Subject: Civil Road Organization

Directorate of Works,
Leaving for Air Station,
C. 10.2.

3228 /DEM.

13 Feb 44.

CE No. 2 District (6)
CE No. 5 District (6)

Further to my 3222/DEM of 10 Jan addressed to RQW, copy to you, and to implement para. 8 of Air Station's letter 78/2 of 20 Jan, the following are the details of the procedure to be adopted in order to make the fullest possible use of the Civil Road Organization as it develops.

1. The Civil Organization under AOC control will be set up as shown in Appendix "A" hereto, to deal with all military routes in completed Italy. This Organization will operate in conjunction with the Military Engineer Organization which present form is represented typographically in Appendix "B" attached. Both these agencies supersede the Agencies attached to my 3222/DEM of 10 Jan, and both will of necessity have to be altered from time to time to meet changing circumstances. These alterations will be notified to you as they occur.

2. The Works to be carried out will be divided into two categories - "A" and "B".

Category "A" will comprise the maintenance, repair and construction work necessary to keep such of the main arteries of the country as are necessary for military traffic, continuously open. The details of these routes will be laid down from time to time by HQ Air Station. Those with which I am at present concerned are shown on the attached Appendix "B".

Category "B" routes will be additional routes required by Districts and Areas for their internal communications, and the details of these will, naturally, be the responsibility of the Commanders concerned.

3. The work required on Category "A" routes will be handled by CE's of Districts on the representation of the Director of Public Works and Civilian Sub-Organization, AOC of which one will be appointed to sit at the HQ of each CE.

4. On receipt of instructions from CE's, the AOC representatives will pass these on to their corresponding representatives to other with instructions to co-operate directly with the CE's in those areas the work is done.

5. The AOC/DEM do not, at the present, dispose of sufficient officers to deal with Category "B" work but it is intended that they will eventually undertake this responsibility. At the present, therefore, CE's should be instructed to deal direct with the local Provincial and Individual Engineers. These Engineers will be instructed by AOC that they are to carry out any orders which may be given by CE. If these orders are not carried out, on any other day, they will be reported to the CE.

1. The Civil Organization under AOC control will be set up as shown in Appendix "A" routes, to deal with all military work in occupied Italy. This organization will operate in conjunction with the Military Engineer Organization whose present form is recommended principally at its address "B" stations. Both these Appendices supersede the Appendixes attached to my 3223/WH of 10 Jan, and both will be immediately have to be altered from time to time to meet changing conditions. These alterations will be notified to you as they occur.

2. The Work to be carried out will be divided into two categories - "A" and "B".

Data, say "A" will comprise the administrative, civil and construction work necessary to keep such of the main arteries of the country as have necessity for military traffic, continuously open. The details of these routes will be laid down from time to time by Appendix "A" and "B". Those with which you are at present concerned are shown in the attached Appendix "B".

Data, say "B" routes will be additional routes recommended by Districts and Areas for their internal communications, and the details of these will, naturally, be the responsibility of the Commanders concerned.

3. The work required on Data say "A" routes will be handled by OE's of Districts and the representatives of the Director of Public Works and Utilities Sub-Commission, AOC in liaison will be appointed to act at the HQ of each OE.

4. On receipt of instructions from OE's, the AOC representatives will pass on to their expertly trained representatives to other with instructions to co-operate directly with the OE's in those areas the work may lie.

5. The AOC/AE is not, at the moment, disposed of sufficient officers to deal with Category "B" work but it is intended that they will eventually undertake this responsibility. At the moment, therefore, OE's should be instructed to deal directly with the local Engineer and Technical Divisions. These Divisions will be instructed by AOC that they are to carry out any orders which may be given by OE's. If these orders are not carried out, or any question as to priority should arise, the matter should be referred back to you when it can then be settled at our level with the representatives of the AOC who are in the HQ.

6. The AOC have undertaken full responsibility for planning all road work, and for ensuring that such labour, transport, plant and materials as the Italian Road Organisation may possess is made available. It will, however, undoubtedly be necessary for the HQ to provide considerable assistance. Instructions as to be given, records of such assistance have already been issued to you and you are now required to send to us for submission to the AOC on sheet of the centrally revised you submit to the EA & A. in connection with Technical Instruction No. 13. The Military stores, etc. required by the Civil for maintenance for approved works, will be provided by OE's and contained in the normal return.

282

Sheet 4/.....

7. It is essential that the maximum possible use be made of the Civil Construction Act if it is not desirable that instructions to it are made through the AEC or AEC representatives where and when they are available so that they are eventually too, and much of the road construction and maintenance of which you and your staff are responsible. Moreover, it will follow the further division of such functions of the responsibility to his Commander for the maintenance of essential military routes in his area.
