SUBJECT: Approval of Projects

To ; Public Works and Utilities Sub-Commission, Allied Commission
APO 394, U. S. Army

1. Forwarded herewith for approval complete with ACC/1 forms are projects on the "Cesanaese" Provincial road in accordance with request of the Engineering Section, AMQ, letter dated 4 March 1945. All these projects are in Pesaro Province, and have been previously discussed by Col. Lettmer and Col. Thompson. Due to urgency of the work bids have been taken and work was to have started yesterday. This is not a military road. Controlled materials will be required. At a later date projects for reconstruction of bridges on communal roads in the same area as requested by the above-mentioned letter will be submitted. Projects are as follows:

— Bridge on Earchiola "Fosso"	MR S245574	L 890.00
— Bridge on "Fosso Anore"	MR S250560	L 500.000
— Bridge on Rio Ferro	MR S177583	L1.320.000
— Bridge on "Fosso Rialdone"	MR S238557	L1.000.000
— Bridge on Rio Pulcione	MR S205533	L 630.000
— Bridge on "Fosso S. Gervasio"	MR S293625	L 490.000
— Bridge on Grosifisso	MR S242570	L 525.000
— Bridge on Roccale	MR S213547	L 735.000
— Bridge on Rio Grande	MR S265613	L1.630.000

2. Also forwarded herewith for approval are ACC/2's on project for the reconstruction of a bridge over the Flastra River, SS No. 78, Macerata Province, MR 3514042, cost L 920.000, together with papers substantiating reward.

REPORT ON GENIO CIVILE

078 / AM / 1 / PWV

Suggested organization of Genio Civile

756

I Duties

Marche Reg 54

A) Ispettore

1) Screen all projects

- a) Determine necessity of proposed work
- b) Check design, specifications and prices.
- c) Coordinate projects for the compartment in the use of materials, rejecting projects or determining priority where limited materials are available.

2) General Supervision

- a) Selection of Capo Genio Civile and Capo Compartimentale U.S.Vi.S.
- b) Responsible for efficiency of these officials and their staffs, expedite and check their activities.
 - I) Replace or suggest replacement of inefficient or non-capable personnel.
- c) Responsible for all weekly and monthly reports.
- d) Check and consolidate requests for controlled items and transmit forward.

B) Capo Genio Civile or Capo Compartimentale U.S.Vi.S.

1) Plans and Operations

- a) Survey of War Damage
- b) Survey of required maintenance
- c) Preparation of projects
- d) Taking of bids and letting contracts

4313

./.

Page n.2

- e) Supervise, inspect and coordinate jobs under construction
- f) Approve partial and final payments.

2) Materials and Transport

- a) Survey of location and quantities of construction materials
- b) Location of and requirements for operation of material manufacturing plants.
- c) Collection of salvaged material from war damaged structures and maintenance of storage yard.
- d) Availability and allocation of controlled materials
- e) Availability and allocation of transport.

"3) Administration and Statistics

- a) Preparation of all types of reports
- b) Accounting
- c) Records and correspondence.
- d) Miscellaneous office functions.

II Spheres of Activity

A) U.S.V.I.S.

- 1) Reconstruction and maintenance of roads and bridges on State Roads

B) Genio Civile

- 1) Reconstruction and maintenance of war damage to provincial and communal roads and bridges
- 2) Reconstruction and repairs of war damages to public buildings and utilities.
- 3) Repair of war damage to houses.
- 4) Demolition of dangerous structures.
- 5) Recovery and use of materials
- 6) Rivers and harbors
- 7) Bonifica.

4312

BACKGROUND

In normal time the Genio Civile was concerned only with work on river and construction of public buildings involving the use of Italian Government funds. State Roads were the function of the A.A.S.S.. Provincial Roads and buildings were the function of the Provincial Engineer. Communal Roads and buildings were the function of the communal Engineer. In addition to assuming the duties of these other agencies, (necessary because state funds are the only funds for construction) the volume of work due to war damage has increased manifold over normal.

In essence the Genio Civile is a closed civil service. Seniority, not ability, determines the individual engineer's rating. Consequently, it is the rule rather than the exception, that they are small men in small jobs, content with their lot and unable to grasp the enormity of their present position, the responsibility it entails, or begin to solve its many problems. In short, the work has completely overwhelmed them. The system which they are a part of stifles individual initiative, aggressiveness, and fosters a desire to please everyone-governmental officials, local officials, contractors etc. with the result that they please no one. Never having had an organization of any size, they are unable to delegate authority or effect an efficient setup to carry out present demands. Realizing that the present situation is temporary, thus soon again they will be directly under the Italian government it is a near impossibility for the Public Works Officer to establish effective A.M.G. control. This is further handicapped by the fact that all payrolls are controlled by Rome and there is no local control even under A.M.G. Conversely it is true that an inefficient engineer can be discharged but not removed from the payroll, consequently collects his pay without interruption and as before. Under such a system there is no incentive for the individual.

EXISTING DEFICIENCIES

- 1) Adequate quarters for civilian agencies are not available.
- 2) Transport is practically nil and becoming worse daily. Lack of tires accounts primarily for this condition. Proper supervision, prompt preparation of projects, and consequent expedition is impossible because of this shortage.
- 3) Such items as blueprint paper are not in their possession. The result is a 40% or greater waste of labor in the preparation

- of each project due to tedious and mechanical reproduction of plans by individual tracing. This enhances chance of error and reduces volume of work performed.
- 4) Rates of pay are so low that it is necessary for employees of Genio Civile to sell personal belongings or do additional private work in order to buy the necessities of life. The newly established wage scale for common labor is higher than that of a provincial Capo Genio Civile. Result-employees seize every opportunity to leave their job and increase their income. On occasions inspections have found office empty of all personnel.
 - 5) The Ispettore and Capo Genio Civile are receiving direct orders from the Ministry of Public Works. Many times these are contrary to policy of the Regional Engineer. They delay action, especially on personnel matters, until authority is received from the Ministry of Public Works. By trying to serve two masters their performance is unsatisfactory to the A.M.G. Public Works Officer.
 - 6) Staffs are in all cases too small for present volume of work. Staffs are not properly organized.

C O N C L U S I O N S

From the information set forth heretofore it can be seen that a reorganization of the Genio Civile from the Ministry of Public Works to the lowest employee is essential to proper functioning in this emergency. This is neither possible nor good policy. However, essential public works can be expedited and the existing situation eased by establishing policies and organization listed below:

- A) In A.M.G. Area the Regional Engineer or his representative shall have the authority to order expansion of staffs, remove incompetent Capos or other officials including removal from payroll. Competent engineers shall be eligible for employment without regard to seniority rights or any other bars which the Genio Civile have established to insure their "closed shop" organization.
- B) The public works Officer shall have authority to employ on the A.M.G. payroll engineers or administrators without previous Genio Civile affiliation. Such employment shall be made when he feels it necessary to supplement or replace the Ispettore or Capo Genio Civile. Any such employees shall receive the highest authorized wage. The duties of such employees shall be those outlined in Section I, entitled "Duties".

4313

- 0) Genio Civile shall attempt to perform only work which they are able to supervise. Supervision is directly controlled by communication. Their only means of communication in A.M. G. area is transportation. This must be made available.

TO : Public Works and Utilities Sub-Commission,
Allied Commission, APO 394.
REF : 516/13/2
DATE : 8 March 1945.

1. Transmitted herewith for approval are projects with ACC/1's on military road as listed below. Two of these projects require controlled material. The large bridge requires brick which though not controlled are a critical material.

- / Reconstruction of bridge^{on} Esino River at Chiarodovo,
SS.76. MR S.184262.....L.21.000.000.=
- Reconstruction of Fossaccio River bridge SS.77
(no controlled materials) MR S.630239....." 1.880.000.= ✓
- Reconstruction 7 culverts 1m. span SS.77 as
follows: MR S.533092, S.540100, S.540012, S.574184,
S.566257, S.574186.....L. 920.000.= ✓

2. Transmitted herewith for approval are projects with ACC/1's in Ascoli Piceno. These projects are not on military roads. Cement, iron and coal are controlled material required.

- Restoration of all weather diversion Porto Car-
tare - Ascoli Piceno road MR B.652715.....L. 1.390.000.= ✓
- Reconstruction of "Riccione" River bridge
MR B.723721....." 1.863.000.= ✓

3. Transmitted herewith for approval with ACC/1's are projects in Ancona Province. They are all for repairs to important provincial roads. They require no controlled materials.

- Repairs on Giuncare road MR S.238385 to S.260335"3.300.000.= ✓
- Repairs on Arceviense road (1st Section) MR
S.370584 to S. 313500..... "6.000.000.=
- Repairs on Arceviense road (2d section) MR.
S.313500 to S.114310..... "5.495.000.= ✓

:/:

TO : Public Works and Utilities Sub-Commission
Allied Commission, APO 394
SUBJECT : Project for Approval.
REF : 516/13/2

1. Forwarded herewith for approval is a project in Ancona Province.

It is for the reconstruction of a reinforced concrete bridge on the Misa River in Senigallia.

2. Approval is requested for the following reasons:

a. All traffic in Senigallia must at present move over a reconstructed bridge on S.S. 16, thus resulting in traffic jams.

b. The bridge is essential to the cement factory because a small railroad crossed on the bridge. The railroad connects the factory and the raw materials plant.

3. A concrete bridge is necessary to stand flood waters.

4. 101 Tons. of cement will be required. The cement factory owner will furnish the cement from his factory at Civitavecchia upon receipt of the necessary permit.

5. Enclosed is project complete with ACC/1's ~~and~~ ^{and} 10's

SUBJECT: Repair of Hospital in Ancona
FROM: P.W. & U. Officer

- 1) Submitted herewith is a project for the repair to the Civil Hospital of Ancona amounting to 4.200.000 Lire.
- 2) The project does not include materials or transport, the Ispettore declares that unless these two items be furnished from Military sources it will be impossible to carry out the Project.
- 3) This is a very urgently needed work and should be done if at all possible.

ABRUZZI MARCHE REGION

OGGETTO: ANCONA.- Restauro dei fabbricati di pertinenza dell'Ospedale Civile di Ancona. L. 4.200.000,00.

Il complesso dei fabbricati, che costituiscono il centro ospitaliero di Ancona, ha subito, in seguito agli eventi bellici, danni di varia natura che hanno menomato - in misura più o meno grave - l'efficienza dei singoli padiglioni, con non trascurabili conseguenze per il funzionamento dei servizi.

La necessità e l'urgenza di restituire al nosocomio la sua piena efficienza appare evidente se si considera che, nelle attuali contingenze, la quasi totalità della cittadinanza non è in grado di provvedere alla cura degli ammalati, di forme anche appena gravi, a domicilio, dove, al disagio dell'affollamento e della promiscuità, si aggiunge spesso quello della deficienza dei più elementari servizi igienici.

Nell'unita perizia, a firma del Dott. Ing. Francesco Po-desti, presentato dall'Amministrazione dell'Ospedale Civile, vengono previsti i necessari lavori di restauro, che si riassumono come appresso:

- a) riparazione dei tetti, dei soffitti ed eventuali parziali ricostruzioni degli stessi;

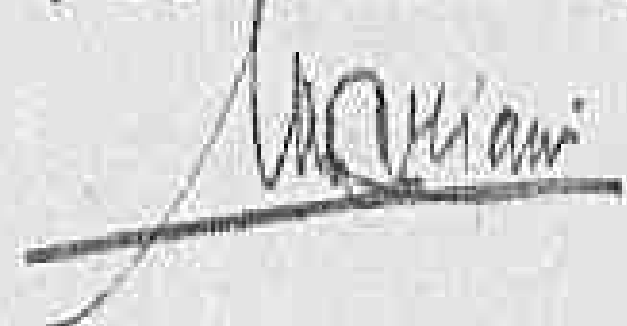

- b) ricostruzione di muri in foglio;
- c) riparazione degli infissi e posa in opera di vetri;
- d) riparazione degli impianti elettrici;
- e) tinteggiature e verniciature.

L'Ing. progettista avverte che nella determinazione dei prezzi unitari è partito dal presupposto che i materiali occorrenti ed i mezzi di trasporto vengano forniti dalle Autorità Alleate. In caso contrario l'accollo dei lavori risulterebbe presso che impossibile per le difficoltà quasi insuperabili che incontrano attualmente le Imprese costruttrici nell'approvvigionamento dei materiali.

Le previsioni risultano, sia dal punto di vista quantitativo che qualitativo, congrue ed ammissibili e l'ammontare dei lavori appare regolarmente dedotto.

Trasmetto pertanto la perizia, che è integrata dai moduli ACC/1, S.B.5 e MAT 10, con parere favorevole e viva raccomandazione per l'approvazione.

SUBJECT: Revetment work on River Tronto, Ascoli P. Province.
FROM: P.W. & U. Officer The Marche

22 57/-
JAN 1945

- 1) Enclosed find proposed project for revetment work to control the scouring of the sides of the Tronto River between Ascoli Piceno and the Adriatic.
- 2) This work was included in a project which was under way up to about three years ago. Since that time no work of this nature has been done on this river. In some places the river is cutting the bank back to very near the Road which parallels it. However it is my opinion that the river will not reach the road during this rain season.
- 3) No controlled materials are required.
- 4) This is not a Military project.

ABRUZZI MARCHE REGION

OGGETTO: ANCONA - Istituto Autonomo per le Case Popolari.- Ri-
parazione dei fabbricati del quartiere Montirozzo di Ancona.
1° lotto: L. 850.000,00 - 2° lotto: 290.000,00.

Le unite perizie, redatte a cura dell'Istituto Autonomo Case Popolari per la Provincia di Ancona, hanno per oggetto la riparazione dei fabbricati, di pertinenza dell'Istituto stesso, che sorgono nella città di Ancona, in località Montirozzo.

I lavori previsti si riassumono come appresso:

- a) riparazione di coperture a tetto o di terrazze;
- b) ricostruzione o riparazione di soffitti;
- c) ricostruzione di infissi o loro riparazione e fornitura vetri;
- d) lavori vari.

Per il 1° lotto, comprendente n. 11 edifici con 54 appartamenti, di complessivi vani 170, la spesa prevista è di lire 850.000,00.

Per il II° lotto, costituito da n. 15 edifici con 56 alloggi e 150 vani, la spesa risulta di L. 290.000,00.

Vengono esclusi dalle previsioni i lavori concernenti la ricostruzione degli stabili distrutti o comunque gravemente

./.

4269

danneggiati.

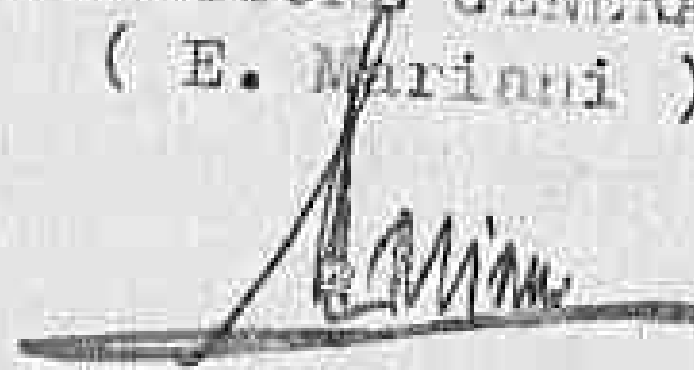

Gli interventi proposti tendono ad assicurare le necessarie condizioni di abitabilità ai fabbricati e di evitarne, inoltre, ulteriori e più gravi danni.

I singoli importi appaiono regolarmente dedotto, con la applicazione di prezzi unitari ammissibili.

L'esecuzione dei lavori ha carattere di grande urgenza. Trattasi, infatti, di edifici di carattere eminentemente popolare, e le modeste famiglie di lavoratori che li occupano attendono da tempo sollievo al grave disagio derivante dall'insufficiente riparo dei rigori invernali.

Trasmetto quindi le due perizie, che sono corredate dai mod. AC/1, S.B.5 e MAT 10, con parere favorevole e viva personale raccomandazione per l'approvazione.

PESARO URBINO PROVINCE
ABRUZZI - MARCHE REGION

Ref : PU/F/D/2
SUBJECT: Budgeting, General
TO : Regional Finance Officer H.Q. Abruzzi-Marche Region
A.M.G./A.C.

1. In accordance with instructions given by the R.F.O. at the recent conference at Region H.Q., details have been obtained of three advance to Communes by "Spearhead".

2. A copy of the letter from the Prefettura (with translation) is attached which enumerates the amounts advanced, and the purposes for which the money was used.

3. It would ^{be} appreciated if guidance could be given as to the proper method of dealing with sums already spent on roads and bridges. Also in these, and other, cases where roads and bridges projects have been commenced, further money is now required to prevent cessation of work. Should such projects now fall under ACC. letter 13194/F dated 23 SEP 44 "War Damage" and be taken up by Genio Civile as a new project? If so a certain amount of delay is bound to occur and work may stop in some cases.

4. In this respect, your R5/512/D/1 dated 15 Nov. 44 is acknowledged as requested and reference is made to Para 2 of that letter. Can credits be authorised to prevent stoppage of work in the cases referred to in Para 3 above? If so, please indicate the correct budgetary treatment of such credits.

5. It is emphasised that the projects referred to in this letter are local projects, and bear no relation to military road projects commenced under 8 Army. In the latter respect it is desired to report that the 8 Army Roads Officer applied to this office on 16 Nov. 44 for further financing of projects under his control.

He was informed that this office no longer had authority to Finance his project and he was recommended to contact the Regional Roads Officer concerning the financing of unfinished Army projects.

Subsequently a signal was received from A.M.G. 8 Army
:/:

2)

reference R/1970 dated 17 Nov.44 ordering this office to continue payments on roads and bridges and saying that authority was HQ, AC, and that confirmation would be forthcoming from Region HQ. Presumably the signal refers to unfinished 8 Army road and bridges contracts, only and not the local projects referred to earlier in this letter, although the signal is not clear on this point.

Signed: L.F. Aldis Capt.R.A.

Provincial Finance Officer
