SUBJECT : Restoration of Railway Signal Facilities in the North.

TO : G-6, AFHQ

1. Transportation Sub-Commission has an Engineering Officer engaged on urgent priority railroad reconstruction work in Northern Italy, some of the lines on which he is working being of military importance, and one of the outstanding difficulties is the rehabilitation of signal and communication facilities which are essential for satisfactory working of the railways.

2. Our officer has approached GSO, 2 District, who states that in the military pool there are certain signal items which are surplus, and provided authority is obtained from GSO, 1 of C Italy (Brig. Buchanan), 2 District is prepared to issue to A. G. such surplus stores as can be amicably arranged.

3. The matter is particularly urgent and it would be appreciated if special action could be taken to insure the necessary authority is given to GSO, 2 District, to hand over surplus items by arrangement with our local officer in the District.

SUBJECT : Communication Stores.

TO : Capt. Conway,
Transportation Sub-Commission, Rails
Genoa

1. Reference is to your signal in respect to communication stores and your letter of 2 August 1945.

2. You are required to act within the terms of the Directive which was issued you by the Chief of the Civil Engineering Branch when you undertook duty in the northern area.

3. The repair of essential telephone and telegraph circuits is part of the normal rehabilitation needs of the railway track in which you are interested, but until such a time as the Rails Division is able to set up a special section to deal with signal and communication needs, your activities in that respect must be limited to the minimum requirements to insure satisfactory working of the railway.
