TO : P.W. (Umbria)

SUBJECT: Labour employed on Public Works UMBRIA Wages increases.

IN REPLY QUOTE: R4/ENG/21.4

1. Reference R4/ENG/21.4 dated 19 Feb. 1945 which accepted the principle that in the case of new contracts, contractors should be re-imbursed the additional costs resulting from official wage increases authorised during the progress of the contract such additional amount being restricted to the additional amount legally payable and actually paid.

2. a) The same principle is now accepted for existing contracts of Military importance in which provisions is not made for revision in respect of such wage increases. In the case of these contracts you are authorised to advise the contractors that, commencing with effect from 13th March they will be re-imbursed for each operative employed on the contract a sum equal to the cost of Indennità di Carovita plus Indennità di Pane legally payable and actually paid.

b) In no case will the sum re-imburned exceed the difference between the rates of pay laid down in A.F.H.Q. Administrative instructions n° 47 and 48.

c) In the case of further official wage increases or new Indennità a recommendation is being submitted that the same principle will be followed.

3. The whole question was submitted to A.C. H.Q. P.W. under my R4/ENG/21.4 dated 18th January requesting a general ruling and to H.Q. Lazio Umbria Region (Labour Division) on 14th February. No reply has yet been received.

Strade Statali- Via Monzambano 10- Rome

SUBJECT : Repair and Maintenance of Communal Roads
in the vicinity of Cecchignola

REF. : RA/ENG/509.p

1. This office is in receipt of a letter from HQ. Rome Area, MTOUSA Engineer, Services, APO 794 U.S. ARMY, dated 6 March 1945 and signed by Col. W.I. Medding C.E., ordering the above mantioend system of roads classified as Military. This letter further directs the immediate execution of the projects which accompany the form AC/1, attached.

2. Since these Communal Roads are now of Military Importance, we are processing them through your office. For the same reason, you are empowered to sign the AC/1 request for appropriation of funds and you may consider this letter as attesting to that fact.

3. In view of the urgency of the work, it is important that contractors be obtained, either through your office, or that of the Communal Engineer, at the earliest possible date. Therefore, your office will be advised immediately upon HQ. A.C. Public Works and Utilities Sub-Commission approval of the projects therefor.

ENGINEERING DIVISION.

Memorandum on principal items that will require provision in the event of LAZIO-UMBRIA Region being abolished and my recommendations for meeting them.

Umbria. The effect of handing over this portion to another Region will be change of direction and coming under a regional Engineer who does not know the problems; geographically it will slow things up as to reach new regional HQ it will first be necessary to cross the Appenines and then for projects to be transmitted back over the appenines to Rome.

This area is at present largely decentralised under Maj. Evans R.E. assisted by Capt.Spriggs,Capt.Laughton,Capt Whitton. Maj.Evans comes to Rome 2 days a week and clears business with Reg.Eng.takes projects requiring signature of ACHQ to them and clears points with Insp.Gen office of Genio Civile. under whom work the decentralised office of Viabilite and the two Capi del Genio Civile.

Recommendation. When UMBRIA reverts to Italian Govt.Control it will be under Insp.Gen.Lazio-Umbria(presumably)where it is in the able hands of Ing Allicata with excellent cooperation.

a. That should not be disturbed and it should continue so.

b. The present team should continue so until officers are required elsewhere with the same system of decentralisation and delegation of powers to Maj.Evans at least as regards Military Roads which is in my opinion the only way to meet the heavy demands with sufficient speed.(200 Bridges are in hand,400 to do still)

c. TERNI being a large generating centre and heavy user and increasing demands for Lignite Mines and other Industries in Umbria.One or two Italian Electrical Engineers will be left to assist Provincial Commissioners with Prefects Provincial Electrical Committee.

(Total work approved and financed about 500 million lire) all finance for this is linked with Insp.Gen Lazio-Umbria.

LAZIO. a. FINANCE. AMG projects all provided for,and anticipations for 1-milliards lire out of 2 milliards in IGT made and sufficient cash and prospects of future flow to ensure no hold up.

The problem of back payments for 'CaroVita from 10th Aug. has yet to be worked out and may amount to 2or 300million lire Fully represented to ACHQ PW,decision awaited whether to be refinanced from AMG or Ital.Govt.funds.and extent.

b. Controlled Materials.no procedure has been laid down by ACHQ as to channel to take the place of present channel through Reg.Eng. on MAT.10form. It is essential to do so.

Recommendation. Through Italian channels to Ministerial level thence to ACHQ PW.who will require staff to deal with.

c. Supplementary B scale Food for heavy workers. Regional Eng.at present is required to certify that contractor holds a contract this enables contractor to obtain Supplementary rations for his workmen.

Recommendation.This power should be delegated to Capi del Genio Civile.

(This has been referred to Regional Supplies Division.)

Declassified E.O. 12356 Section 3.3/NND No. 785019

d.CIVITA VECHIA Harbour improvement scheme.

An AFHQ priority job.A scheme of some 60 million lire t at will eventually develop into some 300 million lire.

At present there are on loan some 30 major items of Army Mechanical Equipment including one ship,workshop,MT.This comes under general supervision of CRE 104. But work is under direct supervision of Regional Engineer and in these initial stages has and is entailing still much work. If the initile impetus is to be maintained it is essential to maintain an officer at the port.

Recommendation. That Maj.Goldson RA,working under Reg.Ing.as Port Reconstruction officer should remain coming directly under ACHQ(PW).

e.Electricity. There are at present 2 officers and staff on this & Italian Engineers. Electricity is allotted to Military commands Civil Demands are submitted by Provincial Commissioners to Military commands.This region is particularly difficult in this respect owing to coming under 4 Military commands whose bounderies do not coincide with provincial bounderies only 3 of the provinces comes wholly within one command and one province has to deal with all four,and these bounderies changing.

Provincial committees have been recently or are in process of being set up but not yet functioning.

A link must be established between Military commands and these Civil committees and guidance is required in early stages to ensure that they get full scope and start on right lines.

I consider it essential to retain an officer with staff.

In the case of ROME CITY the Military and Civil distribution is closely intertwined and the distribution network and controls make it impossible to disentangle.

An officer under Regional Engineer now sits on RAAC board as a member and is the sole representative of Communal needs.

The provincial committee recently set up are not yet ready to represent a balanced view on civil requirements and it is doubtful if RAAC would accept a representative of this committee as a member of the board as decisions are too involved with troop movements often Secret. The ACHQ PU representative on board is concerned with the wider problems of policy at higher level and could hardly undertake the detail work of screening demands,and particularly a complete review of all Civil Preferential Loads which is urgently necessary and was planned to be done in conjunction with regional Industry division and Civil committee.

Recommendation. That Capt.Wade Brown now a member of RAAC board with staff should be transferred to ACHQ and be responsible for providing this link between civil and Military throughout LAZIO.

This officer has been working on the complicated Rome problem from its inception in June.&and also members of his staff.

The alternative is to reverse the declared AMIG policy of Military dealing with civil through AC/AMC or have no local civil link with Military and channel civil demands through Central Commission(Civil at Ministerial level)to ACHQ PU;I do not consider that this will eventually be the proper way but that committee nor commission are yet sufficiently established to undertake this without a transitional period of 2 or 3 months as recommended.

(next page).

Declassified E.O. 12356 Section 3.3/NND No. 785019

f. Military Highways & Roads. In this region there are some 400 million lire of work in hand of which 3 is in LAZIO.

Although the bulk of this is launched in LAZIO there are still a large number of projects to be initiated or put into practice on road surface due to non availability of Bitumen before the winter and unsuitability of weather for spraying and sealing in winter.

This involves constent liason with Military as regards traffic interuption and supplies and transport;as with Electricity the problem is complicated in LAZIO by having to deal with 4 Military commands;and on the civil side Viabilita Dept of Genio Civile and Rome Commune for portions of highways within the Commune Commune.

There are some 100 bridges in hand requiring liason for materials and transport and approvals of plans.Also some 100 bridges still to be started,for some 20 of which projects have been approved but have been suspended as it was not deemed Militerily desirable to open the road in winter.

The records and financing of Highways in both LAZIO and UMBRIA UMBRIA is done in Regional Engineers office and the viabilita Dept.under the Isp Generale of the Compartimento of LAZIO and UMBRIA. Seperation will involve the seperation of these . and as regards Genio Civile return later when Umbria is passed to Italian Govt.

This link between Military and Civil cannot be just dropped without provision of carefully prepared substitute.

Fuel supply for some 1000 trucks operating on Highways under civil contractors is supplied direct by Regional Eng. through coupons supplied through ACHQ FW. This also must be provided for.

Recommendation. The two officers and present staff,including staff for fuel issue dealing with Military Highways to be transfered to ACHQ FW and continue to function.

---

g. ROME CITY. Electricity has been dealt with above.

Water Supply still calls for a link on account of the large number of Military Installations to which access is not granted to Water Company Engineers.

When the yield of springs again drop acute problems will again arise although it is hoped less frequently then last summer. The Sindaco has appointed Professor Colissimo of Rome University as adviser on Water supply and his advice will be sound and practical. I have discussed this with Col Redding CE who feels it would be met by taking onto his staff two of the Engineers Italian employed by Reg Ing. and deal direct with Civil through them.Again reversal of AFHQ policy.

Streets.effecting Military Col.Redding feels he could deal direct with Comune provided he took over one of the Italian Engineers now on staff of Reg Ing.

The alternative is the Highways Organisation doing it.

Declassified E.O. 12356 Section 3.3/NND No. 785019

g. ROME CITY (contd).

This also is a reversal of AFHQ policy of dealing through AC/AMG with Civil.

WORKS. The only questions likely to effect Military are :

a. Streetcleaning this should be done by commune but unless tyres are provided might become critical.

b. Sewers. Much progress has been made but there are still many breaks to repair.Last summer no epidemics resulted perhaps luck.

c. Cesspool cleaning largely military installations. Requires liason with civil.and tyres or it may again become dangerous.

d. Fumicino harbour. This is mainly of civil importance but as it is importing charcoal,some coal,and fish it is of indirect concern to Military.

e. Sanifica supervision in so far as Malaria may effect troops.

f. Maintenance of Military Requisitioned Buildings which involves liason with Civil Authorities Technical services.

Recommendation. Until the officer now in charge (Maj.Mitchell is required elsewhere it would be well if he was permitted to continue to keep a fatherly eye on things,as he has been actively engaged in guidance and hastening action.

Also the transition of fuel supply passing to Ital.Govt. on 1st March may result in considerable delays and disorganisation,to both services and city transport.

---

h. Provinces Works. In Lazio these have been weaned for some time The change over of fuel supply to Ital Govt on 1st March is bound to cause some hitches where Genio Civile and Contractors have been accustomed to get it in an organised routine through Maj.Ing. A matter of 200,000 gallons per month. Contractors working in Provinces have been decentralised to Provinces all along.

Recommendation. No Provision necessary. The Isp.Gen.can be relied on to utilise the funds at last at his disposal to the best advantage.

Military installations will have to deal direct with Civil authorities.over such things as water and repairs.

i. General Supervision. and closing down.

The question arises of the disposal of Projects handled mess of bridges,files dealing with the Engineering problems handled. It might be wise to deposit them at ACIQ so that they were accessible should reference be necessary.

With the very large volume of work launched in this region some 2½ thousand million lire,there are bound to be some questions arise and until the present Regional Engineer is required for some other duty,it would appear desirable for him after close of Region to carry out Inspectional functions on behalf of ACIQ PW

Gp Capt

Lt.Col R.E.
Regional Engineer Lazio &Umbria.

21st Feb 1945.

Declassified E.O. 12356 Section 3.3/NND No. 785019

addendum.

j. Mines Removal of.

(1) 561 Coy stationed at Gaeta. This company is engaged at present on two jobs completing the clearing of the SCAURI water supply pipe line, the flame thrower asked for many months ago has just arrived to deal with this particularly dangerous bit which has already cost 18 casualties in this company and 17 civilian casualities on other parts of the same minefield. also clearly the 6,000kv High tension Line ready for repair(nearly complete) and the 30,000 kva line just started probably 6 months work.

unlimited work remains in this zone should it remain but I understand that the policy will be to withdraw it on completion of the particular work in hand.

The detailed supervision of this work is done by the Italian liason officer Lt Col Caruso.

Endless administrative questions arise but doubtless they could be taken direct to CA Section AGHQ by LtCol Caruso when the Region is withdrawn.

It is at present under the direct on of Regional Engineer for work.

(2) There is a civil mine contractor, direct AMG contract which is about half complete.

Zone of work Littoria Province, at present sweeping electrical transmission Lines and some 48 bridges ready for repair and reconstruction.

Since Maj Larson left the direct supervision and testing of this work has been done by LtCol Caruso.

There is a clause in contract permitting presence of contract to Ministro of War Italian.

The Ministro of war will be asked to take it over. or alternatively the Genio Civile.

The work has been good and so far without casualties.

It requires precise instruction of areas to be swept and equally precise notification to Water or Electrical Company of zones swept.

Both these have to be passed to someone my proposal was both to Minister of War, and I still think that is best even if the company is only temporarily so.

Gruenther

SUBJECT : Increase of Wages of Labourers

IN REPLY QUOTE: R4/ENG/21.4

Reference Royal Decree dated 2nd Nov N° 303 published 14th Nov N°81 in Gazzetta. -

1) This opens a large question that may amount to several hundred million lira - that is NOT yet defined. -

The points are

(1) Employers have to pay the labour under the Decree retrospectively to 15th Aug - which has been published in the papers and workmen are clamouring to be paid and employee has to pay insurances etc in addition.

(2) Is the Contractor to be reimbursed if so how, when and from what funds.

Arising out of these are:

Labour (a) Those paid normal rates are obviously entitled to full extra (It is doubtful if normal rates are anywhere defined and vary with locality and supply and demand).

(b) Where the contract specified allied forces rates or some other definite rate above normal will extra be paid above these or only difference. -

(c) Contracts and Type

(1) Made before 15th Aug.
(2) Made between 15th Aug & 14th Nov or 2nd Nov whichever is the legal date.
(3) Cost plus contracts

Lt Col Thompson
Pls review this carefully and discuss with me

(b) Where the contract specified allied forces rates or some other definite rate above normal will extra be paid above these or only difference. -

(c) Contracts and Type

(1) Made before 15th Aug.
(2) Made between 15th Aug & 14th Nov or 2nd Nov whichever is the legal date.
(3) Cost plus contracts
(4) Lump sum contracts
(5) Measured Contracts
(6) Direct Labour.

487

Each requires different treatment.

2)

Solutions (a) letter dated 27 Oct signed by Junius R. Smith a/Dir Labour Sub Commission.

./.

Declassified E.O. 12356 Section 3.3/NND No. 785019

(b) letter dated 28th Nov from Isp. Generale.

This seemed to be all arranged but on 10th Jan at meeting of Ing. Capi it was reported that like with funds, this verbal ruling had been withdrawn and it appears that contractors will not be reimbursed for disbursements made week by week until after the final bill is submitted. -

3) Question -

(1) In case of projects financed from AMG funds who has to find extra money AMG or Ital. Govt. if AMG who decides what is paid under I(c).

(2) In projects under Highway Fund do you wish supplementary estimates submitted for approval or is this entirely a matter for Italian Government.

(3) A clear ruling on the whole position is desirable and it must be similar in all Regions.-

CORPO DEL GENIO CIVILE.

28th November 1944

File N° 4398

ANSWER TO LETTER : R4/ENG/21.4 date 8/11/44

SUBJECT : Increase of salaries to labourers

TO : AC IV
Regional Engineer

Reference letter to which I am answering I can assure you that the difficulty you refer to has been solved.

In fact, as you remember, the question was discussed with Comm. Tizzano in a meeting in my office and it was decided to correspond to Enterprises an indemnity of £. 35,00 on the basis of the days of work resulting from the work book.

On the basis of these arrangements the Ingegneri Capi correspond already to the Enterprises these indemnities and therefore there is no reason for discussion between the Administration and the contractors.

The danger of slowing work does not exist any longer.

The same measure could be taken by the assessore dei LL.PP. of the Rome Municipality.

L'ISPETTORE GEN. DI COMPARTIMENTO

TO : Comune di Roma
Assessore ai LL.PP.

SUBJECT : Increase of Wages of Labourers

IN REPLY QUOTE : E4/ENG/21.4

Reference your 1-11 N° 21188.

1. I have received no official copy of decree. -

This is a matter that may affect hundreds of contracts and requires careful study of the Decree and also a detailed examination of the terms of each contracts to establish whether either the contracts can legally claim a refund and further when he can justly claim a refund and to what extent. -

Some of the contracts I have examined specified definite rates of pay. - I am unaware if those mentioned did so or not. -

When they did so they were I believe the Rates paid by the armed Forces which were considerably above those locally in force at the time. -

Therefore it must be established as to what rates the advance of 35 lire applies. -

In the case of a lump sum contract unless there is a specific clearer covering such increase I am of opinion that the contractor has no legal claim. -

If he has no legal claim it would be upon him to submit an appeal for special consideration but in such cases I feel sure no general ruling would be given and each and every case would have to be examined in detail and it would lie with the paying authority (in every case the Italian Government) to decide whether they would entertain such claims.

2. The above deals with the position of the contractor.

The question also arises whether under the Decree the employee has a legal claim.

./. - 484

Declassified E.O. 12356 Section 3.3/NND No. 785019

3. In future it would appear desirable to include in all contracts a clause making allowance for reimbursement of extra costs due to officially cumaunedd increase in wages. - Such a clause reduces the gamble the contractor takes and results in better tenders.

4. The above are my personal views based on a wide experience of similar questions under English law which like yours is fdundedlargely on the old ROMAN LAWS and may be incorrect in Italian law.

5. Please give consideration to those points keeping in view the very large question it opens and after obtaining legal advice let me have your considered view on each point raised together with a selected test case for two or three different types of contracts.

Pls take this up with Reggiano. They should issue instructions on that.

17 January 1945

TO : HQ. A.C.- Public Works & Utilities Sub-Commission
Chief Highways Division

SUBJECT: Recapture Clause in Genio Civile Standard Contract

REF. : R4/ENG/509.

1. In the standard contract drawn by Genio Civile for all work in their catagory contains a clause which denies the Contractor any recourse for damages resulting from raising prices. The office of Genio Civile has construed that this clause is binding even when such raising prices are caused directly by statute or by decree.

2. Obviously it does not lie within the province of mortal man to predict the vagaries of the powers that be who may change at will and in any amount desired, wages, requirements of work specifications, or other matters, pertinent and impertinent. The unsoundness of a contract containing such a clause broadly interpreted to cover Statuatory regulations in these uncertain times, can not be questioned.

3. Therefore in accordance with our recent telephone conversation and on the strength of Ing. Reggiani's liaison work with the Italian Ministry, we are instructing all questioning contractors that this clause will not hold when applied to prices which have been effected by law or edict.

4. Would you please confirm the validity of this action.
