SUBJECT : Derequisition of Scieria Italiana
Rueping - Naples.

TO : Ministry of Foreign Affairs.

1. Further reference is made to your letter, subject as above, dated 9 January 1946.
2. A reply to our request to Allied Force Headquarters to derequisition the subject plant has been received by this Headquarters.
3. It is stated that approximately 1,000 tanks occupy the area in question at the moment. These tanks are now being moved to selected sites with the minimum of delay.
4. When these tanks have been cleared the area will be available for derequisition.
5. The estimated date for derequisition is about the end of March 1946.

SUBJECT : Rumping Plant - Naples.

TO : Industry Sub-Commission, AG

1. You are referred to the attached correspondence, which deals with the above mentioned Plant, and some of the efforts that have been made to restore it to its original use.

2. The situation now, has reached a critical stage, and unless action is taken immediately the work of this firm must cease completely.

3. At the present time some 100,000 railway sleepers are stacked at Rumping's, and rotting away, because no facilities have been made available to the firm for the crosscutting of this timber. Much correspondence has been written during the past few months on the situation, and in view of this it is amazing, that the present position has been allowed to occur.

4. If the work of rehabilitating the Italian State Railways is to be maintained, and this is the prime concern of this Sub-Commission, then it is essential that action be initiated at once. If it is not possible to re-acquisition the whole of the Plant, then the area marked "B" on the attached sketch, should at least be made available to allow the crosscutting process to commence.

DIRECTOR

essential Area "B" be released, since the erecting
conveyors in this area.

3192

MEMORANDUM

It is a known fact that railway timber (sleepers and bridge timber) for which in this country pine and beech are mainly used, cannot be employed at the natural state (untreated), as they would last an average of 1 or two years; whereas creosoted timber lasts an average of 20 or 30 years.

Of the tree creosoting plants now existing in Italy, Ruaping's plant in Naples is the largest one and normally supplies all railway timber for Southern Italy, besides treated timber for other important uses, like poles for electric lines, etc...

Ruaping's plant was totally requisitioned by different military units at the end of 1943. After the liberation of Rome in June 1944 the Italian State Railways started action with the Allied Commission - Industry Sub-Commission, the purpose of having the plant restored to its original use, owing to the critical demand in railway creosoted timber for reconstruction of Italian Railway lines.

After several meeting and discussion spreading over a period of three months, at the end of April 1945 (see enclosed letters) it was decided to hand back to Ruaping's a section of its ground held by Engineer Section (SR) where the creosoting plant proper was; and a small area marked "C" on map giving access to the railway siding so as to begin receipt of untreated sleepers to be creosoted.

Ruaping was then invited to speed up all repair work so as to complete it in three months time. More space would then be available, it was considered, if the war was going to be ended at that time.

This agreement permitted Ruaping's management to complete all essential repairs, so as to be able to resume operation in a month time after the remaining part of its ground had been handed back.

The agreement became effective at the end of May and by September all possible work was completed. Ruaping's with the support of the Italian State Railways, applied then to Allied Commission for further application of the agreement.

More than three months have elapsed since and no decision has yet been taken. Over 100,000 railway sleepers are stocked up at Ruaping awaiting creosoting and all available space is filled C.I.B. will have to stop shipments of timber that has been brought down from the mountains to railway stations. Production of creosoted sleepers that, as noted above, are essential for reconstruction, has not even started. Ruaping's management has made great financial sacrifices and is heavily indebted to banks and the situation is becoming unbearable.

The portion of Ruaping's grounds that is still requisitioned (area A and B of the enclosed map) is occupied by a A.S.V. park ./...

2) -

of 38 Vehicle Coy. Through Allied Commission Rueping's offered, is absolutely necessary, to be handed back area marked "B" at once, and area "A" only when possible. Without area "B" no railway timber erecting operation is possible, as the erecting boilers are cut off their Decauville feeding tracks and their other mechanical transportation systems that cannot be installed but in a straight line from them. Besides, area "B" represents the minimum strictly necessary space for storing space and installation of planing and boring machines and mechanical weighing scales that originally were installed in area "A", but which Rueping's are willing to concentrate into area "B".

MEMORANDUM

It is a known fact that railway timber (sleepers and bridge timber) for which in this country pine and beech are mainly used, cannot be employed at the natural state (untreated), as they would last an average of 1 or two years; whereas creosoted timber lasts an average of 20 or 30 years.

Of the three creosoting plants now existing in Italy, Rueping's plant in Naples is the largest one and normally supplies all railway timber for Southern Italy, beside treated timber for other important uses, like poles for electric lines, ect...

Rueping's plant in Naples was totally requisitioned by different military units at the end of 1943. After the liberation of Roma in June 1944, the Italian State Railways started action with the Allied Commission; Industry SubCommission, to the purpose of having the plant restored to its original use, owing to the critical demand in railway creosoted timber for reconstruction of Italian Rlwy lines.

After several meetings and discussion spreading over a period of ten months, at the end of April 1945 (see enclosed letters) it was decided to hand back to Rueping's a section of its grounds held by Engineer Section (Br) where the creosoting plant proper was; and a small area marked "C" on map giving access to the Railway siding so as to begin receipt of untreated sleepers to be creosoted.

Rueping was then invited to speed up all repair work so as to complete it in two-three months time. More space would then be available, if the war was going to be ended by that time.

This agreement permitted Rueping's management to complete all essential repairs, so as to be able, to resume operation in a month time after the remaining part of its grounds had been handed back.

The agreement became effective at the end of May and by September all possible work was completed; Rueping's, with the support of the Italian State Railways, applied then to Allied Commission for further application of the agreement.

More than three months have elapsed since and no decision as yet been taken. Over 100,000 railway sleepers are stacked up at Rueping's awaiting creosoting and all available space is filled; T.S.R. will have to stop shipments of timber that has been brought down from the mountains to rlyw stations; production of creosoted sleepers that, as noted above are essential for reconstruction, has not even started. Rueping's management has made great financial sacrifices and is heavily indebted to banks and the situation is becoming unbearable.

The portion of Rueping's grounds that is still requisitioned (areas A and B on the enclosed map) is occupied by a A.P.V. park of 38 Vehicle Coy. Through Allied Commission Rueping's offered, if absolutely necessary, to be handed back only area marked "B" at once, and area "A" only when possible. Without area "B" no railway timber creosoting operation is possible, as the creosoting boilers are cut off their Decauville feeding tracks and their other mechanical transportation systems that cannot be installed but in a straight line from them. Besides, area "B" represents the minimum strictly necessary space for storing space and installation of planing and boring machines, and mechanical weighing scales that originally were installed in area "A", but which Rueping's are willing to concentrate into area "B".

SUBJECT: Derequisitioning of Timber Creosoting Work
-Soc. Italiana Rueping Via Taddeo da Sessa, NAPLES

Q 502/114/4

AFLRS

AFHQ ROME Area Allied Command

Ref your LRS/219B/1/2 dated 30 March and my Q 502/114/4 dated 12 April.

1. Replies have now been received from PBS and from the Engineer Section (Br) AFHQ. Copies of their replies are attached.
2. It will be seen that PBS cannot agree to giving up the site known as Stalingrad Stadium and I wish to stress that the British troops also use this ground for recreation. It is one of the few playing fields available in NAPLES and it is in great demand. However it is the only alternative space for parking the AFVs of 38 Veh Coy.
3. Engineer Section (Br) AFHQ are willing to give up their part of the factory with the reservation contained in their letter.
4. I suggest that the firm in question take steps to repair their plant immediately and that to enable them to do so 38 Veh Coy give up the position marked ZONA "C" on the plan and that Engineer Section (Br) AFHQ release their portion of the premises subject to the reservation contained in their letter.
5. I consider that this will take some two-three months. It is possible ~~by~~ that by then the war in Europe will be over and there may be well a reduction in the number of AFVs to be stored in 38 Veh Coy parks, and more of their park may be available to the firm.

(attenz. Magg. Long)

- 1) La Soc. Italiana Rueping di Napoli, la quale provvede alla impregnazione delle traverse e dei legnami d'armamento ferroviario, per conto di questo Servizio, ha richiesto, alla Sottocommissione dell'Industria della Commissione Alleata, la derequisizione di un'altra parte del piazzale del proprio Cantiere di Napoli, ancora occupato dalla 38^a Vehicle Co., e precisamente la zona mediana distinta con la lettera B (circa 20.000 mq.).
- 2) Questa zona è indispensabile per il deposito e la stagionatura delle traverse, che si stanno spedendo al suddetto Cantiere ed accumulando nella piccola area della zona C (10.000 mq.), già derequisita, e che tra breve sarà completamente ingombra.
- 3) Con riferimento alla precedente corrispondenza intercorsa fra questo Servizio e codesta Sottocommissione, ed alla fiducia espressa dal brigadiere Cripps, nella sua lettera del 30 aprile c.a., di poter secondare entro due o tre mesi la necessità della Soc. Rueping se l'andamento della guerra fosse stato favorevole, si prega vivamente di voler sollecitare lo sgombero della suindicata zona B, onde poter riprendere continuamente il lavoro d'impregnazione delle traverse e dei legnami d'armamento, tanto necessari per la riattivazione delle nostre linee ferroviarie.

Ref. your AC/5672/IND of 21 July 45.

1. The ground in question was occupied as the result of a misunderstanding and arrangements have now been made for the removal of the timber to an alternative site in Naples.

2. The circumstances in which it was originally occupied are as follow. As the result of an application by DADOS (CP&P) for the use of this plot of ground, stated to be vacant, it was decided by the Accomodation committee that it should be occupied provided the consent of the owner was obtained first. AMG agreed to approach the owner and as an emergency interim measure requisition was agreed by the Accommodation Committee.

3. In the meantime, and before the owner's consent was received, the timber which it was intended to store on the ground, arrived, and stacking commenced.

4. The error has now been rectified and the site will be cleared within a week.

SUBJECT: Injection workshop in Naples.

We inform you that the British Military Authorities at the end of last month have derequisitioned and released us part of our workshop south of the line which was dividing the two well known occupations, and a part of the rail yard area, eastern side, where the receiving yard for our workshop, and our junction for convoy reception and departure are.

This has allowed our full resuming of works concerning repair and construction of essential buildings and annexed plants, together with the reorganization of machinery for the injection of timber; we expect to carry on said works very quickly and resume our injection operations in a reduced scale by the end of september next, if, within August, we can have at least another yard area, necessary for receiving and departure shunting of gauges, zone which is however supposed to be freed by the present occupiers (armoured cars depot) within or short while.

Resuming of injection operations is also depending from antiseptics and coal availability.

Meanwhile we could start redeption of material (sleepers and timber) to be injected and for this purpose your service could ask Movement Service to reopen to traffic our junction track which we have already put in order.

After have put in operation our junction, concentration in our Naples workshop of material destined to injection could be made. We also could awaiting for a kind note from you, we remain.

Cantiere d'iniezione a Napoli. - Vi comunichiamo che le autorità militari Britan-
niche a fine scorso mese hanno derequisito ed a noi riconsegnato la parte del
na/ stabilimento a Sud della linea che divideva le due note occupazioni ed una
zona del piazzale dal lato ad oriente nella quale ricade il fascio dei binari
per ricevimento 1. cantiere attraverso il na/ raccordo dei convogli in arrivo e
per la preparazione di quelli in partenza.

Questo ci ha permesso di svolgere in pieno il lavoro già prima iniziato di ri-
parazione e ricostruzione degli edifici essenziali e degli impianti annessi, e quel-
lo per riordinamento del macchinario per la iniezione del legname; tali lavori
contiamo di condurre avanti rapidamente e di poter riprendere il lavoro d'inie-
zione in misura ridotta già a fine settembre prossimo, se per fine agosto potremo
avere la disponibilità di almeno un'altra zona del na/ piazzale indispensabile per
le manovre di entrata e di uscita dei carrelli dagli autoclavi, zona che dovrebbe es-
sere lasciata libera dagli attuali occupanti (deposito carri armati) tra non molto.
La ripresa del lavoro d'iniezione resta pure subordinata alla disponibilità per
quell'epoca degli antisettici e del carbone.

Frattanto potrebbe iniziarsi il ricevimento in cantiere del materiale (traverse
e legnami) destinato alla iniezione e per tale scopo codesto servizio potrebbe ri-
chiedere al Servizio Movimento di riporre in esercizio il na/ binario di raccordo
che è già stato da noi rimesso in ordine.

Rimesso in esercizio il na/ raccordo, si potrebbe disporre il concentramento a
Napoli nel na/ cantiere del materiale destinato alla iniezione, e che verrebbe da noi
./.

Ref. ACC/5580/IND

SUBJECT: Timber Impregnation Plant

TO : A.F.L.R.S. - R.A.A.C. - Rome
 (Attn: Brig. Curry).

1. The Plant of Societa Italiana Rueping, Via Taddeo da Sessa, Naples, is an important unit occupied in the impregnation and weatherproofing of timber. It is the only one of its kind in Meridional Italy and its continued operation is considered necessary by the Italian State Railways for the treatment of railway sleepers (rail ties). This work for the Italian railways has been carried out by Rueping for 35 years.

2. For some time the railyard and sidings of the premises have been occupied by the U.S. Army 550 Depot as a vehicle park. Part of the buildings was occupied by DW, HQ AAI., as No. 7 Sub-Workshop operated by S.A. Engineers. The occupation of these portions of the establishment did not preclude the eventual possibility of the reactivation of the plant.

3. REME have now, on the evacuation of the railyard by the U.S. Army 550 Depot, moved in to take over for the establishment of an A.F.V. Repair Depot.

4. On the attached plan (marked E and N) is the main building of the works, containing the treatment plant. Access to this is now free, but it is understood that there is a proposal on foot to extend the REME area from the blue to the red line on the plan, and to uproot rail lines and to level the ground where the sidings now are. In addition a concrete ramp is alleged to be contemplated. This would approximately follow the red line and automatically forbid access to the treatment plant.

5. This Sub-Commission is assured by Messrs. Rueping and by the Italian State Railways:-

- (a) That the plant is essential to the maintenance of efficiency of the Italian Railway system, in the conserving of sleepers.
- (b) That continuing supplies of timber and materials for treatment are available.
- (c) That urgent work for the railways is waiting.
- (d) That necessary repairs to the roof of the plant can be made with materials on hand and cement to be released by this HQ., thus

preserving valuable machinery which will be lost if exposed to the elements over the coming winter.

6. It is requested that if at all possible, arrangements be made by which REME allow the plant to function by means of mutual accommodation between themselves and Messrs. Rueping, and that rail access to their works be not denied to the firm.

XXXXXX September 13, 1944

Industry Sub-Commission A.C.C.

Attention of: Maj. Neutner

None

Supplementing our letters dated August 24 and August 28, 1944, addressed to Transportation Sub-Commission A.C.C., we enclose (enc1,1) a letter addressed to us by the Italian State Railways, certifying that enough timber is available for continuous operation of our creosoting plant in Naples, as soon as rehabilitation of it will be accomplished.

Also antiseptic chemicals to be used in the preserving treatment will be supplied by Italian Railways, as in the past, so that regular operation of our plant will be ensured in the worst case, that is in cases conditions do not better in the near future and no importation of creosote will be available by the time the plant will be ready for operation (from three to six months).

We have been waiting for the Italian State Railways for the past 35 years; we also have been waiting, on a smaller scale, for very important public utility companies, such as private Railways Companies, electric and telephone companies, etc., that have been asking us lately to resume work for them on timber they have in stock and is awaiting treatment (enclosures 1,3,4).

We beg to emphasize that our application for materials ^{and} ~~substances~~ chiefly be reduced to 30 tons of cement and all repair work will be carried out by us counting mainly on ourselves. The only important thing we ask is to be assured against outside interference or further occur-

P.t.o.

would be primarily to test, if necessary, reports were not under-
standable. We trust that, both here and abroad, the people of the world
are all the more aware of the importance of the work of the
view of the government and very great interest of the work
for reconstruction of the country, the A.S.A. a recent assistance will
be extended to us.

TO THE P. U. Sub. COMMISSION A. C. C.

NAPLES

We let you know that for many years we have entrusted with the Naples' Factory of the Ruening Italian Society, the injection of the sleepers and of exchange timber needed for the keeping of the armament of our lines.

It is of great interest to us that the work of injection could be seen resumed, and therefore we beg Sub. Commission to support the application forwarded by the Ruening Italian Society of setting again to work the foresaid factory.

We have already at our disposal a remarkable number of sleepers which must be injected.

We heartily thank you.

HEADQUARTERS
ALLIED CONTROL COMMISSION
Transportation Sub-C,
APO 394

28 August 1944

SUBJECT: Treating Plant for Railway Ties and Timbers

TO : Industry Sub-Commission - A.C.C.

1. There is attached a report, or statement, made at our suggestion by the Manager of Societa Italiana Riepung concerning condition of their timber treating plant at Naples, and what is needed to restore it to operations, together with copy of letter from Italian State Railways on the Subject.
2. This subject was originally taken up with the Military Railway Service, and copy of their comments is attached.
3. References made to revival of contracts for supply of timbers, prices, etc., do not enter into the immediate question of getting the plant into shape for operations, in our opinion. That is something to be worked out by the railway, the plant and timber producers and does not call for any delay in getting the plant ready to go.
4. In view of the difference in service life and utility of treated over untreated timbers, it is submitted that resumption of operations by this plant is most important to the rehabilitation of Italian Railways. It is, therefore, strongly recommended that every assistance possible be lent the firm's management in starting quickly toward getting the plant back into work-in order and production.
5. From observations on the ground, the thought is ventured that the first, and most time consuming work to be done, that of repairs to boilers and buildings housing the treating machinery, would not interfere with use now being made of part of the premises by the military. In fact, it is understood that they have permitted and assisted in the work of cleaning up the plant and safeguarding machinery.
6. Will you please advise as to any further information or any assistance desired of this Sub-Commission. Would also appreciate advice of your view of prospects of getting this plant set up for operation.

E. S. WALKER, Major TC,

For: D. E. ADAMS,
Colonel, CE,
Director, Tpn. Sub-Commission

ALLIED FORCE
MILITARY RAILWAY SERVICE
Office of Director General

FTR/rj

APC 400
10 July, 1944

SUBJECT: Track Ties (Sleepers)

TO : Ing. G. Caliendo
Italian State Railways Allied Liaison Official
Villa Patrisi, Rome

1. Acknowledgement with thanks is made of your memorandum, signed by Ing. Donalizio, Chief of Service, dated 3 July, 1944, on the subject of contracts for the purchase of track ties for the Italian State Railways.

2. This memorandum is being referred to the Allied Control Commission for further action.

a. Whereas the Military Railway Service is interested primarily in material needed immediately for the war effort and for essential civilian needs, the Allied Control Commission is established to assist in the re-habilitation of railroads over a longer period of time.

3. With specific reference to the three questions raised in your memorandum:

a. The question of whether or not deliveries may be carried out on unfilled contracts cannot be answered generally but only when specific cases are cited, since the production of many of your tie producers has been taken over by the Military forces to obtain track ties for reconstruction work, the ties to be furnished directly to the Military Railway Service.

b. Contract prices may be revised within certain limits.

c. It is hoped that dealings will be started for new supplies, but only a limited amount of transportation will be available for the movement of ties in the Lazio, Abruzzo and Umbria areas at the present time, because of the heavy demand for cars for the movement of military and essential civilian stores.

3153

Maj Wagner *Adv MRS* (R)

4. At the present time, it is probable that arrangements cannot be made for the treating of ties in the Rome yard, as suggested by you. However, it is suggested that the ground work be laid so that when the military situation permits, the resumption of normal tie treating activities may be undertaken.

For the Director General:

F. T. RICHARDS
Captain, T. O.
Stores Department

Cy - Director General, Military Railway Service ✓
APO 400, U. S. Army (Att: AGM-Stores)

It is thought that the A.C.C. representative in your office may be interested in the attached memorandum for future reference.

COPY

M E M O R A N D U MSupply of wood sleepers for tracks

In order to supply sleepers for I.S.R. lines, our Administration agreed, every year-end, with the principal direct producers, some contracts for the coming year. The Firms could, thus, arrange to organize and operate their work during the proper seasons for cutting lumber, preparing sleepers and carrying them to the load stations.

List of charges is here enclosed -

Production areas for such a material are: Calabria - Basilicata - Abruzzo - Lazio - Umbria and Tuscany -

Lumber kinds for sleepers are: red oak, green oak, beech wood and pine. Red oak sleepers (without alburn) are used in the natural state. Green oak, wood beech and pine sleepers are injected with coal tar oil or with tetraborate solution before treatment with coal tar oil. In case of necessity only tetraborate of soda may be used.

Injection yards were:

Societa Rueping - Naples
Societa Cledca - Rome
Societa Cledca - Mestre

Yard-train; I.S.R. - Foligno (at present transferred in Northern Italy)

" " I.S.R. - Leghorn

A supply of about 450.000 sleepers was contracted for delivering within the year 1943; in Sept. last about 170.000 had been delivered. Thereafter, deliveries were stopped.

Supply prices were:

red oak - per normal sleepers 1st cath.	L. 45.90	
green oak per normal sleepers, 1st cath.	L. 43.86	
wood beech and pine per normal sleepers		
1st cath.	L. 42.84	21.1

For other kinds of sleepers, we had the following differences on the above prices:

sleepers, section cm. 26 x 16	23% more
" special (cm. 18 on iron work level)	13% "
" 2nd cath.	5% less

sleepers, 2,30 ms. lenght 10% less
" refused, but which may be utilized 20% "

As a great lot of sleepers will, as soon as possible, be necessary for lines resumption, our opinion is that works, concerning unsettled contracts are to be restarted, with the opportune prices variations in conformity with the new marked conditions. New supplies are even to be treated with and works may begin in the next sylvan season. Please let us know.

1. Whether deliveries may be carried out on account of unsettled contracts;
2. Whether contract-prices may be revisioned;
3. Whether dealings may be started with new supplies-

Some firms operating in Lazio, Abruzzo and Umbria have informed to have lots of sleepers ready or going to be ready.

A prompt decision is necessary, as beech wood lumber is easily perishable.

These sleepers might be injected in the Rome yard which has the possibility to prepare the relative antiseptic.

The Chief of the Service

Rome, 8th July 1944.

SUBJECT: Reuping Workshops - Protection of Chemicals from Weather & Theft.

TO : General di Raimondo, Undersecretary of State, I.S.R.

1. Reference is made to your letter 5 April 1944, file No.2/2709/R.
2. Why cannot arrangements be made to protect from weather and theft at their present location, Reuping Workshops, the chemicals for wood preserving? The Poggioreale Stores have a limited amount of space and our information is that only a small portion of the Reuping Workshops is occupied by Allied Armies and it would appear that space for proper storage is available there. It may be that some protective measures are necessary but it is suggested that attempt be made to protect and store the chemicals in their present location.
3. Shall appreciate advice from you as to reason why this cannot be done.

For the Director General,

E. F. McFADDEN,

Inter-Office Memorandum.

Subject: Timber Treating Plant - Naples.

To: Director General, Military Railway Service.
Attention: Colonel Tully.

1. It is not believed that the treating plant, as such, has any military value to the Railway Service.

2. It is recommended, however, that proper authorities be requested to take all possible care toward the preservation of the equipment at this plant. It is not recommended that any arrangements be made at this time toward importing from overseas materials or supplies to be used in re-establishing the normal operation of this plant.

BENJAMIN H. CROSLAND
Colonel, T. C.
Assistant General Manager, Engineering

Naples, 3 April 1944

File: 2/2545/R.

Subject: Workhouse for inoculation of railroad ties

To: Gen Carl R. GRAY Director General of MRS

M A P L S S

In the industrial area of Naples is still extant the workhouse for inoculation of timber managed by the Italian Company RUSSING (Via Taddeo de Bessa).

This plant used to work almost exclusively for the ISR on the inoculation of antiseptic into railroad ties for switch and bridge timber, which were brought to Naples from the southern district of Italy (Calabria, Irpinia, Sannio) at a rate of nearly 75 per cent of the ISR requirements.

As the plant disposed of vast areas, up to 300,000 pieces could be assembled there and injected after the RUSSING system in two digesters of a capacity of nearly 360 ties each.

Working in a double shift of eight hours each, 3500 railroad ties daily could approximately be injected. The only workhouse for inoculation of timber in Italy are those of Roma Trastevere, Leghorn and Mestre (Venice), which have a far lower capacity than the one of Naples, besides a train furnished with a proper equipment for injection of timber, which was stationed in Reggio Calabria, but was afterwards moved to Foligno (Central Italy), where it must have been doubtlessly damaged by the many raids made on that station.

Considering that the establishment in Naples had its machinery and its outstanding equipment miraculously undamaged, we deem that this is the only available source for a gradual settlement of the lines, following the gradual liberation of Italy and restoration of its territory to the Italians.

After such preliminary remarks, whose importance you will be able to value to the effect of the common effort towards the railways reconstruction we beg you:

1. To prevent demolition of partially extant premises where piercing and spiking machines were fixed and premises where coupling was accomplished.
2. To preserve the weighing steel-yards and the automatic elevator for loading of ties on wagons.
3. To clear and fence the western yard including machinery, boilers and big tar-oil tank, avoiding ammunition dumps in the neighbourhood.
4. To consider the possibility of importing from overseas 1500 tons tar-oil pipe has been destroyed, in order to reestablish working and inoculation of the ties and timber we are now buying in the above mentioned production area.

Recently instead of tar-oil we have employed tetraborate, yielded by the borax fumeroles in Larderello (Tuscany), on which we shall not probably be able to rely. The plant in question is presently manned by allied military forces depending on the P.B.S. Office of Engineer and the 551st Army Troop Coy-Royal Engineers.

The Undersecretary of State

TRASPORTI IN CONCESSIONE

N. 2/2645/R.

al N.

del

Napoli, 3 Aprile 1944

Oggetto: Stabilimento di Napoli
per iniezione traverse

Gen. Brig. Carl R. Gray
Director General
Military Railway Service
Napoli
Piazza Nicola Amore N. 2-

Nella zona industriale di Napoli esiste tuttora il Cantiere d'iniezione legnami gestito dalla Società Italiana Rueping (Via Taddeo da Sessa).

Quest'impianto lavorava quasi esclusivamente per le F.S. per l'iniezione con antisettico di traverse e legnami da scambi e da ponti che affluivano a Napoli dalle regioni meridionali (Calabria, Irpinia, Sannio) nella misura di circa il 75% del fabbisogno delle F.S.-

Lo stabilimento disponendo di vaste aree poteva ricevere fino a 300.000 pezzi ed iniettarli col sistema Rueping in 2 autoclavi della capacità di circa 360 traverse ciascuna.

Lavorando in doppio turno di otto ore potevano venir iniettate giornalmente circa 3500 traverse.

In Italia per l'iniezione dei legnami esistono soltanto i cantieri di Roma Trastevere, Livorno e Mestre (Venizia), di potenzialità molto inferiore a quello di Napoli ed un treno attrezzato per l'iniezione dei legnami a Reggio C., poi trasferito a Foligno e certamente danneggiato dalle numerose incursioni aeree effettuate in quella stazione.

Tenendo presente che lo Stabilimento di Napoli è rima-

3132

sto miracolosamente incolume nei macchinari e nelle principali attrezzature, si ritiene che sarà questa l'unica fonte a disposizione delle ferrovie per la sistemazione graduale delle linee di mano in mano che l'Italia verrà liberata e restituita agli italiani.

Dopo tali premesse che la S.V. vorrà valutare nella loro importanza, agli effetti del comune sforzo per la ricostruzione ferroviaria, si prega voler evitare:

- 1- Che vengano abbattuti i locali, parzialmente esistenti, in cui erano impiantate le macchine foratrici e sabotatrici per traverse e legnami da scambi, nonché quello in cui si provvedeva alla lavorazione degli accoppiamenti.
- 2- Che vengano conservati le stadiere a bilico per pesatura e l'elevatore automatico per il carico delle traverse sui vagoni.
- 3- Che venga sgombrato e recintato il piazzale ovest in cui sono compresi i macchinari, le caldaie ed il grande serbatoio per l'olio di catrame - evitando in quei pressi depositi di munizioni -
- 4- Che venga esaminata la possibilità d'importare d'oltremare Tonn. 1500 di olio di catrame in barili, dato che il nostro oleodotto costiero è andato distrutto, per riattivare la lavorazione ed iniezione di traverse e legnami che questo Sottosegretariato ha in corso d'acquisto nelle zone di produzione suindicate.-

Recentemente in luogo dell'olio di catrame venne usato il tetraborato sodico, prodotto dai soffiatori boraciferi di Larderello, nell'Italia Centrale e su cui forse non riuscirà possibile fare assegnamento.

Lo Stabilimento è attualmente presidiato dalle forze militari alleate dipendenti dal P.E.S. Office of Engineer e dal 551 St. Army Troop Coy - Royal Engineers-

TO: Commanding Officer, 703rd Ry Grand Div, APO 400, U S Army

1. Investigation develops that this area is occupied completely by the 305th Quartermaster Corps who have a large ration depot there; also an anti-aircraft unit is bivouacked in this area. The area is completely inclosed with a stone fence and this track enters through a gate directly into the ration dump of the 305th Q.M.

2. Recommend against permitting this facility to be made available to the AAG (M) Headquarters West Italy.

SUBJECT: Track Facilities at Naples Yard

TO : CO, 727th Ry Opn, APC 400, US Army

1. Transmitted herewith copy of letter of request from Q Movements West Italy to the Director General, MRS, requesting that Reupings Factory siding, Naples Yard, be opened for handling British RE Stores.

2. Attached hereto two copies of sketch of the track within the Reupings Creosote Plant. The work of opening up these tracks for service is not very heavy. Very little track material will be required.

3. Service on all of these tracks would be a very complicated and delaying switching operation, and any agreement made should be for use of the easier tracks to switch.

4. Submit recommendation immediately as to the opening of these tracks for service. Designate on the attached sketches the tracks recommended for assignment to this service, returning sketches to this headquarters.

By Order of Colonel COVIN:

Dear Sir,

I phoned you this afternoon, but you were not in.
 I'm sending this note through my wife, as I
 am unable to come to-morrow morning.

The secretary of Capt. Baker (he couldn't receive
 me as he was in a great hurry) told me definitely
 that their office did not issue passes for automobiles.
 Those passes should be issued by the office of Via
 Tanacelli, which is the first office where I went with
 your letter and where they told me I should go.

I phoned you this afternoon, but you
I'm sending this note through my wife, as I
am unable to come to-morrow morning.

The secretary of Capt. Baker (he couldn't receive
me as he was in a great hurry) told me definitely
that their office did not issue passes for automobiles.
Those passes should be issued by the office of Via
Tornacelli, which is the first office where I went with
your letter and where they told me I should be
included in the lists sent in by the various military
services. So I am back at the beginning. ~~0000~~

The Via Seneca office issues individual passes only
for people that must leave the Rome province - not
automobiles passes.

I am fully aware of all the trouble I am
causing you - but you know it is for an important
reason of public utility - not for a personal one.
P./T./O.

I would appreciate if you let with my
wife a note saying what you suggest me to do
next.

Thanking you in advance, I remain

Yours very sincerely

John F. Kennedy

SUBJECT: Travel Permit.

TO : Captain A. E. Baker, C.A.P.O.-AMG - Rome Region.

1. The bearer, Sig. Franciosi, is a Managing Officer of the Societa Italiana Rueping, with a wood preserving plant in Naples.

2. In conjunction with the Italian State Railways, Sig. Franciosi is working on the proposition of getting his plant in shape for operation for the purpose of treating railway ties and timbers.

3. In this work he needs to travel between Rome and Naples, in his own vehicle, Fiat No. 508, license 33-128 Roma. It will be appreciated if necessary permit can be issued for this purpose, good to 30 September 1944.

Major Walker,

Sir,

1. In reference to your letter, herewith attached, I'm enclosing blank forms for Movement of Civilians. However, this form is only good for one trip, and, as I understand, the gentleman in question must travel frequently between Naples and Rome, I suggest he be sent to Region IV for the necessary circulation permit.
2. The attached form must be filled in by Officer authorizing the movement and must be endorsed by Col. Adams, the Economic Section and signed by the Secretary General of A.C.C.

3. Major Wosker of the Economic Section suggested that the D.G.M.B. take the necessary action on this also, since this person is working for the D. S. L. and not for A.C.C. directly.
4. You may send the form here for Col. Adams' signature after you have filled ~~it out~~ and signed it.
