SUBJECT : Report on Inspection of Warehouses by  
Major Robert H. Klein

TO : Chief, Port and Warehouse Division

1. LEGHORN

a. Leghorn warehouse operations have been reduced greatly in scope. Federazione Italiana dei Consorzi Agrari has been doing a satisfactory job of management and the number of Military personnel has been further reduced.

b. An excess of warehouse availability now exists. Consideration is being given to the abandonment of certain less desirable warehouses. It is requested that Movements Division and Food Sub-Commission advise of future demands on Leghorn so that warehouses not needed for civil supplies may be turned over to the Army, who are still seeking Leghorn warehouses.

2. GENOA

a. Warehouse operations in Genoa are excellent, perhaps better than any other port in Italy. This is in no small part due to the excellent Italian organizations functioning there.

b. The greatest part of the merchandise received from the beach head is loaded directly from port trucks into rail cars at the warehouse for onward dispatch. Rail sidings at warehouse are large enough to accommodate any anticipated demand. Rail wagon supply has been plentiful.

c. Beach head clearance has been accomplished by port vehicles, assisted by ALCOM vehicles of the MTG. The ALCOM Company at Genoa has performed admirably. Much credit can be given its commander, Capt. Bickel.

d. Genoa Port has not as yet opened for Liberty Ships, although coasters and schooners are being unloaded in one section of the Port. Liberty Ships are being unloaded by barges and lighters over the beach head.

1:50

Mr. Allman - Mr. Ghilardi and return to RMB

W/23/7/45 ADP 7/1/45

0847

### 3. SAVONA

- a. Warehouse personnel assigned to Genoa is satisfactorily handling the receipt and despatch of civil supplies in Savona, in addition to this work in Genoa. The Italian organizations in Genoa, working in conjunction with the Italian organizations at Savona, are highly satisfactory.
- b. There is a warehouse within the port of Savona which, although damaged, can easily serve as transient shed for in excess of 5,000 tons. As yet it has not been used because rail clearance from Savona quays has been completely satisfactory. An abundant supply of rail wagons has been available and no problem is anticipated.
- c. There have been complaints from warehouse personnel in Savona-Genoa that Savona Port has not been used to its seeming capacity. In addition to the excellent collier berth, there is another Liberty berth which can easily accommodate a general cargo Liberty drawing 25 $\frac{1}{2}$  ft. (or possibly more). There is no problem of port clearance by rail from this berth and there is easy access to motor trucks as well. In addition, several coaster and schooner berths exist, which are not being used to capacity.
- d. Even with the expected opening of Genoa Port, after completion of mine sweeping, Savona is such an efficient operation that its continued use would seem desirable.

### 4. VENICE

- a. Venice warehouse operations have been causing some difficulty due to the failure of the Army to evacuate that portion of the ALCOM warehouses loaned by ALCOM to the Army for an agreed period of time. Although this time has elapsed, the Army still holds these warehouses as transient sheds because the Army's contemplated plan to use Santa Marghera has either been abandoned or delayed.
- b. However, the ALCOM warehouse picture could be markedly improved by better cooperation between the ALCOM personnel and the port Military personnel. With the contemplated change in ALCOM personnel Venice, it is hoped that this can be accomplished. Specifically it is urgently recommended that the long quay used now for all ship discharges be divided, and that one section of it and the warehouses or transient sheds adjacent to that section be assigned for the exclusive use of civil supplies. It is firmly believed that this would not impair the Army program and it would greatly facilitate the efficient handling of civil supplies.

1449

5. CESINA

- a. Cesena warehouse on 17 July 1945 contained only a few hundred tons of supplies which have since been cleared from the warehouse so that it is now empty.
- b. Orders were issued to Lt. Lester, Officer in Charge, to proceed with derequisitioning and complete closing of the warehouse, which will be accomplished in the next few days.

6. ANCONA

Ancona warehouse operations have been greatly reduced in scope in the last short time. Consolidation of supplies in a few warehouses is in progress. There is in Ancona, as in Leghorn, an excessive amount of unused warehouse space. It is requested that the Ship Movement Division and Food Sub-Commission advise expected Ancona program so that excess inefficient warehouses may be abandoned.

b. Federazione Italiana dei Consorzi Agrari are doing a satisfactory job at Ancona and consequently military personnel has been decreased, with further decrease in prospect.

SUBJECT : Procedure

TO : Chief, Ports and Warehouse Division

1. The results of my recent trip to Bari, as indicated in my report ref. W/5/1195/Tn6, have crystallized certain glaring points of confusion that exist in the operation of the Warehouse Branch. This memorandum is written to elucidate these points of confusion, with the recommendation that they be considered by proper authority within the Transportation Sub-Commission so that better working procedures may be laid down.

2. The duties of the Port and Warehouse Division are stated in AC/Th Memorandum No. 1, 19 January 1945, paragraph 7. However, to the best of my knowledge, there has never been a formal breakdown within the Port and Warehouse Division of the duties covered by Paragraph 7.

3. Paragraph 7 states in part, "Its responsibilities for warehouses will extend only to those warehouses which are used as incidental to transportation, e. g., at ports and at certain limited points in the interior".

4. Despite this directive, the War house Branch has been advised that its responsibilities are for warehousing in military ports only. Therefore it has taken no interest in warehousing in the several Italian civilian operated ports such as Castellammare, Torre Annunziata, Civitavecchia, Piombino, Reggio, Catania, etc.

5. The Warehouse Branch and in fact, the Transportation Sub-Commission, has taken no interest whatsoever in the receipt of

List 47

wheat, its handling being reserved to the Food Sub-Commission, whereas other civil supplies are handled through the Warehouse Branch.

3. The Warehouse Branch has confined its activities only to those imported civil supplies (except wheat, coal and POL), which originated outside the Mediterranean area.

4. These artificial separations of activities, which are apparently illegal, are not understood. They lead to confusion because of additional personnel handling similar matters.

5. The greatest amount of time and energy of personnel of the Warehouse Branch at Headquarters is spent on coordinating ship diversions with the Shipping Branch of the Movement Division, the securing of cargo disposition and advice from the various interested Sub-Commissions and Italian agencies, and the transmission of disposition instructions to Port Liaison Officers and warehouse personnel in the field. It is not clear whether this function properly belongs in the Warehouse Branch. It was done by the Warehousing and Forwarding Division of the Food Sub-Commission prior to that Division's becoming a part of the Transportation Sub-Commission. With the increased number of ports in Italy now available for civilian imports, with the greatly increased number of ships arriving and the consequent increase in imports, not only in tonnage but in variety, the amount of work to prepare disposition advices has increased tremendously. A recent disturbing factor has been the cessation of convoys, which complicates securing information on ships' arrivals and consist of cargo. It is desired that a clear-cut directive be issued, advising the responsibilities of the Warehouse Branch relative to ship disposition advices.

This should be all-inclusive and should clarify position of the Port Liaison Officer in relation to the Warehouse Branch.

9. It should be noted that such Port Liaison Officers, either Italian civilian or Allied personnel, on duty in those Italian ports under Italian civilian operation do not bear the same relationship to the Warehouse branch as the Port Liaison Officers in military ports. It is desired that this position be clarified.

10. Because of the press of activities relative to handling ship disposition advices, it is impossible for me to make the necessary visits to the various warehouses in the field. This is further complicated by the increased number of warehouses required to be visited. I feel it necessary to visit each warehouse not less than once a month. I find it impossible to do this and at the same time keep abreast of disposition advices on incoming supplies.

11. It is recommended that at least one additional Junior officer be assigned to the Warehouse Branch if the present duties of the Warehouse Branch, as described above, are to be continued.

12. Recent experience has indicated that the Warehouse Branch in actual operation is almost independent of the so-called Port and Warehouse Division. Direction and liaison with the Port part of the Ports and Warehouse Division are almost non-existent. In practice, the Warehouse Branch is much closer to the Shipping Branch of the Movements Division. Further, it is extremely difficult to secure advice on problems of policy and personnel, as well as day to day problems which I cannot handle at my own level. The various branches of the Movement Division are extremely cooperative, but it is in

055  
matter of policy and current problems over and above day-to-day routine activities which I have not been able to surmount ~~within~~ the Port and Warehouse Division.

13. The follow up on all port liaison is done by the Warehouses Branch. The Warehouses Branch has insisted that Port Liaison Officers prepare cut-back reports to indicate variances or shortages of receipts, as compared to manifested quantities said to be arriving ships. The Warehouses branch further has taken such steps as it deemed necessary to insure the arrival at warehouse of all manifested cargo. It is not at all clear whether this function is truly a part of the work of the Warehouses Branch. Firm advice on this subject is requested. It seems obvious that the lack of contact between the Warehouses Branch and the Port Liaison personnel in the Neel, as well as in Italian civilian ports, makes this checking only haphazard when compared to the entire Italian picture.

14. It is well known that higher policy has directed that the Italian Government take delivery at shipside, but it is perhaps not as well known that without careful supervision and stimulation from Allied personnel, the Italian Government's success in accounting for the receipt of manifested cargoes is mediocre at best.

15. The liaison with the interested Sub-Commissions (Food, Finance, Commerce) and the Economic Section relative to the handing over to the various Italian agencies a greater share of Port Liaison and Warehouse functions has been confused and poorly directed. It is believed this is in part due to lack of directive received from my superiors on

O B S 3  
this subject, and the lack of understanding of the over-all picture in the Warehouse Branch by the Ports and Warehouses Division. In order to terminate at the earliest opportunity the responsibility of the Allied Commission reference to the work of the Warehouse Branch, as described in this memorandum, and to transfer these functions to the proper Italian agencies, it is thought that a carefully devised plan should be enunciated by higher authority and the responsibilities for the execution of said plan be carefully defined.

16. Neither am I authorized nor do I consider it my proper function to suggest a solution to the above described difficulties. However, to prevent a breakdown of the already operating system, it seems necessary that it be reviewed and positive action taken.

17. The troublesome heel situation, is described in a separate report, which should be considered in conjunction with these statements.

18. In conversation with Col. Thomas, he asked why at this late date consideration should be given to a clarification and possible revision of duties concerned with warehousing and port liaison. I believe that the difficulties described above were always inherent in the system, but they have become aggravated and unmanageable due to the increased number of ports, as well as the increased number of warehouses and the increased volume of receipts and shipments.

## (Top Secret) E.O. 13526

Ref. 3/2/ 1946

SUBJECT : Complaint of Major Martin about Major Klein.

TO : Chief, Ports &amp; Warehouse Division, Transportation S/C

FROM : Major Robert H. Klein, Warehouse Branch

1. In response to your verbal request for a written answer to the letter on the above subject, dated 8 June 1946, ref. P/1056, from J. A. C. Pennington, Commissioner, AC/AMC Naples Command, and his enclosure from Major Martin, my remarks follow:

2. Reference Paragraph 2 of Col. Pennington's letter, Major Martin's work, by and large, has been satisfactory in my opinion.

3. Reference Col. Pennington's third paragraph, he states that he does not know me. I have spent in recent weeks approximately one hour in his office discussing warehouse matters. At that time, I was accompanied by Major Moore, who invited Major Martin to visit Col. Pennington with us. Major Martin refused.

4. Major Martin's letter, paragraph 2, is a series of untruths. I don't recall that I have ever "flown into a panic" at any time or any place, reference to Major Martin or others.

5. Long distance phone calls to Naples and other places are limited to 6 minutes by the regulations of the Communications Section by the SC.

6. Again referring to paragraph 2 of Major Martin's letter, it is suggested that "standing orders on procedures be disobeyed to suit my whim, etc." The orders for procedure established by Major Martin are an attempt to operate the warehouses on a civilian basis, ignoring the fact that they are actually operated under wartime conditions. I consider it good practice either to change procedures or to make exceptions thereto when they interfere with efficient operations. In my experience with AC/AMC warehousing in Italy, I have found it impossible to set up a standard operating procedure that can properly and efficiently cover all situations which may in the past or may in the future arise.

7. With reference to paragraph 3 of Major Martin's letter, it is indeed true that I recommended to Major Martin some weeks ago that warehouse #82 be closed at the earliest opportunity. At that time maximum information available to me indicated that receipts in Naples

- 2 -

would be comparatively small because of the opening of Genoa and continued use of Leghorn. When this situation changed because Genoa did not open as scheduled and Leghorn was closed for the receipt of civilian supplies, Naples' receipts increased and my instructions to Major Martin changed accordingly.

8. Capt. Ramsey is Port Liaison Officer in Naples, and why he should attempt to secure additional warehouse space rather than Major Martin, who is Officer in Charge of Warehouses, I do not understand. I was instructed by Col. Staff to secure additional warehouse space in Naples. I passed this instruction to Major Martin last week. This particular conversation resulted in Major Martin's letter of the 8th of June. Major Martin advised me over the phone that he was writing letters to various people reference to securing additional warehouse space. I stated to him that of the various warehouse space I had secured in various cities, it had all been obtained by personally going into the streets and finding space and then making a specific request upon the proper authority for the allocation of that space. Major Martin demurred and said he would not concern himself to follow such procedure. I did not think it necessary to report him to my superiors for insubordination at that time.

9. With reference to Major Martin's paragraph 4, the matters to which reference is made are routine matters. I do not understand the necessity of Major Martin's referring these to the Commissioner A&G Naples nor the necessity for the Commissioner's referring them to this Headquarters. I hold myself in readiness to discuss these details if called upon to do so.

10. Reference to Major Martin's fifth paragraph, it is offered that he is unable to do his job as Officer in Charge of Warehouses at the moment because he is relieving Major Bevere. The current warehouse situation in Naples is critical. It is likely to pass to a routine situation with the opening of Genoa and the actual large shipments from Naples warehouses, which are planned in the near future. During this present critical period, it would seem that local arrangements in Naples should be made so that Major Martin's full time might be given to his warehouse duties.

11. Major Martin's sixth paragraph seems to be irrelevant. I have always held myself responsible to my superiors, rather than to my subordinates.

12. Reference Major Martin's 7 paragraph, to the extent that Major Martin has been ordered by higher authority to come under my control, it is his first obligation, as a good soldier he suggests he is, to take orders and properly fulfill them.

13. It has always seemed to me that it was the obligation of the Warehouse Branch to accept and warehouse to the best of its ability all merchandise within its categories presented for storage. It is my considered opinion, considering the great handicaps under which this branch has sometimes

141

- 3 -

very well fulfilled this function. It seems to be Major Martin's idea that the only merchandise to be stored is that which under civilian warehouse practices, can properly and efficiently be stored. He has repeatedly suggested to me that merchandise be refused because of limited storage capacity. It is hardly necessary to state the advisability of meeting temporary warehousing problems by improvising.

14. It is suggested that Major Martin be retained in his present position for the next short time until the critical warehouse situation in Manila abates, and that he be told in positive terms precisely what his official relationship is to me.

SUBJECT : Report on Accounting in Northern Italy -  
Reference 3/A/Tn1 - 11 July 1945 by Capt. C. S. Wyatt

TO : R. M. Bassanello  
Chief, Ports & Ware. Division

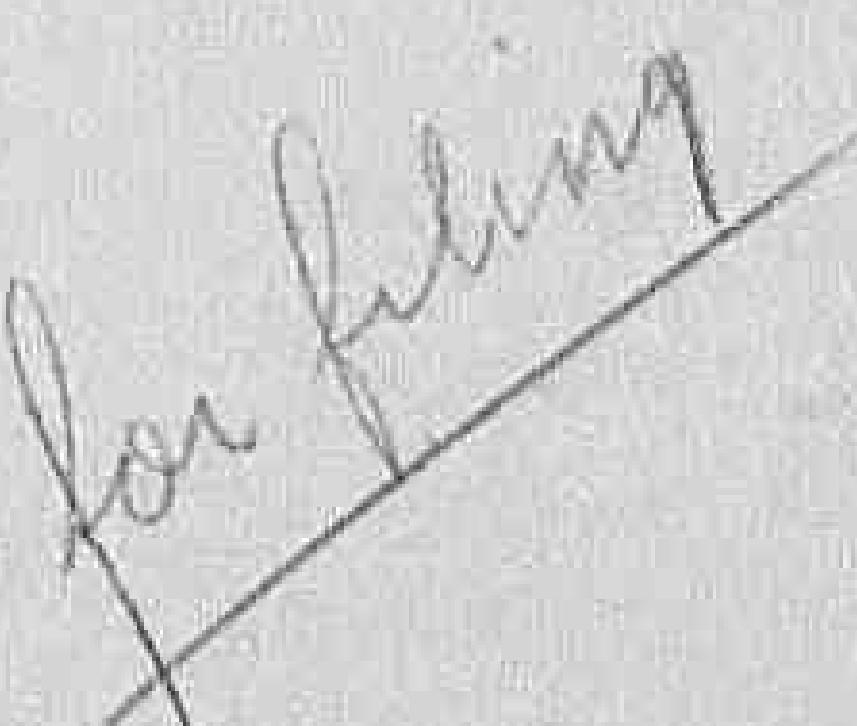

1. In Paragraph 6 (c) of the above-mentioned report a recommendation is made that Ports and Warehouse Division take action in reference to the port and warehouse personnel on duty in Trieste. It is stated that present personnel is inadequate in quantity and quality.

2. The Deputy Director of Transportation Sub-Commission stated sometime ago that Warehouse Branch would have no responsibility in reference to Trieste.

3. It is therefore suggested that no action should be taken by this Branch.

SUBJECT : Mine Security, Leghorn.

TO : Regional Commissioner,  
Toscana Region.  
(Thru Channels)

1. Three platoons of Italian soldiers, now being used to guard the newer food docks in Leghorn, will be sent elsewhere in the near future, leaving approximately seventy unarmed civilians as security.
2. The number of civilian guards can be increased; but in my opinion, unarmed civilians are not sufficient.
3. Efforts have been made in Leghorn, through the Prefect, and in Rome, by Major Klein, to replace these soldiers with other finance guards or carabinieri; however so far, no progress has been made.
4. Please advise us as to the availability of the Legion militia, armed guards available for this purpose.

## INTER OFFICE MEMORANDUM

Tel. 478700

8 June 1946

Ref. W/5/1077/m6

SUBJECT : Port Liaison - Bari Area

TO : Chief, Port and Warehouse Division ✓

1. Attached hereto is letter of 4 June 1946, reference  
BA/PL/1/11 A, from Lt. O'Leary, Port Liaison Officer, Bari.

2. Lt. O'Leary's position is slightly anomalous and has  
been so for some time.

3. There are several transportation officers assigned in  
Bari, but Lt. O'Leary, whose basic assignment has been Food,  
accounts for the warehouse branch in precisely the same manner  
in Bari as do our warehouse and Port Liaison Officers in such  
places as Naples, Leghorn, Ancona, Genoa, or Venice.

4. Under these circumstances, Lt. O'Leary's letter must  
be carefully considered and a decision reached in reference to  
his request for additional personnel. It should be borne in  
mind that cargo losses in Bari and satellite areas are higher than  
elsewhere in Italy. Only recently over 10,000 cases of milk were  
lost from a single vessel.

ALLIED COMMISSION  
LIAISON OFFICE  
B A R I

4 June 1945.

REF. : BA/PL/1/11 A  
SUBJECT : Port/Food Liaison - Bari Area  
TO : Food Sub-Commission  
HQ. Allied Commission  
APO 394  
& : Port & Warehouse Division  
Transportation Sub-Commission  
HQ. Allied Commission  
APO 394.

Reference recent expressions of dissatisfaction with conditions in this area, the following is presented for consideration:

1. In August of 1944 A.C.C. was withdrawn from the heel provinces, with the exception of Bari. This left me with accounting, shipping and a portion of the supply responsibilities for six provinces including the ports of Trapani, Bari, Taranto, Gellipoli and Barletta.
  2. As of 1 September 1944 warehouses and food supply stocks were turned over to the Consorzio Agrario as ordered. Subsequent orders, through Administrative and Food channels, were to the effect, that the progress of turning over work and responsibility to the Italians must be speeded up. Both authority and personnel were withdrawn - until early in 1945 I was left with one enlisted man and the designation of "Liaison". One O/R has subsequently been added.
  3. During the same period the flow of supplies, the volume of reports and paper work in general, as well the amount of direct action required of this office by the various Sub-Commission continually increased.
- Since being assigned here in December 1945 I have consistently urged that the volume of work was too great to be handled efficiently by one officer without at least a skeleton staff of military personnel.
- When I suggested to the Senior Supply Officer ~~of Region II~~, in January 1944 that Port and Warehousing was a full ~~time~~ job without distribution, transportation and accounting, I was assigned as Assistant Supply Officer.
- When I pointed out to the Regional Supply Officer, Region II, in the Spring of 1944 that there were three officers doing the same work on a considerably smaller scale at Taranto and for an administration. I was relieved of three enlisted men.

Reference recent expressions of dissatisfaction with conditions in this area, the following is presented for consideration:

1. In August of 1944 A.C.C. was withdrawn from the heel provinces, with the exception of Bari. This left me with accounting, shipping and a portion of the supply responsibilities for six provinces, including the ports of "indisi, Bari, Taranto, Gallipoli and Barletta.
2. As of 1 September 1944 warehouses and food supply stocks were turned over to the Consorzio Agrario as ordered. Subsequent orders, through Administrative and Food channels, were to the effect that the progress of turning over work and responsibility to the Italians must be speeded up. Both authority and personnel were withdrawn - until early in 1945 I was left with one enlisted man and the designation of "liaison". One C/H has subsequently been added.

3. During the same period the flow of supplies, the volume of reports and paper work in general, as well the amount of direct action required of this office, by the various Sub-Commissions continually increased.

Since being assigned here in December 1943 I have constantly urged that the volume of work was too great to be handled efficiently by one officer without at least a skeleton staff of military personnel.

When I suggested to the Senior Supply Officer, ~~Officer~~,  
in January 1944 that Port and Warehousing was a ~~full~~ ~~big~~ job  
without distribution, transportation and accounting, I was assigned as Assistant Supply Officer.

When I pointed out to the Regional Supply Officer, Region II, in the Spring of 1944 that there were three officers doing the same work on a considerably smaller scale at Taranto and asked for an adjustment, I was relieved of three enlisted men by Region II Headquarters. I was never again able to maintain a constant shift at Bari Port to trouble shoot and guard against mis-delivery of supplies.

After the other ports were added in September 1944, I constantly lobbied for help and pointed to the records as justification. I conferred with Bari Port Commandant and he pushed the matter through Area to Region Headquarters. I was informed by Southern Region and Bari Zone that the Italians must be made to do the work.

During the progress of the sea export program to Leghorn and Ancona, I asked all concerned for help. Transportation referred me to Food. Food referred me to Region. Region was unable to prevent the withdrawal of two of my three remaining enlisted men - or of their replacements three weeks later.

4. At the present time the volume of shipping is such that the amount of paper work, emergency trouble shooting, and necessary contacts with Movements over the area comprising Barletta, Brindisi, Taranto and Lecce, renders direct supervision and control of Consorzio and I.C.L. activities impossible.

It is requested, therefore, that a coordinated definition of the responsibilities attaching to Port/Food Liaison in this area be forwarded.

If more than liaison and general supervision is desired, may consideration please be given to personnel requirements.

  
Lt.  
Wallace M. Clegg (Food)

1434

Commander of Commandantate I.C.S. Detachments Possessions.

It is requested, therefore, that a coordinated definition of the responsibilities attaching to Port/Food Liaison in this area be forwarded.

INTER OFFICE MEMO

REK/er

Ref : W/15/858/TNG

14 May 45

SUBJECT : Report of Trip to Cesena and Forli Depots.

TO : Chief, Port & Warehouse Division, Transportation S/C.

1. Contacts were made with the following :

Lt. Col. TOSCANI, Sr. Supply Officer, AMG 5th Army  
Col. BOMBINO, Reg. Commissioner, Emilia Region  
Maj. SOWERS, Sr. Tr. Officer, Emilia Region  
Lt. PIERATTINI, Supply Officer, AMG 5th Army  
Lt. LESTER, Off.i/c Cesena/Forli Depots

2. Inventories continue to rise rapidly. With the prospect of early use of Genoa and Venice ports, and possibly Trieste, there may be some question whether heavy shipments to Cesena and Forli from Ancona should be continued as receipts are in excess of withdrawals. An unwieldy, unwanted stockpile may result.

3. One day last week shipments to Cesena from Ancona were ordered discontinued because there were about 90 rail wagons under load at Cesena, caused by insufficient labor. Labor was lacking because 3th Army AMG trucks used to haul workers to the depot from the country side were withdrawn. Altho this situation had been foreseen several weeks ago, and altho Maj. Hughes, then Emilia Region Sr. Transportation Officer had agreed to provide the necessary 10/12 trucks, nothing was done. The situation was so bad that Ancona depots had to request the S.S. TUBALI, a flour ship destined for Ancona, be held temporarily at Bari, because Ancona depots had no empty warehouse space, having planned to rail most of the flour ex S.S. TUBALI direct from shipside to Cesena.

4. Lt. Lester, Officer in Charge Cesena, failed in his attempt to get transport from the Region, but succeeded in borrowing a few trucks from a local British military unit. Lt. Col. Christensen has been in touch with Lt. Lester and apparently the situation is now in hand.

5. Lt. Col. Toscani, AMG 5th Army Supply Officer, agreed to loan 2 Officers and 2 Sets to Emilia Region for the operation of Cesena/Forli depots. Lt. Lester will remain for one or two weeks to train these new officers, and then will move to Venice or Trieste. (The two Officers are Lt. Pierattini and Lt. Bombino). This plan is subject to approval by this HQ and HQ Emilia

2. Inventories continue to rise rapidly. With the prospect of early use of Genoa and Venice ports, and possibly Trieste, there may be some question whether heavy shipments to Cesena and Forli from Ancona should be continued as receipts are in excess of withdrawals. An unwieldy, unwanted stockpile may result.

3. One day last week shipments to Cesena from Ancona were ordered discontinued because there were about 90 rail wagons under load at Cesena, caused by insufficient labor. Labor was lacking because 6th Army AMG trucks used to haul workers to the depot from the country side were withdrawn. Altho this situation had been foreseen several weeks ago, and altho Maj. Hughes, then Emilia Region Sr? Transportation Officer had agreed to provide the necessary 10/12 trucks, nothing was done. The situation was so bad that Ancona depots had to request the S.S. TUBAL, a flour ship destined for Ancona, be held temporarily at Peri, because Ancona depots had no empty warehouse space, having planned to rail most of the flour ex S.S. TUBAL direct from shipside to Cesena.

4. Lt. Lester, Officer in Charge Cesena, failed in his attempt to get transport from the region, but succeeded in borrowing a few trucks from a local British military unit. Lt. Col. Christensen has been in touch with Lt. Lester and apparently the situation is now in hand.

5. Lt. Col. Toscani, AMG 5th Army Supply Officer, agreed to loan 2 Officers and 2 Sets to Emilia Region for the operation of Cesena/Torri del Beni depots. Lt. Lester will remain for one or two weeks to train these new officers, and then will move to Venice or Trieste. (The two Officers are Lt. Pierattini and Lt. Bombino). This plan is subject to the approval of this HQ and HQ Emilia Region.

SUBJECT : Report of Trip to Forli, Cesena, Ancona ALCOM Depots

FROM : Port & Warehouse Division

TO : Chief, Port & Warehouse Division

1. Forli- a) Depot in good condition. Only about 500 tons closed storage space available (which will be filled shortly). Large amount of open space still available. Current inventory about 14,000 tons.  
b) Rail siding in efficient use.  
c) Depot at present under direct supervision of Maj. Kennedy, 8th Army AMG, with several O.R.'s. Accounts handled by Federazione Italiana dei Consorzi Agrari.
2. Cesena-a) Depot in fair condition - repair work continues. Closed storage availability estimated at 20/25,000 tons. Open storage availability more than possible demand. Current inventory about 5000 Tons.  
b) Rail siding in efficient use.  
c) Depot at present under direct supervision Lt. Lester, assigned Emilia Region, attached 8th Army AMG, with 9 EM/OR's. Accounts handled by Federazione Italiana dei Consorzi Agrari.  
d) Depot capable of accepting at least 500 T.P.D. by rail and road.
3. Ancona-a) Greater warehouse availability than anticipated demand.  
b) At present, wagons loaded at railhead with supplies trucked from warehouses. Arrangements were made with Mow. Rail Ancona to load inside port at railhead, direct from shipside and/or from port lorries. This will be in addition to present railhead loadings.  
c) Some slight difficulty in securing sufficient lorries to shuttle to railhead. Capt. Bent was contacted and will take action.

- open space still available. Current inventory about 14,000 tons.
- b) Rail siding in efficient use.
  - c) Depot at present under direct supervision of Maj. Kennedy, 8th Army AMG, with several O.R.'s. Accounts handled by Federazione Italiana dei Consorzi Agrari.
2. Cesena-a) Depot in fair condition - repair work continues. Closed storage availability estimated at 20/25,000 tons. Open storage availability more than possible demand. Current inventory about 5000 Tons.
- b) Rail siding in efficient use.
  - c) Depot at present under direct supervision Lt. Lester, assigned Emilia Region, attached 8th Army AMG, with 9 TM/OR's. Accounts handled by Federazione Italiana dei Consorzi Agrari.
  - d) Depot capable of accepting at least 500 T.P.D. by rail and road.

3. Ancona-a) Greater warehouse availability than anticipated demand.
- b) At present, wagons loaded at railhead with supplies trucked from warehouses. Arrangements were made with MoV. Rail Ancona to load inside port at railhead, direct from shipside and/or from port lorries. This will be in addition to present railhead loadings.
  - c) Some slight difficulty in securing sufficient lorries to shuttle to railhead. Capt. Bent was contacted and will take action.

4. Rail Progress -
- a) AQMIG, Cesena, agreed to assist in every way possible to maintain rail lift of between 4/500 T.P.D. with some hope of increasing to 800 T.P.D.
  - b) It is believed his assistance will be fruitful.

*cc/b6/fwd*

5. Future Cesena/Forli Program

- a) It was agreed with Maj. Hughes, Tn. Officer Emilia Region, Maj. Young, Economic and Supply Officer 8th Army AMG, Lt. Col. Toscani, Economic and Supply Officer 5th Army AMG, and Maj. Heardley, Food S/C that Emilia Region will operate both Cesena and Forli Depots immediately upon 8th Army's withdrawal. Lt./Maj./C.R.'s will be increased immediately by 4 or 5 E.M./C.R.'s to be transferred from Leghorn and Ancona.
  - b) It is understood by all that warehouse stocks at Cesena/Forli are and will continue to be considered as "national" stocks, subject to allocations only by the Food S/C.
6. General
- a) It is suggested the G.T. Co. now lifting from Ancona to Cesena remain, because of the uncertainty of the rail program.
  - b) Maj. Young and Heardley will order goods forward from Ancona to insure proper proportions of various supplies in the forward depots.
  - c) 5th Army AMG is immediately placing an officer at Forli depot to supervise the dispatching of vehicles from Forli with supplies for 5th Army, the withdrawal of which has already begun in small quantities.
  - d) It is NOT planned to open an "in-transit national" depot at Bologna.

- 2 -

SUBJECT : Personnel

FROM : Port &amp; Warehouse Division

TO : Chief, Port & Warehouse Division  
(Attn. Mr. Razzanella)

1. I have not received any advice from this sub-commission or from any other source, to indicate that Allied military personnel, is to be made available to staff those in-transit warehouses planned for Northern Italy, as well as personnel to staff those port warehouses and Port Liaison Assignments planned for Genoa, Venice and Trieste. My recommendation were contained in letter, Ref. 4/90/TM/..., dated 1 Dec 44, copy attached.

2. Request that I be advised whether personnel has been requested or is to be made available, what personnel, from what sources and when.

3. In the event that no personnel is to be assigned, may I be instructed how it is contemplated to effectuate the planned warehousing program.

ROBERT H. KLINE  
Major Ed. Adm.C.

3. All personnel (both officers and N.C.O.'S) requested should be men trained in depot work in such units as Q.M., R.A.S.C., Ordnance, War, etc.

4. At present personnel assigned to this station is spread so thin that there can be little contemplation of subsequently moving them North as new areas become active. It is possible that with a change in the tactical situation, a relocation of the personnel might, at some future date, be spared from Leghorn. However, it must be borne in mind that since Leghorn is today primarily a stockpiling area for the numerous areas North, it is contemplated that Leghorn perhaps will be necessary for other ports to accept them.

5. It is not contemplated that any of the port offices in which this section now operates (Naples, Leghorn & Sicily) will be demilitarized.

#### 6. Present assignment of personnel:

Officer	Enlisted
Rose	1
Mayhew	5
Leghorn	5
Unknown	4

7. At present there please of Italian soldiers (90 men) of AC are assigned for duty in Leghorn as warehouse guards. In Naples, there was sufficient Italian Army Guards available to furnish military Commanders in Genoa, Venice and Trieste do not furnish guards. The Italian soldiers are armed under control of Leghorn R.A.S.C. In Venice, civilian armed warehouse guards, who following Italian soldiers, are numbered by this file. 1.28

Genoa	3
Venice	5

Genoa	1
Venice	2

4. At present personnel assigned to this division is spread so thin that there can be little contemplation of subsequently moving them forth as new arose become active. It is possible that with a change in the tactical situation, a fraction of the personnel might, at some future date, be spared from Leghorn. However, it might be better in mind that since Leghorn is today primarily a stockpiling area for the populous areas north, it is contemplated that Leghorn personnel will be occupied in making water shipments at the same time as it will be necessary for other ports to accept them.

5. It is not contemplated that any of the port cities in which this section now operates (Naples, Leghorn & Sicily) will be demobilized.

6. Present statement of personnel:

Officer		Enlisted	
None	1	2	45
Holding	2	5	30
Leghorn	5	1	7
Income	1		3

7. At present there are 1,428 Italian soldiers (90 men) of AC HQ are assigned for duty in Leghorn as warehouse guards. In Naples, 220 have furnished Italian Army Guards under control of Section 3, P. S. In Ancona, civilian armed guards have been furnished by the local ANC Hq. If the Local Military Committee in Cesena, Ventimiglia and Trieste do not furnish sufficient guards, the following Italian soldiers may be furnished by this H.Q.

Cesena	3	P.M.

3. All personnel (both officers and U./O.R.'s) requested should be men trained in depot work in such units as S.C., R.A.S.C., Ordnance, etc., etc.

4. At present personnel assigned to this Division is speeded so thin that there can be little contemplation of subsequently moving them North as new areas become active. It is possible that with a change in the tactical situation, a fraction of the personnel might, at some future date, be spared from Leghorn. However, it must be borne in mind that since Leghorn is today primarily a stockpiling area for the源源ous areas north, it is contemplated that Leghorn personnel will be engaged in making voter shipments at the same time as it will be necessary for other ports to accept them.

5. It is not contemplated that any of the port cities in which this section now operates (Naples, Leghorn and Ancona) will be demilitarized.

6. The situation today is even more acute than contemplated at the time the above quoted letter was written. Altho the men formerly assigned to this sub-commission for warehouse work are now assigned to the regions, the same work is being done and will have to be done in the areas as liberated. Further, inland transit warehouses must be opened and operated in the immediate future (two are already functioning).

7. Despite this, fewer officers and U./O.R.'s are at present assigned for warehouse work in ALL Italy than were assigned one year ago in Naples only.

8. It is most urgently requested that the above requested 10 officers and 40 N.M. be assigned to the sections as indicated, at once, to prevent a complete breakdown of the handling of dotted civil supplies.

1. In my various requests for the enforcement of a standard method of advising receipts into and authorising releases from these warehouses, I imagined I had recorded all the non-standard methods. My imagination has failed.

2. At 1700 hours on 16 Apr 45 a Capt LSE (B) arrived here with three lorries from Bari. His task was to collect five tons of Newsprint, which he said had been loaned by Mr. White, Commerce C. to M.L. Albania, by arrangement, three days previously, with Capt. P.C. Jeffrey C.5. R.F.H.Q.

3. Capt. Lee had no documents whatsoever to connect him with the Rennstiel.

4. Capt. Jeffrey called Rome (from A.F.M.Q.) only to find  
White and his secretary had gone to Florence.

5. Mr Bagnasco (Italian Manager here), quite in accordance with good warehouse procedure and that laid down for these warehouses, demands written Release Orders.

6. In this instance I accepted the responsibility of issuing the Release Order and the goods were delivered.

7. Some day this haphazard method of doing business will result in a grave error being committed, with consequent loss of valuable material and the inevitable hunt for a scapegoat.

(over)

8. DNA/HI/25 Oct 44, "Disposition of Imported Civil Supplies", is one of the orders on which these warehouses are run.

9. May a copy be sent to Mr White please, and his attention invited in particular to para 9 (b) and (d), regarding the transaction under discussion. If Capt Jeffrey's dates are correct, Mr White had ample time to comply with these orders.

10. In the meantime I intend to enforce Col Adams' orders unless I receive counter orders from you and I advise that all Sub Comms be advised accordingly.

W.T. Martin

Copy to Headquarters and Mr. T. Martin.  
Colonel Whitehead and Major, R. Signals, from L.A.D.  
and Mr. T. Martin and I both O/C these A.M.C. Naples ports  
will be advised accordingly.

and having had the task of preparing the original order  
and the necessary documents for the same, I have now  
arrived at the following conclusions:  
1. The original order was issued by the Commandant of  
the port of Naples (Col. W. A. Morris) and copies were made  
of the same and forwarded to the Commandant of the  
port of Salerno (Col. T. Martin) and to the  
Commandant of the port of Civitavecchia (Col. G. C. G. G.)

and the Commandant of the port of Taranto (Col. G. C. G.)  
and the Commandant of the port of Brindisi (Col. G. C. G.)

and the Commandant of the port of Cagliari (Col. G. C. G.)  
and the Commandant of the port of Palermo (Col. G. C. G.)  
and the Commandant of the port of Messina (Col. G. C. G.)  
and the Commandant of the port of Catania (Col. G. C. G.)  
and the Commandant of the port of Trapani (Col. G. C. G.)

and the Commandant of the port of Giovinazzo (Col. G. C. G.)  
and the Commandant of the port of Taranto (Col. G. C. G.)

and the Commandant of the port of Brindisi (Col. G. C. G.)  
and the Commandant of the port of Cagliari (Col. G. C. G.)  
and the Commandant of the port of Palermo (Col. G. C. G.)  
and the Commandant of the port of Messina (Col. G. C. G.)  
and the Commandant of the port of Catania (Col. G. C. G.)  
and the Commandant of the port of Trapani (Col. G. C. G.)

SUBJECT : Major Klein's Report on Visit to  
Naples Warehouses - 5-6 April.

TO : M. B. Thomas, Colonel  
Deputy Director

1. Attached hereto you will find report submitted by Major Klein  
as per subject.

2. In connection with Paragraph 6 thereof, I am fully in accordance with suggestions made by Major Klein to have several E.M./O.R.'s assigned for duty with Major Martin. As a matter of fact, if Major Martin is to be transferred to Rome, it is advisable to increase the present staff at Naples which seems to be an appalling necessity. Withdrawal of Major Martin and Sgt. Miller from the Naples warehouses should be postponed until this situation is cleared, particularly, if additional staff is assigned, as time will be needed for their training.

3. Regarding the statement in Paragraph 7, it seems to me that Major Marks should be released. He has officially requested his release because of failing health and under these circumstances I believe it inadvisable to keep him in his present assignment, since he cannot be as efficient as he might be otherwise. As a matter of fact, Major Klein has called my attention to several and continued happenings in the handling of the work at Naples with which Major Marks is concerned, which are certainly far from satisfactory.

1.- Report

LINTER OFFICE MEMO

RHT/er

Ref : W/7/624/TNG

SUBJECT : Report of Visit to Naples Warehouses 5/6 April 45  
by Major Klein.

FROM : Port & Warehouse Division

TO : Director, Transportation Sub-Commission

1. Warehouse receipts and shipments are to a peak compared to recent activities. Nine ships with cargo in excess of 15,000 tons were discharging. Outbound rail loading average in excess of 10 wagons per day.

2. Major Martin had reported insufficient covered warehouse space to handle expected arrivals. Warehouse inspection disclosed such items as printing ink, evaporated milk and calcium carbide stored inside which could be stored outside without cover. Further it was not difficult to arrange the repositioning of a large quantity of salvage canvas from P.D.S. which will permit large tonnages of other supplies now stored inside to be moved into the several yards. Warehouse space will not constitute a problem, and it will not be necessary to acquire additional premises, as Major Martin first suggested.

3. Heavy program of future shipments was discussed.  
A program of 10/15 wagons daily is expected to continue 20-  
30 days. Very large arrivals are also anticipated.

4. A meeting was held with the local management of the  
Major Martin. The insufficiency of the Italian managerial personnel was discussed. It was stressed that present personnel  
merely the actual warehouse management but also referred to  
weakness in the accounting staff. Corrective measures were  
promised, but it is the writers opinion that a change will be  
slow in coming. The present principals have difficulty in  
envisioning the over-all picture, on the one hand, and have not  
been able either to secure labor that doesn't need "driving"  
or to "drive" the presently employed labor.

named to recent activities. Nine ships with cargo in excess of 15,000 tons were discharging. Outbound rail loading average in excess of 10 wagons per day.

2. Major Martin had reported insufficient covered warehouse space to handle expected arrivals. Warehouse inspection disclosed such items as printing ink, evaporated milk and calcium carbide stored inside which could be stored outside without cover. Further it was not difficult to arrange the repositioning of a large quantity of salvage canvas from U.S. which will permit large tonnages of other supplies now stored inside to be moved into the several yards. Warehouse space will not constitute a problem, and it will not be necessary to acquire additional premises, as Major Martin first suggested.
3. Heavy program of future shipments was discussed.  
 Rail program of 10/15 wagons daily is expected to continue for a month or more. In addition, two water movements out, one of 5000 tons and another 1900 tons are scheduled within the next 30 days. Very large arrivals are also anticipated.
4. A meeting was held with the local management of the Federazione Italiana dei Consorzi Agrari, their superiors and Major Martin. The insufficiency of the Italian Managerial personnel was discussed. It was stressed that present personnel was both inadequate in quantity and quality. This covered primarily the actual warehouse management but also referred to weakness in the accounting staff. Corrective measures were promised, but it is the writers opinion that a change will be slow in coming. The present principals have difficulty in envisaging the over-all picture, on the one hand, and have not been able either to secure labor what doesn't need "driving" or to "drive" the presently employed labor.
5. A visit to the Port showed tremendous backlog of AC merchandise. Explanation was that AC warehouses were not able to accept as fast as Port delivered. Major Martin stated Depot 676, could not handle over 20 tons per hour in. This is extremely bad. The average should be nearer 60 tons per hour at either Depot 676, 677 or 696. Truck turnaround has been exceedingly slow. It is not unlikely AC will receive a letter of protest from Port authorities reference AC's inability to accept merchandise more rapidly.

- 2 -

6. After careful analysis of the situation and prolonged conversation with Major Martin and the Italians in charge, it is thought that the immediate withdrawal of Major Martin and Set. Major from the Naples warehouses will cause such a state of confusion that it is most doubtful whether the planned program of receipts and shipments for the next two months can be met. In order to prevent a complete breakdown, it is believed the Allocated military staff should be increased by at least 4 well trained S.M./O.R.'s. These should remain on duty with Major Martin until the presently increasing stockpile is depleted. Major Martin states he "can easily hand over completely to the Federazione Italiana dei Consorzi Aziendali, BUT their ability to accept is entirely another matter".

7. Also, as indicated in para. 4, my letter W/7/596/TM6 to Deputy Director TN.C.O., the writer of Port Liaison has perhaps not been my responsibility, a careful check was made of this situation in Naples. Despite the fact that Major Marks has had adequate information from HQ both by letter and phone conversation relative to the use of I.C.E. personnel, we had not availed himself of their services. Further, his manner of handling port liaison, in particular the S.O.P. (which is the basis of AC port liaison in a military port) is completely inadequate. It is believed Major Marks is not qualified for the position he occupies, not only for the reasons stated but for numerous others. (Details can be given if desired). Major Powers concurs in this view.

8. A meeting was held 6 April 45 in the Offices of Depot 576 at which were present Majors Martin, Marks, Klein, Capt. Thos. Ramsey, Sig. Visco and Sig. Bagmasco of the Federazione dei Consorzi Aziendali and Sig. Bordini of I.C.E. Procedures from ship arrival in Naples port to arrival of merchandise at AC warehouse were described. The proper use of the S.O.P., the use of Federazione dei Consorzi Aziendali and ICE personnel were agreed. It is hoped that by 1 May 45 the plan will actually function in toto.

9. Recommendations:

- a) Rome HQ of Federazione Italiana dei Consorzi Aziendali be advised of the seriousness of the situation at Naples warehouses and requested to take necessary action (Sig. Mizzii was so advised today).

b) Your experienced S.M./O.R.'s be assigned to

*Ad Sessant*

italiane dei Consorzi "merci", but their ability to accept is entirely another matter".

7. Altho, as indicated in para. 4, my letter W/7/596/TNG to Deputy Director Mr. S./C., the matter of Port Liaison has perhaps not been my responsibility, a careful check was made of this situation in Naples. Despite the fact that Major Marks has had adequate information from HQ both by Letter and phone conversation relative to the use of I.C.S. personnel, he had not availed himself of their services. Further, his manner of handing port liaison, in particular the S.O.E. (which is the basis of AG port liaison in a military port) is completely inadequate. It is believed Major Marks is not qualified for the position he occupies, not only for the reasons stated but for numerous others. (Details can be given if desired). Major Powers concurs in this view.

8. A meeting was held 6 April 45 in the Offices of Depot 576 at which were present Majors Martin, Marks, Elsin, Capt. Thos. Ramsey, Sigs. Visco and Sis. Bezzaneccio of the Federazione dei Consorzi Agricoli Sic. - Bordoni of I.C.S. Procedures from ship arrival in Naples port to arrival of merchandise at AC warehouse were described. The proper use of the S.O.E., the use of Federazione dei Consorzi Agricoli and AG personnel were agreed. It is hoped that by 1 May 45 the plan will actually function in toto.

9. Recommendations:

- YR*
- a) Four experienced I.M./O.R.'s be assigned to Major Martin.
- b) Four officers be assigned to Major Martin move his office from Depot 576 to the Provincial Building be postponed at least 60 days (Major Marks has already moved - Major Martin is preparing to move).
- c) Major Marks be replaced by Lt. Mitchell, who is now Port Liaison Officer, Leghorn.
- d) Lt. Mitchell be replaced by Lt. Delmerico, who is now Ass't Port Officer, Ancona.
- e) Another officer (preferably a junior officer) be assigned to Ancona.
- MH*

INTER. OPINION - MLC

Ref : W/3/659/TMG

13 April 45

SUBJECT : Report of visit to Leghorn Warehouses - by Maj. Leinster  
April 10/11 1945

FROM : Port & Warehouse Division

TO : Chief, Port & Warehouse Div. (Att.Ltr.Bazzanella)

1. Leghorn operation is progressing relatively satisfactorily. In contrast to receiving difficulties in Naples, Leghorn depots accepted 2500 tons in one three day period, and shipped approximately 1000 tons at the same time. The 1000 tons did NOT include 73 rail wagons of cased vehicles dispatched during the same three days. Federazione Italiana dei Consorzi Agrari is actually employing less laborers to handle the same tonnages as were handled under the ACCM management.

2. Security has improved and there have been no recent reports of major pilferage.

3. Warehouses are in orderly condition. Most of covered storage space is now in use. Little additional covered space could be made available with further roofing repairs, this is not considered advisable due to anticipated program of releases.

4. There appear to be four reasons for the relatively satisfactory conditions at Leghorn:

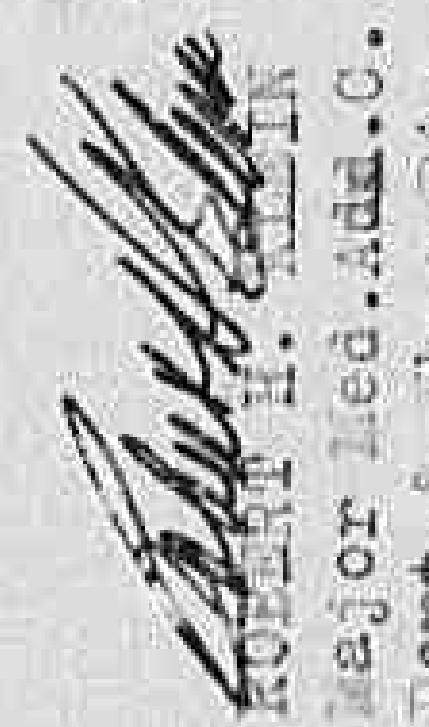

- a) Capable supervision by ACCM officer personnel
- b) The fact that the majority of the U.S./U.K.'s are still on duty.
- c) The good quality of the Federazione Italiana depots
- d) Consorzi agrari management, especially Mr. Campani.

5. Consideration is being given to adopting the same pay system in Naples and Ancona.

*Mark L. Miller*  
ACC M. D. C. S. 1420

1. Leghorn operation is progressing relatively satisfactorily. In contrast to receiving difficulties in Naples, Leghorn depots accepted 2,600 tons in one three day period, and shipped approximately 1,000 tons at the same time. The 1000 tons did NOT include 73 rail wagons of cased vehicles dispatched during the same three days. Federazione Italiana dei Consorzi Lavori is actually employing less laborers to handle the same tonnages as were handled under the ALCCN management.

2. Security has improved and there have been no recent reports of major pilferage.
3. Warehouses are in orderly condition. Most of covered storage space is now in use. Although additional covered space could be made available with further roofing repairs, this is not considered advisable due to anticipated program of releases.
4. There appear to be four reasons for the relatively satisfactory conditions at Leghorn:
  - a) Cetabile supervision by ALCCN officer personnel
  - b) The fact that the majority of the T.I./C.T.'s are still on duty.
  - c) The good quality of the Federazione Italiana delle Consorzi Lavori management, especially Dr. Campioni.
  - d) The incentive scheme of pay by which the workers are paid. They are guaranteed a certain minimum and receive additional based on the number of tons handled in and out of the warehouses.
5. Consideration is being given to adopting the same pay system in Naples and Ancona.

2 APR 45

SUBJECT : Inspection Trip to Naples - JAMES B. HURLEY  
(your 653/1/TNG - 26 Mar 45)

FROM : Port &amp; Warehouse Division

TO : Deputy Director, Transportation Sub-Commission.

1. The A/M letter came to my attention by means of float file.

2. Mr. Hurley's report was not submitted to me, but was shown to me, in passing, by Mr. Bezzanella. I commented, verbally, to Mr. Bezzanella that those parts of the report referring to shortages between shipside and warehouse were superficial and misleading. Further, they questioned the accuracy of certain statements made by me. Support of those statements made by me is available in my files.

3. What seems to me (and has seemed to me for a long time) the important part of the situation is being overlooked. I refer to the control of cargo between shipside and warehouse - the losses that occur between these points.

4. For several months, I have unsuccessfully attempted to ascertain the responsibility for this control. In the absence of direction, I have assumed (perhaps erroneously) a portion of this responsibility. In part, I have been severely criticized for my actions.

5. The personal element is of the slightest importance. The fact is that substantial quantities of cargo have gone astray, and not been recovered. Further, there seems to be no established procedure for checking and taking necessary action to recover lost cargo or to prevent further losses.

6. In the absence of clear cut direction, and careful overall supervision, it is my belief that similar losses will continue when I.C.E. and Federazione dei Consorzi become responsible for accepting delivery at shipside, as of 1 May 45. I offer the current situation at Seri to support my views.

7. The fact that the losses under the new arrangement will be borne directly by the Italian Government does not

Further, they questioned the accuracy of certain statements made by me. Support of those statements made by me is available in my files.

3. What seems to me (and has seemed to me for a long time) the important part of the situation is being overlooked. I refer to the control of cargo between shipside and warehouse - the losses that occur between these points.

4. For several months, I have unsuccessfully attempted to ascertain the responsibility for this control. In the absence of direction, I have assumed (perhaps erroneously) a portion of this responsibility. In part, I have been severely criticized for my actions.

5. The personal element is of the slightest importance. The fact is that substantial quantities of cargo have gone astray, and not been recovered. Further, there seems to be no established procedure for checking and taking necessary action to recover lost cargo or to prevent further losses.

6. In the absence of clear cut direction, and careful overall supervision, it is my belief that similar losses will continue when I.C.I. and Federazione dei Consorzi Agrari become responsible for accepting delivery at shipside, as of 1 May 45. I offer the current situation at Fari to support my views.

7. The fact that the losses under the new arrangement will be borne directly by the Italian Government, does not eliminate the moral responsibility upon Allied Commission to assist and direct within its ability.

8. The Accounts Branch is preparing a summary of "Cut-offs" reports for this year to date on ships arriving at Fari, Ancona, Naples and Leghorn.

9. May I suggest that this entire matter be the subject of investigation, to the end that a workable procedure be established under competent, clear cut responsibility?

*John H. K. IN*

INTER OFFICE MEMO

RHK/er

7 Mar 45

Ref : W/7/438/TN6

SUBJECT : Functions of the Warehouse Branch

TO : MR. BAZZANELLA, Port & Warehouse Division

1. The Warehouse Branch is interested only in the warehousing of imported civilian supplies arriving in military ports, and in in-transit warehouses used for temporary stock-piling. Actual warehouse operations are responsibility of AIC or the Regions. At present, warehouses to which this section gives technical advice are situated in Naples, Leghorn, Ancona and Taranto. The situation in Bari is a bit obscure.

2. Technical advice is somewhat difficult of exact definition. However, matters of General warehouse policy are determined and disseminated by this office. Apportionment of personnel between the warehouses is controlled from here in conjunction with the warehouse officers. Supervision of warehouse operations, control of security, etc. are to some degree "controlled" from here.

3. This office receives advice from AFHQ, G-5 section, of expected arrivals. Using this as a basis, ships are "followed" to the port of destination. By consultation with interested Sub-Commissions, desired disposition of imports is ascertained. This office passes this advice( ship; port of arrival, time of arrival, cargo and disposition) on to the Port Liaison Officer and Warehouse Officer in the appropriate place. (This covers not only the military ports, but the non-military ports as well, when cargos originate in U.K. or U.S.). As necessary, this office enters rail and water bids for subsequent movement of the imported civil supplies.

4. By a system of reports and records, this office checks the fulfillment of the instructions mentioned in para 3 above. Necessary action is taken to insure some measure of efficiency.

5. At the present moment, the actual operation of the warehouses is being turned over to the Federazione Italiana dei Consorzi Agrari, but continued supervision, (with greatly reduced Allied military staffs at the warehouses) will be necessary. Disbanded personnel will be assigned to new locations.

Regions. At present, warehouses to which this section gives technical advice are situated in Naples, Leghorn, Ancona and Forli. The situation in Bari is a bit obscure.

2. Technical advice is somewhat difficult of exact definition. However, matters of General warehouse policy are determined and disseminated by this office. Apportionment of personnel between the warehouses is controlled from here in conjunction with the warehouse officers. Supervision of warehouse operations, control of security, etc. are to some degree "controlled" from here.
3. This office receives advice from AFHQ, G-5 section, of expected arrivals. Using this as a basis, ships are "routed" to the port of destination. By consultation with interested Sub-Commissions, desired disposition of imports is ascertained. This office passes this advice( ship; port of arrival, time of arrival, cargo and disposition) on to the Port Liaison Officer and Warehouse Officer in the appropriate place. (This covers not only the military ports, but the non-military ports as well, when cargos originate in U.K. or U.S.). As necessary, this office enters rail and water bids for subsequent movement of the imported civil supplies.
4. By a system of reports and records, this office checks the fulfillment of the instructions mentioned in para 3 above. Necessary action is taken to insure some measure of efficiency.
5. At the present moment, the actual operation of the warehouses is being turned over to the Federazione Italiana dei Consorzi Agrari, but continued supervision, (with greatly reduced Allied military staffs at the warehouses) will be necessary. Relieved personnel will be assigned to new locations further North as the tactical situation changes.
6. When the already approved plans relative to Istituto Comercio Estero(ICE) function better, certain of the work arranging disposition of imports will no longer be done here.

Ref : W/12/228/TN6

SUBJECT : Advice of Anticipated Arrivals  
(your Ref. MCS/C-7, 24 Jan 45)

TO : Econ & Supply Section, G-5, AFHQ - APO 512, U.S. Army

1. The general tone of the A/M letter indicates that our letter 12/12/TN/W., 3 Jan 45, was intended as an adverse criticism of the work of your section. This is far from the case. Our letter was written at the request of your office.
2. When this office can not be sure that quantity information from you as to tonnages expected is ALL inclusive, it becomes extremely difficult for us to be certain that the collateral information we receive from other sources is complete. This is true because the collateral information sources are more or less "gratuitous" rather than "official".
3. When information of omissions is contained in later advices, it is frequently too late for use at the port of discharge because the ship is already unloaded.
4. The purpose of our previous letter and of this one as well is to call attention to the handicaps under which we operate, in hopes the system can be changed to the benefit of all concerned.

For the Chief Commissioner:

24 January 1945

SUBJECT: Advice of Anticipated Arrivals

TO : Headquarters, Allied Commission, APO 394,  
Transportation Sub-Commission,  
Warehouse Section, Shipment, Port and  
Warehouse Division.

Reference your letter 12/12/TM/1 dated 3 January 45.

1. Please note the following comments upon the "errors and omissions" listed in your letter.

a. James Bowie - BA 190 in UGS 53 (Your para 2).

Rivetting Numbers and Spares, 256 lbs, and Welding Rod, 3728 lbs (not 3928 as quoted in your letter) are definitely shown on the manifest of this vessel as being for A.M.C. (TOC). This branch letter of even number dated 31 October 44 confirmed this point and supported it with a copy of the manifest. It is realised that no trace of discharge of these items can be found - this however is not an inaccuracy in our notification to you.

b. Joseph Pulitzer - HR 653 in UGS 55 (Your para 3).

It is agreed that the 19 tons (not 39 tons as quoted in your letter) of currency, shown on the manifest of this vessel, were notified to you as "Printed Matter". It is pointed out, however, that this advice was corrected in MGS/C-7 dated 24 October 44 (para. 5 (a) (i)) to which please refer.

c. Oliver Perry - UGS 56 (Your para 4).

Can not trace this ship in UGS 56. Request more detail as this is thought to be AC coastwise traffic.

d. John Jay - BA 535 in UGS 56 (Your letter para 5 quotes "HR 535").

The manifest of this vessel was not received in time for the details to be included in the relevant 10-day letter. On receipt of the manifest, which arrived with the papers of the following convoy, Allied Commission was advised full details by telephone, and these were confirmed in our letter C-7 dated 12 November 44.

**CONFIDENTIAL**

**CONFIDENTIAL****E. Collier - RA 554 in UGS 57 (Your para 6).**

There is no item of "Paper, 3 tons" for AC shewn on the manifest of this vessel. Total quantity of paper in the cargo is approx. 90 tons "Plank Paper" consigned to U.S. Office of War Information.

**F. Joseph Alston - RA 582, and Samuel Adams - RA 588 (NOT RA 368), both in UGS 59 (Your para 7).**

A re-examination of your copies of the manifests of these vessels will shew that in each case the cargo in question is clearly endorsed "Signal AMG" and also, apparently, with TOG numbers. Subsequent to our advice to AC of these items, however, further information was received which revealed that these signal stores were not in fact for AMG. This information was immediately passed to AC (Letter C-7 dated 20 December 44 refers) and it is not understood, therefore, what the present problem is.

**G. James Hoban - RA 575 in UGS 59 (Your para 8).**

It is agreed that a cargo of Deck Paint and Lard, consigned to AC, was carried by this vessel and shewn on the manifest. The documents of this vessel were not forwarded to us with the papers for UGS 59 and the omission has only recently come to light. Arrangements have now been made to rectify such omissions on the part of MTOUSA.

**H. Richard Call. (Your para 9).**

This vessel loaded at Oran on 12 October 44, a cargo of U.S. Army subsistence (Class 'B' mixed and Class 'D' Special rations) and Engineer stores, including 10 bundles of shovels. It would appear that AC have accepted some of these items in error. Otherwise it is suggested that the Powdered Milk and Dry Veg. referred to form part of an AC Intra-Mediterranean transhipment.

**I. John Mason - IR 663 in UGS 55 (Your para 9).**

This vessel carried cargo consisting exclusively of U.S. Air Ordnance. Nothing of the nature of Engineer Supplies appears on the manifest.

**J. Scott - IR 875/CH 276 in UGS 61 (Your para 10).**

No item resembling "1999 cases Luncheon Meat" appears on this manifest. The nearest approach is a consignment of 5810 cases Corned Beef, marked "AC Class I Non-Perishable subsistence", and not marked TOG.

**K. Roger Williams - RA 622 in UGS 61 (Your para 11).**

It is agreed that this vessel carried 11 tons Deck Paint for AC. Please refer to our remarks at para 'G' above.

1415

**L. Fort Laird - Convoy MKS 67 (Your para. 13).**

This vessel carried 350 tons Caustic Soda from Mid East, consigned to "Ordnance Officer, Port of Discharge". It is presumed that the 160 tons taken on charge by AC are part of this consignment.

**CONFIDENTIAL**

**CONFIDENTIAL****M. Hermitton - KK 161 in EMS 72 (Your para 14).**

There is no trace of any Steel Cable or Wire on the manifest of this vessel, either for AG or for any other consignee.

**N. Samspring - KK 151 in MAS 69 (Your para 15).**

This cargo of Anti-Typhus units was notified to you in MCS/C-7 dated 3 December 44 - the manifest having arrived too late for inclusion in MCS/C-7 dated 23 November 44.

**O. Samuel Griffin - PA 638 in UGS 62 (Your para 16).**

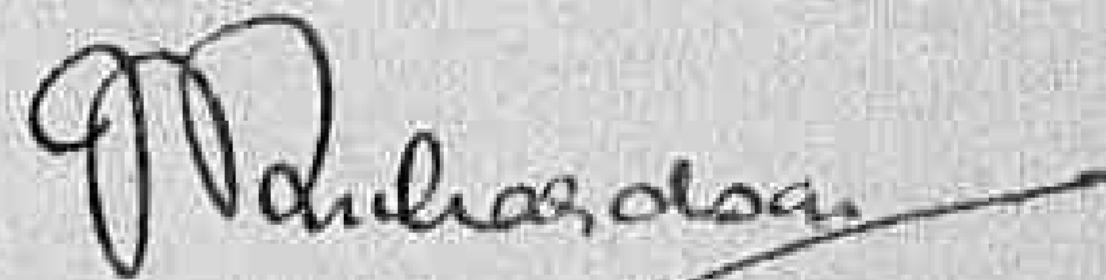

See remarks at para 'N'. Details of this vessel were passed to you in para 7 D of MCS/C-7 dated 23 December 44.

**P. George Davis - PA 631 in UGS 63 (Your para 17).**

Manifest was received too late for inclusion in MCS/C-7 dated 23 December but was notified in MCS/C-7 dated 31 December.

2. It would greatly facilitate the investigation of any further enquiries if more complete and accurate data is provided, such as the full names of vessels and their correct code and convoy numbers.

For the Acting Assistant Chief of Staff, G-5:

J. RICHARDSON  
J. Comd. ATS  
Economics & Supply Division.

SUBJECT : Errors and Omissions in Advices of Expected  
Arrivals

TO : Economics &amp; Supply Section, C-5, AFHQ, APO 312

1. Below are listed a number of errors and omissions in advices of expected tonnages received by this HQ from C-5, AFHQ. The list is not complete but is indicative of the frequency of receipt of inadequate and erroneous information. This letter is forwarded at the phoned request of Economics & Supply Section, C-5, AFHQ.
2. 165/c-7, 14 Sept 44 advised JAMES BOWIE, USCG 53-2A 490, contained 256 Lbs Riveting hammers and spares, 3915 Lbs welding rods. This cargo HOT indicated on manifest, noted was it found on ship when it discharged at Leghorn.
3. 165/c-7, 4 Oct 44 advised JOSEPH PULITZER, USCG 55-HR 653, contained 39 Tons AC printed letter. Manifest indicated cargo was NO AC cargo.
4. In USG 56, no advance notice was received of expected arrival of OLIVER PERRY, which actually discharged 351 tons dry veg at Leghorn.
5. In USG 56, no advance notice was received of expected arrival of HR 535, JOHN JAY which actually discharged 351 tons dry veg at Leghorn.
6. In USG 57, no advance notice was received of expected arrival of COLLIER which actually discharged 36 Tons paper at Leghorn.
7. 165/c-7, 12 Nov 44, advised AC cargo on RA 582

1. Below are listed a number of errors and omissions in advices of expected tonnages received by this HQ from C-5, AFHQ. The list is not complete but is indicative of the frequency of receipt of inadequate and erroneous information. This letter is forwarded at the phoned request of Economics & Supply Section, C-5, AFHQ.

2. UGS/c-7, 14 Sept 44 advised JAMES BOTT, UGS 53-BA 490, contained 256 Lbs Riveting hammers and spares, 3918 lbs welding rods. This cargo NOT indicated on manifest, nor was it found on ship when it discharged at Leghorn.
3. UGS/c-7, 4 Oct 44 advised JOSEPH PULITZER, UGS 55-HR 653, contained 39 Tons AC Printed Matter. Manifest indicated cargo was NOT AC cargo.
4. In UGS 56, no advance notice was received of expected arrival of OLIVE PERIN, which actually discharged 0 Tons of Medicinal Supplies at Leghorn.
5. In UGS 56, no advance notice was received of expected arrival of MR 535, JOHN JAY which actually discharged 351 Tons Dry Veg at Leghorn.
6. In UGS 57, no advance notice was received of the expected arrival of COLTIER which actually discharged 0 Tons Paper at Leghorn.
7. UGS/c-7, 17 Nov 44, advised AC cargo on BA 582 JOSEPH ALSTON and BA 380 SAMUEL ADAMS in UGS 59. Manifest indicated advised cargo was Signal Corps end NOT AC.
8. In UGS 59, no advance notice was received of the expected arrival of BA 575, JAMES ROBAN which actually discharged 9 Tons Deck Paint and 523 Tons Lead at Leghorn.

9. No advance notice was received of expected arrival of RICHARD CALL, convoy unknown, which actually discharged 1200 ea. shovels, 82 Tons Pd. Mills, and 90 Tons Dry Veg at Lehorn about 20 Nov 44.

10. No advance notice was received of expected arrival of MASON, convoy unknown, which actually discharged 1 EX Steel Files, 12 BX. Engt. Supplies and 59 bundles of Shovels at Lehorn about 20 Dec 44.

11. No advance notice was received of expected arrival of SCOTT, which actually discharged 1,399 cases Luncheon meat at Lehorn about 20 Dec 44.

12. In UGS 61, no advance notice was received of expected arrival of WILLIAMS which actually discharged 11 Tons Paint at Lehorn about 30 Dec 44. When this HQ advised C-5 by phone of the above, it was definitely stated same was not on manifest. Cargo has been received and bears TOC number.

13. No advance notice received of expected arrival of P.T. LATRO which actually discharged 160 Tons Caustic Soda at Naples about 17 Dec 44.

14. UGS/c-7, 23 Dec 44, advised EX 161, HARRATOK contained 41 Tons Mobile A/T units. This HQ is advised ship carries approx. 10 Tons Steel Wire Cable.

15. UGS/c-7, 23 Nov 44, failed to advise of expected arrival of SAW SPRING with 41 Tons Mobile A/T units actually discharged at Naples.

16. No advance notice was received of expected arrival of EX 636 SAMUEL CRIPPS in UGS 62, which actually discharged 490 ea. Tires and 1395 Tons meat at Lehorn.

17. UGS/c-7, 23 Dec 44, failed to include 961 ea. Tires as part of the AC. cargo on GEORG DAVIS in UGS 62

Memorandum:

Subject: Report of "Survey" of AMG Food Warehousing in Naples.

1. This informal comment is a confirmation of the conversation in the office of Lt. Col. Warren, a few nights ago, at which Maj. Rex Thompson was also present. Certain statements were made at that time, and I wish to put them in writing here.

2. During the few days I have been on duty with AMG, I have visited the three principal depots, known as #676 (Cirio), #677 (Vitelli) and #681 (Savino. I have been present at #676 and #677 when merchandise was received. I have been present on numerous occasions at #676, both when merchandise was received as well as dispatched. No record WHATSOEVER was made of the incoming merchandise. No accurate record was made of the merchandise shipped. There was no one person, nor even a group of persons, responsible for the receipt or shipping of merchandise. Drivers of incoming vehicles had no memorandum showing the contents of their trucks, and incoming merchandise was IMMEDIATELY commingled with merchandise on hand so that even subsequent checking was impossible. The drivers carried load tickets indicating APPROXIMATE weight of their loads, but there was NO effort to verify even that rough estimate. Drivers withdrawing merchandise from the warehouse did so without signing receipt for same. Issuing was done by almost anyone available at that moment, either Italian civilian or American soldier.

There is no centralized method of control over inventory. All inventory records are mere estimates, and opportunities for large shortages are prevalent at all times. When shipments are made by rail, no receipt remains in the hands of warehouse or AMG personnel.

3. Issue vouchers are prepared at AMG office in large amounts, i.e. for perhaps 500 or more tons on one voucher. Inasmuch as this amount can NOT be shipped either on one vehicle at ONE time or even on several vehicles at ONE time, additional bookkeeping procedures are needed. These are of the most primitive, inaccurate and sketchy nature. Much is left to mere memory.

4. Altho a workable inventory system has been attempted, supporting records are either inaccurate or non-existent, so that the resulting records are of no value.

5. Warehouse building #676 has large floor space over which merchandise of various agencies is stored and INTERMINGLED. Only bookkeeping entries can possibly identify ownership of certain merchandise as physical separation has not been attempted in certain cases.

6. Adequate guard, PROPERLY instructed does NOT exist. On two separate occasions, in the writer's presence merchandise was withdrawn from the warehouse by outsiders without any intervention whatsoever by any army or civilian employees present. No record of any kind was made of the withdrawal.

- 2 -

At Depot #676, the building and grounds are in most disorderly condition. The expenditure of a moderate amount of time and money and materials (detailed report submitted separately) would enable this building to warehouse a much greater amount of merchandise. It is the writer's opinion that proper repair and proper utilization of the facilities available at #676 and #677, would allow sufficient space necessary to store all present stocks of AMG foodstuffs, including canned goods, flour, wheat and possibly even Red Cross clothing supplies now stored at numerous warehouses throughout Naples where no control exists than described at #676.

7. The Army personnel available for the work is inadequate both in quality and quantity. Both enlisted men and officers have had no previous training either in Army or civilian life in this type of work. However, even with the finest trained men, it would be exceedingly difficult to accomplish the work required with the small number of men assigned. Italians CAN be trained to help and ultimately take over many jobs at first allocated to soldiers, but no effort is being made to secure Italians either trained in this type of work or of sufficient education and intelligence to learn it, along with AMG principles of operation. It is interesting to note that at #676, there was ONE soldier on duty at night, with 108 Italians. During the night numerous truckloads of food stuffs were received and truckloads of Red Cross supplies were dispatched. Appropriate control was impossible.

8. Poor organization and poor supervision necessitate duplication and waste of effort. Merchandise is moved and removed without good cause. Numerous examples may be sighted.

9. The warehouses are without the simplest forms of labor saving devices, and the few devices at hand are NOT utilized, partially because of the lack of knowledge of the officers in charge. Use of efficient warehouse equipment which should be made available to an enterprise of this type would create the following advantages:

- a. Increase speed of loading and unloading (which will save time of trucks, as well as, save time in unloading ships carrying AMG food supplies.)
- b. It will decrease amount of labor used by at least 50% and probably more.
- c. It would provide time and simplicity of operation to enable use of efficient warehousing records.
- d. Reduction in number of personnel in addition to saving labor expense directly would eliminate large amount of petty thievery which all army personnel assigned have ~~been~~ advised exists.

10. There is small effort to employ the type of Italian help most suited to the jobs. Very old men, as well as very young boys, and one severely crippled individual were observed working as roustabouts. Experience has proven that old and young men do NOT work together well in the same crews. With a tremendous labor market available discretion could easily be used.

11. Methods of labor control are lax. Men are constantly observed sitting down or standing about smoking. Altho men ~~are~~ are divided into "squads" with foremen in charge of them, foremen are not good leaders, do not know the work, and are not themselves adequately instructed.

- 3 -

12. Sanitary conditions for employees are completely inadequate.  
NO satisfactory toilet facilities exist.

13. Adequate transportation is NOT provided for either ARMY personnel involved in operation of the several warehouses, or the key civilian employees. For example, the possible working time of the writer has been reduced at least 25% by lack of available PERSONAL transport.

14. Lack of transport to move merchandise has complicated warehousing and unnecessarily delayed ships unloading cargoes destined for AME warehouses. Two excellent illustrations are the moving of the Red Cross supplies, and the unloading of biscuits from the ship Hebbie.

15. In conclusion, it is the writer's opinion that there is nothing in the entire situation that can not be put into splendid, efficient operation by use of increased, experienced personnel, along with the physical changes recommended in separate report.

Memorandum:

Subject: Equipment Necessary for more Efficient Operation of Cirio Warehouse,  
now used to store foodstuffs of AMG.

1. The following pieces of equipment MUST be furnished either from  
civilian or military sources, to enable an efficient operation of the above  
described warehouse:

50 - Two wheel hand trucks.

200 ft. - Roller conveyor, approximate 10 ft. sections,  
complete with stands.

300 - skids or pallets.

3 - lift trucks (Hi-Lows)

100 - Four wheel warehouse trucks, preferably for use with  
Tow Motor.

2 - Tow Motors.

2. The lack of this equipment means that the number of personnel  
employed is unduly increased by as much as 200-300%, with the increased risk of  
theft and loss thereby. In addition, because of the amount of merchandise handled,  
it is extremely difficult, if not impossible, to keep any record of receipt or  
shipment, unless equipment as described above is used to simplify the entire  
warehousing operation.

3. Altho, the equipment described would furnish an ideal situation,  
any part of it would aid greatly as almost no equipment is available at present.

Robert H. Klein,  
Capt. MAC.

Memorandum:

Subject: Supplies Necessary to Clean and Maintain Warehouse at Cirio.

15 Street Cleaner Type Brooms.  
10 Shovels, short handle, square tip  
5 Pick Axes  
5 Corn Brooms  
5 Wheel Barrows  
25# Rags  
50 Rolls Toilet Paper  
6 Pails  
6 Latrine Brushes  
5 Mop Handles  
15 Mops  
15 Cans of Lye or Chloride of Lime.

Memorandum:

Subject : Addendum to Report of "Survey" of AMG Food Warehousing in Naples.

1. One most serious omission has been noted in reviewing the report rendered yesterday - viz. there are NO means available for extinguishing FIRES. Neither are patent fire extinguishers available nor are water hydrants and hose available. A small fire could soon reach such proportions that destruction of large quantities of stock would be destroyed. Furthermore, it is current practice for workmen to light bonfires in the warehouses to keep themselves warm. Such practice is highly dangerous.
