2. FUTURE BIDS:

6106

(a) The chairman again stressed the shortage of shipping and Services were asked to bid only such tonnages as were absolutely essential. Every endeavour would be made to move such bids. It was unlikely that more than 20,000 tons would be lifted from NORTH AFRICA and MIDEAST to NAPLES during September. It was stated that three different ports of discharge, widely separated geographically, had been nominated for the major part of the cargo of a large coaster; the position was still obscure. It was impossible to work out an oconomicalshipping programme on this basis; turnround of the coaster fleet was increased and size of lift fell proportionally. Extracts from a signal from LONDON were given in which is was stressed that the greatest shortage existed in this type of shipping and that turnround must be improved.

Meeting No.34 - 4 Aug 44.

4 Aug 44.

Tele: FREEDOM 318.

1. "EMPIRE DARWIN" ex U.K. scheduled for the HEEL in K.M.S. 59 has missed the convoy and it was anticipated this vessel would sail in K.M.S. 60.

2. Previous Maintenance Periods.

The backlog of stores from NORTH AFRICA and MIDEAST to the HEEL would be cleared during the period 19 - 28 Aug. 10,000 tons of backlog and maintenance stores from N.A. to ELBOW would be moved during August. 10,000 tons from M.E. to ELBOW would also be cleared during August.

3. Future Periods.

There would be a shortage of shipping during Aug and Sep and services were asked to bid only such tonnages as were absolutely essential. Every endeavour would be made to move such bids. The situation was now under examination and a priority list of stores would in due course be made for the loading of those ships available.

4. Current Period 29 Aug - 7 Sep.

(a) Bids were made as recorded on att. Appendices. Bulk tonnages would be signalled to MIDEAST, NORTH AFRICA and A.A.I. by A.F.H.Q. Services were to follow up immediately with departmental breakdowns. Services in MIDEAST, N. AFRICA and SICILY would submit A.F.W. 5170's to Movement authorities there.

(b) Availabilities for direct loadings to fwd Italian ports had been accepted by A.A.I., and are recorded on the att. Appendices.

ADMINISTRATIVE INSTRUCTION NO. 47

MAINTENANCE PROCEDURE FOR FORWARD ITALIAN PORTS

GENERAL

1. This instruction defines the procedure to be followed for maintenance through forward ports in ITALY. Maintenance will be derived from the following sources:-

(a) Direct loadings from UK/USA.
(b) Direct loadings from ME/NA.
(c) Outloadings from ITALY.

In order to minimise the strain on port acceptance capacity and to avoid double handling, all possible tonnages will be set up from outside ITALY. Any reasonable inconvenience caused thereby will be accepted in view of the overall saving.

2. The bidding for acceptance of these maintenance tonnages falls into three categories (corresponding to the three sources of supply detailed in para 1). These categories are:-

(a) Long Term Maintenance.
(b) Short Term Maintenance.
(c) Immediate Maintenance.

LONG TERM MAINTENANCE

3. Bids are required to reach 'Q' Branch, Main HQ AAI, one hundred and eleven days prior to the first day of the month covered by the bids. A seperate letter, 1021/Q of 4 Jul 44 has been sent to all concerned which details this procedure. These bids show:-

(a) tonnages to be set up from sources outside ITALY.
(b) estimated tonnages to be set up from within ITALY.

Bids for tonnages to be set up from sources outside ITALY, once approved by AFHQ, become firm allocations of port capacity. Bids for tonnages to be set up from within ITALY are estimates to enable a provisional allocation of the capacity of forward ports to be made and are subject to revision at the Short Term Maintenance Meetings described in para 4.

SHORT TERM MAINTENANCE

4. In order to adjust bids when requirements have become firmer and more information is available about direct loadings from UK/USA, meetings will be held to revise bids for each ten-day maintenance period. Bids are required to reach 'Q' Branch, Main HQ AAI, thirty-five days before and will be considered at a conference held thirty-three days before the first day of that period. These meetings will decide:-

(i) UK/USA.
(ii) ME/NA.
(iii) ITALY.

IMMEDIATE MAINTENANCE.

5. While generally no change in tonnages decided at Short Term Maintenance Meetings will be approved, priority demands for outloadings from ITALY may be submitted to this HQ twenty-five days before the first day of each ten-day maintenance period. Such priority demands will be considered at a meeting, to be held twenty-three days before the first day of each ten-day maintenance period, which will decide final loadings to be made from ITALY.
