MEMORANDUM:

SUBJECT : Procurement of Surplus Property

TO : See distribution

1. The organizational pattern for the disposal of US/UK surplus and scrap has now become one whereby the Italian Government is the principal, but not exclusive, recipient of such property. This development places upon sub-commissions the following responsibilities:

a. They are to be alert to the possibilities of substituting surplus property for supplies they may have previously requisitioned.

b. They are to advise the Italian Government, through appropriate ministries, as to the availability of actual surplus property, and, when indicated, to recommend that the Italian Government take procurement action with surplus disposal authorities.

c. They are to be on watch for Allied property which might possibly be declared surplus and be of use in the Italian economy. Having discovered any such possible surplus, sub-commissions will recommend to the Italian Government that procurement action be taken with surplus disposal authorities.

2. To assist in the accomplishment of 1a and 1b, sub-commissions have been provided with copies of OSRLC Catalog No. 2, and they will receive all future issues of catalogs or listings prepared by OSRLC. These distributions will be made by Surplus and Special Materials Branch.

3. It is requested that sub-commissions examine such catalogs and lists in the light of possible substitutability of surplus items for supplies the sub-commissions previously may have requisitioned through the Requisition Branch. In the event surplus property appears to be substitutable for supplies on requisition, Requisition Branch should be notified to that effect.

4. Sub-commissions are also advised to examine such catalogs and lists in the light of their studies and knowledge of the specialized needs of the Italian Government over and above supplies already requisitioned. In this respect, as in 1a and 1b preceding, sub-commissions may act only in an advisory capacity to the Italian Government. Consequently they should communicate their comments, recommendations, or suggestions to appropriate Italian ministries. In turn, the ministries will initiate any indicated procurement action through the Supply Section of the Italian State Railways, the recognized organization for handling requisitions of the Italian Ministry of Supply in behalf

1642

Declassified E.O. 12356 Section 3.3/NND No. 785021

the following responsibilities.

a They are to be alert to the possibilities of substituting surplus property for supplies they may have previously requisitioned.

b They are to advise the Italian Government, through appropriate ministries, as to the availability of actual surplus property, and, when indicated, to recommend that the Italian Government take procurement action with surplus disposal authorities.

c They are to search for Allied property which might possibly be declared surplus and be of use in the Italian economy. Having discovered any such possible surplus, sub-commissions will recommend to the Italian Government that procurement action be taken with surplus disposal authorities.

2. To assist in the accomplishment of 1a and 1b, sub-commissions have been provided with copies of O.N.L.O. Catalog No. 4, and they will receive all future issues of catalogs or listings prepared by O.N.L.O. These distributions will be made by Surplus and Special Materials Branch.

3. It is requested that sub-Commissions examine such catalogs and lists in the light of possible substitutability of surplus items for supplies the sub-commissions previously may have requisitioned through the Requisition Branch. In the event surplus property appears to be substitutable for supplies on requisition, the Requisition Branch should be notified to that effect.

4. Sub-commissions are also advised to examine such catalogs and lists in the light of their studies and knowledge of the specialized needs of the Italian Government over and above supplies already requisitioned. In this respect, as in 1a and 1b preceding, sub-commissions may act only in an advisory capacity to the Italian Government. Consequently they should communicate their comments, recommendations, or suggestions to appropriate Italian ministries. In turn, the ministries will initiate any indicated procurement action through the Supply Section of the Italian State Railways, the recognized organization for dealing with O.N.L.O. and the British Ministry of Supply in behalf of the Italian Government.

1692

Declassified E.O. 12356 Section 3.3/NND No. 765021

5. In view of these recognized channels, the sub-commissions will not negotiate directly with CANAC, G-4 AFHQ, or AFHQ in regard to actual procurement of surplus or potential surplus for, or in behalf of, the Italian Government. It is in order, however, for sub-commissions to act in the same advisory capacity, and through the same channels, in regard to undeclared surpluses, as in cases involving actual surpluses. Knowledge of such potential or desirable surplus goods may arise from field observations and from other sources. In this connection it would be in order to correspond directly with G-4 AFHQ or AFHQ for information purposes only.

6. Although this directive relates mainly to the procurement and utilization of U.S. surplus property, the possibilities of similar utilization of surplus property in custody of the British Government is not to be overlooked. Inquiries on this subject should be made to the Office of the Chief Disposal Officer, Ministry of Supply, British Embassy, tel. 843241.

SUBJECT: Request for Fire-Fighting Equipment needed in Italian Ports.

TO : G-4 MTOUSA - AFHQ.

1. The Ministry of Marine (Direzione Generale Marina Mercantile) Rome, has submitted to this Division the attached list of Fire-Fighting Equipment needed to re-habilitate the Fire-Fighting Services in ports of the Italian Mainland and Islands.

2. In view of the urgency to re-equip the above services and bring them up to pre-war standard, it would be appreciated if the material in question could be supplied from either American or British Army/Navy local sources to the above Ministry on temporary loan basis subject to transfer, at a later date, on permanent payment basis.

3. Should it be possible for you to comply with the request, please indicate the location of the material to enable the Competent Department of the Ministry of Marine to arrange for collection of same.

4. Your early advices will oblige.

SUBJECT: Port Equipment-Tools etc.

TO : G-4 ETOUSA - AFHQ.

1. Requests have been received from the HEAL Ports and ANCONA for the supply of certain tools and equipment to enable the Civil Authorities to carry out the maintenance and repair of craft and plant handed over to them.

2. Transportation (Br) Main, C.M.F. informs us that they have met the demands to a considerable extent but are unable to supply the items on the attached list.

3. As you will doubtless, agree, it is important that maintenance and repair be kept at a high level so that it is imperative that the material necessary to complete the equipment be procured without delay.

4. In view of the emergency, it would be greatly appreciated if the items mentioned in the above list could be supplied (if available) from local American Army Depots to the Italian Ministry of Marine on a temporary loan basis subject to transfer, at a later date, on a permanent sale basis.

5. Should you be able to comply with our request, please indicate the location of the material so that the competent Department of the Ministry of Marine may be instructed to arrange for the collection of same.

Ref. C-32

SUBJECT: Supply of Copper Wire and Bulb Sockets, Port of Naples.

TO : Headquarters, Allied Commission, APO 394
(Attn Transportation Sub-Commission)

Reference AC/7/83/Tn6 of 13 September and signal 5221 of 12 September.

1. G-4 MTOUSA has released the items referred to in reference letter (PBS requisition MTO-HNG-IV-5894 of 17 September refers).

2. AFHQ letter AG 400.38/091 GEG-O of 9 September terminated military responsibility for civilian supply in Italy and outlined your present channel of supply.

3. In view of the apparent urgency of this requirement, this headquarters has issued the items without prior reference or approval from CLAC. It is therefore requested that a cable substantially as follows be sent to CLAC:

> "In order to protect imported civilian stores from pilferage 10,000 ft weather-proof copper wire #12 and 30 electric sockets, medium screw base have been issued from U.S. theater stocks excess to known theater requirements. Request authority for U.S. Army to bill FEA against funds allocated for Italian civilian supply."

4. The above cable will not be necessary, of course, if the FEA representative in Italy has the authority to make purchases of U.S. Army stocks for Italy through ANLC without prior reference to CLAC. Advise action taken.

5. It is emphasised that the above issue has only been made as an emergency and that procedure outlined in AG letter cited in para 2 above must be followed in future.

For the Assistant Chief of Staff, G-5:

TRANSLATION of letter, dated 18 September 1945, addressed by Ministry of Marine, Ispett[illegible] to Funzionamento Porti, to HQ.AC., Ports & Warehouse Division.

Subject: Release of material for the Municipal Undertaking for Venice Lagoon Inland Navigation.

The above concern has put forward, through the Port Authority, a request for material which is necessary to carry on their services.

As the port of Venice is included among those for which the Allied Authorities will provide direct, we attach copy of the request received, and ask you to kindly take it into consideration, as the service is of essential public importance.

for THE MINISTER

(sd) Matteini

TRANSLATION of enclosure to above. Venice, 21 Aug. 1945

War Disposal Material.

Following on our letter of 11th, inst., we give below detailed list of Allied material which are of real necessity to us in order to carry out essential services:

No. 2 trucks
" 2 discharging means (large rafts)
" 2 small discharging means (large rafts)
" 12 tarpaulins for covering hatches
" 500 overalls for workmen - sizes 50 - 52 - 54 - 56
400 linear metres of 8 mm. wire rope
200 " " " 6 " " "
50 metric quintals hemp rope 25 to 30 mm.
5 " " " 6 to 8 "
30 " " manilla " 25 to 30 "
300 linear metres rubber piping for water mm. 25 x 35
200 " " " " " " 35 x 50
200 " " " " " oxygen " 8 x 16
200 " " " " " compressed air mm. 13 x 23
300 " " " " " acetilene mm. 10 x 15
200 " " " " " " " 14 x 19
100 " " " " " cleaning brushes mm. 13 x 36
100 empty drums - steel - for carriage of fuel oil and petrol.

OGGETTO: Cessione di materiale per l'Azienda Comunale di navigazione interna lagunare di Venezia -

L'Azienda Comunale di navigazione interna lagunare di Venezia ha avanzato, per tramite della Capitaneria di Porto, una richiesta di materiale di cui necessita pel funzionamento dei suoi servizi.

Poichè il porto di Venezia è compreso fra quelli cui provvederanno direttamente le Autorità Alleate, si rimette copia della richiesta pervenuta con preghiera di cortese esame per l'eventuale accoglimento, trattandosi di servizio pubblico d'essenziale importanza.

2. In view of the urgent necessity for the Italian Ministry of Marine to transfer surplus port equipment from one port to meet deficiencies in another it is confirmed that any equipment at present issued on loan to you as part of a port project may be transferred without prior reference to this H.Q. subject to the following conditions:-

(a) That transfers are made only between the ports of Taranto, Brindisi, Bari, Ancona, Venice, Genoa & Savona, i.e. The ports covered by the British Port Projects.

(b) That complete details of the transfer are advised to this H.Q. for record purposes. The ports of origin and receipt must be indicated.

(c) That the port projects will remain compiled in accordance with the original handover from the British Army to the Italians and that when the projects have been approved by War Office they will be accepted by A.C. in this form and will not be subjected to alterations due to transfers and losses since the date of handover. A.C. will be responsible for all transfers and losses.

(1)

1. With reference to letter 7007/D.VIII dated 5 Nov 45 addressed to you by the Director General, Italian Merchant Marine.

2. The opinion of this Directorate is that the Italian Merchant Marine through the agencies of Capitani del Porto may reasonably impose a maintenance charge in respect of port equipment loaned to civilian firms. The charge levied should be based on the actual cost of the organization deemed necessary to ensure the continued efficiency and state of repair of the equipment concerned, and includes both technical (labour and material) costs and administrative charges. It should not, however, embody any profit element.

3. It should be clearly pointed out that such a charge is in the nature of a maintenance charge and must not be considered as a hiring rate. This is especially important since the final financial terms under which the equipment is handed over are not yet settled and, therefore, the question of hiring rates may well be subject to discussion at a later date. Furthermore, much of the equipment concerned is of other than Tn. origin (e.g. Ministry of War Transport) with the result that final arrangements will have to be discussed with other departments.

4. It is felt that the imposition of the maintenance charge suggested above would be beneficial by reason of the better condition in which the equipment will be consequently maintained, whether the equipment is ultimately transferred to the Italian Government or returned to us.

OGGETTO Naviglio portuale e attrezzi di lavoro nei porti di categoria A.=

1.= Consegna di materiale da parte Autorità Alleate.

Nei porti trasferiti alla categoria A e quindi restituiti alla totale giurisdizione italiana, nonché nelle zone italiane dei porti di Categoria C, sono stati dalle Autorità Alleate ceduti in prestito alle Capitanerie di porto alcuni materiali di proprietà alleata necessari per il funzionamento dei porti stessi.

Per alcuni di tali porti (e precisamente Taranto, Brindisi, Bari, Ancona, Venezia, Genova) l'assegnazione fu fatta dopo un calcolo preventivo del reale fabbisogno comunicato a questa Direzione Generale; negli altri gradatamente, alla spicciolata, con accordi locali.

Nell'insieme il calcolo eseguito dalle Autorità Alleate è stato commisurato per lo più al traffico che si svolgeva nei porti stessi durante l'occupazione Alleata, ciò che nella esperienza non sembra confermato dalla realtà. In conseguenza in alcuni porti si ha una eccedenza di materiali, in alcuni una deficienza. Per rimediare a tale anormalità si prega far conoscere se questo Ministero abbia la facoltà di trasferire da un porto ad un altro il materiale ceduto in prestito in relazione alle effettive esigenze.

Poichè poi la condizione attuale di prestito dà luogo ad una serie di difficoltà di amministrazione e di impiego nonché ad una notevole confusione di responsabilità (dovendo in sostanza il materiale essere usato da enti diversi da quelli che lo gestiscono), si prega voler sollecitare la soluzione più volte promessa di una cessione defi

../..

Declassified E.O. 12356 Section 3.3/NND No. 785021

2.= Amministrazione e gestione del materiale.

Al momento della consegna del materiale in questione fu richiesto dalle Autorità Alleate che esso fosse dato in uso gratuitamente al commercio, per evitare che alcune merci fossero più o meno gravate di spese in relazione alla maggiore o minore intensità delle operazioni che dovesse essere imposta dalle necessità del tempo di guerra.

Questo sistema ha reso il servizio di cui trattasi eccezionalmente oneroso per l'Amministrazione italiana, la quale é costretta a sostenere spese di gestione e di manutenzione di gran lunga superiori alle proprie possibilità (specialmente in quei porti in cui la scarsità del traffico non fa prevedere recuperabili le spese con la imposizione della tassa sulle merci).

Ora, poichè sembra che siano del tutto cessati i motivi eccezionali che avevano indotto a tale norma, questo Ministero ritiene che dovrebbero riportarsi l'impiego ed il pagamento dei mezzi sul binario delle normali consuetudini commerciali, tanto più che, secondo quanto risulta, gli imprenditori portuali gravano le loro fatture di percentuali così forti di guadagno da comprendere ampiamente le spese per l'uso dei mezzi stessi. E la circostanza di doverli pagare crearebbe altresì un freno alle eccessive richieste che avvengono ora che l'assegnazione é gratuita.

D'altra parte nella organizzazione normale italiana la gestione dei mezzi in questione é di pertinenza esclusivamente privata ed al riguardo il Comandante del porto non ha che un compito di sovraintendenza per quanto concerne la regolarità dell'impiego e la determinazione delle tariffe.

In attesa che il materiale possa essere ceduto alle Ditte private interessate (quando avverrà la alienazione definitiva da parte delle Autorità Alleate), sarebbe intendimento di questo Ministero di dare in gestione il materiale di cui trattasi, sempre sotto il controllo del Comandante del porto, che conserverebbe le responsabilità verso codesta A.C., alle ditte portuali già autorizzate all'espletamento delle attività in questione, con preferenza a quelle che sono rimaste private del materiale di cui disponevano a causa di eventi bellici.

Le ditte stesse sarebbero responsabili a loro volta della conservazione, manutenzione e regolare impiego verso il Comandante del porto, con versamento di cauzione di garenzia, e verrebbero fissate altresì delle eque tariffe, a cui dovrebbero sottostare gli utenti del materiale.

Si gradirebbe al riguardo avere l'adesione di codesta

No. 7007/D VIII Rome 5 November 1945

SUBJECT : Harbour Craft and Cargo Handling Gear in Category, 'A' Ports.

TO : Transportation Sub-Commission Ports & Warehouse Division.

1. Delivery of material by Allied Authorities

In ports transferred to the "A" category, and therefore under complete Italian jurisdiction, and in Italian territory category "C" ports some Allied equipment necessary for the functioning of the ports has been delivered on a loan basis to the Italian Port Authorities (Capitaneria di Porto).

For some of these ports (precisely Taranto, Brindisi, Bari, Ancona, Venezia and Genoa) the assignment was made after a careful survey of the actual needs of which this office was informed. In the other ports the assignment was made gradually, in small lots and under local agreements.

Globally, the Allied Authorities calculated the needs of these ports on the basis of the traffic existing during Allied occupation, which now, in practice, is not really so. As a result, the equipment is in excess in some ports and lacks in others. To adjust these differencies will you please let us know whether this Ministry is authorized to transfer equipment from one port to another in accordance with the actual needs of each port.

Furthermore, the present conditions of loan basis create a series of difficulties in administration, and employment, and a considerable confusion in responsibility (as, in practice, the equipment is used by concerns other than those responsible for the gear). It is requested, therefore, that a prompt solution be reached whereby the equipment in question be transferred on a permanent basis to the Itahian Authorities, so that they may be able to employ same in accordance with their organisation and needs.

2. Administration and Management of the Equipment

At the time the a/m equipment was delivered, the Al-

Declassified E.O. 12356 Section 3.3/NND No. 785021

1. Delivery of material by Allied Authorities

In ports transferred to the "A" category, and therefore under complete Italian jurisdiction, and in Italian territory category "C" ports some Allied equipment necessary for the functioning of the ports has been delivered on a loan basis to the Italian Port Authorities (Capitanerie di Porto).

For some of these ports (precisely Taranto, Brindisi, Bari, Ancona, Venezia and Genoa) the assignment was made after a careful survey of the actual needs of which this office was informed. In the other ports the assignment was made gradually, in small lots and under local agreements.

Globally, the Allied Authorities calculated the needs of these ports on the basis of the traffic existing during Allied occupation, which now, in practice, is not really so. As a result, the equipment is in excess in some ports and lacks in others. To adjust these differencies will you please let us know whether this Ministry is authorized to transfer equipment from one port to another in accordance with the actual needs of each port.

Furthermore, the present conditions of loan basis create a series of difficulties in administration, and employment, and a considerable confusion in responsibility (as, in practice, the equipment is used by concerns other than those responsible for the gear). It is requested, therefore, that a prompt solution be reached whereby the equipment in question be transferred on a permanent basis to the Italian Authorities, so that they may be able to employ same in accordance with their organisation and needs.

2. Administration and Management of the Equipment

At the time the a/m equipment was delivered, the Allied Authorities asked that its use by the trade be allowed free of charge so as not to constitute a burden on the commodities in relation to the more or less intensity of the operations under war emergency. The Italian Authorities find this system very onerous, as they are obliged to bear all the management and maintenance costs which are far superior to their financial capabilities, (especially in those ports in which, owing to lack of traffic, there is no possibility, even with the imposition of cargo dues, to recover the cost of maintenance etc.)

Declassified E.O. 12356 Section 3.3/NND No. 785021

Since the reason which rendered necessary such measures seem to have completely ceased, this Ministry is of the opinion that the employment and payment for use of the equipment should revert to normal commercial practice more so, as it appears that stevedoring contractors charge such high percentages as to cover more then sufficiently the payment for the use of such equipment.

In fact the fixing of a charge for the hire of the equipment would eliminate the present unsatisfactory state of affairs.

Furthermore, according to the policy of normal Italian Administration, the management of such equipment is left exclusively to private enterprise, the Capitano di Porto supervising and regularizing the proper utilization of the equipment and establishment of relative tariffs.

Pending transfer of this equipment to interested Private Concerns (when the material will be finally assigned on a permanent basis by the Allied Authorities), it would be this Ministry's intention to hand over the management of the equipment, always under the control of the Port Commandant who would continue to be responsible towards the Allied Commission, to already authorized Stevedoring firms, preference being given to those concerns who, through war action, have lost their stock of equipment.

The firms in question would, in turn, be responsible to the Port Commandant for the care, maintenance and proper employment of the equipment; in addition, they would be required to pay a guarentee deposit. An equitable tariff would also be established to which the users of the equipment would have to conform.

The approval of the Transportation Sub Commission would be greatly appreciated.

SUBJECT: Port Projects

TO : Deputy Quartermaster General
AFHQ, Caserta

1. As you are, no doubt, aware, the ports of Italy are in process of being turned over to administration and control of the Italian Government.

2. In order to ensure that the Italian Authorities shall possess the means of working the ports to the required capacity, Transportation (Br) Main has prepared Port Projects in connection with the seven ports which, until the first of this month, were under British Military Control. The ports are Savona, Genoa, Venice, Ancona, Bari, Brindisi and Taranto and, under the Port Projects scheme, lists of stevedoring and floating equipment considered ample to meet the needs of these ports have been submitted to the War Office, London, for screening and approval.

3. With regard to the American controlled ports of Leghorn and Naples, it is expected that the American Authorities will arrange for similar care to be taken of their requirements when these ports are transferred to Italian control.

4. There remain, however, the requirements of all the other ports of Italy and with a view to safe-guarding the general over-all position in regard to Italian port economy, we have obtained from the Italian Ministry of Marine a detailed list of their requirements having regard to present needs and future developments so far as these can be foreseen.

5. We have consulted Colonel Fry, Chief Disposals officer, Ministry of Supply, as to the procedure to be followed in order to obtain for the Ministry of Marine the port equipment they require and are advised by him that as these materials come within surpluses which will be declared by AFHQ, the allocation and disposal of which will be considered by the War Office on a global basis, we should send you the lists of Italian Government requirements for requisite action.

1649

6. Will you please advise us by return if our information

1. Attached hereto for your attention and action copy of letter #410/3. dated 18 September 1945 received by this Division from Soc. Ing. Luigi Conti-Vecchi, Rome.

2. You will observe that said Company wish to purchase 2 to 6 lighters of 100/250 tons capacity to enable them to supplement the loading potentiality of their salt works at Cagliari.

3. We understand said Company would only be interested in obtaining craft which might be available at West Coast Italian ports nearest to Cagliari, such as Civitavecchia, Piombino, Leghorn or Genoa, as craft available in Adriatic ports would constitute an unfeasible transportation problem particularly during the winter months.

4. We have explained the position in regard to eventual allocation of Harbor Craft to your Ministry on the part of British and American Transportation Authorities and, no doubt, you will be contacting said firm on the matter.

R O M A

La scrivente Società, che negli anni ordinari ha spedito dalla sua salina di Santa Gilla, presso Cagliari, circa 200.000 Tonn. annue di sale e di altri suoi prodotti magnesiaci e potassici, dopo la interruzione dei traffici marittimi la Salina ha ripreso le sue spedizioni, con ritmo rapidamente crescente, e, mentre in questi ultimi mesi ha già imbarcato nel porto di Cagliari circa 6.000 tonnellate dei suoi prodotti, ha conclusi contratti di vendita per altre 20.000 tonnellate e ne ha in corso di stipulazione per circa 30.000 tonn. di sale da spedirsi all'estero: Islanda, Olanda, Belgio, ecc.

La salina di Santa Gilla dista circa 10 Km. dal porto di Cagliari col quale è collegata mediante un canale che attraversa l'interposto stagno di Santa Gilla, e che è largo dai 50 ai 200 metri ma che ha un modesto tirante d'acqua, per la maggior parte della sua lunghezza, non superiore ai m. 1,50.

I prodotti della Salina vengono trasportati sottobordo ai piroscafi nel porto di Cagliari entro chiatte aventi la portata di: 100, 150 e 200 tonnellate e, complessivamente, di quasi 2.000 tonn.

La maggior parte di queste chiatte sono di legno; quelle di maggior portata, in ferro, lunghe m.35, larghe m.7 e pescano, a pieno carico, m.1,40.

L'inattività di cinque anni di guerra ha ridotto alla metà la portata complessiva della flottiglia di chiatte e, mentre si lavora a riparare le chiatte meno deteriorate, urge sostituire quelle più malandate, per la portata complessiva di circa cinquecento tonnellate.

C.I.C.A. Roma N. 3408

Declassified E.O. 12356 Section 3.3/NND No. 785021

Si ricercano perciò, con urgenza, N° 3 a 6 chiatte, aventi la portata da 100 a 250 tonn. ciascuna, possibilmente in ferro, larghe m. 6 a 7, scoperte (senza ponte), atte al rimorchio e che, a pieno carico, non peschino più di m. 1,40.

Se tra i barconi che la flotta alleata ha usati o tenuti disponibili per gli sbarchi, e che probabilmente non troverà conveniente di riportare oltre mare, ce ne fossero di quelli utilizzabili come chiatte per il nostro servizio si sarebbe disposti ad acquistarli. Vi preghiamo pertanto di volerci far sapere se ed a quali condizioni si potrebbero acquistare le sopra indicate chiatte e, nell'attesa, distintamente Vi salutiamo.

S.p.A. "Ing. LUIGI CONTI-VECCHI"

SUBJECT: Port Projects - Lists of Equipment

TO : Mr. Stanley P. France
Senior Transportation Officer
Bari

1. Receipts duly received at this office in respect of Port Equipment as follows:

a. Bari: for barges, tugs, cranes, tractors, trailers, conveyors, but not for stevedoring gear.

b. Brindisi: for barges, tugs and R.C.L.'s, but not for cranes, tractors, trucks, trailers and stevedoring gear.

c. Taranto: for cranes, trucks and trailers and stevedoring gear, but not for tugs.

For the Chief:

A. C. ALLMAN
Ports Branch
Ports & Warehouse Division

P.S. There are, in addition, two 80-ton wheel barges at Brindisi. These two barges are surplus British military equipment bid for by us on behalf of Italian Ministry of Marine. Please arrange for Captain of Port to take charge of them & let us know receipts in due course. 10-30

Subject: Disposal Projects,
BR. operated ports, Italy.

1 copy by AIR Mail.
1 " " SEA "

To:- D.Tn.,
The War Office (Tn.2).

1. Further to Tn.A.2/127, 21 Aug. 45 and your 57/Italy/1, 18 Sep. 45.

2. We have now completed formulation of disposal projects covering W.D. equipment and stores deemed essential for the continued operation of certain Italian ports for civil purposes. These project lists have been scrutinised and approved by Allied Commission (Italy) representatives.

3. Lists in quadruplicate, covering the following Italian ports, are enclosed:-

(a) Brindisi.
(b) Taranto.
(c) Bari.
(d) Ancona.
(e) Savona and Genoa.
(f) Venice.

4. In consequence of the withdrawal of Docks units from these ports it was necessary to arrange the loan of the items listed to A.C. representatives to enable ports to continue operation upon civil account. No hire charges have been raised by us for any of the plant and equipment scheduled, although we have authorised the A.C. sponsored Italian Government representatives at each port to recover maintenance costs arising in connection with craft. This course was found essential to ensure reasonable and fair handling of W.D. equipment.

5. It should be noted that although Harbour Craft for port projects are included in the schedules for record purposes, they have already been, in accordance with your 57/Italy/1/Tn.2(1b) 15 Oct. 45, declared surplus to theatre military requirements in our Declaration No. 25B, covering all BR. operated craft. We are pressing for action by M.W.T. Mediterranean to reassume ownership and to deal with diversion to civil end use.

6. It is proposed that all the equipment, buildings and stores listed in these schedules should be deemed as incorporated in the port undertaking and disposal arranged in accordance with the procedure for disposal of fixed assets. May we have your approval to this course which will permit us to dispose of these assets in situ, please.

7. Please advise if any special action is needed in connection with items of Lease Lend nature incorporated in these projects.

SUBJECT: Port projects List of Equipment as Submitted by Transportation (Br) Main for the Ports of Bari, Brindisi, Taranto.

TO : Mr. Stanley P. France
Port Liaison Officer
Bari, Brindisi, Taranto.

1. Attached is a list of port equipment, compiled by Transportation (Br) Main, which they consider adequate to meet the needs of the ports of Bari, Brindisi and Taranto when these ports are passed to the control of Italian Authorities.

2. This list has been approved by us and, when approved by the War Office, London, will constitute the equipment which will be transferred to the Italian Captains of the Ports of Bari, Brindisi and Taranto who will be responsible for operation, care and maintenance of same.

3. When the transfer takes place, you will see that the Captains of the ports at Bari, Brindisi and Taranto take over officially and you will obtain from them identical lists in quintuplicate, each full, receipted, which you are to forward to this Division without delay.

4. A similar list has been handed to the Rappresentato Funzionamento Porti, Direzione Generale Marina Mercantile, Rome, who will no doubt instruct their Captains of ports of Bari, Brindisi and Taranto accordingly.

Transp(ation (Br.) Main,
C.M.F.
Tel: Firebox 9596.

File: Tn.A.2/127/10.
15 Sept 45.

Subject: Port Projects - Italy.

To: A.C. Tn Sub Commission.
(Ports & Warehouse Division).

1. Referring to your AC/24/47/Tn.6 dated Aug 22 and our letter Tn.A2/127/10 dated Aug 7, attached is a list of essential Tn Stores in triplicate which it is considered will be required by A.C. when they take over the operation of the ports of Taranto, Brindisi, Bari, Ancona, Venice, Genoa and Savona.

2. Will you please confirm that all the stores detailed on this list are required by you for the ports concerned. On receipt of this confirmation the projects will be submitted to War Office.

3. The equipment shewn for Genoa/Savona has already been handed over on loan.

4. The equipment for Ancona has in part been handed over on loan.

5. In the case of Bari, which it is understood is to become a category "C" port, the equipment shewn is for the operation of the civilian area. Unless the tonnage figures given by you rise considerably, this equipment should still be sufficient to work the port when it reverts entirely to civilian control.

6. An early reply will be appreciated.

Leslie E. Robson

L.E. ROBSON, Maj.,
D.A.D.Tn.(Stores),
for Brigadier,
Director of Transportation.

Ancona
(Att: Capt. Vaughan)

1. We refer to our letters AC/34/2/Tn6 of 21 September and AC/34/11/Tn6 of 24 October 1945 on the above subject.

2. In our letter of 24 October, it was erroneously stated that we had received "receipts" whereas it should have stated that we had received "a list" of equipment for your port, etc.

3. We still await pro formae receipts in quintuplicate for all port equipment handed over to charge and maintenance of Captain of the Port of Ancona, to date and request that you will give this matter your immediate attention.

For the Chief:

A. C. ALLMAN

OFFICE OF THE ARMY-NAVY LIQUIDATION COMMISSIONER
APO 512

MTOLC 23 October 1945

SUBJECT: Surplus Property, USA

TO : Headquarters Allied Commission
Transportation Sub Commission
APO 394

1. In response to your letter AC/7/98/Tn6 of 9 October, please be advised of the following:

(a) At the present time there is no authority to allocate surplus Army or Navy Equipment to any particular customer.

(b) It may be possible under present rules to sell to the Italian Government provided:

(1) They bid the established price,

(2) There are no prior higher priority customers,

(3) That the U. S. Government arranges satisfactory financial terms with the Italian Government.

2. For your information, recommendation has been made by this office, our Paris office, and the Embassy, Rome, that an overall agreement be made with the Italian Government for the sale of all Army surpluses. Whether this decision will be confirmed and put into effect depends on the action of higher governmental authorities in Washington.

3. It would appear from information on hand that the authorities having responsibility for the foreign policy of the U.S. and surplus property disposal have adequate information and advice from local officers on which to base a decision. At this date no firm assurances can be given that the Italian Government will get any or all surpluses.

SUBJECT: Procedure for obtaining U.S. Army Theatre Surplus for AC/Italian Government.

TO : Headquarters, Allied Commission, APO 394. (attn: Economic Section).

1. Attached is a list of correspondence, the subject matter of which appears to fall within the procedure for obtaining U.S. Army surpluses through ANLC. This procedure was discussed by Colonel Caulkins/Captain Lathrope and Mr. Dickens/Captain Lathrope.

2. Briefly, this procedure calls for screening by AC, an indication of willingness on the part of the Italian Government to purchase the required supplies through ANLC, and submission of the requirements to ANLC. ANLC will then endeavour to make the supplies available to the Italian Government, and will extract the requirement to PBS if the Army has not already declared the needed supplies surplus to ANLC.

3. MTOUSA letter AG 413.8/984-D-O to PBS dated 19 Oct., copy to Transportation Sub Commission, and G-5 letter C-32 of 25 October sets forth the action taken by this headquarters to release equipment for the civilian operated section of the Naples Port. AC should complete arrangements directly with ANLC in order permanently to secure the equipment for the Italian Government.

4. No other action is being taken by G-4 MTOUSA or this Section for the supply of items detailed in the attached list of references.

5. Requests for material from British theater stocks may be submitted to Chief Disposal Office, Ministry of Supply, Rome. If the circumstances warrant it, your requirements may also be submitted to GHQ CMF, under the procedure outlined in our letter P-21 of 25 October to Economic Section.

For the Assistant Chief of Staff, G-5:

D.E. LATHROPE, Captain CAC,

TRANSLATION OF LETTER, DATED 16 OCTOBER 1945 (RECEIVED 26th) ADDRESSED BY IT. MINISTRY OF MARINE, ISPETTORATO PORTI, TO PORTS & WAREHOUSE DIVISION.

SUBJECT: Equipment for repair shops for craft delivered by the Allies in the Port of Brindisi.

The Port Authority of Brindisi points out the necessity of keeping up, even in a reduced form, two small workshop which were set up by the Allies, for urgent upkeep work and repairs on the craft and mechanical means in use in that port. They have also asked that they be supplied with some spare parts for the above.

This Ministry agrees with the Port Authority and therefore asks the Allied Commission to kindly try and get allotted to the Capitaneria di Porto of Brindisi the required material, of which we attach two lists in Italian, and copy, in duplicate, in English.

Risposta al Foglio del
Div. Sez. N.

OGGETTO Attrezzi per officine riparazione mezzi consegnati dagli Alleati nel porto di Brindisi.

La Capitaneria di Porto di Brindisi ha fatto presente la necessità di mantenere, sia pure in misure ridotta, due piccole officine, già istituite dagli Alleati, per i lavori urgenti di manutenzione e riparazione dei mezzi nautici e meccanici in uso nel porto. La stessa ha poi chiesto che siano fornite alcune parti di ricambio per i mezzi predetti.

Questo Ministero conviene con quanto sopra proposto e pertanto prega codesta C.A. di volersi cortesemente interessare per l'assegnazione alla suddetta Capitaneria di Porto dei materiali richiesti, di cui si allegano due elenchi in lingua italiana e copia, in doppio, in lingua inglese.

8 Oct. 43.

To Deputy Quarter Master General.
A.F.H.Q.
Caserta.

Dear Sir.

1. As you are no doubt aware, the Ports of Italy are in process of being turned over to administration and control of the Italian Govt.

2. In order to ensure that the Italian Authorities shall possess the means of working the ports to the required capacity, Rehabilitation (Civil) Main Imperial Port Projects in connection with the seven ports which, under Naval Military Control, the Italian Govt. Salerno, Genoa, Venice, Ancona, Bari, Trieste and Taranto and, under the Port Projects scheme, certain lesser ports, including coaling and fishing ports, are considered ample to meet the needs of the Italian Navy, Mercantile Marine and Civil Requirements. The Italian ports are divided into

1514

Declassified E.O. 12356 Section 3.3/NND No. 785021

Italian control.

4. There remain, however, the requirements of all the Allied parts of Italy and with a view to safe-guarding the general over-all position in regard to Italian post treaty, we have obtained from the Italian Ministry of Finance a detailed list of their requirements having regard to present needs and future development as far as they can be foreseen.

5. We have consulted Colonel Fry, Chief Treasury Officer, Treasury Delegation as to the procedure to be followed in order to obtain for the Ministry of Finance the post equipment they require and are advised by him that as their material is in Rome arrangements will be effected by A.F.H.Q. The allocation and dispersal of funds will be carried out by the War Office Treasury, we should send you the lists of Italian Government requirements for requisite action.

6. Will you please advise us by return of any corrections we correct and we will arrange them complete
to obtain action to be taken as suggested.

A. W. Allen

To: Liquidation Commission
United States Army and Navy
Liquidation Commission
Rome

9th Oct. 45.

Subject: Marine Heating Equipment and Heeding Equipment of all types, including crane and other mechanical gear required at ports and Lighters for Civilian Port Operations.

1. As you are doubtless aware, the ports of Italy are now in process of being cleared and cleaned by Italian Government Authorities.

2. In the case of those ports which have been under British Military Control, arrangements have been made whereby sufficient port equipment of all kinds is being transferred by the British Military to the Italian Authorities, Captains of the Port in each instance to enable the ports to carry on without interruption of port services. The Italian Ministry of Marine is thus charged with the care, use and maintenance of the equipment on a temporary loan basis until such time as final transfer terms are arranged in London.

3. It is understood that in view of the control which will be exercised by U.S. Army Control from the American Government, the Italian Ministry of Marine is thus charged with the care, use and maintenance of the equipment on a temporary loan basis until such time as final transfer terms are arranged in London.

3. It is understood that in view of the control which will be exercised by U.S. Army Control from the American Government, the Italian Ministry of Marine is thus charged with the care, use and maintenance of the equipment on a temporary loan basis until such time as final transfer terms are arranged in London.

1312

Declassified E.O. 12356 Section 3.3/NND No. 785021

for sufficient equipment to be made available to the Italian port authorities to enable the ports to continue to function efficiently when turned over.

4. As Sub-Commander in Italy interested in promoting the efficient working of the ports under Italian Government control, we would be glad to have your ~~advice~~ as to procedure to be followed to ensure that port equipment is immediately available to Italian port authorities as when they assume control, steering Mast we can obtain from the American Army estimate of likely requirements at each Italian port in Army ~~area~~ of their ports, with a view to presenting the requirements on behalf of the Italian Government in due course.

SUBJECT: Request for material to rehabilitate Italian Port Health Services.

TO : G-4 MTOUSA - A.F.H.Q.

1. This Division has been approached by the Ministry of Marine, Ispettorato Funzionamento Porti, Rome in connection with the rehabilitation of Italian Port Health Services.

2. We attach, hereto, a list of the material needed the lack of which, it is stated, is greatly felt owing to the alleged almost total destruction of the pre-war equipment.

3. The object of this letter is to ascertain whether it would be possible to procure the material in question from either American or British sources in this theatre on a temporary loan basis subject, at a later date, to transfer on a permanent payment basis.

4. Your advices on the subject would be greatly apprecia-ted.

TRANSLATION of letter, dated 18 September 1945, addressed by Ministry of Marine, Ispettorato Funzionamento Porti, to Ports & Warehouse Division.

Subject: Material needed for the reorganisation of Maritime Health Services.

Referring to para. 14 of letter AC/7/79/Tn6 of 8 inst., we attach in triplicate, list of material necessary for the reorganisation of maritime health services, and release of which is asked by the High Commissioner for Hygiene and Public Health.

The necessity of the material requested is greatly felt, because, as is known, almost the whole of the equipment of the Health Stations in Italian ports was destroyed by war action.

OGGETTO Materiali occorrenti per la riorganizzazione dei servizi di Sanità marittima.-

Con riferimento al paragrafo 14 della lettera AC/7/79/Tn6 in data 6 corrente, si rimette un elenco, in triplice copia, dei materiali necessari per la riorganizzazione dei servizi di sanità marittima, di cui l'Alto Commissariato per l'Igiene e la Sanità Pubblica chiede la cessione.

La necessità del materiale chiesto è quanto mai sentita poichè, come è noto, la quasi totalità dell'attrezzatura delle Stazioni di Sanità nei porti italiani è andata distrutta per fatto bellico.-

MINUTES OF MEETING HELD AT 1100 HOURS ON 9 OCTOBER, 1945

2451. PORT EQUIPMENT. Ref. 2413. The question of the provision of stevedoring gear for the Italian section of Naples Port was raised and the Chairman suggested that as A.C. were unwilling to take charge of the gear, W.S.A. should obtain authority to accept it and then pass it to the Steamship Agents Association which they had formed in Naples, and which was open to all Agents should they wish to join. Mr. Campbell referred to the recommendation in the Report of the Campbell Committee that stevedoring gear be taken in charge by the Captain of the Port, but the Chairman felt in this case, that the gear could more suitably be controlled by the Agents Association and Colonel Danaher said that if a requisition were made, U. S. Army would provide what was necessary. The Chairman would therefore signal Washington for the required permission.

To:- Transport-tactical Sub Commission,
Ports & Warehouses Division,
HQ, A.C.

1. We have received a request through the Dock Supt. at VENICE to allow the Port Authorities in that port to borrow a lighting set which is in possession of one of our Companies for the purpose of lighting theatres at night.

2. As you are no doubt aware, the theatres operating in these waters are notably deficient of means of lighting and it is thought that you may wish to include suitable lighting sets, for ports not equipped with plug-in points on the quays, in the lists of long term requirements which you are now preparing.

3. For your information a suitable set, which should adequately light two theatres, is as follows:-

Vouch No. XA 5305, Lighting Set, 1 KW No. 1.

4. The above set is an Ordnance supply.

TRANSLATION OF LETTER, dated 27 Sept. 1943, ADDRESSED BY MINISTRY OF MARINE, ISPETTORATO FUNZIONAMENTO PORTI, TO PORTS & WAREHOUSE DIVISION.

Subject: Request for illumination plant for coastal steamers.

In order to assure night work in port on coastal steamers, which are without lighting plant, we would ask you to arrange for the allotment to us of 35 lighting sets (lamps included) for coasters.

These sets, which are said to be available, would be distributed two each for the following ports: Savona, Genoa, Leghorn, Civitavecchia, Naples, Bari, Venice, Palermo, and one each for the ports of: Piombino, Castellammare Stabia, Torre Annunziata, Salernom Reggio Calabria, Crotone, Taranto, Brindisi, Gallipoli, Barletta, Ancona, Cagliari, S. Antioco, Olbia, Trapani, Porto Empedocle, Siracusa, Catania, Messina.

for THE MINISTER

(sd) Matteini

SUBJECT : Allied Port Equipment Allocated or to be Allocated to Capitaneria di Porti, Italy

TO : Direzione Generale Marina Mercantile
Ispettorato Funzionamento Porti, Rome
(Att. Col. Enrico Lauricella)

1. Attention of your Ministry is drawn to Section Ic, page 2 of the Campbell Committee Report, covering the question of all port equipment acquired or which may be acquired by the Italian Port Authorities from Allied Sources, whether Naval, Military or Allied Commission, and the desirability that a detailed inventory of all such equipment received to date be made now by the various Capitanerias in the form of a receipt to be signed by the Captains of the Ports and accompanied by written assurance that all such equipment will be under the jurisdiction of the Captain of the Port in each case and that this Official will assume responsibility for servicing, repairing and maintaining all craft and gear allotted to him.

2. The receipted inventories, together with five signed duplicate copies must be forwarded to this Division, A.C., and should be drawn up separately under two categories :

a. Category A - in respect of floating plant, i.e. tugs, barges, water boats, floating cranes, pontoons, dredgers, hoppers, etc., giving full description, name and/or number of each craft, condition when acquired, from whom acquired, (e.g. Allied Commission or Naval or Military source), build, type, etc.

b. Category B - in respect of all cranes, mechanical and motorized equipment and stevedoring gear of all descriptions, itemized and listed on the same lines as in the case of Category A.

Declassified E.O. 12356 Section 3.3/NND No. 785021

3. It is requested that this matter be given your immediate attention and it is suggested that in the case of the port of Civitavecchia these inventories can be furnished at once.

4. It appears that in certain ports e.g. Torre Annunziata and Castellammare, that barges and/or stevedoring equipment is at present either not being maintained by the Captain of the port or that some commercial firm such as Magazini Generali has taken charge of the equipment. In such cases, it is requested that your Ministry issue an instruction empowering Captains of Ports to assume responsibility for care and maintenance of all such material without delay and render the returns (receipted inventories) as required by these advices.

A.F.H.Q.

Copy to:- D.D. Tn. (Docks).
P.O.T.O. Med., A.F.H.Q.
M.E.T.O. Med., Navy House
A.C. Tn. Sub-Commission, Port & Warehouse Div.

1. It has now come to our knowledge through A.C. channels, that P.O.T.O. Med., in co-ordination with M.E.T.O. Med. and ourselves, issued in Aug. last a General Memorandum setting out procedure for the disposal and handing over of port cargo handling gear to civilian authorities, as and when Italian ports are returned to civil operation.

2. We were unaware any procedure other than that agreed by us at [illegible] meetings had been considered. We are of the opinion that to adopt the proposed new procedure at this date will cause considerable difficulty and delay. MFO/MATA Gear forms a very small proportion of the items included in our Port Disposal projects, which cover RE., CMD., R.E., RAOC and MFO items, and for which our planned disposal procedure has already received War Office approval.

3. The following is a resume of our procedure:-

(a) D.D. Tn. (Docks) estimates and lists requirements of Gear and Plant for civil operation of each Italian port when M. military control is removed. Lists cover Tn., CMD., R.E., RAOC and MFO items.

(b) Lists are submitted to A.C. Port and Warehouse Division for scrutiny, comment and approval.

(c) The agreed lists covering items required, now described as "Port Disposal projects for RE. operated Italian ports", are being submitted to Tn., War Office for approval, by all Services. Copies of projects will be provided for C-in-C(AM) and MFO (Med.).

(d) Upon receipt of Tn. War Office approval to projects it is intended to arrange disposal of all Plant, Cargo Handling Gear and essential maintenance items as "fixed assets", in accordance with general procedure.

4. Pending our obtaining War Office approval to our proposals, we have arranged to issue, as necessary, on loan to Allied Commission representatives and/or Italian Captains of ports the agreed quantities of gear and plant for operation of the ports for civil purposes. Maintenance and repair is to be carried out by the Italian civil organisations.

1480

Declassified E.O. 12356 Section 3.3/NND No. 785021

1. It has now come to our knowledge through A.G. channels, that A.F.H.Q. Med., in co-ordination with M.E.T.O. Med. and yourselves, issued in Aug. last a General memorandum setting out procedure for the disposal and handing over of port cargo handling gear to civilian authorities, as and when Italian ports are returned to civil operation.

2. We were unaware any procedure other than that agreed by us at [illegible] meetings had been considered. We are of the opinion that to adopt the proposed new procedure at this date will cause considerable difficulty and delay. PIEO/ENSA Gear forms a very small proportion of the items included in our Port Disposal projects, which cover TH., CMD., R.E., RAOC and PMO items, and for which our planned disposal procedure has already received War Office approval.

3. The following is a resume of our procedure:-

(a) A.D.T.s (Docks) estimates and lists requirements of Gear and Plant for civil operation of each Italian port when Mil. military control is removed. Lists cover TH., CMD., R.E., RAOC and PMO items.

(b) Lists are submitted to A.G. Port and Warehouse Division for scrutiny, concern and approval.

(c) The agreed lists covering items required, now described as "Port Disposal projects for TH. operated Italian ports", are being submitted to Th., War Office for approval, by all Services. Copies of projects will be provided for Q(MT) and PMO (Med.).

(d) Upon receipt of Th. War Office approval to projects it is intended to arrange disposal of all Plant, Cargo Handling Gear and essential maintenance items as "fixed assets", in accordance with general procedure. 1280

4. Pending our obtaining War Office approval to our proposals, we have arranged to issue, as necessary, on loan to Allied Commission representatives and/or Italian Captains of Ports the agreed quantities of gear and plant for operation of the ports for civil purposes. Maintenance and repair is to be carried out by the Italian civil organisations.

5. The disposal procedure outlined above has already reached an advanced stage in respect of the ports of Ancona, Venice, Genoa, Savona, Brindisi and Taranto and we consider that the imposition of a new procedure cannot be justified at this stage. May we be informed please whether we may proceed on the lines already laid down or if we are required to revise our arrangements to agree with PMO requirements.

GENERAL MEMORANDUM.
PORT AND CARGO EQUIPMENT.

It may be anticipated that more Italian ports come under Categories "A" and "B" and are handed over from Allied to civil or part civilian control, handling of civilian cargo may be handicapped by lack of gear and applications will be made to service departements for assistance by Italian Port Authorities and Stevedores.

2. The following procedure should be followed in ports which are now underBritish control:-

(1) All requests for cargo gear etc. should be coordinated through M.W.T.R. at the port.

(2) Indents to be passed by M.W.T.R. to A.F.H.Q. through M.W.T.R. Mediterranean for P.S.T.O. Med. and British Transportation.

(3) P.S.T.O. Med. and Br. Tn. will meet demands from available stocks if practicable, it being understood that no guarantee is given that demands will be met, or any liability to supply accepted by those departments, assistance being limited to quantity of surplus stocks available.

(4) M.W.T.R. will give a receipt to S.S.T.O. at the port of any gear which may be handed over from Sea Transport Stores or to Dock Superintendent for any British Army Tn.Stocks.

(5) S.S.T.O.'s will therefore only pass over cargo gear and equipment to M.W.T.R. on receipt of written instructions from P.S.T.O. Med. obtaining T.260 as receipt for stores issued to M.W.T.R.

(6) M.W.T.R. will then be responsible Authority for cargo gear and equipment released by service departments at ports holding a civil commitment.

AL: H.Q. No. 7 Port Operating Group R.E.

1) A seguito dell'accordo raggiunto nella riunione tenuta a questo Quartiere Generale (H.Q.) il 22 Agosto c.a., gli impianti, galleggianti ed attrezzi di cui all'allegato elenco saranno consegnati al Capitano del Porto, in conformita' alla lettera D.D.5/2211 datata 5/8/1945 di questo H.Q.

2) I due verricelli attualmente in uso con i bighi nella banchina destinata alla discarica chiatte saranno restituiti alla 330 T.S.D. E SI PREGA VOLER AVVERTIRE questo H.Q. a riunione avvenuta.

3) Il rimanente degli impianti, galleggianti ed attrezzi, saranno tenuti sotto il vostro controllo e si prega voler informare questo H.Q., appena possibile, quali articoli sono in soprappiu' per le vostre esigenze nella manipolazione dei carichi militari.

4) Per quanto riguarda le riparazioni da effettuarsi ai galleggianti consegnati, queste saranno effettuate dalle Autorita' Civili e la 990 Port Maintenance Coy intraprendera' solamente detti lavori qualora il natante richiede l'alaggio e non pue' essere alato altrove che negli scali di alaggio di pertinenza della predetta Compagnia.

In In questo caso le Autorita' Civili dovranno sostenere le spese di riparazione.

5) Il personale Civile attualmente impiegato dalla 947 1 W.T. negli scafi da essere consegnati sara' licenziato dalla predetta unita', ma le autorita' civili dovranno dare la precedenza nell'impiego ai sopradetti.

6) Si e' convenuto col A.D. Tn.(Stores) che la seguente prassi sara' adottata qualora le autorita' civili richiedano materiale per manutenzione:

(a) Il Capitano del Porto sottomettera' in triplice copia la richiesta debitamente vistata dal locale Ufficiale della A.C. alla 990 Port Maintenance Coy.
b) La 990 Port Maintenance Coy, qualora ritenra' ragionevole la richiesta, la certifichera' rimettendola a questo H.Q.
c) Lo A.D. Tn.(Stores) passera' quindi la richiesta al 330 T.S.D. con la autorizzazione di concessione.

7) Fatture per attrezzature che trovansi attualmente in riparazione presso ditte civili e che dovranno essere consegnate non saranno pagate dall'Esercito Britannico, bensi' dalle autorita' italiane.

Cio' dovra' essere ben chiarito al Capitano del Porto ed una accettazione scritta a questo effetto dovra' essere richiesta da lui.

USIS 5 ITALIAN BIDS FOR U.S. MILITARY SURPLUSES TO BE MADE THROUGH STATE RAILWAYS

Rome, September 24 - Colonel L.F. Caulkins, acting field commissioner for the United States Army-Navy Liquidation Commission in Rome, announced today that bids from Italian ministries and other governmental agencies for surplus U.S. military equipment and supplies located in Italy are to be submitted through the Purchasing Service of the Italian State Railways.

Colonel Caulkins is acting in the absence of Phelps Kelley, Liquidation Commissioner in the Mediterranean theater. He said the Italian Ministry of the Reconstruction has designated the Italian State Railways as the agency of the Italian Government to deal with U.S. authorities responsible for disposal of surplus U.S. Army and Navy stocks in Italy. He added that such an agency will better coordinate sales information and offers.

The various Italian ministries will place their requirements through a small sub-committee which will be the liaison between their departments and the Italian State Railways.

SUBJECT : Visit to Caserta and Naples - 14 - 15 September 1945 Report upon Conversation between Mr. Allman and various officers at Caserta and Naples covering co-ordination of Port Projects and other business as indicated.

To : Mr. Lazzanella , Chief
Ports & Whse Division

1. Port Projects

a. Port Equipment at American Military Controlled Ports of Leghorn and Naples : This subject was discussed in detail with Mr. Richardson, Director of Harbor Craft, and Captain Martin, Deputy Director of Harbor Craft, and Assistant to Col. Danahan of Tn. American. Captain Martin proved most anxious to co-operate and was extremely helpful. He pointed out that while he was of the opinion that the American Military In. Authorities desired to assist Italian Economy in the most practical way, they could not declare their surpluses other than to their Army & Navy Liquidation Commission in Rome who are the responsible body in the matter of listing equipment for disposal. Captain Martin suggested. however, that for the commercial working of the ports by the Italian Authorities stevedoring equipment amounting to roughly 60% of the equipment used by the Military would be a reasonable bid by ALCOM and, having regard to the immense amount of port re-construction and clearance remaining to be done, 100% of salvage equipment would be required.

Captain Martin immediately had prepared detailed lists of all floating equipment for Leghorn and Naples Port areas based on the percentages indicated and handed these to me to enable ALCOM to frame their bids accordingly with U.S. Army & Navy Liquidation Commission without delay.

At my request, Captain Martin and Mr. Richardson accompanied me to Caserta later in the day to interview Colonel Danahan in relation to this subject.

1.10

Declassified E.O. 12356 Section 3.3/NND No. 785021

Unfortunately, Colonel Danahan had just left for Taranto but I was introduced to Colonel Mackenzie, Chief of Transportation, American, who explained that with every desire to be helpful, surpluses of Army Equipment could be declared only to Army & Navy Liquidation Commission, RCME. He noted and approved the basis upon which Captain Martin had prepared lists of floating equipment and, at this suggestion, we proceeded to interview Lt. Benton, Tn. Supply Officer, U.S. Army, Caserta, who also proved anxious to co-operate and has promised to furnish to this Division, AC at an early date lists of all (other than floating plant) equipment on 60% basis of that used over the last three months.

b. Notes re-Port Equipment: American Tn declare all surplus equipment to Army & Navy Liquidation Commission, Rome, and this Commission decides what is for disposal, receives bids and makes allocations.

The Director of Harbor Craft pointed out that much of the floating equipment in British Controlled ports is, in fact, the property of MWT but this aspect of the matter will be cleared up in London.

The Director of the Harbor Craft pointed out that surplus floating equipment could be declared only after the Port Project lists for both British and American Ports have been compiled and approved.

2. Port Fire-Fighting Equipment: I interviewed Commdr. H.M. Flint. R.N.R., Chief Staff Officer to Principal Sea Transport Officer, Caserta and it is soon became apparent that this matter is complicated by the fact that fire-fighting equipment at the ports is administered by :

a. Port water-born services by N.C.I.C.

b. In respect only of ship-board requirements by P.S.T.O.

c. Quays & warehouses by Director of Army F.F. Services.

In respect of a., some assistance would, no doubt, be forth-coming from Naval HQ but as this craft are confined to major ports, this Ports Branch & Warehouse Division can submit a list of estimated requirements.

In respect of b,, no surpluses will be made available.

In respect of c., I interviewd Major Forsyth of Army F.F. Service, who regretted the absence of his Chief but, after a full discussion and a further interview the following day

Declassified E.O. 12356 Section 3.3/NND No. 735021

after he had consulted with his Chief by telephone, he agreed to let this Division have a list of estimated Port requirements on the basis of which bids could be formulated. Here again a further complication arises from the fact that Army F.F. Service deals with F.F. requirements by Regions to which the Ports although included are incidental but Major Kreyth hoped to be able to disentangle the port requirements of the seven British Controlled Ports and also let us have a further list of equipment on the basis of which ALCOM can bid. He pointed out, however, that bids would have to be made to Chief Disposals Officer (Col.Fry) who is located in Rome.

3. Other Business:

a. Appointment by Swiss Government of a Port Liaison Officer at Genoa.

I delivered your letter to Major Simonds of G-2, Caserta, discussed the matter with him and he undertook to have a decision upon this matter communicated to Public Safety Sub Commission, AC, Rome within a couple of days.

b. SS "Ulmus" presently lying at Genoa.

P.B.T.O. Caserta knew nothing about this vessel. The Director of Harbor Craft, Naples, however, informed me that this vessel is listed in Lloyd's Register and that she is undergoing extensive repairs at Genoa under the direction of MWT.

c. Other matters discussed with the Director of Harbor Craft and with Captain Ramsey, Port Liaison Officer, Naples have been reported upon verbally to you.

Signed : A. C. ALLMAN

TO : Director of Transportation
Transportation (Br) Main, C.M.F.

1. As requested by your letter Tn.A.2/127/10 of 7 August 1945, with special reference to para 2 thereof, we attach hereto copy of letter AC/541/166/Tn3 of 13 August 1945 from Movements Division (Shipping Branch), AC, giving T.P.D. (estimated) for all Italian Ports together with information regarding general character of cargoes. Copy of a more detailed list supplied by Shipping Branch at a later date is also attached.

2. It should be explained that the totals given in the more detailed list are based on a later estimate and are, therefore, more likely to be realized than those furnished in the letter of 13 August 1945.

1. Port projects will be prepared in the near future to cover all Tn Stores held in each British operated port which will be required by A.C. when they take over the operation of that port.

2. To ensure that these projects provide for the retention of sufficient and suitable gear from the availabilities of each port to enable A.C. to work each port to their target T.P.D., will you please advise as soon as possible this target figure for each port at present under British control, giving general details of the types of cargo you expect to handle at each port. It would also be appreciated if you could provide, for information purposes, similar details for ports under American control and for civil ports where certain W.D. equipment has been loaned to you (i.e. Civitavecchia - Craft, Gear and Cranes; Naples Satellite Ports - Craft).

3. These port projects will be submitted to War Office for approval but, prior to submission, will be passed to you for confirmation that all the stores detailed therein are required by you for the port concerned.

4. Any W.D. TN. Stores required by A.C. over and above those included in port projects should be bid for by you against estimated surpluses which will be notified to you by this Service from time to time in accordance with the War Office procedure laid down for the disposal of surplus Tn. Stores.

5. By the formation of these port projects it will be possible to:-

1-154

(a) Ensure sufficient equipment and craft are available at each port for handing over to A.C., if War Office approve the project.

(b) Ensure the gradual hand over of part of the
