Saturday 14th

Dear Colonel Muller,

I enclose here
the list of items wanted
by telegraphs and telephones,
State and City - H. E. Jaur
is very very anxious abt the
lamps - Will you kindly
find the way of getting as
much as possible of them - 23.5

Thank you very very much

Always, you

J. H. F.

Subject : Copper Wire

To : H.E. The Under-Secretary of State for PP.TT.

1. Reference is made to your letter of 7th October, reference 545415/1100 Servizio 6 Div.1 to Societa' Metallurgica Italiana requesting price for 50 tons of 35/m copper wire.

2. At the time this question was brought up it was thought that sufficient copper was in stock to produce 50 tons of wire. It now develops that this is not the case and it would be necessary to turn over to the wire mill scrap copper. 94 tons of scrap will be needed to produce 50 tons of wire.

3. We are informed that the cost of drawing the wire from scrap will be 35 lire the kilo.

4. Will you please inform us if you are interested in pursuing the matter further.

Subject : Stores for Sardinia

To : Under-Secretary of State for PP.FF.

1. It is understood from Major Mills, A.C.C. that the Telegraph administration of Sardinia is short of poles and copper sulphate for cells, and that, in addition, 19 cases of other materials for Sardinia have been lying in Naples for some time awaiting shipment.

2. Your visiting officer to Sardinia will no doubt inform you on these and other points. In the meantime, if you wish to send goods to or from Sardinia, the correct procedure is to write to the Regional Commissioner of the Region in which the shipping port is situated (e.g. Southern Region for Naples), giving the following information.

a. Type of goods.
b. Weight
c. Port of collection.
d. Port of discharge.
e. Telephone no. of a telephone that is always attended, and names of officials who will be available to answer it and to have the goods moved down to the port at short notice (e.g. day 12 hours).

3. It is suggested that if arrangements are being made to send goods to Sardinia, it would probably be good policy to remove some iron wire from Sardinia to (say) a Rome depot, assuming that the fairly large stocks that were on the island still exist.

4. The local Regional Telecommunications Officer would no doubt assist you to obtain transport, if you have difficulty to take the goods to the quayside from another part of the town.

1. Arrangements were made with the Under-Secretary of State for PP.TT. some weeks ago so that any demands for telephone store from Companies should be passed to him in order that he may determine the necessity for the work.

2. It should be explained to the S.F.I. that no facilities for obtaining such stores are available at this HQ. If the work is of an essential nature, the Coy should get in touch with the Under-Secretary of State for Telecommunications and Posts explaining the nature of the work and enquiring whether the stores can be released for that purpose.

S.A. Hills Major

Copy to Regn Com Sardinia.

MINUTES of Meeting held at Regional Headquarters, Sardinia at 0900 hours on 14th October 1944 to examine the Telephone and Telegraph position (Civil) on the Island.

Present :-

Major Hills (President)
Capt. Caddeo (Italian) Liaison Officer.
Mr. Ialongo (Post & Telegraph Rome)
Mr. Garai (Circolo)
Mr. Passarelli (Telephones Rome)
Mr. Pistis (Tel)
Capt. Meucci (Italian) Interpreter.

1. The purpose of the Meeting was explained to the Members by the President. All the members contributed what local knowledge they had.
2. Both Mr. GARAI and Mr. Pistis promised to submit to the President (not later than Monday, 16th October 1944)

Line diagrams (of the more important links) showing no. of pairs and weight and type of wire used.

Condition of Buildings, i.e. Telephone Exchanges etc.

Types of Exchanges and capacity.

Types of Telegraph apparatus in use.

Condition of apparatus.

Position as regards spare equipment.

An average of daily traffic.

3. The President asked the representatives of both Circolo and Te. ^{to} ~~the~~ ^{air} any serious difficulties under which they were working and which might impede the smooth working of the services and the following points came out :-

- (a) Mr. Garai stated that there was only about 800 spare poles on the Island.
- (b) Boots for patrol men were a difficult question.
- (c) Food for personnel (working gangs). When these gangs were switched from one village to another, difficulty in obtaining food was experienced.
- (d) Due to irregular running of the trains and shortage of road transport, difficulty in moving men and materials was experienced.
- (e) Mr. Pistis stated that his chief difficulty lie in the fact that he had had 19 cases of materials ~~leaving~~ ^{leaving} in Naples for a considerable time and was unable to get them shipped to Sardinia.

4. The President undertook to study all these difficulties to see if there was any way of easing them.

Line diagrams (of the more important links) showing no. of pairs and weight and type of wire used.

Condition of Buildings, i.e. Telephone Exchanges etc.

Types of Exchanges and capacity.

An average of daily traffic.

3. The President asked the representatives of both Circolo and Te. Tia'air^{to} any serious difficulties under which they were working and which might impede the smooth working of the services and the following points came out :-

(a) Mr. Garam stated that there was only about 500 spare poles on the Island.

(b) Boots for patrol men were a difficult question.

(c) Food for personnel (working gangs). When these gangs were switched from one village to another, difficulty in obtaining food was experienced.

(d) Due to irregular running of the trains and shortage of road transport, difficulty in moving men and materials was experienced.

(e) Mr. Pistis stated that his chief difficulty lie in the fact that he had had 19 cases of materials ~~moving~~ in Naples for a considerable time and was unable to get them shipped to Sardinia.

4. The President undertook to study all these difficulties to see if there was any way of easing them.

5. Capt. Ceddeo (It) stated that he thought that the Submarine Cables from OLBIA to FIUMICINO were no longer being used by the Allies.

6. The President undertook to obtain confirmation of this. 21-7

7. The meeting then closed, the President stating that the time of a further meeting in possibly 3 or 4 days would be notified to all concerned.

To : Capt. Thomsen

1. Confirming conversation inclosed is letter from Ministry of Communications requesting the Soc. Metallurgica Giacomo Corradini to make an offer covering 50 tons of 3 mm hard drawn copper which it is understood can be made available.

2. In order that the Ministry of Communications can place an order for this material it is necessary that an offer be made and it is therefore requested that you forward the inclosed letter to Major Hart in P.B.S. so that an offer may be made promptly.

3. It will be noticed that the request from the Ministry covered bronze wire. This has been changed to copper on the understanding that only copper wire is obtainable. If bronze wire is as readily obtainable as copper then the offer should cover bronze.

PRO-MEMORIA

=====

Mi prego informare che nel mio recente viaggio a Firenze ho visitato le due seguenti Ditte che rappresentano due fra i più importanti fornitori della FATME per materiali metallici:

- La Società Metallurgica Italiana - Borgo Pinti 99 Firenze - telef. 658
- La Soc. An. Il Pignone - Firenze (Rifredi) - (Uff. Via dei Corsi n. 3)
Firenze

e ho avuto le seguenti informazioni:

I° = Società Metallurgica Italiana - (Direttore Amministrativo
Comm. Borghetti
Direttore Tecnico Ing. Porro)

Detta Società ha in Toscana tre Stabilimenti: uno a LIVORNO, uno a FORNACI DI BARGA (Provincia di LUCCA) e uno a CAMPO TIZZORO (Provincia di PISTOIA).

Lo Stabilimento di LIVORNO è fortemente danneggiato nei fabbricati mentre una parte dei macchinari è agevolmente riparabile.

Gli Stabilimenti di FORNACI DI BARGA e di CAMPO TIZZORO hanno subito danni lievi sia ai macchinari che ai fabbricati possono quindi in poco tempo riprendere la lavorazione nei Reparti Metallurgici sebbene i tedeschi abbiano asportato alcuni macchinari: occorre naturalmente un lavoro di preparazione per riordinare gli impianti e rimettere in efficienza alcune macchine.

Le produzioni che possono essere fatte dai due predetti Stabilimenti sono le seguenti:

- Lamiere e nastri di ottone e di rame
- Fili e corde di rame nudo e stagnato
- Barre di ottone
- Tubi di ottone
- Profilati di ottone
- Leghe leggere: lamiere, nastri, barre, fili, tubi e profilati
- Leghe per resistenze elettriche (fili e piattine nude)

II° = Soc. An. Il Pignone - Firenze (Rifredi)

Lo Stabilimento non è molto danneggiato e potrebbe quindi riprendere le proprie lavorazioni nei Reparti di Lavorazioni Meccaniche,

II° = Soc. An. Il Pignone - Firenze (Rifredi)

Lo Stabilimento non è molto danneggiato e potrebbe quindi riprendere le proprie lavorazioni nei Reparti di Lavorazioni Meccaniche, Carpenteria Metallica, Fonderia.

Detto Stabilimento forniva prima alla FATME le fusioni di ghisa occorrenti per le centrali telefoniche automatiche e per i distributori per reti telefoniche.

Gli attrezzi relativi a tali fusioni sono tutti in buono stato.

Le Autorità Alleate hanno requisito presso detto Stabilimento alcuni importanti quantitativi di materie prime.

Subject : Copper Wire

To : H.E. The Under-Secretary of State for H.E.

1. Reference is made to your letter of Oct. 7th, 1944
reference 547415/1100 Servizio 6 Div. 1.

2. The attachment to your letter has been forwarded to
the Soc. Metallurgica Giacomo Corradini Naples but a correction
was made so that your request covers copper wire not bronze.
Bronze wire is not yet available.

Comments on Transport Schedule and List of Equipment

1. Motor Transport for Telecommunications:

The number of vehicles suggested, namely 169 is reasonable. The number ordered from A.F.H.Q. was 150. Circolos cover an average radius of 40 miles.

2. Equipment:

(a) Consideration of the need for the equipment is difficult for many of the items without a statement of present stocks, and an explanation of the basis on which the items were calculated. It is suggested that, if action is contemplated to obtain these stocks, the above facts should first of all be made known. Moreover, much of the material is in a class common to other Government Departments.

(b) The required plant and materials have been regrouped in five classes - Overhead plant; underground plant; internal plant; raw material; miscellaneous equipment. The first three deal with what are essentially signal stores; the others do not concern the Ministry of Communications alone.

(c) Many of the articles or materials can be obtained from Italian sources (e.g. poles). Qualities of certain items seem excessive (e.g. items 12, 13, 17b etc.). No decision can however be finally made without the supply of the information mentioned in 2 (a).

As regards lists D and E, there should exist surely some coordinating Italian Government office to deal with these items the use of which is common to several Depts.

3. Comments on List of Equipment:

A rough estimate has been made in the third column of the immediate needs. In brackets in the fourth column are shown the quantities requisitioned from A.F.H.Q. Many of the requisitioned items are not included in the Italian list.

List of Equipment

(Amounts ordered from AFHQ shown in brackets)

Equipment	Amount Requested	Required How	Comments.
<u>A. Overhead Plant</u>			
1. Wire: a. Iron Galv.	250 Tons	100 Tons	Available in stocks at least 100 Tons
b. Bronze	1400 Tons	200 Tons	" " " " " (30 Tons)
c. Copperweld	40 Tons	-	None in stock.
d. Tinned copper	5 Tons	All	Amount in stock known to be very small.
e. Hard Drawn copper 4mm.	25 Tons	-	Probably none in stock.
f. Copper wire for winding	3.4 Tons	1 Ton	" " " "
g. Resistance wire	0.7 Tons	All	Stock, if any not known.
h. Steel wire	150 Tons		About 20 Tons probably available
i. Steel flexible wire	120 Tons		Small stocks.
2. Tarred twine	5 Tons	All	Practically no stocks
3. Insulators	1,100,000	100,000	Believed to be at least 100,000. Can be made Italy.
4. a. Tin for Solder	21 Tons	10 Tons	Nil
b. Resin cured solder	1 Ton	All	Nil (4000 lbs.)
5. Poles	100,000	-	Should be obtained in Italy probably 15,000 now available. 21 1/2
6. a. Tools for linemen	10,000	3000	Probably at least 1000 in stock (30 sets)
b. Equipment for linemen	340	All	Small amount available
c. Equipment for workers	200	All	Small amount available

e. Hard Drawn copper 4mm.	25 Tons	-	Probably none in stock.
f. Copper wire for winding	3.4 Tons	1 Ton	" " "
g. Resistance wire	0.7 Tons	All	Stock, if any not known.
h. Steel wire	150 Tons		About 20 Tons probably available
i. Steel flexible wire	120 Tons		Small stocks.
2. Tarred twine	5 Tons	All	Practically no stocks
3. Insulators	1,100,000	100,000	Believed to be at least 100,000. Can be made Italy.
4. a. Tin for solder	21 Tons	10 Tons	Nil
b. Resin cored solder	1 Ton	All	Nil (4000 lbs.)
5. Poles	100,000	-	Should be obtained in Italy probably 15,000 now available. 2144
6. a. Tools for linemen	10,000	5000	Probably at least 1000 in stock (30 sets)
b. Equipment for linemen	340	All	Small amount available
c. Equipment for workers in the tele- communications network.	200	All	Small amount available

B. Underground Plant:

7. Cable:

a. Urban	100 prs	7/10	10 Kms	Position not known

Ref. no. CS/4/11/40

To: Major Hardt P.B.S. - Naples.

Subject: FICE - Authorization for construction of frame wire
for the VETI - Rome.

1) The Societa' Telefonica Tirrena, Rome Direction, is
in urgent need of the following amount of telephone stores:

100.000 m. of 2 6/10 M.D.P. wire
10.000 m. of 3 6/10 frame wire.

2) The characteristics of stores are the following:

Bare copper wire, diameter 6/10.
Paper tape covering.
Silk and cotton covering, number 20.
Paraffin waxing.
Internal protective covering with textiles, number
20.

3) We therefore beg you in view of the necessity of the
public telephone service in Rome City, to authorize the FICE
firm of Naples to manufacture the requested stores.

We await a reply on the matter.

Director,
Communications Sub-Commission.

Subject: Copper Wire.

To: The Under Secretary of State for PP.TT.

1. Would you please note that if you write to the firm of Cardini, Naples for 50 tons of 3mm diameter hard drawn copper wire, arrangements will be made to have it manufactured. The cost will be charged to the Italian Government, but the price is controlled by PBS. It is not possible to specify the cost at present.

2. Your letter should be handed to this Sub-Commission whence it will be sent to Naples with a note from ACC.

Subject : Iron Wire.

To : Under-Secretary of State for PP.TT.

1. With reference to A.C.C. letter No. CS/4/11/17
of 23rd August, 1944, subject as above, Capt. Bridgeman states
that the Naples Circolo is ready to erect wire but he has
received no information about the wire.

2. Would you please state the present position.

SEGRETERIA D'AMMINISTRAZIONE
DEL SOTTOSCRITTO
PER LE FUNZIONI

Roma, 31 agosto 1944

MEMORANDUM SUI MEZZI DI TRASPORTO

Per gli autoveicoli si sono redatti tre elenchi (1,2,3):

a) il primo elenco riguarda le necessità dei Circoli Costruzioni e si riferisce pertanto agli autocarri necessari per la riattivazione della rete telegrafica e telefonica (aerea) dello Stato: si è seguito il criterio di assegnare autocarri in numero e tipo diverso a ciascun Circolo a seconda dello stato di riattivazione delle linee di competenza del Circolo stesso.

Poichè per la manutenzione si ritengono necessari soltanto autocarri leggeri e pesanti, ci si propone di spostare a nord gli autocarri medi via via che le riparazioni delle linee nell'Italia meridionale e centrale saranno completate.

b) Il secondo elenco concerne le necessità delle Direzioni Provinciali P.P.T.T. e riguarda pertanto gli autocarri per il trasporto della posta in città o per servizi di urgenza.

Si prevede che uno degli autocarri (o del tipo leggero o del tipo medio) venga utilizzato per urgenti riparazioni delle linee telegrafiche e telefoniche.

c) Il terzo elenco concerne le necessità delle Società Telefoniche

e si riferisce pertanto agli autocarri necessari per la riattivazione della rete telegrafica e telefonica (aerea) dello Stato: si è seguito il criterio di assegnare autocarri in numero e tipo diverso a ciascun Circolo a seconda dello stato di riattivazione delle linee di competenza del Circolo stesso.

Poichè per la manutenzione si ritengono necessari soltanto autocarri leggeri e pesanti, ci si propone di spostare a nord gli autocarri medi via via che le riparazioni delle linee nell'Italia meridionale e centrale saranno completate.

b) Il secondo elenco concerne le necessità delle Direzioni Provinciali P.P.TT. e riguarda pertanto gli autocarri per il trasporto della posta in città o per servizi di urgenza.

Si prevede che uno degli autocarri (o del tipo leggero o del tipo medio) venga utilizzato per urgenti riparazioni delle linee telegrafiche e telefoniche.

c) Il terzo elenco concerne le necessità delle Società Telefoniche Concessionarie (S.E.T., T.E.T.I., TIMO, TELVE, STIPEL) e della Azienda di Stato per quanto concerne i lavori di manutenzione del cavo.

Director, Communications Sub-Commission

1. This refers to your letter of 18th August 1944, above subjects your file CS/4/11.

2. District 3 was contacted yesterday with reference to pin assignments for the three above wires. At the same time a request was made for any existing ^{wire} that might be had between any of the above places. District 3 thinks it is possible that they may release one or two short sections they will advise in a few days.

3. A request was also made for any other circuits iron or bronze to any city. District 3 advised within 15 days they would move to Naples and no doubt there would be many circuits available.

4. Suggest your office put a little heat on District 3 & request all circuits possible.

Subject : G.I. wire.

To : Under-Secretary of State for P.P.T.

1. An order has been received from CSO, AAL., for the release of 25 tons of G.I. wire for use in Naples area on projects such as Naples - Caserta - Benevento - Campobasso.

2. Rehabilitation of wires and use of spare wires should be carried out where possible as the stock of wire is restricted.

3. Please arrange to inform Capt. Bridgeman of the stores from which the wire should be taken.

COMMUNICATIONS SUB COMMISSION

SUBJECT: Various telephone stores.

FATME offers no. 483 of 16/8/44 - 474 of 31/7/44 AV 658 of 11/8/44

For the telephone service and the maintenance of the existing extensions,
it is necessary that the following stores are supplied:

100 field telephone apparatus type R.A.

30 BL capsulae.

30 bakelite microtelephones with cord for field telephone apparatus.

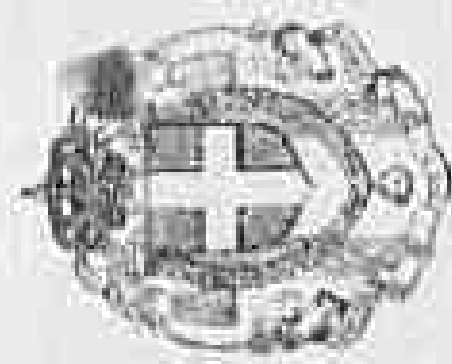

80 Metal microtelephones for field telephone apparatus and for repair of two
a 30 FATME switchboards type 100-10.

Said stores are available at FATME firm, via Appia Nuova 572. Repair of the
two switchboards can only be effected in the firm's premises, because some parts
are missing.

It is therefore asked for authorization for the above supply and repair

Translation by Melan

M E M O R A N D U M

Since December 1942 the STET made arrangements with the pertaining Administration (by means of the Minister of Communications), in order to withdraw the following stores:

- A) AUTELCO automatical exchange (500 numbers) already addressed to Macca.
- B) STANDARD automatical exchanges (150-200 numbers) already addressed to, Addis-Abeba and Dire Dawa.

The agreements were long for administrative reasons, and because they were suspended for political events.

STET has transferred to Rome its technical services, having in view the reactivation of the telephone installations in the liberated territories of the Companies TIR, TELVE STEL. The above STET asks now again that such stores can be sold; because it is now obliged to carry on the restoration and substitution of the store damaged by Germans in AUTELCO automatic exchange in Teramo, Chieti, Spoleto, Foligno, Perugia.

It is to be remarked that in Italy, AUTELCO system is used in the urban exchanges, almost only in Group SET (Northern Italy and South-East Italy): there are, in effect, other AUTELCO installations at Biadene, Reggio, Parma, Piacenza, Piacenza, Pavia, Aosta, Cortina.

For the STANDARD stores the requirements of the SET Group are larger, because the following cities have STANDARD exchanges: Bologna, Modena, Trento, Bolzano, Milano, Varese, Como, Lecco, Biella.

Considering the bombardments damages and the others made by the Germans during their retreat, it is evident that the requirements of the Group SET are very larger than the requirements of the other Companies.

PRO - MEMORIA

Lt. Col. Miller
The STET keeps on bringing this up - I have told them not to

OGGETTO: Materiale telefonico già destinato all'Africa Orientale Italiana.

Fin dal dicembre 1942 la STET entrò in trattative con l'Amministrazione competente (tramite Ministero delle Comunicazioni) per il rilievo del seguente materiale:

- a) Centrale automatica tipo Autelco (500⁰ numeri) già destinati a Massagua
- b) Centrali automatiche tipo Standard (150⁰ e 200 numeri) già destinati rispettivamente ad Addis Abeba e Dire Dawa.

Tali trattative furono lunghe per ragioni amministrative e gli avvenimenti politici ne provocarono la sospensione.

La STET che ha trasferito i suoi Servizi Tecnici a Roma allo scopo di curare la rimessa in efficienza degli impianti telefonici nelle zone liberate, delle Concessionarie TIMO, TELVE e STIPAL, chiede ora nuovamente che il suddetto materiale le venga ceduto in vendita: infatti essa deve già ora procedere alla riparazione e sostituzione di quanto è stato danneggiato dalle truppe tedesche nelle centrali automatiche tipo Autelco di Teramo, Chieti, Spoleto, Foligno, Perugia.

Si fa presente che, in Italia, il sistema Autelco ha trovato impiego nelle centrali urbane, quasi esclusivamente nel Gruppo SIMT (e cioè nell'Italia Settentrionale e nell'Italia media-Orientale) possedendo, oltre quelli già citati, impianti Autelco a Riccione, Reggio, Parma, Fidenza, Piacenza, Ivrea, Aosta, Cortina.

Per quanto riguarda il materiale Standard le necessità del Gruppo SIMT sono ancora maggiori, infatti hanno centrali Standard le seguenti città: Bologna, Modena, Trento, Bolzano, Merano, Varese, Como, Lecco, Biella.

Se si considerano i danni prodotti dai bombardamenti e quelli, ben maggiori causati dalle truppe tedesche in ritirata, si vede come le necessità del Gruppo SIMT siano di gran lunga preponderanti nei confronti delle altre Società concessionarie.

Subject : Stores for Italian Projects.

To : C.S.C., Allied Armies in Italy.

See H1

1. Projects have been arranged with C.S.C., L. of C. and R.A.A.C. which include the provision of circuits from Rome to Littoria and Velletri, from Velletri to Littoria, and from Littoria to Anzio.

2. These circuits will make use on part of existing circuits, but fairly long extensions are required, as the pole routes previously carrying the wires have been very largely destroyed. Accordingly about 150 kilometers of bronze wire are needed. (2 or 3 mms. dia.)

3. It is not possible to obtain such wire from subscribers routes at the places concerned owing to the numbers of mines lying about.

4. Accordingly it is requested that authority be given for the release of the material.

5. As the circuits will be erected under the direct control of A.C.C., care will be taken that none of the wire is used where rehabilitation of existing wire could be done.

Subject: Circuits to Velletri and Littoria.

To: Chief Signal Officer, Allied Armies in Italy.

1. It is intended that one telephone and two telegraph circuits be provided to Velletri, and the same to Littoria.
2. The simplest way is to run these circuits on the via Laurentina Circolo route to Pagliano Casale, the Littoria circuits thereafter being routed via the concrete pole line on the Cisterna railway to Staz di Littoria and thence by local pole line to Littoria. The Velletri circuits would continue from Pagliano Casale via Staz di Pavona and rail to Velletri.
3. Permission has been obtained from the Chief Signal Officer L of C and from Military Railway Service for the use of the above concrete pole line, and pin positions have been fixed.
4. Permission has been requested for the use of the Circolo routes concerned from the Chief Signal Officer, L of C.
5. To save time, it is requested now that the following Italian stores be released pending authority for the use of the above route.

Subject: Release of Italian Signal Stores.

To: Allied Armies in Italy,
ATTN: C.S.C.

1. Application is made for the release of the following Italian Signal Stores in the Salerno and Naples 'Circolo' stores:

Iron wire, 3m.m. or 4 m.m.	-	2,000 Kg	(Naples)
Iron wire, 3m.m. or 4 m.m.	-	6,000 Kg	(Salerno)
Iron wire, 2m.m.	-	350 Kg	()
Brackets, iron, curved, with screws	-	200	()
Insulators	-	500	()

(Total stock iron wire 3m.m. or 4m.m. in Salerno is 6,300 Kg).

2. These stores are required for the restoration of essential Italian civil and Government circuits in the Salerno and Naples area.

3. The circuits have been approved by this Sub-Commission, and authority for their restoration on specific routes and pin positions has been obtained from the C.S.C. No. 2 District.

Insulation no. 969 - Salerno - 24/1/44 - 130000

Ministry of Communications - Salerno 24 July 44

File no. 60608/7 re 9/10 Post & Telecoms Salerno

Subject: Withdrawal of materials.

1. We beg you to authorize the withdrawal of the materials necessary for the refitting of several telegraph wires within the bounds of the Salerno Bz Committee, and precisely:

(a) 2 wires from Salerno to Lagonuovo and 3 wires from Salerno to Polenza (authorization no. CS/4/21/2 of 28th June);

(b) 1 wire along the low line Salerno - Capua - Nocera - Poggioreale (authorization no. CS/4/21/34 of 11 May);

The following materials are required for this purpose:

- | | |
|--|-----------|
| (a) wire wire 3 or 4 mm. diam | kg. 12000 |
| (b) covered arms (or supports) with screws | no. 200 |
| (c) insulators | " 100 |
| (d) sheet iron, 2 mm. iron | kg. 150 |

Telegraph wires within the bounds of the Salerno Bz Committee, and precisely:

(a) 2 wires from Salerno to Legonessa and 3 wires from Salerno to Potenza (authorization no. CS/4/21/2 of 25th June);
CS/4/21/2

(b) 1 wire along the bus line Salerno - Caniccioli -
Nocera - Pugnochiuso - Pompei (authorization TS/4/21/34 of 24/2/34)
7th May.

The following materials are required for this purpose:

(a) iron wire 3 or 4 mm. diam.	kg. 12,000
(b) curved arms (or supports) with screws	no. 200
(c) insulators	" 500
(d) sheet-iron, 2 mm. iron	kg. 150

We point out that this material is required for the time only for the sections from Salerno to Pompei and from Salerno to Pontepaglia since the rest of the lines will be fitted with the wire salvaged from the line.

2. The material for the circuits of the

2) R. Navy (to R.M. and 206 P.M.) authorized the with letter CS/4/21/94 of 28th June, was handed over allotted (with release 10 no. 22 of 13th June ^{from} the H.Q. AAI), but ~~it~~ they were used in the end, for repairing the lines north of Naples.

For these lines are required:

(a) - ~~sheet~~ 3 or 4 mm. iron	kg. 3000
(b) 2 mm. iron	" 200

3. Since the ^{total} quantity of iron wire available in the stores of the Palermo Coast Construction Committee, including the various diameters, is 6,300 kg., we beg you to authorize the ~~was~~ withdrawal of the remaining quantity required from the Naples Committee,

The Undersecretary of State

- (14) - sheet 3 or 4 mm. iron kg. 3000
- (15) 2 mm. iron " 200
3. Since the ^{total} quantity of iron wire available in the stores of the Palermo Land Construction Committee, including the various diameters, is 6,300 kg., we beg you to authorize the ~~new~~ withdrawal of the remaining quantity required from the Naples Committee.

OGGETTO Prelievo materiali.

- 1.- Si prega voler autorizzare il prelievo dei materiali necessari per il ripristino di alcuni fili telegrafici nell'ambito del Circolo di Salerno e precisamente:
- a) - n. 2 fili fra Salerno e Lagonegro e n. 3 fili fra Salerno e Potenza (autorizzazione CS/4/21/94 del 28 giugno);
 - b) - n. 1 filo linea omnibus Salerno - Cava - Nocera - Pagani - Pompei (autorizzazione TS/4/21/34 del 7 maggio).

Occorrono a tal fine:

a) - filo di ferro da 3 o 4 mm	kg	12000
b) - bracci curvi e vite	n	200
c) - isolatori	"	500
d) - ferro da 2 mm	kg	150

Si fa presente che il materiale suddetto è necessario per il filo fra Salerno e Pompei e per gli altri fili soltanto per la tratta Salerno - Battipaglia, poichè per il restante percorso dei suddetti fili, si provvederà con materiale recuperato sulla linea.

2.- Per i circuiti della R. Marina (8 R.M. e 206 R.M.), autorizzati con lettera CS/4/21/94 del 28 giugno, il materiale fu concesso (con re-lease IO no 22 del 13 giugno dell'H.Q.AAI), ma esso è stato successivamente destinato alla riparazione delle linee a nord di Napoli.

Per tutte le linee sono necessari:

- 1.- Si prega voler autorizzare il prelievo del materiale necessario per il ripristino di alcuni fili telegrafici nell'ambito del Circolo di Salerno e precisamente:
- a) - n. 2 fili fra Salerno e Lagonegro e n. 3 fili fra Salerno e Potenza (autorizzazione CS/4/21/54 del 28 giugno);
 - b) - n. 1 filo linea omnibus Salerno - Cava - Nocera - Pagani - Pompei (autorizzazione TS/4/21/34 del 7 maggio).

Occorrono a tal fine:

- | | | | |
|----|-----------------------------|----|-------|
| a) | - filo di ferro da 3 o 4 mm | kg | 12000 |
| b) | - bracci curvi a vite | n | 200 |
| c) | - isolatori | " | 500 |
| d) | - ferro da 2 mm | kg | 150 |

Si fa presente che il materiale suddetto è necessario per il filo fra Salerno e Pompei e per gli altri fili soltanto per la tratta Salerno - Battipaglia , poichè per il restante percorso dei suddetti fili, si provvederà con materiale recuperato sulla linea.

2.- Per i circuiti della R.Marina (8 R.M. e 206 R.M.), autorizzati con lettera CS/4/21/54 del 28 giugno, il materiale fu concesso (con release IO no 22 del 13 giugno dell'H.Q.AAI), ma esso è stato successivamente destinato alla riparazione delle linee a nord di Napoli.

Per dette linee sono necessari:

- | | | | |
|----|---------------------|----|------|
| a) | - ferro da 3 o 4 mm | kg | 3000 |
| b) | - ferro da 2 mm | " | 200 |

./.

3.- Poichè il quantitativo di filo di ferro disponibile nei magazzini del Circolo Costruzioni di Salerno è complessivamente, nei vari diametri, di 6.200 kg, della parte residua, si prega di voler autorizzare il prelievo dei magazzini del Circolo di Napoli.

Subject: Telegraph network for the smoke-screen units of Brindisi and Taranto.

The Ministry of War has made known the necessity for the establishment of a telegraph network for the smoke-screen units of Brindisi and Taranto.

~~XXXXXXXXXXXX~~ 2,000 insulators, model 2/1920 are neededx for this work.

The work to be done consists mainly of the following: in Brindisi - modification of the present alignment of the lines, as a result of the transfer of some stations to other localities.

In Taranto: Replacement of a considerable number of ~~XXXXXX~~ insulators broken as a result of the felling of many poles caused, in turn, by the fact that the pole line in question runs along tracts ~~and~~ that are very near the sea where, because of the movement of the water the soil erodes easily.

We therefore wish to ask the Commission to kindly authorize the drawing from the Store of the Royal Army in Bari the above-mentioned quantity of insulators.

Salerno, li 28/9/1920

Mud. 167

Il Ministero della Guerra ha fatto presente la necessità di una sistemazione della rete telefonica per reparti nebbiogeni di Brindisi e Taranto.

Per tale sistemazione occorrono n. 2000 isolatori mod. 2/1920.

I lavori da eseguirsi consistano principalmente:
a BRINDISI: modifica dell'attuale tracciato delle linee in conseguenza di spostamenti in altre località di alcune stazioni;

a TARANTO: sostituzione di un rilevante numero di isolatori rotti dovuti all'abbattimento di molti pali causato dal fatto che la palificazione in questione corre per lunghi tratti in vicinanza del mare dove, per azione dell'acqua, il terreno, di natura argillosa, cede facilmente.

Ciò stante si prega cotesta Commissione di voler
