TRANSLATION

18 SEP Recd

Rome, 16 September 1944

To the Allied Control Commission

N A P L E S

I have been requested by the Superior of the Institute of the Sacred Heart in Naples, Via Francesco Crispi n. 4, to ask the Allied Control Commission for the quick execution of the plan presented on July 30th 1944 to the Corps of Engineers (Genio Civile) of Naples, (War Damages Section), for the restoring and the transformation into school-rooms, of the left wing of the building, reserved for the Sisters, less destroyed by the German air-raid of March 15th 1944, which nearly destroyed the rest of the building.

I should be most grateful to the Allied Control Commission for seeing that the necessary works were done without delay, thus satisfying the good sisters and the numerous mothers, who ask that the schools, already regularly acknowledged by the Law-Decree of May 11th 1938, should be re-opened without delay.

Trusting in your interest in this deserving Institution, and thanking you, I remain,

Sincerely yours,

/s/ Ludovico Chigi Albani

Gr. M. Of the S.M.O. of Malta

Roma, 16 Settembre 1944

All'Onorevole Commissione Alleata di
Controllo

N A P O L I

Sono stato vivamente pregato dalla Superiora dell'Istituto del Sacro Cuore in Napoli, Via Francesco Crispi, 4, di intercedere presso codesta On. Commissione Alleata di Controllo affinché venga data sollecitamente esecuzione al progetto presentato il 30 Luglio 1944 al Genio Civile di Napoli (Sezione Danni di Guerra) per il restauro e la trasformazione in aule scolastiche dell'ala sinistra del fabbricato, riservata alle Suore, meno danneggiata dall'incursione aerea tedesca del 15 Marzo 1944, che distrusse quasi il resto del fabbricato.

Sarei particolarmente grato a codesta On. Commissione Alleata di Controllo se volesse disporre al più presto i lavori occorrenti, soddisfacendo così il vivo desiderio di quelle buone Suore e delle numerose Mamme di tutti i ceti, che chiedono insistentemente che le scuole, già regolarmente riconosciute con Decreto Legge dell'11 Maggio 1938, vengano riaperte al più presto.

Sicuro dell'alto interessamento di codesta On. Commissione per questa opera benemerita, ringrazio vivamente.

27 August 1944

SUBJECT: Bulk Grain Machinery at Castellamare

TO : Headquarters, Allied Control Commission, APO 394
 (attn.: Vice-President, Economic Section)

1. At the Shipping Diversion Meeting No. 5 held at Caserta the LST Representative drew attention to the poor state of the elevator machinery and the consequent delay to wheat ships. In this connection a report was made earlier that salt had been discharged by means of the elevators and that the weight had broken one of the belts.
2. It was ruled at the meeting referred to above that ACC were responsible for the machinery and it is therefore requested that every means be used to expedite repairs. Doubtless assistance can be obtained from the local DOPE of No. 3 District. M & TN, AFHQ, are taking steps to clear Torre Annunziata for the discharge of wheat ships with the aim of giving Castellamare a rest while repairs are carried out. If this interval can be gained every advantage should be taken to make a thorough overhaul.
3. As to salt unloading, it is recommended that the ACC officer in charge at Castellamare be given instructions to refuse a similar discharge should the occasion arise.
4. Please keep this office informed of the progress of the repairs.

For the Assistant Chief of Staff, G-5:

J. E. HUTCHINGS,
 Colonel, Infantry,
 Economics & Supply.

GB/2/1p

8 June 1944

Subject: Sanatorium GIOVANNI DA PROCIDA - SALERNO

To : Lt-Col. V.S. Thompson.

I visited Salerno on 3/4 June 44 to consider the scheme submitted for the proposed repairs and renovations to the Sanatorium, rendered necessary by war damage.

A meeting was arranged with Sig. Galeone, Chief Engineer, Technical Dept of Istituto Nazionale della Previdenza Sociale, under whose auspices the Sanatorium is administered. The schedule of quantities was examined and an inspection made of the building and proposed works accompanied by Sig. Galeone.

General Information.

The Sanatorium is for the treatment of tubercular patients, with a capacity for 800 beds. At present its accommodation is limited to approximately, 150 patients, male, female and children.

The building is a modern one, incorporating most recent features of specialised hospital design. This specialist character necessitates the use of large quantities of glass.

Damage was caused by shell and mortar fire the building receiving many direct hits. Owing to the large amount of glazed partitions internally, the damage was widespread, and some thousands of square feet of glass shattered.

This presents some difficulty as the main divisions between the male and female wings were opaque glass partitions and will have to be replaced before full use can be made of accommodation.

Observations on the works.

The scheme as submitted, estimated to cost L.3.800.000 includes all works necessary to restore the main building, out-buildings and grounds to the original condition, and far exceeds immediate requirements to make the building habitable.

Some substitute for internal glazing, to a height say, of 6'0" could be used.

The Schedule of Quantities has been checked through, and items deleted which are considered unnecessary at the present stage of reconstruction.

Conclusion.

I am of the opinion that an expenditure of L.1.900.000 would cover the cost of essential works.

A list of materials required to be released or supplied was submitted and has been amended to conform with requirements.

G. BOUCHER
Major.

Lt Col Thompson

The above recommendation for a much reduced program appears reasonable. Please take this up with Lt. Col. Hensley with a view to having the reduced program carried out

WAH/lp

II May 1944

Subject: Building inspection E.& S. Div. Region III

To : Lt.Col.Laboon.

1. The three prospective warehouses were visited, Castel Nuovo was rejected on account of the difficulty of access. Excelsior Garage was rejected because of the impossibility of getting trucks while loaded into the space.

2. The space under the Auto Strada in back of the Silk factory would be acceptable for storage of newsprint paper but considerable work will have to be done. To make this into a warehouse for one commodity for civilian use will require the completion of the wall 10' x 250' in length with 3 windows, a wall 20' x 225' with 3 doors of sufficient width to permit entry of large rolls of paper. An approach road will have to be graded and the floor graded.

The approach roadway will be acceptable in dry weather as the material packs well. It is assumed that the temporary bridge at west end of the space will remain in place.

No waterproofing will be necessary on the viaduct except to repair one expansion joint. There are no indications of water seeping through the viaduct.

This will provide storage for 500 tons of newsprint. Addition at space will have to be found for the other commodities.

Copy to Lt.Col. Thompson —
