PROVINCE OF BOLOGNA

Urban Service

Bologna - A temporarily telephone exchange O.B. 1440 numbers in efficient.

CI.

The urban distribution system being injured only 700 subscribers have been connected.

The principal distribution system in underground cable is repaired but the secondary in open air cable has been greatly injured by the war, and we are repairing it as quickly as possible.

Full telephone exchange, with 6 positions. We are trying to have 10 positions with 80 trunk lines.

As the numbers of subscribers is limited besides of the public call boxes of Via Toschi we are installing 12 public call boxes in the periphery and a public telephone office with 12 call boxes in via Indipendenza.

We are reconstructing the building of the telephone exchange Galvani (Via Goito 13) and assembling the automatic telephone exchange 2000 numbers Trento e Trieste in Via Lenadro Alberti.

Imola - In service a switchboard IB 30 numbers connected with 26 subscribers.

Also a public call box is in service.

We intend to replace later on the above switchboard by a telephon exchange IB 100 numbers.

S. Giovanni in Persiceto- 12 subscribers connected to a telephone exchange IB 50 numbers.

Other places of less telephone importance will have the urban service as soon as we shall have the material occurred.

The Emilia Region switchboard (Col. Bowman) has been connected with the urban system with 3 lines and we have had 2 TIMO operators for the switchboard service.

All instructions have been given to guarantee the ^{priority} for this traffic.

Interurban Service

The Allied have put at the disposal of the TIMO for the civil service besides of the cable circuit Modena-Bologna also an open wire circuit Bologna-Ferrara the 11 th of June, another open wire circuit Bologna-Imola, the 9th of June, another open wire circuit Imola-Faenza the 14th of June and another cable circuit Bologna-Forlì the 9th of June.

have 10 positions with 80 trunk lines. As the numbers of subscribers is limited besides of the public call boxes of Via Toschi we are installing 12 public call boxes in the periphery and a public telephone office with 12 call-boxes in via Indipendenza.

We are reconstructing the building of the telephone exchange Galvani (Via Goito 13) and assembling the automatic telephone exchange 2000 numbers Trento e Trieste in Via Leonardo Alberti.

Imola - In service a switchboard LB 10 numbers connected with 26 subscribers.

Also a public call box is in service.

We intend to replace later on the above switchboard by a telephon exchange LB 100 numbers.

S. Giovanni in Persiceto- 12 subscribers connected to a telephone exchange LB 50 numbers.

Other places of less telephone importance will have the urban service as soon as we shall have the material occurred.

The Emilia Region switchboard (Col. Bowman) has been connected with the urban system with 3 lines and we have lend 2 TIMO open wires for the switchboard service.

All instructions have been given to guarantee the ^{priority} for this traffic.

Interurban Service

The Allied have put at the disposal of the TIMO for the civil service besides of the cable circuit Modena-Bologna also an open wire circuit Bologna-Ferrara the 11 th of June, another open wire circuit Bologna-Imola, the 9th of June, another open wire circuit Imola-Ferrara the 14th of June and another cable circuit Bologna-Ferrara the 9th of June.

The open wire circuits Bologna-Imola and Bologna-Ferrara with repeaters coils have been put at the disposal of the State telegraph at Bologna and at Imola to be used as a superimposed for "omnibus" service Bologna-Imola-Ferrara.

Also the open wire line Bologna-Ferrara given by the Allied has been put at the disposal of the State telegraph for the same reason.

The cable lines given by the Allied between Bologna and Modena, and between Bologna and Ferrara will be used, in the nighttime and when free from telephone service, to transmit telegrams.

- 2 -

through the telephone.
Time has been able to put in service until now only the circuit Bologna-S. Giovanni in Ferruccio using also a part of the lineup at

our disposal by the Allied.
We are repairing the others poles lines greatly injured.
The enclosed plant shows the situation of the interurban circuit.
Time is always in touch with the special Allied services for the work
issued by the Allied and to re-establish the trunk lines.

PROVINCE OF FERRARAUrban service

Ferrara - In efficiency 2600 numbers of an automatic urban telephone exchange of 3400 numbers. We are going to reassemble the remaining. At present 1700 subscribers are connected to the urban system. The toll telephone exchange is in efficiency with 6 switchboards.

Cento - 90 subscribers are connected to a 13 telephone exchange 120 numbers			
Bondeno - 30	"	"	100 "
Copparo - 30	"	"	50 "
Reggio-Renatico - 10	"	"	50 "
Finale - 10	"	"	50 "

The places of less telephonic importance will be in service as soon as we shall have material at our disposal.

The Allied provincial Commissioner is connected with our urban system and all instructions have been done to have the advantages of the priority.

Interurban service

The Allied have put at the disposal of the TIMO for the civil service an open wire line Bologna Ferrara the 11th June and Ferrara Padova the 17th June. Besides of these lines TIMO has not been able to put in service new trunk lines, many pole route lines being greatly injured by the war.

The junction cable between the TIMO telephone exchange of Ferrara and the national State cable is always injured but some pairs have been temporarily repaired until TIMO will have some cable circuits for civil service.

The open wire lines given by the Allied between Bologna and Ferrara have been in this last town put at the disposal of the telegraph with a repeater coil to be used as a superimposed for the telegraph service.

We are in touch with the Signal section and with the Town major who is interested in the telephone matter for the reparations of the trunkroute lines and the work issued by the Allied command.

PROVINCE OF FORLÌUrban service

Forlì - The Royal Corp of Signal has put at the disposal of the civil service 200 numbers among the 1500 automatic numbers of the telephone urban exchange in efficiency. We are connecting the subscribers and at present 45 of them are in function.

We are repairing the distribution system.

The Royal Corp of Signal has also put at the disposal of the civil service one of the toll switchboards.

There is also a public call-office with call-boxes.

Cesena - We have been able to have, few days ago, power to charge omnibatteries.

At present 180 subscribers are connected with the telephone exchange. We are working to put in service temporarily a telephone exchange for 250 numbers. The distribution system being greatly injured we have a great difficulty to connect the others subscribers.

Rimini - 18 subscribers and a public call-office with call boxes are connected with a switchboard LB.

We are working to put in service temporarily a telephone exchange for 250 numbers. The distribution system being greatly injured we have a great difficulty to connect the others subscribers.

Riccione - We are trying to put a little switchboard LB to reconnect the first subscribers as soon as the distribution system will be repaired.

Other places of less telephonic importance of the Province will be put in service when the distribution systems which have been greatly damaged will be repaired.

Interurban service

Until now TIMO has not been able to put in service any trunk lines in this

Province, the telephone pole line routes being nearly quite destroyed, and not having sufficient material and needing trucks and motorcars.

The only one telephone service is done through the open wire line put at our disposal by the Allied between Faenza and Forlì, Forlì and Cesena, and Cesena and Rimini, and through the cable circuit between Bologna and Forlì and Forlì and Rimini also given us by the Allied.

On the open wire line has been installed at Forlì, Cesena and Rimini, a superimposed telegraphic set by the State telegraph, TIMO having put at its disposal the line through repeating coils.

PROVINCE OF RAVENNAUrban service

Ravenna - 460 subscribers are connected with the telephone exchange CB 1200 numbers.

Faenza - 17 subscribers are connected with the telephone exchange LB 51 numbers.
We are repairing the telephone exchange CB and the toll telephone exchange.

Ingo - The telephone exchange CB 660 numbers greatly injured is in repair, and the distribution system in so injured that it is not possible to put in service at present a little switchboard LB.

Gervia-Milano Marittima-are in repair a telephone exchange LB 100 numbers and 2 "semiautomatic" telephone exchange of 25 numbers each one for urban service.

For the others places of less telephonic importance in the Province we need material to be able to repair the telephone exchanges and the distribution system.

Interurban service

Besides of the open wire circuit put the disposal of the TIMO by the Allied between Imola, Faenza and Forlì the 13th June we have not been able to put in service another circuit, all the telephone system of this zone having been greatly injured by the war.

Besides of the 17 subscribers there is in Faenza a public call-office for the interurban service.

The above mentioned line with repeater coils has been put at the disposal of the State telegraph to be used as superimposed.

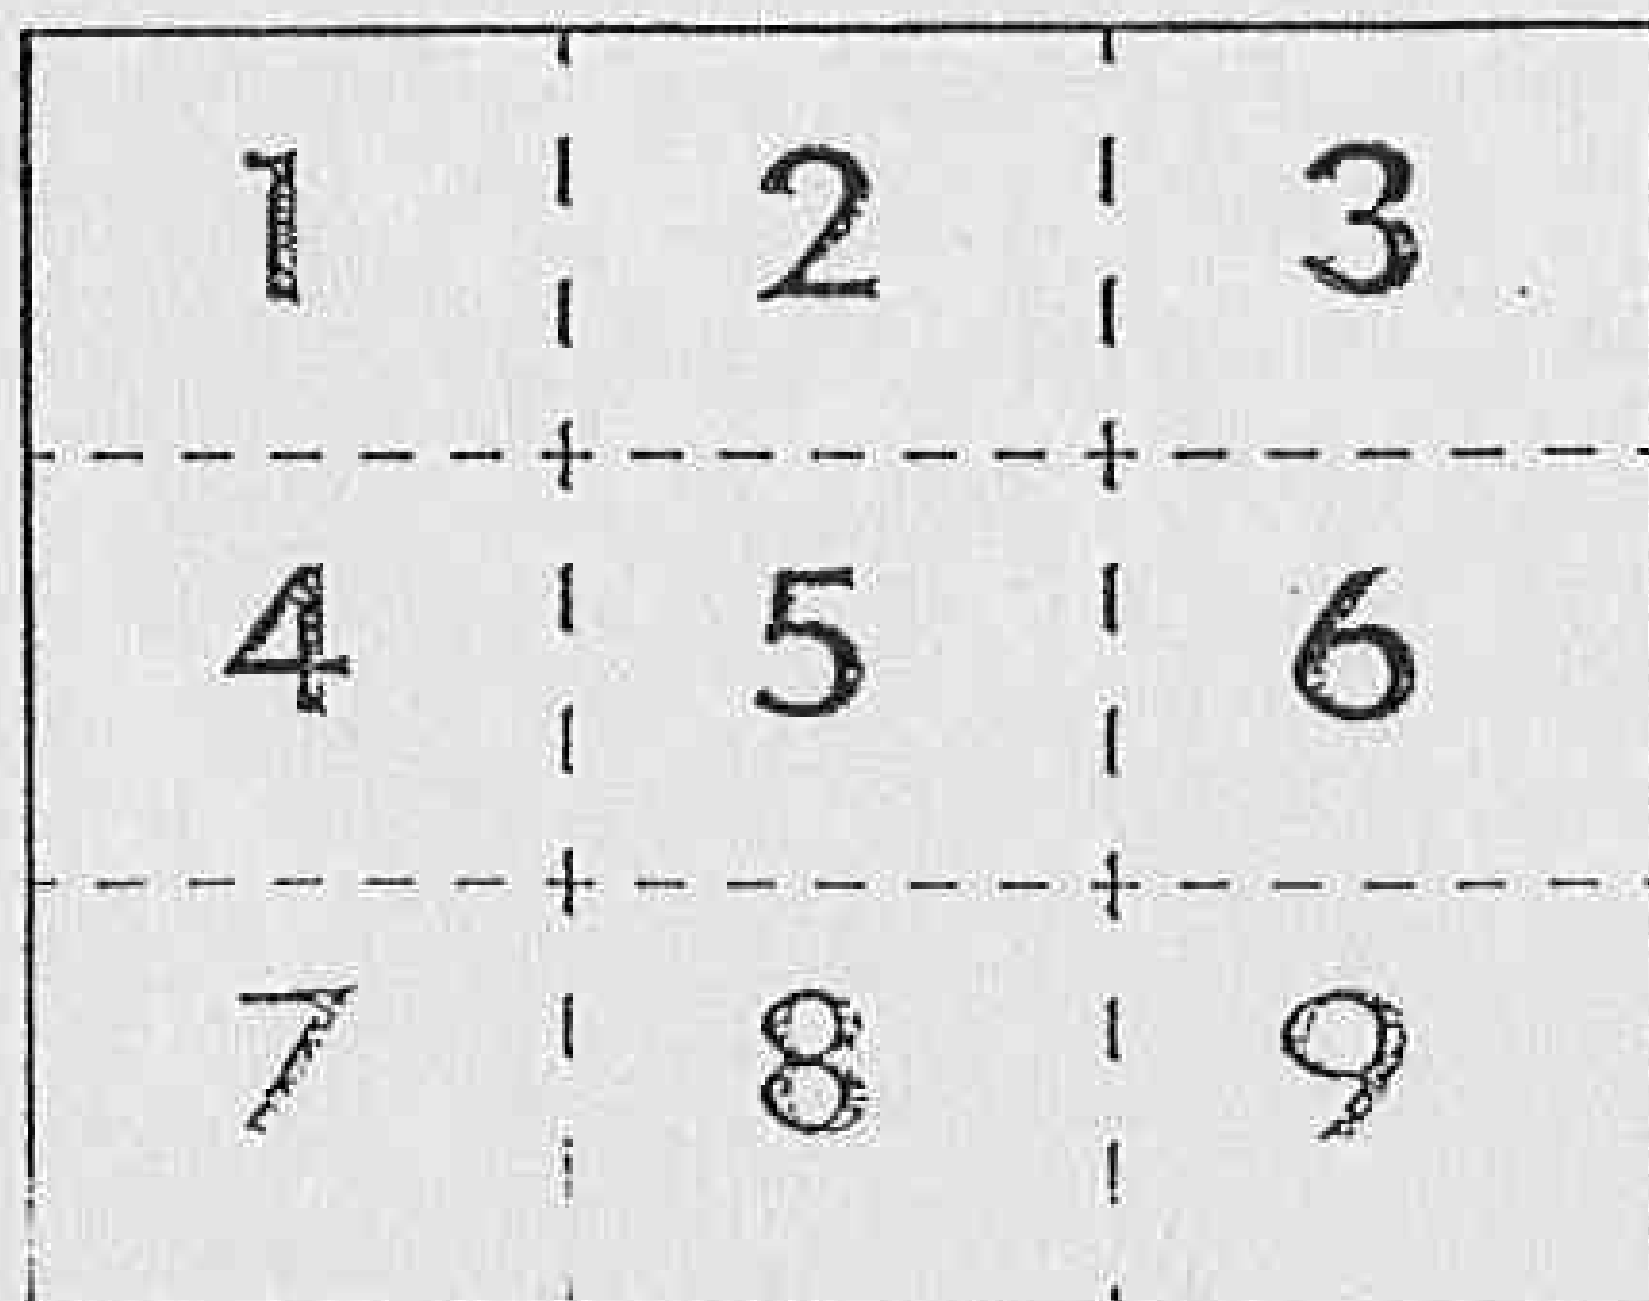

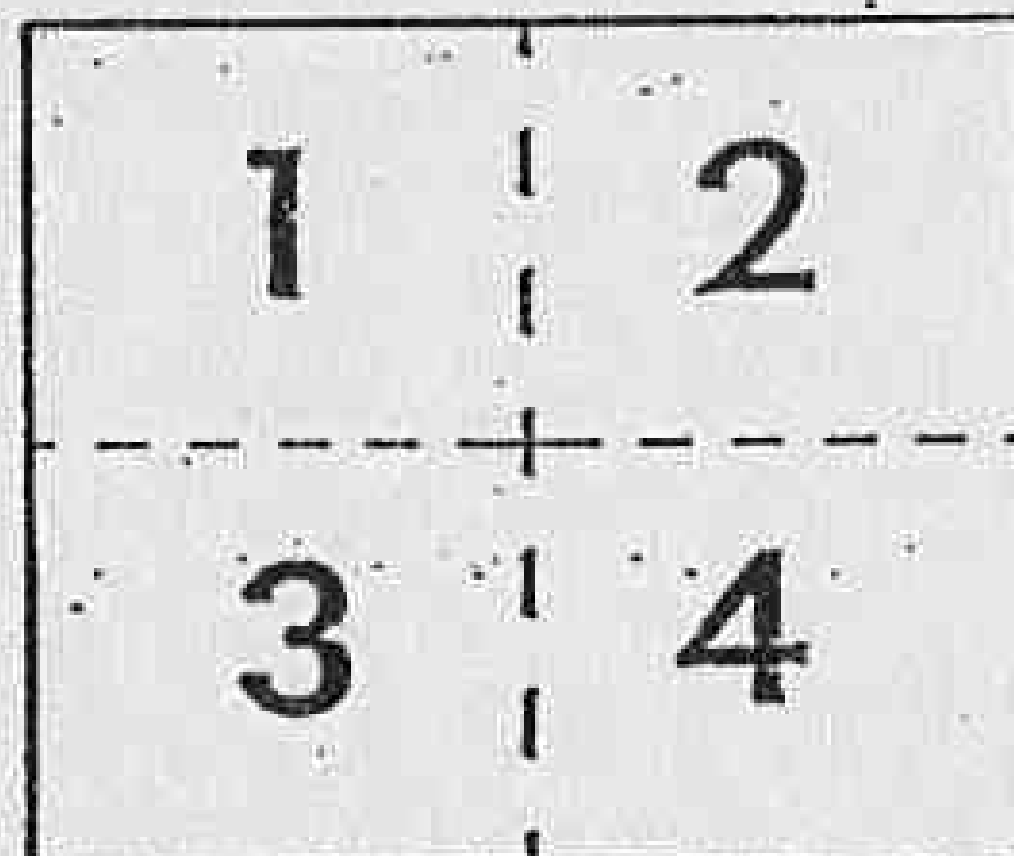

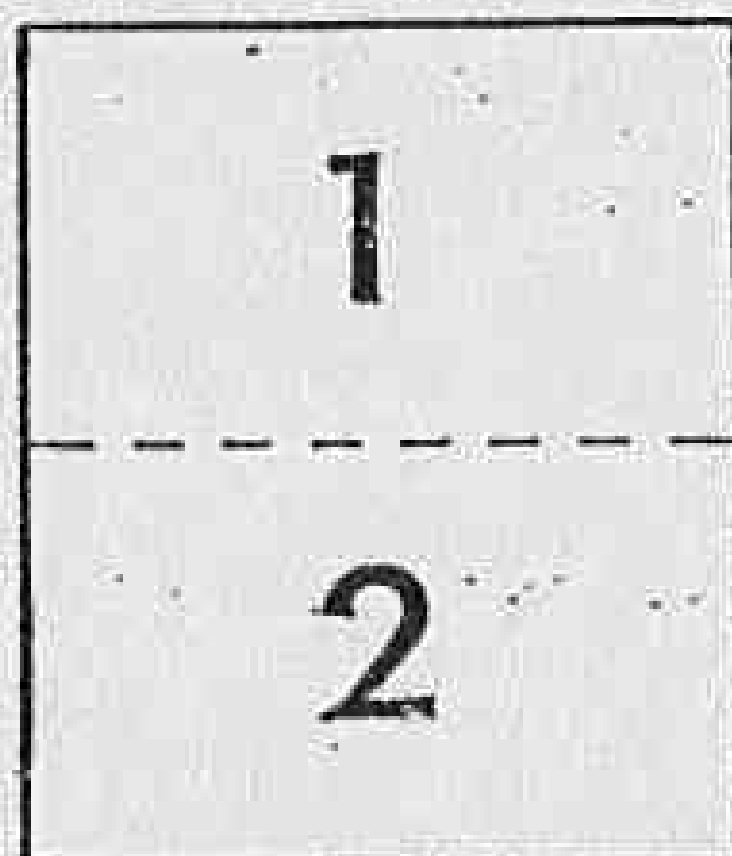

The distribution system of Ravenna is always cut off not being connected with trunk lines.

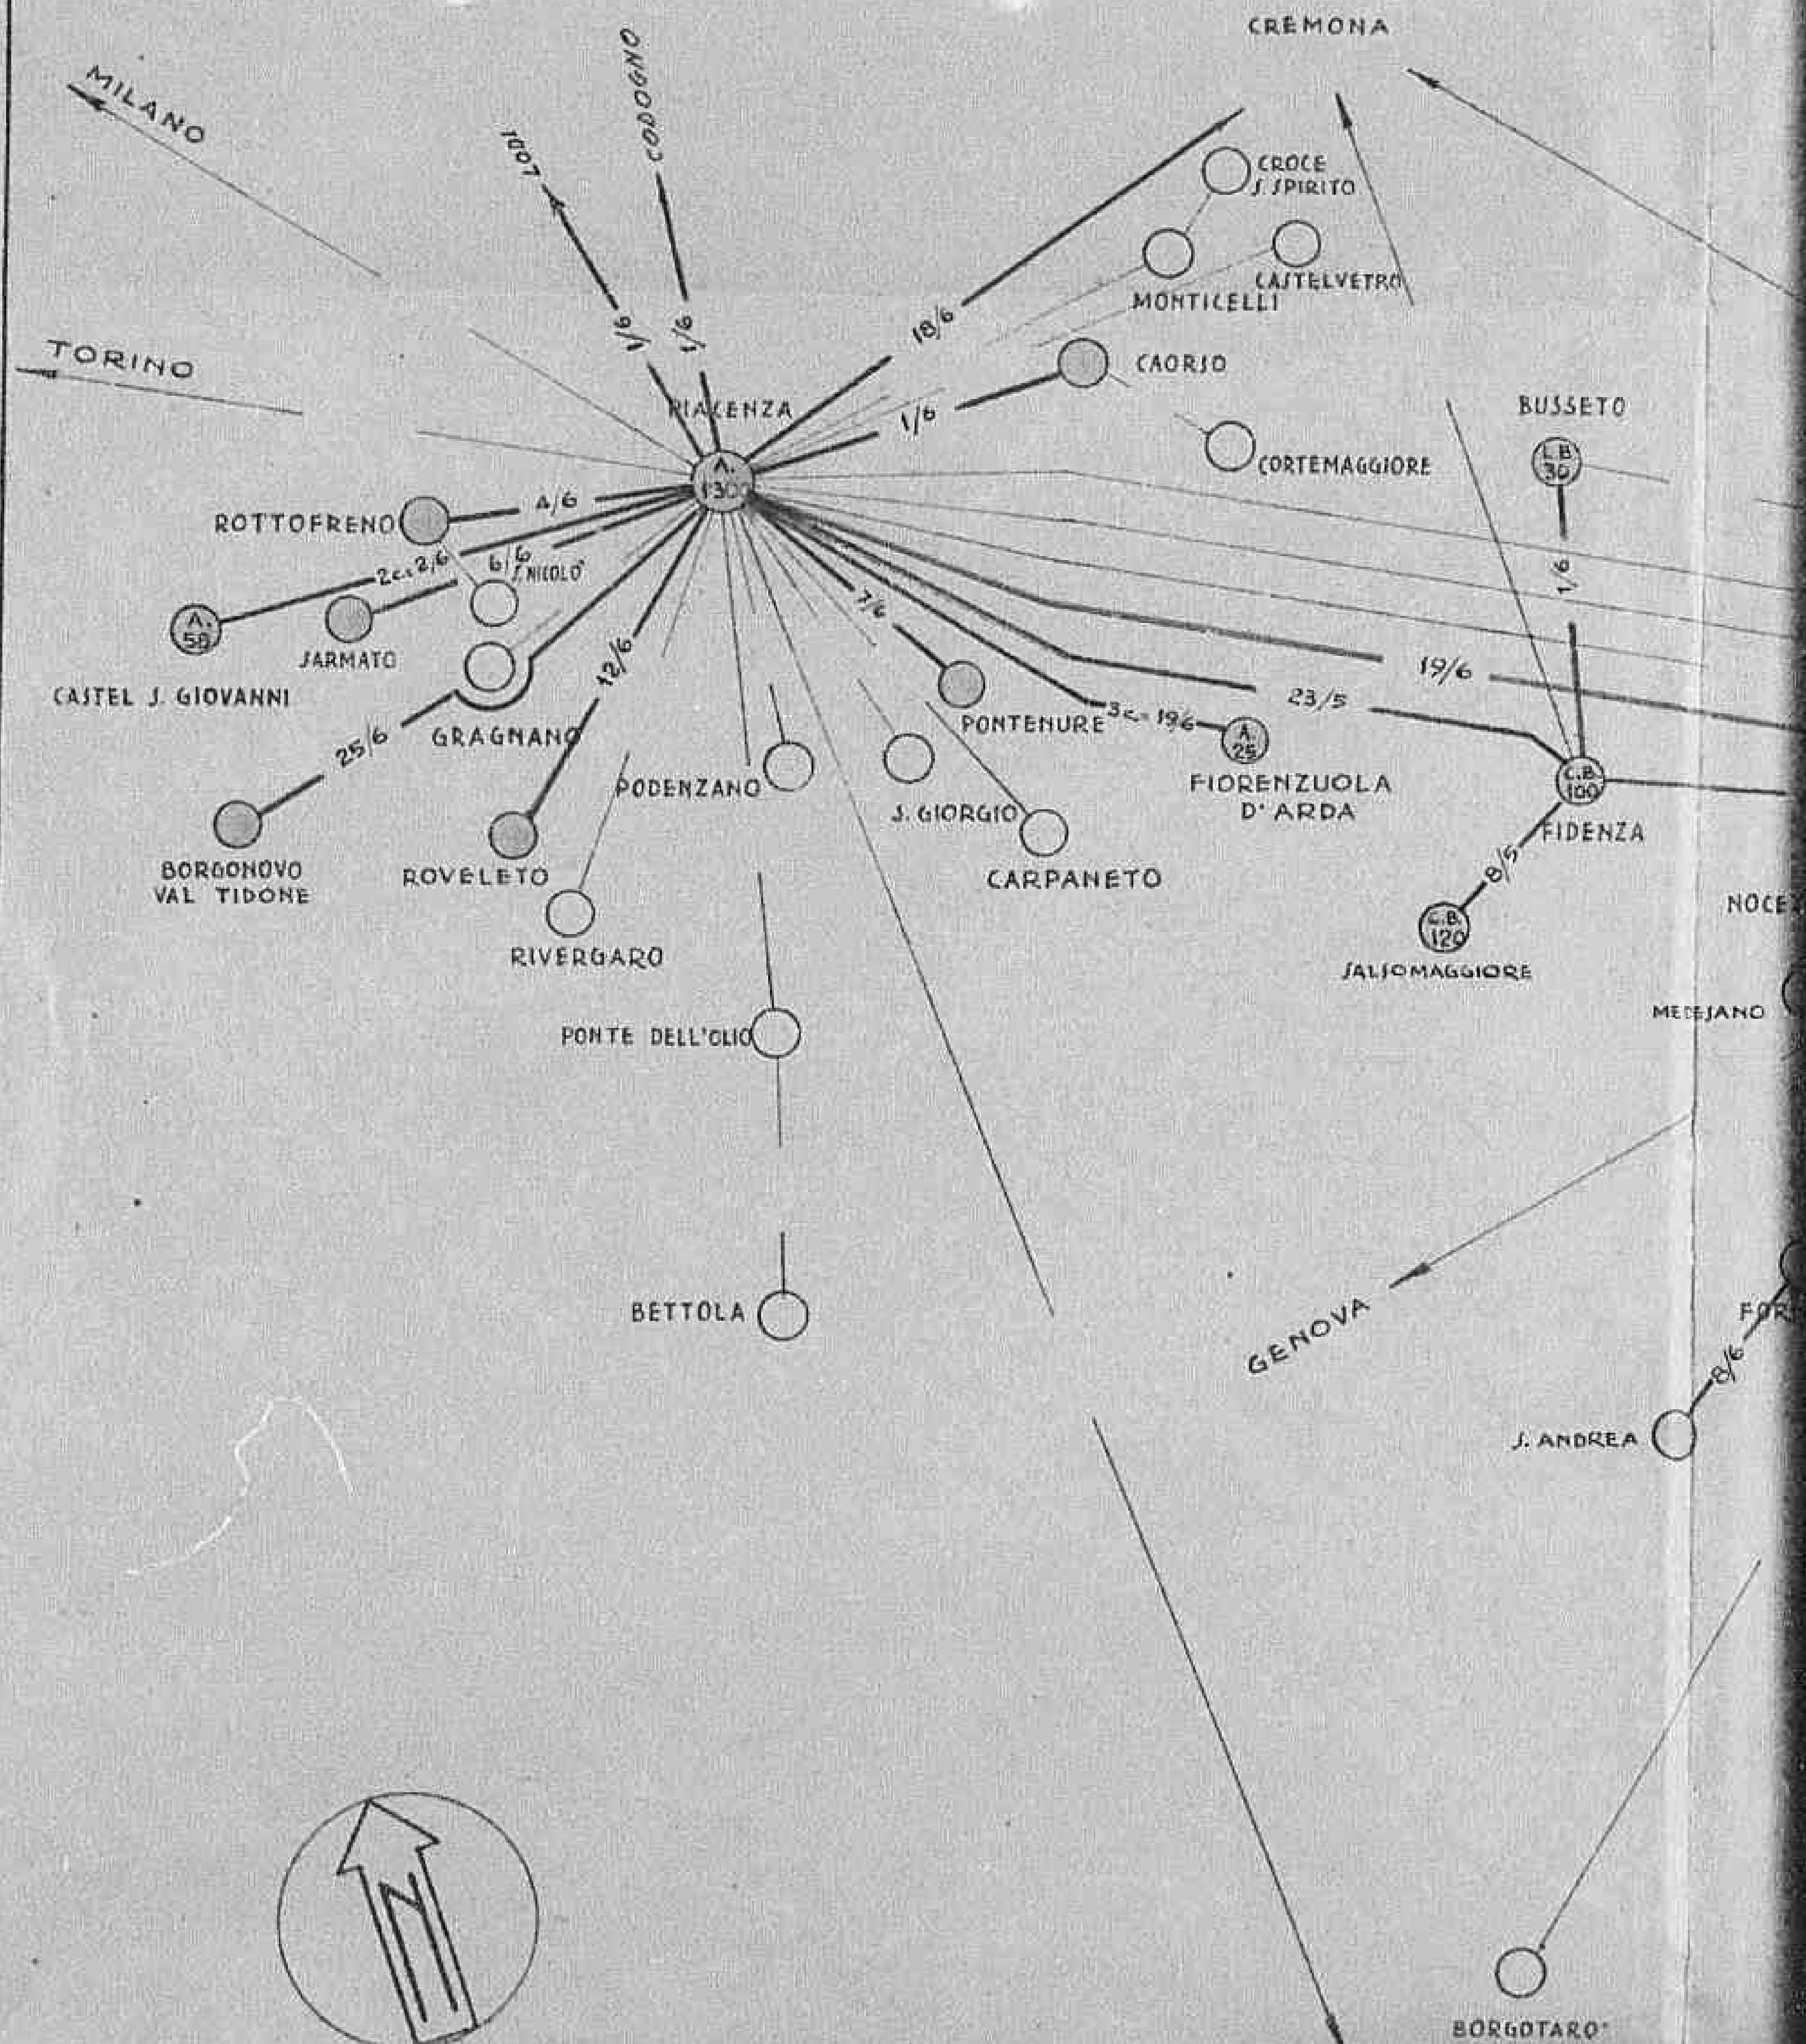

As soon as we shall have an interurban circuit with Ravenna the interurban service will be put at the disposal of the public besides of the 460 numbers, also by public call-office, and the telegraph accordingly with us, will use this line as a superimposed telegraph circuit.

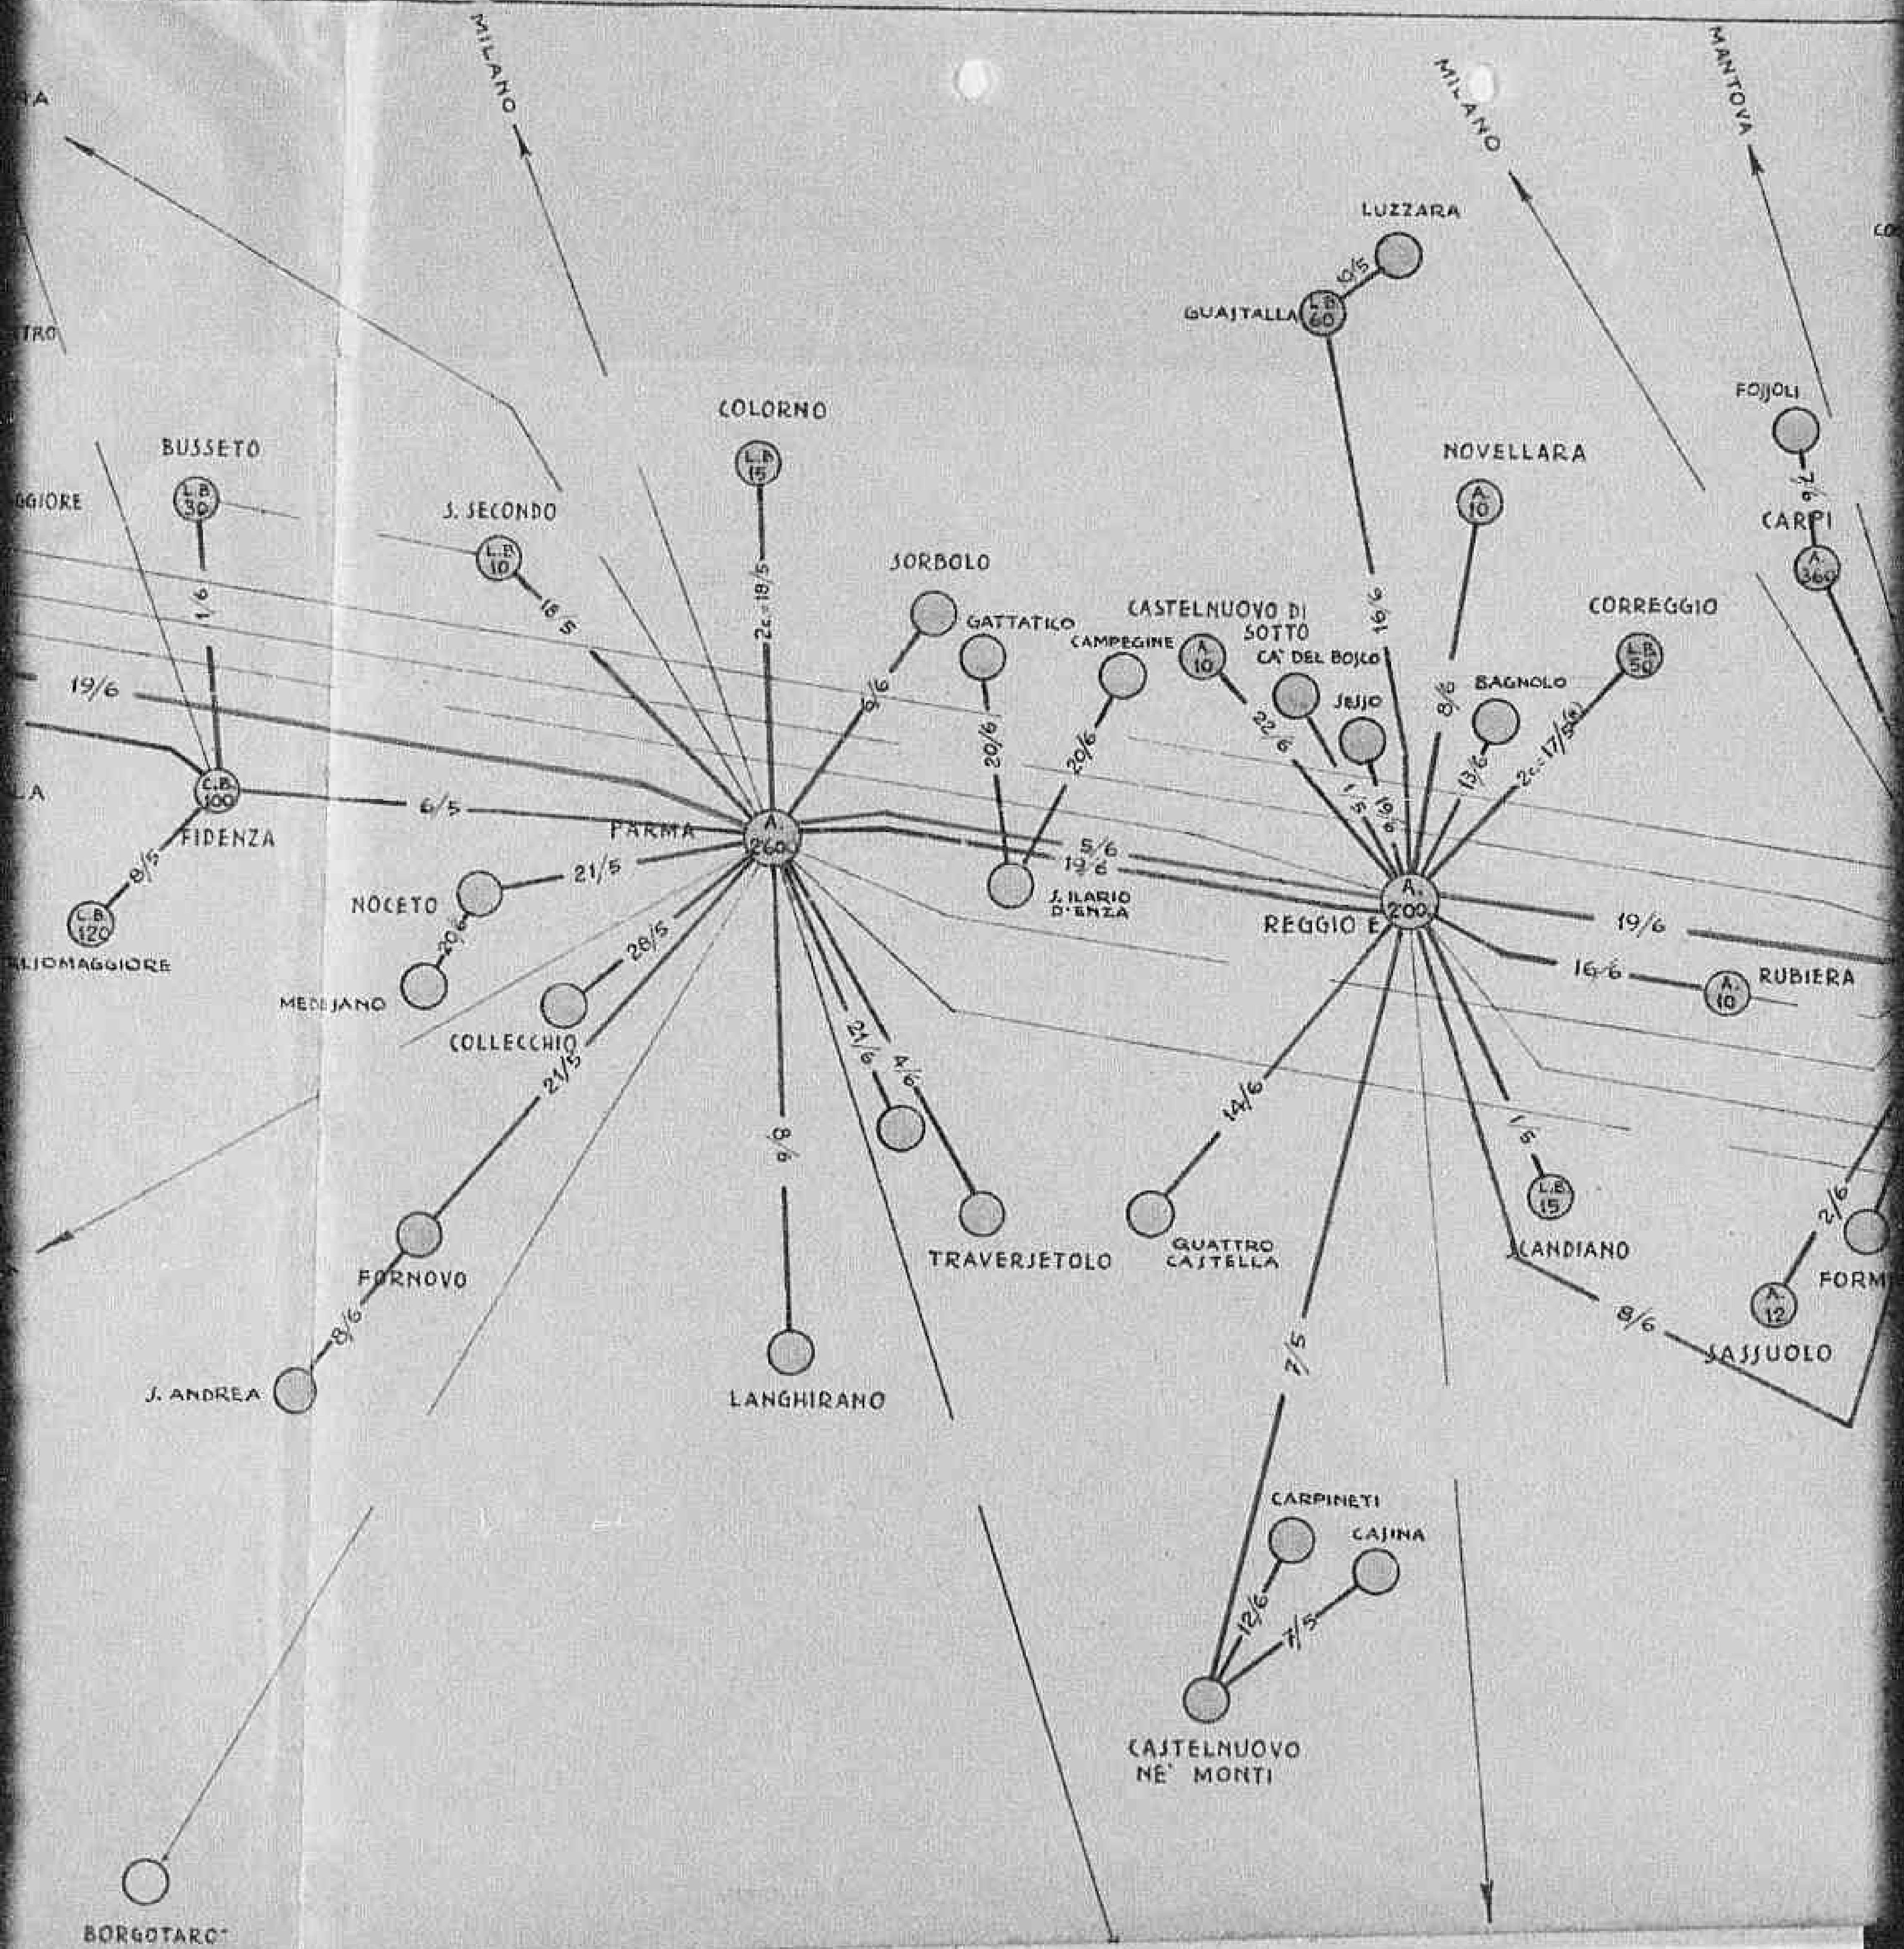

The TIMO office in Ravenna is always in touch with the Signal service to do all the work issued by the Allied and to repair our lines.
