subject : Loco 801.004 Property of
Italian Royal Navy.

Military Railway Service,
C.M.R.
telephone : firebox 9352,
Outside Line 843365.
Tn.A.3(M)/88.
14 Dec. 1945.

To : M. & Shipping Sub Commission, AC,
(Rail Division) (Bdg)

reference your AC/372/m4 dated
11 Dec. 1945.

1. we are unable to trace which
American Command allocated the loco in
question to the private firm which operates
the quarries at S.MARIA LA BRUNA (TORRE
ANNUNZIATA).

2. So far as the MRS is concerned
these quarries are of no interest to us and
the restitution of the locomotive to the
TARANTO Docks is beyond our jurisdiction.

372/3

From : MINISTRY OF AIRLINE (Maristat)
To : N.S.C.
Date : 2nd December, 1945.
Ref. : SM/27011

Subject : Locomotive 801.004 property of the I.R.N. requisitioned by the Allied Authorities.

On 14th November, 1944 the above locomotive, belonging to the Taranto Naval Dockyard(Munitions Directorate), was requisitioned by the Allied Authorities while it was being used by the State Railways after completion of repairs at the Pietrarsa Workshop; it was allocated by the American Command to a private firm which operates the quarries at S. Maria La Bruna(Torre Annunziata).

The State Railways Dept. at Naples, upon application of the Directorate of Munitions for the return of the locomotive, gave notice that correspondence was being exchanged upon the subject with the Ministry of Transport (State Railways Haulage Section) which, in turn, was to take the matter up with the Military Railway Service.

In view of the I.R.N.'s need to have this locomotive returned to it at the earliest possible, and in order to prevent its being maltreated or damaged, it is requested that the Navy Sub Commission may approach the Military Railway Service directly in order that it may order the restitution of the locomotive to the Taranto Dockyard.

for CHIEF OF STAFF.

17 September 1945

SUBJECT : Locomotives Remaining in Italy.

TO : Deputy Director, Military Railway Service,
 Col. W. B. Wilson.

1. With reference conversation this morning, concerning the 2-8-0 U. S. A. oil burning locomotives now in Italy.

2. A conference was held with the Director General, Italian State Railways, this afternoon and he has requested that all of these locomotives be retained in Italy and will set forth in a letter tomorrow, the reasons why they should be left.

3. Given below is the locomotive situation in Italy as of the 15th of August 1945, which includes ISR locomotives only, the U. S. A. and W. D. British locomotives are not included in this recapitulation.

| | Working Condition | Light Repairs | Heavy Repairs | Total |
|-----------------------------|-------------------|---------------|---------------|-----------------------|
| <u>Locomotives Steam</u> | | | | |
| Passenger | 848 | 149 | 450 | 1,447 |
| Freight | 683 | 140 | 535 | 1,528 |
| Switch | 465 | 80 | 179 | 124 |
| TOTAL | 2,196 | 369 | 1,164 | 3,699 |
| <u>Locomotives Electric</u> | | | | |
| | 561 | 96 | 706 | <u>1,364</u> 1,364 |

- 2 -

4. It is my opinion that all of these locomotives should remain in Italy for the following reasons:

- a. The last steam locomotive built for the ISR was prior to 1924, and the majority of the steam locomotives are more than 25 years old.
 - b. Due to the Electrification Program of the ISR, steam power was not maintained to a standard for efficient operation, and are all therefore, in a deteriorated condition, the greater portion of all of the locomotives will require extensive fire box and ~~motor~~ ^{boiler} repairs, and it is estimated the life of the locomotives to be two to four years.
 - c. Your attention is directed to the number of electric locomotives requiring heavy repairs, and even though the Electrification Program is carried out, it is doubtful, that enough electric locomotives would be forthcoming to protect all services, and therefore, a certain number of steam locomotives would be required for operation on the electrified lines.
 - d. There is being operated in Italy at the present a minimum amount of service, and it is expected that as the military demands decrease, civilian demands will increase proportionately, and all lines will be worked to capacity for some time to come.
 - e. As new lines are opened up for service and there are many of them now out of service, the demand for steam power will grow very rapidly, and a reserve supply now standing idle will be required before very many months.
 - f. You are aware of the track conditions of the lines which are now operating, due to the hasty construction brought about by the element of military necessity, it has been necessary to impose slow orders, which reduces the turn-around of locomotives and therefore, increases the number of locomotives required for service.
 - g. On account of priority on other works, it is doubted ^{if} raw materials will be available in Italy for the construction of new locomotives in any number for some months.
5. Based upon the above reasons, it is requested that all of the 248 U. S. A. locomotives be left in Italy for the ISR. However, if in your opinion it is deemed advisable, it would be better to permit a token of five 0-6-0 and 25 2-8-0 U. S. A. oil burning locomotives be withdrawn from Italy to satisfy the question of availability.
