File : RTC 400.1924

21 March 1944

SUBJECT : Progress Report, week ended 14th March 1944.

TO : Director, Internal Transportation Sub-Commission,
A.C.C., c/o Movement & Transportation,
A.F.H.Q. Advanced Administrative Echelon, C.M.F.

1 . Coal Position. The coal position continues to improve.

Passenger Services. We have been able to extend the weekly passenger train running to Cefalù, to include San Stefano. The additional coal consumption will only be 2½ tons a week.

Further additional services are being considered, but will not be put into effect, until we have built up a coal reserve.

Two additional diesel cars will be turned out of the shops next week, and these could be used for any additional passenger service which we agree to be run. The military diesel car service between Palermo and Catania is now running four days a week as from 20th inst., viz. Monday, Tuesday, Thursday and Saturday. (App 7)

Freight Services. A daily orange train has been put on from the Catania district to Palermo. This will not affect our coal position very much because we have a heavy traffic movement in the opposite direction, so it is a balancing process. Due to the curtailment of exports much of the orange crop in the Catania district will spoil.

I would mention that we are not agreeing to additional services, until we know how much coal will be required for two big movements in the near future, viz:

(1) The move of 250,000 refugees, referred to in last week's report. 1162

(2) The movement of sulphur for shipment to England.

2 . Move of Refugees. I attended various meetings during last week and it has been arranged to land 20,000

Declassified E.O. 12356 Section 3.3/NND No. 782021

1 . Coal Position. The coal position continues to improve.

Passenger Services. We have been able to extend the weekly passenger train running to Cefalù, to include San Stefano. The additional coal consumption will only be 2½ tons a week.

Further additional services are being considered, but will not be put into effect, until we have built up a coal reserve.

Two additional diesel cars will be turned out of the shops next week, and these could be used for any additional passenger service which we agree to be run. The military diesel car service between Palermo and Catania is now running four days a week as from 20th inst., viz. Monday, Tuesday, Thursday and Saturday. (App. 7)

Freight Services. A daily orange train has been put on from the Catania district to Palermo. This will not affect our coal position very much because we have a heavy traffic movement in the opposite direction, so it is a balancing process. Due to the curtailment of exports much of the orange crop in the Catania district will spoil.

I would mention that we are not agreeing to additional services, until we know how much coal will be required for two big movements in the near future, viz:

(1) The move of 250,000 refugees, referred to in last week's report.

(2) The movement of sulphur for shipment to England.

2 . Move of Refugees. I attended various meetings during last week and it has been arranged to land 20,000 a week, viz. 14,000 at Siracusa and 6,000 at Palermo. These will be worked by rail inland, and I see no difficulty. Camps and soup kitchens are being arranged. I saw Major Reeve last week, and told him I should require an extra 15 00 tons of coal for this move for April, May and June, and he accordingly sent off a signal to his HQ.

{ 1.500 tons each month }

I would mention that 1,100 refugees arrived at Augusta from the mainland on 18th inst., unadvised. Nobody knew anything about them, not even "Q" Movements, till the ship arrived. They were put into a camp and were then load-

Declassified E.O. 12356 Section 3.3/NND No. 782021

ed into a train for Siracusa.

I have insisted that when the 250,000 refugees commence to arrive, we must have 24 hours notice for a special train, giving number to be conveyed and destination etc.

3 . Movement of Sulphur from Sicily to England.

We are informed that about 10,000 tons of sulphur are to be moved from the mines in the vicinity of Caltanissetta, to Catania and Porto Empedocle, commancing next week. This will require an additional 1,250 tons of coal, and I have spoken to Major Reeve on the telephone this morning, who will endeavour to obtain this amount.

4 . Coal Consumption. In accordance with your instructions in your letter dated 18th February, your reference ACC Tn/16A 20, asking for details of coal consumed by locomotives working the various trains, I enclose a detailed statement. (Appendix 1).

We have given a considerable amount of time in the preparation of this statement, and if it contains the information, as required by you, we could furnish a similar one weekly.

We have endeavoured to give much information in concise form. You will observe, we have shown the percentage of military and civilian traffic conveyed on each section of the line, for instance:-

Fiumetorto to Palermo train ran on six occasions during the week, and the coal consumed on this mixed train was 21.6 tons for civilian and 15.1 tons for military.

We have also included the narrow gauge lines.

5 . Locomotive Repairs. I enclose details of locomotives and wagons repaired during the week on the eastern side of the island (Appendices 2 and 3), which shews an increase of 5 locos repaired and released compared with the previous week. Work on this side of the island is very satisfactory.

6 . Repairs to Railway Buildings, etc. The usual weekly statement is enclosed herewith. (Appendix 4).

7 . Freight Traffic Handled, week ended 14th March. I enclose the usual weekly statement (Appendix 5). I duly received your letter dated 15th inst., your reference ACC Tn/16/A/27.

Declassified E.O. 12356 Section 3.3/NND No. 782021

and I have spoken to Major Reeve on the telephone this morning, who will endeavour to obtain this amount.

4 . Coal Consumption. In accordance with your instructions in your letter dated 18th February, your reference ACC Tn/16A 20, asking for details of coal consumed by locomotives working the various trains, I enclose a detailed statement. (Appendix 1).

We have given a considerable amount of time in the preparation of this statement, and if it contains the information, as required by you, we could furnish a similar one weekly.

We have endeavoured to give much information in concise form. You will observe, we have shown the percentage of military and civilian traffic conveyed on each section of the line, for instance:-

We have also included the narrow gauge lines.

5 . Locomotive Repairs. I enclose details of locomotives and wagons repaired during the week on the eastern side of the island (Appendices 2 and 3), which shews an increase of 5 locos repaired and released compared with the previous week. Work on this side of the island is very satisfactory.

6 . Repairs to Railway Buildings, etc. The usual weekly statement is enclosed herewith. (Appendix 4).

7 . Freight Traffic Handled, week ended 14th March. I enclose the usual weekly statement (Appendix 5). I duly received your letter dated 15th inst., your reference ACC Tn/16/A/27.

(1) The tonnage shewn in our reports is GROSS tonnage.

(2) Most of our weights have been estimated, as most railway scales have been destroyed, but a few are now under repair.

(3) The figures for our ~~repairs~~ reports have been obtained from the train consist, which carries only one weight, i.e. gross weight. A sample copy of the train consist is attached (Appendix 6).

Subject : DIESEL CAR SERVICE

1. Commencing Monday 20 March 1944 the diesel car service to CATANIA will be increased to four times weekly viz Mondays, Tuesdays, Thursdays, Saturdays.

2. Timings are as under :-

PALERMO (Centrale)	Dep	0745 hrs	CATANIA (Centrale)	Dep	1228 hrs
CALTANISETTA (Xirbi)	Arr	1220 "	SIMETO BRIDGE	Arr	1300 "
	Dep	1030 "		Dep	1330 "
SIMETO BRIDGE	Arr	1500 "	CALTANISETTA(Xirbi)	Arr	1610 "
	Dep	1330 "		Dep	1620 "
CATANIA (Centrale)	Arr	1400 "	PALERMO (Centrale)	Arr	1855 "

Passengers PALERMO - CATANIA or vice versa change SIMETO in each direction.

3. Halts can be made at intermediate points provided that prior request is made to this office or to Movements, No. 1 District.

4. The above service is primarily for use of members of the Allied Forces, but civilians in employ of Allied Military authorities or A.C.C. will be carried provided they hold written authority to travel from the employing authority.

5. The seating capacity of the diesel cars is limited, and application for seats must be made to Q(Movements) c/o IBS, or IBS Transportation (Rail Section) and in the case of RAF personnel, to 75 M.U. Detachment c/o IBS, before 1700 hrs on the day prior to travelling. Single journeys only can be booked, and passengers wishing to return from CATANIA should report to Movements, No. 1 District or RTO Catania as soon as possible after arrival and before 1800 hrs on day prior to travelling. Personnel on duty will be given priority over leave personnel.

6. All passengers will report to RTO on arrival at entrainment point.

7. This letter cancels this office's letters MOVLO 5/25 dated 30 Nov. 43 and MOV 5/25 dated 9 Feb 44.

OHL/el

File : RTC 400.1924

13 March 1944

SUBJECT : Progress Report, Week Ended 7th March 1944.

TO : Director, Internal Transportation Sub-Commission,
ACC, c/o Movement & Transportation,
AFHQ Advanced Administrative Echelon, C.M.F.

1 . Coal Position. Our coal situation is good, and we are now able to move a considerable amount of civilian traffic.

a . Passenger Services. We have decided not to increase the passenger services for western Sicily for the time being, in view of the heavy civilian and ACC traffics now moving. Also, I am anxious to build up a reserve dump of coal in case of emergency.

I understand from HQ Region 1 that next month we may be called upon to commence handling about 250,000 refugees, who will land at Palermo, Catania and Siracusa, and a large number of them will have to be carried inland by rail.

This will subsequently mean that more foodstuffs and material will also have to be conveyed by rail, and therefore I feel it is necessary to preserve a supply of coal, in case a move of this description comes sooner than expected.

b . Freight Services. The present skeleton freight schedules are insufficient to handle the traffics offered, due to military preference, and it will be necessary to put on extra trains for civilian and ACC traffic combined. At present, we have 300 wagon-loads of flour and fuel to move for ACC to Southern and Eastern Sicily, and a considerable tonnage of oranges is being worked in the opposite direction to balance the traffic.

c . Coal Consumption. The coal consumed by engines working for week ended 7th March was as under:

Passenger	(American District	80.5 tons)	total 319.9 tons.
	(British District	239.4 ")	
Freight	(American District	382 ")	total 686 "
	(British District	304 ")	

2 . Locomotive Repairs. We continue to obtain good

c . Coal Consumption. The coal consumed by engines working for week ended 7th March was as under:

Passenger	(American District	80.5 tons	)	total 319.9 tons.
	(British District	239.4 "	)	
Freight	(American District	382 "	)	total 686 "
	(British District	304 "	)	

2 . Locomotive Repairs. We continue to obtain good results. I enclose statement (Appendix I) of repairs performed on the eastern side of the island, from which you will notice that for week ended 4th March, six locomotives were repaired and released. One day last week, I visited the Navy Yard and Engine Shed here, and saw a considerable amount of engine repairing and re-building work being carried out.

Declassified E.O. 12356 Section 3.3/NND No. 785021

Declassified E.O. 12356 Section 3.3/NND No. 785021

3. Wagon Repairs. Repairs to damaged wagons are shewing good results. The figures from Catania show that from 20 to 30 wagons are being repaired and released per week, and the figures for this side of the island show an average of 100 wagons per week. These figures include heavy repairs in some cases, and also repairs to coaching stock.

4. a. Repairs of Railway Buildings, etc.
b. Freight Traffic Handled, week ended 7th March.

The usual weekly returns are enclosed herewith. (Appendices 2 and 3.)

G. P. Lindberg.

ALLIED CONTROL COMMISSION
SICILY REGION HQ.
APO 394

OHL/el

File : RTC 400.1924

6 March 1944

SUBJECT : Progress Report, week ended 29th February 1944.

TO : Director, Internal Transportation Sub-Commission,
ACC, c/o Movement & Transportation,
AFHQ Advanced Administrative Echelon, C.M.F.

1 . Coal Position.

I am glad to report that the coal position in Sicily has again improved, and that the prospects for March are good.

The 2,300 tons borrowed from the Navy at Palermo has been fully paid back, and we commence the month of March with a stock in hand of 3,473 tons of Railway coal.

I have seen Major Reeve again, and if his allotments work out as intended, we shall be in a still better position, and after allowing for improved civilian services, we should be able to build up a useful reserve.

2 . Civilian Rail Services.

a . Freight.

In view of the above, it has been possible to move some of the civilian freight traffic which has been accumulating during the less favourable period in February. A skeleton scheduled service has now been re-established in western Sicily.

4115

b . Passenger.

We have established a weekly passenger service to Alcamo and Cefalù, by extending the present workmen's trains to these points on Saturdays only. This facility, which is greatly appreciated, will only cost about 5 tons of coal per week. We are now considering a skeleton passenger service, but the absolute minimum only will be agreed to. The intention is to build up a coal reserve, and then agree to skeleton services.

The demand for civilian rail transportation is still heavy, and a lot of ACC traffic is expected. Military traffic has decreased considerably during the last week. You will notice on the attached statement (Appendix

I am glad to report that the coal position in Sicily has again improved, and that the prospects for March are good.

The 2,300 tons borrowed from the Navy at Palermo has been fully paid back, and we commence the month of March with a stock in hand of 3,473 tons of Railway coal.

I have seen Major Reeve again, and if his allotments work out as intended, we shall be in a still better position, and after allowing for improved civilian services, we should be able to build up a useful reserve.

2 . Civilian Rail Services.

a . Freight.

In view of the above, it has been possible to move some of the civilian freight traffic which has been accumulating during the less favourable period in February. A skeleton scheduled service has now been re-established in western Sicily.

4115

b . Passenger.

We have established a weekly passenger service to Alcamo and Cefalù, by extending the present workmen's trains to these points on Saturdays only. This facility, which is greatly appreciated, will only cost about 5 tons of coal per week. We are now considering a skeleton passenger service, but the absolute minimum only will be agreed to. The intention is to build up a coal reserve, and then agree to skeleton services.

The demand for civilian rail transportation is still heavy, and a lot of ACC traffic is expected. Military traffic has decreased considerably during the last week. You will notice on the attached statement (Appendix 1) that ACC and civilian freight for the week amounted to 35% of the total tonnage moved.

3 . a . Repairs of Railway Buildings, etc.

b . Freight Traffic Handled, Week Ended 29th February.

The usual weekly returns are enclosed herewith. (Appendices 1 and 2).

4. Coal Consumption.
For your information I enclose a statement of coal consumed for last 10 days in February, and also for the full month. (Appendix 3).

5. Transportation Committee, Sicily.
A further meeting was held in Palermo to-day.

A. Quistberg -

Internal Transportation Sub-Commission, ACC.,
c/o Mov & Tn.,
H.Q., A.C.M.F. (Adm. Echelon),
C.M.F.

Our reference : ACC Tn/16/A/27

Date : 15 March 44.

TO : Regional Commissioner, Region 1.
(for Lt.Col. C.H. Lindberg, Int. Tn. Sub-Commission Representative).

SUBJECT : Weekly Progress Reports.

1. To your weekly progress reports there have been appended, during recent weeks, "Recapitulation of Freight Traffic Handled on Sicilian Railways". These show number of cars and tonnage, under sub-headings "AMG", "Civilian" and "Military", and have been valuable in providing some measure of ebb and flow of traffic.

2. Question arises whether tonnages shown are those of wagons and lading or of lading alone. It would appear that former may heretofore have been case, more particularly since you also show an item of empty cars moved and tonnages, averaging about 7 tons, for each car.

3. The net weight of goods traffic actually moved is truest measure of railway effeciency and it is desired to use net tons as basis of comparison.

4. It is not desired that you make any changes in present method of reporting - since comparison value would be destroyed - until you explain basis of actual figures heretofore shown, and until you are further advised by this office.

5. Please let us have information requested as soon as possible.

E.A. FITCH
Colonel,
Director, Internal Transportation Sub-Commission, ACC.

ALLIED CONTROL COMMISSION
SICILY REGION HQ.
APO 394

1 March 1944

SUBJECT : Progress Report, Week Ended 22 February 1944.

TO : Internal Transportation Sub-Commission, ACC,
c/o Mov. & Tn.,
AFHQ Adv. Adm. Echelon, C.M.F.

1. Coal. The position is more satisfactory. We have 5,000 tons in sight for the western side of the island for March. If no further military traffic develops, this will enable us to move some civilian freight traffic.

For the time being, no passenger service, other than the three workmen's trains (which were re-established on 21 February) can be considered.

Civilian and ACC traffic is being moved under restricted measures.

The demand for civil and rail transportation is considerable, for both passengers and freight, and the political and economic welfare of the island depends on an improvement in rail transportation.

2. Census of Engines and Wagons. I now enclose the summary figures of locomotives and their condition (Appendix 1). The list does not include the locomotives shipped to the mainland.

Appendix 2 shews the Diesel Cars; and Appendix 3 gives a summary of wagons and their condition.

3. Railway Warrant Books. The supply of books was duly received and arrangements have been made for them to be brought into use commencing on 1 March 1944. A further supply of 20 books has been asked for in my cable to you, and I should like to have these as soon as possible.

4. a. Repairs of Railway Buildings, etc.
b. Freight Traffic Handled, Week Ended 22 Feb.

The usual weekly returns are enclosed herewith (Appendices 4 and 5).

File: RTC 463

12 February 1944

SUBJECT: Coal Supply for Railways.

TO : R.C. and M.G. Section.

FOR : Colonel S.A. FITCH, Internal Transportation Sub-Commission, A.C.C.

1. The coal situation in western Sicily is very serious, and on February 11 it was necessary to shut off all civilian traffic. It is essential that certain civilian goods such as food and fuel be moved by rail. There has been a continuous fight on the part of T.C.U.P.W. & Mining Division to move civilian goods, but practically all coal alloted for civilian use has been consumed for military traffic.

2. The following is a brief description of the limited traffic allowed for civilian use:

On 22 November 1943 a limited schedule of passenger and freight service was started. This schedule was approved by IBS and required approximately 2,000 tons of coal per month.

On 9 January 1944 passenger traffic was discontinued in the IBS controlled area, with the exception of three daily local trains into Palermo. These trains carried essential workers, including railroad men. The movement of civilian goods was reduced to include only essentials.

On 11 February all passenger traffic (three daily local trains into Palermo) and all movements of civilian freight were stopped. This condition cannot continue for very long without serious consequence.

In the British controlled portion of the island civilian traffic conditions have been built up and conditions have been such that they have had sufficient coal to move both civil and military traffic. This is one island and one railway system and repeated attempts have been made by T.C.U.P.W. & Mining Division to equalize the civilian traffic on both sides of the island, but to date all attempts have been frustrated. This condition has been emphasized at the last two meetings of the Transportation Committee (Rail) for Sicily, and at previous meetings by Capt. Minard of T.C.U.P.W. & Mining Division.

4072

3. Coal: When civilian traffic was established it was anticipated that we would be able to use our portion of the coal allotment, but early

Declassified E.O. 12356 Section 3.3/NND No. 785021

rail. There has been a continuous fight on the part of T.C.U.P.W. & Mining Division to move civilian goods, but practically all coal alloted for civilian use has been consumed for military traffic.

2. The following is a brief description of the limited traffic allowed for civilian use:

On 22 November 1943 a limited schedule of passenger and freight service was started. This schedule was approved by IBS and required approximately 2,000 tons of coal per month.

On 9 January 1944 passenger traffic was discontinued in the IBS controlled area, with the exception of three daily local trains into Palermo. These trains carried essential workers, including railroad men. The movement of civilian goods was reduced to include only essentials.

On 11 February all passenger traffic (three daily local trains into Palermo) and all movements of civilian freight were stopped. This condition cannot continue for very long without serious consequence.

In the British controlled portion of the island civilian traffic conditions have been built up and conditions have been such that they have had sufficient coal to move both civil and military traffic. This is one island and one railway system and repeated attempts have been made by T.C.U.P.W. & Mining Division to equalize the civilian traffic on both sides of the island, but to date all attempts have been frustrated. This condition has been emphasized at the last two meetings of the Transportation Committee (Rail) for Sicily, and at previous meetings by Capt. Minard of T.C.U.P.W. & Mining Division.

4072

3. Coal: When civilian traffic was established it was anticipated that we would be able to use our portion of the coal allotment, but early in December orders were received to move considerable military traffic from the south side of the island to Palermo, which amounted to 1878 carloads or 35,478 net tons, which consumed approximately 12,500 tons of coal. There was no provision made by the military for extra coal for this move, therefore the coal alloted for civilian traffic had to be used, including all of the small reserves and in addition 5,000 tons of coal that this division salvaged from the sunken ship Modena. A portion of our January coal was used in December, and a portion of our February coal used in January. In January a total of only 1112 tons of coal was used in the IBS controlled portion of the island for civilian traffic. Twice this amount was used for civilian traffic in No. 1 District, the British controlled area. This is a discrimination and has been pointed out by Dr. Tuccio and Lt. Col. C. P. Bolick at previous meetings of the Transportation Committee (Rail). IBS operates 848 Km. of line against

Declassified E.O. 12356 Section 3.3/NND No. 782021

No. 1 District's 467 Km. In other words twice as much coal was used in No. 1 District on civilian traffic with half as much mileage.

4. On 9 February the steamship Stemstead started to discharge approximately 3,000 tons of locomotive coal which would have eased the situation until the end of February, but after discharging 200 tons AFHQ ordered the unloading to be stopped, and the balance of the coal was diverted to other points. So our situation today is that we have little or no coal for either civil or military traffic in the IBS controlled section of the island and it has come to the point where we are endeavouring to use wood for our switch engines, which is entirely unsatisfactory.

Mention in the minutes of the Transportation Committee of 27 December and 10 January brings out the urgency of the coal situation and especially the segregation that should have been made as between civil and military traffic on the west side of the island. The allotment of coal for the west side of the island is 7,000 tons. Of this 3,000 tons is for present normal civil needs, and now that we are not moving any civil traffic a heavy need for civil transportation will be made when service is re-established.

The situation is very serious when we start certain civil traffic and then have to discontinue this service because we cannot use the coal that we are allotted and also are not able to receive the coal we are promised.

The coal situation has been discussed continuously for months and yet we have been forced to live on a day to day supply of coal.

Within the next few days some 300 carloads of flour and/or grain must be distributed from Palermo to the provinces in order to maintain the daily bread ration, which increases the urgency for prompt action to avoid the possibility of food riots.

A. N. HANCOCK,
Lt. Colonel,
Deputy Region Commissioner.

SUBJECT : Coal Supply for Sicilian Railways.

TO : Director, Internal Transportation Sub-Commission, ACC, c/o Mov. & Tn., AFHQ Adv. Adm. Echelon, C.M.S.

1 . Reference your letter dated 15 February (your reference ACC Tn/164/20), which arrived on 21 February.

2 . I agree that a definite allotment of coal for essential civilian passenger and freight services should be made. The difficulty here, however, is that we are unable to get a definite statement from I&S, on their requirements for military traffic. We, therefore, get what is left! We do not operate civil or military freight trains seperately on the west side of the island. To save coal, the trains are mixed.

3 . The minimum requirement of coal for civilian trains for the entire island is 4,295 tons per month. The figure is based on the past percentages of passengers and freight handled.

4 . The allotment for Sicily civilian traffic should be 5,000 tons per month, which gives us 705 tons a month for emergencies and building up a reserve. Our estimate for present military traffic is 5,000 tons a month, making a grand total of 10,000 tons per month.

5 . In the weekly progress report, I will, in future, shew the coal consumed by engines working passenger and civilian trains. However, as we run freight trains mixed, viz, military and civilian traffic, we will work out our figure on the percentage of each.

18 February 1944

SUBJECT : Coal Position in Sicily.

TO : Chief, Internal Transportation Sub-Commission,
ACC. Attached Mov. & Tn., Adv. Adm. Sch., AFHQ.

1. Further to my letter dated 14th inst., Major Reeve has arrived in Palermo to-day, and the first task he is doing is to ascertain exactly how much coal is being carried by the S.S. "Janet Lord Roper", as neither he, nor Mov. Catania, nor Mov. IBS, have been given any information whatever as to the amount of coal on board. He has arranged to send someone on board immediately she shews up in order to get possession of the manifest. She is expected to arrive Palermo late to-day, 18th. Major Reeve is apparently rather handicapped, as he has to work in the dark and receives very little, or no, forward information from AFHQ as to what coal is expected. The case of the S.S. "Stemstead" was an example, as it was only by sight of a telegram in "Q" Movements office at Catania that he discovered that she had been moved from Palermo to Brindisi, and the Coal Section in Sicily had not been consulted.

2. When the matter was taken up, the excuse was given "Operational Requirements". This morning, Major Reeves finds from IBS that they also had "Operational Requirements" on this island, viz. IBS were removing 3,000 tons ammunition by rail to Palermo on instructions from Naples.

3. I consider that both Major Reeve and I should be given prior information of these moves by IBS. Had Major Reeve known, he could then have put up an even stronger case for the use of the whole of the 3,000 tons of coal in the S.S. "Stemstead".

4. I feel that there is only one solution to the difficulties which continually arise on this side of the island, and that is, that the coal should be unloaded in Palermo, in exactly the same way as in Catania; viz., as soon as a steamer arrives, the coal is unloaded directly to those for whom it is destined. In Catania, coal assigned to the Power Station goes direct to the Power Stat-

Reeve has arrived in Palermo to-day, and the first task he is doing is to ascertain exactly how much coal is being carried by the S.S. "Janet Lord Roper", as neither he, nor Mov. Catania, nor Mov. IBS, have been given any information whatever as to the amount of coal on board. He has arranged to send someone on board immediately she shews up in order to get possession of the manifest. She is expected to arrive Palermo late to-day, 18th. Major Reeve is apparently rather handicapped, as he has to work in the dark and receives very little, or no, forward information from AFHQ as to what coal is expected. The case of the S.S. "Stemstead" was an example, as it was only by sight of a telegram in "Q" Movements office at Catania that he discovered that she had been moved from Palermo to Brindisi, and the Coal Section in Sicily had not been consulted.

2 . When the matter was taken up, the excuse was given "Operational Requirements". This morning, Major Reeves finds from IBS that they also had "Operational Requirements" on this island, viz. IBS were removing 3,000 tons ammunition by rail to Palermo on instructions from Naples.

3 . I consider that both Major Reeve and I should be given prior information of these moves by IBS. Had Major Reeve known, he could then have put up an even stronger case for the use of the whole of the 3,000 tons of coal in the S.S. "Stemstead".

4 . I feel that there is only one solution to the difficulties which continually arise on this side of the island, and that is, that the coal should be unloaded in Palermo, in exactly the same way as in Catania; viz., as soon as a steamer arrives, the coal is unloaded directly to those for whom it is destined. In Catania, coal assigned to the Power Station goes direct to the Power Station, that for the Railways is unloaded overside into the Railway wagons and goes to the Railway Yards in the area, and that for Industry goes into the ACC Stockyard, and that for the Army is taken over by the RASC. Thus, each type of consumer receives his full allotment of coal, and is responsible to Major Reeves that his consumption is within the limits laid down and his stock at the month-end is comparable with the amount he should have.

S E C R E T

Declassified E.O. 12356 Section 3.3/NND No. 782021

5 . Here in Palermo, IBS still insist on receiving all coal and issuing it to the various consumers, as they (IBS) see fit. This is done, although when a steamer is due, Major Reeves issues a complete break-down (allotment) with copy to all concerned, shewing how much coal ex the ship is due to the various consumers.

6 . Since writing the above, Major Reeves has received copy of the Manifest, and has instructed IBS that the coal on this steamer allocated to the Railways is all that contained in Holds nos. 1, 2, and 3, totalling 5,678 tons. The position, therefore, including the steamer, is as follows:

Stock on hand, 31 January:	3,958	tons.
Ex S.S. "Stemstead":	259	"
Railed from Catania:	1,000	"
"Janet Lord Roper":	5,678	"
TOTAL:	10,895	"

This gives approximately 11,000 tons, which should take us into the second half of March, provided that IBS do not again claim the coal, without warning, for "Operational Moves".

7 . I would add that Major Reeve has also allocated 1,000 tons of coal ex this steamer for Power Plant, and Lt. Col. Bolick agrees that this will see them through until the end of March.

8 . In addition, he has allocated 1,350 tons to Industries, which, together with their stock on 1 February, should cover them comfortably till the latter half of March.

9 . With the above more satisfactory position, it is hoped that we shall be in a position to re-instate the three workmens' trains as soon as possible which, as related to you, we had to cut out. The question of re-instating skeleton freight and passenger schedules will also be carefully considered.

SUBJECT : Progress Report, Week Ended 16 February 1944.

TO : Chief of Int. Tn. Sub-Commission, ACC,
c/o Mov. & Tn., Adv. Adm. Echelon, C.M.F.

1. Coal Situation. The coal position was fully reported on to you in my two letters dated 14th and 18th inst.

In view of the improved position at present, and of better prospects in the future, it was decided to reinstate the three workmens' trains out of Palermo daily, commencing yesterday, 21st inst. This has given great satisfaction to all concerned.

Practically no civilian freight traffic is being moved on the west side of the island, but schedules are again being considered, and provided the coal arrives as arranged by Major Reeve, and the military requirements are not increased, the proposed schedules may be put into effect in about a week's time. Owing to suspension of service, there is now an accumulation of civilian freight traffic to be moved.

ACC has about 200 wagon loads of food stuffs to be moved.

2. Transportation Sub-Committee, Sicily. Another meeting was held in Palermo yesterday, 21st inst.

3. Census of Engines and Wagons. We recently had a census of engines and wagons taken throughout Sicily, giving details of (1) number now in working order; (2) number requiring light repairs; and (3) number requiring heavy repairs. The wagon figures shew the various types, viz. covered, flat, open, etc.. also how many German wagons there are. The locomotive figures give the various types. I am preparing a summary and will send you a copy.

4. Locomotive and Rolling Stock Repairs. I have previously sent you figures shewing what repairs are being carried out on the west side of the island. I now enclose statement for week ended 12th February, giving details of

ALLIED CONTROL COMMISSION
SICILY REGION HQ.
AFO 394

12 February 1944

Ref. CRS 463

SUBJECT: Coal Supply for Railways.

TO : R.C. and M.G. Section.

FOR : Colonel C.A. PITCH, Internal Transportation Sub-Commission, A.C.C.

1. The coal situation in western Sicily is very serious, and on February 11 it was necessary to shut off all civilian traffic. It is essential that certain civilian goods such as food and fuel be moved by rail. There has been a continuous fight on the part of T.C.U.P.W. & Mining Division to move civilian goods, but practically all coal allotted for civilian use has been consumed for military traffic.

2. The following is a brief description of the limited traffic allowed for civilian use:

On 22 November 1943 a limited schedule of passenger and freight service was started. This schedule was approved by CCS and required approximately 2,000 tons of coal per month.

On 9 January 1944 passenger traffic was almost used in the Lst controlled area, with the exception of three daily local trains into Palermo. These trains carried essential workers, including railroad men. The movement of civilian goods was reduced to include only essentials.

On 11 February all passenger traffic (three daily local trains into Palermo) and all movements of civilian freight were stopped. This condition cannot continue for very long without serious consequence.

In the British controlled portion of the Island civilian traffic conditions have been built up and conditions have been such that they have had sufficient coal to move both civil and military traffic. This is one island and one railway system and repeated attempts have been made by T.C.U.P.W. & Mining Division to equalize the civilian traffic on both sides of the Island, but to date all attempts have been frustrated. This condition has been emphasized at the last two meetings of the Transportation Committee (Med) for Sicily, and at previous meetings by Capt. Minard of T.C.U.P.W. & Mining Division.

4050

3. Coal: When civilian traffic was established it was anticipated that we would be able to use our portion of the coal allotment, but early in December orders were received to move considerable military traffic [illegible] to Palermo, which amounted to 1000 car-

rail. There has been a continuous fight on the part of T.C.R.R. Mining Division to move civilian goods, but practically all coal alloted for civilian use has been confined for military traffic.

2. The following is a brief description of the limited traffic allowed for civilian use:

On 22 November 1943 a limited schedule of passenger and freight service was started. This schedule was approved by CCS and required approximately 2,000 tons of coal per month.

On 9 January 1944 passenger traffic was discontinued in the BC controlled area, with the exception of three daily local trains into Palermo. These trains carried essential workers, including railroad men. The movement of civilian goods was reduced to include only essentials.

On 11 February all passenger traffic (three daily local trains into Palermo) and all movements of civilian freight were stopped. This condition cannot continue for very long without serious consequence.

In the British controlled portion of the island civilian traffic conditions have been built up and conditions have been such that the have had sufficient coal to move both civil and military traffic. This is one island and one railway system and repeated attempts have been made by T.C.M.R.R. & Mining Division to equalize the civilian traffic on both sides of the island, but to date all attempts have been frustrated. This condition has been emphasized at the last two meetings of the Transportation Committee (Rail) for Sicily, and at previous meetings by Capt. Minard of T.C.M.R.R. & Mining Division.

4050

3. Coal: When civilian traffic was established it was anticipated that we would be able to use our portion of the coal allotment, but early in December orders were received to move considered military traffic from the south side of the island to Palermo, which amounted to 107 carloads or 10,470 net tons, which consumed approximately 12,000 tons of coal. There was no provision made by the military for extra coal for this move, therefore the coal alloted for civilian traffic had to be used, including all of the small reserves and in addition 5,000 tons of coal that this division salvaged from the sunken ship Modena. A portion of our January coal was used in December, and a portion of our February coal used in January. In January a total of only 111 tons of coal was used in the BC controlled portion of the island for civilian traffic. Twice this amount was used for civilian traffic in No. 1 District, the British controlled area. This is a discrimination and has been pointed out by Dr. Tuccio and Lt. Col. C. K. Bolick at previous meetings of the Transportation Committee (Rail). TBC operates 348 Km. of line against

District's 407 km. other words twice as muc coal was used in district on civilian traffic with half as much mileage.

On 9 February the steamship Stanstead started to discharge approximately 3,000 tons of locomotive coal which would have eased the situation until the end of February, but after discharging 200 tons AFHQ ordered the unloading to be stopped, and the balance of the coal was diverted to other points. So our situation today is that we have little or no coal for either civil or military traffic in the ISS controlled section of the island and it has come to the point where we are endeavouring to use wood for our switch engines, which is entirely unsatisfactory.

Mention in the minutes of the Transportation Committee of 27 December and 10 January brings out the urgency of the coal situation and especially the segregation that should have been made as between civil and military traffic on the west side of the island. The allotment of coal for the west side of the island is 7,000 tons. Of this 3,000 tons is for present normal civil needs, and now that we are not moving any civil traffic a heavy need for civil transportation will be made when service is re-established.

The situation is very serious when we start certain civil traffic and then have to discontinue this service because we cannot use the coal that we are allotted and also are not able to receive the coal we are promised.

The coal situation has been discussed continuously for months and yet we have been forced to live on a day to day supply of coal.

Within the next few days some 300 carloads of flour and/or grain must be distributed from Palermo to the provinces in order to maintain the daily bread ration which increases the urgency for prompt action to avoid the possibility of food riots.

A. N. HANCOCK,
Lt. Colonel,
Deputy Region Commissioner.

Our reference : ACC Tn/16A/20

Date : 18 Feb 44.

TO : Lt. Col. O.H. Lindberg, Int. Tn. Sub-Comm. Representative,
H.Q., Region I, Sicily.

SUBJECT : Coal Supply for Sicilian Railways.

1. Reference your letter dated 14 Feb 44.

2. The necessary action has been taken to expicite coal arrivals. In order to avoid re-occurences of serious shortages, a definite monthly allotment of coal for essential civilian passenger and freight services should be made. To obtain an allotment proof must be submitted that the greatest economy is exercised in the operation of civilian trains.

3. As a basis for determining the allotment an estimate of the amount of coal necessary to operate the minimum essential civilian trains per month is required. This estimate should be accompanied with an indication of what trains, from the latest time-table, are used in arriving at the amount.

4. Be sure the estimate is only the required amount. Show by seperate figures your recommendations as to the extra amount for emergencies and for building up reasonable stocks., and for military requirements.

5. In order for this office to fully justify coal consumption, show in your weekly reports the number and kinds of civilian trains operated(from,to) and the total amount of coal consumed by same.

S.A. FITCH,
Colonel,
Director, Internal Transportation Sub-Commission, ACC.

14 February 1944

SUBJECT: Coal Position in Sicily

TO : Chief of Internal Transportation Sub-Commission, A.C.C., attached Movement and Transportation.

1. I have to report that during the last few days, the coal position has again become serious.

2. On the 9th Inst., I discussed the question with Major Reeve, Catania, and was convinced that our position up to the end of February would be satisfactory. However, the S.S. "Stemstead" which was discharging 3000 tons of railway coal at Palermo on the 9th Inst. was stopped, on orders from A.F.H.Q., after discharging about 200 tons, and the balance was ordered to be diverted to other points.

3. On this account it was necessary to cancel our 3 workmen's trains into Palermo as from the 12th Inst. These trains convey railway workmen and others on essential work. All civilian freight traffic on the west side of the Island has been stopped. In order to try to obtain some relief, arrangements wre made with "Q" movements, Catania, for 1000 tons of coal to be loaded and sent by rail to this side of the island, and it is expected that 500 tons will arrive today. This will slightly ease the position. I discussed the matter with Lt. Colonel Hancock (Assistant to Col. Poletti) yesterday and again today and I phoned Major Reeve this morning, and the latter has promised to come and see me tomorrow.

4. I have already reported to you how I.B.S. recently moved 1878 wagon loads of coal weighing 35,478 tons which consumed about 12,500 tons, and no provision was made by them for extra coal, and therefore the coal allotted for civilian traffic had to be used. This was the reason why we had to dip into the February coal in January, which I agree is most undesirable.

5. It is fully appreciated by me how important it is just at this period of the hand over, that the population should not be in a position to say that as soon as the government takes over, then their trains are cancelled.

6. I gathered from Major Reeve today that another boat

4034

Declassified E.O. 12356 Section 3.3/NND No. 785021

with 3000 tons of coal will arrive in the near future, part of which will be for railway use.

7. There will be about 300 wagon loads of food stuffs to be sent to various points on the Island by A.C.C. before the end of February, so it is therefore all the more important to get more coal quickly. I hope to discuss all these and other points, with Major Reeve tomorrow, and will them write to you again, but I wanted you to know the seriousness of the situation as soon as possible.

O.H. Lindberg

7 February 1944

SUBJECT : Progress Reports.

TO : Chief of Internal Transportation Sub-Commission, ACC, c/o Movement and Transportation, Advanced Administrative Echelon, C.M.F.

1 . I acknowledge receipt of your letter (your reference ACC Tn/16 A/16).

2 . I enclose progress report for week ending 2 February 1944.

3 . Coal Position. I am glad to say the coal situation is improving. I have again seen Major Reeve, who informs me 3,000 tons will arrive to-day, and this will meet requirements, with the stocks we have, up to the end of February. The movement of ammunition from Licata to Palermo, which has used so much coal, is about complete. Nevertheless Major Reeve has asked for 7,000 tons for both March and April for the west side of the island, giving us an estimated surplus stock of 4,000 tons on the two months, in case of emergency. This will be held strictly in reserve against any contingency which might arrive. For your information, the difficulty which arose was due to IBS moving 1,878 wagon loads of ammunition which weighed 35,477 tons, without first investigating if there were sufficient stocks of coal on hand, or in view, to cover this extra traffic. I attach a statement (Appendix No. 1) shewing the coal consumption for the last 10 days of January. I will watch the position daily.

4 . Locomotive Repairs. In Palermo we have a repair shop, where about 100 men are employed. The type of work done consists of fitting new brasses, boiler washing, boiler repairs, such as gauge locks, water glass locks and rods

4032

Declassified E.O. 12356 Section 3.3/NND No. 785021

are overhauled. Four engines were rebuilt in January.

There is also the Navy Yard, where heavy repairs are done. This shop handles all new fireboxes, change of wheels and cylinders, and frame overhauls. There are 43 men employed, and in the last two months, three damaged engines have been turned out like new ones and another is expected in a few days time. At present there are four locomotives undergoing repairs in this shop.

Then there is the small roundhouse at Caltanissetta, where light repairs are also done, such as bearings repaired, and boiler repairs. There are about 30 men employed there.

The Roundhouse in Palermo employs about 100 men, and work such as boiler leaks, running repairs, etc. is done there.

I quote typical repairs:

(1) A frame and all parts of an engine, except boiler and cylinders. A boiler and cylinders were taken from another disabled engine, and one good engine was turned out.

(2) A pair of cylinders taken off a bombed engine and used.

(3) Injectors, air pumps and other parts are being salvaged from bombed engines and these are being overhauled and used on good locomotives.

5 . Another meeting of the Transportation Committee (Sicily) was held to-day.

6 . I enclose the other uaual weekly details.

A. P. Rinsberg.
Lt. Col.
Int. Tn. Sub-Comm. Rep.
at Palermo.

My Ref. L/18/F.

28 January 1944.

16A/18

SUBJECT: Train Schedule in Operation, SICILY

TO : Chief of Internal Transportation Sub-Commission, A.C.C.,
c/o Movement and Transportation,
Advanced Administrative Echelon, C.M.F.

1. Your letter dated 20th inst (your ref. ACC Tn/16A/13) and the two charts were received yesterday.

2. I agree that a comparsion of the two charts indicates that Sicily is provided with the greater service, but actually the civilian trains shewn have not run, owing to shortage of fuel, and military demands by I.B.S.

On account of Palermo having been built up again, it was also found that ~~since~~ the workmen's trains could be reduced to one per day in three directions, viz: to TERMINI to PARTINICO (broad guage) and to CORLEONE (narrow guage).

3. It is expected that the I.B.S. military traffic will decrease about the middle of February, which should ease the coal situation.

4. I should point out that the scheduled civilian freight trains are not exclusively used by them, as military traffics are conveyed on each train. For example:

> Civilian Freight Train No. 7343 on 31st Dec. from Caltanissetta to Palermo was 50% military and 50% civilian, and on 29th Dec., the same train conveyed 100% military traffic.

Kindly refer to Progress Reports, which shew the percentage each week.

5. I enclose copy of a memorandum, prepared by the Sicialin Railways Director shewing what he considers the minimum civilian traffic in Western District of Sicily.

6. I note your remakrs in paragraph 3 of your letter, and your instructions are being carried out.

O. H. Lindberg 1/18

O. H. LINDBERG,
Lt. Colonel,

SUBJECT : Progress Report - Week ended 23 January 1944.

TO : Chief of Internal Transportation Sub-Commission, ACC, Attached Movement & Transportation, Advanced Administrative Echelon, C.M.F.

1 . I enclose another progress report.

2 . As regards the coal situation, I am sending you copy of a Memorandum made by Capt. Matson for Lt. Col. Bolick. You will see in my letter of 28th inst., under the heading of Train Schedule in Operation, Sicily, that all civilian trains have been cut out, except three workmen's trains a day.

3 . Another meeting of the Transportation Sub-Committee was held in Palermo last Monday, 24th inst.

4 . As regards the Traffic Handled Statement enclosed, you will notice that the civilian and AMG traffic is only 6% of the total traffic handled in the island.

5. I enclose details of repairs to rolling stock.

O.H. LINDBERG
Lt. Col.
Internal Transportation Sub-Commission A.C.C.

(Copy for Col. Filth.)

26 January 1944

SUBJECT: Coal

TO : Lt.Col.BOLICK

1. Our present allottment of coal for the entire Island is 7050 tons per month.

2. Our allowance is insufficient. Therefore, Major Reeves has agreed to endeavor to increase our allowance to 10000 tons but this has not yet been approved.

3. The consumption of coal for ten days prior to Jan. 21 was:

CIVILIAN PASSENGER	CIVILIAN FREIGHT	MILITARY	TOTAL
348	259	2 863	3562

On this basis our January monthly consumption will be:

1020	1077	8589	10686

4. The reason that we have been able to burn more than our allottment of coal is because we have been able to salvage approximately 5000 tons of coal from bombed ships but this source of supply is practically exhausted.

5. More than our entire allottment of coal is being consumbed for military traffic, for example, IBS has estimated their requirements at 4000 tons per month but they are actually using 5667 tons per month.

6. Actual consumption of coal during December while we had Island passenger traffic and reasonable movement of goods was:

CIVILIAN PASSENGER	CIVILIAN FREIGHT	MILITARY	TOTAL
3110	1873	7348	12331

Considerable of our January allottment was drawn in December and we started to draw on our February allotment on January 24th. It is very desireable that we be furnished 12500 tons per month for the operation of the rail lines of Sicily.

7. At present all civilian and AMG goods are embargoed except foods and fuels. No thru passenger trains are being

Declassified E.O. 12356 Section 3.3/NND No. 780021

2. Our allowance is insufficient. Therefore, Maj. Reeves has agreed to endeavor to increase our allowance to 10000 tons but this has not yet been approved.

3. The consumption of coal for ten days prior to Jan. 21 was:

CIVILIAN PASSENGER	CIVILIAN FREIGHT	MILITARY	TOTAL
348	259	2 863	3562

On this basis our January monthly consumption will be:

1020	1077	8589	10686

4. The reason that we have been able to burn more than our allottment of coal is because we have been able to salvage approximately 5000 tons of coal from bombed ships but this source of supply is practically exhausted.

5. More than our entire allottment of coal is being consumbed for military traffic, for example, IBS has estimated their requirements at 4000 tons per month but they are actually using 5667 tons per month.

6. Actual consumption of coal during December while we had Island passenger traffic and reasonable movement of goods was:

CIVILIAN PASSENGER	CIVILIAN FREIGHT	MILITARY	TOTAL
3110	1873	7348	12331

Considerable of our January allottment was drawn in December and we started to draw on our February allotment on January 24th. It is very desireable that we be furnished 12500 tons per month for the operation of the rail lines of Sicily.

7. At present all civilian and AMG goods are embargoed except foods and fuels. No thru passenger trains are being operated. Three commute passenger trains are operated daily into Palermo for short distances only.

8. It is very necessary to the economy of the Island that we have throughout sufficient fuel to operate a skeleton passenger service the Island and a more free movement of goods. The 10000 that we have been promised is not sufficient but even with this amount the situation would be relsived if we were permitted to use our portion which is divided As follows

	CIVILIAN	MILITARY	TOTAL
I.B.S.	3000	4000	7000
Dist.N°1	2000	1000	3000
Total	5000	5000	10000

ALLIED MILITARY GOVERNMENT
SICILY REGION HEADQUARTERS
APO 394

MEMORANDUM: January 22, 1944

TO : Lt.Col. Lindberg.

1. There is no improvement in the coal situation. We have in sight for all traffic for the balance of January approximately 110 tons per day which we are salvaging from the bombed ship Modena. It may be necessary to draw on our February allotment to handle Military Traffic.

2. No passenger trains are being operated except a very few workers trains.

3. Civil freight is still embargoed except foods and fuels.

4. A very heavy movements of ammunition is now being moved from Licata to Palermo. This requires us to hold civil traffic to an absolute minimum and this movement will continue for at least two weeks.

Peter G. Matson

Internal Transportation Sub-Commission, ACC.,
C/o Gov't Fr.,
AFHQ Advanced Administrative Echelon,
A.P.O.7.

Our reference : ACC Fr/Ital/16

Date : 30 Jan 44.

TO : Lt.Col. C.H. Lindberg,
Internal Transportation Sub-Commission Representative,
HQ., ACC.,
PALERMO.

SUBJECT: Progress Reports (Sicily) weeks ending 8 and 15 Jan 44.

1. Reference your letters 17 and 24 Jan 44, embodying above-mentioned reports.

2. Your paras 7, both letters, refer to coal situation which manifestly requires strictest attention. Please see our letter to you, 20 Jan 44 ref. ACC Fr/Ital/20 which pointed out need for conservation. Your statement in letter 24 Jan 44, that it may be necessary to draw on February allotment is one of concern; such overdraft policy is very undesirable. Expanding operations on mainland will require more coal and it is essential that the use of coal everywhere be confined to meeting vital needs only. Every conservation measure should be put into effect; in addition to train cancellation: no more locomotives should be kept under steam than military and absolute minimum civil trains require, and railway officials should take measures to ensure coal is not lost or pilfered. Other measures may be developed in conversations with railway officials, but none should be left untried in most serious situation.

3. As matter of information only, we ask whether reductions in train service have been followed by reduction of number of drivers, firemen and trainmen. Could any of these employees be used to advance reconditioning of locomotives? Increasing numbers of steam locomotives will undoubtedly be urgently needed on mainland, so every potentially serviceable unit in Sicily should be put in order promptly. It would seem every suitable man on payrolls, now not profitably engaged, should be used in this work. Your para 2, of 17 Jan is pertinent and indicates some action.

4. What is being done to assemble battle damaged or otherwise unserviceable locomotives at Palermo or other central points for repair? If any units are too badly damaged to justify repairs

Declassified E.O. 12356 Section 3.3/NND No. 785021

1. Reference your letters 1/ and 24 Jan 44, enclosing above-mentioned reports.

2. Your paras 1, both letters, refer to coal situation which manifestly requires strictest attention. Please see our letter to you, 20 Jan 44 ref. AFC In/16/22 which pointed out need for conservation. Your statement in letter 24 Jan 44, that it may be necessary to draw on February allotment is one of concern: such overdraft policy is very undesirable. Expanding operations on mainland will require more coal and it is essential that the use of coal everywhere be confined to meeting vital needs only. Every conservation measure should be put into effect: in addition to train cancellation: no more locomotives should be kept under steam than military and absolute minimum civil traffic require, and railway officials should take measures to insure coal is not lost or pilfered. Other measures may be developed in conversations with railway officials, but none should be left untried in most serious situation.

3. As matter of information only, we ask whether reductions in train service have been followed by reduction of number of drivers, firemen and trainmen. Could any of these employees be used to advance reconditioning of locomotives? Increasing numbers of steam locomotives will undoubtedly be urgently needed on mainland, so every potentially serviceable unit in Sicily should be put in order promptly. It would seem every suitable man on payrolls, now not profitably engaged, should be used in this work. Your para 2, of 17 Jan is pertinent and indicates some action.

4. What is being done to assemble battle damaged or otherwise unserviceable locomotives at Palermo or other central points for repair? If any units are too badly damaged to justify repairs at this time, many parts might be useful in repairs to other less severely damaged units.

3997

5. Major points herein, i.e. coal conservation and furnishing more locomotives for mainland are referred to in some detail, as suggestions for your active exploitation. Repairs to line and basic structures, particularly those requiring use of materials in short supply, must only be undertaken to meet vital needs.

Colonel,
Internal Transportation Sub-Commission, AFC.

HEADQUARTERS
ALLIED MILITARY GOVERNMENT
(Rear Detachment)
APO 394

24 January 1944.

SUBJECT: Progress Report, week ended 16th January 1944

TO : Chief of Internal Transportation Sub-Commission, A.C.C.,
Attached Movement and Transportation,
A.F.H.Q. Advanced Administrative Echelon, C.M.F.

I enclose Progress Report for week ended 16th inst.

1. There is no improvement in the coal situation. It may be necessary to draw on our February allotment in order to handle Military Traffic.

2. No passenger trains are being operated, except a few workmen's trains.

3. Civil freight is still embargoed, except food and fuels.

4. A very heavy movement of ammunition from LICATA to PALERMO is now taking place, and it will probably continue during the next two weeks. This is another reason for the civilian traffic to be held to an absolute minimum.

5. There is nothing new to report on the Mechanical Dept., except one more repaired locomotive will be turned out, after heavy repairs, from the Navy Yard Shop.

6. An inspection is being made of all tool wagons in the Island, as it is anticipated that some will be asked for on the Mainland in the near future.

O. H. Lindberg

O. H. LINDBERG,
Lt. Colonel,
Int. Tn. Sub-Commission,
Rep. at Hq AMG.

My Ref. L/16/F.

16 P/14

HEADQUARTERS
ALLIED MILITARY GOVERNMENT
(Rear Detachment)
APO 512

17 January 1944.

SUBJECT: Progress Report, week ended 9th January 1944

TO : Chief of Internal Transportation Sub-Commission, A.C.C.
Attached Movement and Transportation
A.F.H.Q. Advanced Administrative Echelon, C.M.F.

I enclose Progress Report for week ended 9th January. It is a few days late on account of my recent visit to Naples.

1. The coal situation is still serious, and some passenger trains have been cancelled, and workmen's trains have been cut to an absolute minimum.

All civilian freight has been embargoed except foods and fuels.

I.B.S. has requested that the permit system be re-established for civilian freight traffic, and this is now being arranged.

2. The Locomotive repair shop in the Navy Yard was opened last week, and men are being returned to work.

Two Locomotives were turned out last week.

3. I send you a list of repair work performed at the various stations, and will continue to send this information, if you so wish.

O. H. Lindberg.

O. H. LINDBERG,
Lt Colonel,
Rep. Int. Tn. Sub-Com.

Incl-1

Internal Transportation Sub-Commission, ACC.,
C/o Mov & Tn.,
AFHQ Advanced Administrative Echelon,
C.M.F.

Our reference : ACC Tn/16A/20

Date : 20 Jan 44.

TO Lt.Col. O.H. Lindberg,
Internal Transportation Sub-Commission representative,
at Palermo.

SUBJECT: Train Schedule in operation - Sicily.

1. Reference your L/15 dated 1 Jan 44 (received here 13 Jan 44), and the enclosed two charts of civil train schedules, namely, one for Sicily based on timetable dated 27 Dec 43, and the other for southern Italy.

2. A comparison of the two charts indicates that the service provided for Sicily is much greater than that for the mainland, both as regards civil passenger and freight services.

3. You will be aware from previous communications that the use of railway facilities, including fuel for power and traction which will always be in short supply, must be limited to hauling traffic for the Allied Governments, plus such minimum of civil traffic as is necessary to the life of the community and essential war industry. The civil passenger and freight train service on the mainland has been framed accordingly.

4. As there is no great difference commercially, industrially, and topographically between Sicily and the south of Italy, it would appear that the civil train service for Sicily is more than the circumstances referred to in para 3 above justify.

5. Please consult all concerned and let me have your comments as early as possible and at the same time return the enclosed charts to this office.

Colonel,
Chief of Internal Transportation Sub-Commission, ACC.

3970

Declassified E.O. 12356 Section 3.3/NND No. 782021

DRAFT

164/12

TO: Internal Transportation Sub-Commission representative at Palermo.
(For Lt.Col. Lindberg.)

SUBJECT: Train Schedule in operation in Sicily.

1. Enclosed are two charts of train schedules, one for Sicily based on the ~~small booklet~~ time table dated 27/12/1943 and the other on the proposed basic schedule for southern Italy.

2. In comparing these two charts, several items ~~seem to be~~ are worthy of mentioning.

(a) Much heavier flow of traffic is provided for Sicily (both passenger and goods).

(b) Trains are not scheduled for movement in Southern Italy on Sundays.

(c) To date, it has not yet been possible to bring the train service up to the basic schedule on the mainland whereas the chart shows the trains actually in operation ~~for~~ in Sicily.

3. Commercially, industrially, and topographically the two sections are quite similar. It would therefore, seem that the transportation requirements would also be similar.

4. Fuel for operating must be imported for both of the sections and is necessarily limited. It does not appear reasonable that one should be given preference at the expense of the other.

5. It is probably that the supply of fuel and railroad operating materials (equipment) will become more acute as the armies advance northward. It is not beyond the realms of possibility that schedules, at present thought absolute minimum, will need to be further curtailed. It is therefore, important that only "bare necessity" be the basis on which train schedules are made up.

3969

6. Please look over these charts and return same to this office together with whatever comments you wish to make.

Declassified E.O. 12356 Section 3.3/NND No. 782021

south^ern Italy.

2. ~~By~~ comparing these two charts, several items ~~seem to be~~ are worthy of mentioning.

(a) Much heavier flow of traffic is provided for Sicily (both passenger and goods).

(b) Trains are not scheduled for movement in South^ern Italy on Sundays.

(c) To date, it has not yet been possible to bring the train service up to the basic schedule on the mainland whereas the chart shows ^the trains actually in operation ~~for~~ in Sicily.

3. Commercially, industrially, and topographically the two sections are quite similar. It would therefore, seem that the transportation requirements would also be similar.

4. Fuel for operating must be imported for both of the sections and is necessarily limited. It does not appear reasonable that one should be given preference at the expense of the other.

5. It is probable that the supply of fuel and railroad operating materials ^equipment will become more acute as the armies advance northward. It is not beyond the realms of possibility that schedules, at present thought absolute minimum, will need to be further curtailed. It is therefore, important that only "bare necessity" be the basis on which train schedules are made up.

3969

6. Please look over these charts and return same to this office together with whatever comments you wish to make.

THRO' HHQ COMMS SEC

My Ref. L/15. 495

Rec'd 1600 13 Jan 44

HEADQUARTERS
ALLIED MILITARY GOVERNMENT
(Rear Detachment)
APO 512

1 January 1944.

SUBJECT: Sicily Railways. Timetables

TO : Chief of Internal Transportation Sub-Commission, A.C.C.
Attached Movement and Transportation
A.F.H.Q. Advanced Administrative Echelon, C.M.F.

1. I send you a timetable of all trains in Sicily, which came into operation on 27 December 1943.

2. The types of trains are shewn by figures as under:

Broad Gauge

Through Passenger Trains.	Four figures	commencing	with	figure	2,	viz.	2952
Slow " "	"	"	"	"	4,	"	4941
Freight Trains.	"	"	"	"	7,	"	7354
Diesel Cars.	Three	"	"	"	4,	"	402

Narrow Gauge

Passenger Trains.	Three	"	"	"	1,	"	190
Freight "	"	"	"	"	2,	"	207

3. If you would care to have another copy of the timetable, I will obtain one and send it to you.

O. H. Lindberg.

O. H. LINDBERG,
Lt Colonel,
Int. Tn. Sub-Com. Rep. at
Hq AMG.

1 Enclos.

16/12/43

HEADQUARTERS
A.M.G., PALERMO

L/114/e1/16/12/43.

TO : Chief of Internal Transportation Sub-Commission, Attached Movement & Transportation, A.F.H.Q. Advanced Administrative Echelon, C.M.F.

FROM : Lt. Col. O.H. Lindberg, Internal Transportation Sub-Commission Rep. at H.Q. A.M.G.

SUBJECT : Weekly Traffic Returns, Sicily Railway.

DATE : 16 December 1943.

1. I attach copies of some weekly Railway traffic returns, which are produced by the Sicily Region Rail Transportation Officer.

2. If you wish, I will send for these returns each week. You will be interested to know that the coal supply for Railways in Sicily is being reduced from approximately 10,000 tons to 7,500 tons per month. This means that the civilian passenger train services will have to be reduced, and also certain civilian goods traffic will be embargoed, forthwith.

3. Moreover, up to the present, only full wagon loads of goods traffic have been accepted for dispatch, and it was hoped that part-loads would be accepted in the near future, but the reduction in coal allowance will mean a continuation of full wagon loads only being accepted.

Received 17 Dec 1943

O.H. Lindberg

Lt. Col.
Internal Transportation Sub-Commission
Representative at H.Q. A.M.G.
