Subject: Rehabilitation of Florence-Bologna

Ref is to your n. 233/26/55 Trm letter
dated July 13th 1945

Dear Col. Thomas,

it is true that the authority granted to carry out
the repairs on Florence-Bologna line at the estimated cost of
420.000.000 Lire concerns the section Prato-Vernio only.

I will inform you, within a very short time, on the
matter, submitting the proposal to resume the double track on
the 1st priority line Florence-Bologna.

Yours very truly

sgd Ugo La Malfa

Subject : Reconstruction of the Italian State Railways.

Dear Mr. Minister,

I wish to bring to your notice my letter to you, reference 233/26/55/Tn.2 of 30th June 1945, which grants authorisation for repairs to line 65 from Florence to Bologna, at the estimated cost of lire 426,000,000.

This should not read for the whole of the section Florence to Bologna but only for the rehabilitation of a portion of this section from PRATO to VERNIO, a distance of 26 kilometres, at the estimated cost of Lire 426,000,000, which includes reconstruction of seven tunnels and four viaducts.

Will you kindly have my above-mentioned letter amended to read accordingly.

Yours very truly,

H.B. THOMAS, Colonel,
Deputy Director,
Transportation Sub Commission.

THE GENERAL DIRECTOR.

Rome 22 June 45
 Ref.L.5/13/29300

SUBJECT : Thorough line Florence-Bologna
 Masonry works reinstatement between
 Prato and Vernio.

TO: Tn. Sub-Commission A.C.,
 Rail division
 Room 52 3rd Floor
 Bldg

1. The reopening of Florence-Bologna thorough line between Prato and Vernio stations has been carried out by Military Railway Service through the restoration of the original line in some sections and through temporary deviations in correspondence of some interrupted tunnels and masonry works.
2. The 6 deviations are mostly running on the service track seat executed about 20 years ago for the construction of the line. They have very narrow curves, imposing reduced speeds to trains and, in some sections, they run on new and high embankments, which, in occasion of autumn and winter rainfalls, could cause serious troubles and long interruptions to railway operations.
3. In relation to what your Commission has suggested we think necessary to bring the circulation back to the original line, before winter time, and on this purpose, following works are necessary.

Re-construction of both ends and of a central section of Canneto Tunnel (entrance at Km. 20+483) for a total extent of 85 lineal meters.

Construction of a two spans bridge m.4.50 each at Km. 22 + 032

Reconstruction of both ends of Meretto Tunnel (entrance at Km. 22+6/1)

for a total extent of 150 meters.

Reconstruction of the 12 archs viaduct (mts. 12 each) at Km. 29+455

Complete reconstruction of Castagneto tunnel (entrance at Km. 29+954)

reducing it to 70 meters lenght.

Reconstruction of the 3 archs viaduct (m.6 each) at Km. 30+096

Complete reconstruction of Scopeto Tunnel (entrance at Km. 32+881)

reducing it to 45 meters lenght.

Reconstruction of both ends of Cerbino Tunnel (entrance at Km. 33+421)

for a total extent of mts. 140

Reconstruction of the 12 archs viaduct (mts. 10 each) at Km. 344+130

Reconstruction of both ends of Terrigoli Tunnel (entrance at Km. 34+568)

for a total extent of lineal mts. 80.

Construction of a holding large wall replacing the 3 archs viaduct

(mts 15 each) at Km. 34+799.

Reconstruction of the extreme section (Bologna side), of the Saletto

Tunnel (entrance at Km. 25+060) for an extent of mts. 80

4. Expense occurring for the execution of all the works amounts at £.426.000.000 (four hundred and twenty six millions) including of permanent way works.

21

5. Allotment of following materials is request to your Commission.

Petrol 1.200.000

Lubricating oil 4.000

Cement tons 7.760

As long as bricks are concerned, about 9.000.000, we take delivery from furnaces existing in the area.

Metallic material is not needed neither for permanent ways nor for masonry works.

6. Considering the urgency required for such works, we have scheduled them lasting four months, we have already bidden various firms specially fitted for this kind of works.

7. We rely upon your Commission for a kind authorization to begin the works at-once.

The General Manager.

THE MINISTER OF TRANSPORT.

EX. I . 6639 .

Rome 5 July 1945. .

Major Richard L. M. F.

Dear Colonel Thomas,
reference to your letter n°. 233/20/55/TN.2.,
dated June the 30th, I take the opportunity to thank You for the
authorization concerning the expenses necessary for the works
to reoperate the 65 rail line -Florence-Bologna.

Sincerely,

(sigd. Ugo La Malfa)

Mr. M.B. THOMAS. Colonel
Deputy Director
Transportation Sub-Commission
Roma.

No attempt has been made to rebuild the road bridge, therefore, on completion of the construction of the Silver Pietrofitta Line, the road bridge will have to take both rail and road traffic.

(5) I need hardly stress the urgency of this work and the necessity of maximum effort on the part of the Ministry of Public Works.

Lay the following points be taken up with them for their immediate attention:

(a) (revised para 2) Impose upon P.O.L. instructions that they have authority to negotiate through the Comptroller of the roads the necessary arrangements for the purpose of this line construction.

(b) (para 2) That P.O.L. be supplied immediately with (c) (revised para 4) the relevant instructions to be issued to those concerned that while this road bridge is carrying both rail and road traffic, precedence must be given to road traffic.
 (d) To avoid accidents, due to the negligence of traffic on all bridges, that construction of the road bridge be put into effect immediately.

MINISTRY OF PUBLIC WORKS
Direction General of Roads
and new railways constructions

REFERENCE : 211/Uff.Tecnico.

19 June 45

TO : Ministry of Transport,
Direction General of State Railways.

& info.to : Railway construction Office - TAVERNELLE

SUBJECT : Railway junction between Ellera Station and Pietrafitta
Mines - Request for locomotive.

In order to provide with the required expedition to distribution of ballast on a/m junction for preparing 1st layer of roadbed, Impresa ZANETTI, who are undertaking a/m works requests loan of Locomotive No. 851.044 existing at Perugia Station and at present not operating, or of Locomotive No. 851.155 remained at Magione Station, and allocation of fuel needed for operation.

We understand from information received from the Nucleo Servizio Trazi one with this Direction that said allocation can be granted only upon approval by Allied Authority, and previous ascertainment as to the usefulness and necessity of said allocation.

This Service is well acquainted with the impossibility of carrying out transport of ballast with only one gasoline truck, and we beg you to inform of the above a/m Authorities, in order to obtain loan to Impresa Zanetti of one of the two aforesaid locomotives, and allocation of necessary fuel.

THE DIRECTOR GENERAL
Sgd. Caccese

INTER OFFICE MEMO

Ref: 233/8/14/17/En.2

25 June 1945

Subject : Petrol Supplies for repair work on
(a) Line 65 - Arezzo-Florence,
(b) Line 244 - Bastia-Ellerai.

To : Rail Division, En.4.

(1) Your 233/10/84/CE of 22 June '45 and AC/TN/10/90/CE of 23 June '45 reference.

(2) Commerce Sub Commission have been contacted and I attach copy of their letter to H.Q. Toscana Region A.M.G. for P.S.O. Florence Province for Major Blair; ref: AC/5146/1/Commerce POL. 11 of 19 June '45 and R.A.A.C. Pet. Sec. letter 30/B/8/1 of 16 June '45 for your perusal.

(3) You will see from the attached that Pet. Sec. has authorised a supplementary allocation for contractors engaged on railroad repairs, Arezzo-Florence- of 349 barrels plus oil and grease.

(4) Will you please bear in mind that this supplementary POL is conditional on Commerce Sub Commission being kept advised of the date of completion of the line (see their para 2). This should take care of Line 65.

(5) I note you have taken the question of POL supplies up with the Director General I.S.R. Line 244 Bastia-Ellerai Pietrafitta is in Italian Government Territory. It is therefore

16
- 2 -

the responsibility of the Ministro dei Trasporti to secure
POL through the appropriate Ministry for contractors' supplies.

(6) I agree that if these repairs were given military
priority POL could be supplied from military sources but this
method would only deter the responsibility which is now placed
on the Italian Government to fend for itself.

JR
R. P. RICHARDSON, Major,
Planning Staff.

Subject : Rail Construction Priorities.

To : Industry Sub Commission.

(1) Reference your AC/5616/IND of 19 June '45,

(2) Your para 2 (a) and (b).

These two Private Railway lines are already on the highest priority and work is progressing as favourably as material and P.O.L. becomes available. Pressure is being brought to bear on responsible parties to hasten construction.

(3) Line 65 Florence - Arezzo.

Instructions have already been issued to the Rail Division (Tn.4) that the rehabilitation of this line be advanced from the 2 phase basis, priority 3 to immediate priority 1. Rail Division to review the position of destruction availability of materials and reconstruct Florence S.Giovanni Valdarno or Arezzo S.Giovanni Valdarno, whichever is the easier.

F. P. RICHARDSON, Major,
Planning Staff,
Transportation Sub Commission.

23rd June 1945

SUBJECT : Line 65. Arezzo-Florence.

TO : Planning Division.

1. Reference your 233/14/8/Tn 2 of 21st June .
2. This line is scheduled for permanent repair, i.e. no temporary bridging is envisaged.
3. I am giving priority I to this work, but shall be glad to hear if it is desired that only temporary repairs are carried out for the time being.
4. It must be borne in mind, that if temporary repairs are carried out, the cost of the work will be considerably increased.
5. An engineer is visiting the work next week, when a report will be submitted giving estimated target date and whether the North or South end of line will be opened.

A.H. STREET, Major.

Major Buckley.

5. At a meeting held at the Ministry of Communications 11 May 1945, it was decided to representative of the
Minister of Posts to meet a representative of the
Ministries of Posts and Telegraphs.
6. It was decided that the one of the
Ministries of Posts should carry through the one of the
Ministries of Posts to be responsible for the 6 million
units of telephone traffic to be handled by the
Ministries of Posts.

7. It is to be noted from the documents that the
Minister of Posts has been given full responsibility
for telephone traffic to be handled by the
Ministries of Posts.

- 1. The arrangement of the new
telephone system will be completed by
1 July 1946.
- 2. The arrangements of the new
telephone system will be completed by
1 August 1946.

- 3. The arrangements of the new
telephone system will be completed by
1 September 1946.
- 4. The arrangements of the new
telephone system will be completed by
1 October 1946.

- 5. The arrangements of the new
telephone system will be completed by
1 November 1946.
- 6. The arrangements of the new
telephone system will be completed by
1 December 1946.

- 7. The arrangements of the new
telephone system will be completed by
1 January 1947.
- 8. The arrangements of the new
telephone system will be completed by
1 February 1947.

- 9. The arrangements of the new
telephone system will be completed by
1 March 1947.
- 10. The arrangements of the new
telephone system will be completed by
1 April 1947.

13 June 1945

Ref: 233/10/14/m.2

Subject: Rustic-Silerm Line,
Branch line Fieramafita lignite mine.

To: Public Works and Utilities Sub Commission.

Further to our conversation on 11th May on the above subject, the outcome of which was that the Italian Ministry of Public Works wrote to the Italian Ministry of the Treasury, under reference 2nd section Division 8 of the Ministry of Public Works Protocole 1110-2 dated 12th May; the letter was signed personally by the minister of public works.

This letter gave explicit detail of the work entailed, at the estimated cost of 18,000,000 lire (eighteen million lire).

A copy of the above letter was sent to Finance Sub Commission under our reference 233/8/m.2, of 14th May, pointing out that the Public Works in Perugia had 6,000,000 lire (six million lire) at its disposal and that it could carry on work for fifteen days only; and asked that a special request for immediate steps be taken for a decree to be passed for the 18,000,000 lire (eighteen million lire) within the next fifteen days.

Information has been received from Perugia that work will have to be suspended unless immediate action is taken to finance this project. The situation is serious as it is essential that this mine be working by late summer, as imports of coal are being cut down; this country will therefore have to rely upon every possible local supply this winter.

From a conversation Major Timmons - Major Richardson of even date, it would appear that Finance Sub Commission

9

- 2 -

cannot further press the Ministry of the Treasury for this decree to be passed. They have requested that the Italian Ministry of Public Works be asked to address a further letter to the Ministry of the Treasury, stating the seriousness of holding up this work for the reasons mentioned above.

On our part, we have insisted that the work was put in hand but did not anticipate that difficulties would arise from the Ministry of the Treasury.

It must be understood that the Ministry of Public Works is responsible for the construction of this branch line and it must be financed by them.

May I suggest that the Ministry of Public Works immediately supply Italian Public Works, Perugia, from their existing funds until the above decree is passed so that the construction on this line may be continued.

Would you please ask the Ministry of Public Works to let us have a copy of the letter they address to the Treasury.

J.P. RICHARDSON, Major,
Planning Staff,
Transportation Sub Commission.

Subject : Completion of construction of section of
Railway Line Ellera - Tavernelle.

To : Finance Sub Commission.

1. With reference to conversation Major Timmons-Major Richardson, attached hereto is copy of letter and estimated costs from the Italian Ministry of Public Works to the Ministry of the Treasury, requesting for an appropriation of 18,000,000 lire (eighteen million lire) for completion of construction of section of line Ellera Station and Pietrafitta mines to enable lignite to be withdrawn and dispatched to Rome.

2. As agreed, will you kindly forward the above correspondence to the Ministry of Treasury with a strong recommendation that a decree be passed within the next fifteen days.

This project is of the greatest importance in view of the fact that unless work starts immediately, the civil population of Italy will suffer considerably through lack of fuel, as coal imports have been cut to a minimum.

3. The Ministry of Public Works representative at Perugia has six million lire (6,000,000 lire) to commence work today and for essential purchases and salaries. This sum will last approximately fifteen days. Once started, this work must not be interrupted through lack of funds and I urgently request that this be pointed out to the Ministry of Treasury,

- 2 -

so that they will make available the above sum immediately
the decree is passed.

4. Needless to say this project has the approval
of the D.M.R.S., Transportation and Public Works & Utilities
Sub Commissions.

F.P.RICHARDSON, Major,
Planning Staff,
Transportation Sub Commission.

Ellera - Corciano Station.
Branch Line to Pietrafitta Mines.

To : Rail Division (TN 4)
(attention Major Ping)

Your AC/209/TN 4 of 30 April '45 and I.S.R.
statement re the above subject.

1. I have again confirmed with Coal Division of the Industry Sub Commission, that the Lignite from the above mines is urgently needed, especially for next winter.

2. As it is essential that the Contractor Zanetti starts work immediately it is advisable that a meeting be arranged to be held at the Ministry of Communications between representatives of the I.E.R., Ministry of Public Works, the Contractor Zanetti, the Trasimeno Mining Co. and representatives of TN 4 A.C. early next week, so that final decisions can be concluded.

3. Will you ask the I.S.R. to notify all concerned and inform A.C. TN 2, date and time of the meeting so that a representative may be present.

Held 0900
10 May

Ellera-Corciano Station.
branch line to Pietrafitta Mines.

TO : Planning Division
(Attention Major Richardson)

1. Attached hereto is a statement submitted by ISR in respect of the section of line Ellera-Pietrafitta. This is a statement of fact, and as such can be accepted, but it still does not seem to clear in a satisfactory way the high cost of this section of line, which is virtually undamaged, as compared with the heavy demolitions which occurred on the section from Bastia to Ellera through Perugia.
2. I am therefore asking the ISR to explain clearly how this extra cost is made up.

f. Arthur May
f. Chief,
Rail Division.

SUBJECT: Toligno-Torontola line;
 Illeia-Coccolano station;
 branch line to Pietra Sitta mines.

TO : Italian State Railway.

1. Reference is to your letter L.B.bis/20643/UN/107(4)14, of 26 April 45.
2. The facts given in your letter certainly clarify the position in respect of the section of the line Illeia-Pietrafitta, but the financial position is still not clear.
3. The creation of the tract from Bastia to Illeia was very heavily damaged, and yet the cost of repair is less than that now asked for the section Illeia-Pietrafitta. You are therefore asked to explain how this heavy additional cost is made up, and why it exceeds the cost of the section Bastia-Illeia.
4. We are most anxious to do all we can to get this section of the line completed at any early date, but there seems so much difficulty in obtaining a clear exposition for the additional costs now suddenly demanded that it is felt a very careful examination of the contractor's figures must be made.

A. H. May
P. Director.

MINISTRI OF TRANSPORTS
ISR GENERAL DIRECTION
OFFICE OF THE DIRECTOR GENERAL

Rome, 26 April 1945
L.8.bis/20644/CIV/107/(4)14.

TO: In S/Commission A.C.,
Rail Division

SUBJECT: Foligno-Terontola line;
Ellera Corciano Station;
branch line to Pietrafitta Mines.

1. Reference is made to your letters AC/209/ln.4 dated 5 April ult. and 17 April 1945 on the same subject.
2. We beg to submit following information obtained from the Ministry of Public Works.
 3. The new railway-line Perugia-Chiusi, repeatedly requested for by the Authorities of Perugia, was accepted, as a secondary connecting line, by the Commission charged with the study of the general organisation of the railways in Central Italy, appointed with Law Decree 27 April 1919.
 4. Constructions Dept. (then belonging to ISR General Direction) constructed part of said railway line during the years 1917/1918, that is the permanent way for standard gauge track from Ellera to Castiglione della Valle; these works were carried out on request of the / 52 Commissioner for National Fuels. The necessity to secure a prompt connection with Pietrafitta Mines having been successively felt, the permanent way, for narrow gauge track, was extended from Castiglione della Valle in order to lay down a narrow gauge (deauville) track over the whole line from Ellera to Pietrafitta; on account of this reasons, the second part of the P.W. was constructed with short-radius curves.
Latter works were carried out by Civil Engineering Office of Perugia (belonging to Ministry of Public Works Administration) during the years 1918/1919, still on request of above Commissioner for National Fuels.
The narrow gauge (deauville) track, with transhipment facilities at Ellera Station, was in operation only for a very short time.
 5. The existence of Pietrafitta Mines, while it might have influenced the anticipated construction of the Ellera-Tavernelle section, did not affect the laying out of the line which must necessarily follow upstream the Nestore Valley as far as Piegaro tunnel, where it passes through to the opposite slope, towards Chiusi.
 - b. In the meantime, in 1924, above Constructions Dept. ISR was suppressed and its attributions passed over to the General Direction for the new Railway Construction, c/o the Ministry for Public Works.

3. The new railway-line Perugia-Chiusi, repeatedly requested for by the Authorities of Perugia, was accepted, as a secondary connecting line, by the Commission charged with the study of the general organisation of the railways in Central Italy, appointed with Law Decree 27 April 1919.

4. Constructions Dept. (then belonging to ISR General Direction) constructed part of said railway line during the years 1917/1918, that is the permanent way for standard gauge track from Ellera to Castiglione delle Valle; these works were carried out on request of the Commissioner for National Fuels. The necessity to secure a prompt connection with Pietrafitta Mines having been successively felt, the permanent way, for narrow gauge track, was extended from Castiglione delle Valle in order to lay down a narrow gauge (decauville) track over the whole line from Ellera to Pietrafitta; on account of this reasons, the second part of the P.W. was constructed with short-radius curves.

Latter works were carried out by Civil Engineering Office of Perugia (belonging to Ministry of Public Works Administration) during the years 1918/1919, still on request of above Commissioner for National Fuels.

The narrow gauge (decauville) track, with transhipment facilities at Ellera Station, was in operation only for a very short time.

5. The existence of Pietrafitta Mines, while it might influenced the anticipated construction of the Ellera-Tavernelle section, did not affect the laying out of the line which must necessarily follow upstream the Nentore Valley as far as Piegaro tunnel, where it passes through to the opposite slope, towards Chiusi.
have

6. In the meantime, in 1924, above Constructions Dept. ISR was suppressed and its attributions passed over to the General Direction for the new Railway Construction, c/o the Ministry for Public Works. In 1941 latter Office was instructed by the Chief of the Government to arrange for completion, with standard gauge track, of the section Ellera-Tavernelle of the Perugia-Chiusi line; said section should have been utilized, at the beginning, only for movement of lignite. These works are the same being presently carried out under the supervision of above General Direction for the new Railway Construction, with funds provided for by the Ministry of Public Works; in accordance with a contract still under negotiation, the Trasimeno Mining Coy. has to bear only those expenses that refer to the installations directly concerning the operation of the mines, that is the triangle Pietrafitta-Nestore bridge-Lignite loading Station.

(2)

7. As a matter of fact, a contract was let with Constructor Zanetti on April 7th 1942 for the completion of above works; said contract, still valid, ~~covers~~ only the Ellera-Pietrafitta section, while no contract has been let, yet, for the remaining section Pietrafitta-Chiesi.
8. While establishing the expenditure required for completion of said branch line, consideration has been given to the considerable increase of the costs of both manpower and building material from 1942 till do-day. We want to point out, on this subject, that Contractor Zanetti has requested that, in accordance with the provisions of a/m contract 7 April 1942, all prices be duly revised before starting with the works.
9. In so far as the operation of the line in question is concerned, ISR have been requested to operate said section as a private siding (that is, not for public service) for conveyance of lignite only, on behalf of Trasimeno Mining Company. ISR have accepted to operate said section, for which the expenses will be borne by Trasimeno Mining Co. A special convention is going to be stipulated btw. Trasimeno Mining Co. and the Ministry of Public Works; this convention covers the concession in use of the line to Trasimeno Mining Co. by Ministry of Public Works, for operation by ISR, as though it were an ordinary private siding.
10. Should present information not fulfill your requirements, the Official of the Ministry of Public Works particularly charged with above business could personally report to that S/Commission in order to furnish any further information required; we would be very glad to arrange for above meeting, should you consider it necessary.
11. We await to hear that S/Commission's decision as to the further financial backing requested for.

The Director General
G. DI HATMONDO
