Our Ref: EC/73/2/Mn.3.

6 February 1945

- FROM : Transportation Sub-Commission  
Movements Division
- TO : Lt. Colonel M.J. Sleath
- SUBJECT : Road Transport, FOGLA Zone, Export Program.  
*(f)*
1. Reference attached letter EP/4024 dated 24 Jan.
2. Tyres position is being handled by Col. Evans,  
who, I understand, has taken up this matter direct with  
Col. Evans, Commerce Sub-Commissioner.
3. So far as A.C. vehicles are concerned, it will be  
appreciated that at the present time there are none available  
for additional allocation to Foglia Zone.
4. As E.M.A.G. is now proposed to be in operation,  
the Zone Commissioner should apply to Z.H.A.C. (Compartimento  
of Yari) for the lift he requires for the export programme.  
If this is not forthcoming, representation could be made by  
this H.Q. to the Minister of Transport.
5. It is quite clear that the main problem is tyres.  
Under the present circumstances even if additional vehicles  
could be supplied in a short time they would be off the road  
for lack of tyres.

SUBJECT : Road Transport, Foggia Zone, Export Programme.

1. Reference attached letter IP/4024 dated 24 Jan.  
from the Foggia Zone Commissioner.

2. Tyres position is being handled by Col. Carnes,  
who, I understand, has taken up this matter direct with  
Col. Evans, Commerce Sub-Commissioner.

3. So far as A.C. vehicles are concerned, it will be  
appreciated that at the present time there are none available  
for additional allocation to Foggia Zone.

4. As B.M.A.U. is now purported to be in operation,  
the Zone Commissioner should apply to Z.H.A.C. (Compartimento  
di Pisa) for the list he requires for the export programme.  
If this is not forthcoming, representation could be made by  
this H.Q. to the Minister of Transport.

5. It is quite clear that the main problem is tyres.  
Under the present circumstances even if additional vehicles  
could be supplied, in a short time, they would be off the road  
for lack of tyres.

from Foggia Zone.

ALLIED COMMISSION

PUGLIA Zone

Ref: EP/ 4024

24 January 45

SUBJECT: Road transport and tyres in relation to export programme  
TO : HQ, Southern Region, Allied Commission (E & S Div)  
FROM : Zone Commissioner - Ag Puglia Zone

1. The situation regarding road transport is steadily deteriorating and three further trucks have had to be taken off the road for lack of tyres.

This reduces the total truck pool trucks on the road to 61 of average capacity 25 ton.

2. Several letters pointing out the exceptional needs of this zone in the matter of transport have been written and particular attention was again drawn to our special difficulties in this H.Q. monthly report Appendix A para 6 for period 20 Nov - 20 Dec 44. No section has been taken to assist in maintaining the export programme by Naples, Catanzaro or Bari zones, except that Bari sent 5 x 3 tonners for 5 days to assist loading 1000 tons grain on S.S. Maloro. These trucks carried a total of approx. 150 to Manfredonia. Rome has sent 1 x 15 ton truck and trailer and this will assist considerably if it is not recalled without equivalent replacement.

3. Our export programme of grain, barley and flour alone involves the following weekly lifts:-

300	tons to Cosenza
1800	tons to Naples
500	tons to Rome
250	tons to Lecce by sea

Total 2850 tons per week

Whether the goods are shipped as grain or flour, transport must still be provided to carry supplies to railhead or mill. At this stage more and more grain has to be taken from the more distant warehouses- largely due to the breakdown in previous shipping programmes. A proportion of this local quantity can be carried by animal-drawn transport, but as distances increase this proportion decreases. In addition to the foregoing 250 tons per week there is the normal transport requirement for the internal movement of goods in this Province, where communes

1. The situation regarding road transport is steadily deteriorating and three further trucks have had to be taken off the road for lack of tyres.

This reduces the total truck load trucks on the road to 61 of average capacity 25 Qli.

2. Several letters pointing out the exceptional needs of this zone in the matter of transport have been written and particular attention was again drawn to our special difficulties in this U.G. monthly report Appendix A para 6 for Period 20 Nov - 20 Dec 44. No action has been taken to assist in maintaining the export programme by Naples, Catanzaro or Bari zones, except that Bari sent 5 x 3 tonners for 5 days to assist loading 1000 tons grain on S.S. Teloro. These trucks carried a total of approx. 150 to Manfessonia. Rome has sent 1 x 15 ton truck and trailer and this will assist considerably if it is not recalled without equivalent replacement.

3. Our export programme of grain, barley and flour alone involves the following weekly leave:-

300	tons to Cosenza	2337
1800	tons to Naples	
500	tons to Rome	
250	tons to Lecce by sea	
Total		2850 tons per week

Whether the goods are shipped as grain or flour, transport must still be provided to carry supplies to railhead or port. At this stage more and more grain has to be taken from the more distant warehouses - largely due to the breakdown in previous shipping programmes. A proportion of this local quantity can be carried by animal-drawn transport, but as distance increases this proportion decreases. In addition to the foregoing 2850 tons per week there is the normal transport requirement for the internal movement of goods in this Province, where communes are widely separated and distances are great.

4. At the moment more than 50% of our local trucks (including civilian-owned vehicles) are used to lift goods for export, and, in an attempt to maintain as nearly as possible the export programme, we have been forced to work these trucks very long hours and at a very high mileage per day - suffered largely for the good of other Provinces. It is feared that this has

neither been appreciated nor will special consideration be given to the replacement of wornout trucks and tyres. The Province can no longer afford to supply both the goods and all the transport for export to other Provinces.

5. Our fears were increased by the fact that the only tyre distribution to date to this Zone consisted of 67 tyres allotted on a per capita basis, which clearly showed no appreciation of the fact that we are feeding many more than our own population.

We are in fact programmed to export nearly four times our own consumption.

6. The position at present is that most of the tyres are practically worn out and it is now necessary to put sound vehicles off the road through lack of tyres. It will also be necessary to reduce the load carried per truck and drastically to cut the use of trucks.

7. Our absolute requirements are:-

for exports to Naples	450 Qls lift = 3 trucks and trailers
	x 150 Qls each or equivalent
" " Cosenza	150 Qls lift = 1 truck and trailer
	x 150 Qls each or equivalent
" " Lecce	100 Qls lift = 1 truck x 100 Q. or equiv.

and also forty 200 x 20 tyres and tubes to keep our present truck pool trucks on the road.

If these requirements cannot be provided, it is requested that it will be necessary drastically to reduce exports. Reduced bids for rail transport will be made for the period commencing March 6th, unless the assistance requested is received by 15th February on which date rail bids must be submitted for week commencing 6th March.
