Subject : Increase of workmen wages

To : Regional Engineer - AMG - Turin

17 Sept 45

The Impresa Bellecha, contractor for the reconstruction of the bridge over the Scrivia at Tortona, has informed me that the British Railroad Engineering, constructing a bridge on the Scrivia, is requisitioning workers in Tortona and surrounding villages and pays wages much higher than the published ones and offers, free of charge, two meals a day to these workers.

For this reason, all other workers employed by contractors in that area, require increases on their wages. Since such increases cannot be acknowledged by this Office, contractors would be obliged to discontinue their works.

For averting such danger, it is requested that your Headquarters instruct proper authorities in order that also the British Engineering pay for its workers in accordance with the official scale of wages.

/s/ Francesco Pandolfi
Ingegnere Capo

LT. COL. WILLIAM M. SPANN
HQ. ALLIED COMMISSION
PUBLIC WORKS & UTILITIES SUBCOMMISSION
A P O 394

Dear Sir:

This office is urgently in need of having access to the "Project Main Book", in which your office had made the current entries of the incoming projects. Unfortunately the extra copy of this book, which was to have been made for the Ispettore Genio Civile Office, was only about 1/3 completed at the time your office closed. Would you please be kind enough to let us have this "Main Book" for about 2-3 weeks, in order to bring own records up to-date.

While we do have a copy of your so-called "Provincial Book we note that this particular record book does not include Roads and Bridges. We would also be very grateful if you could arrange, through your kind intervention, to let us have Capt. Gentry's Bridge book for some time, in order to make the necessary copy.

Please be assured that this office will take the utmost care of these books while they would be temporarily in use here. May I take this opportunity also, to again thank you for the splend work you did for Emilia Region Public Work's activities, with the hope to see you again up here as often as possible, or at least before you leave for America.

Sincerely yours

IL PROVVEDITORE
(Alfredo Lenzi)

CERTIFICATE

1. This is to certify that the office of Ispettore Genio Civile, Bologna, has received to date from the Public Works and Utilities Division, HQ. Emilia Region, AMG. the project files No 1 to 2721 inclusive, as listed on attached sheets No 1 to 41 inclusive.

2. The office of Ispettore Genio Civile is being held responsible for the careful preservation of these documents and will return them after 99 days (15 November '45) to Headquarters Allied Commission, Public Works and Utilities Sub-Commission at Rome.

3. The Project files, transmitted to Rome, will be securely tied in bundles. No bundle will exceed 18" in height. The files, when transported to S/Hq. Rome, will be securely crated with each crate containing a list of contents for checking.

Ispettore del Genio Civile

Ref : PEX/COM/20

Subject : Proposed Gas Pipe Line [illegible]

To : Public Works and Utilities Sub Commission
Sub. Allied Commission

1. Attached is a proposal in quadruplicate by which the Regional Commissioners wishes to have every assistance.

2. If "Ambra" can be conveyed by Gas Works by pipe-line more than twice as much gas could be supplied for the same expenditure of coal.

3. The Gas Works require for this scheme approx 25 miles of pipe-line similar to the oil pipe-lines laid by the Allies, and are prepared to purchase these pipes from the appropriate Allied Authority.

4. It is presumed that as the campaign in Italy is at an end there might be a quantity of pipes available.

5. Local Division of Commerce and Commissariat will be interested from the "saving in coal" angle but agreement with Petroleum Section A.F.H.Q. will be necessary as Ambra production is subtracted from Bonded allotments.

6. The scheme will obviously be important from the point of view of Italy's economy and it has the blessing and approval of this H.Q.

7. As the decisions to be taken will have to be on a higher level than region we ask you to give this scheme prompt attention, as follows:

Required: 1) Agreement with Petroleum Section AFHQ

2) Agreement with AFHQ as appropriate authority to purchase pipe line

AZIENDA MUNICIPALIZZATA DEL GAS
BOLOGNA (124)
CASELLA POSTALE 292 - INDIRIZZO TELEGR.: GAS

Li 13 luglio 1945

B/Ing.Z.

Agli Uffici dell'A.M.G.
BOLOGNA

L'Azienda Municipalizzata del Gas di Bologna distillava prima della guerra circa 250 tonnellate giornaliere di carbon fossile .

La Commissione Alleata, rendendosi conto delle urgenti necessità della popolazione, ha assegnato a questa Azienda per il mese di luglio 40 tonnellate di carbone al giorno .

Tale dotazione - pur segnando un notevole aumento rispetto a quello precedente che era di sole 10 tonnellate - è però sempre insufficiente, rappresentando appena 1/6 del fabbisogno di ante guerra. E tale insufficienza è tanto più sensibile in quanto che la popolazione odierna bolognese è di gran lunga superiore a quella normale per l'aumento derivato dai profughi provenienti dai paesi limitrofi completamente distrutti dalla guerra.

Per quanto si abbia ragione di sperare e di ritenere che gli Alleati intendano aumentare via via nei prossimi mesi l'attuale assegnazione di carbone, pur tuttavia tale auspicato aumento non potrà essere sufficiente per compensare le sempre maggiori richieste di gas dovute sia al ripristino di condutture messe fuori servizio dai bombardamenti, sia al fatto che moltissime case non gravemente sinistrate saranno gradatamente rese abitabili.

La Direzione dell'Azienda ritiene che le presenti difficoltà e quelle di gran lunga maggiori che si prospettano per l'approssimarsi dell'inverno, possano essere superate qualora si riesca ad integrare la produzione del gas proveniente dalla distillazione del carbon fossile con quello che può essere prodotto a mezzo di gas metano, gas che si trova a non molta distanza da Bologna .

Infatti a Passo Segni, in Comune di Baricella, a circa 40 kilometri da Bologna ed a poca distanza dalla strada Bologna-Ferrara, è in funzione da circa 2 anni un pozzo di metano che presentemente viene sfruttato per alimentare un compressore della capacità di mc. 4500 al giorno per il riempimento di bombole per autoveicoli. Secondo quanto affermano i tecnici che gestiscono l'impianto, la capacità del pozzo supera notevolmente i 25.000 mc. giornalieri. Sono dunque oltre 20.000 mc. di gas che ogni giorno rimangono inutilizzati, ma che potrebbero trovare facile e prezioso impiego da parte dell'Azienda del Gas di Bologna qualora venissero immessi in una tubazione collegante Passo Segni con l'Officina del Gas .

che dovrà collegare

Declassified E.O. 12356 Section 3.3/NND No. 785019

AZIENDA MUNICIPALIZZATA DEL GAS
BOLOGNA (124)
CASELLA POSTALE 292 - INDIRIZZO TELEGR.: GAS

due Li ..... 19...

Il metano misura alla bocca del pozzo la pressione di 32 Atmosfere e quindi potrebbe essere immesso direttamente nella tubazione senza l'interposizione di compressore .

Dato l'alto suo potere calorifico, ogni metrocubo di metano servirebbe per la produzione di circa 2-3 mc. di gas di uso corrente ed in tal modo si avrebbe, in breve tempo, un forte aumento nella erogazione del gas per uso cittadino, pur restando sempre insufficiente la produzione di carbone coke per i bisogni dell'industria locale .

La difficoltà maggiore per l'attuazione di questo piano di utilizzazione mista di carbone e metano - che non rappresenta difficoltà di ordine tecnico e che è già stato adottato con successo a Firenze - consiste nella mancanza di disponibilità dei tubi necessari per la messa in opera del metanodotto.

E' per tale ragione che la Direzione dell'Azienda, nella impossibilità di superare in altro modo tale difficoltà, chiede al Comando Alleato di voler contribuire ad alleviare il grave disagio nel quale trovasi la città di Bologna, rimasta per quasi nove mesi sulla linea del fronte, fornendo all'Azienda del Gas i tubi necessari per la costruzione del metanodotto, tubi la cui lunghezza complessiva viene valutata in Km. 45.

Attualmente il Comando Militare Alleato sta provvedendo a togliere d'opera i tubi che hanno servito per gli oleodotti costruiti per uso bellico. Tali tubi servirebbero perfettamente allo scopo non solo le loro caratteristiche ma anche perchè si trovano a poca distanza dalla zona del nuovo impiego.

Si fa osservare che la creazione del metanodotto non pregiudicherebbe in alcun modo il rifornimento delle bombole per uso degli autoveicoli, perchè nella tubazione verrebbe immessa soltanto la maggiore produzione di gas metano non assorbita dal compressore installato.

IL DIRETTORE
(Ing.Jonio Zutti)
