to deliver
 grains to Amassi.

WHEREAS, due to the present emergency it is absolutely necessary to insure vital
 supplies to the Armed Forces and to the civilian population,

WHEREAS, therefore, it is deemed advisable to restore the amassing of wheat
 and barley - subject to issuing subsequent directives regulating the amassing or
 control of other crops - produced during the 1943 - 1944 season; and to regulate the
 delivery, transport, processing and distribution thereof,
 The Minister of Agriculture and Forests HERBIV DECREE

ART. 1

The following products, by whatsoever and for whatever reason held, shall be subject
 to amassing; wheat and barley. Provisions of R.D.L. No. 397, of May 10, 1943, con-
 cerning the amassing of wheat and barley, shall remain in force.

All products delivered to Amassi shall be paid for immediately in compliance with
 Art. 10 of the above mentioned Decree, at prices fixed in relation to present costs
 of production as evidenced by cost analyses.

ART. 2

There are hereby restored the provisions governing the milling of wheat and barley
 produced in 1944, to be retained for family consumption, as directed by Ministerial
 Decree of June 15, 1943 with the exception of Art. 4 relating to amounts to be re-
 tained for family consumption, which are fixed in Art. 3 hereunder.

There are hereby abrogated the provisions relating to the expiration in advance of
 milling permits covered by order No. 1 of the Commissioner General for Alimentation.
 All amounts retained for family food requirements must be accounted for by means of
 the milling permits issued by Communal authorities, in accordance with existing
 regulations. Such amounts cannot be bought or sold.

ART. 3

Maximum amounts of wheat which may be retained from the 1944 crop for family consump-
 tion under the exemption from the amassing obligation, in accordance with Art. 2 of
 R.D.L. No. 397 of May 10, 1943, are set as follows for each person of the following
 groups; it being understood that no one person shall be entitled to more than one
 retention:

1047

a. non-municipal operators of cereal farms of which they are owners or
 "Enfiteuti" (long-term tenants) or usufructuaries or tenants (operators with hired
 help, or on a half-share tenancy basis, or on a share-tenancy or share-cropping
 basis) who personally and continuously attend to the management of the farm to the
 exclusion of any other activity; 1.50 quintals of wheat for such operator and for
 each cohabitant dependent member of his family and cohabitant help.

- 2 -

- b. manual operators of cereal farms, of which they are owners, or "quintanti" or (long-term tenants), or usufructuaries, or tenants (personal operators); 2.00 quintals for the operator and for each cohabitant dependent member of his family and cohabitant help.
- c. share tenants who share in the production of cereal farms; 2.00 quintals for each laborer and for each cohabitant dependent member of his family and cohabitant help.
- d. communities and parishes operating cereal farms as owners or "quintanti" (long-term tenants) or usufructuaries, or tenants; 2.00 quintals per capita for members who manually and permanently attend to the cultivation of the land.

Furthermore, operators who are obligated under wage contracts to make deliveries of cereals to laborers, may retain the following:

- e. for fixed-salary employees and task-labor working on cereal farms, whenever wage contracts specify compensation in kind; up to 2.00 quintals for each laborer and for each cohabitant dependent member of his family.
- f. for share-tenants, share-croppers, fixed-salary employees of farming enterprises and laborers permanently working for such enterprises, whose wage contract specifies deliveries of cereals; up to 2.00 quintals per manual laborer.
- g. for managers and employees of cereal farms who permanently reside thereon and work there continuously and exclusively, in a technical, administrative, managerial or clerical capacity; 1 quintal for each manager or employee and for each cohabitant dependent member of his family.

ART. 4

As a total or partial substitute for wheat there may be retained for each quintal of wheat 1.30 quintals of barley produced on the same farm.

ART. 5

Maximum amounts of wheat and barley which may be retained for seeding, under the exemption from crop control and marketing obligations, are set as follows for each hectare to be cultivated:

Early wheat;	1.30 quintals per hectare
Late wheat;	1.25 " "
Barley, for production as grain;	1.50 quintals per hectare

ART. 6

No wheat or barley retentions are authorized for animal feed.

ART. 7

All provisions which in any way conflict with the ones set forth in this decree

d. communities and parishes operating cereal farms as owners or "Enfitentis" (long-term tenants) or usufructuaries, or tenants; 2.00 quintals per capita for members who manually and permanently attend to the cultivation of the land.

Furthermore, operators who are obligated under wage contracts to make deliveries of cereals to laborers, may retain the following:

e. for fixed-salary employees and task-labor working on cereal farms, whenever wage contracts specify compensation in kind; up to 2.00 quintals for each laborer and for each cohabitant dependent member of his family.

f. for share-tenants, share-croppers, fixed-salary employees of farming enterprises and laborers permanently working for such enterprises, whose wage contract specifies deliveries of cereals; up to 2.00 quintals per manual laborer.

g. for managers and employees of cereal farms who permanently reside therein and work there continuously and exclusively, in a technical, administrative, managerial or clerical capacity; 1 quintal for each manager or employee and for each cohabitant dependent member of his family.

ART. 4

As a total or partial substitute for wheat there may be retained for each quintal of wheat 1.00 quintals of barley produced on the same farm.

ART. 5

Maximum amounts of wheat and barley which may be retained for seeding, under the exemption from crop control and amassing obligations, are set as follows for each hectare to be cultivated:

Early wheat:	1.80 quintals per hectare
Late wheat:	1.25 " "
Barley, for production as grain:	1.50 quintals per hectare

ART. 6

No wheat or barley rations are authorized for animal feed.

ART. 7

All provisions which in any way conflict with the ones set forth in this decree are hereby abrogated. The violation of any of the provisions contained in this decree shall be punishable in accordance with B.D.L. NO. 245 of 22 April 1943.

SUBJECT: Wages - State Employees - Conference.

1. Indemmita di Bombardimento was a Fascist indemnity added, as compensation, to the wages of State employees subject to bombardment.

2. This amount, approximately 22 lire per day, is paid for workers in Naples and 5 and 8 Army areas but is not paid at Salerno, the seat of the Italian Government, and in the South, i.e., it is not paid in areas not subject to bombardment.

3. An earlier request by the Government for 'uniformity' having been rejected, the Government asked for a meeting to consider the question. A hint that wages in General might be raised was given by the Risorgimento 5 May, which stated that Government representatives were meeting representatives of Allied Control Commission on 6 May to consider the possibility of 'economic improvements for State dependants'.... and measures to alleviate the state of hardship of the employees and salaried officials of the State".

4. The meeting was held in Col Adams' office at 1100 hrs. 6 May 44. The following were present:-

Italian Govt. Ing. Quintieri and Prof. Pesenti (Minister and Under-Secretary of Finance); Avv. di Napoli and Sig. Sansonetti (Minister and Under Secretary for Industry Commerce and Labour); Ing. Pano (Under Secretary, Communications); Avv. Lombardo (Under Secretary Ministry of Grace and Justice)

A.C.C. Colonels Adams (Economic Section), Bain (Labour), Foley (Finance), Lt. Col. Smith (Labour), Lt. Comdr. Lawler (Finance), 1st Lt. Solenberger (Labour), Mr. Wedleigh and Major Sharp (Economic Section).

5. Ing. Quintieri, was the main spokesman for the Italian Government. He wished the 'bombardimento' to become part of the base wage and not variable in accordance with the existence of 'bombardment'. The maximum increase would be 22 lire per day. The Government realised that 'Bombardimento' would be a misnomer for such an increase but preferred this course rather than that of giving a clear-cut increase. The increase would apply to all State and communal employees not now receiving the indemnity and would cost about 100 million lire per month. 1043

Col Bain and Col Foley thought that if changes of a permanent nature were contemplated we should start again, abolish all the various indemnities, which after all were Fascist in origin, and make a uniform wage scale applying to all State employees.

Ing. Quintieri agreed. The employer would also know what he had to pay. But he pleaded inadequate staff to make the necessary investigations. Accordingly he would be satisfied by the temporary expedient of making the 'bombardimento' general. Wages for non-State employees were already higher and he did not think the increased wages for State employees would result in demands for other wage increases. In reply to Col. Bain he agreed that he would be satisfied for ACC to choose the best of the six types of 'bombardimento' now operating in the Naples area for general adoption.

3. An earlier request by the Government for 'uniformity' having been rejected, the Government asked for a meeting to consider the question. A hint that wages in general might be raised was given by the Risorgimento 5 May, which stated that Government representatives were meeting representatives of Allied Control Commission on 6 May to consider the possibility of "economic improvements for State dependents and measures to alleviate the state of hardship of the employees and salaried officials of the State".

4. The meeting was held in Col Adams' office at 1100 hrs. 6 May 44. The following were present:-

Italian Govt. Ing. Quintieri and Prof. Pesenti (Minister and Under-Secretary of Finance); Avv. di Napoli and Sig. Sansonetti (Minister and Under Secretary for Industry Commerce and Labour); Ing. Fano (Under Secretary, Communications); Avv. Lombardo (Under Secretary Ministry of Grace and Justice)

A.C.C. Colonels Adams (Economic Section), Bain (Labour), Foley (Finance), Lt. Col. Smith (Labour), Lt. Comdr. Lawler (Finance), 1st Lt. Selenberger (Labour), Mr. Wadleigh and Major Sharp (Economic Section).

5. Ing. Quintieri, was the main spokesman for the Italian Government. He wished the "bombardimento" to become part of the base wage and not variable in accordance with the existence of "bombardment". The maximum increase would be 22 lire per day. The Government realised that "Bombardimento" would be a misnomer for such an increase but preferred this course rather than that of giving a clear-cut increase. The increase would apply to all State and communal employees not now receiving the indemnity and would cost about 100 million lire per month.

Col Bain and Col Foley thought that if changes of a permanent nature were contemplated we should start again, abolish all the various indemnities, which after all were Fascist in origin, and make a uniform wage scale applying to all State employees.

Ing. Quintieri agreed. The employer would also know what he had to pay. But he pleaded inadequate staff to make the necessary investigations. Accordingly he would be satisfied by the temporary expedient of making the "bombardimento" general. Wages for non-State employees were already higher and he did not think the increased wages for State employees would result in demands for other wage increases. In reply to Col. Bain he agreed that he would be satisfied for ACC to choose the best of the six types of "bombardimento" now operating in the Naples area for general adoption.

6. The attached memorandum of proposals was then submitted for consideration. ACC stated that an immediate decision on the proposals could not be made but comments and possibly alternative proposals would be forwarded to the Italian Government on Monday, 15 May. Another meeting could then be arranged.

7. The following interim comments were made on the proposals:-

Clause 1 - Agreed that the name should be changed to "presenza".

Clause 2 - Agreed that advances of wages should be repaid monthly but no approval to reference to salary for a 13th month.

Clause 3 - Approved in principle there should not be a larger allowance

- 2 -

for the 10th than for the 9th child as in Fascist Italy.

Clause 4 - Col. Bain said there could be no question of adding bonuses for the number of hours worked per month. Payments would be made only for genuine overtime.

Clauses 5, 6, 7, 8, and 9 - were all understood and would be examined and recommendations made.

Clause 10 - Agreed. This would give uniformity. e.g., some tax collectors would receive 100% increase.

ALLIED CONTROL COMMISSION
LABOR SUB-COMMISSION

6 May 1944

SUBJECT: Indennità di Bombardimento (Information based on State and para-Statel wage study in Region 3)

NOMENCLATURE-- The Bombardment Indemnity is known by the following different names in Region 3:

1. Indennità di Bombardimento
2. Indennità Giornaliere di Bombardimento
3. Indennità di Presenza
4. Indennità Giornaliere
5. Indennità di Allarme o di Presenza
6. Indennità Giornaliere di Allarme o di Bombardimento

PAYMENT PROVISION-- The Indemnity is paid monthly to all State and para-Statel employees, except for bachelors in Benevento Province who are excluded. Regional Commissioner in Region 3 authorized indefinite continuance of payments 28 December 1943. Italian Government recently authorized continuance in its territory until 6 months after end of war.

METHODS OF CALCULATION-- The following different methods of calculation of the Indemnity are used in Region 3:

NAPLES PROVINCE

1043

1. State Employees (applicable to Intendenza di Finanza, Provincial Administration, Communal Administration)-- Take 1/3 of Indennità di Trasferta plus 1/3 of Aggiunta di Famiglia. Multiply by 30. Deduct 125% augmentation of Temporary War Allowance for employees below grade VIII and subtract all of Temporary War Allowance, as augmented July 1943, for employees grade VIII or above.
2. Previdenza Sociale-- Add 1/3 of Aggiunta di Famiglia to payment shown in Table of Payments for this Indemnity.
3. Malattia--Fixed rate of L. 25 per day for men (L. 15 plus L. 10 for Indennità di Mensa) and L. 15 (817) for women and children.
4. Infortuni-- Same as for State Employees, except that there is no deduction of augmented Temporary War Allowance.

Note: The 70% wage increase order of AMG was applied separately to the Indemnity by Previdenza Sociale and Infortuni; applied to Indemnity added to other items by remaining agencies.

-2-

AVELLINO PROVINCE

Same as Naples, except for Previdenza Sociale, which uses Table of Payments without addition of $\frac{1}{8}$ of Aggiunta di Famiglia.

Note: The 70% wage increase order was applied separately to the Indemnity by all agencies.

BENEVENTO PROVINCE

Same as Naples, except, as noted under "Payment Provisions" above, Bachelors are excluded from benefits.

Note: The 70% wage increase order was applied separately to the Indemnity by all agencies except Infortuni, which added it in with other items.

SUBJECT: Agricultural labor for wheat harvest

TO: Director, Labor subcommission
 provincia building
 Naples

1. On yesterday I took regional director Bruni and provincial director Rotunno to Bari where we had a conference with the officials of the agricultural syndicate in Bari with reference to importing labor for the seasonal wheat harvest. We found them cooperative and helpful and preliminary arrangements were made with them. There will also be another meeting in Bari on next Thursday at which time the syndicate representatives from the other Apulian provinces will be present and we can arrange with them for such labor as is available in their respective provinces.

2. In accordance with instructions received from Col. Gordon-Smith, the DDL, at the meeting of Labor subcommittee for district No. 2 in Bari last week, I called upon the DADL for Bari and explained our plans for importing labor from Apulia and told him approximately how many workers will be needed. The DADL did not give his approval for any laborers to be imported from the vicinity of Bari itself. He said he was endeavoring now to recruit some 2,000 more workers himself. He said, however, he did not feel that he would have any objection if we imported workers from other parts of Apulia and pointed out on the map the parts he referred to. The other DADL's in Apulia will no doubt object to labor being imported from their immediate vicinities just as the DADL in Bari does.

3. Realizing the importance of harvesting the wheat I shall proceed with my plans and will endeavor if possible to obtain the labor from such areas where there will be no objection. The Labor subcommission may, however, feel it worthwhile to present the matter to higher authority in case there should be conflict with the DADL's.

SUBJECT: Labor for wheat harvest - Your file No. LAB 091.4614 ✓

TO: Director, Labor Subcommittee, Naples

1. Thank you for your memo of April 21 which reached me today.

2. Due to the very poor mail service between Matera and Naples my letter explaining the latest developments in this matter probably was delayed in reaching you. We are proceeding along the lines of your instructions. Before receiving your memo of April 21 I had contacted the DADL in Bari about this matter and written a report to the Labor Subcommittee. It is realized the military must have the preference for labor but also the wheat is vitally important and I shall endeavor to obtain the necessary labor from those areas where there will be no conflict with the DADL's. I am not at all sure, however, that sufficient labor can be obtained from those very small areas permitted me by the DADL's.

3. There will be no difficulty about transportation since the train service from Apuglia into Matera and Potenza is quite adequate for the laborers and they have used this transportation for years.

4. Your memo mentioned an attached Ministerial circular reactivating the Italian conscription law. The circular was not attached and I should like very much to have it for guidance.

TO: Director, Labor subcommission.

1. For the sake of the record and for the information of the subcommission, I attach hereto an official copy of the telegram sent by the Italian Minister of Agriculture to all the prefetti. This telegram plainly suggests a meeting for the purpose of discussing agricultural wages. The meeting was held and was attended by the Labor Officer. The only matter which was discussed was the matter of wages and I so reported to the subcommission.

2. I attach hereto the official copy of the telegram received from Naples in reply to my telegram about the Matera meeting. You will note General MacFarlane's telegram says, "confirmed by Minister Agriculture wages not an issue at Matera meeting." I am at a loss to know how the Minister of Agriculture could "confirm" this. I attended the meeting and the ONLY issue discussed was the issue of wages.

TRANSLATION

Salerno April 5, 44

SUBJECT: Agricultural manual-laborers unemployment.

The Provincial Union of Agricultural Laborers of Bari informs this Ministry of the troubles resulting from the fact that actually on the part of Allied Authorities is not consented the free course of agricultural laborers from the Province of Bari to the Province of Foggia.

The Province of Bari has a thick rural population whose availability surpasses the local request of work, therefore for the useful liaison of excess, traditionally was created a considerable migratory run of laborers towards neighbouring provinces, having a lower demographic thickness and especially towards the Province of Foggia, particularly during Spring and Summer time, in which months greater is the request of handiwork for agricultural cultivations.

The actual transfer difficulty may produce from a side an anxious pressure of laborers who will remain without work, whose consequences could be reflected also on the public order, from the other side a more reduced production in those zones where the available deficiency of work will not consent the opportune and complete execution of agricultural works.

Therefore, this Ministry begs this Sub Commission to examine the possibility that proper measures be taken to consent the easy transfer of agricultural laborers between the above said two provinces, to eliminate the serious preoccupation in the responsible organs.

The Minister

SALERNO

OGGETTO : Disoccupazione del bracciantato agricolo in provincia di Bari

L'Unione Provinciale dei Lavoratori dell'Agricoltura di Bari si è rivolta a questo Ministero facendo presente le preoccupazioni che derivano dal fatto che attualmente non è consentito da parte delle autorità alleate il libero afflusso dei lavoratori agricoli dalla Provincia di Bari in quella di Foggia.

La provincia di Bari è caratterizzata da una densa popolazione rurale, la cui disponibilità supera la locale richiesta di lavoro, sicchè per l'utile collocamento della eccedenza si era creata tradizionalmente una forte corrente migratoria di lavoratori verso le provincie contermini, a più bassa densità demografica, e specie verso quella di Foggia, particolarmente durante i periodi primaverile ed estivo, nei quali maggiore è la richiesta di manodopera per le coltivazioni agricole.

L'attuale difficoltà di trasferimento può produrre da una parte una preoccupante pressione dei braccianti che restano senza lavoro, le cui conseguenze potrebbero avere ripercussioni anche sull'ordine pubblico, e dall'altra una più ridotta produzione in quelle zone dove la deficienza della disponibilità di lavoro non consente l'esecuzione tempestiva e completa delle cure culturali.

Questo Ministero, pertanto, si rivolge a codesta Sotto commissione perchè voglia compiacersi esaminare la possibilità che siano adottati provvedimenti intesi a consentire il facile movimento dei lavoratori agricoli fra le due provincie segnalate, ed eliminare in questo modo un motivo di grave preoccupazione negli organi responsabili.

IL MINISTRO

Nella risposta citare il numero di protocollo.
