R O M A

1 - Riferimento alla vostra lettera N.AC/Mat/1/105 Tn 4 dell'11 febbraio 1946.

2 - Segnaliamo l'intervento sino dal 20 ottobre 1945 del Tenente Allen della zona di Venezia del Comando Alleato per chiedere al proprio Comando Generale in Roma informazioni circa l'esatta giacenza dei laminati e profilati di acciaio contenuti nei noti 76 carri, che ancora non erano stati rintracciati.

3 - Abbiamo comunque già sollecitato notizie circa la consegna e lo scarico nelle nostre scorte di detti laminati e profilati.

4 - Non appena ne avremo conferma, faremo seguito per accusare ricevimento del materiale in parola.-

I.S.R. CAPO COMPARTIMENTO

Genova, 6 January 1945
Ref.: 89/I.3.

TO : Major Symons.
M i l a n

Major Symons actually stated that he would endeavor to obtain materials requested, but the word "spaceats" is a strong interpretation of the actual facts. LB

None

Following the agreements made during the meeting held at Milan on December 18, 1945 I send you a list of materials needed for doubling of track on the line Sampierdarena - Mignanego.

Materials for permanent way

Plates F.S.F. 101	M. 5616
Small plates P.172.....	" 4320
" " P.173	" 4320
Coupling bolts M.9	" 7225
" " " 13	" 1513
T-girders 4 or 5 B	" 4400
Guide-bolts C.62	" 680
Coupling bolts M.5.....	" 24.000

In compiling the list we kept into account the materials which can be supplied by our Compartimento, and those which have to be delivered by the Compartimento of Turin.

Materials for electrification.

The production of copper wire, performed by the workshop Delta of the firm Ansaldo with scrap metal supplied by the I.S.R., is of an average of 3 to 4 tons per day during four days a week. The production is insufficient and cannot be considerably increased owing to the necessity of re-melting and purifying the scrap metal before its rolling and draw-plating operations. Such production could be increased up to about 10 tons per day if the above firm could get the supply of at least 200 tons of " Wirebars" Copper out of the lot which ought already be stored at Genova in one of the "Gondrand" Warehouses. The lot was assigned to the I.S.R., but its financial arrangements with the competent Ministries seem not to be settled yet. (This copper would not need any re-melting or purifying and the wire production would therefore be sped up); the use of electric power also on mondays and tuesdays (on which the supply has been cut since December 15)., should of course be granted to the workshop limitedly to the operation of furnace, grid-rolls and draw-plate destined to the production of wires for I.S.R. As understood, I send Copy of letter with which the

Ministry of Transports
Stores Service

1) We have noted the relea e order for 76 cars of rolled and shapes put at our disposal by the allied Military H.Q., at Venice area.

2) Dispositions have been issued for the immediate withdrawal of said materials and for unloading the same, if possible, at our VE= RONA, and VICENZA stores.

3) The material will be included in our stocks and it will be used to restore the Italian State railways.

4) Our official went to Venice on 3° inst. to obtain the release of the 76 cars from the Area Regional Commissariat and to provide for their withdrawal as above mentioned, but he was obliged to come back on 10th inst. for service reasons and he was unable to obtain the release because the Commanding Officer was not in Venice. However Mr. Mazza Armando, Chief of our Maritime Agency at Venice has been charged with matter.

5) We are waiting to know, from Mr. Mazza, the exact list of the received cars and of the materials contained. As soon as possible we shall send such data to your H.Q.

SUBJECT : Manganese Mineral.

TO : Firm BREDA - Milan

Copy to : Tn S/C Rail Division
Ref.your AC/Mat/1/95/Tn 4 dated 29 Sept.45.

1. The Tn.S/C A.C. informed us that Ing.Bianchi, Chief of the Delegation I.S.R. North West Italy, advises that for the construction of rails for the Italian State Railways at your Society, you have need of 40 tons of manganese a month.

2. We inform that we are waiting from a foreign country a quantity of manganese mineral of a high percentage, of which the allocation between the industries of the North Italy and those of the Middle-South Italy has already been predisposed in accordance with this Ministry and the Iron and Steel Industry Committee in Milan.

3. Therefore your firm can contact the a/m committee who will provide the allocations for the North industries.

4. The Society Ferromin produce manganese mineral in the mines of the Liguria. This for your information.

risp. del 29 sett.1945

OGGETTO Minerale di Manganese.

La Transportation Sub-Commission, AC, ha comunicato che l'Ing. Bianchi, Capo della Delegazione I.S.R. per l'Italia Nord-Occidentale, ha avvertito che per la costruzione di binari per le FF.SS. presso codesta Società, sono necessarie 40 tonn. di manganese al mese.

Si comunica che é in corso di arrivo dall'estero un quantitativo di minerale di manganese ad alto tenore la cui ripartizione fra le industrie del nord Italia e quelle del centro-sud é già stata predisposta d'intesa fra questo Ministero ed il Comitato della Siderurgia di Milano.

Codesta Ditta potrà pertanto rivolgersi al predetto Comitato che provvederà alle assegnazioni per le industrie del nord.

Per quanto può interessare si comunica inoltre che la Soc. Ferromin produce minerali di manganese nelle miniere della Liguria.

SUBJECT : Bolts and rivets for I.S.R.

TO : Comitato Laverazione Ferro
Via Carlo Alberto 9
Milano

1. In accordance with directions received we shall from now on deal with you in connection with the above subject, which we initiated some time ago.

2. After an understanding by telephone on the 9th Sept.45 it has been arranged to place a certain production of bolts (bulloni) and rivets (chiodi) with the following two manufacturerst

SIGMA - Via Caradosso 16 - Milano, bolts for 20 tons a month
BUTSA - V. Bernini 7 - Milano, rivets for 6 tons a month

Specification would have followed. This Division has been arranged in agreement with "Consorzio Bulloniere" under the respective Sub-Committee.

3. Specifications have now arrived, and are enclosed herewith. We kindly request you to place the order as soon as possible.

4. The quantities shown on the lists represent the requirements for one month. These lists will remain the same for a period of three months, after which I.S.R. will contact the firms and furnish revised lists of requirements.

./.

Declassified E.O. 12356 Section 3.3/NND No. 785021

5. The Italian State Railways have requested coal and pit coal allotments for the firms SIGMA and BRITSA from the Italian Ministry of Industry and Commerce (300 Kilos of Coke and 100 Kilos of pit coal per Ton or 250 Kilos of fuel oil) and requested that priority be conceded to these firms.

6. Please pass on this order as most urgent.

SUBJECT : Rome-Chiusi Line. Rehabilitation Bridge over Tiber Km. 92 + 370.

TO : D.M.R.S. A.D.D. Tn 2 Bldg.

1. To carry out the reconstruction of parts of the foundations of two piers on the Tiber bridge at Km. 92 + 370, Rome-Chiusi line, it will be necessary to use sheet filing. The I.S.R. advises that they do not have any of this material and are unable to buy it on the market.

2. They will need about 100 pieces, 15 metres each in length.

3. Will it be possible to secure the loan of this material which will be recovered at the completion of the work and returned to your Store.

SUBJECT : Supply of Manganese for Firm Breda

TO : Ministry of Industry and Commerce
Industry Mining Div.

1. The Chief of the Delegation I.S.R. North West Italy Ing. Bianchi advises that for the manufacture of rails and beams for the Italian State Railways at Firm Breda, they will require 40 tons of manganese per month.

2. As this material is not controlled will you please advise the firm of the availability so the manufacture of the rails required for the rehabilitation of the I.S.R. may proceed on schedule.

3. Your cooperation in this matter will be greatly appreciated.

5 October 1945

SUBJECT : Release of Electrodes for Ehe Firm Breda

TO : Transportation Sub-Commission, A.C.
(Rail Division)
c/o Transportation (Br.) Main
C.M.F.

1. Reference your letter AC/Mut/1/91/Tn 4 dated 28 September 1945.

2. The Firm Breda employs 4 electric furnaces for the production of rails. Electrodes for these furnaces were normally supplied either by "Società Talco e Grafite" of Valchisone or by "Società Elettrografite" of Forno Allione. These firms will not be able to supply the required 25/30 tons per month of electrodes before 2/3 months from now. At present no other sources of supply are available.

3. Due to lack of the a/m electrodes, Breda will have to suspend its work by the end of this month.

4. Breda has informed that - if electrodes cannot be imported - production of rails could only be resumed if a monthly allocation of 1,000 tons of "long flame" coal with 35% of volatile substances could be made available to them. This allocation would enable Breda to operate a 25 tons Martin furnace 24 hours per day.

SUBJECT : Release of Electrodes for Firm Breda.

TO : Northern Headquarter Chief Commissioner, Milan
Attn: Commerce Division

1. The Chief of the Delegation Italian State Railways North West Italy, Ing. Bianchi informs this Headquarters that the manufacturing of rails for I.S.R. has been started by the firm soc.An. Ernesto Breda with a production of 1000 tons per month to be increased shortly to 1500 tons.

2. Ing. Bianchi advises that it is very difficult to get the electrodes of 554 mm. (14") diameter for the electric furnaces and requests that this sub-Commission take steps to secure them.

3. If you have an availability of electrodes of the above size will you please make them available to the Firm Breda, advising this Hq.

SUBJECT : Bridging Steel for I.S.R.

TO : Chief of Stores Service I.S.R. Bldg.
Attn: Ing. Bracci

1. The Transportation Sub-Commission recently made a request on M.R.S. to obtain bridging steel for the Terni-Rieti line, however M.R.S. has replied that all M.R.S. stocks of captured enemy Roth-Wagner bridging, with the exception of a few unbalanced item, are required for reconstruction of railway lines of military importance in Northern Italy and they are therefore unable to allocate any supplies for A.C. use from their stocks.

2. M.R.S. advise that they have been informed through M.R.S. Milan channels that Roth Wagner bridging is in course of manufacture there, presumably for I.S.R. use. It is suggested that if this is the case I.S.R. will be able to furnish the steel required.

3. It was not known whether the reported manufacture in Milan is being carried out under instructions from Rome or whether there is a local arrangement.

4. Will you please investigate this matter and advise what bridging is being manufactured also when it will be available for use.

1) Ref. your letter AC/Mat/1/91/Th 4 dated 14th Sept. 1945.
2) We send you, here attached, two lists detailing the sizes of steel raw bolts threaded UNI and steel rivets UNI.
3) The types and quantities shown by said lists, represent the requirement for a month and we deem they may remain unchanged during three months.
4) We inform you, also, that we have already concerned the Industry Commerce and Work Ministry, to concede to the firms SISMA and BRITSA the priority in the allotment of coke and pit coal, as per quantities reported by your Transportation Sub Commission.

OGGETTO.

Bulloni e ribattini
per le F.S.

1°) Ci riferiamo alla vostra AC/Mat/1/91/Tn 4 del 14 settembre 1945.

2°) Vi trasmettiamo qui allegati due elenchi del dettaglio delle dimensioni dei bulloni di acciaio grezzi filettati UNI e dei chiodi di acciaio da ribadire UNI.

Allegati N. 2.

3°) I tipi ed i quantitativi indicati negli elenchi stessi corrispondono al fabbisogno di un mese e si ritiene possano rimanere invariati per circa tre mesi.

4°) Con l'occasione vi facciamo presente di avere già scritto al Ministero Industria Commercio e Lavoro, interessandolo a concedere alle Ditte "S.I.S.M.A." e"B.R.I.T.S.A." la precedenza nell'assegnazione del coke e del fossile per i quantitativi indicati da codesta Sottocommissione Trasporti.

SUBJECT : I.S.R. Steel Requirements.

TO : Northern Headquarters - Industry Sub-Commission, Milan

1. Reference correspondence which you have recently received from Hq. Industry Sub-Commission in regard to steel requirements of the Italian State Railway from steel mills located in the North of Italy.

2. Hq. Industry sub-Commission advise that the production of steel will begin in Northern Italy during September, provided coal and other essential raw materials which have been ordered arrive on time.

3. Attached is list of material required by the I.S.R. for reconstruction of bridges, car repair work and general shop work. These sizes and shapes are not manufactured by "Terni", from which plant I.S.R. receives their steel requirements.

4. It may be possible that some of the requirements are held in stock at mills which formerly furnished this material to I.S.R. i.e. Soc. "Ilva" at Savona and Bolzaneto, Società Acciaierie and Società Italiana Acciaierie di Genova Cornigliano.

5. Will you please assign a high priority to this request in order that the I.S.R. may receive their requirements for necessary reconstruction and rehabilitation work.

SUBJECT : May Steel Releases to I.S.R.

TO : Chief of Stores Service I.S.R. Bldg.
Attn: Ing. Bracci

1. Reference letter from Industry Sub-Commission AC/5565/Ind. dated 25 July 1945 addressed to this Sub-Commission with copy to Ferrovie dello Stato, Roma, above subject.

2. Referring to paragraph 3. Have you informed Terni of the details and dimensions of the Plate and Sheet, as requested. This information was to be received from the Warehouse at Foligno.

3. There is some 500 tons of steel on hand at Terni awaiting your orders to ship. This steel was not rolled under your order but was rolled with the idea that you would be able to use it.

4. You should contact Terni or U.S.C.C. to ascertain just what steel is on hand for your use.

Ref. AC/5565/IND.

SUBJECT : May Steel Releases to I.S.R.

TO : Transportation Sub-Commission.

FROM : Industry Sub-Commission.

1. We refer to Release Voucher N° F 7362 issued by D.E.P. & S., A.F.H.Q. to A.C. on 11th April.

2. The steel released was as follows:-

Plate	9 m/m	1,500 Kgs.
	11 "	6,500 "
	13 "	1,000 "
	16 "	3,500 "
Flats	40 x 5 m/m	5;000 "
Squares	75 x 75 m/m	1,200 "
Sheets	0,5 m/m	1,500 "
	1,5 "	3,500 "
	2 "	10,800 "

3. Società Terni are still awaiting further details as to the dimensions of the Plate and Sheet from the I.S.R. Warehouse at Foligno. As soon as they inform Terni more specifically of their requirements Terni will get on with the rolling.

4. It would be appreciated if you would request the I.S.R. to provide the necessary informations at once, so that this old order can be executed.

5. It is pointed out that copies of Rolled Steel

Declassified E.O. 12356 Section 3.3/NND No. 785021

Catalogue are available at the Office of "Ufficio Siderurgico di Collegamento" and use of the catalogue would make for more efficient service.

INTER-OFFICE MEMO

File N. AC/Mat/1/68/Tn 4

SUBJECT : Supply of Angle Bars for I.S.R.

TO : Industry Sub-Commission
Attn: Capt. Hardy

1. Reference AC/Mat/1/65 Tn 4 dated 18 July above subject and conversation (Capt. Hardy - Maj. Long) in which it was requested that plans of the angle bars desired be furnished in order that stocks on hand at mills might be checked to see if any were available.

2. Attached is Drawing N°. F.S.4033 of which 5000 angle bars are desired. They are 4 hole, marking F.S.G.10 and average weight is approx. 7.130 Kg. Total wt. 357 quintals; also attached is Drawing N°. F.S.516 of which 2500 angle bars are desired. They are 4 hole, marking G.S.1, average wt. 5,800 Kg. (approx). Total wt.145 quintals.

3. The "Soc.Ilva" Torre Annunziata Factory" are awaiting authority to manufacture. If any bars are in stock they will be at this factory as the I.S.R. state this is the only mill that has made these bars for them.

4. The I.S.R. again state that the need is urgent.

SUBJECT : August Steel Production.

TO : Distribution Below.

1. The Steel production of Southern Italy during August has been provisionally allocated in metric tons as follows :

	Sections	Plate	Sheet
R.N.	16.7	---	35 ex stock
Ord. P.B.S.	34	---	10 " "
Tn. Sub-Com.	120	660	---

2. Due to a serious breakdown in Terni Steelworks no sheet will be produced during August and only 390 tons of Sections, which will all be Rounds.

3. The sheet released to R.N. and Ord. P.B.S. is ex stocks at Terni.

4. As soon as Transportation Sub-Commission quote their sections requirements in A.A.I. catalogue sizes we shall endeavour to meet them from stocks held in another steelworks. The 120 tons of sections listed above are all Rounds.

5. No demands on August production have yet been received from the following : R.A.F. D.E.S., Commerce Sub-Commission, A.C., Public Works and Utilities Sub-Commission, A.C., Ministry of Industry and Commerce. Their requirements, when they become known, will be covered by a further letter, but it is again pointed out that detailed demands against the steel production of any month should be submitted by the 20th of the preceding month in order to ensure execution.

1. In order to insure improved service in the future from Society Terni it is desireable that the whole of your detailed steel requirements for any given month be submitted before the 20th of the preceding month to Ufficio Siderurgico di Collegamento, 66 via dei due Macelli, Rome (telephone 66675/6). The chairman of this Steel Producers' organization is Conte G.Manna of the Ilva Company.

2. Under military control the Steelworks have been accoustomed to rolling to a set program prepared by the Controlling unit from detailed demands made by the services during the third week of the month preceding the rolling period and it is recommended that, with your cooperation, this system be continued, U.S.C.O. preparing the rolling program from your detailed requirements.

3. It is also strongly recommended that your sizes of sections, plate and sheet be standardized as much as possible, since you will appreciate that a wide variety of sizes, each of small tonnage entails much roll-changing, with consequent loss of time and efficiency.

4. It is suggested that you keep constant liaison between your office and the U.S.C.O. in order to improve the service.

5. Please furnish this office with a copy of your detailed requirements as ordered.

SUBJECT : I.S.R. Steel Requirement.

TO : Chief of Stores Service I.S.R. Bldg.
Attn: Ing. Bracci

1. Reference your A 38/613/B dated 25 June 45 with reference to agreement taken with Col. Topham, covering the allocation of iron materials to I.S.R. from the Society Terni.

2. At the present time only those steel Sections, Plate and Sheet specified in the DW/AAI steel catalog of November 1944 are available for issue from Terni, Ilva Torre Annunziata and Giovinazzo Steel Works. The only quality of steel produced at present is Mild Steel.

3. It is understood that a few non-cataloged sizes of steel Sections will come into production in August at Terni but the manufacture of special steel cannot be undertaken until supplies of alloy metals become available.

4. Please advise if Terni has been unable to produce any of the catalog sizes which you have requested, but which are available at another steel works. With this information the Industry S/C can investigate the cause of Ternis inability to produce.

5. Please also furnish a list of the non-catalog sizes which you require so the matter can be discussed with Terni to ascertain the prospects of an early production.

6. Please give paragraphs 4 and 5 of this letter your earnest and urgent attention so all of your steel requirements may be obtained at early date.

30 June 1945

SUBJECT: June Steel Production at Terni.

TO: Ufficio Siderurgico di Collegamento
Via Due Macelli, 66 - Rome

1. Further to my AC/5644/IND of the 28th of June. The position as regards release of steel by the Terni Company to the Italian State Railways to meet their urgent requirements is viewed with grave concern.

2. The Transportation Sub-Commission has reported to this Sub-Commission that the demands of the Italian State Railways, authorized by this Sub-Commission, are not in fact met by the Terni Company. A complaint has also been received that Terni Company's welding capacity instead of being used for high-priority rail production is also engaged in other work. Upon investigation, it has been found that over 50% of the Terni Company's welding capacity is being employed in repairs to their works, which is a very much lower priority than work for the railways.

3. This Sub-Commission does not have officers to police the steel works under your control to insure that instructions issued from this Headquarters are being met, but, nevertheless, I intend to insure that these instructions are carried out.

4. If, upon investigation, I find that production and machinery are being diverted to low priority or black market activities, I will arrange that the raw materials and movement facilities being given to your ~~sources~~ will cease forthwith.

5. For your information, the priority work at the Terni Company is as follows:

A. Any orders placed by the military.
B. Work for the Italian State Railways.
C. Work for the rebuilding of power lines from Central to Southern Italy as ordered by the Electrical Div., of Public Works & Utilities Sub-Commission.

A. H. GLENDINNING, Lt. Col.

Subject: request of boiler tuber
for Sud-Est Railways

Transportation Sub Commission
A.C. (Rail Division)

Building

1) Your letter AC Mat/1/56/Tn 4 dated 22 June 1945 refers.

2) Steel boiler tubes cannot be manufactured by the factories in Southern Italy, as the pipe works of Società Acciaierie e Ferriere Pugliesi (steel and iron works), Bari, the only ones able to carry out the supply, are not yet operated.

3) In order to meet the request of South East Railways, we could draw from our poor stocks the boiler tubes required,namely:
300 meters, steel tubes, m/m 44,5 x 39,5 from Rome Tiburtina Stores Depot;
500 meters, steel tubes, m/m 22 x 17 from Naples Poggireale Store Depot;

4) We are awaiting for your authority to take arrangements with South-East Rlys for allocation and shipment to Bari of the above materials.

ALLA SOTTO COMMISSIONE TRASPORTI A.C.
(Divisione Ferroviaria)
S E D E

1) Si fa riferimento alla nota N.AC.Mat.1/56/Tn.4 del 22 scorso mese.

2) Non è possibile far costruire i tubi bollitori di acciaio presso le Industrie dell'Italia Meridionale perchè l'Impianto tubi della Società Acciaierie e Ferriere Pugliesi di Bari, unico che potrebbe fornire il materiale in parola, è ancora inattivo.

3) Tuttavia per venire incontro alla richiesta fatta dalla Società delle Ferrovie del Sud Est questo Servizio potrebbe prelevare dalle esigue disponibilità i tubi richiesti e cioè :

ml. 300 (trecento) tubi di acciaio di m/m. 44,5x39,5 dal nostro Magazzino di Roma Tiburtina;
e ml. 500 (cinquecento) tubi di acciaio di m/m. 22x17 da quello di Napoli Poggioreale.

4) Si attende il benestare di codesto Comando per poter prendere accordi con le Ferrovie del Sud Est circa la cessione e spedizione a Bari del materiale di cui trattasi.

SUBJECT : I.S.R. Steel Requirements.

TO : Transportation Sub-Commission
(Attn.: Rail Division)

FROM : Industry Sub-Commission.

Reference your minute AC/Mat/1/55/Tn 4 of 27 June.

1. At the present time only those Steel Sections, Plate and Sheet specified in the DW/AAI Steel Catalogue of November 1941 are available for issue ex Terni, Ilva Torre Annunziata and Giovinazzo Steel works. Moreover the only quality of Steel being produced at present is Mild Steel.

2.It is understood that a few non-catalogued sizes of Steel Sections will come into production in August at Terni, but the manufacture of special steels cannot be undertaken until supplies of alloy metals become available.

3. It would be appreciated if you would inform us what catalogue sizes Terni are unable to produce, but which are available at another Steel works, so that we may investigate the cause of Terni's inability to produce.

4. Kindly also acquaint us with the non-catalogued sizes which I.S.R. require,to enable us to discuss with Terni the prospects of fairly early production.

5. Terni's failure to provide I.S.R. with their full requirements ex June rolling is being thoroughly investigated and steps will be taken to ensure improved production in the future.

1. Reference our AC/Mat/1/49/Tn 4 dated 16 June 45 in regard to steel requirements of I.S.R. for July 1945.

2. We have been advised that the steel allocated to I.S.R. for July from the Terni Works is as follows:

Sections	2300 Tons.
Plates	807 "
Sheets	200 "

3. You can now make your arrangements with Terni for your requirements keeping within the above tonnages.

3. Please ratify release to Military Bidders as above mentioned, for your convenience release forms in quadruplicate have been made out by U.S.C.C., please may these be stamped by you and 3 copies returned to this Hq. 2 additional copies have been made for U.K. Please stamp and return these also.

4. Upon receipt of these release forms this office will send out one copy to Military Bidders, one copy to relevant works and one copy to U.S.C.C.

5. In the case of the allocations to Alcan Commerce Sub-Commission and Alcan (for I.S.K.), the whole allocation is to come from U.S. Terni.

6. When collecting the steel, the Military Bidders will be asked to sign Receipt Forms No.24 as already agreed, which will be made out in quadruplicate by the individual works.

The first two copies will be retained by the Works, one copy for forwarding to the Ministry of Finance.

Copies 3 and 4 will be handed to Military Unit collecting the steel, who will forward copy 3 to this Hq. and file copy 4 for record purposes.

Upon receipt of the copy 3 from collecting Unit, this Hq. will pass it to Ministry of Treasury.

Ministry of Treasury should then be in a position to take accounting action.

SUBJECT : Disposal of Scrap Steel.

TO : IBR - Milan.

1. Will you please arrange to discuss with Ing. Guido MAZZA of the Ufficio Siderurgico Collegamento, Via Due Macelli, 66 Rome (Telephone 66575) the question of disposal of railway steel scrap which will be amassed in the various dumps.

2. From the end of June it is expected that scrap steel will not be available from Allied Sources for use at the various Italian Steel works, many of which are engaged on production of materials for railway purposes.

3. Please advise this Sub-Commission of any arrangements which may be made.

Re: AC/Mat/1/52.Tn dated 23 June 1945

Subject: Supply of angle bars for ISR

Headquarters MRS
Rome

1) The angle bars referred to above are needed to manufacture cheeks for permanent way.

These special rolleds are produced for the railways only and are not used in trade.

The Società ILVA are the only Firm in Central Southern Italy able to produce these cheeks.

2) The requirement of raw materials for these cheeks will be included in our next monthly request for steel, according to the decision taken during the meeting held on 4 June 1945 at the Office of D.D. Tn (M) MRS. It is pointed out, however, that such steel will not be produced by Società Terni and it should be allocated to Società ILVA.

3) It is not deemed convenient to limit the rolling of these angle bars to one month requirement rather than to a six month period, as requested by us, most of all because the rolling of such a poor quantity (502 quintals) requires a very short period and then, because, by carrying out the rolling during six months, the rolling machines should be irrationally utilized, with an high production cost.

4) It is requested again to authorize the Società ILVA to produce the whole quantity of cheeks at their establishment at Torre Annunziata.

Roma, li 4 LUG 1945 Luglio 1945 - A

N. A.36/6 8 9 134/4

Al N. AC/Mat/1/52.Tn. del 23 giugno u.s.

OGGETTO

Fornitura barre angolari per F.S.

ALLEGATI N.

AILA DIREZIONE DEL M.R.S.
R O M A

1) Le barre angolari in oggetto servono per la fabbricazione delle ganasce per l'armamento dei binari e ci sono di grande necessità. Trattasi di profilati speciali, che vengono costruiti unicamente per le ferrovie e che non trovano impiego nel commercio. La Soc.ILVA è l'unica Ditta dell'Italia Centro-Meridionale che è in grado di fabbricare tali ganasce.

2) Il fabbisogno delle materie prime per dette ganasce verrà incluso nella prossima richiesta mensile di acciaio che farà questo Servizio, in relazione a quanto è stato deliberato nella riunione del 4 giugno 1945 presso l'Ufficio del Vice Direttore Tn.(Meccanica) M.R.S. Si fa presente però che tale acciaio, non può essere prodotto dalla Soc.Terni, e dovrà quindi essere assegnato alla Soc.ILVA.

3) Non si ritiene opportuno limitare la laminazione di dette barre angolari al fabbisogno di un mese, invece di un seme-

4 8./.

Declassified E.O. 12356 Section 3.3/NND No. 785021

stre come è stato da noi richiesto, anzitutto perchè la laminazione di così limitato quantitativo (Q.li 502) richiede un brevissimo periodo di tempo ed inoltre perchè, ripartendo la laminazione in sei mesi si avrebbe una irrazionale utilizzazione dei laminatoi e quindi un elevato costo di produzione.

4) Si insiste quindi nella richiesta di autorizzare la Soc. Ilva a provvedere alla fabbricazione dell'intero quantitativo suddetto di ganasce nel suo stabilimento di Torre Annunziata.

TO : Chief of Stores Service I.S.R. Bldg.
Attn: Ing. Precci

1. Reference your K. A.36/1929/3 dated 22 May addressed to M.R.S. attn: Major Reynolt in regard to having certain U rolled shapes made at Terni.

2. The sizes of U-Shapes which you requested, size mm.80-100-120 and 140, are not rolled at Terni and in order to secure permission for their manufacture it is necessary to know the works for which they are interested and the necessity so this Sub-commission can make a recommendation to HQ.AC.

3. You understand that it is not possible to roll all sections are in order to roll those you request it will be necessary to cut down production on other essential sections. It is therefore necessary that the U-Shapes desired are of top priority in order to ask for permission to have them rolled.

4. Please furnish information requested in para 2 promptly.

SUBJECT : Disposal of Scrap Steel.

TO : M.R.S. - Bldg.

1. Up to date the Italian Steel industry has been operating on scrap steel provided from Allied sources, but it is now necessary to provide for scrap from Italian sources.

2. The Steel Federation Ufficio Siderurgico di Collegamento, Via Due Macelli, 66 Rome, through Economic Section AC has been requested to negotiate direct with ISR on the prospect of disposing of scrap metal.

3. Main factories are situated north of Arezzo (nails) at Piombino (rail lengths) Naples (rails, etc.) Bari and Terni. The proposal to establish a scrap dump at San Severo on Line 50 would thus be convenient for subsequent removal to Piombino or Arezzo.

4. It is assumed there will be no objection to these discussions so far as MRS is concerned.

Subject: I.S.R. Steel Requirements for July.

Military Railway Service,
C.M.F.
Tel: Firebox 9328

File: Tn.A.2/65

15 June 45.

To:- Tn Sub-Commission, A.C.

1. Reference your N.AC/MAT/1/46/TN4 dated 9th June 45 to H.Q., A.C., copy to this Office. Below are details of the allocations made at A.F.L.R.S. Engineering Materials Committee Meeting on 18th June 45 to A.C. against their bids for steel sections, plates and sheets from July production:-

	Bid		Allocated
Steel Sections.	ALCOM -	600 tons	
	ALCOM for I.S.R.	2300 tons	2900 tons
Plate	ALCOM -	393 tons	
	ALCOM for I.S.R.-	80 tons	1000 tons
Sheet	ALCOM -	511 tons	
	ALCOM for I.S.R.-	439 tons	317 tons

2. Demands for plate and sheet were in excess of demands and allocations were therefore cut accordingly. Please ascertain from H.Q., A.C. what proportion of the tonnages of plate and sheet allocated to them are for re-allocation to I.S.R.

3. Please also arrange for the necessary contracts to be placed by the I.S.R. if this has not already been done.

Richiesta materiali ferrosi
per il mese di luglio 1945

ALLEGATI N.

Con riferimento agli accordi intervenuti nella riunione tenutasi presso il Sig.Colonello Tophan per l'assegnazione dei materiali ferrosi alle Ferrovie dello Stato,si trasmettono le richieste dei materiali stessi occorrenti per il prossimo mese di luglio,e cioè:

A) P R O F I L A T I:

1)	Piastre e piastroni d'armamento(vedi ordinazione alla Terni n°A 36/9 del 30.5.945) - quota luglio	Tonn.	362
2)	Fornitura di chiavarde e caviglie di armamento(vedi aggiudicazione alla Terni n°A 36/686/134/7 del 19.5.45)	"	800
3)	Fornitura di attrezzi da lavoro e chiavi per armamento	"	100
4)	Profilati vari occorrenti per i lavori delle officine e squadre rialzo del servizio Materiale e Trazione	"	700
5)	Profilati occorrenti per la riparazione della travata del ponte a tre luci sul fiume Amato al Km.261+141 della linea Battipaglia-Reggio Cal.	"	35
6)	Ricostruzione ponte sull'Ofanto al Km.336+663 della linea Foggia-Bari	"	3
			418
	Quota profilati mese di luglio 1945	Tonn.	2.000

./.

Declassified E.O. 12356 Section 3.3/NND No. 785021

B) L A M I E R E S O T T I L I sino a mm. 5 di spessore:

1)	Lamiere occorrenti per i lavori delle officine e squadre rialzo del serv.Materiale e Trazione	quota	luglio	Tonn.	300
2)	Lamiere stagnate da mm.0,6	"	"	"	10
3)	" piombate da mm.0,6	"	"	"	8
4)	" zincate da mm.0,6	"	"	"	5
5)	Lamiere di spessore mm.5 ed inferiore per ordinario consumo	"	"	"	116

Quota lamiere sottili mese luglio 1945 Tonn. 439

C) L A M I E R E G R O S S E :

1)	Lamiere d'acciaio spessore 15m/m per materiale d'armamento(vedi aggiudicazione n°A/36/134 del 10 febbraio 1945)	quota	luglio	Tonn.	222
2)	Lamiere grosse occorrenti per lavori delle officine e squadre di rialzo del Serv.Materiale e Traz.	"	"	"	300
3)	Lamiere grosse per fornitura pale da rosticci e pale da carbone (vedi ordinazione alla Terni n° 387 del 29/1/45 e n° 389 dell'8/2/45)	"	"	"	9
4)	Lamiere grosse da introdurre alle scorte per bisogni vari	"	"	"	69

Quota lamiere grosse mese luglio 1945 Tonn. 600

Si resta in attesa di conoscere i quantitativi delle tre categorie di materiali che verranno messi a disposizione di questa Amministrazione per il prossimo luglio.

Sarebbe gradito che a cominciare da questa assegnazione fosse messo a nostra disposizione un maggiore quantitativo di lamiere grosse (plate)rispetto a quello di lamiere sottili (sheets).

Reference your letter we send you the order for the supply of:
n°. 5 000 (five thousand) sheaves with four holes type 753.16 to design 75.4033 of the unit weight of Kg. 7.130 and Total weight Q.li 357.
n°. 2500 (two thousand five hundred) sheaves of 4 holes type 85.1 to design 75.316, of the unit weight of Kg. 5.800 and Total Q.li 145.
at the price of L. 4.012 (five four thousand twelve) each Quintale.

That firm is obliged to observe the specifications "Uni"

The materials should be exactly equal as the relative designs which you already have.

Place for delivery:
Free of any charge, packing and transport included, on wagon in the I.S.R. station of Zone Assunziata after test at your plant.

Delivery terms.
Within three months from the present order's date.

Guarantee: a year

Test: Should be done by the I.S.R. Works Service

Ordinazione A36/10

Oggetto: Fornitura di ganasce
Agg.ne A36/273/134/4 del 13/3/45

ALLA SOCIETA' "ILVA"
ALTI FORNI E ACCIAIERIE D'ITALIA
ROMA
Via Regina Elena 68

A seguito della lettera di aggiudicazione controindicata, vi passiamo con la presente l'ordinazione per la fornitura di:

- N.5.000 (cinquemila) ganasce a 4 fori marca FS4.10 conformi al disegno FS.4033 del peso unitario di Kg.7,130 circa e per complessivi Q.li 357 circa;

- N.2.500 (duemilacinquecento) ganasce a 4 fori marca GS.1 conformi al disegno FS.316, del peso unitario di Kg.5,800 circa e per complessivi Q.li 145 circa;

al prezzo unico di £.4.012 (lire quattromiladodici) il quintale.

E' fatto obbligo a codesta Ditta di osservare le unificazioni "UNI"

I materiali da fornire dovranno essere esattamente conforme ai relativi disegni suindicati già in vs/ possesso.

MODALITA' E LUOGO DI CONSEGNA =
Franco di ogni spesa, imballaggio e trasporto compresi, su vagone nella stazione FS. di Torre Annunziata con presentazione al collaudo nel vs/ Stabilimento.

TERMINI DI CONSEGNA =
entro tre mesi dalla data della presente ordinazione.
Saranno considerate come date di consegna, agli effetti del computo,

PRESCRIZIONI

In base al Capitolato Amministrativo (edizione 913) modificato come da foglio " Aggiunte e Modificazioni" (edizione 934) ed al Capitolato Tecnico per la fornitura di ganasce (stecche) edizione 930.

A parziale deroga delle condizioni stabilite dal Capitolato tecnico anzidetto resta fissato:

- a) che le ganasce possono essere consegnate crude (non ricotte) con la raccomandazione che la resistenza dell'acciaio non superi 90 Kg.mmq;

- b) che nelle tolleranze sia tenuto conto delle circostanze contingenti.

Inoltre codesta Ditta è tenuta all'osservanza delle disposizioni relative alle assicurazioni sociali.

I prezzi suindicati potranno essere modificati a richiesta di una delle parti contraenti, se, durante l'espletamento della fornitura, interverranno variazioni sul costo delle materie prime, variazioni autorizzate dalle Autorità competenti a disporle.

Tale revisione verrebbe calcolata partendo dalla base del costo attuale dell'acciaio laminato che codesta Ditta indica in £.2.360 (lire duemilatrecentosessanta) il quintale.

GARANZIA = un anno

COLLAUDO = A cura del Servizio Lavori delle Ferrovie dello Stato sedente in Roma, al quale dovrete rivolgervi direttamente ed esclusivamente

La presente ordinazione viene rilasciata in pendenza del perfezionamento del relative contratto in conformità dell'autorizzazione accordataci a norma di legge.

N.B.

Per opportuna norma si avverte che, l'imposta generale sull'entrata stabilita dalle vigenti disposizioni di legge non dovrà in nessun caso essere pagata direttamente dalla Ditta, ma sarà percetta esclusivamente a cura dell'Amministrazione Ferroviaria, all'atto della liquidazione delle relative fatture.

Draft (1)

Minutes of a meeting held in the office of D.D.Tn.(Mech), MRS, on the use of the TERNI Steelworks by the ISR, on 4 June 1945.

Present :	Col. W.L. Topham, O.B.E.	M.R.S.
	Lt.Col. A.H. Glendinning, R.E.	Econ.Sec. A.C.
	Lt.Col. D.R.H. Chaplin, R.E.	M.R.S.
	Major S.L. Baister, R.E.	Tn. S/C.
	Major L.E. Robson, R.E.	M.R.S.
	Major S.A. Webster, R.E.	M.R.S.
	Major C.M. Long, C.E.	Tn. S/C.
	Ing. Bracci	I.S.R.
	Ing. Tonni	I.S.R.
	Capt. C. Wordsworth, R.E.	M.R.S.

---

1. Col. Topham asked Lt.Col. Chaplin to open the meeting by explaining the new procedure for obtaining steel for railway use from the TERNI Steelworks. Lt.Col. Chaplin said that it had been decided that bids shall be placed by Tn. Sub Commission, A.C., to cover all sections and departments of the ISR. All steel so manufactured by the TERNI Steelworks will be entirely in the hands of the ISR for disposal as they think fit. The only proviso to this latter is that any steel required for military operated shops or other military needs must come out of this total quantity and will have priority. It was pointed out that all bids so placed must of course cover material required for work being carried out for the ISR in the TERNI Steelworks' own shops.

2. It was stressed that, now that this new procedure is coming into operation, the ISR must under no circumstances make additional requests for steel through extraneous channels - for example, through the Ministry of Commerce, etc.

3. The first bid will be to cover the month of July, and as bids have to be in to A.F.L.R.S. by the fifteenth of June, the ISR should determine their requirements and submit to Tn. Sub Commission by the 10th of June. The only details needed in bids are tonnages of sections, plate and sheet. (For information the boundary between plate and sheet is 5 mm thickness.) Ing. Bracci asked if he could be given some rough idea of what tonnages to bid for. He was advised that the June allocation was as follows :-

1. Col. Topham asked Lt.Col. Chaplin to open the meeting by explaining the new procedure for obtaining steel for railway use from the TERNI Steelworks. Lt.Col. Chaplin said that it had been decided that bids shall be placed by Tn. Sub Commission, A.C., to cover all sections and departments of the ISR. All steel so manufactured by the TERNI Steelworks will be entirely in the hands of the ISR for disposal as they think fit. The only proviso to this latter is that any steel required for military operated shops or other military needs must come out of this total quantity and will have priority. It was pointed out that all bids so placed must of course cover material required for work being carried out for the ISR in the TERNI Steelworks' own shops.

2. It was stressed that, now that this new procedure is coming into operation, the ISR must under no circumstances make additional requests for steel through extraneous channels - for example, through the Ministry of Commerce, etc.

3. The first bid will be to cover the month of July, and as bids have to be in to A.F.L.R.S. by the fifteenth of June, the ISR should determine their requirements and submit to Tn. Sub Commission by the 10th of June. The only details needed in bids are tonnages of sections, plate and sheet. (For information the boundary between plate and sheet is 5 mm thickness.) Ing. Bracci asked if he could be given some rough idea of what tonnages to bid for. He was advised that the June allocation was as follows :-

sections 1500 tons, sheet 340 tons and plate 270 tons.

It was therefore suggested that he makes his bid to the order of 2000, 600, 600. Ing. Bracci was then told that once the bids have been accepted by A.F.L.R.S., the ISR should immediately get into touch with the TERNI Steelworks, giving them full details of their requirements.

4. Lt.Col. Glendinning also stated that the output of the TERNI Steelworks' own forge, foundry, machine shop, etc., can be handed over completely for the use of the ISR, with the proviso that certain parts being made for various electrical power stations be completed. Naturally parts made in the forge would form part of the total steel tonnage allocated.

Sheet 2 .....

Declassified E.O. 12356 Section 3.3/NND No. 763021

5. It was pointed out to the ISR that, in order to avoid confusion, any contracts placed on the TERNI Workshops should not exceed the monthly steel tonnage bid.

Ing. Bracci then suggested that, in order to avoid having to place a new contract every month, a contract be placed with the TERNI Steelworks to cover a period of, say, ten months, and the contract be subdivided from month to month according to the accepted steel bid, this was approved.

6. Col. Topham then stated that this new procedure must not in any way affect the progress of repairs to boilers and wagons now being carried out at TERNI; rather it should have the effect of speeding up work on these items.

Colonel,
D.D.Tn.(Mech),
for Brigadier,
Director Military Railway Service.

= BUILDING =
Att. Maj. C.M. LONG

Subject: Request of steels for BASTIA-ELLERA line.

1. Ref. is to your AC/Mat.1/39 Tn.4 letter, dated May 21,1945.

2. We note the issue of steel for June, made by AFLRB.

3. We agree about the allotment, you suggest, of sheets and plates to be made to the Shops listed on para 3 of the a/m letter.

4. From the materials, assigned to us, are the following to be used for the bridge on Chiascio river, BASTIA-ELLERA line:

N°	Ref.	Equal angles	Unit	Quantity required
		EQUAL ANGLES		
8	A/9	3,13x3,15x0,39inches (80x80x10 m/m)	tons	8,3
		ROUND STEEL		
15	R/7	19 m/m (0,748inches)	tons	2,6

5. The plates whereof the a/m issue, result not to be fit for said work.

6. It is therefore necessary to meet the requirement of plates, already communicated and hereafter shown:

		Plates	
thickness	m/m	12	Kg. 2826
"	"	18	Kg.14130
"	"	20	Kg. 2983

7. The possibility of using round steel to rivet is subordinated to the results of the test upon the fitness of such material to be worked by hot. Namely it is possible that the material might be semihard steel suitable for concrete but not to be used to rivet.

8. The Firm " Fratelli FRANCHI",Bastia, our contractor for the re= construction of the iron bridge on Chiascio river (BASTIA-ELLERA line) ordered to "Soc. TERNI" all the materials necessary for the works and [illegible] available at TERNI.

Declassified E.O. 12356 Sec. 3.3/NND No. 785021

1. Ref. is to your AC/Mat.1/39 Tn.4 letter, dated May 21,1945.

2. We note the issue of steel for June, made by AFLRB.

3. We agree about the allotment, you suggest, of sheets and plates to be made to the Shops listed on para 3 of the a/m letter.

4. From the materials, assigned to us, are the following to be used for the bridge on Chiascio river, BASTIA-ELLERA line:

EQUAL ANGLES

N°	Ref.	Equal angles	Unit	Quantity required
8	A/9	3,13x3,15x0,39inches (80x80x10 m/m)	tons	8,3

ROUND STEEL

15	R/7	19 m/m (0,748inches)	tons	2,6

5. The plates whereof the a/m issue, result not to be fit for said work.

6. It is therefore necessary to meet the requirement of plates, already communicated and hereafter shown:

Plates

thickness	m/m	12	Kg. 2826
"	"	18	Kg.14130
"	"	20	Kg. 2983

7. The possibility of using round steel to rivet is subordinated to the results of the test upon the fitness of such material to be worked by hot. Namely it is possible that the material might be semihard steel suitable for concrete but not to be used to rivet.

8. The Firm " Fratelli FRANCHI",Bastia, our contractor for the re=construction of the iron bridge on Chiascio river (BASTIA-ELLERA line) ordered to "Soc. TERNI" all the materials necessary for the works and these result to be already available at TERNI.

9. The Industry and Commerce SubCommission, A.C. C/O/R.A.A.C. should authorize, through their loyal affice at TERNI (80/EBW/SAEC) the deli=very of said materials directly to the a/m I.S.R. contractor (Firm FRAN=CHI).

././.

CU/9.6

Declassified E.O. 12356 Section 3.3/NND No. 785021

10. Your SubComm. is therefore kindly requested to intervene so that the delivery of the materials available at TERNI be autorized.

2. The whole of the production indicated above has been turned over to HQ.AC. for Italian State Railways use with this Sub-Commission controlling issue.

3. The Military Railways Service have made the allocation of the Steel Plate and Sheets to the following shops and it is agreed by this Sub-Commission that you will honor this allocation:

Declassified E.O. 12356 Section 3.3/NND No. 765021

	Tons. 1/8 in.	1/4 in.
Pistoia	60	40
Porta Maggiore	24	16
Pattison Car Shops	24	16
Bufola	24	16
Civitanova Marche	30	20
Colleferro	30	20
Foggia	18	12
Smistamento (Rome)	18	12
Wagon Lits (Rome)	12	8
	240	160

The distribution of the plate is as heretofore - by area but not by weight - 3 sq.meters of 1/8" for every 1 sq.meter of 1/4".

4. The requirements of reinforcing rods for the rehabilitation of the bridges on the Bastia Ellera will be issued from this allocation. Please confer with Ing. Lo Cigno on this matter.

5. The Equal Angles, Rounds not required on Bastia Ellera Line and the locomotive tires will be taken into your stores for accounting and distribution.

6. Your attention is directed to "Addendum to Technical Instruction N°. 38 para 12, Relaxation of M.R.S. Contract of I.S.R. Stores", T.S.D's will cease any handling of June allocation of the I.S.R. steel. If accepted into I.S.R. depots for subsequent distribution it must be accounted for and handled entirely by the I.S.R.

7. Please make demands on this Sub-Commission for the issuing of the Equal Angles and remainder of rounds bars not required on Bastia-Ellera Line.

SUBJECT : Release of Steel to I.S.R.

TO : Northern Section 60 E.B.W. Terni C.M.F.
Attn: Major A.R.J. Everingham.

1. Reference is made to recent release of 19 tons of steel to the Italian State Railways which was dispatched to Civita Tenro in the form of four (4) steel brackets.

2. The I.S.R. advises that delivery was not made of the approximate 700 bolts required for assembling the brackets.

3. Will you please advise when we may expect shipment of the bolts.

TO: Tn S/Commission A.C.
Rail Division

SUBJECT: Rehabilitation of Petrace bridge; request for release of material.

1. Società per l'Industria e l'Elettricità "Terni", when despatching to Gioia Tauro the four steel brackets for supporting the central girder of a/m bridge, could not include in the same delivery also some 700 bolts to be used for assembling purposes.

2. To avoid that the lack of said bolts may hamper the works, arrangements are going to be made for replacing said bolts with material destined to other purposes; latter material will be reintegrated soonest possible with that already ordered to Terni.

3. In the meantime please arrange for the release to Terni Steelworks of a/m bolts (having a total weight of one ton) thus enabling said Steelworks to complete the delivery of all materials specified in our order.

Ministry of Transports
General Direction
Works Dept.

Roma, 23 April 1945

To: Tn S/Commission AC
Rail Division

Subject: Rehabilitation of Bastia-Ajjera line.

1. This Department already requested that S/Commission to kindly arrange for release of following amounts of steel required for the lattice girder spanning the Chiaccio turrent near Bastia.

XX	steel plates,	12 mm.	thickness	2846 kos.
	" "	18 "	"	14130 "
	" "	20 "	"	2983 "
				19.930 kos
	angle bars 80x80x12			8.300 "
	steel round bars (for rivets);	22 mm.	diam.	1.400 "
		20 "	"	1.200 "
	garnd total			30.830 kos.

3. Our application was forwarded by that S/Commission to the X Stores Dept. ISR in order that the release were obtained by them through the It. Ministry of Industry Commerce and Labour. Stores Dept. immediately contactee said Ministry, but quite unsuccessfully, till todate.

3. Above amounts of steel are available at Terni Steelworks which are under Allied control and supervision so that even a release order issued by the It. Ministry of Industry Commerce and Labour would be useless without the approval from D.E.P.S. = AFHQ, in charge with above Steelworks.

4. Please therefore kindly arange for said allied approval, as the contractor Franchi af Bastia, who has been entrusted with the construction of above steel bridge, has been obliged to suspend working some twenty days ago for lack of xxxxxxxx above listed material which is required for brackets and transversal beams connecting the main beams.
