INTER-OFFICE MINUTE

TO : Major Ping

Concerning your memo on Civitanova Marche it is advised that checks were made through three channels. These checks included needs at Civitanova Marche and Celleferro.

The MRS was contacted regarding timber coal and coke supply. The matter of coal and coke for these organizations through an oversight was neglected. This question has been reopened through MRS channels and will doubtless show results in the near future.

The question of timber was taken up with Major Long who agreed to talk with Engr. Bracci on the matter.

An outline of the situation was given to Engr. Grandi and he was requested to work with Sig. Bracci to alleviate the critical situation at both plants.

This matter will be followed up by this office.

J.W.GILL, Major T.C.

INTER-OFFICE MINUTE

Tel: 849402

SUBJECT : Repair Locomotive Shed at Grosseto.  
TO : Civil Engineering Section, Rail Division AC  
att. Lt.Col. STREET.

1. Referring to letter attached suggesting repairs to Locomotive shed at Grosseto.
2. At present time locomotives are running through Rome-Leghorn and Rome to Florence. Grosseto has become a servicing point only with possible maintenance to over a two switch locomotives at this station.
3. If Line 221 from Siena and Monte Amiata is opened, Grosseto will probably be a terminal point for trains on this line.
4. The present condition of shed at Grosseto is not known but it was used as a Locomotive change point Rome-Leghorn for many months. This indicates the shed itself may not be badly damaged.
5. In view of the fact that at present locomotives are running through Rome-Leghorn with a lubrication and servicing point only at Grosseto it seems that this practice can be economically continued. Until line 221 is opened it is suggested that this repair be given a low priority.

John W.GILL,  
Major T.C.
