12 December 1945

R E Q U I S I T I O N

SUBJECT : Spare Parts for Trucks
 ACQUISITION No. : CLAC 1-257
 FROM : HQ ALCOM
 TO : Combined Civil Affairs Committee
 (for Combined Liberated Areas Committee)
 30-866 Pentagon Building,
 Washington 25, D.C.

PERIOD : 1st and 2nd quarters 1946

SHIP TO : Naples or Leghorn

CONSIGNEE : Istituto Nazionale per il Commercio Estero (ICE),
 for the Maintenance Group of the Italian Ministry
 of Transport.

1. The Italian Government requests for procurement and shipment to Italy:

Six month's spare parts for the following 1,100 trucks, 1 1/2 ton, 4 x 4 cargo (Chevrolet):

	Model	Year
350 less winch	G 4112	1941
200 w/winch	G 4112	1941
350 less winch	G 7107	1942
200 w/winch	G 7107	1942

A list in detail, with stock numbers, of the spare parts required is attached to each of the first five copies of this airgram.

The Italian Government authorizes payment out of the

TO : Combined Civil Affairs Committee
(202 Combined Liberated Areas Committee)
5C-866 Pentagon Building,
Washington 25, D.C.

PERIOD : 1st and 2nd quarters 1946

SHIP TO : Naples or Leghorn

CONSIGNEE : Istituto Nazionale per il Commercio Estero (ICE),
for the Maintenance Group of the Italian Ministry
of Transport.

1. The Italian Government requests for procurement and shipment to Italy:

Six month's spare parts for the following 1,100 trucks, 1 1/2 ton, 4 x 4 cargo (Chevrolet):

	Model	Year
350 less winch	G 4112	1941
200 w/winch	G 4112	1941
350 less winch	G 7107	1942
200 w/winch	G 7107	1942

A list in detail, with stock numbers, of the spare parts required is attached to each of the first five copies of this airgram.

2. The Italian Government authorizes payment out of the fund established pursuant to the letter addressed by the Italian Minister for the Treasury to the U.S. Secretary of the Treasury on 20 January 1945 for such of these items as shall be assigned for procurement to the United States.

3. These trucks, which are operated by the Italian Government, are essential to the distribution of civil supplies. The spare parts on this requisition are necessary to keep the vehicles in operational condition.

////////////////////////////////////// LAST ITEM //

DELIVERY: Ship to ROME consigned as above. Shipment to be made as soon as possible from theatre stocks.

JUSTIFICATION: Reference is made to Requisition WGS-194-ORD/LAG Airgram 51 of 25 August 1944.

The items requested on this requisition are urgently needed by Transportation Subcommittee, Allied Commission, for the assembling of trucks shipped and to be shipped against above referred to requisition.

Considering the urgency with which these items are required, it is recommended that they be provided soonest from theatre stocks.

3,000
4,000

//////////////////////END OF ITEMS//////////////////////

DELIVERY: Ship to DUKO as indicated above. If from theatre stocks ship immediately; otherwise, on or before 15 February 1945.

RATION: (1) Item on this requisition is urgently required for the production of gaskets for automotive purposes.

(2) A vigorous search has been made in Naples, Rome and other places for stocks of asbestos sheets, but without success.

(3) Motors on many civilian vehicles are rapidly failing in service due to blowing of gaskets. Present stocks are being exhausted and unless asbestos sheets from which gaskets can be made are made available, many vehicles will be forced to lie idle, thereby, bringing about additional difficulties to the present problem of transportation.

(4) It is requested that item in quantities specified be procured from theatre stocks, if possible.

IMPORTS REQUIREMENTS OF SPECIFIC MATERIALS FOR
THE SPARE PARTS INDUSTRY FOR MOTOR CAR AND
LARKER ENGINES IN LIBERATED ITALY

1945 PROGRAM

5-14

1. While tonnage figures in specific grades and qualities of steel are relatively high the final agreement on amounts represents a commendable indication that Italian industry intends to assume the major burden of finished production. Orders on ignition and injector systems are very moderate and establishments are now being reactivated with date dead-lined against exhaustion of imports.
2. Distributors, coils and magnetos are in the amount of 425,800 and 300 respectively, which would be considered normal maintenance reserve for about 1000 vehicles for a one year period. The modesty of this request speaks for itself.
3. Spark plugs (various sizes) are ordered in quantities estimated to fill urgent requirements against the time when national industry will achieve a supply balance against demand. At present the porcelain plant at Sacerate is in a position to supply casings, but the plants capable of turning out the metal component parts are (a) still inactive due to war damage and loss of equipment and (b) in zones of power shortage. This latter defect is susceptible of fairly prompt remedial action.
4. Injection pumps and fuel oil injectors are requested in extremely moderate amounts. Proof of local ability to clean properly has been received by this office not only by documentation but by the practical evidence of sustained operation with somewhat antiquated equipment. Repair facilities are not organized but satisfactory results have been achieved by independent mechanics and we may presume that adequate repair-maintenance measures will be inaugurated. In view of this we do not challenge the rather small amounts ordered and attention is called to marginal note on injectors re N. 1/H to the effect that supplementary list of injectors is being prepared.

and establishments are now being reactivated with data dead-lined against exhaustion of imports.

2. Distributors, coils and magnetos are in the amount of 425,000 and 300 respectively, which would be considered normal maintenance reserve for about 100 vehicles for a one year period. The modesty of this request speaks for itself.

3. Spark Plugs (various sizes) are ordered in quantities estimated to fill urgent requirements against the time when national industry will achieve a supply balance against demand. At present the porcelain plant at Macerata is in a position to supply casings, but the plants capable of turning out the metal component parts are (a) still inactive due to war damage and loss of equipment and (b) in want of power shortage. This latter defect is susceptible of fairly prompt remedial action.

4. Injection pumps and fuel oil injectors are requested in extremely moderate amounts. Proof of local ability to clean properly has been received by this office not only by documentation but by the practical evidence of sustained operation with somewhat antiquated equipment. Repair facilities are not organized but satisfactory results have been achieved by independent mechanics and we may presume that adequate repair-maintenance measures will be inaugurated. In view of this we do not challenge the rather small amounts ordered and attention is called to marginal note on paragraph 1.1/H to the effect that supplementary list of injectors is being prepared.

5. Fibrous materials covering brake linings, clutch linings and gaskets are in quantities of certified urgency. The request for compressed granular cork board has been screened with expectation that the latter months of 1945 will see a resumption of Mediterranean trade at least to an extent enabling Italian importation of this commodity from North African sources.

6. Requests for ball and roller bearings reflect requirements not only for vehicle rehabilitation but for certain machine shop maintenance. This must be classed as available only through importation since Italian manufacture of these requirements during the coming year will be nil.

NOTE: Final screening of spare parts was conducted with representation by Officers of Ordnance Department (U.S.A.) and G-4 (A) whose views coincide with the list herewith presented.
