SUBJECT : Solvay Plant Resignane.

TO : D.M.R.S.I. - Blag.

1. The Solvay plant requires approximately 200 tons of coal per day to move from Guincarico to Resignane.
2. This tonnage has not been moving as fast as required and it is desired that the Solvay plant handle the coal with their own hopper cars and the I.S.R. locomotives and crews that are assigned to them for the movement of rock.
3. It would mean that the crews serving the Solvay plant would make a trip to Guincarico about three times per week, taking a cut of empty hoppers down and returning with a cut of loaded cars.
4. The operation would relieve other main line trains of this work and your approval of the plan is solicited.

Rail Division.

1. Reference your AC/155/Tn 4 dated 10 April '45.
2. Attached copy of letter received from Capt. Dean
AC Transportation Officer, Rome is forwarded for
your information.
3. Industry Sub-Commission confirms that the daily tonnage
of stone to be moved from S. Vincenzo to Rosignano will
be approx 500 tons, this being the amount of raw
material required to produce the maximum finished
article. In the circumstance no information is
immediately available regarding the number of Hoppers
that can be released, but a report will be furnished
by Industry Sub-Commission following a visit to the
works by Dr. Apatowski early next week.
4. The question of line capacity for this movement will
undoubtedly be raised by G-4 (Mov & Tn). Please
state, therefore, whether the engines now allocated
to these works could carry out this movement, the
tonnage to be considered additional to the normal
line capacity.

Subject. STONE - S. Vincenzo to Rosignano

Transportation Sub/Comm. (Mov)
HQ, A.C.

Application has been made by the Station Master at S. Vincenzo for permission to arrange transport of stone from his station to the Solvay plant at Rosignano, using the private wagons of that Company.

No mention has been made as to the tonnage involved, but on enquiry of Dr. Opatowski of Industry Sub. Comm. I gather that they require to move 500 (five hundred) tons per day, until such times as they have built up their reserve. He also mentions that they have their own engine, and in addition the loan of 2 I.S.R. locos.

In view of the tonnage involved over line 50 please advise me as to what arrangements should be made for dealing with this traffic.

sgd. E.W. DEAN, Capt.
Transportation Officer, Rome.

INTER-OFFICE MINUTES

Ref: AC/155/Tn 4

SUBJECT : Stone S.Vincenzo - Resignano.

TO : Movements Division (Rail)
Transp. S/C

1. Reference your File 331/14/Tn 3 of 11 April.
2. There are now two 740 type locos belonging to the I.S.R. at the Resignano plant and these could handle any line haul between S.Vincenzo and Resignano.
3. One switching locomotive belonging to the solvay works is sufficient for ordinary plant switching purposes, but the main line locos could also be used for switching at times as their entire time would not be necessary for the movement of the main line tonnage.
4. There is no assurance that the loco position will remain as stated above because M.L.S. at present are making many changes in the reassignment of power.

H. A. Meyer
Chief,
Rail DivisionTransp. Sub-Commission (Rail Div.)
20 April 1945
Tel. 843238

F 1 "9

During an interview Mr. Gatto (Solvay Co.)/ Ing. Cirillo (TSR) following
programme was laid out:

Raw-material-in:

Piombino-Cappiglio-Vada-Rosignano } 300 tons daily Coal
Leghorn-Vada-Rosignano via line 50 miscellaneous

S.Vincenzo-Vaca-Rosignano 500 tons daily limestone

Manufactured-products-out

Via line 50 or/and 227 200 tons daily soda

For handling above traffic following trains were scheduled (daily)

coal: 29 wagons	750 tons	all material in
limestone: 14 hoppers	800 tons	
soda: 11 cars	700 tons	material out
empties: 29 cars		

Tractive power requirements: at least two locos class 735 or 740

Should only the movement of 500 tons limestone daily be effected, one loco of the same classes (735 or 740) would be sufficient. In this case, all remaining movements should be effected by utilizing already existing trains, and above loco would be required also for handling coal and other supplies from Vaca into the plant and manufactured products from the plant to Vada, as the section Vada-Rosignano is a dead-end line over which no other traffic is being moved.

Two ISR locos, both of them class 740, are presently at Rosignano, where they are being used for shunting purposes.

Should the new plan go into effect, above locos could be used for handling above trains, while the shunting could be done by either by Solvay's own locos, or by another ISR shunting loco to be assigned to the plant for this purpose.

TSR cannot tell, yet, whether the two locos already there would be sufficient to handle the material trains, as per above programme, and also to cover the requirements of the internal shuntings. An inquiry is being made on this subject and the results will be communicated as soon as available. 5148

Distances: Vada-Rosignano 5 km
Rosignano-S.Vincenzo 35 km

Sir

Here is all I have been able to find out.

Q = 750 tons of limestone and/or Solvay
chemicals.
are the above figures the bottom
conditions which ISR can be
catered for.

155/31

Sir,

16 April 1945 1530 hrs.

I got in touch with Solvay people this morning at abt. 1100 hrs. and I arranged for a meeting with Mr. Gatto, one of Sovay's managers, for this afternoon at 1600 hrs.

I have been called now over the phone by Mr. Opatowsky, Industry S/Commission AC (phone No. 478090) who told me that he had been informed by Mr. Gatto of my request for some information about Solayz's hoppers & locos and that, according to instructions issued by AFHQ, nothing can be moved from Solavy plant without Industry S/C's approval. He moreover instructed Mr. Gatto not to repky to my request, telling him that he would have discussed the matter directly with Tn. S/C.

Mr. Opatowsky would like to have a taok with you over the phone on above subject.

Subject: Release of bricks for rehabilitation
of ISR lines Vada-Rosignano and Campiglia-Piombino.

- 1) Industry S/C AC has sent release order for 400.000 bricks, to be supplied by the factory at Sinalunga (Siena), together with a letter, copy of which is herewith attached; said bricks are intended for rehabilitation works of ISR lines Vada - Rosignano and Campiglia - Piombino.
- 2) Part of a/m bricks must be returned to S.A. Solvay, Rosignano, while the balance, abt. 150.000 bricks will be stored at Campiglia for the completion of the works of ISR line Campiglia - Piombino.
- 3) As ISR line Sinalunga - Chiusi is still interrupted, will be required to carry said bricks from Sinalunga to Campiglia; the bricks destined to Rosignano will be thence forwarded by rail. a certain number of lorries
- 4) ISR Administration is not in a position to secure the lorries to carry out above movement and you are therefore kindly requested to investigate the possibility to put at our disposal at least six lorries in order that the whole movement be completed in less than two months.
- 5) We want to point out that besides the reasons stressed in Industry S/C's letter in so far as Rosignano plant is concerned, it is also necessary to complete as soon as possible the works on ISR line Campiglia - Piombino, because next spring's heavy rainfalls could compromise the stability of some emergency repairs carried out in order to hasten the reopening of the line.
- 6) An early reply will be appreciated.

OGGETTO

Sblocco Mattoni occorrenti per i lavori di ripristino delle linee Vada-Rosignano e Campiglia-Fiombino

Alla Commissione Alleata
Sottocommissione Trasporti
Stanza 52 Piano 3°

S E D I

ALLEGATO N. 4

- 1) Da parte della Sottocommissione dell'Industria con lettera della quale si trasmette copia è stata **invata** a questa Sede la credenziale per lo sblocco di 400.000 mattoni presso le "Fornaci Laterizi Riunite di Sinalunga (Siena) destinati ai lavori per la riattivazione delle linee Vada-Rosignano e Campiglia-Fiombino.
- 2) Parte di questi mattoni dovranno essere consegnati alla Società Solvay nel suo stabilimento di Rosignano ed il rimanente, che si aggirerà sui 150.000 circa, dovrà essere depositato a Campiglia per il completamento delle opere d'arte della linea Campiglia-Fiombino.
- 3) Dato che il tronco ferroviario Sinalunga-Chiusi è tuttora fuori esercizio è necessario disporre di autocarri per il trasporto dei mattoni da Sinalunga a Campiglia, donde quelli destinati alla Società Solvay verranno poi spediti per ferrovia **Finora** Rosignano.
- 4) Questa Amministrazione non è in grado di procurarsi gli automezzi per detto trasporto e quindi prega Codesta Sottocommissione a voler esaminare la questione onde provvedere a mettere a disposizione un certo numero di autocarri, che non dovrebbe essere inferiore a sei allo scopo di eseguire l'operazione di trasporto in meno di due mesi.

SUBJECT: Locomotives for Solvay Plant - Rosignano.

TO: Rail Section, Th Sub-Commission, Allied Commission.
Ing. Marin, Capo Compartimento, Rome.
Supt. Transportation - 774th Railway Grand Division.

1. It is understood that the tracks serving the Solvay Plant at Rosignano will be reconstructed and ready for service between Vada and Rosignano about 15 March or shortly thereafter.

2. When this track is made ready for service two 740 class Italian locomotives will be moved from Rome to Rosignano for service between Rosignano-Vada-San Vincenzo. Rail Section, Th Sub-Commission, Allied Commission will advise when the track has been reconstructed, in order that the locomotives may be moved to Rosignano. These locomotives will be maintained at Rosignano and the Capo Compartimento will arrange for the necessary crews to provide service between these points.

SUBJECT: Locomotives - Solvay Plant-Rosignano.

TO: Commanding Officer, 719th Railway Operating Battalion.
Capo Compartimento-Rome.
Rail Section, Th. Sub-Commission, Allied Commission.

1. A request has been received from the Chief of Material and Traction Section of the Rome Compartiment that two locomotives of the Italian 735 or 740 Class be assigned to the Solvay Plant at Rosignano when that line is opened for service between Rosignano and Vada, in early March.

2. These locomotives would be used to transport limestone in special cars belonging to the Solvay Society between Rosignano and San Vincenzo and to handle coal and finished products between Rosignano and Vada.

3. It has been determined by the Rail Division of the Th Sub-Commission, Allied Commission that these locomotives can be maintained at the Solvay Plant at Rosignano. When the line is ready for traffic, two locomotives of the Italian 740 Class, coal-burning locomotives, will be transferred from Rome to Rosignano for this service. Commanding Officer, 719th Railway Operating Battalion will please handle this matter with the Capo Compartimento-Florence in order that crews and necessary running and maintenance supplies be furnished for the maintenance and operation of these locomotives.

SUBJECT : Repairs to track I.L.V.A.
Works - Piombino.

1. The Italian State Railway are carrying out the repair to the line Campiglia-Piombino up to the point where the line enters the property of I.L.V.A.
2. To render the jetty and coaster berth suitable for A.C. operation the following work will have to be carried out:
 - a) Repair of track leading to the mole.
 - b) Repair of three tracks on the mole including the lifting of the left hand track (looking seawards) so that the center line is 92 ft 6 in from the edge of mole.
 - c) Laying of two dead end sidings to the berth where at present there is a deauville track and light cranes.
3. As these sidings are the property of the I.L.V.A. company the work should be carried out by them, and supervised by your Sub Commission. Should technical advice be required arrangements will be made for the I.S.R. to supply this.
4. This work should be completed by Feb. 15th.
5. Since writing the above there appears to be a doubt as to whether or not there are three sidings on the mole, if not two extra sidings must be laid with central line 9ft 6in from the edge of mole.

SUBJECT : Reactivation of the Rosignano plant;
repairs of the railroad Piombino -
Stazione di Campiglia.

TO : Transportation Sub-Commission.
(Attn.: Lt. Col. Lindberg -
Maj. Street)

FROM : Industry Sub-Commission.

1. Pursuant to our conversation it is confirmed that the port of Piombino is designated by this Sub-Commission to receive coal supplies for the Solvay Rosignano plant (8.000 tons/month Sardinian coal; 1.500 tons/month metallurgical coke)

2. Information supplied by the Solvay Co. states that the railroad Piombino-Campiglia Stazione (about 14 Kms.) and several bridges on the above route are damaged.

3. The reactivation of the Solvay plant is strongly recommended by AFHQ G-5 Section for the following reasons :

- a) it will obviate the necessity of imports of caustic soda and sodium carbonate for civilian essential needs; *demands for*
- b) it will implement supplies of caustic soda for the Army.

It is therefore requested that repairs to the above railroad commence at the earliest possible date.

4. The Solvay Co. has assured this Sub-Commission that they will render all possible technical assistance and provide labour, should the Italian States Railways require same.

5121

5. As agreed with Lt.Col. Lindberg, this Sub-Commission will immediately start to secure cement. It would be appreciated if a meeting could be held with you and a representative of the Italian Railways in order to coordinate effort for supplying all materials required for the above repairs.

10 November 1944

SUBJECT : Rosignano Solvay plant.TO : Transportation Sub-Commission.
(attn.: Col. Adams)FROM : Industry Sub-Commission.
Metallurgical Division.

1. Reference is made to your letter ACC/TN/155/S,
dated 3 November 1944.

2. The approach of the It. Railways has been made in consequence of this Sub-Commission's request that the Ministry of Industry, Commerce and Labour take all steps necessary to get Soda Solvay into production. No action has been taken before asking your approval. As a matter of fact information and drawings of the Vado-Bridge supplied by the Soc. Solvay through this Sub-Commission have facilitated your decision on repairs of this bridge.

3. Confirming our verbal information, your attention is drawn again to the fact that AFHQ G-5 Section instructed Requisition Division to decrease imports of caustic soda for 1945 in view of the reactivation of the Rosignano plant.

4. It is pointed out that the rehabilitation of the plant is far ahead of the repairs of bridges and railroads leading to it. No progress has been made in this respect during last week. (a weekly delay means in terms of reduced production: 700 tons caustic plus 700 tons sodium carbonate).

5. In the opinion of this Sub-Commission repairs to bridges and rails in the case of this plant are so closely linked with the rehabilitation work on the plant itself, that close cooperation in this respect between Industry Sub-Commission and Transportation Sub-Commission is necessary.

5126

This Sub-Commission would be glad to arrange that technical assistance and labour by Solvay & Co be put at your disposal in order to speed these repairs.

6. It is pointed out that if further delays arise, AFHQ instructions concerning the reactivation of the plant will not be fulfilled, which will naturally be a serious matter.

1 October, 1944

Subject: Scivay Plant, Rosignano, Line 50.

To : Industrial Sub-Commission, Allied Control Commission, APD 394.
Attn: Col. J.S.B. Todd.

1. Reference your letter 30 September concerning activation of the above plant and particularly request made in paragraph 3 for reconnaissance of the railway from Vada to this plant.

2. Reconnaissance has been completed, and the bridge over the Fine River has been found entirely unusable. This was originally a single span 103-foot pony truss. Restoration of the line could be accomplished by putting in a single track structure of two 35-foot and two 46-foot spans on the timber piers and abutments. Such work would require approximately three weeks for a seven bridge detail equipped with pikedriving rig.

3. The only other bridge is a small span over a narrow gauge track and road crossing, which could be filled, balance of required work being filling of bomb craters and reconditioning of track which would require one section of a track platoon for approximately three weeks.

4. In view of priority work which requires full use of our troops for some time to come it would seem that A.C.C. could arrange directly with the I.R.S. to handle the project using a civilian contractor and which meets with our approval with understanding they provide necessary labor and material.

TO : Transportation Sub-Commission.
(Attn. Col. Adams).

1. It is hoped that the important Solvay chemical plant at Rosignano will resume production in the early days of next year, and if this Sub-Commission's programme comes into effect considerable rail transportation will be involved.

2. We therefore consider it wise to give you a rough picture, well in advance, of the transportation facilities which will be required.

3. It is anticipated that there will be a daily movement of:

- (a) 500 m. tons of solid fuel into the works, which will involve rail movement from Leghorn to Rosignano;
- (b) 400 m. tons of finished products outwards by rail; and
- (c) 1000 m. tons of limestone from S. Vincenzo to Rosignano.

4. We would point out that it is anticipated that the railway line Vada-Rosignano will have been repaired prior to that date, and it is understood that the D.G., M.R.S. is assuming responsibility for this task. (Our letter of to-day's date to D.G., M.R.S. refers, copy of which has been sent to you).

5. Within the works are 36 special limestone cars which the Company will, we think, be permitted to retain since they are only suitable for this special purpose. The Company state that these 36 cars are sufficient to handle the limestone traffic.

SUBJECT: Soda Solvay Plant, Rosignano.

TO : Director General,
Allied Forces Military Railway Service.

1. Your Memorandum of the 19th September addressed to the Director, Transportation Sub-Commission, A.C.C., has been passed to us for action and, as requested, we now enclose authority for M.R.S. officers to enter the above plant to determine the quantity of rolling stock which might be recovered for service, and to inspect railway conditions within the plant.
2. We now confirm that within the works are 36 self-discharging cars of 40 tons, specially designed for the transport of limestone. These cars are the property of the Solvay Company, which is a Belgian concern.
3. The Solvay Works is one of the most important units in present liberated Italy, and it is the policy of this Sub-Commission that resumption of production should be facilitated in every possible way, and this policy has the full approval of the General commanding the 5th Army, and of Brigadier General Hamblen D/CAO, HQ., AAI.
4. It is therefore requested that you will ensure that the Solvay Works are permitted to retain the 36 limestone cars which are essential to the resumption of production.
5. Reference conversation of even date Colonel Campbell/Colonel Todd, it is noted that you will make an immediate reconnaissance of the railway line Vada-Rosignano (5 Kms.) and more especially study the problem of the repair of the small bridge over the river Fine, and it is hoped that as a result you will see your way to taking over the technical responsibility for making this portion of the line operative.
6. We confirm that the Solvay Works can supply an adequate amount of unskilled labour which can be employed under your direction.

7. In conclusion we wish to express our thanks for your very cooperative attitude, and request you to let us know the result of the reconnaissance you are shortly to make.

Subject: Railway Rolling Stock - "Solvay" Plant, South of Leghorn

To: Transportation Sub-Commission, A.C.C., APO 394, U. S. Army
Attn: Colonel D. S. Adams, Director

1. Advice has been received that at "Solvay" chemical plant, near Rosignano, south of Leghorn, there is quantity of railway rolling stock. This plant is located along I.S.R. line #50, which is direct line from Vada to Leghorn, but which, due to extensive damage, is not being opened throughout.

2. Effort of M.R.S. officers to enter plant to determine quantity of rolling stock which might be recovered for service and, incidentally, to inspect railway conditions within plant, were frustrated by armed guards who stated they had been posted by A.C.C. with instructions to permit no entry.

3. Will you please arrange for necessary permission to permit inspection, as above, by officers of M.R.S.?

4. If A.C.C. expects to attempt to operate plant, or remove any material therefrom by rail, it would be very desirable that M.R.S. be informed of plans in order that consideration may be given to restoration of line 50 from Vada as far as plant connection.

5. As general principle, it might well be noted that when any section of A.C.C. takes over plant of nature of "Solvay," and anticipates need of any railway service, either currently or in proximate future, it might be well for them to promptly communicate with your Sub-Commission, after which matter could be referred to M.R.S. by you, with appropriate comments. This would make possible better coordination of any desired rail service.
