RESTRICTED.

Subject coal for ITALY and further to FX 50977 and FX 51066 of 30 OCTOBER.

N.Y.
1. Most grateful for your offer by telephone of 5 cargoes ex US originally destined for BELGIAN ports in exchange for 2000 railway wagons for temporary service between RUHR and BELGIUM. Much regret however that owing to circumstances unforeseen when our FX 51066 was dispatched unable now undertake to provide rolling stock and locomotives for use outside ITALY.

5131

2. Unforeseen circumstances envisaged in first above include (A) programme of coal now scheduled for November loadings and December arrivals make grand total of 707000 tons. Requirements for clearing this large tonnage do not permit of diversion of wagons from ITALY for longer haul from RUHR. (B) Weather conditions in north ITALY now being experienced will make wagon distribution increasingly difficult and make it inadvisable to divert wagons out of ITALY.

3. Alcom have requested CCS that 5 cargoes already dis-

Subject coal for ITALY and further to FX 50977 and FX 51066 of 30 OCTOBER.

N.Y. 1. Most grateful for your offer by telephone of 5 cargoes ex US originally destined for RUSSIAN ports in exchange for 2000 railway wagons for temporary service between RUHR and BELGIUM. Much regret however that owing to circumstances unforeseen when our FX 51066 was dispatched unable now undertake to provide rolling stock and locomotives for use outside ITALY.

2. Unforeseen circumstances envisaged in first above include (A) programme of coal now scheduled for November loadings and December arrivals make grand total of 707000 tons. Requirements for clearing this large tonnage do not permit of diversion of wagons from ITALY for longer haul from RUHR. (B) Weather conditions in north ITALY now being experienced will make wagon distribution increasingly difficult and make it inadvisable to divert wagons out of ITALY.

3. Alcom have requested COS that 5 cargoes already discussed and now enroute for northwest EUROPE be diverted to north Italian ports to partially fill gap arising from November short fall and that repayment be made by diversion from December allocation to ITALY unless additional loading can be arranged to repay such diversions. Most grateful if you can give your concurrence.

4. Understand investigations already being discussed regarding supply of coal for ITALY ex RUHR at ECO conference in LONDON.

GHQ CMFADMINISTRATIVE INSTRUCTION NO 25SUPPLY OF COAL TO BRITISH FORCES IN ITALY INCLUDING VENEZIA GIULIAOBJECT

1. The object of this instruction is to set out the procedure for the supply of coal to the British Forces in ITALY after 30 SEP 45.

DEFINITION

2. Coal where used in this instruction includes coal, coke and any solid fuel other than wood, whether imported or locally produced.

POLICY

3. HQ Allied Commission will be responsible for coordinating British Military Coal requirements.

PROVISION

4. DTN, DST and DW this HQ will submit bids for their future requirements to HQ Allied Commission in such form, on such dates and for such periods as the latter may require. Pending the issue of instructions to the contrary bids will be submitted to HQ Allied Commission in accordance with former procedure applicable to the submission of bids to QM (Coal Section) AFHQ.

5. HQ Allied Commission will take the necessary action to procure this coal from authorised supply agencies keeping AFHQ and this HQ informed of the position.

IMPORTATION

6. HQ Allied Commission will be responsible for coordinating with the appropriate shipping authorities, the allocation of all coal cargoes to ports, consulting AFHQ and this HQ as necessary.

ALLOCATION OF CARGOES

7. HQ Allied Commission will issue instructions to the agency responsible for discharge as to the allocation to users of cargoes of colliers. In making such allocations military needs will take priority and AFHQ and this HQ consulted where necessary.

LOCAL PRODUCTION

8. The bids submitted in accordance with para 4 above will cover all solid fuel requirements other than wood and a small quantity of coal.

5116

1. The object of this instruction is to set out the procedure for the supply of coal to the British Forces in ITALY after 30 SEP 45.

DEFINITION

2. Coal where used in this instruction includes coal, coke and any solid fuel other than wood, whether imported or locally produced.

POLICY

3. HQ Allied Commission will be responsible for coordinating British Military Coal requirements.

PROVISION

4. DTN, DST and DW this HQ will submit bids for their future requirements to HQ Allied Commission in such form, on such dates and for such periods as the latter may require. Pending the issue of instructions to the contrary bids will be submitted to HQ Allied Commission in accordance with former procedure applicable to the submission of bids to QM (Coal Section) AFHQ.

5. HQ Allied Commission will take the necessary action to procure this coal from authorised supply agencies keeping AFHQ and this HQ informed of the position.

IMPORTATION

6. HQ Allied Commission will be responsible for coordinating with the appropriate shipping authorities, the allocation of all coal cargoes to ports, consulting AFHQ and this HQ as necessary.

ALLOCATION OF CARGOES

7. HQ Allied Commission will issue instructions to the agency responsible for discharge as to the allocation to users of cargoes of colliers. In making such allocations military needs will take priority and AFHQ and this HQ consulted where necessary.

LOCAL PRODUCTION

8. The bids submitted in accordance with para 4 above will cover all solid fuel requirements other than wood and will therefore include Sardinian Coal, Cogne anthracite, lignite, gas or metallurgical coke and peat. HQ Allied Commission will ensure that these bids are given priority over civil requirements, except in regard to civil hospitals and bakeries which will have equal priority with military hospitals and bakeries.

ACCOUNTING

9. HQ Allied Commission will keep any records required of imports and disposal of coal on British military account.

STOCK REPORTS/.....

5116

-2-

STOCK REPORTS

10. HQ Allied Commission will be supplied with reports of stocks in the hands of military users, for such periods in such form and by such dates as may be required. Pending the issue of any instructions to the contrary these reports will be submitted to HQ Allied Commission in accordance with former procedure applicable to submission to 2M (Coal Section) AFHQ.

MILITARY CONTRACTORS

11. It will be the policy to supply coal to military contractors from civilian and not from military stocks. Steps will be taken to cease the supply of such coal from military stocks as soon as possible. HQ Allied Commission will ensure that priority is given to such requirements in accordance with para 7 and 8 above. HQ Allied Commission will issue any further detailed instructions necessary.

VENEZUELA GIULLA

12. Military requirements for VENEZUELA GIULLA will be submitted to HQ Allied Commission in accordance with para 4 above. A separate bid will however be submitted by DTN, DST and DW in respect of this territory.

COMMUNICATIONS

13. HQ Allied Commission will act through its Coal Division which should be addressed as follows:-

11. It will be the policy to supply coal to military contractors from civilian and not from military stocks. Steps will be taken to cease the supply of such coal from military stocks as soon as possible. HQ Allied Commission will ensure that priority is given to such requirements in accordance with paras 7 and 8 above. HQ Allied Commission will issue any further detailed instructions necessary.

VENEZIA GIULIA

12. Military requirements for VENEZIA GIULIA will be submitted to HQ Allied Commission in accordance with para 4 above. A separate bid will however be submitted by DTN, DST and DW in respect of this territory.

COMMUNICATIONS

13. HQ Allied Commission will act through its Coal Division which should be addressed as follows:-

1. ITALIAN PORTS.

Col. Walker explained that due to the American Coal stoppage, October shipments had been seriously retarded, and the urgent coal situation in Italy had resulted. Washington was now proposing to send 77 vessels to Italian Ports for discharge during December as follows: -

59	colliers for Italian PB Programme
3	" " U.S. Army
10	" " Swiss Account
5	" " British Army (from South Africa)

The considerable tonnage involved necessitated a careful survey in order that there should be no conflict with the present or future programme being prepared for the Import Programming & Port Reception Committee.

It was recognized that the discharging capacity of all ports excepting Savona was governed by the rail clearance facilities and commencing with the North, Genoa and Savona were reviewed.

GENOA

Records show that Genoa is capable of discharging 100,000 tons of coal monthly. The question was raised as to the advisability of augmenting this tonnage but after general discussion it was decided to leave the safe figure of 100,000. This quantity can be readily lifted by rail providing weather conditions remain favourable.

SAVONA

This port can discharge 180,000 tons per month. It was discussed whether this could be raised to 200,000 tons. Maj. Harris remarked this could be done on a 24 hour work basis. Agreement was reached whereby 200,000 tons would therefore be discharged from this port, if required.

Col. Walker suggested that coal be stockpiled at San Giuseppe if clearance could not be made by Swiss waggons. The Swiss imports are stated to be 85,000 tons for the period under review.

653/1013

-2-

TRIESTE

A round figure of 30,000 tons was agreed upon to be discharged at this port.

VENICE

After discussion it was decided that the estimated figure of 90,000 tons p.m. discharge could be reached, provided use could be made of the Vetrocoke Berth. Maj. Harris reported that this depot can stockpile 100,000 tons. The question was raised as to whether this dump was rail served and if coal could be easily transferred. Maj. Harris explained that only coking coal for the plant's own use could be discharged at Vetrocoke. It was agreed that 30,000 tons be stockpiled there.

The point was raised as to whether the port of La Spezia could be used to relieve some of the difficulties of discharge in other ports. It is hoped that movement there would be arranged by January. It is thought that 12,000 tons might be stockpiled there.

BARI & ANCONA

The discharge in Bari is reported to be 1200 tons daily if only the civilian berth is used and 2400 tons if all berths are operating. Rail clearance presents some difficulties for Ancona but Lt. Col. Worthington believed that providing weather conditions will not be too unfavourable, the amount of coal discharged can be lifted. After general discussion, it was estimated that 50,000 tons can be handled through these ports.

TARANTO & BRINDISI

Records show that these two ports combined can discharge 27,000 tons. This figure was agreed upon. One ship to lighten at Brindisi and two at Taranto.

GALLIPOLI

Col. Walker remarked that as far as coal is concerned, this port cannot be taken into consideration.

SICILY

31,500 tons of coal are being discharged in Sicily, of which 17,500 imported and 16,000 Sardinian.

NAPLES - BANGOLI

After discussion, it was estimated that 45,000 tons per month could be handled through Bangoli.

CIVITA'VECCHIA & PIOMBINO

0 5 8 4

The point was raised as to whether the port of La Spezia could be used to relieve some of the difficulties of discharge in other ports. It is hoped that movement there would be arranged by January. It is thought that 12,000 tons might be stockpiled there.

BARI & ANCONA

The discharge in Bari is reported to be 1200 tons daily if only the civilian berth is used and 2400 tons if all berths are operating. Rail clearance presents some difficulties for Ancona but Lt. Col. Worthington believed that providing weather conditions will not be too unfavorable, the amount of coal discharged can be lifted. After general discussion, it was estimated that 50,000 tons can be handled through these ports.

TARANTO & BRINDISI

Records show that these two ports combined can discharge 27,000 tons. This figure was agreed upon. One ship to lighten at Brindisi and two at Taranto.

GALLIPOLI

Col. Walker remarked that as far as coal is concerned, this port cannot be taken into consideration.

SICILY

31,500 tons of coal are being discharged in Sicily, of which 17,500 imported and 16,000 Sardinian.

NAPLES - BANGOLI

After discussion, it was estimated that 45,000 tons per month could be handled through Bangoli.

CIVITAVECCHIA & PIOMBINO

The total tonnage to be discharged at both ports would be around 42/43,000 tons monthly. It was remarked that Piombino cannot be considered very useful owing to bad weather conditions during the winter period. Some 10,000 tons, it is thought, might be moved to Fiumicino by barges. Rail clearance presents difficulties as the line is said to be very congested. It was discussed whether stockpiling coal and moving it on by barges would ameliorate the situation.

2. Col. Walker summarized vessels to discharge at the c/n ports as follows:

Genoa & Savona	36 colliers monthly
Trieste	do
Venice	do
Bari & Ancona	do
Brindisi	do
Taranto	do
Sicily	do
Naples	do
Civitavecchia & Piombino	do

This makes a total of 72 ships against 77 scheduled.

Col. alker emphasized that the meeting was held to bring out estimated figures as to whether 77 ships could be discharged at the various Italian Ports in December, and thus give answer to W.S.A. and M.W.T. in this respect.

As to the remaining 5 ships, it was considered that W.S.A. should be advised of the difficulties of their reception.

UNCLASSIFIED.

1. owing excess of stocks in hand and present production rate over transport facilities 200,000 tons run of mine are available.

2. It is assumed that demand for 200,000 tons is now recurring and includes the 20,000 tons required immediately. present coal export programme only envisaged dispatch to liberated nations formerly allied under auspices of UNO within accordance with Directive by UNO.

3. movement of coal is limiting factor and can only take place by rail (a) at expense of existing allocations until locomotives and wagons are received from ITALY which may take 3 weeks or from other sources outside UN zone and (b) if the UN authorities agree to the transit of this coal through their zone which is understood to be impracticable for lack of train paths already fully programmed on coal for UN zone and AUSTRIA.

4. to the extent that the fuel committee is prepared to order the diversion of coal which would have gone to the UN zone and or AUSTRIA the requirements of ITALY can therefore be met.

5. other possibility is to divert coal or UN destined for BELGIUM and send it to ITALY 55,000 tons were loaded for BELGIUM in excess of allocation offered in October. BELGIUM should therefore be able to stand under delivery on UN in November.

6. if you are not prepared to reduce existing allocation or divert from UN it is considered that the best plan is to ship to ITALY during December for arrival January up to

5107

Description and proximate analysis coal shipments to ITALY under
 Civilian Supply Program.

1. Information as to specific analysis each coal cargo un-
 available. However, general description is available based to some
 degree on ports of loading and general analysis of type coal now
 available for export of which approximately 90% of UNITED STATES
 exports to EUROPE will be strip coal, straight run of mine of 4-inch
 resultant.
2. Shipments from PHILADELPHIA should be approximately 17 to 25
 volatile strongly coking and swelling, 9 to 14% ash, 1 to 3% sulphur,
 2300 and above AST. BALTIMORE and CHARLESTON shipments should be
 coking and also BALTIMORE shipments should provide some medium qualiti
 gas coal.
3. CHARLESTON and GULF Ports should analyze about 33 to 39%
 volatile, 6 to 14% ash, sulphur up to 3% and approximately 2100 AST.
4. High quality gas, low volatile coking and sized coals not
 currently available. Suggest maximum use be made of strip coal which
 is available and that any stocks of high grade coal in ITALY be
 conserved for specific and users requiring quality coal.

TN 387

UNCLASSIFIED:

This is COM 248.

Refer MOC 332 and WAR DEPARTMENT cable 5681.

Description and proximate analysis coal shipments to ITALY under Civilian Supply Program.

1. Information as to specific analysis each coal cargo un-available. However, general description is available based to some degree on ports of loading and general analysis of type coal now available for export of which approximately 90% of UNITED STATES exports to EUROPE will be strip coal, straight run of mine of 4-inch resultant.
2. Shipments from PHILADELPHIA should be approximately 17 to 25 volatile strongly coking and swelling, 9 to 14% ash, 1 to 3% sulphur, 2300 and above AST. BALTIMORE and CHARLESTON shipments should be coking and also BALTIMORE shipments should provide some medium quality gas coal.
3. CHARLESTON and GULF Ports should analyze about 33 to 39% volatile, 6 to 14% ash, sulphur up to 3% and approximately 2100 AST.
4. High quality gas, low volatile coking and sized coals not currently available. Suggest maximum use be made of strip coal which is available and that any stocks of high grade coal in ITALY be conserved for specific and users requiring quality coal.

RESTRICTED.

Subject coal for ITALY.

AGWAR advises in COM 261 of 26 current that, as a result of recent US coal strikes, 52 out of 90 coal cargoes for ITALY, scheduled for September and October loadings failed to sail. Result will be to reduce November coal arrivals for ITALY by 200,000 tons or approximately 50%. This reduction will have most serious effect on Italian economy principally in industrial north where it is estimated unemployment will be increased 1 million. Main industries affected will be cement and brick making (for reconstructions purposes), textiles, rubber, heavy industries (turning out trucks and industrial machinery), chemicals, pharmaceuticals and fertilizers (for next years crops). Industry has no stocks of coal on hand as all imports have had to be consumed as soon as received. In addition, there will be no coal for domestic heating.

AGWAR has promised resumption of shipments as soon as possible but state that no pickup in shipments can be expected until 1 November. In view of repercussions of unemployment problem, the essential nature of industries affected and the lack of domestic heating, the November coal position for ITALY is causing us gravest concern. Immediate requirements are 200,000 tons run of the mine coal for general purposes similar to American high volatile coal now being shipped.

Please advise if release can be made of 200,000 tons coal for ITALY. If not available, request any notion that can be released. Also,

AGWAR has promised resumption of shipments as soon as possible but state that no pickup in shipments can be expected until 1 November. In view of repercussions of unemployment problem, the essential nature of industries affected and the lack of domestic heating, the November coal position for ITALY is causing us grave concern. Immediate requirements are 200,000 tons run of the mine coal for general purposes similar to American high volatile coal now being shipped.

Please advise if release can be made of 200,000 tons coal for ITALY. If total amount not available, request any portion that can be released. Also, request dates and locations of release. In view of the extreme urgency of the situation, we will undertake movement to ITALY by the use of rolling stock and locomotives of this theater which would have been used to move coal from ports in ITALY if the coal had been shipped from the US and by seriously cutting our essential commitments. Upon receipt of your reply as to amount available, plan will be submitted to you for movement of coal to ITALY.

(FX 50977 cont'd)

- 2 -

This is sent to you because the situation may become so critical as to involve the military and, also, because we understand that ECO does not control the entire coal production from the RUHR. Request, therefore, that you press this matter urgently on our behalf.

Subject to shipping policy VENICE and TRIESTE. This confirms telecons KING/BROWN and RANDALL/BROWN of 26.

1. Colliers. Single coal berth available TRIESTE at present. If necessary to route several Colliers at short intervals to TRIESTE confirmed following arrangement will take effect. Each Collier lightens minimum to ensure maximum 26 feet draught then diverted VENICE to complete. This would normally entail approx 600 tons discharge at TRIESTE and request distribution adjusted so that this tonnage supplies local users.

2. Bulk grain ships. No storage facilities bulk grain exist at TRIESTE. One berth at VENICE 28 feet draught discharge to road served Silo at rate 700/800 tons per 8 hour shift storage estimated 30000 tons. Therefore request those grain ships sailed for Venice discharge when consignees in 13 CORPS AREA.

3. Future shipping programmes. Fortnightly programme AC shipping appreciated request issue soonest.

4. Acceptances. Essential to state consignee MG AUSTRIA when requesting acceptance ships TRIESTE/VENICE.

5. For MOV VENICE and MOV TRIESTE. Pass concerned port authorities.

This is COM 261.

1. There has been grave concern here over coal shipment situation as 6 out of 42 cargoes originally scheduled for September loadings failed to move due to lack of coal. Out of 48 scheduled for October loadings we have info to date that only 2 have sailed due to coal shortage as result of strike.

2. However strike settled October 17th and miners returned to work October 22nd. Solid fuels administration stated it cannot expect any pickup in shipments until November 1st since will take approx 2 weeks after miner return to work to realize any appreciable increase in production. They have made assurances, however, that coal shipments will be resumed as soon as possible and continued at maximum rate possible. Your second para MOC 335 answered COM cable 248.

AC/653/368/Tn.3

19 October 1945

SUBJECT : Sardinian coal programme for October 1945.

TO : MWT(R) for
Zone 3 Committee UNA.

1. Reference shipping bid made for 60,000 tons of Sardinian coal during month of October.
2. Commerce Sub-Commission (Coal Division) have called our attention to the tonnages so far shipped as well as planned for remainder of month.
3. The withdrawal of some of the ships which have been used on this run is certain to affect the final results, unless substitutes can be provided.
4. The Coal Division have emphasised the particular necessity of increasing coal shipments from Sardinia in order to reduce existing stocks there.
5. It is therefore requested that the possibility of increasing tonnages during October should be considered in order, if possible, to maintain the programme.

For the Director :

M.P. Laraman

RBS/eg

Ref : AC/CD/109 /Commerce

19 October 1945

Subject : Sardinian Coal Shipments.

To : Transportation Sub-Commission
Shipping Branch
Allied Commission.

1. Referring to our amended bid for 60,000 Tons of shipping space from San Antioco for the current month we would bring to your notice that three vessels assisting this clearance have apparently been withdrawn from this service.
2. The vessels in question "Can Take It", "Marvia" and "Katingo Hadjipateras" have a combined cargo capacity of 10,000 Tons and unless other vessels are nominated in their place it will be difficult to clear over 50,000 Tons of Sardinian Coal this month.
3. The necessity of increasing coal shipments from Sardinia and the reducing existing stocks on the Island cannot be over emphasized, and it is considered that the Italian Merchant Marine should be requested to recognize the priority of this requirement and allocate shipping to replace that withdrawn without delay.

Copy attached for:-
The Secretary,
United Maritime Authority,
Zone 3 Committee,
Navy House,
Naples.

P.R. EVANS
Colonel

FROM : WAR FROM CCS CITE CCAC FOR CLAC
TO : ALLIED COMMISSION INFO AFHQ FOR FHGEG AND UK BASE SECTION
FOR CABINET SECRETARIAT

ROUTINE

This is COM 241. Coke for Sardinian smelters.

1. Your MOC 324 ACCOL not understood A D (and?) appears that it has not been coordinated with other parts of A.C.

2. Refere (reference?) para 1, procurement of coke for lead smelting known to AC reference COM 90, MOC 134, COM 103 and MOC 157 PE moreover YT-38 which covers this procurement was sent to you with COM AIR 48 August 8.

3. Refer para 2, requisition MGS-144; now CLAC 1-2, is in active procurement in UNITED STATES and UNITED KINGDOM for mining supplies. Supplies ex UNITED STATES are procured with Y T-1 through 11 and are being shipped October-November 1945. You should contact UNITED KINGDOM for status on their procurement which is very often discussed in TAP-PAT series. MOC 157 requested coke and coal for operation of smelters.

4. Further ref para 3 and para 4, do not understand statement lead demand does not warrant reactivation lead and zinc mines PE CRMB has recommended since 1943 reactivation Sardinian mines to meet Italian and European requirements. Lead is still in short supply and on RCL of CRMB and certainly needed in ITALY. Numerous cables in CAL-LAC and COM-MOC series discuss subject.

Original to AF 6064. 653/TN 3.

5. Refer para 3, your figures MOC 324 are stocks and coke requirements do not agree with data filed by AC starting with report on subject mines dated October 13, 1943 prepared by Col. KOENIG. Since coke requirements are indicated to be 1450 tons at maximum capacity of mines, shipment now on way sufficient for 5 to 6 month operation under current circumstances.

6. SS JOHN WILLIAM GATES, TB Nr 13 (COM airgram 52 refers) loading October 6. Sailing papers not yet received. Will forward soonest.

Coal tonnage for October and November 1940 in UNITED

STATES for ITALY civil use.

1. Paragraph 3, COM 126 states direct military coal requirements for both UNITED STATES and UNITED KINGDOM troops are to be met through normal military supply channels. Italian civilian October coal loading schedule calls for 46 cargoes and tentative November loading program calls for 56 cargoes coal, all of these shipments are UNITED STATES are under the civilian supply program and not for military use.

2. Due to sea-borne coal supply limitation which has developed in UNITED STATES supply and effort is made to receive maximum coal deliveries for civilian account and if necessary utilize storage facilities in ITALY to build up stocks.

3. Specifications on coal shipments will be subjector able to follow.

SUBJECT : Clearance of colliers

TO : Rail Division (Tn 4)

1. Recently tonnages discharged from Colliers in certain ports has fallen below average owing to shortage of rail wagons.

2. In some ports Colliers, which should have normally discharged 850 to 1000 tons, were only able to discharge 450 to 500 tons daily per ship, this upsets programmes and may involve special diversions of Colliers.

3. The following summary of commitments for Heel ports and Ancona will indicate wagon requirements :-

Taranto: port accepts lightened Colliers (approx 4000 tons) and clearance of 750-850 tpd will usually be required.

Ancona: this port will always have one Collier discharging, but often there will be 2 Colliers working simultaneously, due to one completing discharge and the other commencing work. Clearance required would be 750-850 tpd.

Brindisi: coasters carrying 1500-3000 tons from Sardinia are usually diverted to this port. Clearance 500 tpd for majority of days of any month.

Bari: Colliers are always on berth and 1000 tpd will be required.

4. It is requested that action be taken to ensure a regular and adequate supply of wagons for port clearance at the a/m ports, it should be mentioned

EXTRACT FROM TRANSPORTATION NEWS LETTER

Genoa / Savona ---draft, 28' (can take up to 30' if necessary at Genoa)

Discharge at both ports is extremely rapid, particularly at Savona where an excellent coal transporter is in operation. The two ports can handle approximately 280,000 tons per month and have rail clearance facilities for 8,000 tons per day. Savona has storage resources for half a million tons of coal.

Leghorn ---draft 21'

Although Leghorn has no regular coal berth, a suitable Liberty berth is available for coal discharge. Because of the heavy redeployment program, however, no colliers are being sent into Leghorn for discharge. The area is served by the port of Piombino.

Piombino--- draft 27'

Piombino can accept 1,000 tons per day. Vessels to be discharged at Piombino are lightened if necessary to 27 feet at Bagnoli or Civitavecchia.

Civitavecchia ---drafts 28' and 24'5''

Civitavecchia can handle two colliers simultaneously, one at 28' discharging into lighters and one at 24'5" discharging alongside. The port has a capacity of 750 tons per day but can handle more if necessary. 3136

Sicily

Principal coal ports in Sicily are at Palermo and Catania. Small amounts of civil coal are discharged at Messina and Porto Empedocle. Palermo can accept a 28' collier for discharge to lighters and 26' collier for alongside discharge simultaneously, while Catania has two coal berths of 29' and 25 feet, Catania and Palermo are used to lighten colliers for Reggio Calabria, Taranto or Gallipoli.

Reggio Calabria ---draft 21'

Reggio discharges approximately 2,500 tons per month for civil use.

Taranto/Bari ---drafts, Taranto 24'6", Bari unlimited for Liberty-type

0 8 6 4

Although Leghorn has no regular coal berth, a suitable Liberty berth is available for coal discharge. Because of the heavy redeployment program, however, no colliers are being sent into Leghorn for discharge. The area is served by the port of Piombino.

Piombino --- draft 27'

Piombino can accept 1,000 tons per day. Vessels to be discharged at Piombino are lightened if necessary to 27 feet at Bagnoli or Civitavecchia.

Civitavecchia ---drafts 28' and 24'5"

Civitavecchia can handle two colliers simultaneously, one at 28' discharging into lighters and one at 24'5" discharging alongside. The port has a capacity of 750 tons per day but can handle more if necessary.

Sicily

Principal coal ports in Sicily are at Palermo and Catania. Small amounts of civil coal are discharged at Messina and Porto Empedocle. Palermo can accept a 28' collier for discharge to lighters and 26' collier for alongside discharge simultaneously, while Catania has two coal berths of 29' and 25 feet, Catania and Palermo are used to lighten colliers for Reggio Calabria, Taranto or Gallipoli.

Reggio Calabria ---draft 21'

Reggio discharges approximately 2,500 tons per month for civil use.

Taranto/Bari ---drafts, Taranto 24'6", Bari unlimited for Liberty-type colliers.

The two ports can handle 750 and 850 tons per day interchangeably, depending upon the placing of gondola cars for rail clearance. Bari is used to lighten colliers for Ancona.

Gallipoli ---draft 20'

Brindisi ---No collier berth but may be used for coal discharge in an emergency

0663

Ancona ---draft 20'

Ancona can accept two vessels of 20 feet each simultaneously and can discharge a total of 750 tons per day.

Venice (Porto Marghera-)/Trieste---draft, Venice 26', Trieste 28'

There are three coal berths at Porto Marghera, but only one can be worked because of the shortage of electric power for the operation of the coal transporters. A second collier can be berthed at the Vetrocoko Works provided it is discharging coking coal. Colliers may be lightened for Venice either at Lido or Trieste. Colliers up to 28 feet may put in at Lido for discharge into lighters.

The bulk of the coal discharged at Trieste is for Venice. Venice and Trieste have a combined capacity of 3,000 tons per day.

13 October 1945

SUBJECT : Clearance of colliers in Heel ports.

TO : Rail Branch.

1. Recently tonnage discharged from colliers in some of the Heel ports have been low, due to shortage of Rail wagons. In some ports Colliers which should have discharged 850-1000 tons were only able to offload 450-500 tons. This upsets programmes and may involve special diversions of colliers.

2. The following colliers are working at present or due

<u>Taranto</u>	Milan R. Stefaniuk: now working: 1895 tons balance to discharge
<u>Ancona</u>	Waigstall Avery : Now working: 454 tons balance to discharge
	David L. Yulee : now working: 3259 tons balance to discharge
	David S. Terry : due with approx 4000 tons after 5030 lightening in Bari
<u>Brindisi</u>	Marvia : now working: 1880 tons balance to discharge
<u>Bari</u>	David S. Terry : now working: 2784 tons balance to discharge
	Hall J. Kelly : due 12 October 4000 tons to discharge

3. The above mentioned vessels give an indication of the ships now in port or due. The situation can be summarised as follows :

Taranto port accepts lightened colliers (approx 4000 tons) and clearance of 750-850 tpd will usually be required.

Ancona this port will always have one collier discharging but often there will be 2 colliers working simultaneously, due to one completing discharge and the other

TO : Rail Branch.

1. Recently tonnage discharged from colliers in some of the Heel ports have been low, due to shortage of Rail wagons. In some ports Colliers which should have discharged 850-1000 tons were only able to offload 450-500 tons. This upsets programmes and may involve special diversions of colliers.

2. The following colliers are working at present or due

Taranto Milan R. Stefanik: now working: 1895 tons balance to discharge

Ancona Waigstill Avery : Now working: 454 tons balance to discharge

David L. Yulee : now working: 3259 tons balance to discharge

David S. Terry : due with approx 4000 tons after 5030 lightening in Bari

Brindisi Marvia : now working: 1880 tons balance to discharge

Bari David S. Terry : now working: 2784 tons balance to discharge

Hall J. Kelly : due 12 October 4000 tons to discharge

3. The above mentioned vessels give an indication of the ships now in port or due. The situation can be summarised as follows :

Taranto port accepts lightened colliers (approx 4000 tons) and clearance of 750-850 tpd will usually be required.

Ancona this port will always have one collier discharging but often there will be 2 colliers working simultaneously, due to one completing discharge and the other

Brindisi commencing work. Clearance required would be 750-850 tpd. coasters carrying 1500-3000 tons from Brindisi are usually diverted to this port. Clearance 500 tpd for

majority of any months

BARI Colliers are always on berth and 1000 tpd will be required.

0.672

4. This information should assist you in estimating the normal requirements in these ports. It is requested that steps be taken to assure as regular a supply of wagons as possible for clearance of coal, as Colliers are so phased that Coal berths are normally occupied without a break and shortage of rail wagons will delay ships and hold up the programme in these ports.

TRANSLATION

AS/TL

SUBJECT : Port of Syracuse
TO : Transportation S/C

Goliis

1. Referring to what has been said by me verbally on the same subject we inform you that the Prefettura and the Chamber of Commerce of Syracuse taking vital part in the complaints of the workers of the port, nearly unemployed for lack of traffic, prospect the possibility that in the scheduel of Allied Ships going to Sicily to unload cereals and coal Syracuse be kept present specially for those goods going to this province and the surrounding of Ragusa.

2. This will resolve the question of the rail-cars of which the lack is known- which instead of being used for the movement of the above mentioned goods from other ports to the population, could be used for other service.

3. We will appreciate an answer.

UNCLASSIFIED.

Future arrangements for handling coal in TRIDENT have been
discussed and follow as agreed.

1. Coal Section TRIDENT will close as of today 1 October, and
functions will be transferred to agencies by Italian civilian organizations.

2. All concerned locally advised today that allocations will be
made by AFHQ for each ship in detail for military consignees and in
total for railway and civilian requirements. Future allocations should
be addressed NOT TRIDENT with request to pass on to Agenzia Marittima
and local coal importers.

3. Communications. NOT TRIDENT will receive all communications
dispatched by army signal and pass them to Agenzia Marittima and
Importers Group. Similar facilities arranged for communications in
reverse direction addressed to AFHQ and ALCON.

M I L A N O

Risposta al foglio del Via Lario, 12

Dir. Lx. N°

OGGETTO : Sale per l'industria -

La S.A. Tintoria Milano di Cozzi & C., ammessa per legge all'importazione del sale dalle isole della Sicilia e della Sardegna, è stata autorizzata da questa Amministrazione ad importare 200 (duecento) tonnellate di sale da Trapani (Sicilia) e 200 (duecento) da Porto Empedocle (Sicilia) per la depurazione dell'acqua nel proprio Stabilimento di Milano.

Si prega compiacersi di assegnare alla concessionaria i mezzi marittimi per il trasporto del sale sino al porto di Genova o a quello di Savona e i mezzi ferroviari occorrenti per l'inoltro della merce dal porto di sbarco a Milano.
