REGARDING REPORT OF LOCOMOTIVE REPAIRS DURING MONTH OF JULY 1945.

In this month it was not possible to reach the number of 10 locomotives repaired. Instead only 8, of which 6 of cyclical repairs and 2 of special repairs.

The cause of the reduction of production are those indicated in the fortnightly report of the current month.

Continuing the lack of packing for journal boxes the number of hot journal boxes will rise to such an amount that, besides reducing considerably the number of locomotives available for trains, it will not permit the wheel latheing of any wheel.

Of the units in prepairs as regards the wheel lathe it will result totally engaged for the rectification of the grooves on axle journal of the hot wheels.

The number of workmen has decreased considerably in this month, due to agents being put on Pension on account of age limit, and also because the amount of sick workmen has increased.

At the workshop of the Garganica railway the repairs of the following locomotives have been completed.

Locomotives 835.319
851.166

has been put in for repairs the following locomotive :

851.149

and awaiting from Bari the locomotive:

851.180

also to be put in for repairs.

RELAZIONE ANDAMENTO RIPARAZIONI LOCOMOTIVE DURANTE IL MESE DI

= L U G L I O 1945 =

In questo mese non é stato possibile raggiungere il numero di 10 locomotive riparate invece 3,di cui 6 di riparazione ciclica e 2 di riparazione speciale.

Le cause della diminuzione di produzione sono quelle indicate nella relazione della 1ª quindicina del corrente mese.

Continuando la mancanza di lana orina il numero dei riscaldi salirà a tale valore che,oltre a fare diminuire notevolmente il numero delle locomotive disponibili per i treni,non permetterà di tornire alcuna ruota delle unità in riparazione in quanto il tornio ruote risulterà impegnato totalmente per rettificare fusi rigati delle ruote riscaldate.

Il numero degli operai é diminuito sensibilmente in questo mese, sia per agenti collocati in pensione per limiti di età e sia perché il numero di operai ammalati é aumentato.

Presso l'officina della Ferrovia Germanica sono state terminate di riparazione le locomotive:

- 835.319
- 851.166

é stata immessa in riparazione la:

- 851.149

e si attende da Bari la 851.180 per essere immessa pure in riparazione.

SUBJECT : Reports from Officiers in the Field

TO : Chief of Rail Division

1. Reference your AC/74/Tn 4 dated 5 May 45.

2. I consider that the fortnightly reports furnished to HQ. I.S.H. by Capi Compartimenti will provide all necessary information provided that they are amended so as to show clearly the difference between locomotives and rolling stock withdrawn from service for repairs and those which are actually recovered that is to say locos and wagons which have not previously been in service since before the allied invasion.

3. This matter has been discussed with Major Lomon, M.R.S. who will shortly give a considered opinion with regard to the monthly "Recovery of Equipment" return now required by D.M.R.S.

REPORTS FROM OFFICERS IN THE FIELD

In view of the desirability of withdrawal of officers from the field, please say the minimum information you will require in the fortnightly reports.

These reports would have to be provided by the Base Compartments and it is felt the existing arrangements should be revised so that all reports are channelled through ISR HQ when our officers are withdrawn.

TRANSLATION:

With reference to an AC order to transfer to Paola 3 locos of the 471 type and 2 locos of the 745 type from Catania and 1 loco of the 476 type from Messina, there is to point out that recently 6 locos of the 625 type were transferred from Sicily to the Reggio Compartimento, upon order from Major Matson.

I may add that several locos at present in service, will be put out of service and reserve locos will be put in service instead, in the near future. The number of reserve locos will be shortned and may practically become nil.

The probability that an increase in service operation might become necessary, if and when coal allotment is increased is also to be considered.

For all above reasons it is not advisable to transfer locomotives from Sicily to Paola.

(sgd) Dr.Ing.Tuccio

SUBJECT : Assignment of Locomotives at Paola.

1. Reference your letter TT NR/200.4/100A/2811/44 dated 15 February 45, and conversation between Ing Grassi and Major Baister to-day.

2. I am in agreement with your suggestion to assign to Paola six of the locomotives at present standing spare in Sicily. It is understood that the engines transferred will be:

5 Class 471 and 2 Class 745 from Catania and 1 Class 476 from Messina.

3. These locomotives should be used in the first place to clear the accumulation of empty wagons waiting in Calabria for transfer to Sicily.

Subject: Assignment of locomotives at Paola's locos.shed

Direction of M.R.S.
attn. Tn.3 (M) Building

1) The I.S.R. Rolling Stock and Traction Section of Reggio Cal. reports that the supply of electric power on the Battipaglia-Paola line, has often been discontinued, for rather a long time, due to defects occurred either at the Substations or on the main conduction.

2) In order to meet in such cases, the operation requirements - through steam traction - it would be necessary to assign at the Paola's Depot, in addition to the engines already available there, at least six locomotives, either of 0-10-0, or of 2-80 class.

3) Locos of such types are at present stored in Sicily, namely at Catania, Messina and Caltanisetta sheds.

4) We beg to advise if some of said locomotives may be sent to Paola shed.

1) La Sezione Materiale e Trazione di Reggio Calabria fa presente che si sono verificate più volte delle interruzioni di notevole durata nelle erogazioni di energia elettrica nel tratto Battipaglia - Paola, per guasti avvenuti alle sottostazioni o alla linea primaria.

2) Per poter sopperire in tali casi, con trazione a vapore, alle esigenze dell'esercizio, sarebbe necessario dotare il Deposito di Paola in aggiunta alle locomotive che ha attualmente, di almeno sei locomotive della classe 0-10-0 o 2-8-0.

3) Locomotive di detto tipo sono attualmente accantonate in Sicilia, e precisamente nei Depositi di Catania, Messina e Caltanissetta.

4) Si prega comunicare se alcune di dette locomotive possono essere inviate al Deposito di Paola.

Reference your AC Tn/197 dated 14 Nov 44.

1. Attached herewith are these returns for the month of Nov 44.

2. The locomotive return is in the form suggested by Major Baister but the wagon return form has been altered. That of Major Baister was based on the return showing each individual wagon by number and as there are in Sicily about 1000 wagons under repair, it is suggested that the form in which the return is now given is in these circumstances preferable.
