SUBJECT: Road Communications - ITALY

TO: All Concerned

1. Section II, AFHQ Administrative Memorandum Number 51, 1944, which pertains to the above subject is being rescinded and current directive appears herein.

2. This letter refers to all roads south of Army rear boundaries.

3. Appendix "A", attached, is a table giving Allied Force Headquarters priorities and standard of maintenance for roads concerned.

4. Allied Force Headquarters priorities for road maintenance will apply only to those routes on the L of C which are essential for the maintenance of the Lines and major formation moves. Maintenance of these routes will take priority over all other road repairs.

5. Districts and Base Sections will designate their own priorities for those roads essential for local administration.

6. In order to conserve Bailey Bridging for future operational requirements, it is essential that the number of additional roads as referred to in paragraph 5 above kept open with this equipment, should be reduced to the absolute minimum.
