ACC/078/PWU

Subject: Emergency Squads.

To : Regional Engineer, Lazio-Umbria Region.

1. Recent experience has indicated that there is urgent need for emergency repairs squads to take care of flood and prevent collapse of endangered culverts, fills etc..

2. This is particularly necessary on Routes 1 and 7 where there are no D.C's.R.E., to take immediate action.

3. It is therefore suggested to organize such squads operating from Rome or other strategic points and instructions have been issued to the Ministry of Public Works. Financing will be arranged through Regions in the normal manner.

4. It is hoped that you will recognize this necessity and instruct Capt. Gentry accordingly.

Subject: Financing and Repair of Private Works.

To : Regional Engineer(Lt.Col.Birchett C.E.)

Answering letter of 21 Oct.1944-Eng./7.1

1. We enclose copy of Financing War Damage memo dated 21 September 1944; this should answer some of your questions. Others are answered as per the latest information available here.

2. (Answer to all your questions--PARAGRAPHS REFERRED ARE AS PER FINANCE MEMO.)

Ato G(Incl.): Par.5 provides Genio Civile may repair private dwellings, war damaged, up to L.10.000 per project; Reg.Eng. approval not required. This Par.5 also covers financing of same.

For repair of war damaged private dwellings(or privately owned public institutions),where cost per project exceeds L.10.000, two major steps are necessary. Firstly, Reg.Engr. must decide whether such work" is deemed to be necessary in order to provide a mere subsistence level to the civilian population"(as per Par.4); secondly,if answer is yes,Hdqtes approval must be secured(all as per Par.3C.).

Where private property is involved,and where project contemplated costs more than L.10.000, Genio Civile cannot act without Regional Engineers(and Hdqtes)approval.

As your cooperation for us is necessary and it is difficult to contact your unit directly is it possible for you to send a representative who can see the difficulties for you during the daily work as for materials supplied on site generally but in particular the artisans.

It is absolutely necessary to interview the local labour authorities as owing to your low rates of pay in relation to those of the private firms labour prefers to work for them.

In particular we are in need of masons and concretors as none will stay on the Job.

To confirm the above I send you the enclosed letter written to us by the Civil Labour Office of Civitta Castellana which shows the rate of pay for labourers at 115 lire per day.

Greetings.

10 Settembre 1944

Signor Ing.,

Your labourers have been to my office and have requested me to interest myself in their rates of pay which are too low owing to the cost of living. I believe that your desire is the same as mine to help these poor labourers out of their misery which is very terrible thing to support. I want to ask you to examine this case and permit me to lay a contract for your examination to be realized as it has been a good reason for other contractors doing the same work as yours.

I have established that the pay from A.A. is of 50 liras and increased by the A.M.G. of 70% to 35 lire, 40 liras have been approved from the Ministers Council. In all the pay from A.A. is of 50 liras to 125 liras per day for the labourers.

5 October 1944

Subject: Repairs to Church of Trinità dei Monti.

To : Regional Engineer, Lazio-Umbria.

1. The Acting Chief Commissioner has requested that we investigate the possibilities of assisting in the repairing of the above Church which suffered as a result of War Damage.

2. Lt. Natale, of this Headquarters, has today inspected these damages together with a representative of the Ministry of Public Works. A Copy of his report is attached.

3. Will you please take this matter up with the Genio Civile and ensure that necessary repairs are initiated?

V.S. THOMPSON
Lt. Col. R.C.E.
Chief, Public Wks. Div.

1880

Subject: Repairs to the Church of Trinità dei Monti.

To : Office French Representative.

Reference your XB/SM-94 dated 27 September 1944.

1. An inspection of the damage to the above Church has been accomplished by an officer of this Headquarters together with a representative of the Ministry of Public Works and an estimate prepared on the cost of necessary repairs.

2. This information has been given to the Regional Engineer of Lazio-Umbria Region with the request that he ensure that repairs are initiated immediately.

ELLERY W. STONE
Capt. U.S.N.R.
Acting Chief Commissioner.

TO : HQ/ACC (PWU Sub-Commission)

SUBJECT : - Provincial and Communal (Non-military) Bridges
Minor Repairs.

IN REPLY QUOTE : R4/ENG/103.(G).

Ref. telephone conversation (Col. Thompson/Maj. Evans) 28 Sept. 44

1. A number of projects are being received in this office for minor repairs to non-military bridges, where the work can be done with local materials.

Most of these are for bridges of more than 10 ft. span, but the work is for repair of war damage (not reconstruction).

It is merely the intention to restore these bridges to their original condition and no question of re-design is involved.

2. In accordance with your sanction, therefore, where the cost of these repairs is less than L. 1.000.000 definite approval will be given at Regional level.

3. All approvals of this nature will be listed as "Bridge Repairs" on the normal monthly list of projects less than L. 1.000.000.

Piazza in Lucina n.4

R O M A

Con riferimento ai quesiti propostici verbalmente dal Vostro funzionario Sig. Grella, Vi precisiamo che, per espressa disposizione di legge (art. 5 R.D.L. 17 giugno 1937 n. 1048), gli assegni familiari "non possono essere considerati ai fini del calcolo dei minimi di retribuzione previsti dai contratti collettivi di lavoro o dalle norme equiparate".

Lo stesso criterio deve ovviamente valere per tutte quelle indennità speciali (es. indennità di presenza) che, come gli assegni anzidetti, costituiscono integrazioni salariali formalmente e giuridicamente distinte dalla vera e propria retribuzione.

Non v'è dubbio, pertanto, che quest'ultimo termine va inteso in senso proprio come non comprensivo degli assegni e delle indennità di cui sopra. D'altra parte, neppure potrebbe invocarsi per analogia la diversa prassi invalsa nei rapporti tra le Autorità Alleate ed il personale civile da esse direttamente assunto, giacché appare evidente che nella specie si tratta di un rapporto di lavoro tutt'affatto particolare, informato non tanto alle norme del diritto comune quanto ai principi eccezionali e contingenti del diritto di guerra.

TUDINI TALENTI
ROMA.

26 Agosto 1944.

277 R.E.WORKS SECTION
ALLA AZIENDA AUTONOMA STRADE
STATALI
ROMA.

In relazione a quanto comunicatoci dalla AA SS. che cioè la paganetta da corrispondere agli operai della Via Casalina si doveva intendere comprensiva di ogni indennità e cioè indennità di presenza ed assegni familiari, abbiamo fatto il quesito all'Ufficio Provinciale del Lavoro il quale ci risponde con la lettera che inviamo in copia.

Tale lettera conferma che le indennità e ed assegni familiari non sono compresi nella paga base e debbono essere corrisposti in più come abbiamo effettivamente fatto finora. Resta pertanto inteso che per tali indennità da noi corrisposte e da corrispondere sarà provveduto al rimborso a termine di contratto.

Distinti saluti.

TUDINI TALENTI.

In reference with communication received by A.P.S.S. That is, that the wages to be paid to workmen on Route 6. should comprise every indemnity, (indemnity to persons and assignee families) we have enquired of the Provincial Road office, which replied with the letter of which we are attaching a copy.

Such letter confirms that the indemnities and assignee families are not comprised in the base wages and should be paid for extra as we have done up to now.

It is in the meanwhile understood that for such indemnities that we paid and will continue to pay will be reimbursed at completion of job.

25th August 1944

File N°: 843
SINDACALE + INDUSTRIA
CO/bro

SUBJECT: Assegni faminliari and other indemnities -
Accounting of retributions.

Reference to oral proposals made to us by your official, Sig. Grella:

We must specify that by bill (Art. 5 R.D.L. 17 Giugno 1937 N°1948) the "assegni familiari" cannot be considered as belonging to the minimum retributions foreseen by collective work contracts or by equalled contracts.

The same criterion must be applied to all special compensations (ex."indennità di presenza") which like the assegni familiari, are to be considered an addition properly and judicially separate from the real and proper work retribution.

Thus it is understood that the last term is not to be considered as including the "assegni familiari" or other indemnities as above mentioned.

Besides even the different praxys that is in use between the Allied Authorities and the Civilian personnel could not be applied in this case as that one is an altogether particular work contract, adapted to the exceptionnal war period and war laws necessities more than to common rights.

We are waiting to know the decisions taken to that purpose by that firm.

APO 394

14 September 1944

TO : HQ, ACC, Public Works & Utilities Sub-Commission

SUBJECT: Roads Equipment
Highway No 6

FILE No: RA/ENG/402.6

1. With reference to the m/n subject. A copy of a letter from HQ 82 C.R.E. works, reference 1/2/0, dated 4 September, has been received by this office from O.C. 277 RE Works Section for information.

2. It is suggested by them that the following list of equipment be handed over to ACC:

- (a) No 1. 1,000 gall capacity Sprayer (ETNA) ✓
 No 1. 350 do. do. do. (do.)
 No 3. 250 do. do. do. (do.)
 No 1. 100 do. do. do. (do.)
 No 3. Fordson Pneumatic Tractors for moving this plant.

(b) Rollers.

- No 8. Rollers 8/12 ton (including Mech. Equipt. machines).
 No 1. W.D. Steam rollers.

NOTE There are a good many rollers available to the Contractors from civil sources in Rome.

(c) Premix Plants.

- No 7. Sets.
 The Barber Greene and one u.s. set to be returned.

(d) Crushers.

- No 10. Crushers.
 No 4. Granulators.

(e) No 5. Compressors.

(f) No 6. Concrete mixers.

It is thought that ten tippers can be made available to ACC.

3. May arrangements be made for the equipment to be left with Region IV until such time as the current work in this area is completed.

4. For your consideration and approval.

SUBJECT : Highways procedure.

IN REPLY QUOTE: M/MNO/400

Dear GEN,

Thanks for your No of 4th September duly delivered by Century.

1. There is a difference North and South of my line. North of it is Province of PANGLOSS and a small bit of THUMI.

I have as yet no jurisdiction or responsibility; I have however a very real future interest as if things are loosely done, I have eventually to clear up the mess.

2. There is a Maj. Leander HQ ACC liaison officer with CC HQ; District from Lt. Col. Thompson (HQ ACC Highways and Bridges); Maj. Leander is supposed to know all procedure and assist in coordination between C.E. District and ACC, and you should ask CC District for him to visit you and explain fully.

3. The A.A.S.S. has been abolished and State Highways now come under a Department of Civil Service for LAOS and THUMI, which has absorbed most of the A.A.S.S. engineers.

Lyell Thompson
 16/9

13 September 1946

TO : CDR 52 (Gentry)

FROM : Highways Directorate

IN REPLY TO: HQ/ACC/400

Dear Sirs,

Thanks for your No of 4th September duly delivered by Gentry.

1. There is a difference North and South of my line. North of it is Province of PANDORA and a small bit of TAMI.

I have as yet no jurisdiction or responsibility; I have however a very real future interest as if things are loosely done. I have eventually to clear up the mess.

2. There is a Maj. Roucher HQ ACC liaison officer with CC for District from Lt. Col. Thompson (HQ ACC Highways and Bridges); Maj. Roucher is supposed to know all procedure and assist in coordination between C.C. District and ACC, and you should ask CC District for him to visit you and explain fully.

3. The A.A.S.S. has been abolished and State Highways now come under a Department of Genio Civile for LANC and TAMI, which has absorbed most of the A.A.S.S. engineers.

PROVINCIAL Roads are under Prefect's Provincial Engineer for normal maintenance, but Cogo del Genio Civile of Perugia deal with War Damage including Bridges.

4. Generally work falls into three categories

(a) Work ordered Direct by MILITARY in which case they are solely responsible for provision of finance.

(b) When Roads are still a responsibility of Military Dept of Military Department can be requested through ACC as agency in which case ACC are responsible for finance and supervision, Military supply transport and materials, and all orders to the contractors are given through ACC.

./.

-- 2 --

(with only two roads officers for the whole of LAOS and THAILAND such appreciate when Military officers working on road assist us in supervision as has been done on Route 6. - That is best arranged between Capt. Gentry and actual officer in charge of a section as has already been done for Route 2 with Maj. Gammal. - Care is required to prevent the Genio Civile and Contractor receiving contrary orders from the services.)

(111) When Roads of Military importance are definitely handed over and come entirely under ACC. - No roads in this region have been so handed over, I hear Route 6 will be shortly.

On your specific points.

1) In 4. (1) and 4. (11) I agree that CT decides the programme we may ask to undertake other work of Civil Interest to prepare for winter when you may have no direct interest.

In 4. (111) if we fail CT can tell HQ ACC he is not satisfied, and if necessary press the matter.

2) Except in emergency it is desirable to get Civil Engineer concerned to prepare project as he should know waterway required for maximum flood. -

3) Any Bridge over loft span has to be passed by us with plans to HQ ACC for approval. - Genio Civile have full instructions on method of submission (copy enclosed). In a Road classified as "Military" every Bridge plan before approval has to be approved by Military authority concerned (this is to ensure that Bridge is strong enough for Military Roads which may be far in excess of Civil Roads for the particular road). I would suggest that if when plans are prepared locally before submission you countersign the plans as approved it would save much time. -

When plans and estimates are prepared in HONG as is normal for State Roads, the normal procedure is the quickest namely from HQ ACC to HQ District.

4) Selection of Contractors asked to tender is normally made by Genio Civile, but we reserve the right of adding names and frequent, to do so with satisfactory results. - In early stages single tenders were accepted, but now for Bridges on policy we avoid it.

1842

and Contractor involving emergency orders from the services.)

(111) When Roads of Military importance are definitely bonded over and come entirely under ACC. - No roads in this region have been so bonded over, I fear Route 6 will be shortly.

On your specific points:

1) In 4. (1) and 4. (11) I agree that CR decides the programs we may ask to undertake other work of Civil interest to prepare for winter when you may have no direct interest.

In 4. (111) if we fail CR can tell HQ ACC he is not satisfied, and if necessary press the matter.

2) Except in Emergency it is desirable to get Civil Engineer concerned to prepare project as he should know roadway required for maximum flood. -

3) Any Bridge over MPT open has to be passed by us with plans to HQ ACC for approval. - Genlo Civile have full instructions on method of submission (copy enclosed). In a Bond classified as "Military" every Bridge plan before approval has to be approved by Military authority concerned (this is to ensure that Bridge is strong enough for Military Roads which may be far in excess of Civil Roads for the particular road). I would suggest that if when plans are prepared locally before submission you designate the plans as approved it would save much time. -

When plans and estimates are prepared in HQ ACC as is normal for State Roads, the normal procedure is the quickest namely from HQ ACC to HQ District.

1842
4) Selection of Contractors asked to tender is normally made by Genlo Civile, but we reserve the right of adding names and frequent to do so with satisfactory results. - In early stages single tenders were accepted, but now for Bridges on policy we avoid it.

./.

- 3 -

5) Our Contracts are between Genio Civile and contractor. When you order work and approve contract you are responsible for getting funds and paying bills, where we order it and approve contract we become responsible for providing funds and supervision. See CC/3 in 4511 and attached 10th September 1944 (copy attached).

6) Finance is very important, as at the moment in Perugia province the Genio Civile report they have received no release of funds and have approximately £. 60,000,000 of work in hand, most of it on verbal orders from MILITARY or ARMY officers.

When I took over here I found a similar position and it has been an uphill job to get works properly approved post-facto and without such approval no funds are released and work ceases or later will slow down and stop and clearing the part has seriously curtailed the outside inspections of my Highway officers with consequent delays on new works that should be initiated.

7) Your P.S. re SPILANO bridge noted.--

I hope this deals with all your points - In case you have NOT kept a copy of your D.O. to me I enclose one.

4 Sept. 44

Dear Colonel

I am getting good cooperation from the Genio Civile up here, but I can see that the Chief Engineer Signor Bevilacqua, who brings this to you is a bit confused about procedure and organization.

Subject to your agreement I have told him that I am responsible at present for maintenance and reconstruction of roads and bridges of MILITARY importance and that the procedure will be as follows:

- (1) I as CRE and the CE's rep. (ie rep. of CM District) will decide the programs of work.
- (2) Projects will be prepared either to my office or, more usually, by the Provincial Counterpart (i.e. A.A.S., Comunale or Provincial engineer).
- (3) These projects (unless very minor ones such as the rebuilding of a culvert on a transporter route along a country road) will be approved by CM District and by you. But in the case of urgent works the receipt of your approval need not be awaited before work proceeds.
- (4) The selection of a contractor and the letting of the contract will be done by the Genio Civile in conjunction with me. For speed single tenders may be accepted, but this will be the exception rather than the rule.
- (5) Contracts will be between the Genio Civile and the Contractor.
- (6) The above will have no effect on the present procedure for financial regularization.
If you agree could you tell Signor Bevilacqua that he can accept instructions from me on the above lines?
I think that is all he wants.

Yours sincerely

Even

1838

of MILITARY importance and that the procedure will be as follows:

- (1) I as CBE and the CC's rep. (ie rep. of CS (District)) will decide the programme of work.
- (2) Projects will be prepared either to my office or, more usually, by the Provincial Counterpart (i.e. A.A.S.S., Comandante or Provincial engineer).
- (3) These projects (unless very minor ones such as the rebuilding of a culvert on a transporter route along a country road) will be approved by CMI District and by you. But in the case of urgent works the receipt of your approval need not be awaited before work proceeds.
- (4) The selection of a contractor and the letting of the contract will be done by the Genio Civile in conjunction with me. For speed single tenders may be accepted, but this will be the exception rather than the rule.
- (5) Contracts will be between the Genio Civile and the Contractor.
- (6) The above will have no effect on the present procedure for financial regularisation.
If you agree could you tell Signor Bevilacqua that he can accept instructions from me on the above lines?
I think that is all he wants.

Yours sincerely

Owen

1838

P.S. I have at least one bridge (SPOINTE on Route 3) that is urgent. The project is nearly complete and I want to start as soon as a Bailey has been erected across the job.

HEADQUARTERS
ALLIED CONTROL COMMISSION
APO 394

G.ded.B.F./so

15 July 1944

TO : Ispettore Generale del Genio Civile
per il Lazio & Umbria.

SUBJECT: Instructions for Procedure on Works and Contracts.

FILE NO: R4/ENG/17(c).1

A. Procedure

(1) There will be three types of engineering work to be performed:

(a) Highway maintenance and Bridge Construction on Military Highway (accorded priorities I, II, or III);

(b) Minor Works of some military significance, highways or other works, initiated by C.R.Es. of Sub-Areas through Genio Civile, without reference to A.C.C. Regional Officers. In such cases the C.R.E. provides his own materials and is solely responsible.

(c) All other Regional work of a purely civilian character and not needed for military operations, whether requested by Military Authority or not.

(2) Priority will be given to (a) and (b) over (c) and only such controlled material as may be available after meeting the needs of (a) and (b) will be available for use on (c).

(3) In the case of (a) The carrying capacity of the bridges will be laid down by Military Authorities, likewise the standard of maintenance.

The designs will be prepared by Genio Civile and submitted to Regional Engineer (Roads Section), before action it has to receive approval of Army Authorities.

Trucks for Military Highway work will be provided through Military Districts until equipment is received.

60 trucks are expected but no date can be given.

The maintenance of any ACC military vehicles allotted for the work will be responsibility of Genio Civile under inspection of Regional Transport Office. You are required to make necessary preparations for receipt and care of these vehicles. Heavy repairs will be done by Military Workshops through Regional Transport Officer.

A. Procedure.

(1) There will be three types of engineering work to be performed:

- (a) Highway maintenance and Bridge Construction on Military Highway (accorded priorities I, II, or III);
- (b) Minor Works of some military significance, highways or other works, initiated by C.R.Es. of Sub-Areas through Genio Civile, without reference to A.C.C. Regional Officers. In such cases the C.R.E. provides his own materials and is solely responsible.

(c) All other Regional work of a purely civilian character and not needed for military operations, whether requested by Military Authority or not.

(2) Priority will be given to (a) and (b) over (c) and only such controlled material as may be available after meeting the needs of (a) and (b) will be available for use on (c).

(3) In the case of (a) The carrying capacity of the bridges will be laid down by Military Authorities, likewise the standard of maintenance.

The designs will be prepared by Genio Civile and submitted to Regional Engineer (Roads Section), before action it has to receive approval of Army Authorities.

Trucks for Military Highway work will be provided through Military Districts until equipment is received.

60 trucks are expected but no date can be given.

The maintenance of any ACC military vehicles allotted for the work will be responsibility of Genio Civile under inspection of Regional Transport Office. You are required to make necessary preparations for receipt and care of these vehicles. Heavy repairs will be done by Military Workshops through Regional Transport Officer.

(4) In the case of (c) please issue instructions to Capi del Genio Civile to render a report of each such work ordered to Provincial Commissioner for his information; 2 copies of report to be sent in to you one of which will be forwarded to Regional Engineer.

In the event of such work being no longer required by Military and abandoned by them, and the work is considered to be a Civil need (i.e. completion of Water Supply) the completion will be treated in normal way by submission of estimate and ACC/1 in quadruplicate where it will be considered on its merits with other Projects.

(5) Works under (c) Plans and estimates for all projects will be prepared either on instructions from Regional Engineer or his representative or on the initiative of Genio Civile.

All such projects have to be submitted to Regional Engineer for approval.

In the case of bridges over 10 ft. span all designs have to be submitted through Regional Engineer to ACC HQ (P.W.) for approval, such designs to be accompanied by calculations or reference to standard work.

If a project requires use of any controlled material it has to be submitted to HQ ACC for approval; in such cases only sketch plans and brief description and rough estimate together with list of controlled materials is required. Detailed Plans and estimates need not be prepared until preliminary approval has been obtained unless required by Regional Engineer.

This is to avoid waste of time in preparing schemes in detail for which no material is available.

(6) Controlled materials In all cases when a project is submitted whether in outline or detail, it will be accompanied by a list of controlled materials required.

The approximate list of controlled materials should be sufficiently comprehensive to avoid the question of availability of materials having to be reviewed again in principal when detailed demand is received. If however the approximate demand is unduly high it may involve the rejection of an essential scheme.

(7) Instructions for preparation of Projects

(a) Approximate detailed estimates will be prepared on the standard form used by Genio Civile signed by the responsible Official in accordance with normal Italian practices;

(b) Each project when submitted will be accompanied by Form ACC/1 prepared in quadruplicate and signed by the responsible Italian Engineer of Genio Civile.

Projects over Lire 1,000,000.- will be signed by the official who would sign a project for submission to the Minister of Public Work in normal times. Projects under 1,000,000.- lire may if so desired by Ispettore Generale be signed by the Ispettore Capo del Genio Civile.

In form ACC/1 under special remarks will be inserted either 'No controlled materials required' or 'list of controlled materials attached'.

(c) Controlled materials Enclosed are 80 copies of list of controlled materials. (Timber except sizes over 6" x 6" are NOT controlled in Region IV). 10 Sample copies of ACC/MAT are enclosed, quantities should be divided in monthly needs (4(a)(b)(c) MAT 10) when possible give location of materials (see 5(a) and (b) MAT 10)

together with list of controlled materials is required. Detailed Plans and estimates need ~~not~~ be prepared until preliminary approval has been obtained unless required by Regional Engineer.

This is to avoid waste of time in preparing schemes in detail for which no material is available.

- (6) Controlled materials In all cases when a project is submitted whether in outline or detail, it will be accompanied by a list of controlled materials required.
- The approximate list of controlled materials should be sufficiently comprehensive to avoid the question of availability of materials having to be reviewed again in principal when detailed demand is received. If however the approximate demand is unduly high it may involve the rejection of an essential scheme.

(7) Instructions for preparation of Projects

(a) Approximate detailed estimates will be prepared on the standard form used by Genio Civile signed by the responsible Official in accordance with normal Italian practices;

(b) Each project when submitted will be accompanied by Form ACC/1 prepared in quadruplicate and signed by the responsible Italian Engineer of Genio Civile.

Projects over Lire 1,000,000.- will be signed by the official who would sign a project for submission to the Minister of Public Work in normal times. Projects under 1,000,000.- lire may if so desired by Ispettore Generale be signed by the Ispettore Capo del Genio Civile.

In form ACC/1 under special remarks will be inserted either 'No controlled materials required' or 'list of controlled materials attached'.

(c) Controlled materials Enclosed are 80 copies of list of controlled materials. (Timber except sizes over 6" x 6" are NOT controlled in Region IV). 10 Sample copies of ACC/MAT are enclosed, quantities should be divided in monthly needs (4(a)(b)(c) MAT 10) when possible give location of materials (see 5(a) and (b) MAT 10)

Please assure that every engineer who may have to prepare a scheme is in possession of a copy in English and Italian.

The list accompanying the schemes will be in English.

- (8) (a) In Allied Military Government Territory which is the present position in ACC Region IV, no approval by Minister of Public Work is necessary, and the approved Form ACC/1 returned to Genio Civile is sufficient authority to proceed with work and obtain necessary funds from Intendenza di Finanza.

(b) In Italian Government Territory, the Regional Engineer will send to Genio Civile a letter approving the project in principal. The Genio Civile will forward the project to the Minister of Public Work, who after screening and approving will submit the project to ACC HQ (P.W.) for review and final approval.

(9) Powers granted to certain senior Engineers of Genio Civile under Regulation. (Decreto Reale No

To commence work on vitally urgent schemes in Emergency up to Lire 200.000.-

(a) When a representative of Regional Engineer is actually resident at Provincial Headquarters his approval will be obtained.

(b) When no representation of Regional Engineer is resident at Provincial Headquarters in this emergency period these powers will be fully used in all works effecting the Health of the Population and in such work as clearing water ways of debris of bridges, action to prevent flooding when necessary to be done before rains arrive; and, when the bridge is on a priority list approved by Provincial Commissioner or Regional Engineer or his representative, clearance of bridge foundations and rebuilding piers in dry weather to above flood level, and hard surface to diversions.

(c) In cases of small bridges NOT on priority list when a temporary bridge can be made entirely with local labour, transport and materials sufficient to meet or partly meet local need, the Capo del Genio Civile should be made responsible for initiating such local activity subject to agreement in writing of Provincial Commissioner.

Two conditions must be fulfilled:

- (a) The work in no way delays priority work;
- (b) Avoidance of temporary work that will shortly be pulled down to do permanent work and so waste money.

This is generally best met by such a bridge being on the diversion and NOT on the alignment of permanent bridge.

(10) Financial Attention of all Genio Civile and through them other Engineers and contractors will be directed to the fact that ultimately responsibility for financing projects will rest with the Italian Government.

With the vast volume of essential works it is the duty to his country of every Italian to confine estimates to all necessary expenditure.

To commence work on vitally urgent schemes in Emergency up to Lire 200.000.-

(a) When a representative of Regional Engineer is actually resident at Provincial Headquarters his approval will be obtained.

(b) When no representation of Regional Engineer is resident at Provincial Headquarters in this emergency period these powers will be fully used in all works effecting the Health of the Population and in such work as clearing water ways of debris of bridges, action to prevent flooding when necessary to be done before rains arrive; and, when the bridge is on a priority list approved by Provincial Commissioner or Regional Engineer or his representative, clearance of bridge foundations and rebuilding piers in dry weather to above flood level, and hard surface to diversions.

(c) In cases of small bridges NOT on priority list when a temporary bridge can be made entirely with local labour, transport and materials sufficient to meet or partly meet local need, the Capo del Genio Civile should be made responsible for initiating such local activity subject to agreement in writing of Provincial Commissioner.

Two conditions must be fulfilled:

(a) The work in no way delays priority work;

(b) Avoidance of temporary work that will shortly be pulled down to do permanent work and so waste money.

This is generally best met by such a bridge being on the diversion and NOT on the alignment of permanent bridge.

(10) Financial Attention of all Genio Civile and through them other Engineers and contractors will be directed to the fact that ultimately responsibility for financing projects will rest with the Italian Government.

With the vast volume of essential works it is the duty to his country of every Italian to confine estimates to essentials and out all LUXURY expenditure.

I wish it clearly understood that by this I do not advocate inferior work which by storing up future heavy maintenance can be the most wasteful and uneconomic form of expenditure. 183

Some temporary Emergency work will be inevitable such as for Sanitary or Health or Feeding but if by enduring hardship for a slightly longer period a job can be done which when completed will remain it is preferable. This wants balanced judgement in cases mentioned in para. 9 and your advice on any such cases will be welcomed.

(11) Professional Relations

Particularly in the area of Allied Military Government it is the duty of Allied Officers to ensure that priority is given to essential things and to ensure that works which effect our responsibilities are carried out thoroughly and expeditiously and funds and materials allotted used for the purposes stated.

Any instruction that may be necessary will be issued through your responsible Engineer and in NO case direct to contractors or subordinates.

Allied Officers and Officials have been instructed to give written authority for variations in an estimate or contract which will have to be taken into account in the final account of the contractor.

(12) Ruling Factors

The ruling factors which will decide whether work can be undertaken or not are likely to be MATERIALS, TOOLS, PLANT, TRANSPORT and later labour.

(13) Salvage

This will be one of the main sources of materials and as already mentioned at our meetings, schemes must be initiated by Genio Civile as the authorities responsible for War Damage.

(14) Contracts (The following instructions are laid down by ACC)

(a) The Normal Procedures will be to call for at least 3 tenders from reliable contractors for each PROJECT or part of a Project when split by trade or other reasons. This is particularly necessary in a time of fluctuating prices.

When very special circumstances arise less than 3 bids may be necessary in such cases prior approval will be obtained from Regional Engineer.

In case of Urgent Emergency work (under para. 9) time is most important and the best available man will be put on the work; such contract for emergency work will carry no promise for the contract for more extensive work.

Any such Emergency contract (up to limit of Lire 200.000.-) will be submitted immediately for confirmatory, approval as laid down above.

(b) To avoid delay the Genio Civile will at the time of submission of the estimate call for tenders.

through your responsible Engineer and in NO case direct to contractors or subordinates.

Allied Officers and Officials have been instructed to give written authority for variations in an estimate or contract which will have to be taken into account in the final account of the contractor.

(12) Ruling Factors

The ruling factors which will decide whether work can be undertaken or not are likely to be MATERIALS, TOOLS, PLANT, TRANSPORT and later labour.

(13) Salvage

This will be one of the main sources of materials and as already mentioned at our meetings, schemes must be initiated by Genio Civile as the authorities responsible for War Damage.

(14) Contracts (The following instructions are laid down by ACC)

(a) The Normal Procedures will be to call for at least 3 Tenders from reliable contractors for each PROJECT or part of a Project when split by trade or other reasons. This is particularly necessary in a time of fluctuating prices.

When very special circumstances arise less than 3 bids may be necessary in such cases prior approval will be obtained from Regional Engineer.

In case of Urgent Emergency work (under para. 9) time is most important and the best available men will be put on the work; such contract for emergency work will carry no promise for the contract for more extensive work.

Any such Emergency contract (up to limit of Lire 200.000.-) will be submitted immediately for confirmatory, approval as laid down above.

(b) To avoid delay the Genio Civile will at the time of submission of the estimate call for tenders.

(c) Instruction No 4 ACC HQ

(1) When submitting proposals to the Italian Engineers the contractors must, in addition to the technical requirements of the proposal, submit a complete list of all plant, equipment and materials available to him for this particular project and which he will use on the project. It must be clearly understood that the contractor will only list such plant, equipment and materials as he will use on this job and not all other plant, equipment and materials he may have and which may be used elsewhere. A definite date is to be set on which these proposals are to be received.

2. Contractors will submit only sealed bids to the Italian Engineers. The terms of these bids are not to be discussed with these engineers by the contractors, or reviewed by them prior to their official presentation by the contractor.

3. Upon receipt of these sealed bids the Italian Engineer will notify our Field Engineer, and these proposals are to be opened by our Field Engineer in the presence of the Italian Engineer.

4. In weighing these proposals these Engineers will be guided largely by the following two factors in the order given:

- (a) Availability of plant, equipment, and materials;
- (b) Cost, Responsibility, and standing of contractor;

5. Form AGC/2 is to be prepared in triplicate by the Field Engineer as the time bids are opened. All copies are to be forwarded through the Regional Engineer to this H.Q. After approval one copy will be retained by H.Q., one copy forwarded to the Military Authorities responsible for supplying critical items of material, etc. and one copy returned to the Regional Engineer as authority to award the contract.

(15) Supplementary Foods

Your attention is drawn to copy of letter from AGC (P.W. & U.) d. 10 June 1944.

(16) Hours of work

Work affecting military operations must be carried out regardless of hours. On other works until the conditions favourable to epidemics, such as Water Sewage, Unsanitary Debris, and Communications for distribution and collection of food have been overcome both immediate and in preparation for winter a large number of projects must be reconnoitred prepared and started and completed.

As only two months of good weather remain every effort must be made to get the works for the rehabilitation of Italy launched and long hours must be expected and accepted for the next month. If staff is insufficient additional engineers should be employed.

REPAIR WORKS ON THE VIA FALCIGNANA CAR TRACK.

ENGAGEMENT ACT

The undersigned Firm "SOC. IMPRESE INDUSTRIALI", Rome, Via Pirgo 20 (phone 71358-70202) will do the repair works on the car-track line Falcognana between cross-way of Ardratina and communal limit, with the following conditions:

1°) General dispositions and technical charges:

The contract for leasing out is coast plus and it is under the general Specification for leases of works depending from Public Works Ministry and approved with ministerial decree 28/5/1895 no. 350 with relative variations and by Regulations for Book-keeping Direction and Statal works testing approved with Royal Decree 15/1/1898 no. 556 and by the General Specification (I and III part) which regulate all the works leases and materials furnitures for constructions of Rome approved by Municipal (Town) Council the 30/7/1909 (Delib.No. 323) so that these conditions could be more favourable to the Administration giving the contract.

2) LEASE AMOUNT

Lease amount is foreseen L. 480,000. gross and this amount can be augmented or lessened without giving to the Firm the possibility of setting up any kind of claim or compensation.

3)) WORK BEGINNING AND TIME

The Firm has to begin the works the day fixed by the Office, otherwise the contract will be cancelled.

The Firm will carry off the works without any interruption in order to finish them in 35 days following the starting date.

Once this time is over every plant has to be cleared away on the road and every eventually consented road occupation removed.

4°) DEDUCTION FOR VOUCHER

For the voucher of engagements of this lease the firm will give the 5% on the credited amounts.

5°) Workmen wages.

The Firm must furnish good workmen and provided of all implements needing for the work.

Net pays settled by A.M.G. Command, to be given to workmen for Eight hours day work:

Commun workman	L. 65,00
Skilled workman	" 80,00
Foreman	" 90,00
Driver	" 90,00

For the hours over the night the hour pay increases 50%, no increase is allowed on the hollydays. The charges for social insurance and of any other kind, also those that are to be payed by workmen 8/11

- 2 -

dued following the current dispositions, will be repayed demostrating the firm all the payments she has done.

6°) TRANSPORTATIONS - Will be repayed:

a) Materials transportations with trucks filled, for each hundred kilos per Km; L. 0,85L

b) Trips with empty trucks L. 0,60. The load will be calculated according to the full capacity of the truck, and the distances according the shorter util ways. Said are included in the efficient truck furniture, and also in the furniture of the necessary fuel and lubricating /oil, and any other expense depending with the firms.

7°) PRICES OF MATERIALS Paving stone:

Stone m/m 40 to 70 the mc.	in quarry	L. 150,00
Stone m/m 20 to 40	" "	" 165,00
Stone m/m 15 to 30	" "	" 175,00
Stone m/m 5 to 15	" "	" 185,00
Broken stone	" "	" 110,00
Tuff stone	" "	" 70,00

The Bitumen necessary for works will be directly taken by the Firm from Allied Command Warehouses and the anticipated quantitatives will be given back by A.M.G.

8°) PAYMENTS

On request of Works Direction the Firm will provide to payment of bills for every kind of materials acquired by Technical Office for all necessities, and to payments of works carried off by other Firms; Payments will be effected by Contractor Administration with funds anticipated by A.M.G. as a reimbursement after demonstration of sums bestowed by the firm for salary, contributions, furnitures, transportations, (that appears from weekly and fifteenly notes) 25% growths for general expenses and furniture of implements useful to the firm and limiting at 8% growth for money anticipations. The Administration has every control on payments executed by the Firm which is the object of weekly notes.

The Firm is obliged to advise always and at once the office over the day, the place and the hour in which these payments will be effected.

9°) FINAL ACCOUNT

The final account will be done within three months from the finiscing works date and after being approved it will be provided to give back the guarantee deductions.

10) EXPENSES

Every expense relative at this act are incharged to the oversaid contractor, even comprise the income trucks.

C O P YSTEPS DEVELOPMENT TO EXECUTE AND APPROVE A WORK PROJECT

1. - Project drawing by competent Direction and approval by technical Office Director.
2. - Project revision and General Inspector of Technical Services approval.
3. - Drawing of proposal for deliberation and engagement on the expenses by the Office accounting.
4. - Situation filing to the General Secretary for the Administrative revision of deeds and successive forwarding.
5. - When the amount of the project exceeds L. 500.000, being the building franchise in private dealing, or L. 1.000.000 being the franchise private sale or auction sale, this scheme must be sent to the Public Works Ministry, for the technical approval.
6. - The proposal with the scheme approved by the Inspector (and if necessary by the Public Works Ministry) is filed to the Inside Ministry for the authorization of all expenses forecast by law.
7. - The preceding proposal issued, it comes back to the General Secretary of the Commune and from here it is filed to the General Accounting for the definite book value engagement.
8. - Proposal so prepared is sent for the assessor (deputy mayor) to sign, and after mayor signs it is published in the Albo Pretorio.
9. - Deeds go back to the proposing office which is charged to transmit them to the Contracts Office which does all necessary deeds to stipulate and register the contract with the Firm.
10. - Only after contract stipulated and book value verifications of all executed works one can pay the Firm.

INSTRUCTIONS ON POLICY OF ROAD BRIDGES RECONSTRUCTION.

See also Procedure Instructions dated 15th July 1944

At, 2, 5, 6 and 3.(a).

- 1.(a) Absolute Priority has to be given to Roads classified as MILITARY HIGHWAYS.

Only such materials and transport as is available after this priority need is met can be used on the other bridges.

There are likely to be insufficient for all bridges, although ACC. HQ. are NOT in a position to make a definite monthly allotment and it is NOT therefore possible to frame a definite policy based on known quantities that will be available.

- 1.(b) The routes so classified are Routes 1, 2, 3, 6, 7 and Route 4 from Rome to 35 Km. near PARA SABINA.

2. STATE Roads are dealt with by Regional Engineer Highway Officer direct with the Special Department of Genio Civile. 39 of these bridges are already started and due for completion before 1st November.

There are known to be approximately a further 100 bridges and retaining walls which will require rebuilding before floods start or because Bailey Bridges will be removed.

3. Bridges on other Road - (State roads NOT classified as MILITARY, Provinciali, Comuni, Consorziati).
 For reasons given above it is impossible to say how many can be undertaken, but technical consideration of materials, transport, labour, tools and plant appear to me to indicate NOT more than 20 per province.

a) As a start, Provincial Commissioner in consultation with local Capo del Genio Civile have been asked to submit a list of approx 20 bridges for each province in order of priority. In deciding the priority the following are some of the technical points that must be weighed:

- i) the quantity of controlled materials required.
- ii) transport required.
- iii) several small bridges may be easier than one large one.

1.(a) Absolute Priority has to be given to Roads classified as MILITARY HIGHWAYS.

Only such materials and transport as is available after this priority need is met can be used on the other bridges.

These are likely to be insufficient for all bridges, although ACC. HQ. are NOT in a position to make a definite monthly allotment and it is NOT therefore possible to frame a definite policy based on known quantities that will be available.

1.(b) The routes so classified are Routes 1,2,3,6,7 and Route 4 from Rome to 35 Km. near FARA SABINA.

2. STATE Roads are dealt with by Regional Engineer Highway Officer direct with the Special Department of Genio Civile.

39 of these bridges are already started and due for completion before 1st November.

There are known to be approximately a further 100 bridges and retaining walls which will require rebuilding before floods start or because Bailey Bridges will be removed.

3. Bridges on other Road - (State roads NOT classified as MILITARY, Provinciali, Comunal, Congressuali).

For reasons given above it is impossible to say how many can be undertaken, but technical consideration of materials, transport, labour, tools and plant appear to us to indicate NOT more than 20 per province.

a) As a start, Provincial Commissioner in consultation with local Capo del Genio Civile have been asked to submit a list of approx 20 bridges for each province in order of priority.

In deciding the priority the following are some of the technical points that must be weighed:

- i) the quantity of controlled materials required.
- ii) transport required.
- iii) several small bridges may be easier than one large one.
- iv) condition of roads over these bridges.
- v) whether a temporary bridge on a diversion is possible or impossible.
- vi) the effect on agriculture if insufficient ~~waterways~~ ^{waterways} under any existing temporary bridge which may result in serious flooding.
- vii) whether interruption of traffic or a diversion is likely to be prolonged or NOT.
- viii) they should be so selected that roads leading to and from main food or grain center should be possible in winter by civil MG of 3 to 5 ton.

To assist in forming an opinion on number of bridges that can be undertaken Genio Civile will prepare list of approx 20 selected bridges on attached form giving approximate figures and hand to Provincial Commissioner for transmission to Regional Engineer with their recommendations for priority (with copy to Genio Civile). Genio Civile will then have prepared and submit estimates for these bridges and these bridges only.

b) Remainder of Bridges.

this will leave from 30 to 200 bridges per province without provision.

- i) In some of these the traffic may be such that only animal or light car traffic is essential.
- ii) In other cases when by foresight short interruption are unimportant could remain diversions with improved surfaces and causeway that will be submerged in flood time.
- iii) In some cases the expenses of surfacing a diversion would exceed the cost of a bridge.
- iv) In some cases when an existing temporary bridge has insufficient waterway serious flooding may result sufficient to justify a new bridge even on a minor road.

Policy Provided materials, labour and transport can be found locally and no controlled materials are required the Engineer concerned to be encouraged to make the best possible provision. Estimates under £. 100,000.-- can be approved by Provincial Commissioner; over that amount they will have to be submitted through Genio Civile to Regional Engineer.

4. Retaining Walls When these are on unimportant road and further excavation into hillside is possible they should be left or built in dry stone.

5. Road Maintenance No road plant, e.g. steam roller, stonecrashers etc., can be expected on other than in Military Roads. WITMEN in large quantities will NOT be available.

TRANSPORT other than local cannot be expected. Every effort to be made if necessary by increasing Cantonieri or Contract to patch holes and reestablish drainage and at slack period in agriculture to use every available cart for stockpiling along roads.

In absence of stonecrashers, stones must be hand broken at road side. Supply of hammers must be prepared.

6. Materials Lime will be used instead of cement for masonry work except in special cases. Assume that all RAILLY bridges will be removed by Army.

1) In some of these the traffic may be such that only animal or light car traffic is essential.

ii) In other cases when by foresight short interruption are unimportant could remain diversions with improved surfaces and causeway that will be submerged in flood time.

iii) In some cases the expenses of surfacing a diversion would exceed the cost of a bridge.

iv) In some cases when an existing temporary bridge has insufficient waterway serious flooding may result sufficient to justify a new bridge even on a minor road.

Policy Provided materials, labour and transport can be found locally and NO controlled materials are required the Engineer concerned to be encouraged to make the best possible provision.

Estimates under £. 100,000.-- can be approved by Provincial Commissioner; over that amount they will have to be submitted through Genio Civile to Regional Engineer.

4. Retaining Walls When these are on unimportant road and further excavation into hillside is possible they should be left or built in dry stone.

5. Road Maintenance No road plant, e.g. steam roller, stonecrashers etc., can be expected on other than in Military Roads. EXTRAM in large quantities will NOT be available.

TRANSPORT other than local cannot be expected.

Every effort to be made if necessary by increasing Cantonieri or Contract to patch holes and reestablish drainage and at slack period in agriculture to use every available cart for stockpiling along roads.

In absence of stonecrashers, stones must be hand broken at road side. Supply of hammers must be prepared.

6. Materials Lime will be used instead of cement for masonry work except in special cases. Assume that all RAILWAY Bridges will be removed by Army.

1864

It is hoped that these notes will clarify the situation and free local initiative to get on with work, where permanent reconstruction is unlikely. It should also open the way to employ idle men usefully.

20 July 1944.

TO : HQ ACC (Public Works & Utilities Sub-Commission).
SUBJECT: Genio Civile Administration Funds.
FILE No: R4/ENG/17(c).1

1. Your ACC/108/PWU dated 15th July;
"Under consideration" is of no value.
What is absolutely necessary is sufficient funds placed at their disposal immediately to enable them to function.
2. Yesterday ACC/1 was returned by Genio Civile saying no funds could be obtained from Intendenza di Finanza on that authority. I understood at conference that it would be sufficient to obtain funds. It is not.
3. This has been also taken up with our Finance Office and arrangements made to have Mod. SB5 (sample enclosed) filled in, which I hope will be more successful.
There was no mention in Procedure Notes of any such form, nor any such instruction sent to this office, and work without funds will stop.
4. Can a clear instruction be issued, and pending issue of such instruction, a provisional sum placed at disposal of Ispettorato Generali to cover the period (perhaps a lengthy one) while this essential matter is "under consideration"?

Griffiths

Lt. Col. R.E.

Deputy Regional Engineer.

ENCLOSURE:

Sample of Mod. SB5

What is this project? not military!
