1. Region Emilia has been using your map "Showing A.C.C. Regional Boundaries" to considerably advantage for several months and we hope that you will not think us ungrateful if we point out that it is erroneous in one respect.

2. If you will look into the matter you will see that the Province of Forli at no point is contiguous with the Province of Bologna. Ravenna Province has a "panhandle" separating Ravenna and Bologna and extending clear through to the Florence Province line. This is not shown on the map, with the result that Ravenna Province is portrayed as being somewhat smaller and Forli Province and/or Bologna Province somewhat larger proportionately than they are in fact. You may wish to make this correction in the next edition of your map.

To : Regional Engineer Lombardia Region.

1. Several days ago when you were at Headquarters it was agreed that copies of maps showing the Provincial Boundaries in Lombardia Region would be obtained and sent to you.

2. Some difficulty has been experienced in locating maps of this nature, however twelve copies each of the Italian Road Maps Series, sheets 2, 4, 5, 7, and 8 have been obtained and the Provincial Boundaries on each are being overlined in red ink. Already ~~three~~ ⁸ sets have been completed and are being transmitted herewith. The other ⁹ copies will be sent as soon as available.

3. Previous to overlining these maps two tracings were prepared of Italy Road Maps showing only Provincial Boundaries. It is not believed now that prints of these drawings will be satisfactory for your purpose. However several prints of each of these drawings are now being made and will be sent to you. More will be available if you desire.
