SUBJECT: BITUMEN DISTILLATION TEST.

TO : PUBLIC WORKS & UTILITIES SUB-COMMISSION - HDQ. ALLIED COMMISSION

Attention: - N.W.Hyland - Major S.R.

1. Attached is a distillation test for bitumen - recently received by Genio Civile State Roads of this region.

2. The bitumen as received is liquid - evidently a "cut-back asphalt" - and the test indicates that it was cut back with a low-volatile oil - probably a flux oil - instead of with kerosene. Therefore when placed on the road it will not be satisfactory because it will remain a liquid.

3. The contractors are not familiar with the handling of this type of bitumen and would like to have some instructions as to how to use it. Knowing that you have had a wide experience in the use of asphalt I am asking your assistance in this matter - and would appreciate any help you can give me.

SUBJECT: POL for MILITARY PRIORITY PROJECTS IN PIEMONTE

TO : HQ ALLIED COMMISSION - Att.: P.W.& U. SUB-COMMISSION

1. Attention is invited to our letter PR/ENG/13.52 dated 14 Sept.1945, subject "POL Distribution" and addressed to Regional Commerce Officer, this region, copy of which is enclosed.

2. The plan outlined in the letter referred to in paragraph one, was adopted in view of the imminent closing of this region and the policy of turning over to Italian civilian organizations as many AMG functions as practicable, with overall control resting in the hands of the military organization remaining in the area.

3. It will be noted that the plan (under section headed "Distribution of POL") calls for the resident military organization (7 AGRA) to issue "military coupons" whereby contractors on military priority projects will be able to buy POL from CIP. The object, as heretofore, is to make necessary fuel available for purchase thru civilian sources, but to prevent such purchases and consumption from being charged against the civilian allotment made to Piemonte. The plan was presented verbally to DCRE (269 Works Section) and a copy of the enclosed letter with its memorandum forwarded.

4. As of 4 Oct., this Division has been informed by the resident military engineer (DCRE, CO 269 Works Section) that he has not the facilities necessary to control and supervise POL issues for military priority jobs and also that the POL section of 7 AGRA questions the propriety of its issuing coupons to civilian contractors engaged in such projects. The DCRE proposes to give the Public Works Section of UPIC (referred to as ULP in the plan) a list of military priority projects with instructions that these shall receive first priority in the distribution of POL.

Declassified E.O. 12356 Section 3.3/NND No. 785019

1. Attention is invited to our letter PR/ENG/13.52 dated 14 Sept.1945, subject "POL Distribution" and addressed to Regional Commerce Officer, this region, copy of which is enclosed.

2. The plan outlined in the letter referred to in paragraph one, was adopted in view of the imminent closing of this region and the policy of turning over to Italian civilian organizations as many AMG functions as practicable, with overall control resting in the hands of the military organization remaining in the area.

3. It will be noted that the plan (under section headed "Distribution of POL") calls for the resident military organization (7 AGRA) to issue "military coupons" whereby contractors on military priority projects will be able to buy POL from CIP. The object, as heretofore, is to make necessary fuel available for purchase thru civilian sources, but to prevent such purchases and consumption from being charged against the civilian allotment made to Piemonte. The plan was presented verbally to DCRE (269 Works Section) and a copy of the enclosed letter with its memorandum forwarded.

4. As of 4 Oct., this Division has been informed by the resident military engineer (DCRE, CO 269 Works Section) that he has not the facilities necessary to control and supervise POL issues for military priority jobs and also that the POL section of 7 AGRA questions the priority of its issuing coupons to civilian contractors engaged in such projects. The DCRE proposes to give the Public Works Section of UPIC (referred to as ULP in the plan) a list of military priority projects with instructions that these shall receive first priority in the distribution of POL.

3274

5. The undersigned points out that such procedure will result in all fuel issues being charged against the civilian allotment with the effect of reducing drastically the amount of POL available for Public Works. It is pointed out that this Division received from you and distributed in August and September, "military coupons authorizing the purchase by contractors of some 110.000 liters of gasoline and 90.000 liters of gasoil. This represents a large percentage of the total made available to P.W.& U. in this region.

6. It is requested that, if any action is desired by your

./.

3272

M E M O R A N D U M

Work of Fuel Branch, has been taken over by UPIC, Torino, where there will be a Section known as SERVIZIO LAVORI PUBBLICI E PUBBLICHE UTILITA' PIEMONTE, hereafter referred to as ULP.

ULP will supply POL as heretofore done by Fuel Branch, to:

a) Genio Civile for organizational use.

b) Contractors engaged on projects of the same type as those approved up to now by the technical sections of the PW&U Division.

c) Communication organizations such as telephone (STIPEL, STET) etc.

d) Electricity producing and line maintenance concerns

e) Gas producing and maintenance concerns.

Applications for POL, for Highway, Bridge or Public Works contractors (except on Military projects) will be accepted by ULP only if endorsed by Genio Civile. Other Public Utilities (c,d,e above) will apply direct to ULP. Each application will of course be analyzed, and requests checked and cut down to the minimum quantities needed for the work. Totals so arrived at will be utilized either to make up a PET 5 for the second month to come, or to prepare a distibution for the immediately ensuing month.

In other words, work of ULP will be exactly the same as, up to now, that of the Fuel Branch.

DISTRIBUTION OF POL

Military coupons booklets will hereafter be delivered to applicants by 7 AGRA. Before the end of each month the Genio Civile will send to 7 AGRA a prospect giving name and adress of applicants, short particulars (number, areas, etc.) of all military projects for which POL is wanted. On these data AGRA may base distribution of booklets. Also before the end of each month AGRA will be supplied by Genio Civile with the estimated wants of POL for the second month to come, on which estimate AGRA may base her request for booklets to headquarters.

3271

Declassified E.O. 12356 Section 3.3/NND No. 785019

c) Communication organizations such as telephone (STIPEL, STET) etc.

d) Electricity producing and line maintenance concerns

e) Gas producing and maintenance concerns.

Applications for POL, for Highway, Bridge or Public Works contractors (except on Military projects) will be accepted by ULP only if endorsed by Genio Civile. Other Public Utilities (c,d,e above) will apply direct to ULP. Each application will of course be analyzed, and requests checked and cut down to the minimum quantities needed for the work. Totals so arrived at will be utilized either to make up a PET 6 for the second month to come, or to prepare a distibution for the immediately ensuing month.

In other words, work of ULP will be exactly the same as, up to now, that of the Fuel Branch.

DISTRIBUTION OF POL

Military coupons booklets will hereafter be delivered to applicants by 7 AGRA. Before the end of each month the Genio Civile will send to 7 AGRA a prospect giving name and adress of applicants, short particulars (number, areas, etc.) of all military projects for which POL is wanted. On these data AGRA may base distribution of booklets. Also before the end of each month AGRA will be supplied by Genio Civile with the estimated wants of POL for the second month to come, on which estimate AGRA may base her request for booklets to headquarters. 9271

Authorization to draw for civil contractors in Turin province will be issued and handed to applicants by ULP.

Authorization to draw for civil contractors in other provinces will be issued and handed to applicants by each provincial UPIC. Before the end of each month, each Provincial UPIC will receive from ULP a list of applicants and allotment to each.

ORGANIZATION OF ULP

The help in the work of control, given up to now to the Fuel Branch, by the engineers of the various technical sections of P.W.& U.Division, will be missed by ULP. It is believed that ULP, to properly carry out the work, will need at least:

./.

Declassified E.O. 12356 Section 3.3/NND No. 785019

One section chief

One typist

Probably one accountant

Probably one hand man

Also: one small car or small truck, one typewriter and one adding machine.

Beside, lat but not least, ULP will require rooms (2 of them) where her work may be properly carried out. Probably suitable rooms will be obtained in the next few days. For the time being it is hoped the ULP will be allowed to remain in Corso Oporto 20.

FINANCIAL to cover its expenses UPIC has only 60% (40% going to Italian Government) of the money cashed as taxes on circulation permits, on fuel coupons, and on our authorization to draw POL. No expenses for our Fuel Branch have been paid by UPIC, and UPIC has now no money to face the expenses of ULP section.

A rough estimate of the probable monthly amount of the expenses of the section gives somewhere near 75.000 Lire; or about L.0,75 for each unit of POL distributed in Turin province in the month of August. It is suggested that, at least until the question will receive consideration by the Italian Government, the tax on authorization to draw POL issued by ULP be raised from 1 lira to 2 lire.

The above, however, is a responsability of UPIC and is presented as a matter requiring consideration.

Signed: Carlo ROSSI del Barbazzale

Subject: Bitumen - Naples to Milan.

To : Mr.F.O.Griffith.

1. Reference is made to attached letter and your letter of 18 September on the subject of irregularities.

2. Under paragraph 1(a) of your letter you state that the transfer of bitumen was made with the knowledge of " This " Headquarters, and that Mr.Townsend could not turn over American asphalt and further that contractors agreed to supply asphalt from " Italian " sources.

3. Since the transaction has caused considerable unfavorable comment we need further clarification of the incident, which was handled without the knowledge of this office and without adequate authority. Please give us facts to cover the following points:

(a). Copies of papers concerning and covering your authority for the movement.

(b). Source of supply of bitumen; with names of persons and places.

(c). Markings on containers (that is trade name on drums) to indicate Italian or American manufacture.

(d). Give names and places where delivered to In Milan with copy of delivery ticket there.

Subject: American bitumen

To : Regional Engineer - Turin

8 Sept 45

I have been informed that American bitumen, arriving at Naples from the United States, is supplied by AMG to the firm GOLA, contractor for repair work on the Autostrada from Milan to Ponte Ticino.

It would be greatly appreciated if you would consider, with your well known benevolence, the possibility of allotting American bitumen also for the various projects, contracted or to be contracted, necessary to the restoration of the surface of the road system in Piemonte. It is to be noted, in fact, that without such allotments, these projects cannot be completed or contracted.

It would be further appreciated if the delivery of the 180 tons of bitumen lying near Trento could be expedited, considering the possibility of making its transportation by means of AMG trucks instead of railroad, since our efforts for obtaining rail transport has had no results as yet.

Thanks in advance

31 August 1945

SUBJECT : P.OL. Coupons for Military Works.

TO : HQ. Allied Commission
att. PW&U Sub-Commission

1. Reference is made to first endorsement by this HQ. to letter from HQAC, PW&U Sub/C file number 078/4/PWU dated 2 August 1945. At the time this endorsement was written, plans called for cessation of operations on 1 September 1945.

2. The POL military coupons forwarded with the letter referred to were used for current military projects as follows :

	Rcd	Issued	On hand
Gasoline	Ltr. 60000	21850	38150
Gasoil	Ltr. 30000	30000	0

3. It now appears that works will be continued until 15 September. Accordingly there will be further demands for "military" POL. It is estimated that these requirements will amount to 50000 liters gasoline and 60000 liters gasoil. This Region therefore will require coupons as below :

	Requirements	On hand	Needed
Gasoline	Ltr. 50000	38150	11,850
Gasoil	Ltr. 60000	0	60,000

4. It is requested that necessary steps be taken to supply these coupons at the earliest moment since the regular civilian stocks made available to PW&U for "non military" projects are not sufficient to cover also the "military" works.

3. It now appears that works will be continued until 15 September. Accordingly there will be further demands for "military" POL. It is estimated that these requirements will amount to 50000 liters gasoline and 60000 liters gasoil. This Region therefore will require coupons as below :

	Requirements	On hand	Needed
Gasoline	Ltr. 50000	38150	11850
Gasoil	Ltr. 60000	0	60000

4. It is requested that necessary steps be taken to supply these coupons at the earliest moment since the regular civilian stocks made available to PW&U for "non military" projects are not sufficient to cover also the "military" works.

For the Regional Commissioner.

SUBJECT: Report on Todt Yard

TO : Regional Engineer, Piemonte Region, AMG

The ex-Todt Organization supply dump was placed under the supervision and control of the PW&U Division, Piemonte Region, AMG, by letter of Regional Commerce Officer.

Upon assuming control, this Division immediately placed a warehouseman in charge and provided him with living quarters on the grounds. The Genio Civile was instructed to provide the necessary number of laborers and guards. This action was taken.

As soon as possible the warehouseman and his assistants took a physical inventory of the dump. Due to its disordered state following the withdrawal of the Germans this inventory was not 100% accurate but included all except a very few miscellaneous items scattered throughout the yard. The inventory is attached as appendix "A".

Shortly after the dump was placed under PW&U supervision, the 269 Works Section (operating under 151 Sub-Area) requested use of the carpenter shop with its mechanized equipment. Accordingly an area surrounding this shop was fenced off and placed under that unit's supervision.

The yard was taken over in order to make available materials and equipment needed for public works. Attached as appendix "B" is a schedule showing all withdrawals from the dump. Each withdrawal is covered by a receipt held by this office.

It is planned to turn over the yard to DCRE (269 Works Section, 7 AGRA) on approximately 25 August. When this unit leaves the area it will turn over the yard to the Genio Militare, Italian Army, who operated it prior to German occupation.

JOINTER'S FACTORY

Inventory of machinery in jointer's factory of ex TOBT Warehouses

Nr 1 band saw with autonomous motor
" 1 planing - machine " " the motor has been removed by Germans
" 1 planer with autonomous motor
" 1 moulder " " "
" 1 emery - wheel for edging the knives of planers, with wotonomous motor - in fair conditions
" 1 Mortiser with autonomous motor - the motor has been removed by Germans
" 1 Common grind-machine with wutonomous motor - fair conditions
" 1 band - saw with rolling carriage for cutting trunks - autonomous motor

" 7 complete work - benches

separate inventory for carpenter-shop consigned
on 4 June to 259 Works (R)

SMITHY

Inventory of machinery in the smithy of ex TOBT Warehouse

Nr 1 Forge with autonomous motor in working order-new
" 1 File-drivers " " not in working order -the motor h been removed by Germans
" 3 Anvil in fair conditions
" 1 Tube-vice
" 1 small field forge in fai conditions
" 1 double emery wheel with autonomous motor - The motor has beer removed by German
" 1 Work-bench, with two vigas and a small anvil
" 30 Drill-bars for air compressed hammer
" 1 Mould for bending iron

Declassified E.O. 12356 Section 3.3/NND No. 785019

MECHANICAL WORKSHOP

Inventory of machinery and equipment of the mechanical Workshop of ex Todt warehouse

Nr 1 Electric generator system- out of use- Made Ing. Creglia Piacenza
" 1 Parallel lathe F.P.U. Majestic bench long m.3 with autonomous motor - new
" 1 Double emery wheel - machine - with autonomous motor (fair)
" 1 Screwing machine with autonomous motor and automatic water pump (fair)
" 1 Double polisher with autonomous motor in goor conditions but not in service
" 1 Small lathe- some pieces are missing
" 1 Moulder for cartwright
" 1 Castank for autogenous valding (out for use)
" 1 FuRching shears Features: ths shears cut: up to 3 m/m
" "12 "
" "13 "
" "25 " (5m/m)
It punches iron
thicness 8 m/m
" 1 "Mingoni" tube - bender - spare pieces missing (fair)
" 1 Big punching - machine - in working order
" 1 Vulcanizer group out of use
" 1 Bender in working order
" 1 Big drilier - Mazzoni factories - three speeds gearing with autonomous motor - without belts
" 1 Acetylene Bottle
" 1 Origen bottle fot autogenous welding
" 1 Lever sheras with delating gearing (fair)
" 1 Iron - sewing machine - with autonomous motor and automatic pump
" 1 Tool-bench - with 2 vices - whose 1 out of use
" 1 Balance - loading capacity 5 ql. out of use
" 1 Coiling machine for motor induction coils - out of use
" 1 Uncomplete lathe - out of use
" 1 Uncomplete electric welding machine
" 1 Railroad tractor for waggons - State Railroads property

18 August 1945

SUBJECT : Ex-Todt Organization Supply Dump

TO : Hq. Allied Commission
(Att. P.W.&.U. Sub-Commission)

1. Enclosed is report on the ex-Todt Organization Engineer Supply Dump in Turin.

2. In view of the fact that this headquarters will cease operations in the very near future, it has been planned to transfer control of the yard and its contents to the 269 Works Section (7 AGRA) which, as the military unit in occupation, has need for such facilities. This section will operate the yard through the 18 Italian Engineer Company.

3. Another ex-Todt Dump (also formerly Genio Militare) located at Candiolo, has been blocked by this headquarters but no material whatsoever has been withdrawn. It is proposed to release this dump from block and to inform 269 Works of such action. That unit thereupon may take such steps as appear appropriate or allow the installation to revert to the Italian Army (Genio Militare).

4. The above outlined plan will be put into effect about September 1st. if no objections are raised by your office.

PR/ENG/11.1 18 August 1945

SUBJECT: Report on Todt Yard

TO : Regional Engineer, Piemonte Region, AMG

The ex-Todt Organization supply dump was placed under the supervision and control of the PW&U Division, Piemonte Region, AMG, by letter of Regional Commerce Officer.

Upon assuming control, this Division immediately placed a warehouseman in charge and provided him with living quarters on the grounds. The Genio Civile was instructed to provide the necessary number of laborers and guards. This action was taken.

As soon as possible the warehouseman and his assistants took a physical inventory of the dump. Due to its disordered state following the withdrawal of the Germans this inventory was not 100% accurate but included all except a very few miscellaneous items scattered throughout the yard. The inventory is attached as appendix "A".

Shortly after the dump was placed under PW&U supervision, the 269 Works Section (operating under 151 Sub-Area) requested use of the carpenter shop with its mechanized equipment. Accordingly an area surrounding this shop was fenced off and placed under that unit's supervision.

The yard was taken over in order to make available materials and equipment needed for public works. Attached as appendix "B" is a schedule showing all withdrawals from the dump. Each withdrawal is covered by a receipt held by this office.

It is planned to turn over the yard to DCRE (269 Works Section, 7 AGRA) on approximately 25 August. When this unit leaves the area it will turn over the yard to the Genio Militare, Italian Army, who operated it prior to German occupation.

1st. Ind.

HQ PIEMONTE REGION AMG, APO 394, U.S. ARMY, 11 AUGUST 1945

TO : Hq. No 2 Dist. thru 269 Works Sec. RE

1. Noted, and Requests will be routed thru the Works Section as outlined in Para 1 of basic letter. The letter you refer to was sent direct since it was hoped that extra bitumen could be obtained before this office closes up on ar about September 1st.

2. As regards Para 2 while it is true from your standpoint that only AFHQ priority roads are of interest, our directive states that all roads are the concern of AMG and AC. Therefore while we place military priority roads on the top of the list it is also essential that the other state and priority secondary roads be put in as good shape as possible.

3. All bitumen released to this office from military stocks are used on the military priority roads. Upon entry into the area small amounts of tar were located in various places. These have been assembled at a a plant and road material is being manufactured. This is used on the important secondary state roads not AFHQ priority as for instance the road to the Aosta valley and so into France. Since members of British troops are in the Aosta Valley the conditions of this Highway should be of interest to you.

4. At the time of the surrender in May many contractors had their own supplies of road materials of which no records exist. In order to bring these materials out of hiding contracts are being let on roads with the contractor supplying his own material.

5. As regards our estimate for bitumen for priority routes it still stands as originally submitted.

C. R. Birchett

Date: 9 Aug 45.

Regional Engineer,
A.C. PIEMONTE Region.

Reference your PR/ENG/10.2 dated 1 Aug.

1. Your requests for bitumen or tar should be sent to 269 Works Sec RE in accordance with the instructions issued in my CE/101 dated 14 Jul.

2. It has been noticed that bitumen or tar is being used to repair roads which are of no interest to the Military while priority routes are not receiving sufficient maintenance. All your existing resources, together with anything which I can get for you, should be concentrated in the first place on repairing and maintaining the priority routes, details of which have been given to you.

3. Supples of bitumen can only be made available at present for the repair and maintenance of priority routes. Your request for bitumen should therefore be revised to take up for this only.

/s/ Lt. Col., RE,
For Brigadier,
Chief Engineer.
