SUBJECT : Unemployment project Imbonimento Ridotto *MAPONNA.*

FILE NO : RXIV/PXU/Gen.C1

1. The attached project for the building of a new market for Chioggia is strongly recommended for the following reasons:
 - 1) The market will be built on marshy ground which will first have to be built up. This will be advantageous from both a health (malaria) and hygienic point of view.
 - 2) It will give 300 men work for a period of 30 days. (Chioggia has 2,000 unemployed).
 - 3) The present market is very, very small and the proposed new one will be of allround benefit to the population.
2. Any help you can give would be very much appreciated.

SUBJECT: Repairs, Basilica S. Marco, Venice.

TO : Provincial Commissioner, Venezia.

1. Capt Anthoven has sent us a copy of his detailed report and recommendation to you regarding the structural faults discovered in the Basilica of San Marco. In view of the recent transfer of administrative and technical responsibility to the Direction General of Antiquities and Fine Arts, it is understood that Capt Anthoven's aim is to assist Superintendent Forlatti in advising you on this urgent problem.

2. Capt Anthoven, in his RAIL/MPA/Ven of 10 Dec, informs us the Regional Engineer would prefer not to "split" the projects, and says you would like our advice.

3. The division of work between the Genio Civile and the Superintendency of Monuments is an entirely normal procedure in Italian administration of national monuments. It has worked well in practice. Both parties are - or should be from past experience - thoroughly accustomed to such division, the Genio Civile taking the more straightforward engineering work, and the Superintendency taking the portion that requires the more meticulous craftsmanship of skilled artisans and artists. The Subcommission would most strongly recommend acceptance of such procedure if it is felt appropriate by the Superintendency.

4. In view of the reported urgency of the work in the case of such world-wide importance as the Basilica of San Marco, this Subcommission would be fully in favor of the adoption of any reasonable procedure that will expedite the work. It is therefore strongly recommended that your approval be given to the proposed division of work.

GENIO CIVILE
Special Office of State Viability
Compartment of Venice

19th November 1945

File: 3973

To: A.M.G. - Venice

Subject: Highway N.47 - "Della Valsugana" Alignment at Cavallini

In the valley of the river Brenta upside Solagna village and exactly at the locality Cavallini, the highway N.47 "Della Valsugana" goes off from the river-line and runs up snaking through Ianari houses, and then going up and down again reaches S. Nazario town. From here it runs up to the locality of Fabbri whence following the river again, proceeds even to the plain towards Carpanè town.

Such highway section, extended between Cavallini and Fabbri localities to a length of Ms 3200, is running through broken ground and crossing gravelly dales that comes down from the mountains and that during the rain-season convey into the road in question a great bulk of water, stones and gravel. So that the viability is hindered or even stopped and the transit-safety is always exposed to unforeseen dangers.

Beside that, there are several slopes and the road in some points becomes so narrow that transit is made very uneasy and dangerous and sometimes even impossible.

In order to eliminate all these inconveniences and to avoid long stoppings of vehicles at the level-crossings of the railway line "Venice-Trento" situated at the opposite end of the section in question and exactly in Cavallini and Fabbri localities, the Genio Civile office of Vicenza in the year 1916, has studied the alignment of the above mentioned road-section termed afterwards "Cavallini alignment".

Then the relative project has been passed, when the A.A.S.S. to make it executive, has inserted it, with previous slight modification, into the lot of works for general reinstatement No.242 effecting the road-section between Bassano and Primolano.

So it was possible to do some expropriations and liquidations of propertise, and to start off the works for the construction of "Cavallini alignment" of which have been established and worked out the opposite ends.

Due to the fact that construction of the alignment was effecting the near rail-way and some works of art of the route Venice-Trent, some difficulties rose, during the course of the work, with the competent State Railway Works Section, as to regulations and engagements to be agreed in a proper meeting, in order to state discipline terms between the two Corporations. Such difficulties caused the discontinuance of the works of the alignment to such a point that works could just be started, when the other ones of the lot for general reinstatement of the whole highway-section have almost been ³⁵⁸⁵ completed?

So the Contractors of the works took the opportunity of asking new

./.

- 2 -

prices for the completion of Cavallini alignment. But the Administration could not agree with, on account of lack of available funds. And therefore the starting of the Cavallini alignment works were stopped and never undertaken again; and the highway section between the localities Cavallini and Pabbri is still topsy-turvy and requires a very difficult and expensive maintenance.

The works for the construction of Cavallini alignment has been of late pressed on many times by the Prefect of Vicenza and by the local Corporation and Authorities in order to relieve local unemployment.

As a matter of fact the works in question could afford a mass of work to a hundred workers for a period of 12 months; but said works, on account of the position where they must be carried out, cannot be executed during winter-time; because, being the locality in the bottom of the valley exposed to Northern cold winds, the weather does not allow masonry constructions and the frost hinders or even stops the works for removal of earth, mostly effecting employment of man-power.

Works of such nature, that must be developed even organically, cannot be started off but in a season fit to their execution, that is in Spring.

Owing to the present instability of prices of transport, material and man-power as well as of ground expropriation (now cultivated for tobacco) this office is unable to state an, up to date estimate and a foreseen amount of Cavallini alignment; but we deem it approximately to be amounting to L.30.000.000 (thirty million).

Genio Civile
Ufficio Speciale Viabilità Statale

Copia

Venezia, 19 Novembre 1945

Al Comando Militare Alleato (A.M.G.)
VENEZIA

Prot. No. 3973

Oggetto: S.S. n°47 "della Valsugana" - Rettifica stradale detta dei "Cavallini".

Risalendo la valle del fiume Brenta a monte dell'abitato di Solagna e precisamente in località "Cavallini", la strada statale N.47 "della Valsugana" abbandona il corso del fiume e sale tortuosamente ed a mezza costa all'abitato di Lenati; per poi discendere e risalire a quello del comune di S. Nazario. Di qui scende alla località Fabbri, di dove prosegue, seguendo il fiume e pianeggiante, verso Carpanè.

Tale tratto di strada statale compreso fra le località Cavallini e Fabbri ha un'estesa di circa 3200 metri; e si presenta assai accidentato, sorpassando a raso dei valloni scendenti dalla montagna, che nei periodi delle piogge e di burrasca scaricano sulla strada stessa volumi non indifferenti di massi, materiali ghiaiosi ed acque.

Resta così intralciata o sospesa la viabilità, ed esposta ad imprevisti pericoli la sicurezza del transito. Si susseguono inoltre ripide salite e discese, con una sezione stradale così ristretta da rendere difficile e pericoloso, e talvolta impossibile l'incrocio degli automezzi.

Per eliminare tutti questi inconvenienti e per evitare le prolungate soste ai passaggi a livello della linea ferroviaria Venezia-Trento, posti alle estremità opposte del tratto di strada e precisamente in località Cavallini e Fabbri, nel 1916 l'Ufficio del Genio Civile di Vicenza studiò la rettifica del tratto di strada sopracitato, nota poi col nome di variante dei Cavallini. Il relativo progetto passò poi, con la istituzione della A.A.S.S. a questo Compartimento della Viabilità che al fine di renderlo esecutivo lo introdusse, con qualche leggera modifica, nel lotto dei lavori di sistemazione generale n.242, relativo al tratto di strada Bassano-Priolano della statale n.47. Poterono così essere espropriati e liquidati alcuni immobili, ed avere inizio i lavori di costruzione della variante dei Cavallini con la costituzione dei rilevati stradali alle opposte estremità della variante stessa.

Dato che tale costruzione veniva ad interessare la vicina sede ferroviaria ed alcune opere d'arte della linea Venezia-Trento, sorsero in corso di lavoro alcune difficoltà con la competente Sezione Lavori delle Ferrovie dello Stato, in merito alle norme ed obblighi da stabilirsi in apposita convocazione che disciplinasse i rapporti fra i due Enti statali.

Copy to Pgs
14/12/45 3583

41

078/VE/1

Tali difficoltà sospese e ritardarono i lavori della variante a tal punto che quando essi potevano essere iniziati, quelli riguardanti il lotto di sistemazione erano quasi a compimento. Così venne dato motivo all'Impresa assuntrice dei lavori di chiedere la stipulazione di nuovi prezzi per l'esecuzione delle opere della variante dei Cavallini. Nuovi prezzi che l'Amministrazione non poté concordare per mancata capienza dei fondi disponibili.

In tal modo l'iniziata rettifica stradale dei Cavallini rimase sospesa e mai più ripresa; ed il tratto di strada statale compreso fra le località "Cavallini" e "Fabbri" è tuttora a macadam, e di difficile e costosa manutenzione.

L'esecuzione dei lavori di costruzione della variante dei Cavallini è stata, recentemente, ripetute volte richiesta e sollecitata dalla Prefettura di Vicenza e da Enti ed Autorità del luogo, al fine di alleviare la disoccupazione locale. Trattasi effettivamente di un lavoro che per un periodo di dodici mesi può dare occupazione ad un centinaio circa di operai; ma non è lavoro che, data la località ove deve svolgersi, possa essere eseguito nella stagione invernale. La località, di fondo valle, esposta ai venti rigidi del nord, non consente certamente l'esecuzione di opere murarie e limiterebbe assai, per il gelo, anche i lavori dei movimenti di terra che sono quelli di più largo impiego della manovalanza. Lavori di tale natura, che devono essere anche organicamente sviluppati, non possono avere inizio che in una stagione favorevole alla loro esecuzione e precisamente in primavera.

Data l'attuale instabilità dei prezzi dei trasporti, dei materiali e della mano d'opera, nonché dei terreni da espropriare tutti coltivati a tabacco, questo Ufficio, mancando ora di una stima aggiornata, non è in grado di poter stabilire l'importo cui potrebbero salire i lavori di costruzione della variante dei Cavallini; importo che però difficilmente sarà inferiore ai trenta milioni di lire.

L'Ing. Capo Compartimento

(Venier Francesco)

C O P Y

MINISTERO DEI LAVORI PUBBLICI
Direzione Generale dei Servizi Tecnici

Pur riconoscendo la necessità e l'urgenza della variante detta "dei Cavallini" per la strada statale No. 47 della Valsugana, si conviene nell'inopportunità di avviarne subito l'esecuzione, data l'impossibilità, per ragioni climatiche, di dare un normale sviluppo ai lavori, anche limitati solo ai movimenti di terra.

Data l'urgenza dei lavori, converrà dare istruzioni all'ufficio per l'immediata compilazione del progetto, in modo da poterne avviare l'esecuzione in primavera.

Ref: 078/VR/1/PWU

27 November 1945

Subject: State Road No. 13 through Sacile.

To : Regional Commissioner, Venezia Region
(Att: Regional Engineer).

1. We are returning the above project with comments of the Ministry of Public Works.
2. They have drawn in pencil on the map an alignment that they believe is more economical.
3. They also stated to me verbally that this road has served two wars and if it were not an unemployment project they think it unnecessary at this time.
4. If you think that it is a good project for the relief of unemployment, have the genio civile prepare the project and resubmit it.

By Command of Rear Admiral Stone:

NORBERT W. HYLAND,
Major Spec. Res.
Chief, Public Wks, Div.

*also state verbally that
road has served townships
and is not very urgent.*

MINISTERO DEI LAVORI PUBBLICI
Direzione Generale dei Servizi Tecnici

34

Pur convenendo sulla necessità di costruire una variante alla traversa interna di Sacile della strada statale n°13 per liberare la medesima dal traffico pesante, si esprime parere contrario al tracciato proposto (lunghezza m.1.706), potendosi col tracciato indicato a matita molto più breve (ml.900) secondo il progetto già da tempo studiato dall'Ufficio compartimentale della Viabilità Statale di Trieste conseguire, con spesa minore, le finalità volute.

Roma, 22 novembre 1945.

 Public Works & Utilities Division

8th November 1945

TO : Public Works & Utilities Sub.Comm. HQ, A.O.
 SUBJECT : New project for diversion
 FILE No : RXII/PWU/Gen.01

1. The attached project was submitted by the Provincial Commissioner Udine. He asks for it be presented to the Italian Ministry of Public Works for approval.
2. The present road running through the village of Sacile is very narrow in parts and there is barely sufficient room for two large vehicles to pass, as is shown by the photographs.
3. Another reason for the submission of this project is to absorb the large number of unemployed of which there is a large number in Udine Province.
4. If the Ministry of Public Works agrees to the project, the Genio Civile will then prepare the estimate.

John L. Buteker

ROMA

Oggetto : Vicenza - Lavori per lenire la disoccupazione.

Il Sindaco della città di Vicenza ha fatto presente a questo Ministero che per dar lavoro ai disoccupati occorrerebbe porre mano ai lavori di ricostruzione del Palazzo di Giustizia ed alla costruzione di strade necessarie per mettere in comunicazione il capoluogo con alcuni sobborghi, ora non collegati, nonché opere minori.

I lavori per il Palazzo di Giustizia, limitati per ora alle demolizioni dei ruderi, allo sgombero delle macerie ed alle sole opere di fondazione, ammonterebbero a 10 milioni di lire, mentre quelli delle strade suaccennate a 13 milioni. In complesso 23 milioni che dovrebbero essere autorizzati dalla locale A.N.C.

Trattandosi di lavori diretti al fine di dare impiego alla mano d'opera disoccupata, si prega codesta Commissione, ove lo creda, di disporre che l'ufficiale regionale alléato di Vigenza prenda in benevola considerazione la richiesta di quella Autorità Comunale, avvertendo che il progetto per la ricostruzione del Palazzo di Giustizia ha già riportato i pareri favorevoli della competente Magistratura Italiana, del Genio civile e della Soprintendenza ai monumenti.

Si ringrazia

TO : Public Works & Utilities Sub/Comm. AC. H.Q.
SUBJECT : Meduna Bridge and Road
FILE NO : RXII/PWU/ 400

1. The enclosed estimate for 16.150.000 Lire is for a new road & bridge across the river Meduna shortening communication in the industrial area of Maniago by some 20 Kilometers.

2. It is recommended by the Provincial Commissioner of Udine in the attached letter for the above reasons and also as a means of curing unemployment.

3. In the view of this office it is a worthwhile project and is technically in good order but is not of course war damage.

4. For this reason it is forwarded for your comment and for consideration by the Italian Ministry of Works on its own merits.

SUBJECT : Val S. Pietro bridge in Belluno Province
Supplementary estimate - BEL/45
FILE No : BKII/PWU/Gen.01

1. The attached supplementary estimate for lire 2.044.000 to originary project of 1.520.000 lire approved by you on 24/7/1945 No. M-1386 is forwarded for your approval.
2. This is necessary because of the increase of wages and cost of materials since the end of June when the original estimate was prepared. In this period prices rose over the 100%.
3. Reconstruction in concrete has been decided on because it is more convenient and economical.
4. The reconstruction of the bridge has been let to Cooperativa Bellunese Edile after a regular competition of four firms. This firm tendered much lower than the other bidders.

SUBJECT : Valdobiadene Station steel bridge over Piave at
Fener - Supplementary estimate TREV/158
FILE No : EXII/PWU/Gen.01

1. The enclosed supplementary estimate for Lire 4.630.000 is submitted for your approval.
2. The original estimate dated 7 August was for 1.900.000 lire for the temporary repair in timber. When tenders were called for the lowest bid was 4.200.000 lire.
3. In consequence it was thought best to proceed with the permanent repair of the bridge in steel.
4. An offer has been received from a firm having the materials who are willing to do this for 6.500.000 lire. A further competition will however be held to see if this figure can be improved on.

TO : Public Works & Utilities Sub-Comm. HQ, A.O.

SUBJECT : Segna bridge over Adige

FILE NO : XVII/PWU/Gen.01

1. The following estimate and Form AG/1 is forwarded for your

approval:

Ref. No.

VPR/68

Type of workCost LineReconstruction of Segna bridge over Adige
river at Segna di Cavalon

30.000.000.-

2. This project was drawn up by the firm of Ing. de Panti at request of Genio Civile, as the Genio Civile had not yet the necessary staff to do this.

3. On approval the Genio Civile will invite several good Contractors to bid for the reconstruction of this bridge, giving them the cross section of the river on the spot.

4. The main concern of the Magistrate alle Acque is to get the financial approval before A.M.C. closes down, as there would be delay in getting this bridge financed through Italian Channels and this bridge is important to the provincial lines of communication. It is therefore asked that you give your approval to the project.

 SUBJECT : Approval of estimate
 FILE No : RXII/PWU/Gen.01

1. The following estimate and Form AC/1 is forwarded for your approval.

<u>Ref.No.</u>	<u>Type of work</u>	<u>Cost Lire</u>
TREV/137/R	Partial reconstruction of Vidor bridge over Piave river (Communes of Vidor and Crocetta)	19.100.000.-

2. The original estimate for the amount of Lire 11.000.000.- was presented to this office on the 23rd June 1945 and was returned to Treviso Genio Civile for proper competition of drawings and calculations.

3. During this period, the cost for wages and materials have risen, therefore the original estimate had to be amended thus augmenting the original estimate.

QUARTIERE GENERALE
REGIONE DI VENEZIA
GOVERNO MILITARE ALLEATO

APO 394

Divisione LL.PP. e Servizi

19 settembre 1945

A H.Q. A.C. P.W & U

OGGETTO: Progetti VEN/RBS/53 - VEN/RBS/54

N° : RXII/PWU/Gen. 02

La copia allegata del progetto VEN/RBS/53 per 50.000.000 di lire e del progetto VEN/RBS/54 per 110.000.000 di lire che non hanno approvato, viene trasmessa a voi per essere passata al Ministero dei Lavori Pubblici.

Si pensa che per un ponte così grande dovrebbe essere indetto un concorso per un progetto moderno ed artistico.

Si sollecita su questo affare l'opinione del Ministero.

W. KNIGHT, Magg. M.C.
Ingegnere Regionale

PARERE DELLA DIREZIONE GENERALE DEI SERVIZI TECNICI DEL MINISTERO LL.PP.

- 1) Il ponte sul Piave non ha alcuna importanza artistica. Era costituito da quattro travate in ferro dell'ampiezza di m. 52,64 ognuna. Ne sono crollate due. Convienne ricostruirle utilizzando in parte il materiale di quelle crollate. In considerazione dell'importanza del lavoro convienne domandare offerte a più di una ditta per scegliere la proposta

19 settembre 1945

A H.Q. A.C. P.W. & U

OGGETTO: Progetti VEN/RBS/53 - VEN/RBS/54

Mc : RXII/PWU/Gen. 02

La copia allegata del progetto VEN/RBS/53 per 50.000.000 di lire e del progetto VEN/RBS/54 per 110.000.000 di lire che non hanno approvato, viene trasmessa a voi per essere passata al Ministero dei Lavori Pubblici.

Si sollecita su questo affare l'opinione del Ministero.

W. KNIGHT, Magg. M.C.
Ingegnere Regionale

PARERE DELLA DIREZIONE GENERALE DEI SERVIZI TECNICI DEL MINISTERO LL.PP.

- 1) Il ponte sul Piave non ha alcuna importanza artistica. Era costituito da quattro travate in ferro dell'ampiezza di m. 52,64 ognuna ne sono crollate due. Convienne ricostruirle utilizzando in parte il materiale di quelle crollate. In considerazione dell'importanza del lavoro conviene domandare offerte a più di una ditta per scegliere la proposta più conveniente.
 - 2) Il ponte sul Tagliamento, tra S. Michele e Latisana, era costituito da sette travate in ferro su stilate metalliche poggianti su pali a vite. I danni apportati dai tedeschi richiedono pressochè l'integrale ricostruzione del ponte. In tali condizioni appare opportuno cogliere l'occasione per attuare una vecchia proposta di spostare più a valle il ponte per costruire la variante stradale tra S. Michele e Portogruaro la quale faciliterebbe molto il traffico.
- Il nuovo ponte dovrebbe essere in muratura o in cemento armato e per l'appalto dei lavori sarebbe conveniente bandire un regolare appalto concorso fra ditte specializzate.

IL DIRETTORE GENERALE
