HEADQUARTERS ALLIED COMMISSION
ECONOMIC SECTION
APO 394

15.14/ES

1 February 1945

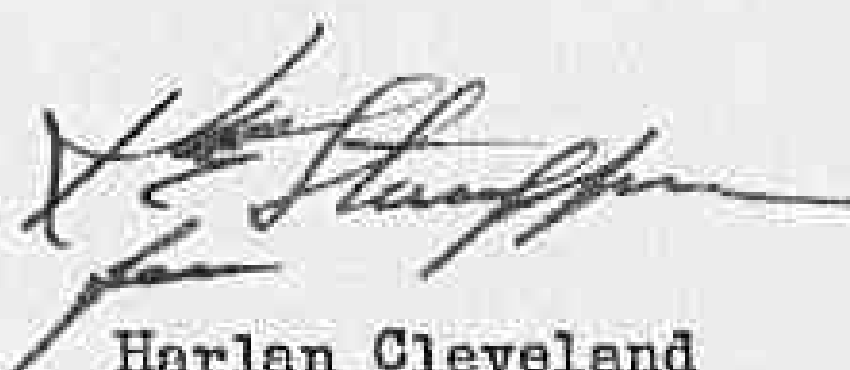

SUBJECT: Forecast Movements for February

TO : Mr. Merritt H. Taylor, Director
Transportation Sub-Commission

1. All Sub-Commissions were canvassed for their forecast of materials to be moved in the month of February. The first tabulation of these data is attached. The tabulation indicates only the total tonnage (metric tons) forecast to be lifted in each province for export out of the province.

2. Within the next two days it is hoped you will receive the complete detail of the items and tonnages making up the totals indicated in the attached tabulation. Moreover, the detail will indicate provinces to which each item is moved and in what amounts. Thus, it will be possible to determine the total ton kilometers of movements by road, rail or water for any commodity.

3. This division will be in a position to offer assistance on the calculations and tabulation of ton kilometer figures if you so desire.

Harlan Cleveland
Executive Director

ATTENTION : Forecast of February Material Movements

TO :	Agriculture S.C.	Labor S.C.	Displaced Persons S.C.
	Commerce S.C.	Public Health S.C.	Transportation S.C.
	Education S.C.	Public Relations S.C.	UNRRA
	Finance S.C.	Public Safety S.C.	Food S.C.
	Industry S.C.	Public Work & Utilities	War Material Disposal.

1. Foreknowledge of coming demands upon transportation facilities is essential to planning for their more efficient use. The same data are also essential to other planning, advisory, and operating functions of the Economic Section as a whole. Pending establishment of a regular forecasting procedure and schedule, which will meet the forecast number of requirements for all our purposes, it is requested that you now forecast only your necessary movements of material.

2. Forecast is to cover all material to be moved into each province south of and including Apulia, Lucania, Lazio, Abruzzo and Tarentum.

3. A specimen sheet is attached. Additional sheets can be supplied for your final tabulations but not enough are available for work sheets. One sheet should be used for each item except that items which are completely interchangeable in use may be grouped and figures given on basis of group total (for example, all auto parts be considered as one item for this forecast.)

a) Column 1

Give total metric tons forecasted to move into each listed province

3827

b) Columns 2 to 6, inclusive.

Under "from" insert the province of origin for material moved into each listed province (for imports give ports).

Under "metric tons" insert number of tons expected from the province named in "from" column.

c) No total or compartmental figures are required.

213/rd

Final tabulations will be expedited if provinces of origin are always given in the order in which they appear on the form. For example: if Ancona, Rome and Naples will ship into Rome, on the line for Rome give the tonnage from Rome in col.2, Ancona in col.3, Naples in col.4

1

4. E.E. Snuffer, Room 36, Phone 303, will collect these data and coordinate the work for Economic Section Staff and Transportation Sub-Commission. It is suggested that each Sub-Commission designate some one to gather and organize the work of all its sub-divisions and that this person should contact Snuffer with respect to any questions which arise.

5. To summarize, it is important that all data be submitted in the standard form and order so that all figures can be readily collated and processed; all data should be given in metric-tons; all should be routed direct to Snuffer not later than January 12, 1948.

Harley Cleveland.

AS TM/73/1/RM

SUBJECT : Monthly report December - Movements Division

TO : Director Tptn S/C.

1. During the second half of December the establishment of a Movements Division as a section of the Transportation S/C. commenced. This organisation had not been completed by the end of the month.
2. Steps have been put in hand to obtain the necessary factual information on which to base an adequate report. This information is not yet available.
3. In view of the above it is not proposed to compile a coordinated movements report, which would have little value.
