SUBJECT : Naples Warehouses.

TO : HQ. A.C. Tn. & Shipping S/C..(attn. Warehouse Div.)

1. Enclosed is report by Maj. Curran on the inspection that he made of the Naples National Warehouses in conjunction with Capt. Ramsey, the Naples P.L.O.

2. It is strongly urged that you request the Federazione Italiana dei Consorzi Agrari to have all supplies under cover by 1st January at the latest. Capt. Ramsey and Maj. Curran could find almost no spoilage of supplies warehoused under cover whereas there appeared to be a small but significant loss when the supplies were exposed to the weather. Both Capt. Ramsey and Maj. Curran agreed that the time had arrived to put an end to warehousing supplies in the open.

3. The attached report indicates that there is probably sufficient warehouse space at present to shelter all supplies if the basement of warehouse 1577 is utilized and if the Genio Civile completes the repairs it is now making to the roofs of warehouses 1577 and 696. Capt. Ramsey states that the Genio Civile has been very slow about completing the work that they have undertaken. Your efforts to force the Genio Civile to take more energetic action in completing their work will be appreciated. It is possible that Col. Ristedt of the Industry & Utilities S/C can assist in putting pressure on the Genio Civile and in explaining the high priority nature of the warehouse repairs.

4. We will appreciate it if you will keep us advised of the progress made in getting supplies under cover.

The following facts were determined.

Report In The Rome Press Regarding

4000 Tons Of Foodstuff

Apparently the report in the Rome press concerning the 4000 tons of foodstuff was taken from an article appearing in "Il Giornale" (Naples) 15 November, translation of which is attached. "Il Giornale" asked the Consorzio Agrario to explain why 4053 tons of food lying in the warehouses of the Federazione Italiana dei Consorzi Agrari, Naples was not being distributed to the people of Naples and expressed the fear that some of the food would be damaged by rain and that the Allies would cease the shipment of food feeling that more was not required.

The article in "Il Giornale" refers to food allocated by the Ministry of Alimentation to Sepral of Naples for consumption in the six months period October 1945 - March 1946. The allocated food is lying in the National warehouses of Naples operated by the Federazione Italiana dei Consorzi Agrari because the Consorzi Agrario Provinciale, which should warehouse it, has inadequate storage capacity.

The foods allocated to Sepral of Naples and withdrawn up to 26 November appear below.

The above figures make it clear that the food allocated to Naples Sepral has been moving out of the warehouse slowly, for although one-third of the period for which the food was allocated has passed only about one-tenth of supplies have been collected. Sig. CERRETO (Technical Inspector, Naples Sepral) was questioned as to whether the ration commitments were being met and why the food was not being utilized, but his answers were not satisfactory and he claimed not to know the whole story. Sig.CERRETO was requested to prepare for the Ministry of Alimentation a complete statement of the distributions of Naples Sepral for the period in question and an explanation of why the full distributions to which the population was entitled were not made if such proves to be the case.

As the food allocated to Sepral Naples is not pysically segregated in the warehouses, a separate report on its condition can not be made.

It is recommended that the Ministry of Alimentation be requested to investigate the operations of the Sepral of Naples to determine whether ineffeciency or misconduct exists.

Condition Of The Food In The Warehouses

Attached is a statement of food in the warehouses determined to be spoiled or spoiling as of 8 November. It is to be emphsized that AC/It.Gov. had 19,426 tons of food in the warehouses 1 November and that much of the tonnage listed in the statement is not yet lost. It should also be pointed out however that there is spoiled food in the outside stocks that is not listed in the attached statement because it has not yet been sorted out and segrated. How much this undetermined spoilage amounts to is difficult to say. At the present time there is about 4500 tons of food stored in the open and it is unlikely that spoilage amounts to as much as three per cent (135 tons). However, determination of this fact can not be made without turning the stocks over. The writer and Capt. RAMSEY opened a number of cases and in most instances the contents were found in unspoiled condition, even though the cases appeared bad from the outside. However, in some cases spoiled and rusted cans were found.

One cause of spoiled foods in the warehouses is the original receipt of the supplies in bad condition. For example the 42,454 tons of chickpeas "thickly infected with parasites" was received from 14 CRASC (Casoria) in that condition according to the warehouse management. Moreover, the warehouse maintains that 14 CRASC, from which supplies are frequently received, has been an offender in other instances, for example in a recent delivery of a large quantity of canned meat. Sig.CENCI was requested to advise us what action was taken when the warehous reported

..... ./.

Declassified E.O. 12356 Section 3.3/NND No. 785021

./.

to the Federations that infected chickpeas had been delivered by CHASC.

The major cause of spoilage, however is the storage of food in the open because of insufficient covered space. The warehousedoes its best to protect the supplies stored in the open by stacking them on dunnage and covering them with tarpaulins. However, the tarpaulins are torn and leak and in the summer the sun causes loss. It is strongly recommended that the Federazione Italiana dei Consorzi Agrari be ordered to have all supplies under cover by 1 January at the latest. It is felt that the above can be achieved without securing additional warehouse space in the following manner :

(a) Capt. RAMEY reports that Deposit of Naples may take over the basement of warehouse 1577 which is now almost empty and capable of holding about 2000 tons. Deposit should be required to move at least a part of the fish and milk allocated to it into the basement.

(b) The Genio Civile is now repairing the roofs of warehouses 1577 and 696. The Genio Civile is reported to be exceedingly dilatory in its operations and should be required to expedite the repairs which when completed will give many thousand tons extra covered storage space.

Steps were taken to see that the spoiled and spoiling supplies were disposed of. Mr. [illegible] of UNRRA promised to give immediate disposal instructions for the 221 tons of corn meal and oats to prevent further loss. Immediate action was likewise requested of Sig. JOVINI and Sig. CANI in regard to the infected chickpeas because of the danger that the parasite would spread to our dry vegetables. The other supplies will be disposed of as condemned by the Commission set up for that purpose. We do not feel it is wise to hurry the warehouse too much in this regard because a considerable portion of the spoiled supplies may be saved for consumption by careful sorting out.

The following measures were taken relative to the handling of spoilage in the future :

(a) If the start of spoilage is determined in a batch of supplies or if it is felt there is a danger of spoilage the warehouse is to send a signal to the party concerned (AG/It.Gov., UNRRA) advising the item, tonnage and condition.

... ./.

Declassified E.O. 12356 Section 3.3/NND No. 785021

(b) A monthly spoilage report is to be made by the warehouse showing :

Spoiled foods disposed of in the month.

Spoiled foods on hand at the end of the month with a statement of the reason for spoilage and whether or not the party concerned was advised by signal of the danger or start of spoilage.

A standard procedure already exists for the disposition of spoiled foods. The foods are first condemned by a Commission composed of the Regional Inspector of Alimentation, a veterinary and someone representing the Ministry of Finance. The condemned supplies are then bought by the Federazione which disposes of them (for animal feeding, industry etc.) as instructed by the above Commission.

Extract from "IL GIORNALE" of Naples 15 Nov.1945.

MAIZE IS NOT BEING SUPPLIED

BY THE CONSORZIO AGRARIO

Over a thousand tons of foodstuffs have been

lying at San Giovanni for months with-

out being distributed.

We are making the Consorzio Agrario Provinciale, a question that is clear and pointed. The duty of the Consorzio Agrario Provinciale is to supply Naples by taking over and distributing the food that the Al lies grant us with personal sacrifice. We are asking why the considerable quantity of food stocked in the warehouse at San Giovanni a Teduccio - belonging to the Federazione Italiana Consorzio Agrari -is not released and distributed from time to time to the town population. An inspection revealed the existence of the following merchandise in the warehouse since the dates indicated (and the relative dates given deserve particular attention).

Since	21 - 7 - 45	vegetables	kg. 6.000
"	5 - 9 - 45	"	" 345.000
"	16 - 9 - 45	"	" 700.000

"	1 - 10 - 45	fish	" 91.046
"	19 - 10 - 45	evaporated milk	" 2.144.969
"	23 - 10 - 45	fish	" 556.954
"	2 - 11 - 45	herrings	" 101.367

All told there is precisely 4053 tons of foodstuff useful to everybody. And, as is obvious, all the Neapolitans could be supplied over a long period, those Neapolitans who are very short of food, thus easing the present serious situation of food scarcity. The vegetables that have been piling up in the warehouse since the month of July have almost reached a million kilograms and we are forced to buy them on the black-market at 200 liras a kilo. Dried fish and egg powder could be distributed to make up for those foodstuffs that are lacking in our daily requirements, and the evaporated milk could at least be distributed to the sick, who even with their special "coupon" cannot get any as

./.

"there is no milk" (and in the warehouse there are some two million kilo).

Is the above situation due to neglect on behalf of the Consorzio ? Or have special orders been issued from Rome ? This state of affairs is causing a double risk : on the one hand the first rain and consequent humidity will damage the foodstuffs and render them useless ; on the other hand the Allies, seeing that the foodstuffs are not being distributed, will be under the impression either that we do not need them and therefor they will not make further shipments, or that we are incapable of coping with these shipments and therefor they will let us drift our own way. In this last case - at least as far as the heads of the Consorzio are concerned p they would not be at all wrong. Therefor a full and accurate reply would be useful to everyone : to the Consorzio and to the town population. We also point out that the Federazione has continually urged the Consorzio Agrario to take action to distribute the food, however up to the present no action has been taken by the Consorzio. The latter has taken no notice at all and yet the warehouses are stocked to such a capacity that may further arrivals of foodstuffs could not find warehousing space.

1. Enclosed is copy of letter dated 21st December from Raterocomerci warehouse, Naples to the Ispettorato Regionale dell'-Alimentazione, Naples.

2. You will note that the attached letter states that there is 65 tons of evaporated milk in broken boxes which is still in edible condition but which should be used quickly to prevent spoilage. The warehouse requests that the above milk be allocated locally for immediate consumption and suggests that it should not be used against the existing allocation to Caproni Naples because it would not be consumed sufficiently rapidly.

3. Kindly give the above matter your attention. In view of the fact that milk must be continually consumed and distributed in Naples, we fail to understand why the above milk cannot be taken by Naples Caproni as part of the existing allocation and be distributed and consumed within a matter of a few weeks. Of course the milk should only be consumed on existing ration scales.

SUBJECT : EVAPORATED MILK IN DAMAGED PACKAGES LYING IN THE STORE 67. 696 AND 1577.

1. Referring to the spoilage and breakages report as at 30 Nov. 1945, sent to you at the right time in advance to the analogous report to be made out as at the end of December 1945, we hasten to inform you that the quantity of Evaporated Milk, the pasteboard involucre of which has been useless, owing to the softening caused by the infiltrations of moisture occurred through the stocks, is at present of about 65 tons.

2. The cans representing this lot, carefully selected, don't show outside any sign of spoilage, except some superficial spot of rust, for this reason it is deemed that they are in a normal condition for commercial use. However, as these cans are for the major part constituted by a usual white metal not rustless, the danger of a their quick deterioration is feared, in consequence of the increase of the oxidation, the process of which, as it is known, is very difficult to be stopped, although if the best care is taken for drying and cleaning the metallic surfaces.

3. For the above reason, we beg to draw your attention on the necessity that the above mentioned 65 tons (about) of Evaporated Milk-which, owing to their broken packages, cannot withstand long journeys, whilst their issue is urgent, for preservation purposes - be allotted locally for the immediate consumption.

4. Although the delivery to the A/F at Naples concerning the large allocation of Evaporated Milk for the month of September ult. is not presently in process, we would like to avoid to deliver the a/m broken packages against said allocation, in consideration of the fact that this commodity

Declassified E.O. 12356 Section 3.3/NND No. 785021

is not destined to be used for the immediate consumption, but must constitute the stock of the Consorzio provinciale warehouses for the consumption of the next months. So that if the cans in danger are issued against the allocation in question, they would run the risk to become deteriorated the cans in the Consorzio warehouses. Instead it is necessary to arrange for said cans to be issued for a quick consumption.

Awaiting your kind instructions, we remain,

Yours truly,

THE DIRECTOR

11 December 1945

SUBJECT : Explosives on SS. EMPIRE RIVAL
Stored in Depot 4N51, Aversa.

TO : Mr. Gabriel Colletta,
Special Agent CIC.

1. Approximately 285 tons of dangerous explosives were stored at Depot 4N51 upon authorization of Port & Warehouses Division of Transportation S/C of Headquarters Allied Commission in accordance with arrangements made by Port Liaison Office, ASC Naples, acting as liaison between ICE, agents of the Italian Government who received delivery of the goods at ship-side, and Depot 4N51, American military depot.

2. Use of military depot was necessary owing to prohibitions against storing explosives in food and other depots for imported civilian supplies in Naples. Depot 4N51 is equipped for storage of explosives and was undertaken this task of storage for Allied Commission on several occasions in the past, pending transhipment to ultimate destination.

SUBJECT : Spoilage report of 1 December Naples Warehouses.

TO : Ministry of Food. (Attn. Dott. JOVINE)

1. Enclosed is copy of report of spoilage as of 1 December received from Naples warehouses.

2. Please take the following action :

a. See paragraph (c) of spoilage report. Give the warehouse immediate disposal instructions for the 10950 kgs dry milk. Note that the warehouse advises that this milk will spoil quickly because it is not in barrels. Please advise us when the milk has been disposed of. This milk should be disposed of under existing allocations and this letter should not be regarded as making an additional allocation.

b. See paragraph (e) of spoilage report. Please see that the warehouse disposes of the 42454 kgs of infested chickpeas immediately to prevent spread of infestation to other supplies. These chickpeas are the same as those referred to in our letter to you reference 60-1/ Food of 1 December and the chickpeas should be out of the warehouse by now.

c. Please see that disposal instructions are given the warehouse for all other spoiled supplies listed in spoilage report and that the supplies are moved out of the warehouses.

	316 sks	-	10.950 kgs.	

Stock originated by the re-packing of the contents ex unrepairable barrels received from board. See all Receiving Reports concerning this commodity. 	180 "		3.919 "	(" 676)
	352 sks.	-	8.600 kgs.

A part of these broken packages, for which it was necessary to elminate the outside cardboard involucre, was received ex board (See Revg. Rpts. concerning this item). Further breakages were caused by a more or less extended disintegration of the cartons, which was provoked by a spontaneous leakage of cans or by infiltrations of rain water in the stocks stored in the open or sheltered premises of the Depot 1577.
