R O M A

e p.c. Spett. U.S.V.I.S. Ancona

Sollecito trasporti materiali.

Con riferimento alla ns/ 179 del 29 Maggio u.s., nel ringraziare codesta Spett/le Sottocommissione per l'assegnazione dei vagoni in partenza da Roma, che ci sono stati assegnati per la corrente settimana, ci permettiamo di sollecitare l'assegnazione dei trasporti concernenti in partenza da Bari.

Secondo quanto era stato convenuto infatti con un funzionario di codesta Spett/le Sottocommissione, il materiale minuto ed il macchinario sarebbero partiti da Bari a mezzo di un vagone chiuso da mc. 40 mentre il legname (circa mc. 140) sarebbe partito via mare. A tutt'oggi a quanto informa la nostra filiale di Bari, nessuna disposizione è pervenuta a quelle autorità locali.

5850

Trattandosi di lavori da essere eseguiti con la massima urgenza sulla strada militare nº 16, confidiamo che codesta Spett/le Sottocommissione vorrà darci tutto l'aiuto possibile.

Con perfetta osservanza.

(Attn. Capt. Hodges)

1. Receipt of copy of your circular AFHQ/2116/1/ST2(a) of 21 April 45 is acknowledged.

2. There is just one small point which requires clarification covered by para 9 (1) - we believe your meaning is that irregular detachment from the booklet invalidates the coupon.

3. You will notice, however, that para 6 of our letter to you AC/5087/ of 30 March '45 makes provision for the validating of single coupons under certain circumstances by contractors themselves and in such cases CIP are authorised to accept such coupons even though detaches from the booklet.

4. This facility was introduced as it appeared to fit in with P.B.S. particular requirements and it may be that some of your contractors will also find the system convenient from time to time.

APPENDIX "A" to
AFHQ/2116/1/ST2(a)
dated 21 April 45

SUPPLIES OF POL TO CIVILIAN CONTRACTORS
IN ITALY, SICILY & SARDINIA

1. All civilian contractors in ITALY, SICILY and SARDINIA whose work involves the use of road transport, will draw their requirements of POL at full retail prices, including taxes, from Comitato Italiano Petroli (CIP). Issues of POL will NOT in any circumstances be made to civilian contractors from Allied Military stocks.

2. POL to meet the commitment indicated in para 1 will normally come from the allotment made monthly by AFHQ to the Italian Civil Economy. This proviso will hold good notwithstanding a contractor is working under Allied Military instructions, particularly when the contract is in respect of services normally performed by the State or local authorities, such as repair and maintenance of existing roads and bridges or upkeep of public utilities.

3. An exception to the rule indicated at para 2 may be made in the case of work being carried out due solely to the needs of Allied Forces which will cease on withdrawal of such forces and is, or forms part of, a service, the cost of which is a legitimate charge against US or British account. In such circumstances contractors may be deemed to be working "on Allied Military account" and additional allotment of POL may be made to the Civil Economy to compensate for purchases made by them in order to fulfil such services.

4. The method of securing the additional allotment as indicated in para 3, will be as follows:

(a) The contractor will submit to employing service a request for supplies showing service on which employed, make, type, HP and registration number of vehicle(s). Such request will be on a calendar monthly basis and will show estimated rate of consumption and working hours per day.

5816

(b) The employing service will screen, certify and forward to HQ(US) Base Section or ST(Br) of Area, Sub Area or formation concerned

Declassified E.O. 12356 Section 3.3/NND No. 785019

1. All civilian contractors in ITALY, SICILY and SARDINIA whose work involves the use of road transport, will draw their requirements of POL at full retail prices, including taxes, from Comitato Italiano Petroli (CIP). Issues of POL will NOT in any circumstances be made to civilian contractors from Allied Military stocks.

2. POL to meet the commitment indicated in para 1 will normally come from the allotment made monthly by AFHQ to the Italian Civil Economy. This proviso will hold good notwithstanding a contractor is working under Allied Military instructions, particularly when the contract is in respect of services normally performed by the State or local authorities, such as repair and maintenance of existing roads and bridges or upkeep of public utilities.

3. An exception to the rule indicated at para 2 may be made in the case of work being carried out due solely to the needs of Allied Forces which will cease on withdrawal of such forces and is, or forms part of, a service, the cost of which is a legitimate charge against US or British account. In such circumstances contractors may be deemed to be working "on Allied Military account" and additional allotment of POL may be made to the Civil Economy to compensate for purchases made by them in order to fulfil such services.

4. The method of securing the additional allotment as indicated in para 3, will be as follows:

(a) The contractor will submit to employing service a request for supplies showing service on which employed, make, type, HP and registration number of vehicle(s). Such request will be on a calendar monthly basis and will show estimated rate of consumption and working hours per day.

(b) The employing service will screen, certify and forward to HQ(US) Base Section or ST(Br) of Area, Sub Area or Garrison concerned.

(c) After scrutiny, ST will issue the necessary coupons for the calendar month in question and will, in addition, forward not later than the 7th of the month to DST, AFHQ, with copy to AFHQ Petroleum Section, RAAC, a summary of products and quantities for which coupons have been issued.

(d) AFHQ Petroleum Section, RAAC will release the necessary replacements to CIP.

5. Coupons will be made up into booklets, each of which will contain one master leaf which will need to be franked by the office of issue, and a series of detachable coupons. Detailed instructions for the operation of this system are given in para 6 et seq.

Liquids - One Litre
Greases - One Kilogram

7. ST Branch will ensure that:-

(i) The appropriate product, e.g. Navy Fuel, Kerosene, is inserted on each coupon in the write-in series. It will not be necessary to insert the particular grade of motor vehicle lubricant (oil or grease) on coupons.

(ii) The booklet is franked with the month of validity and the office stamp of ST Branch.

8. The issuing office will also ensure that:-

(i) Coupons which are not valid are cancelled at the issuing office by tearing off the right-hand half of the coupon.

(ii) Old coupon booklets with cancelled coupons in situ are returned to the issuing office before a new booklet is issued.

(iii) Booklets are filled in with :-

(iii) Booklets are filled in with :-

Contractor's Name & Address
Vehicle Make & Registration Numbers of all vehicles belonging to Contractor.
Total POL represented by coupons.

9. Coupons will become invalid if:-

(i) They become detached from the booklet.

(ii) The booklet is not frankad with the month and ST Branch stamp.

(iii) They are presented after the month of validity.

Declassified E.O. 12356 Section 3.3/NND No. 785019

10. All booklets will be kept under lock and key and a register will be kept as follows:-

1. Type, quantity and Serial number of booklets received.
2. (a) Serial Number of each booklet issued.
   (b) Number of valid coupons in each booklet at time of issue.
   (c) Signature of recipient.

Booklets will normally be issued direct by ST to contractor but exceptions are permitted whereby booklets may be handed to employing services. In such cases a temporary receipt will be obtained from the employing service to be substantiated later by a statement containing the receipt of each contractor against booklets issued and a list of any outstanding coupons returned. Endorsement of "Write-in" coupons with appropriate grade and of booklets with month of validity vide para 7 above will always be effected by ST Branch before issue via employing services.

11. Letters of authorisation may continue to be used in lieu of coupons in the case of large industrial consumers whose requirements exceed 5000 litres per month.

SUBJECT: Bitumen.

HQ. A.C., Commerce Sub-Commission,
APO 394. (3).

1. Heretofore, the requirements of Bitumen for use in Italy have been provided against demands made by the military Engineer Services and stocks at present held are only sufficient to meet the requirements of programs planned by such Services.

2. It is desirable, in view of changing circumstances, that Allied Commission should now submit demands for Bitumen required over and above the purely military program. In accordance with existing directives, such demands should be submitted to this office. It is presumed that the demands will be coordinated with the military Engineer so that duplication can be avoided.

3. It is pointed out that this Section is only authorized to arrange the importation of such quantities of petroleum products as are essential to prevent disease and unrest prejudicial to military operations, and that the demands should be supported by a statement that the programs, for which the Bitumen is demanded, are essential for this purpose.

SUBJECT : Bitumen for Road Building.

TO : P.W.U.Subcommission

1. From information received by Petsec. it is believed that talks are in progress relative to the turnover of Road maintenance to the Italian Government in about September or October of this year.

2. Petsec. point out in this connection that there are no military bids for Bitumen beyond October 1945 and are very concerned that no estimates have been forthcoming in response to their Pet 30/C/8 of 23 April '45, copy of which was sent to you attached to our AC/5083 of 27 April '45.

3. May this matter please have your prompt attention and estimates be submitted through this Sub-Commission.

4. For Industry Subcommission : No reply has been received in response to para 3 of our AC/5083 of 27 April '45. Is it to be assumed that there are no programmes in hand likely to involve future calls for bitumen in connection with industrial reconstruction ?

ROMA

La ditta sottoscritta, avendo in corso d'esecuzione i lavori per la costruzione di un sifone di sottopassaggio della Stazione Ferroviaria di Terni, a servizio del canale Murelle, ha bisogno per l'illuminazione in galleria di una assegnazione di Kg.150 di carburo di calcio.

Detti lavori hanno carattere urgentissimo, dipendendo dall'ultimazione di essi l'irrigazione di importanti zone agrarie.

Pertanto prega vivamente Codesta On. Commissione affinché provveda all'assegnazione presso gli stabilimenti di Papigna della Società TERNI, con la massima sollecitudine possibile.

Mentre ringrazia vivamente, coglie l'occasione per porgerVi distinti saluti.

PIERBONI MARSALA = TERNI

TO : AC Sub-Commission 28 May 45

SUBJECT : Works on Muralle Syphon.

The undersigned Firm is undertaking construction of a syphon serving Murelle Canal for underpassing Terni Railroad Station. We need an allocation of 150 Kgs of calcium carbide for lighting of underground works.

Said works are of utmost importance, since the irrigation of important agricultural areas depends upon their completion.

We beg therefore your Sub-Commission to arrange for a/m allocation against Papigno Plants of Terni Co., at your earliest convenience.

OGGETTO: Richiesta di buoni carburante per Giugno corr.anno - per lavori di importanza militare. (S.S.N.7)

Si prega indicare nella risposta il N. di protocollo.

Come da richieste allegate, approvate dal Maggior Johnson, del P.B.S. Napoli, Vi prego fornire i buoni carburanti per Giugno I945, nelle seguenti quantità:

Benzina	litri	21.000
Nafta	litri	7.500
Olio	litri	850

Tali quantitativi sono stimati necessari per lavori di importanza militare sulla S.S.N.7 (Appia) nella giurisdizione del P.B.S.Napoli.

REF. LO/POL/1
2 June '45

Subject:- P.O.L. Supplies Civilians Contracts a Italian Govt. Territory.

To: - 10 C.R.S.
8th C.R.S.

The procedure for supply of P.O.L. to Officials & Contractors engaged on contracts Military Highways will be as follows, pending further instructions.

(a) The Genio Civile will prepar the schedule of requirements & submit to C.R.S.(Rds) for approval. Two copies of this schedule will be forwarded to A.C.L.C.(Rds) Att. 1st C.R.S. (Rds).

(b) The consolidated return will be submitted to the Provveditore Regionale of each Compartment who will forward through Italian Channels, one copy for A.C. Commerce Sub-Commission.

(c) Coupons will be issued by Commerce Sub-Commission based on this return to the A.C.L.C. who will distribute through 1st C.R.S. to C.R.S. (Rds).
C.R.S. (Rds) will issue to the Italian Engineer concerned for issue to Contractors.

(d) Application from Contractors for coupons & authority to purchase from C.I.P. will be made on the form attached.
The Provveditore Regionale or Genio Civile should arrange for the supply of these forms for issue to all Contractors engaged on Genio Civile Contracts for roads & bridge work on Military Highways.

(e) The form includes instructions for completion and disposal. The C.R.S. (Rds) approves the estimated requirements on receipt of form from Genio Civile and later countersigns the Contractor's record of petrol consumed and unused coupons handed back to the issuing authority, i.e. Italian Engineer concerned, for eventual return to A.C.L.C.(Rds).

(f) A record of actual petrol consumption and surplus coupons will be therefore held by the C.R.S (Rds) and the A.C. Liaison Officer.

(g) C.R.S. (Rds) will record & account for coupons issued & should be on the basis of individual Contractors & not in Bulk.

5819

Italian Genio Civile Officials will obtain supplies of P.O.L. through the appropriate Italian Civil Authority.

Declassified E.O. 12356 Section 3.3/NND No. 785019

will be forwarded to A.M.L.O.(Rdg) Att. 1st D.M. (Rdg).

(b) The consolidated returns will be submitted to the Provveditore Regionale of each compartment who will forward through Italian channels, one copy for A.C. Commerce Sub-Commission.

(c) Coupons will be issued by Commerce Sub-Commission based on this return to the A.M.L.O. who will distribute through Ca R.R. to D.M. (Rdg).
D.M. (Rdg) will issue to the Italian Engineer concerned for issue to Contractors.

(d) Application from Contractors for coupons - authority to purchase from C.I.F. will be made on the form attached.
The Provveditore Regional or Genio Civile should arrange for the supply of these forms for issue to all Contractors engaged on Genio Civile Contracts for roads & bridge work on Military Highways.

(e) The form includes instructions for completion and disposal. The D.M. (Rdg) approves the estimated requirements on receipt of form from Genio Civile and later centersigns the contractor's record of petrol consumed and unused coupons handed back to the issuing authority, i.e. Italian Engineer concerned, for eventual return to A.M.L.O.(Rdg).

(f) A record of actual petrol consumption and surplus coupons will be therefore held by the D.M (Rdg) and the A.C. Liaison Officer.

(g) D.M. (Rdg) will record & account for coupons issued which should be on the basis of individual Contractors & not in bulk.

5819

Italian Genio Civile officials will obtain supplies of P.O.L. through the appropriate Italian Civil Authority.

SUBJECT: Timber Release for Bridges.

TO : Headquarters, Allied Commission, APO 394
(Attn: Public Works & Utilities Sub-Commission)

Reference telephone conversation 24 May (Deputy Director - Lt. Col. CROOM-JOHNSON).

1. Signore CUGIANI representing the Societa Generale Immobiliare (Contractors for the bridge SASSO over OMBRONE in GROSSETO Province) presented himself at this office today. He is in urgent need of 1,000 cubic metres of diamensional arch timbering for the reconstruction of bridges on Routes 1 and 7 and applied to the Public Works and Utilities Division at TOSCANA Region. The latter under reference their letter R-8/100/LIV/3 dated 16 May 1945 referred him to PENBASE Engineering Section at LEGHORN, who referred him to this HQ.

2. It is understood from the telephone conversation referred to above, that this request should have been referred by TOSCANA Region to you and that you will follow this matter up and arrange for the necessary release of timber, if possible.

3. Signore CUGIANI is prepared to accept heavy timber which he himself would re-saw.

4. Signore CUGIANI states that he has already visited your office in connection with his request and that he was referred by you to TOSCANA Region. As the request has now come round in a complete circle it will be appreciated if it may be followed through closely to ensure that he gets his timber if it is available.

9 C.R.E. Works
S.O.R.E. Stores 3 District

1. Attached herewith is copy of letter from O.C. 296 Works Section R.E. addressed to C.E. 3 District concerning bitumen and asphalt production in Sicily. Also attached is list of current selling prices ex Sicily for bitumen and asphaltic products.

2. Though the present out-put is small, C.E. 3 District is interested in this matter considering the limited quantity of bitumen at present available from military sources, and it is felt that the Sicilian bitumen production could well be used for military highway maintenance in Calabria, first priority being given to Highway 19 from Lagonegro to Reggio.

3. Accordingly, C.E. 3 District considers that the Ministry of Public Works should take the necessary steps to secure the bitumen production of the Ragusa mines for the use of the Ufficio Speciale del Genio Civile per la Viabilità Statale of Calabria, the arrangements to include the necessary release of funds in order that the Genio Civile of Calabria may effect purchases.

4. Samples of the products listed in the attached list are available in this office and may be sent on request to any party interested.

5. Please may this office be informed of any action taken in the matter.

Subject: Bitumen and Asphalt.

296 Works Section, R.E.,
C.M.F.
Ref: 296/S/3/8

2(th April, 1945

Chief Engineer,
No. 3 District.

With further reference to the conversation between Capt.Smart and Capt Robinson regarding the possibilities of Sicily supplying a quantity of Bitumen and Asphalt powder to the mainland.

At the present time the average daily production of 80/100 Bitumen at RAGUSA Mines is 2 Tons but this can be increased by at least 100% if the Factory is given constant electrical energy by the Sicilian Electric Power Coy.

The daily output of pulverised asphalt powder is at present 250 Tons which can also be increased if 24 hours uninterupted power supply is given.

Enclosed herewith is a price list of the commodities which are being produced by these Works. It is pointed out that Bitumen to any desired specification can be manufactured.

Samples of Bitumen, asphaltic oils and powder are being sent to you under separate cover. An analysis of each product is attached to each sample.

Asphaltic Oil can be produced at the rate of 150 Tons per day.

Any further information you may require can be given on request.

HQ AC (attention Lt.Col. V.S.Thompson).

1. Reference is to your 078/4/PWU of 13 April 45.

2. I have had special enquiry made into the question of the brick supply in the Ancona district, and I feel that I cannot do better than send you a copy of the report received from Major Mole.

3. Major Mole reports that he came upon a stock of bricks which the owner had failed to divulge to military or civil sources, and that as they were so near to the railway, he immediately made arrangements to take them. In doing so, he quite obviously left available other bricks which he would have required from known sources.

4. I feel that the fact that the owner had hidden these bricks should be made known, for his action is one which might have caused grave difficulties to both military and civilian construction projects.

Tn.Sub-Commission

Subject : Line 86 Central Section - Brick Kilns.

1. - Reference your letter AC/Tn/18/90/CE dated 15 April together with the enclosures returned herewith I have the following comments no make:

(a) The kiln in question, it will be observed on reference to a map, is within a few hundred yards of Line 86 Central Section near Giulianova. Hence, as of result of conversation with Lt.Col. Thompson referred to in his letter, is well within what was referred to as my "territory".

(b) The existance of this kiln was known to me at the beginning of the work last October but, as it was stated that there were neither burnt or unburnt bricks available at this source, the kiln was not visited.

While on my two day tour at the end of March of all the brick kilns under contradt, I met the owner who repeated that no bricks were available at the Giulianova Kiln but given transport and coal would undertake to obtain unburnt bricks, cart them to Giulianova and burn same.

This proposal was not accepted. The Giulianova Kiln was passed on the return journey to Ancona and I noticed several broken bricks laying in the short approach road from the main road to the kiln.

I therefore decided to visit the kiln and was emphatically told by the manager that not a single brick was to be found on the premises. Not being satisfied, I had a look at the actual kiln and found all the entrances built up and the clay jointing of the bricks well burnt and cracked. I demolished one of these entrances myself and found the inside filled with newly burnt bricks. Investigation at several of the other entrances confirmed that the entire kiln was full of burnt bricks estimated to total 80.000.

The manager then laughingly tried to bluff the whole matter and on careful questioning admitted that the kiln was not under any contract to supply the Military or Civil Authorities. As a result of this, I instructed Ing.Morgana to make a contract with the firm for the total amount of bricks.

I understand that during the night following my visit a considerable quantity of the bricks were removed and the letter written by Ing.Morgana was his idea of how to best handle the situation.

I have instructed Ing.Morgana that in future the must consult me before despatching any letters quoting Military or AC/AMG authority.

2. - I consider that no spirit of the agreement with Lt.Col. Thompson was broken, there was a klin with bricks available for immediate use practically alongside the railway with no contracts and with a source of supply

Declassified E.O. 12356 Section 3.3/NND No. 785019

(b) The existance of this kiln was known to me at the beginning of the work last October but, as it was stated that there were neither burnt or unburnt bricks available at this source, the kiln was not visited.

Wile on my two day tour at the end of March of all the brick kilns under contradt, I met the owner who repeated that no bricks were available at the Giulianova Kiln but given transport and coal would undertake to obtain unburnt bricks, cart them to Giulianova and burn same.

This proposal was not accepted. The Giulianova Kiln was passed on the return journey to Ancona and I noticed several broken bricks laying in the short approach road from the main road to the kiln.

I therefore decided to visit the kiln and was emphatically told by the manager that not a single brick was to be found on the premises. Not being satisfied, I had a look at the actual kiln and found all the entrances built up and the clay jointing of the bricks well burnt and cracked. I demolished one of these entrances myself and found the inside filled with newly burnt bricks. Investigation at several of the other entrances confirmed that the entire kiln was full of burnt bricks estimated to total 80.000.

The manager then laughingly tried to bluff the whole matter and on careful questioning admitted that the kiln was not under any contract to supply the Military or Civil Authorities. As a result of this, I instructed Ing.Morgana to make a contract with the firm for the total amount of bricks.

I understand that during the night following my visit a considerable quantity of the bricks were removed and the letter written by Ing.Morgana was his idea of how to best handle the situation.

I have instructed Ing.Morgana that in future the must consult me before despatching any letters quoting Military or AC/AMG authority.

2. - I consider that no spirit of the agreement with Lt.Col. Thompson was broken, there was a klin with bricks available for immediate use practically alongside the railway with no contracts and with a source of supply presumably not known to any authority.

5792

Further it was obvious that it was not intended to sell the bricks for public use but to dispose same on the "Black Market" and prompt action was necessary to secure the supply for the railways.

However, as related above, the effort was not entirely satisfactory.

SUBJECT : Military contractors coupons.

TO : S & T Branch
AFHQ
(Attn. Capt. Hodges)

1. Receipt of copy of your circular AFHQ/2116/1/ST2(a) of 21 April 45 is acknowledged.

2. There is just one small point which requires clarification covered by para 9 (1) - we believe your meaning is that irregular detachment from the booklet invalidates the coupon.

3. You will notice, however, that para 6 of our letter to you AC/5087/ of 30 March '45 makes provision for the validating of single coupons under certain circumstances by contractors themselves and in such cases CIP are authorised to accept such coupons even though detaches from the booklet.

4. This facility was introduced as it appeared to fit in with P.B.S. particular requirements and it may be that some of your contractors will also find the system convenient from time to time.

SUBJECT: Military Contractors Coupons .

TO : P. W. U. Sub-Commission .

1. Reference is made to circular dated 2I April 45 sent out by Chief Engineer 3 District and conversation Col. Thompson , Maj. Osborne, Capt. Cowlin .

2. It is pointed out that, in view of the particular nature of Military Contractors cpupons, this S/C can only agree to supplying them in bulk to responsible military formations - in this case G.E. Roads - and not to Italian civilian bodies such as the Provveditorato Regionale or Genio Civile.

3. There is no objection raised to using Genio Civile for the distribution of coupon booklets to individual contractors provided that they have first been validated for issue to such contractors by filling in the necessary details on the fly leafs attached and stamping by G.E. Roads.

4. G.E. Roads would thus hold all reserve stocks of blank booklets and Genio Civile would function rather as a postbox than the actual issuing office.

5. It is understood that this modification of the procedure would be acceptable and we request, therefore, that you give the necessary instructions for it to be put into effect.

Tel: Baseball 87
LO/1/PET.

15 April, 1945

1. In compliance with Petroleum Instructions Number 2, Headquarters AC., dated August 1944 the estimates of Petroleum Products to be used by Civilian Contractors repairing Military Highways during the month of May is submitted herewith.

2. The number of vehicles being used by each contractor appears in column 3 & 4 of the estimates. The figures 1-5-0 (for example) appearing in both the "On Gas" and "On Diesel" columns mean as follows:

a. The first figure (1) indicates the total of motorcycle and passengers cars.

b. The second figure (5) represents the total of motor trucks.

c. The last figure (0) indicates the power operated equipment, angle dozer, road rollers, air compressor etc.

d. Add all figures together for both the "On Gas" and "On Diesel" columns to get the total equipment being employed by each contractor.

e. This is supplementary to lists sent under cover of LO/1/PET, d/d 13 Apr, 45.

15 March 1945

Subject: Petrol Coupon booklets- Military Contractors.

To : P. W. & T. Sub-Commission.

1. It has brought to our notice that the present make up of booklets of coupons for Military Contractors(P.B.9/10/II, P.C. 5/6/7/8)presents certain inconveniences from the point of view of issue to individual truck owners, since in many cases the ration allowed per truck has been less than the value of the minimum booklet-i.e.250 liters and as a consequence the necessity has arisen for splitting booklets.

2. A practical method evolved in one area for keeping control over booklets split in this way is outlined in para 3 and is approved for adoption in other areas.

3. a).Booklets are split into two or more parts, the original outer cover being attached to the first batch of coupons issued and duplicates outer covers to the remaining batch or batches.

b).Each duplicate cover carries the same details on the inside as the original and is filled out in the same way.

c).The original serial number of the booklet cover is retained on the additional covers used but for identification purposes /A./B./C.etc. is added.

d).In this way, for example, Booklet N° 50 may be issued to give different trucks at the rate of 10 coupons each in the form of booklets, N°.50,50A,50 B, 50 C and 50 D each trucker having his individual booklets showing the usual details proving his right to possession.

4. When making up the new issue of Military Contractor's Coupons for use May to August the intention is to have smaller booklets allowing greater elasticity of uses and including coupons for the standard 3% allowance of Lubricants per vehicle.

5. The sizes suggested as most practical and the new serial references are as follows:-

Petrol		Gasoil		5765
P.B. 5 - 50	&	P.C. 5 - 50	5x 10)	Units).
P.B. 6- 100	&	P.C. 6 -100	5x 20)	Units

../..

Declassified E.O. 12356 Section 3.3/NND No. 785019

P.B. 7 - 250 & P.G. 7 - 250 (10x 25 units)Lubricants

The figures 50, 100 and 250 included in the Serial reference indicates the total number of units contained in each booklet for convenience of the issuing office.

Special booklets of Lubricant coupons will no longer be necessary.

6. The actual make up of the coupons will be the same as for the present series but any comments suggesting changes in the light of practical experience would be welcomed with a view to future improvements.

COMMERCE SUB-COMMISSION

Ref. AC/5087/Commerce/POL. 34 Tel. Rome 478829

31 March 1945

SUBJECT : Petrol coupons - military contractors.

TO : P.W.U. Sub-Commission (attn. Capt. Shepherd).

1. Our letter AC/5087 dated 15 March 1945 (paras 4-6)refers. Attached is a list showing the revised series of Military Contractors booklets for the period May-August now in print.

2. To meet particular needs of S & T, AFHQ and P.B.S. some changes have been made which are called to your attention hereunder.

(a) Every coupon now carries a space for vehicle number and every stub spaces for vehicle number, Trip ticket number and date.

(b) A master fly leaf has been added in front of each booklet to provide space for listing all vehicles in a contractors fleet and period of validity.

(c) The above changes are to adapt coupons for use by any vehicle in a contractor's fleet either singly or in booklet form. If a contractor re-issues coupons singly to individual vehicles the number must be filled by him in the space provided - this is not necessary if a complete booklet is issued to one vehicle.
C.I.P. have authority to accept detached coupons validated in the above manner.

3. Booklets of coupons for 50 units have been added as it was felt that there is a limited demand for these by big consumers.

4. A special Luboil series has also been added as we are informed that it is often necessary to supplement the standard 3% allocation of lubes and greases. The practice is to be discouraged as far as possible but series P.O.1provides the answer where a concession is justifiable. These coupons can

5763

Declassified E.O. 12356 Section 3.3/NND No. 785019

be issued either singly or in book form.

5. Finally a series of Utility "white-in" coupons has been devised to cater for products other than Petrol, Gas Oil or Lubes, e.g. "Navy Special" for which demands have been made in the past. The quantity of these is limited but a small supply can be made available if you feel that they are likely to be of use.

6. Please let us know as soon as possible the quantities of each type of booklet estimated to cover you needs for the period May-August.

W.P. EVANS

Tel. Rome 478829

31 March 1945

SUBJECT: Petrol coupons - military contractors .

TO : P.W.U. Sub-Commission (attn. Capt. Shepherd).

1. Our letter AC/5087 dated 15 March 1945 (paras 4-6) refers.
Attached is a list showing the revised series of Military Contractors booklets for the period May-August now in print.

2. To meet particular needs of S & T, AFHQ and P.B.S. some changes have been made which are called to your attention hereunder.

(a) Every coupon now carries a space for vehicle number and every stub spaces for vehicle number, Trip ticket number and date.
(b) A master fly leaf has been added in front of each booklet to provide space for listing all vehicles in a contractors fleet and period of validity.
(c) The above changes are to adapt coupons for use by any vehicle in a contractor's fleet either singly or in booklet form. If a contractor re-issues coupons singly to individual vehicles the number must be filled by him in the space provided - this is not necessary if a complete booklet is issued to one vehicle.
C.I.P. have authority to accept detached coupons validated in the above manner.

3. Booklets of coupons for 50 units have been added as it was felt that there is a limited demand for these by big consumers.

4. A special Luboil series has also been added as we are informed that it is often necessary to supplement the standard 3% allocation of lubes and greases. The practice is to be discouraged as far as possible but series P.O. I-5 provides the answer where a concession is justifiable. These coupons

./.

Declassified E.O. 12356 Section 3.3/NND No. 785019

can be issued either singly or in book form.

5. Finally a series of Utility "White-in" coupons has been devised to cater for products other than Petrol, Gas Oil or Lubes, e.g. "Navy Special" for which demands have been made in the past. The quantity of these is limited but a small supply can be made available if you feel that they are likely to be of use.

6. Please let us know as soon as possible the quantities of each type of booklet estimated to cover you needs for the period May-August.

15 March 1945

SUBJECT: Petrol coupon booklets - Military Contractors.

TO : P. W. D. Sub-Commission.

Lt Col Thompson
Pls study this recommendation

1. It has brought to our notice that the present makeup of booklets of coupons for Military Contractors (P.C. 5/10/I, P.C. 5/5/7, P.C. 5/5/7/A) presents certain inconveniences from the point of view of issue to individual truck owners, since in many cases the ration allowed per truck has been less than the value of the minimum booklet - i.e. 250 litres and as a consequence the necessity has arisen for splitting booklets.

2. A practical method evolved in one area for keeping control over booklets split in this way is outlined in para 3 and is approved for adoption in other areas.

3. a) Booklets are split into two or more parts, the original outer cover being attached to the first batch of coupons issued and duplicate outer covers to the remaining batch or batches.

b) Each duplicate cover carries the same details on the inside as the original and is filled out in the same way.

c) The original serial number of the booklet cover is retained on the additional covers used but for identification purposes /A, /B, /C, etc. is added.

d) In this way, for example, Booklet No 50 may be issued to give different issues at the rate of 10 coupons each in the form of booklets, No 50, 50 A, 50 B, 50 C and 50 D each trucker having his individual booklets showing the usual details proving his right to possession.

4. When making up the new issue of Military Contractor's Coupons for use May to August the intention is to have smaller booklets allowing greater elasticity of use and including coupons for the standard 3% allowance of lubricants per vehicle.

5. The sizes suggested as most practical and the new serial references are as follows:-

Petrol		Diesil		
P.B. 5-50 &	P.C. 5-50	5x 10 units	5747	3 %
P.B. 6-100 &	P.C. 6-100	5x 20 "		

./.

Declassified E.O. 12356 Section 3.3/NND No. 785019

F.P. 7-250 & F.G. 7-250 Ikx 25 units) Interchange

The figures 50, 100 and 250 included in the Serial reference indicate the total number of units contained in each booklet for convenience of the issuing office.

Special booklets of Lubricant coupons will no longer be necessary.

6. The actual make up of the coupons will be the same as for the present series but any comments suggesting changes in the light of practical experience would be welcomed with a view to future improvements.

1. An engineer employed by the firm Rotundi and Sons, who arrived to Rome to his head office from Foggia, was unable to obtain petrol for his return journey as the coupons were not properly stamped nor was the registration number of the vehicle, etc., marked on the outer cover. This was possibly due to negligence on the part of the No. 1 District issuing office. The object, however, of this letter is to advise you that the book of coupons was issued on the demand of the Foggia engineer, P.W. & U., and that although it was the 20th of the month of March, this firm had been operating for the first 20 days without a necessity of using any coupons, indicating that their previous supplies must have been in excess of actual requirements.

2. It would be appreciated if the engineers would more carefully screen demands for POL as this Section finds that the issue to military contractors of POL is responsible for a large proportion of the Black Market.

AL MINISTERO INDUSTRIA COMMERCIO E LAVORO

R O M A

1. Si trasmette a codesto Ministero, affinchè esprima il proprio parere in proposito, la traduzione di una lettera pervenuta a questa Sottocommissione dalla Sottocommissione Lavori Pubblici di questo Quartiere Generale.

2. Per il caso che questa Sottocommissione ritenesse di aderire alla richiesta contenuta nella lettera stessa e cioè di fare ogni mese un'assegnazione globale di 1.000 tonnellate di cemento perchè siano destinate all'esecuzione di lavori pubblici, sarebbe esclusa la possibilità di qualunque altra assegnazione a favore del Ministero dei Lavori Pubblici, Genio Civile, Azienda della Strada ed organi dipendenti, nonchè a favore di imprese appaltatrici di lavori per conto dei medesimi enti, sia da parte di questa Sottocommissione, sia da parte di codesto Ministero, su qualunque cementificio destinato alla produzione per usi civili.

3. Sempre per il caso che questa Sottocommissione ritenesse di aderire alla richiesta di cui all'unita lettera, il quantitativo eventualmente assegnato verrebbe ad incidere in parti uguali sulle quote che attualmente vengono assegnate da questa Sottocommissione e da codesto Ministero, e la quota del 50% a ciascuno di essi spettante verrebbe ad essere calcolata sul residuo.

TO : Public Works and Utilities S/C.

1. Attached is a copy of Southern Region R/1557 of 1 February 1945 and enclosure PWU - 66/45 thereto.

2. The actual physical issuance of these coupons could, if necessary, be done by the local licensing authority provided it is under the Regional Engineer's control and that adequate safeguards are taken to prevent the coupons being improperly used.

3. Such safeguards are particularly necessary as the coupons provide a means of obtaining supplies in addition to allocations for civilian purposes.

4. It should be added that the Military Districts and P.B.S. have undertaken to issue their own coupons to Military Contractors directly employed by them. It has also to be remembered that the coupons are a special printing and that to distribute supplies amongst all the provincial licensing offices would be impracticable and dangerous.

R/1557 1 February 1945

SUBJECT: POL

TO : Headquarters, Allied Commission
(ECONOMIC SECTION) .

1. I am attaching herewith a letter received at this HQ from the Public Works and Utilities Division, Southern Region. The problem presented by Public Works and Utilities Division is one form of a general problem which will have to be faced in Southern Region very shortly.

2. We know very well that the general program for Southern Region envisages a marked diminution in officers' strength. This withdrawal of officers may, indeed, take place in the near future. At the same time the standard of detailed accounting and reporting required by HQ,AC does not diminuish.

3. May I invite your very careful consideration of these facts?

/S/ J.K. DUNLOP
Brigadier
Regional Commissioner.

HEADQUARTERS
SOUTHERN REGION, ALLIED COMMISSION
APO 394, U.S. Army
PUBLIC WORKS AND UTILITIES SECTION

31 January 1945

PWU - 66/45

SUBJECT: POL

TO : Regional Commissioner, Southern Region, APO 394

1. The Public Works and Utilities Section Southern Region is faced with an unsolvable problem as orders now stand with our Sub-Commission in Rome.

2. We were required some months ago to set up a system of issue and control for all POL used by our civilian contractors working on military highways. The system originally set up required each of our offices in various parts of Southern Italy to actually fill in, sign and issue the coupons for the gallonage for each motor car, truck, road roller, compressor and all other POL consuming machines for each contractor. It was a very big time consuming job when we had a force of officers and men to do the work.

Now our staff has been reduced as you know to a mere token force but the same work has to be done. The question is "how are we to do it" To give you a clearer picture here are some facts:

In the provinces mentioned below we have no official representative and the figures after each province represents the number of contractors working on military projects at this time:

Avellino	5	Catanzaro	10
Benevento	6	Cosenza	4
R.Calabria	5	Potenza	11
Brindisi	1	Salerno	14
Lecce	3		

It is suggested by this Office that some system under control of the Italiab authorities be st up to issue the requirements to these contractors.

5736

They now have agencies throughout the entire region that are capable and convenient to perform this service.

SUBJECT: Bitumen For Civil Highways.

TO : Economic Section, HQ. A.C.

1. Public Works and Utilities Sub-Commission letter 078/4/PWU of 9 December 1944 is returned to you as requested together with notes on the asphalt producers of Pescara and Frosinone Provinces.

2. The Ragusa asphalt works of Sicily are too well known to require comment and it is understood that Public Works and Utilities Sub-Commission is particularly interested in continental Italy. Production figures for Ragusa are available.

3. The notes on continental asphalt are compiled from records. The mines have not been visited.

4. It is suggested that an opinion be obtained on the suitability of the products for the present purpose. On this point the Mining Division does not feel competent to judge. If the asphalt rock is found to be suitable, the Mining Division will do whatever it can to stimulate production. Some doubt exists, however, as to the suitability of the crude rock since residue from oil distillation plants are not available as an admixture.

NOTES ON ASPHALT ROCK AND BITUMEN IN CONTINENTAL ITALY

In 1938 the Province of Pescara produced 75,633 tons of asphalt rock for road making and 857 of crude bitumen.

In the same year the Province of Frosinone produced 5,614 tons of asphalt rock.

The undermentioned companies operated:

1. SOCIETA' ABRUZZESE MINIERE ASFALTO (S.A.M.A.)

of 7, Via Veneto - Rome. Director Commendatore Tinori.

This was the largest producer and operated the following mines, all in Pescara Province:

Commune of Lettomanoppello	
Piano Monaci Mine	asphalt rock
Commune of San Valentino	
Cusano Mine	asphalt rock
Filone Mine	" "
San Giorgio Mine	" "
Commune of Manoppello	
Foce Valle Romana Mine	bitumen.

The asphalt rock was ground at a central mill at Scafa, near San Valentino Ceramico, and ground "Polvere", "Mastice" and blocks were produced the total capacity in 1942 being:

400 tons/day - Polvere at 7 to 8
64 " - Mastice
360 Sq. metric day - blocks

5728

Declassified E.O. 12356 Section 3.3/NND No. 785019

The plant was damaged by aerial bombardment but being covered by rubble it escaped the attention of German demolition parties.

The present potential production is not known. the company is engaged on repairs.

The bitumen rock from Foce Valle Romana runs about 15% bitumen. Plant at the mine formerly produced oil and bitumen at the rate of 3 and 2 tons per day, respectively.

The plant was damaged partly by bombardment and partly by enemy demolition and at present only one ton of bitumen per day can be produced.

2. SOCIETA' ANONIMA FUNICELLI STRADE E CAVE

of Milan also operated in Pescara Province in the same Communes but their production was small compared with that of S.A.M.A.

Their properties are:

Commune of Lettomanoppello	
Case Mine	asphalt rock
Fonticelli Mine	bitumen
Commune of San Valentino	
San Spirito Mine	asphalt rock
San Giorgio Mine (near its namesake)	" "

Nothing is known at present regarding the state of the plant.

3. SOCIETA' ANONIMA MINIERA DI SOLFIZZA

of 267, Corso Umberto I - Rome, operates the Monticello Mine in the Commune of Colle San [illegible] Province of Frosinone. 5727

The grade of run of mine asphalt rock is 5 %

Declassified E.O. 12356 Section 3.3/NND No. 785019

The mine claims to be able to produce 600 tons of "Mastice" and 800 tons of "Polvere" per month. The plant is intact and is ready to work as soon as a market is available.

4. SOCIETA' ITALIANA PRODOTTI ASFALTICI (S.I.P.A)

works several small properties near Scalo in Frosinone province. This is a new producer. It can turn out 18 tons of "Polvere" a day at a central mill near Scalo Station.

AFHQ PETROLEUM SECTION
ROME AREA ALLIED COMMAND
Tel:- ROME 478476
PET 30/8/3
1 Oct. 44

SUBJECT: Rehabilitation of Petroleum Installations in N.W. Italy.

HQ. A.C.C. Economics Section. (3)

1. The feeding and rehabilitation of any part of liberated territory is dependant on the supply of petroleum products which, therefore, necessarily have a very high priority in provision.

2. In those parts of Italy so far liberated, the paramount needs of the Allied Forces have made it essential for military engineers and other units to repair and rehabilitate rapidly petroleum facilities as well as ports, railways, etc. It appears possible that the same military necessity may not arise in Northwest Italy and that, therefore, it may fall to the Italian civilian organizations to rehabilitate to the extent necessary the ocean installations in Liguria and important inland installations at such points as Milan, Turin, etc., before any supply of petroleum products to the large civilian population of Regions X and XI can be assured.

3. C.I.P., the organization which has been set up by the Allies for the coordination of petroleum activities in Italy, will have at its disposition sufficient engineers, fitters, and the like to carry out this work, but it will be essential that C.I.P. be given priority in certain directions and effective assistance by the Allied Authorities in control. At the same time, it is important that those authorities should realize that petroleum supplies and everything depending on them, can only be made available if certain facilities are rehabilitated early.

4. The following points are, therefore, brought to your attention with a request that the necessary steps may be taken to bring them to the notice of those who will be responsible on the ground.

(a) It will be necessary for a channel to a suitable wharf to be cleared of mines and wreckage so that tankers can be discharged. From information at present in possession of this office, it seems likely that the only ocean installations usable will be those at Vado Ligure, which port, however, may not be required for other civilian activities.

(b) In view of the known destruction of petroleum repair plant and tools, C.I.P. will require authority to recruit personnel such as drivers and welders and acquire material and tools such as trucks, welding apparatus, small temporary power plant, motor pumps, etc., from other civil owners in the area.

Declassified E.O. 12356 Section 3.3/NND No. 785019

have a very high priority in provision.

(c) Under existing AFHQ instructions, all petroleum installations and plant are held at the disposition of this Section. In the event of the occupation of Northwest Italy being purely civilian, this Section will delegate its powers to C.I.P. and this point should be understood so that petroleum equipment be not requisitioned for other purposes.

5. It is suggested that in order to ensure effective cooperation between officials of C.I.P. and the Allied Military Government, C.I.P. should now be put into touch with the Regional Commissioners designated of the Regions in question and their Staffs. If you agree, will you please intimate with whom and where C.I.P. should get into touch.

HEADQUARTERS ALLIED COMMISSION

INTER OFFICE MEMO.

10

REFERENCE : 093/PWU. 3 December 1944.
SUBJECT : Control of Building Materials.
TO : Vice-President, Economic Section.
FROM : P.W.& U. Sub-Commission.

1. I wish to present a proposal which has been discussed considerably in the Public Works and Utilities Sub-Commission and which I believe worthy of submission to a higher level at A.C. for transmission to the Italian Government.

2. This Sub-Commission is very much concerned with the excessive cost of construction projects and it has on numerous occasions returned proposed contracts to the Italian Government for review because of what appeared to be excessive costs.

3. One problem which seems to stand out, and which will play an exceedingly important role in the proposed Housing program, is the excessive cost of building construction materials, many of which have to be purchased in the Black Market. Reasons for the necessity of purchasing in the Black Market seem to be that normal channels of production and transport having failed, thus inviting Black Market operations and, as a consequence, making it necessary for a person wishing to rehabilitate his house to purchase materials where they were available and at such costs at which they were offered.

4. We believe that, unless some strong measures are taken to establish proper control over the manufacture and distribution of essential building materials, the prices will keep on sky-rocketing to such an extent as to have an inflationary effect because of the vastness of the undertakings to be executed. Conditions of this kind can only be remedied by drastic measures.

5. It is our recommendation that :

(a) all plants which are manufacturing construction materials be taken over by the Ministry of Industry and Commerce during the immediate rehabilitation period. This Ministry

Declassified E.O. 12356 Section 3.3/NND No. 785019

may already be operating some of these plants.

(b) dumps be established at all reconstruction centres, from which materials can be distributed by oxcart or other similar primitive transportation media.

(c) transportation of these materials from plants to the dumps be handled by the newly created Transportation Control Agency.

(d) materials be furnished to the owner of a building free of charge, but the actual cost to the Government of this material delivered to the construction site be credited towards the Government contribution, as provided under the Housing Act, and whatever adjustments, either up or down, that may be necessary, be made after the war.

(e) the method of allocation to a particular project should be worked out carefully by the Genio Civile which would, under the circumstances, control the materials once placed in a dump and control the quantities needed for the construction of a project, thus eliminating, as much as this may be possible, materials being wasted or being diverted to illegitimate channels.

6. While the above proposal may seem somewhat radical in its concept, it is believed that, under present conditions, it is a necessary procedure and we strongly believe that it will save the Italian people not only many millions of lire, but actually many billions of lire, something worth thinking about.

7. As we are keenly interested in seeing something done along these lines, I shall appreciate it, if you will please have this matter given the most serious early consideration as a matter of A.C. policy and to arrange for the proper notification of the Italian Government.

L.A. JENNY
Lt-Colonel, C.E.,
Director.

HEADQUARTERS ALLIED COMMISSION
APO 394
Public Works and Utilities Sub-Commission

RWB/rlv

078/4/PWU

9 December 1944

Subject: Bitumen for Civil Highways.

To : Economic Section.

1. In Italian Government Territory there are 6,000 Kilometers of highways, Provincial and Communal roads and important City streets with bituminous surface which are of civil importance only.

2. Since all bitumen is, and has been, under the direct control of Military Units and available only to roads of Military Priority, proper maintenance of this considerable mileage of civil roads has been impossible. This condition has now become so critical that unless bitumen is made available shortly, extensive sections of road will be beyond repair with complete reconstruction at prohibitive cost being the inevitable result.

3. With the cooperation of the Ministry of Public Works an estimate of bitumen requirements for a six month period has been prepared, a copy of which is attached. Based on our knowledge of the roads in question, the requirements as shown are both reasonable and necessary and are the minimum quantities needed if reconstruction of great magnitude is to be avoided.

L.A.JENNY
Lt.Col. C.E.
Director.

Ref: AC/5000/6/Commerce

18 November 1944

SUBJECT: Controlled and Restricted non-subsistence materials.

TO : Ministry of Industry, Commerce and Labour.

1. As a result of recommendations made by the Engineering Materials Committee and the Miscellaneous Purposes Committee of AFLRS, the list of Controlled Materials has been shortened. In addition certain materials have been put on the "Restricted" list.

2. In order to make quite clear the difference between Controlled and Restricted materials, the official definitions are repeated below:

CONTROLLED items are those the allocation of which as between all consumers, military and civilian, must be made by the appropriate Local Resources Board, or by a duly authorised committee of that Board.

RESTRICTED items are those which can only be procured by the Allied and Co-belligerent forces after the essential needs of the Civilian population have been met. Available balances, within its territory, will be declared and allocated by the Board. Schedules of these items will be issued from time to time by this HQ.

3. For your guidance, a complete list of all Controlled and Restricted materials, as at 15 November 1944, is enclosed.

4. From this list it will be noted that certain articles will have to be deleted from Class I of the list sent out with your circular No. 10 of 21 October 1944. On the other hand, your Ministry may wish to retain control of some of these deleted items, in which case it would be necessary to transfer them to Para 6, of the attached list. Please advise this Sub-Commission on this point, as soon as possible.

Declassified E.O. 12356 Section 3.3/NND No. 785019

1. As a result of recommendations made by the Engineering Materials Committee and the Miscellaneous Purposes Committee of AFLRS, the list of Controlled Materials has been shortened. In addition certain materials have been put on the "Restricted" list.

2. In order to make quite clear the difference between Controlled and Restricted materials, the official definitions are repeated below:

> CONTROLLED items are those the allocation of which as between all consumers, military and civilian, must be made by the appropriate Local Resources Board, or by a duly authorised committee of that Board.
>
> RESTRICTED items are those which can only be procured by the Allied and Co-belligerent forces after the essential needs of the Civilian population have been met. Available balances, within its territory, will be declared and allocated by the Board. Schedules of these items will be issued from time to time by this HQ.

3. For your guidance, a complete list of all Controlled and Restricted materials, as at 15 November 1944, is enclosed.

4. From this list it will be noted that certain articles will have to be deleted from Class 'I' of the list sent out with your circular No. 10 of 21 October 1944. On the other hand, your Ministry may wish to retain control of some of these deleted items, in which case it would be necessary to transfer them to Para 6. of the attached list. Please advise this Sub-Commission on this point, as soon as possible.

5. The reason why CEMENT does not appear on this new list as a Controlled item is that the Military Authorities, namely the Director of Works and Chief Engineer of Peninsular Base Section control factories whose production is sufficient for Military needs. Thus should stocks be found or factories, not under control of Military Authorities, become productive, such availability can be applied to civilian requirements. It should be understood, also, that demands for civilian requirements are being met, as far as possible, from the production of the factories under military control. If it is the wish of your Ministry,

5712

./.

Declassified E.O. 12356 Section 3.3/NND No. 785019

therefore, to control cement, which is not already under military contrd, it is suggested that "CEMENT and CEMENT FACTORIES not already under Military Control" should be placed in Para 6. of the attached list.

6. With regard to the Restricted Materials, these with the exception of matches have been placed on the Restricted List at the request of Industry Sub-Commission of this HQ. and the necessary instructions should be issued by your Ministry to ensure the "blocking" of all stocks and the reporting of availability. All releases of such materials must receive endorsement of approval from Industry Sub-Commission, before they become valid. With regard to matches, these are the subject of control by the State Monopoly and the appropriate Ministry. It is evident that Restricted Materials will have to form a separate category and it is recommended that this class should be referred to as RESTRICTED items.

7. As far as coal is concerned confirming the interview between Major Wood and Prof. Gerbella on the 4 November 1944, this material forms the subject of a special control. Detailed instructions concerning the control of this material will reach your office direct from Industry Sub-Commission, Coal Division.

8. With reference to Newsprint and Printing Paper we refer to our letter AC/5066/Commerce, 9 November 1944 and the instructions contained therein.

9. All petroleum products (prodotti petroliferi e derivati) as well as Methane Gas are subject to special control and this letter does not, in any way, alter the provisions now in force.

for
A. G. ANTOLINI
Acting Deputy Chief of Staff,
Economic Section.

SUBJECT: P.O.L.

TO : The Regional Commissioner - Region
For the attention of the Regional
Transportation Officer.

1. Petrol Section AFHQ have informed us that instances are still occurring where military vehicles being used for civilian work and for which a haulage rate is charged are drawing petrol from military petrol points.

2. It is definitely agreed that where W.D. vehicles are used for civilian work and are operated on a Truck Pool basis where road haulage rates are charged then P.O.L. must be obtained through C.I.P. on payment.

3. Petrol Section informs us that it is very difficult for personnel at military petrol points to be able to distinguish what vehicles come under the category referred to in para 2 above and in order to tie this matter up they have requested us to mark very clearly all such vehicles.

4. Will you therefore please see that instructions are issued that all W.D. vehicles operating on a commercial basis are marked in the following manner:

2 ins letters as follows:

WC W.D. C&S.

and these markings should be placed [illegible]
cap as is practic[illegible]

SUBJECT : POL Supplies

TO : Public Works and Utilities

1. Region VIII R/VIII/15.9 of 25 November 1944 copy to you refers.

2. The letter referred to in para 1 was not enclosed ,so we do not know exactly what they mean.

3. There is no allocation for contractors working on Military account whose requirements are assessed by and issued under authority of Regional Engineer. They do not count against civilian supplies.

4. Other contractors employed by Regional Engineers obtain supplies from local Licensing Authority and it is assumed that, in practice, the Engineer has made arrangement for them to be included in the Regional Bid and will receive a corresponding allocation from the Regional Supply or Transport Office.

Concur. WM

5. It is in any case entirely a local matter to be settled in the Regional organisation. Coupons for issuance to Military Contractors are also issued in Bulk by private arrangement between the licensing Office and the Regional Engineer based on his estimated needs.

5708

6. Provided POL Instruction N°2 is complied with there should be no difficulties.

7. It is believed that your Engineers are now fully conversant with the system and have been issued with the necessary rubber stamps for marking coupons for CIP accounting purposes.

1. Ref AMG Eighth Army signal R/1924 dated 8 Nov 44, enquiries were made of Major Boucher, LO No. 1 District, who said that District had no bricks available for AMG Eighth Army.

2. As the bricks were not obtainable from Eighth Army or No. 1 District, I phoned Public Works and Utilities Sub-Commission 10 Nov 44 and asked them to take action on the signal. Capt. Sheppard thought that the bricks could be found in Abruzzi Region.

3. I spoke to Lt. Col. Thompson 23 Nov 44, and he stated that Lt. Col. Latimer, Public Works Officer, Abruzzi Region, had investigated the request, and was of the opinion that the bricks could not be spared as there was a road open to San Marino from the South. I pointed out that San Marino supply route was from Rimini, and asked Lt. Col. Thompson to answer AMG Eighth Army's signal direct, copy to this Section. I have since spoken to Lt. Fender, AMG Eighth Army, who is investigating the road from the South. The AAI Road Classification map only shows the Rimini - San Marino Road.

4. By agreement with Lt. Col. Thompson, I have asked Major Lee, Regional Engineer, Toscana Region, 24 Nov 44 to find out whether the necessary number of bricks are available for this purpose in his Region.

Dear Sirs:

Allotment of Calcium Carbide

As a result of our request contained in our letter of the 29th September 1944, we have been assigned ten quintals of calcium carbide of the fifteen quintals we had originally applied for.

We have already, to a considerable extent, dug into this supply in the process of carrying out the work which was entrusted to us, and we consequently find it necessary that another supply of calcium carbide be allotted to us to cover our needs.

We should be very much obliged, therefore, if you would kindly instruct the Commerce Sub-Commission to supply us with a further five quintals of the above commodity.

Trusting that our request will be favourably considered,

We remain,
Yours faithfully,

SOCIETÀ GENERALE IMMOBILIARE
DI LAVORI DI UTILITÀ PUBBLICA ED AGRICOLA

Ref. ACC/5067/Commerce/POL. 25 — 26 October 1944

SUBJECT : POL for Contractors on Military Projects.

TO : Public Works Utilities Sub-Commission
(Attn Col. Thompson).

1. POL instruction N. 2 of 10 August 1944 refers.

2. Instead of the special coupons referred to in Paragraphs 7 & 8 it has been decided to use the standard one overstamped MILITARY .

3. Attached are sample rubber stamps for use on the benzina and olio coupons respectively and a marked coupon card. It is requested that your will arrange for each of your Regional Engineers, who has this category of contractor working for him, to be provided with these stamps and to use themon all coupons issued to "Military Contractors".

4. The stamping should be done by the Engineers on coupons obtained in bulk from the local licensing authority and not by the licensing authority itself. It is assured you have already issued such instructions as will ensure that supplies under POL instruction Nº 2 are only issued to Contractors actually employed on certified military projects.

5. A copy of POL instruction Nº 2 is attached for easy reference.

15 August 1944

Ref. ACC/5087/Com.L

Subject: POL Supplies for Contractors Employed on Military Projects.
To : Regional Engineer Officers.

1. Ref. POL Instruction No 2 10 August 1944

2. It will no longer be necessary for Supply Officers to include in their monthly bids POL for
a) Contractors employed directly by the Military.
b) Contractors employed by ACC/AMG on certified Military Projects, as, although both will draw coupons and supplies from civilian sources the POL will be automatically replaced.

3. The Military and Public Works and Utilities Engineers certified schedules will be only bid required but these MUST reach this Headquarters and Pet. Sec. by the 10th of the month previous to that for which they are required.

4. To enable an advance estimate of the requirements for a) and b) above Supply Officer will render a return by Provinces to reach HQ (direct copy to Pet. Sec.) by 30 August 1944 of the total of all quantities actually supplied to a) and b) (separately) during July, together with total included for this purpose in their July bid.

5. The return should include the number of vhicles by types.

6. Pending a review of the requirements the local licensing authority will be instructed that coupons will only be issued from minimum quantities fully substantiated by certified request from Military Units or ACC/AMG Engineers.
