22/ September 1944

Subject: CAFFARO BRIDGE

To : LT. COL. THOMPSON, ROME

Herewith Form AOC/1 in triplicate, in respect of the Caffaro Bridge on Highway 19.

This is a supplementary estimate.

The original estimate was submitted to you in July and approved, its serial no. 222.

The reason of the supplementary estimate is due to the fact that the original one was based on the then market prices for labour and materials. When the bid was made, some time after the original estimate, prices had risen considerably, and the lowest bid was accepted. Therefore it is necessary for an increase of allotment to cover the extra cost.

For : LT. COL. THOMPSON

1. Attached is Form A.C.C./1 in respect of the Provincial road which is used by military to by pass Potenza.
2. It is a macadam road. C.F. 2 District has agreed to its being resurfaced.
3. There are two culverts on this road which the Genio Civile wants to rebuild. Both these culverts are in good shape and I have told him I consider it unnecessary to rebuild them as cement is in short supply.
4. His reasons were:
 - (a) To take away a bend. This is a slight bend and the view of oncoming traffic is not obstructed.
 - (b) To demolish the second culvert and build it higher to take away a slight dip in the road.
5. If you agree to this, the amount of the estimate can be reduced according by L. 554.000.--.

1. The following bridges on the above road, as proposed by AASS Potenza, will be able to take all military loads and the designs are therefore approved.

- (a) Bridge at Km 393 plus 150.
- (b) Bridge over F Castelgrande.
- (c) Bridge at Km 392 plus 470.

2. As a result of the extensive damage done to the bridges on this road in Campania it has been decided by HQ AAI to accept the present classification (class 9). Consequently the reconstruction of the bridges on the section in Lucania is not now urgently required. It is considered, however, that reconstruction should be undertaken as and when cement is available.

The bridges over T. MECCADINARO and T. DON CICCIO as proposed by A.A.S.S. Potenza will be able to take all military loads and the designs are therefore approved.

These bridges should be regarded as of higher priority than the bridges on the Potenza - S. Angelo road.

The District priority is, however, low and it is very possible that the works may be held up at times for lack of cement, if there is no improvement in future cement supplies.
