AVAILABILITY REPORT NO. 3

1. Enclosed herewith is a list of materials which are neither controlled nor restricted and the allocation of which is consequently not affected by any of the Committees of the AFLR (ITALIAN) BOARD.

2. This information is circulated for the use of addressees and has been compiled from miscellaneous reports recently received in this office.

3. Services requiring any of these listed commodities are warned that as they are not frozen in any way, it is quite conceivable that they may have been disposed of since being reported by forward officers of this Section.

SUBJECT: AFLR(I)B Committees

TO : Directors
Industry Sub-Commission
Public Works & Utilities Sub-Commission
Commerce Sub-Commission
Food Sub-Commission
Labor Sub-Commission

1. It is presumed that proposals submitted by AC to committees of Allied Forces Local Resources (Italian) Board are worth pursuing to the highest level, and that if defeated at committee level they should be brought up again at the next Allied Forces Local Resources (Italian) Board meeting, at which the minutes of the committee meetings, held in the interim, come up for consideration. Appeals to the Board from actions taken by its committees may also be necessary in other cases where the AC viewpoint is over-ridden by the Committee or by its Chairman.

2. In every case where an AC proposal is rejected, or AC objects to action taken by a committee of the AFLR(I) B, the AC representative should do two things: a) Make sure the record of the meeting reflects AC's viewpoint, and b) prepare a minority report to be submitted by AC to AFLR Section as soon as possible after the Committee meeting concerned.

3. The minority report should be submitted to Economic Section within forty-eight hours of the meeting. It should be addressed to AFLRS and prepared for my signature.

4. It is not possible to indicate a stereotyped form in which minority reports should be prepared, owing to the variety of problems which may arise. In each case, however, the AC objection should summarize the reasons for the position taken by the AC representative and the consequences (to the Armed Forces and/or the civilian life of Italy) if the AC viewpoint does not prevail. It should also state the intention of AC to raise the matter at the next meeting of the Board.

ALLIED FORCE LOCAL RESOURCES (ITALIAN) BOARD

MISCELLANEOUS PURPOSES COMMITTEE - MINUTES

1. The tenth meeting of the Miscellaneous Purposes Committee was held at 0930 hrs SATURDAY 14 OCT 44 in the Cafeteria Conference Room HQ ACC ROME.

Present: Major F.W.STAINWAIT GPA PBS Chairman

Representatives of:

C-in-C Med.
214 Gp RAF
ACC
ORD (Br)
CAI PBS
CE PBS

In Attendance:

GPA COMZONE
Representatives of the Hemp Control Office.
Chiefs of Section, A.F.L.R.S.

2. The Minutes of the previous meeting held on 8 SEP 44 were approved.

3. Changes in membership of the Committee were considered and the following revised membership was recommended to the Board:-

Chairman: Major F.W.STAINWAIT GPA PBS

Members: Representatives of:

C-in-C Med.
ORD (Br) ARMY
CG COMZONE
HQ 214 Gp RAF
ACC

It was decided that the Army, Naval and Air Forces Sub-Commissions be invited to become members of the Committee and to submit separate bids for their requirements direct to AFLRS.

4. No matters arose for discussion out of the meeting of the Board held on 14 SEP 44.

5. It was agreed that the Hemp Control should arrange for the production of sacks in NOVEMBER to be reduced to 91,000, the materials and plant thereby freed to be used to produce as much canvas as possible of a special light type. It was estimated that approximately 150,000 sq.metres of this light type canvas would be available.

6. Reports were received from ACC on the availabilities of the following items and allocations for the month of NOVEMBER were made against demands of interested services as follows:-

Ref. ACC/5615/TED

3rd October, 1944.

SUBJECT: Industrial Coordination Committee.

TO : Acting Chief,
Economic Section.

1. As requested, we have prepared this Memorandum outlining the views of this Sub-Commission with regard to the establishment of the proposed Industrial Coordination Committee of the A.F.H.Q. Board.

2. Terms of Reference: We submit the following outline of what we consider should be the terms of reference of the proposed Committee:-

(a) To determine an equitable allocation of "production potential" as between the needs of the Allied Armies and Italian civilian economy.

(b) To ensure that the needs of the Allied armies for stocks of raw materials, partly finished products and finished products and equipment are supplied in accordance with a pre-determined programme which should allow for the maximum preservation of Italian industrial economy.

3. Policy: Under the terms of reference enumerated above it is suggested that the functions of the Committee would fall under the following heads:-

(a) The division of the various factories into two groups. The first group being for those that are available to the armed forces for requisition, should the armed forces so desire, and the second being a list of factories which should be immune from requisition on the grounds of their products being essential to the civilian economy.

(b) To give orders for the preparation of stock inventories in factories in the second group enumerated above, and to consider such inventories with a view to determining what portion of the stocks should be considered surplus and therefore available for allocation to the armed forces.

4. Representation of A.C.C. on the Committee: It is submitted that if possible both the Industry Sub-Commission and the Public Works and Utilities Sub-Commission should have a representative on this Committee, and that if

Declassified E.O. 12356 Section 3.3/NND No. 785019

possible higher authority in A.C.C. should have the chairmanship, which otherwise should fall to G.H.Q. A.F.H.Q.

5. The Italian Government has already put forward proposals to this Sub-Commission that in the case of large combines such as Fiat, with many different factories under their control, it would be desirable, even in advance of liberation, to determine which individual factories should be available to the armed forces, and which should be guaranteed immunity from requisition. This Sub-Commission views this proposal with favour but foresees difficulty in the adoption of such a PLAN owing to the paucity of accurate information as to the state of the factories immediately prior to liberation.

6. In conclusion, it is felt that if the terms of reference of the Industrial Coordination Committee are roughly on the lines indicated in this memorandum, and if A.C.C. has strong representation on the Committee, the creation of this Committee should be of great value in minimising the economic distress which is the inevitable result of military operations AND the presence of armies of occupation in Italy. Therefore it is felt that A.C.C. should give every encouragement towards the establishment of such a Committee.

ALLIED FORCE LOCAL RESOURCES (ITALIAN) BOARD

ENGINEERING MATERIALS COMMITTEE - AGENDA

The fifteenth meeting of the Engineering Materials Committee will be held at 0930 hours on TUESDAY, 3 OCT 44, in the Allied Force Local Resources Section Conference Room, 5th floor, 45/46 Via delle Botteghe Oscure, ROME, to consider the following Agenda:-

1. Minutes of the fourteenth meeting held on 5 SEP 44.

2. In view of the Board having passed from HQ AAI to AFHQ to consider any changes in membership of the Committee.

3. To consider any matters arising out of the meeting of the Board held on 14 SEP 44.

4. To make allocations against reported availabilities of controlled materials.

5. To receive from A.F.L.R.S. the consolidated requirements of all services for steel production from the TERNI and ILVA plants for the month of NOVEMBER.

6. To consider the present list of controlled engineering materials (Appendix 'A' attached) and in connection with HQ, ACC Commerce Sub-Commission letter ACC/5030/Commerce dated 30 AUG (Appendix 'B' attached) to decide :-

   (a) whether any revision of the list is advisable

   (b) if so, to present to the Board a revised list of Engineering Materials.

7. Any other business.

8. To set a date for the next meeting.

S.J.B. LOUDEN
Captain,
Secretary,
Allied Force Local Resources (Italian) Board

LIST OF CONTROLLED ENGINEERING MATERIALS

I Metals: Ferrous

Billets and Ingots
Cable and Wire
Machine and tool steel
Structural steel
Steel of all kinds

II Metals: Non-Ferrous

Aluminium
Antimony
Brass
Copper
Chromium
Lead in all forms
Pure Mercury
Molybdenum
Monel metal
Nickel
Solder
Tin
White metal for bearings

III Timber

Standing Timber in the Gargano Promontary
Bulk Timber, over 6" x 5"
Constructional Timber, smallest dimension 3" up to 6" x 6"
Structural material, smallest dimension under 3"
Logs
Plywood
Sleepers or RR Ties

IV Other Building Materials

Cement
Varnish
Linseed and Linseed Oil
Paint
Pigments for Paint

V Electrical Materials

Accumulators
Batteries
Copper and Aluminium Conductors
Electric Light Bulbs
Electric Light Fittings
Insulators
Jointing Composition
Motors
Portable Generators
Sulphuric Acid
Switch Gear
Transformers
Transformers Oil
Welding Rods
Wires and Cables

VI Industrial Gases and Chemicals

Acetylene
Oxygen

ALLIED CONTROL COMMISSION
COMMERCE SUB-COMMISSION
APO 394

EHG/rc

Ref. ACC/5030/Commerce

30 August 1944

SUBJECT : Controlled Materials - Requisitioning & Blocking.

TO : Local Resources Section
c/o HQ AAI

1. Attached is copy of a letter, reference ACC/4014/11/L dated 24 August 44, received from Legal Sub-Commission of this HQ. Enclosed also is copy of this Sub-Commission's letter ACC/5030/Com dated 16 Aug.44, which will give the key to Legal Sub-Commission's replies.

2. Your attention is drawn to Legal Sub-Commission's para.2, Sub-paras (a) (b) (c) (d) and particularly (e)

3. Consideration of the opinion therein expressed inclines this Sub-Commission to believe that it is advisable to shorten the list of Controlled Materials for Italian Government Territory (ACC) for the following reasons:-

(a) There are probably unallocated surpluses of many controlled materials in Italian Territory, such as in southern Italy, that have been blocked and reported, much of which could be returned to the Italian Economy and made available for reconstruction schemes. These surpluses are so far from points of Army usage that transport difficulties render them of little value.

(b) Large new inventories are becoming available in northern industrial areas.

(c) Shortening of the list of controlled materials will simplify the re-blocking procedure which is necessary when ACC territory is handed over to the Italian Government.

(d) The prompt agreement of the Italians to the re-blocking of a short list of vitally important materials will be more easily obtained.

4. Enclosed is the list of controlled materials and it is recommended that only those underlined in red should be retained.

5. An early reply on this matter will be appreciated, for as it will be understood, the situation at the moment can lead to much misunderstanding and this Sub-Commission is anxious to have the matter clarified with the Italian Government with the least possible delay.

16 August 1944

SUBJECT : Requisition and Freezing.

TO : Legal Sub-Commission, HQ ACC
(Attn : Lt.Col.Crossman)

1. This Sub-Commission is seeking clarification of the legal position in territories handed over to Italian Government administration.

2. For this reason, it would be greatly appreciated if answers could be given to the following questions :

a. Is ACC permitted directly to freeze goods in Italian Govt. administrated areas and what is procedure?

b. Is the Army permitted to freeze goods in Italian Govt. administrated areas and what is procedure?

c. Is the Army permitted directly to requisition property or goods in Italian Govt. administrated areas?

d. Is ACC permitted to requisition:

I. Private property or goods.
II. Municipal or Provincial Property or goods.
III. National property or goods.

e. Do frozen stocks (i.e. frozen by AMG) become unfrozen automatically upon the change over from AMG to ACC. If so, can the Italian Govt. be instructed to re-freeze? Can ACC Regional or Provincial Officers advise Prefects or Sindaci to freeze directly without reference to higher Italian Authority?

/S/ W.P.Evans

24 August 44.

SUBJECT : Requisitioning and Freezing.

TO : Commerce Sub-Commission.

1. This Sub-Commission has considered your ACC/5030/Com of 16 Aug.44.

2. Please be advised that in our opinion the answers to the questions raised are:-

(A) All legislation in Italian Government territory is handled directly by the Italian Government. ACC is not permitted to take direct action to freeze goods in this territory.

(B) No.

(C) The power to requisition is specifically reserved to the Allied Forces under the restoration terms. As a matter of policy the requisition must be made by the Italian authorities. See AAI Administrative Instruction No.48, para.3.(Ref.AAI/3064/A (o) of 8 Aug 44).

(D) Subject to (C) above.

I and II. Requisitions of private or municipal property or goods is permitted provided the property or goods requisitioned are really necessary for the army of occupation. Requisition of this class of property or goods is not permitted merely to supply the army's general needs.

III. In strict law there is no "requisition" of national property or goods; In Military Government territory such property and goods can be seized and in Italian Government territory there is a considerable quantity of national property (e.g. Government offices) which for obvious reasons cannot be taken over. In any particular case when it was necessary to obtain possession of national property or goods no doubt the necessary arrangements would be made with the Italian Government.

(E) All AMG legislation and orders terminate automatically on handover unless they are renewed by action of the Italian Government. Therefore unless such action be taken, stocks frozen by AMG automatically thaw. The Italian Government can be requested to re-freeze them : should it refuse, the matter becomes a question of

(E) All AMG legislation and orders terminate automatically on handover unless they are renewed by action of the Italian Government. Therefore unless such action be taken, stocks frozen by AMG automatically thaw. The Italian Government can be requested to refreeze them : should it refuse, the matter becomes a question of policy to be decided between HQ ACC and the Italian Government since HQ ACC possess the power, if necessary, to enforce their requests.

6287-

The question of the level upon which freezing orders are made is a matter of policy. It appears to us that normally such orders would be a matter of over-all policy and we do not think that objection could reasonably be taken to a prefect or sindaco who wished to obtain his superior Italian official's views before issuing an order of this nature.

(Sgd) Richard H. Wilmer, Colonel, CAC.,
Acting Chief Legal Officer.

STEEL HOOPS IN BUNDLES - Tensile strength 23/28 tons per square inch.

From 10 mm x 2 mm to 110 mm x 3 mm 163 Tons.

STEEL HOOPS IN COILS

mm.	23/28 tons Tensile
20 x 6	540 Kgs.
70 x 2	13,000
80 x 2	1,200
75 x 2	6,430
	21, 170 Kgs.

STEEL FOR SAW BLADES

mm.	Tensile Strength 23/28 tons per square inch
110 x 3	1,300 Kgs.
100 x 3-2/10	43,000
	44,300 Kgs.

STEEL HALF-ROUND BARS

From 10 mm x 5 mm to 50 mm x 25 mm 67 Tons.

STEEL SQUARE BARS

From 5mm x 5 mm to 70 mm x 70 mm 118 Tons

MILD STEEL CHANNELS

mm.	23/28 tons Tensile
25 x 12 x 4	4,000 Kgs.
30 x 15 x 4	4,800

Declassified E.O. 12356 Section 3.3/NND No. 785019

80 x 2	1,200
75 x 2	6,430
	21, 170 Kgs.

STEEL FOR SAW BLADES

mm.	Tensile Strength 23/28 tons per square inch
110 x 3	1,300 Kgs.
100 x 3-2/10	43,000
	44,300 Kgs.

STEEL HALF-ROUND BARS

From 10 mm x 5 mm to 50 mm x 25 mm — 67 Tons.

STEEL SQUARE BARS

From 5mm x 5 mm to 70 mm x 72 mm — 118 Tons

MILD STEEL CHANNELS

mm.	23/28 tons Tensile
25 x 12 x 4	4,000 Kgs.
30 x 15 x 4	4,800
30 x 15 x 5	3,000

Labour & Wages Control Committee
Miscellaneous Purposes Committee

and representatives of: RN (C-in-C Med)
G-5 AFHQ
AFLRS, AFHQ.
AFA (Br), AAI.
FA, RAF.

2. The Minutes of the thirteenth meeting, held on 17 JULY 44, were received and approved.

3. The proposed change in the Chairmanship of the Labour & Wages Control Committee was considered by the Board and in view of the opinion of ACC (their letter ACC/5004/Com, dated 4 AUG 44, refers) expressing complete satisfaction with the present Chairman and recommending his continuance in the position of Chairman, it was decided to take no further action in this matter.

4. The Board decided to establish a Committee on Prices with the following terms of reference:-

(i) To examine the question of prices paid for all local resources with a view to making recommendations as to whether a limit could be fixed on prices paid in the form of a percentage increase over September 1943 prices:- 6268

(a) in regard to Service purchases
(b) in regard to all purchases

In the event of (b) being considered practicable, the recommendation, if approved, would be in the form of a/

Declassified E.O. 12356 Section 3.3/NND No. 785019

a suggestion to ACC. Also in the event of (b) being found practicable:-

(ii) To determine what the percentage increase should be.

(iii) To determine, from time to time, whether any valid exceptions should be made to this ceiling percentage increase.

The constitution of the Committee to be as follows:-

Chairman: A nominee of ACC

Members: DW, HQ AAI.

and representatives of: CG, PBS.
"Q," HQ AAI.
G-4, HQ AAI.
AFA, HQ AAI.

It was recommended to the Committee that a suitable member of the Italian Government be co-opted to assist them in their deliberations.

5. Reports were received from the Chairman of the following Committees and recommendations, as submitted, were approved:-

(a) Engineering Materials Committee
(b) Electric Power Committee
(c) Miscellaneous Purposes Committee
(d) Food Supply Committee

6. A report was received from the Chairman of the Labour & Wages Control Committee and the recommendations submitted by the Committee were approved with the following exceptions which were withdrawn at the request of the Chairman of the Committee:-

(a) At the request of AAFSC/MFO it was recommended to the Board that approval be given for the formation of an Italian Auxiliary Corps to be attached to the USAAF.

(b) Letter 1047/4/01, dated 1 JULY 44, issued by HQ AAI was received. The Committee considered that certain provisions of this letter were not strictly in accord with AFHQ Adv Adm Sch Administrative Instruction No. 24 and it was recommended to the Board that these provisions be either amended or rescinded.

7. A report was received from ACC on the Control of Wages and is attached at Appendix "A."

The Board decided that it was necessary to control wages in the interests of uniformity of action among the Allied Armed Forces. If the present wage scale was found by ACC to be too low, the Board would consider sympathetically any proposals that ACC cared to submit for-

Declassified E.O. 12356 Section 3.3/NND No. 785019

It was recommended to the Committee that a suitable member of the Italian Government be co-opted to assist them in their deliberations.

5. Reports were received from the Chairman of the following Committees and recommendations, as submitted, were approved:-

(a) Engineering Materials Committee
(b) Electric Power Committee
(c) Miscellaneous Purposes Committee
(d) Food Supply Committee

6. A report was received from the Chairman of the Labour & Wages Control Committee and the recommendations submitted by the Committee were approved with the following exceptions which were withdrawn at the request of the Chairman of the Committee:-

(a) At the request of AAFSC/MTO it was recommended to the Board that approval be given for the formation of an Italian Auxiliary Corps to be attached to the USAAF.

(b) Letter 1047/4/01, dated 1 JULY 44, issued by HQ AAI was received. The Committee considered that certain provisions of this letter were not strictly in accord with AFHQ Adv Adm Sch Administrative Instruction No. 24 and it was recommended to the Board that these provisions be either amended or rescinded.

7. A report was received from ACC on the Control of Wages and is attached at Appendix "A."

The Board decided that it was necessary to control wages in the interests of uniformity of action among the Allied Armed Forces. If the present wage scale was found by ACC to be too low, the Board would consider sympathetically any proposals that ACC cared to submit for:-

(a) an increase in existing wage scales,

(b) a method of ensuring compliance by civilian contractors employed by the Allied Armed Forces with established wage rates.

8. A report on the progress of negotiations for the re-organisation of the AAI AFLR Boards was presented by the Vice-Chairmen. As AFHQ were considering this problem, the Board decided to await the result of their deliberations before discussing the matter further. Meanwhile the AFLR (Italian) Board are to continue controlling the allocation of local resources for the Mainland of ITALY.

9. A report was received from ACC on the present situation regarding AFHQ Administrative Memorandum No.95, modified by Administrative Memorandum No.31. The Board took note of the action being taken by AFHQ and hoped that an early decision would/

Declassified E.O. 12356 Section 3.3/NND No. 785019

would be made and that special care would be taken to ensure that any such decision should not hamper the successful procurement of local resources operating under existing procedure.

10. A report on ship's tonnage saved by Services, resulting from purchases of local resources during the period OCTOBER 1943 to JUNE 1944 inclusive, was received and is attached at Appendix "B."

11. It was reported to the Board that in spite of instructions having been issued to clear the areas surrounding retting ponds, difficulties were still being experienced in obtaining sufficient space for the successful retting and scutching of the hemp crop. "Q" and G-4 AAI undertook to investigate the instructions issued and to supplement them if necessary.

12. The next meeting of the Board will be held on MONDAY, 25 SEPT 44, in the Local Resources conference room, Main HQ AAI, and the Chairman reserved the right to summon a Special Meeting to announce and make effective the AFHQ decisions regarding the reorganisation of the AAI Boards.

HEADQUARTERS
ALLIED CONTROL COMMISSION
LABOUR SUB-COMMISSION
APO 394

LAB 091.461 19 August 1944

SUBJECT: Control of Wages

TO: Allied Local Resources Board

1. Attached are descriptions of two instances of wages being paid illegally to employees. The first deals with a glass factory in Naples, and the second with a brewery concern having breweries in Bari and Naples. The facts in each case are self-explanatory and are set forth in the attached case documents.

2. It is highly probable that these two cases are representative of a whole structure of wage violations which could be uncovered if there were an adequate labour staff or a functioning inspectional service in the Italian Government. The discovery and the proving of wage violation is most difficult since it is common knowledge that many employers maintain two or more sets of books and that both employers and employees are reluctant to tell the truth about the wages paid and received.

3. The Labour Sub-Commission of Allied Control Commission raised the problem of wage enforcement with the Labour and Wages Control Committee and sought its advice as to what steps should be taken for enforcement. The issues raised were of such a character that the problem was referred to the Allied Local Resources Board for further consideration.

4. The Labour Sub-Commission was unwilling to initiate an enforcement programme in these two cases because the output was almost exclusively for military authorities. Enforcement under these circumstances seemed to call for the correlative action of all interested parties.

5. The issues raised by this problem of which the two cases submitted are only examples are very clear:-

(a) If the legal wage structure is enforced, there would probably be a strike with an attendant stoppage of work which might seriously affect the military.

(b) If wage contracts are not enforced, word will spread throughout Italy that no enforcing action is being taken, wages will rise above the Armed Forces wage scale, and the result will have an adverse effect upon the manpower needs of the Allied Armies in Italy.

6. Advice is requested from the Board as to the line of action which should be taken in the enforcement of wage policy under circumstances typified by the two cases presented. In the consideration of this problem, the following additional facts should be kept in mind:-

(b) If wage contracts are not enforced, word will spread throughout Italy that no enforcing action is being taken, wages will rise above the Armed Forces wage scale, and the result will have an adverse effect upon the manpower needs of the Allied Armies in Italy.

6. Advice is requested from the Board as to the line of action which should be taken in the enforcement of wage policy under circumstances typified by the two cases presented. In the consideration of this problem, the following additional facts should be kept in mind:-

(a) Wages in relation to prices in Italy to-day are very low. It is variously estimated that the cost of maintaining a family of 5 in food alone is from 200 to 500 per cent greater than is the normal earnings of a common labourer.

(b) The low wages now being paid to workmen in Italy has become so serious that practically all labouring people are united in their request for higher wages. Unless something can be done to reduce prices and increase the supply of consumer goods, it will not be possible to withstand the pressure for increasing wages even though such action will be inflationary.

(c) The Labour Sub-Commission expects to propose to the Labour and Wages Control Committee an upward adjustment in the wages paid to the direct employees of the Allied Armies in Italy, especially in Rome and the northern industrial areas.

(d)/

Declassified E.O. 12356 Section 3.3/NND No. 785019

(d) If the proposal to increase Allied Force wages is accepted, it will make possible the alleviation of some of the distress which the Italian workman now faces. Allied Force wages are now used as a ceiling control over wages, and a modest upward adjustment in the Allied Force wage schedules will make it possible to permit some upward adjustment in industrial wages generally.

(Sgd.) J.T.R. BAIN Colonel,
Director,
Labour Sub-Commission.

CASE NUMBER ONE

GLASS FACTORIES

1. On or about May 30, 1944, representatives of management, labour and the Provincial Labour Office in Naples met to settle a wage dispute that had arisen in a number of small glass factories. The meeting resulted in a wage adjustment agreement to increase wages by 40% as of 22 May, 1944.

2. This wage adjustment agreement was set aside as being illegal. It was entered into without the approval of higher authority and was in direct opposition to the ACC policy of "Holding the line" on the wage front. Before setting the agreement aside it was necessary to investigate the facts in the case.

3. This investigation brought out the following facts of interest for the purpose of this report:-

(a) The plants were under contract to the Armed Forces engaged in the manufacture of critical supplies for them;

(b) An unauthorised wage increase had been given the workers by the employers in January 1944, which was greatly above that permitted under the AMG wage increase orders. The increases given at that time were very substantial. (See exhibit "A" attached).

4. If the policy of "Holding the line" is going to be followed the unauthorised wages set in January 1944 should be cancelled and the wages rolled back to their original legal level.

5. Such action will, in all probability:

(a) Cause a strike;

(b) Stop vital production for the Armed Forces.

6. In this instance it should be kept in mind that glass workers are, for the most part, highly specialized and skilled workmen. The Armed Force wage rates do not provide parallel categories of skilled rates. Hence, the control over the wages must stem from the old recognized collective contracts augmented by the AMG wage increase order. This control would result in a wage scale that is somewhat under the Armed Force wage scale. (See third column of figures in Exhibit "A" attached).

---oOooo---

Declassified E.O. 12356 Section 3.3/NND No. 785019

2. This wage adjustment agreement was set aside as being illegal. It was entered into without the approval of higher authority and was in direct opposition to the NCC policy of "Holding the line" on the wage front. Before setting the agreement aside it was necessary to investigate the facts in the case.

3. This investigation brought out the following facts of interest for the purpose of this report:-

(a) The plants were under contract to the Armed Forces engaged in the manufacture of critical supplies for them;

(b) An unauthorised wage increase had been given the workers by the employers in January 1944, which was greatly above that permitted under the AMF wage increase orders. The increases given at that time were very substantial. (See exhibit "A" attached).

4. If the policy of "Holding the line" is going to be followed the unauthorised wages set in January 1944 should be cancelled and the wages rolled back to their original legal level.

28 July 1944

CASE NUMBER TWO

BREWERY WAGE AGREEMENTS

1. On 24 March 1944 representatives of management and Labour in a Brewery in Bari reached an agreement to adjust wages upward which resulted in giving women and boys a 15 L. per day bonus and the three categories of skilled, semi-skilled and unskilled workmen 30 L. per day bonus.

2. The agreement was "approved" for the DADL in the absence of any labour representative from either ACC or AMG. There is indication that serious trouble might have resulted if the wages had not been advanced at that time.

3. Regardless of the unquestioned good faith of the representative of the DADL the wage increase must be looked upon as being illegal in the sense that it was a violation of wage stabilization orders of ACC/AMG and was at no time submitted either to the Italian Government nor to ACC for mediation and adjustment.

4. The wages resulting from this "illegal" agreement have been paid since 24 March 1944. They are not excessive and for the most part are actually under the Armed Force wage scale for comparable skills.

5. On 25 May 1944 the workers in the same Company in a Naples branch, hearing of the agreement in Bari demanded an increase in wages. The proposed increase was based on the Bari increase plus an additional amount "because cost of living is higher in Naples." Specifically, the proposal suggests that the following increase be given:-

(a)	Shop workers:	1. Men or women under 18	- L 27 per day
		2. Men over 18	- L 60 " "
(b)	Office employees:	1. Women	- L 40 per day
		2. Men	- L 70 " "

All increases were to be effective from 16 March 1944.

6. An actual pay-roll inspection of the wages now being paid by this brewery in Naples indicates that the net wage is considerably higher than permitted under collective contracts. There is considerable doubt as to whether or not the wage shown in that exhibit reflect the actual situation. Exhibit "B" reveals the differences among the wages claimed for Bari, the collective contract medium wage and the wage actually being received by the different categories of workers in Naples. This actual or "real wage includes a 'cost' of living indemnity," illegal in character, unapproved in principle and excessive in amount. The medium wage shown in the second column would be roughly the amount due the workmen under a strict interpretation of the law.

Declassified E.O. 12356 Section 3.3/NND No. 785019

2. The agreement was "approved" for the BADL in the absence of any labour representative from either ACC or AMG. There is indication that serious trouble might have resulted if the wages had not been advanced at that time.

3. Regardless of the unquestioned good faith of the representative of the BADL the wage increase must be looked upon as being illegal in the sense that it was a violation of wage stabilization orders of ACC/AMG and was at no time submitted either to the Italian Government nor to ACC for mediation and adjustment.

4. The wages resulting from this "illegal" agreement have been paid since 24 March 1944. They are not excessive and for the most part are actually under the Armed Force wage scale for comparable skills.

5. On 25 May 1944 the workers in the same Company in a Naples branch, hearing of the agreement in Bari demanded an increase in wages. The proposed increase was based on the Bari increase plus an additional amount "because cost of living is higher in Naples." Specifically, the proposal suggests that the following increase be given:-

(a)	Shop workers:	1. Men or women under 18	- L 27 per day
		2. Men over 18	- L 60 " "
(b)	Office employees:	1. Women	- L 40 per day
		2. Men	- L 70 " "

All increases were to be effective from 16 March 1944.

6. An actual pay-roll inspection of the wages now being paid by this brewery in Naples indicates that the net wage is considerably higher than permitted under collective contracts. There is considerable doubt as to whether or not the wage shown in that exhibit reflect the actual situation. Exhibit "B" reveals the differences among the wages claimed for Bari, the collective contract medium wage and the wage actually being received by the different categories of workers in Naples. This actual or "real wage includes a 'cost of living indemnity'" illegal in character, unapproved in principle and excessive in amount. The medium wage shown in the second column would be roughly the amount due the workmen under a strict interpretation of the law.

7. In this situation the requested increase by the Naples workers has not been allowed but the "cost of living indemnity" item was apparently substituted for it without the approval or knowledge of higher authority.

8. To roll back the wages by the cancellation of the increases would:-

(a) Probably cause a strike, and

(b) Stop the production of beer for the Armed Forces.

CE PBS
ACC
ORD (Br)
DGMR
Tn (Br)

In Attendance:- Vice-Chairman (Am) (Allied Force Local Resources
Vice-Chairman (Br) ((Italian) Board

2. The minutes of the twelfth meeting were received and approved.

3. No matters arose for discussion from the meeting of the Board held on the 17 JULY 44.

4. Availabilities of sulphuric acid were received from ACC and the following allocations made to interested Services:-

	Battery Acid	Commercial
214 Gp. RAF	7 Tons	
ACC	20 "	
ORD (Br)	175 "	
PBS	100 "	
DW		40 Tons
	302 Tons	40 Tons

5. Allocation was made of some 17,000 tons of controlled materials and the necessary release notes are being issued by the Local Resources Section.

6. Consolidated requirements of steel against the production of the Terni and Ilva plants were received and passed to the Sub-Committee established to decide on rolling programmes.

7. Sorvice requirements of mercury were received and the following allocations made:-

Medical (Br)	1,250 lbs.
ACC	5 tons
DGMR	1,200 lbs.
RAF	120 " and 1 cylinder
ORD (Br)	2 tons
AAFSC/MTO	400 lbs.

6261

The/

Declassified E.O. 12356 Section 3.3/NND No. 785019

The remaining stock, together with any additional availabilities, to be presented to the next meeting, when the surplus available for export would be decided.

8. The inventory of stocks of controlled items lying at the Silurificio Torpedo Works, Baia, was dealt with under para.5 above.

9. HQ 8 Army letter M 3405/1/RE, dated 10 JULY 44, was received and considered. It was recommended to the Board that any service requirements of controlled materials in army areas be submitted to the Local Resources Section who would approach the Army HQ concerned to ascertain the availability of the material in question before issuing a release note.

10. DW AAI letter 1873/DW, dated 16 JULY 44, regarding contract prices was received and considered. The Committee recommended to the Board that the proposals outlined in para.4 of the above quoted letter be accepted, and ACC were asked to expedite action regarding the fixing of prices as agreed at the tenth meeting of the Engineering Materials Committee held on 5 JUNE 44.

11. It was agreed that allocations could be made by the Local Resources Section against these availabilities still remaining, from the quantities notified by ACC, to those Services whose bids were received too late for consideration.

12. The Committee decided that the Chairman of the Industrial Gases Sub-Committee should continue to be an officer nominated by ORD (Br).

13. The Committee accepted ORD (Br) request that the S.M.I. Acetylene Plant at Castellammare should be considered as a W.D. installation and that ORD (Br) were entitled to move it as and when required.

14. The Minutes of the meeting of the Industrial Gases Sub-Committee, held on 3 AUG 44, were received and accepted (copies circulated at Appendix "A").

15. The R.N. representative stated that an inventory was being prepared of the stocks of steel at the Cantieri Navali Riuniti, Ancona. Meanwhile the Committee authorised the R.N. to draw on those stocks to meet essential repair and reconstruction work.

16. The fourteenth meeting of the Committee will be held at 10.00 hours, TUESDAY, 5 SEPT 44, in the Local Resources Conference Room, HQ AA I.

Declassified E.O. 12356 Section 3.3/NND No. 785019

ALLIED FORCES LOCAL RESOURCES (ITALIAN) BOARD.

ENGINEERING MATERIALS COMMITTEE

Minutes of Industrial Gases Sub - Committee.

1. A meeting of the sub-committee was held at H.Q., A.A.I. at 14.30 hours on Thursday 3rd August, 1944.

Present:

Capt. A.F. Britton. R.A.F.	214 Group R.A.F.
Lt.Cmdr. (E) W.G. Thomson. R.N.V.R.	FOWIT.
R.F. Macdonald.	P.B.S.
Dawson.	AAFSC/MTO.
S. Schultz.	AAFSC/MTO.
J.H.T. Jones.	ORD (Br).
R.K.J. Burgess.	ORD (Br). Secretary.

2. [redacted] reported that the FIDO (Rome) plant was giving an output of 1,000,000 cu.ft. monthly and that issues were being made on the basis of the allocation approved for this plant i.e. 33⅓% each to R.N., P.B.S. and ORD(Br). As the Navy had failed to take up their full allocation additional issues to P.B.S. for stockpiling in the Naples area had been possible.

3. ORD(Br) further reported that the PAPIGNO (Terni) plant was now in operation under RAOC personnel and giving an output of approx. 2,000,000 cu.ft. per month. This could be raised to 4,000,000 cu.ft. per month by 24 hour working but as the gas produced was below breathing oxygen specification the present output was sufficient to provide for all requirements of commercial oxygen not forthcoming from other plants. Issues were being made to P.B.S. withir the limits of their ability to arrange delivery of cylinders to Terni for refilling and subsequent collection.

4. It was accepted that whilst the production of commercial oxygen was now adequate to provide for their requirements both P.B.S. and ORD(Br) were faced with considerable difficulty in arranging transport for the gas over a long and congested L. of C. owing to the heavy calls made by U.S.A.A.C. on production in the Naples area where both P.B.S. and ORD(Br) requirements were in excess of their allocations from local plants.

5. U.S.A.A.C. and R.A.F. stressed their urgent need for further allocations from plants in the Naples area due to the absence of any supplies in the Foggia area and the unsuitability for breathing purposes of the oxygen produced at Rome and Terni plants.

6. The estimated requirements of breathing oxygen for U.S.A.A.C. and R.A.F. during the month of August as compared with estimated production from plants now available to both Services indicated potential deficiencies of 600,000 cu.ft. and 300,000 cu.ft. respectively (see Schedule 'A' attached). It was agreed to regard this as a joint [redacted]

Declassified E.O. 12356 Section 3.3/NND No. 785019

	Dawson.	P.B.S.
	C.E. Schultz.	AAFSC/MTO.
	J.W.T.Jones.	AAFSC/MTO.
	R.K.J.Burgess.	ORD (Br).
		ORD (Br). Secretary.

2. [illegible] reported that the FIDO (Rome) plant was giving an output of 1,000,000 cu.ft. monthly and that issues were being made on the basis of the allocation approved for this plant i.e. 33⅓% each to R.N., P.B.S. and ORD(Br). As the Navy had failed to take up their full allocation additional issues to P.B.S. for onforwarding to the Naples area had been possible.

3. ORD(Br) further reported that the PAPIGNO (Terni) plant was now in operation under RAOC personnel and giving an output of approx. 2,000,000 cu.ft. per month. This could be raised to 4,000,000 cu.ft. per month by 24 hour working but as the gas produced was below breathing oxygen specification the present output was sufficient to provide for all requirements of commercial oxygen not forthcoming from other plants. Issues were being made to P.B.S. within the limits of their ability to arrange delivery of cylinders to Terni for refilling and subsequent collection.

4. It was accepted that whilst the production of commercial oxygen was now adequate to provide for their requirements both P.B.S. and ORD(Br) were faced with considerable difficulty in arranging transport for the gas over a long and congested L.of C. owing to the heavy calls made by U.S.A.A.C. on production in the Naples area where both P.B.S. and ORD(Br) requirements were in excess of their allocations from local plants.

5. U.S.A.A.C. and R.A.F. stressed their urgent need for further allocations from plants in the Naples area due to the absence of any supplies in the Foggia area and the unsuitability for breathing purposes of the oxygen produced at Rome and Terni plants.

6. The estimated requirements of breathing oxygen for U.S.A.A.C. and R.A.F. during the month of August as compared with estimated production from plants now available to both Services indicated potential deficiencies of 600,000 cu.ft. and 300,000 cu.ft. respectively (see Schedule 'A' attached). It was agreed to regard this as a joint [illegible] deficiency of 1,000,000 cu.ft.

7. R.A.F. drew attention to their letter 214 G/5370 dtg of 17 July '44 concerning the existence of a dismantled plant at Terni in a cave adjacent to the I.G.TERNI plant and of a second plant belonging to the Montecatini Company reported to be with other equipment in a dismantled condition on railway trucks between Tarquinia and Orbetello. They were of the opinion that the latter plant, if erected, at Foggia would provide 700,000 cu.ft. per month and largely cover the existing air deficiency.

8. It was then disclosed that R.N. had already removed this plant for erection in Leghorn though it was not clear whether this was done on the authority granted to them at the Engineering Materials Committee held on Monday 10 July '44 to repair an oxygen plant subject to the approval of Fifth Army to be moved further forward for operation.

9. R.A.F. and P.B.S. stated this was not the case as the plant for which authority to repair had been given was a static plant at Piombino which was now under repair by the Navy.

6259

10./

Declassified E.O. 12356 Section 3.3/NND No. 785019

10. R.N. representative was unable to clarify this but agreed that P.B.S. should contact the R.N. representatives in Piombino and Leghorn in order to ascertain to what extent the output of these plants could be made available to both Services.

11. In considering the possibility of moving the second PAPIGNO plant to Foggia it was stated by ORD(Br) that the plant was already under examination with this object in view but that preliminary reports indicated that the equipment was incomplete.

12. It was also recorded that Major Hayson (O.C. 94 Compressed Gases Depot S.E.C.) had arrived in the theatre, that he had been given a general picture of the oxygen and acetylene position and that he was engaged upon a recce of all static plants with the object of submitting his recommendations for improving the present situation.

13. R.A.F. requested that the construction of the plant at Foggia and overhaul of the Taranto plant which have given so much trouble in recent months be given high priority in the proposed programme of 94 Compressed Gases Depot.

14. The Secretary pointed out that the unit would operate under the control of Director of Works A.A.I. and that no ruling on their activities could be expected until Major Hayson had completed his recce of plants in the theatre and could give some indication of the work that could be undertaken by the personnel under his command.

15. All Services were agreed that the arrival of 94 Compressed Gases Depot S.E.C. would be of great assistance and offered to co-operate with the unit to the fullest extent that their resources permitted.

16. In view of the fact that ample commercial oxygen is now available in West Italy for all services requirements it was considered that P.B.S. and ORD(Br) must accept the difficulties involved in distributing the gas over a lengthening L. of C. and the following suggestions were agreed as a means of assisting U.S.A.A.C. and R.A.F. to meet the joint "AIR" deficiency of 1,000,000 cu.ft. of breathing oxygen.

17 (a) That U.S.A.A.C. retain control of the ILVA production subject
(i) to their providing R.A.F. with 104,000 cu.ft. per month and
(ii) to their providing a further 200,000 cu.ft. per month from this plant to be shared by P.B.S. and ORD(Br) as soon as production at the second S.I.O. plant commences should the existing sources of supply available to P.B.S. and ORD(Br) in the Naples area be inadequate to cover their local requirements.

(b) That the total output from the second S.I.O. plant when completed be put at the disposal of U.S.A.A.C. on whom R.A.F. would bid for their requirement of 300,000 cu.ft.

17. U.S.A.A.C. undertook to notify the Secretary as soon as the second S.I.O. plant is in production in order that P.B.S. and ORD(Br) might draw on the ILVA plant on the basis outlined in para.16 (a)(ii) above.

18. R.A.F. requested that the presence in Rome of the Vice Chief Engineer of the Nitrogen/Oxygen plants of the Montecatini Company be recorded as this engineer might be of service to O.C. 94 Compressed Gases Depot :

Declassified E.O. 12356 Section 3.3/NND No. 785019

14. The Secretary pointed out that the unit would operate under the control of the Director of Works A.A.I. and that no ruling on their activities could be expected until Major Haysom had completed his recce of plants in the theatre and could give some indication of the work that could be undertaken by the personnel under his command.

15. All Services were agreed that the arrival of 94 Compressed Gases Depot SAIC would be of great assistance and offered to co-operate with the unit to the fullest extent that their resources permitted.

16. In view of the fact that ample commercial oxygen is now available in West Italy for all services requirements it was considered that P.B.S. and CRD(Br) must accept the difficulties involved in distributing the gas over a lengthening L. of C. and the following suggestions were agreed as a means of assisting U.S.A.A.C. and R.A.F. to meet the joint "AIR" deficiency of 1,000,000 cu.ft. of breathing oxygen.

17 (a) That U.S.A.A.C. retain one unit of the ILVA production subject
(i) to their providing R.A.F. with 104,000 cu.ft. per month and
(ii) to their providing a further 200,000 cu.ft. per month from this plant to be shared by P.B.S. and CRD(Br) as soon as production at the second S.I.O. plant commences should the existing sources of supply available to P.B.S. and CRD(Br) in the Naples area be inadequate to cover their local requirements.

(b) That the total output from the second S.I.O. plant when completed be put at the disposal of U.S.A.A.C. on whom R.A.F. would bid for their requirement of 300,000 cu.ft.

17. U.S.A.A.C. undertook to notify the Secretary as soon as the second S.I.O. plant is in production in order that P.B.S. and CRD(Br) might draw on the ILVA plant on the basis outlined in para.16 (a)(ii) above.

18. R.A.F. requested that the presence in Rome of the Vice Chief Engineer of the Nitrogen/Oxygen plants of the Montecatini Company be recorded as this engineer might be of service to O.C. 94 Compressed Gases Depot :

Ing. A.Mancinelli,
Via A Salandra No.13,
Rome.

19. In the common interest of all services it was agreed that the following recces of potential sources of supply be carried out by the services indicated and reports passed to the Secretary.

Area Leghorn - Pisa.	- P.B.S.
Area Arezzo - Florence.	- CRD.(Br).
Area Ancona-Iesi-Fossi(Fofoli)	- R.A.F.

20./

Declassified E.O. 12356 Section 3.3/NND No. 785019

20. The need for an oxygen compressor suitable for the proposed Foggia plant was recorded as being a matter of major importance and U.S.A.A.C. undertook to ascertain if this could be supplied from U.S, if full particulars of the compressor required are passed to them.

21. R.A.F. pointed out that high-pressure piping would also be required and the Secretary undertook to submit a bid for material offered for disposal at the next meeting of the Engineering Materials Committee.

AGREED.

22. It was recorded that the S.P.A.D.(Rome) plant was in production under the supervision of R.A.F.C. personnel and that allocation of output on the basis of 3½: each P.B.S, R.N, and ORD(Br) was proving an acceptable arrangement.

23. P.B.S. reported an urgent need for additional supplies in the Naples area and ORD(Br) pointed out that a forward source of supply was urgently required by them to obviate the present need for transporting acetylene from Naples and Bari to meet the requirements of formations in the Florence and Rimini areas.

24. As no reports of additional plants had been received no changes in the present allocations of plants now in production could be recommended.

25. It was agreed that 5 Sept. be accepted as the provisional date for the next meeting of the Sub-committee and that in the event of the need for an emergency meeting the Secretary would give due notice at the first opportunity.

(R.N.J. BURGESS) MAJOR.
Secretary.

ELECTRIC POWER COMMITTEE - AGENDA

The tenth meeting of the Electric Power Committee will be held at 10.30 hours on MONDAY, 14 AUG 44, in the Local Resources Section conference room, HQ AAI, Rome, (Piano IV, Room 1318), to consider the following Agenda:-

1. Minutes of the previous meeting held on 14 JULY 44.

2. To consider any matters arising out of the meeting of the Board held on 17 JULY 44.

3. To receive a report from the Vice-Chairman of the Central Electrical Board on the position regarding the supply of power to Rome and the forward area in general.

4. To review the schedule of allocation of electric power and to receive applications for revised allocations for the month of SEPTEMBER.

5. To consider the question of bulk allocation of Electric Power with especial reference to the proposal to set up three AFLR Boards on the Italian Mainland.

6. Any other business.

7. To set a date for the next meeting.

ALLIED FORCE LOCAL RESOURCES (ITALIAN) BOARD

ENGINEERING MATERIALS COMMITTEE - AGENDA

The twelfth meeting of the Engineering Materials Committee will be held at 10.30 hours on MONDAY, 3 JULY 44, in the Local Resources Section Conference Room, 4th floor, room 1314, Italian Air Ministry Building, Viale dell 'Universita, ROME, to consider the following AGENDA :-

1. Minutes of the Special (eleventh) meeting held on the 17 JUNE 44.

2. To consider any matters arising out of the meeting of the Board held on the 19 JUNE 44.

3. To receive requirements of Sulphuric Acid from interested Services for the month of AUGUST and to make allocations from availabilities notified by ACC.

4. To make allocations against stocks of controlled materials at Stanzieri, Via S. Anna alle Paludi, NAPLES. (Appendix A attached).

5. To receive a report from Sicilian Board of availability of oxygen and to take any necessary action.

6. To receive a report from ACC of arrangements made by a Service or Services with the Directorate of Salvage (Pr) for disposal of controlled materials and to consider whether steps should be taken to prevent continuation of this practice.

7. To receive a report from ACC of availability of scrap copper together with report of possibility of tearing down existing trolley wires and transmission line (para. 9 Engineering Materials Committee meeting 5 JUNE 44) which might not be essential.

8. To receive from ACC inventories of stocks of oxygen and acetylene cylinders held at F.I.D.O. and S.P.A.D. Works, ROME and make necessary allocations.

9. To receive from ACC inventory of material at S.A. Caracciolo, Via Mac[illegible] Rome and make necessary allocations.

10. Any other business.

Declassified E.O. 12356 Section 3.3/NND No. 785019

at 10.30 hours on MONDAY, 3 JULY 44, in the Local Resources Section Conference Room, 4th floor, room 1314, Italian Air Ministry Building, Viale dell 'Universita, ROME, to consider the following AGENDA :-

1. Minutes of the Special (eleventh) meeting held on the 17 JUNE 44.

2. To consider any matters arising out of the meeting of the Board held on the 19 JUNE 44.

3. To receive requirements of Sulphuric Acid from interested Services for the month of AUGUST and to make allocations from availabilities notified by ACC.

4. To make allocations against stocks of controlled materials at Stanzieri, Via S. Anna alle Paludi, NAPLES. (Appendix A attached).

5. To receive a report from Sicilian Board of availability of oxygen and to take any necessary action.

6. To receive a report from ACC of arrangements made by a Service or Services with the Directorate of Salvage (Er) for disposal of controlled materials and to consider whether steps should be taken to prevent continuation of this practice.

7. To receive a report from ACC of availability of scrap copper together with report of possibility of tearing down existing trolley wires and transmission line (para. 9 Engineering Materials Committee meeting 5 JUNE 44) which might not be essential.

8. To receive from ACC inventories of stocks of oxygen and acetylene cylinders held at F.I.D.O. and S.P.A.D. Works, ROME and make necessary allocations.

9. To receive from ACC inventory of material at S.A. Carracciolo, Via Mario Rome and make necessary allocations.

10. Any other business.

11. To fix a date for the next meeting.

ELECTRIC POWER COMMITTEE - MINUTES

1. The seventh meeting of the Electric Power Committee was held at 10.30 hours, 19 MAY 44, in the Conference Room, HQ AAI (Rear Adm Ech), Naples.

Present:- Brigadier D.L. Anderson, DW. - Chairman

Representatives of:- CE, PBS.
DW, HQ AAI.
CE, NO.2 DISTRICT.
CE, NO.3 DISTRICT.
CENTRAL ELECTRICAL BOARD
214 Gp. RAF (Adv HQ)
ACC

In Attendance:- Vice-Chairman (Br) (Allied Force Local Resources
Vice-Chairman (Am) ((Italian) Board

2. The Minutes of the last Meeting, held on 18 APRIL 44, were approved.

The Committee requested the Vice-Chairman (Br) to approach "Q" Branch, HQ AAI, with a view to having the word "seriously" deleted from para.8, Priority 4.

3. No matters arose for discussion out of the meeting of the Board held on 15 MAY 44.

4. The schedule of allocations of electric power was received and revised allocations for the month of JUNE were made as per Appendix "A" attached.

5. A report was received in graphical form for each area from ACC on the consumption of electricity for the months of MARCH, APRIL and MAY. The Committee expressed satisfaction with the position and ACC undertook to supply the necessary data to keep the graphs submitted up to date.

6. A request submitted by No.3 District (their letter CE 6004/2, dated 13 MAY, refers) for an amendment to the Italian Governmental Decree rationing electricity concerning the limitation of the use of electric cookers had been passed to ACC and the Committee agreed that no action was necessary at present.

7. The eighth meeting will be held on [illegible]

LAC AIRGRAM 19, 6 May 1944

From : FHMGS

To : CCS for CCAC (4 copies)

Subject: Development and Utilization of Italian Agricultural and Industrial Resources.

1. ACC-AMG has now been operating in Southern Italy and Sardinia for approximately eight months and in Sicily for almost ten months. It is felt that the time has come when it would be useful to examine the efforts that have been made toward the utilization and development of the country's agricultural and industrial resources. The purposes of such a survey would be (a) to give a general picture of what is being done, (b) to show the extent to which the area's productive capacity is being utilized and (c) to provide a basis for judging whether current efforts are in harmony with sound long-term policies.

2. There follows a table wherein are listed the products which have been dealt with by ACC-AMG in Italy, Sicily and Sardinia, whether for local use or for export. The list is divided into three parts, or categories of products: (I) products needed for military purposes, (II) those needed to meet essential civilian requirements, and (III) those needed by the United Nations (i.e. export products).

3. The table is further divided into four columns: (A) products on the production of which a major effort has been made, (B) those on which a moderate effort has been made, (C) those on which no effort has been made to stimulate production other than through purchase of the product, and (D) those the production of which has not been approved or for which there is no demand.

4. The various industries and products have been arranged in a sequence intended to give an indication of their relative importance. Following the table a brief note is given on each of the industries and products listed. The notes are arranged in the order shown by the numbers preceding the items in the table.

5. The material presented would appear to suggest the following conclusions:

(a) A wide range of products has been dealt with.

(b) A moderate amount has been obtained locally for military use.

(c) An important effort has been made to obtain and ship products of use to the United Nations, and production of several of these products has been stimulated.

Declassified E.O. 12356 Section 3.3/NND No. 785019

that the time has come when it would be useful to examine the efforts that have been made toward the utilization and development of the country's agricultural and industrial resources. (b) A moderate amount has been obtained locally for military use.

(c) An important effort has been made to obtain and ship products of use to the United Nations, and production of several of these products has been stimulated.

(d) The possibilities of stimulating production to meet essential local demands have been limited.

(e) Imported supplies have not been used to stimulate production other than for (i) military use, (ii) export to the United Nations, or (iii) essential civilian needs.

(f) Uneconomic industries have not been stimulated.

Notes

1. Industrial Gases. A major effort has been made by ACC to obtain increased production, the whole of which is allocated to the Services.

2. Coal. A major effort has been made, both through the assignment of personnel and the importation of supplies, to reestablish the production of the Sardinian Coal mines.

3. Hemp. Plans for re-organization and control of the hemp industry have been successfully completed. In April some 1500 tons of raw hemp were amassed, and some 70,000 metres of canvas and 500 tons of rope of the highest quality were produced, in addition to binder twine, sacks and sacking.

4. Tanneries, Hides and Leather. A considerable amount of work has been put into the problem of re-organizing the whole of this trade in Liberated Italy from the hide to the finished product and plans mutually agreed between the Italian Government and ACC are on the point of being given legislative force. Surveys of both hides and leather have been completed and controlled tanning of stocks of hides is now in active progress.

5. Cement. Several cement making plants have been taken over for the production of cement for military purposes. Some imported coal and Sardinian coal has been supplied. Two further plants could be operated if desired, and provided that coal, bags and transportation were made available.

6. Asphalt. A major effort has been made since the advent of the Allied forces to develop the production of the asphalt works at Ragusa, Sicily. The asphalt has been used primarily for airfields and other military purposes, and to a lesser extent for civilian needs such as roads.

7. Matches. The match industry has been re-activated and considerable quantities made for the Services as well as millions of boxes for essential civilian needs.

8. Sulphuric Acid. This commodity is now in active production at Montecatini, Barletta, and as a result of ACC activities the whole of the Service needs of electrolyte will be satisfied from local resources.

9. Engineering Materials. Considerable quantities of local supplies of various engineering materials have been found by ACC, reported to the Engineering Materials Committee and allotted to the various Services. One officer has been employed for many months on full time on this problem alone.

10. Linseed Oil. Some linseed oil has been pressed in Bari for military use.

11. Railway Material and M.T. Vehicle Repair. ACC has made careful studies and reports on all factories capable of undertaking work of this nature and

Declassified E.O. 12356 Section 3.3/NND No. 785019

4. Tanneries, Hides and Leather. Surveys of both hides and leather have been completed and controlled tanning of stocks of hides is now in active progress.

5. Cement. Several cement making plants have been taken over for the production of cement for military purposes. Some imported coal and Sardinian coal has been supplied. Two further plants could be operated if desired, and provided that coal, bags and transportation were made available.

6. Asphalt. A major effort has been made since the advent of the Allied forces to develop the production of the asphalt works at Ragusa, Sicily. The asphalt has been used primarily for airfields and other military purposes, and to a lesser extent for civilian needs such as roads.

7. Matches. The match industry has been re-activated and considerable quantities made for the Services as well as millions of boxes for essential civilian needs.

8. Sulphuric Acid. This commodity is now in active production at Montecatini, Barletta, and as a result of ACC activities the whole of the Service needs of electrolyte will be satisfied from local resources.

9. Engineering Materials. Considerable quantities of local supplies of various engineering materials have been found by ACC, reported to the Engineering Materials Committee and allotted to the various Services. One officer has been employed for many months on full time on this problem alone.

10. Linseed Oil. Some linseed oil has been pressed in Bari for military use.

11. Railway Material and M.T. Vehicle Repair. ACC has made careful studies and reports on all factories capable of undertaking work of this nature and these reports have been forwarded to the various Service sections with the recommendations of ACC experts.

12. Meat. ACC has arranged for the supply of fresh meat both from Region II and from Sardinia for the troops of the Indian Division to whom it is a necessity.

13. Raisins. Raisins have been exported from Pantelleria for use of the armed forces in North Africa. No effort has been made to stimulate production.

14. Wine. ACC has arranged for the purchase of wine both in Sicily and Apulia in sufficient quantities to satisfy the needs of EFI, PBS and the French and Italian armed forces. A trial shipment of 100 tons of assorted wines from Trapani Province, Sicily, was sent in January to the U.K. and subsequently a similar trial shipment was sent to the U.S.

15. Superphosphate Fertilizer. Production is now taking place in Sicily and sulphuric acid is now being produced at Barletta on the Mainland. The plants in Southern Italy which produced superphosphate fertilizer and which have been

CONFIDENTIAL

Declassified E.O. 12356 Section 3.3/NND No. 785019

selected for reopening can go into immediate production as soon as phosphate rock and sodium nitrate and/or nitric acid arrive. All necessary planning and survey work has been completed and the necessary cannibalization has already taken place.

16. Tobacco. A major effort has been made to re-organize and re-activate this important industry. Large quantities of raw tobacco have been moved to the factories and considerable effort has been successfully made to enable them to achieve maximum production, which should be accomplished as soon as supplies of cigarette paper, etc. are received from abroad. Certain grades of tobacco have been requested from Italy by Tripoli, but no exports have yet been made.

17. Sulphur. A major effort has been made to restart the Sicilian sulphur mines primarily for export to the U.K. and North Africa, and also for domestic fertilizer production. Lack of truck transport from mines to railhead together with the restricted amount of coal available for rail transport to ports has limited the export to date of the amounts above ground to a few hundred tons. Current production is only approximately 400 tons monthly due to lack of essential supplies. Sulphur mines in Italy proper are presently operating and supplies for continued operation have been prepared and filed.

18. Soap. A survey was made of soap-making possibilities in liberated Italy, and now that supplies of caustic soda have arrived this industry is restored to active production.

19. Textiles. Considerable energy has been put into the problem of rehabilitating the main textile unit in liberated Italy, namely The Manifatture Cotoniere Meridionali and it is now in active production. An expert survey has been made of this industry covering the whole of liberated Italy and Sicily. Results from this survey should shortly be felt as and when requisitions are filled.

20. Shoes. A survey has been completed of production possibilities in this industry and Class D salvaged shoes are being renovated at the rate of 2,000 pairs per week; but the requirements are vastly in excess of this figure, there being an immediate need for half a million pairs.

21. Lead and Zinc. ACC after receiving instructions from CCAO did everything within its power to promote the resumption of production which now depends on the filling of the appropriate requisitions.

22. Paper. A great deal of work has been done by way of review and survey of paper-making possibilities and now that local stocks of cellulose have been located and blocked it is hoped to get this industry restarted and manufacturing wrapping paper for the coming lemon crop.

23. Candles. A survey has been completed of the possibilities of this industry and plans determined for an immediate commencement of production both for the Services and for essential civilian needs, AFHQ Pet. Sec. having offered to free to us the necessary quantities of wax.

24. Olive Oil Refining. Plant potentialities have already been [illegible]

Declassified E.O. 12356 Section 3.3/NND No. 785019

trial supplies. Sulphur mines in Italy proper are presently operating and supplies for continued operation have been prepared and filed.

18. Soap. A survey was made of soap-making possibilities in liberated Italy, and now that supplies of caustic soda have arrived this industry is restored to active production.

19. Textiles. Considerable energy has been put into the problem of rehabilitating the main textile unit in liberated Italy, namely The Manifatture Cotoniere Meridionali and it is now in active production. An expert survey has been made of this industry covering the whole of liberated Italy and Sicily. Results from this survey should shortly be felt as and when requisitions are filled.

20. Shoes. A survey has been completed of production possibilities in this industry and Class D salvaged shoes are being renovated at the rate of 2,000 pairs per week; but the requirements are vastly in excess of this figure, there being an immediate need for half a million pairs.

21. Lead and Zinc. ACC after receiving instructions from CCAO did everything within its power to promote the resumption of production which now depends on the filling of the appropriate requisitions.

22. Paper. A great deal of work has been done by way of review and survey of paper-making possibilities and now that local stocks of cellulose have been located and blocked it is hoped to get this industry restarted and manufacturing wrapping paper for the coming lemon crop.

23. Candles. A survey has been completed of the possibilities of this industry and plans determined for an immediate commencement of production both for the Services and for essential civilian needs, AFHQ Pet. Sec. having offered to free to us the necessary quantities of wax.

24. Olive Oil Refining. Plant potentialities have already been reviewed and the arrival of caustic soda has enabled this important industry to commence active production.

25. Dyeing. A major effort has been made to review the dyeing possibilities in liberated Italy. Plans have been made to handle a large volume of rejected Army uniforms and as soon as the requisitioned stocks of dyes arrive this industry should commence active production.

26. Heavy Engineering. This industry has been most carefully and exhaustively surveyed and capacity found for the manufacture and for repair of:

a. Ordnance
b. Naval vessels
c. Machine Tools
c. Torpedoes

27. Light Engineering. Surveys have also been made of the capacity for the manufacture of: a. Steel Sheets, bars, rods and sections
b. Brass, Copper and Bronze Rods, Wire and Cable

CONFIDENTIAL

Declassified E.O. 12356 Section 3.3/NND No. 785019

28. Steel and Wire Drawing. Surveys have been made of the facilities existing for this work.

29. Window Glass. The possibility of restarting a factory at Salerno for the production of window glass has been carefully considered. Production has not been started primarily because large amounts of imported materials, particularly splint coal, are required. For these reasons the matter is at present being held in abeyance.

30. Cotton. Cotton production in Sicily has not been encouraged.

31. Sugar Beets. A decision was taken by ACC "that encouragement of production of beet sugar was undesirable". To implement this decision it was decided that seed should not be imported and "that facilities should not be granted to assist owners to repair factories, and that certain stocks of material should be frozen so as to be available for priority industrial purposes."

32. Citrus Fruits and Products. Nothing has been done to stimulate the production of citrus fruits as the supply is considered likely to be in excess of the quantity that can be exported for some time to come. However, a major effort has been made to organize the export of these fruits and to obtain necessary packing materials, lumber from Calabria, and nails and paper from Naples. Lemons, sweet oranges and bitter oranges have been exported, as well as concentrated and unconcentrated lemon juice and concentrated orange juice. Other products are mentioned under "citric acid" and "essential oils".

33. Silk. A major effort has been made to increase the production of silk for export to the U.K. Silk worm seeds have been imported from Turkey, and efforts have been made to prepare the farmers and the spinners for the maximum possible production.

34. Citric Acid. Shipments have been made from Sicily to the U.K. Coal and other assistance has been provided to the Arenella plant in Palermo to make its operation possible.

35. Tartaric Acid. Arenella will use its citric acid plant during the summer for the production of tartaric acid, and will continue to receive assistance in the way of coal and other supplies to keep it operating.

36. Briarwood. Arrangements are now being made to export existing stocks to the U.S. Some briarwood has already been exported to the U.K.

37. Essential Oils. An effort has been made to organize the production of essential oils, by getting plants restarted, advising on quality and aiding the producers to obtain shipping containers. Lemon oil, sweet orange oil, bitter orange oil, tangerine oil, bergamot oil and jasmine oil have been exported.

38. Argols. Efforts have been made to obtain existing stocks for export, and producers have been urged to assemble the maximum possible.

39. Talc. Current small shipments of block talc from the Sardinian mines are being made to the United States, and a sample has been sent to the U.S. of cosmetic talc.

Declassified E.O. 12356 Section 3.3/NND No. 785019

32. Citrus Fruits and Products. Nothing has been done to stimulate the production of citrus fruits as the supply is considered likely to be in excess of the quantity that can be exported for some time to come. However, a major effort has been made to organize the export of these fruits and to obtain necessary packing materials, lumber from Calabria, and nails and paper from Naples. Lemons, sweet oranges and bitter oranges have been exported, as well as concentrated and unconcentrated lemon juice and concentrated orange juice. Other products are mentioned under "citric acid" and "essential oils".

33. Silk. A major effort has been made to increase the production of silk for export to the U.K. Silk worm seeds have been imported from Turkey, and efforts have been made to prepare the farmers and the spinners for the maximum possible production.

34. Citric Acid. Shipments have been made from Sicily to the U.K. Coal and other assistance has been provided to the Arenella plant in Palermo to make its operation possible.

35. Tartaric Acid. Arenella will use its citric acid plant during the summer for the production of tartaric acid, and will continue to receive assistance in the way of coal and other supplies to keep it operating.

36. Briarwood. Arrangements are now being made to export existing stocks to the U.S. Some briarwood has already been exported to the U.K.

37. Essential Oils. An effort has been made to organize the production of essential oils, by getting plants restarted, advising on quality and aiding the producers to obtain shipping containers. Lemon oil, sweet orange oil, bitter orange oil, tangerine oil, bergamot oil and jasmine oil have been exported.

38. Argols. Efforts have been made to obtain existing stocks for export, and producers have been urged to assemble the maximum possible.

39. Talc. Current small shipments of block talc from the Sardinian mines are being made to the United States, and a sample has been sent to the U.S. of cosmetic talc.

40. Nuts. Shipments have been made to the U.K. of filberts, sweet almonds shelled and unshelled, and bitter almonds shelled and unshelled.

41. Pumice. Exports have been made to the U.K. of pumice obtained in the Lipari Islands.

42. Seeds. Assorted vegetable seeds are being shipped from Italy to North Africa, and others are being stockpiled in Italy for use in other areas.

43. Hog Bristles. This product is being investigated for possible export.

44. Sumac. Exports have been made from Sicily to the U.K. The possible export of some sumac seed is under consideration.

6245

CONFIDENTIAL

Declassified E.O. 12356 Section 3.3/NND No. 785019

45. Squills. Samples have been tested in North Africa and samples have been asked for by the CCAC for testing in the United States and the U.K. Apart from these samples there have been no exports, and no efforts have been made to stimulate production.

46. Licorice Root. Considerable information regarding this product has been sent to the CCAC. No exports have been made as yet, but it is anticipated that orders may shortly be received.

47. Mustard Seed. A small amount of mustard seed has been sent to the U.K. A report on the quality is now being awaited before further shipments are made.

48. Pectin. Neither of the two Sicilian producers is in a position to produce powdered pectin at present. A sample from Arenella was found unsatisfactory, and a sample from Sanderson has been sent to London for examination. Liquid pectin has not yet been exported, but may be sent to Palestine as it is of too low a grade to be acceptable in the U.K.

49. Quartz Crystals. Samples have been sent to FEA, Washington.

50. Bentonite. Deposit in Sicily has been reported to CCS for instructions as to possible export.

51. Bauxite. Possibility of exporting stock and production from mine near Manfredonia is now under consideration by CCAC.

52. Barite. The mines in Sardinia where this mineral is produced are closed. Several reports have been sent to Washington. Earlier advices indicate that the WPB may recommend that FEA import into the U.S. The U.K. may also be interested. Thus far no exports have been made.

53. Lead. 2,623 tons have been allotted for export, but none has yet been exported.

54. Cadmium. 3,507 kilograms have been allotted for export, but none has yet been exported.

Copies to:
The Directorate of Civil Affairs
War Office, Whitehall, London, S.W.1 (4 copies)

17 APRIL 1944

Subject: Economies Effected in Electric Energy Consumption, Southern Italy.

To : Electric Power Committee, Allied Force Local Resources (Italian) Board.

1. Electricity requirements in Southern Italy have been curtailed through disconnection of non-essential customers, discontinuance of some electrically operated transportation, revising the hours of operation of some plants, and through the changing of the rest day from Sunday to a weekday.

2. The kilowatt-hour consumption in the Società Meridionale di Elettricità system during March was about five percent less than the allocated amount.

3. The maximum permitted demand for electricity is 106,000 kilowatts, measured at the delivery points of the electric transmission system. This figure corresponds to a maximum load of approximately 125,000 kilowatts at the generating stations. During the month, the actual maximum load at the generating stations was 119,000 kilowatts, 6,000 below the permitted value.

4. Electricity consumption was within the allocations in the various areas, except as mentioned below:

APULIA - Demands exceeded allocation early in March. Loads arranged so that by end of the month demands were reduced below allocation.

6243

Declassified E.O. 12356 Section 3.3/NND No. 785019

33

NAPLES - Demands exceeded allocation.
Electrically operated transportation curtailed.
Present demands are below allocated figure.

CASTELLAMMARE - SALERNO - TORRE - Both demand and electricity consumption allocations were exceeded. During March, consumption was greater than allocation by 6.3 percent. Load was reduced in April but still appears too high for present allocation. Electricity supply discontinued to non-essential tramway and factories. Other plants put on night operation. Area is receiving intensive study with view to making further cuts.

W.M. LAPPER,
Lt-Colonel,
Chief El.& Adm.Div.

Appendix "A" to Agenda of
Engineering Materials Committee
Meeting - 19 April 44

MINUTES OF INDUSTRIAL GASES SUB-COMMITTEE

1. This sub-Committee meeting was held at HQ AAI (Adm Ech) at 14.30 hours on Thursday 6 April 1944:-

Present:	Lt.Comdr. E. Thomson	FOWIT
	Major R.E. MacDonald	Eng. Sec. FBS
	Major Cobb	AAFSC/MTO
	Major Konkol	AAFSC Eng. Sup. Officer
	Capt. W.E. Mydans	ACC
	Major R.N.J. Burgess	Ord (Br)

The representative of HQ 214 Gp. RAF was not present.

2. The revised requirements of all services were considered in view of the recent moves of formations, the increased activity of w/shops in base areas and the increasing use by services of local production for the manufacture of stores required by the Allied Forces in Italy.

3. Production figures for mobile equipments and civilian plants under the control of services were also given and the situation was summarised in terms of cu.ft. per month as follows:-

OXYGEN Service	West Italy Required	Produced		East Italy Required	Produced
RN	140.000	-		720.000	Taranto 200.000
ORD (Br) (i)	1.012.000	A.S.A. Castellamare 460.000		523.000	Bari 510.000 Taranto 300.000
FBS (ii)	2.331.000	2 Mobile Plants 416.000 S.O.N. Naples) A.P.I.C.E. Naples)	1.584.000	-	-
MAAF (iii)	350.000	S.I.O. Naples) I.L.V.A. Naples)	2.600.000	6.650.000	2 RAF Mob Plants 480.000 4 USAAC do do 925.000 Taranto 800.000
	3.833.000		5.072.000	7.893.000	3.915.000

Declassified E.O. 12356 Section 3.3/NND No. 785019

Present:	Lt.Comdr. E. Thomson	FOWIT
	Major R.E. MacDonald	Eng. Sec. PBS
	Major Cobb	AAFSC/MTO
	Major Konkol	AAFSC Eng. Sup. Officer
	Capt. W.E. Mydans	ACC
	Major R.N.J. Burgess	Ord (Br)

The representative of HQ 214 Gp. RAF was not present.

2. The revised requirements of all services were considered in view of the recent moves of formations, the increased activity of w/shops in base areas and the increasing use by services of local production for the manufacture of stores required by the Allied Forces in Italy.

3. Production figures for mobile equipments and civilian plants under the control of services were also given and the situation was summarised in terms of cu.ft. per month as follows:-

OXYGEN Service	West Italy Required	Produced		East Italy Required	Produced	
RN	140.000	-		720.000	Taranto	200.000
ORD (Br) (i)	1.012.000	A.S.A. Castellamare	460.000	523.000	Bari	510.000
					Taranto	300.000
PBS (ii)	2.331.000	2 Mobile Plants	418.000	-	-	
		S.O.N. Naples	)			
		A.P.I.C.E. Naples	) 1.594.000

		I.L.V.A. Naples	)		4 USAAC do do	925.000
					Taranto	800.000
	3.833.000		5.072.000	7.893.000		3.015.000

(i) Includes RAF commercial oxygen

(ii) Includes U.S. Navy

(iii) Includes RAF and USAAC breathing oxygen

Total requirements all Services	11.726.000
Total production mobile and civilian plants	8.087.000
Total deficiency for Italy all Services	3.639.000

Declassified E.O. 12356 Section 3.3/NND No. 785019

4. Navy stated that they were erecting an additional oxygen plant at Taranto which had been obtained from Augusta (Sicily). They estimated that this plant would be in operation within one month to produce an output of 400.000 cu.ft. per month. With this plant in operation an allotment of 120.000 additional to the present allotment of 200.000 cu.ft. monthly would fully cover their requirements.

5. Ord (Brit) pointed out that the present allocation to services from civilian plants resulted in their having a surplus of 287.000 cu.ft. of oxygen monthly in East Italy for which they must arrange transport to Naples whilst MAAF have a surplus of 2.350.000 cu.ft. in West Italy which they must haul to Foggia.

6. Ord (Brit requested the agreement of MAAF that 225,000 cu.ft. of oxygen be drawn by them from S.I.O. Naples offering to reduce their claim on Taranto production by a similar quantity of oxygen in favour of MAAF. They pointed out the valuable saving in transport between Taranto and Naples which would result from this agreement.

7. MAAF stated that they could not agree to the Ord (Brit) suggestion without referring the matter to AAF/MTO as their decision was dependent upon the tactical situation. They were, however, agreeable to the delivery to S.I.O. by Ord (Brit) of 500 cylinders for refilling in the event of adequate quantities of MAAF cylinders not being available to take the full output of the plant.

8. Ord (Brit) pointed out that surplus production existed at Catania and that the Navy were at liberty to take advantage of this surplus subject to their ability to arrange for the delivery of empty cylinders to Catania and the collection of filled cylinders as issue could be made only on a one-for-one basis. In the present circumstances it was considered that the Navy must fully exploit this potential source of supply.

9. Navy agreed to make every effort to obtain any surplus available from Catania but pointed out that they had considerable difficulty in obtaining L.C.T. or other suitable craft for this purpose.

10. Further consideration was then given to the reports on the IMAD and CROTONE plants previously submitted by Capt. Mydams, and the following points are recorded:

(a) No suitable compressors have been found in Sicily, Sardinia or occupied Italy comparable to the capacity required for Crotone.

(b) Two compressors each of 10 cu.m/hour capacity in a repairable condition are available from Sardinia but these are totally inadequate for Crotone.

(c) Two compressors are at present installed in Taranto - 1 x 80 cu. m/hour capacity and 1 x 60 cu.m/hour capacity. The maximum output obtainable from Taranto is 90 cu. m. per hour.

(d) It was considered that 1 x 10 cu. m/hour Compressor available from Sardinia could be employed at Taranto with the 80 cu.m/hour compressor already installed to obtain the maximum output from this plant and free 1 x 60 cu. m/hour compressor for CROTONE or IMAD.

(e) Capt. Mydams stated that the 60 cu.m/hour compressor would be of little use at Crotone but it would suffice to obtain 60% of the potential output

Declassified E.O. 12356 Section 3.3/NND No. 785019

7. MAAF stated that they could not agree to the Ord (Brit) suggestion without referring the matter to MAF/MTO as their decision was dependent upon the tactical situation. They were, however, agreeable to the delivery to S.I.C. by Ord (Brit) of 500 cylinders for refilling in the event of adequate quantities of MAAF cylinders not being available to take the full output of the plant.

8. Ord (Brit) pointed out that surplus production existed at Catania and that the Navy were at liberty to take advantage of this surplus subject to their ability to arrange for the delivery of empty cylinders to Catania and the collection of filled cylinders as issue could be made only on a one-for-one basis. In the present circumstances it was considered that the Navy must fully exploit this potential source of supply.

9. Navy agreed to make every effort to obtain any surplus available from Catania but pointed out that they had considerable difficulty in obtaining L.C.T. or other suitable craft for this purpose.

10. Further consideration was then given to the reports on the EM&D and CROTONE plants previously submitted by Capt. Mydams, and the following points are recorded:

(a) No suitable compressors have been found in Sicily, Sardinia or occupied Italy comparable to the capacity required for Crotone.

(b) Two compressors each of 10 cu.m/hour capacity in a repairable condition are available from Sardinia but these are totally inadequate for Crotone.

(c) Two compressors are at present installed in Taranto - 1 x 80 cu. m/hour capacity and 1 x 60 cu.m/hour capacity. The maximum output obtainable from Taranto is 90 cu. m. per hour.

(d) It was considered that 1 x 10 cu. m/hour Compressor available from Sardinia could be employed at Taranto with the 80 cu.m/hour compressor already installed to obtain the maximum output from this plant and free 1 x 60 cu. m/hour compressor for CROTONE or EM&D.

(e) Capt. Mydams stated that the 60 cu.m/hour compressor would be of little use at Crotone but it would suffice to obtain 60% of the potential output of 100 cu. m. per hour from EM&D. This percentage would represent approx. 1.300.000 cu.ft. of oxygen monthly.

(f) Capt Mydams also pointed out that no high pressure system existed at Crotone whereas EM&D was designed for high pressure operation and as such it could be more quickly put into commission than Crotone.

(g) As EM&D in its present unassembled condition could be completely dismantled for re-erection elsewhere the use of this plant "on site", would obviate the serious transport problem to be overcome if Crotone is put into operation.

(h) The existence of civilian technicians suitable for employment on this project is now known and ACC have also asked MGS AFHQ for the services of M. Paul Jagnet formerly technical manager for Air Liquide in Italy and now in charge of their interests in Spain. Capt. Mydams is also prepared to give further assistance if required.

/11.....

Declassified E.O. 12356 Section 3.3/NND No. 785019

11. The sub-Committee were satisfied that of the two plants under consideration EMAD was the more suitable for future development but it was agreed that the plant could not be put into operation on its present site or elsewhere in less than three months.

12. In the course of general discussion on the subject of oxygen production it was disclosed that MAAF are in possession of 23 mobile oxygen plants in the Bari area each capable of a monthly output of 200,000 cu.ft. and that of these only 4 plants are now being employed.

13. It was pointed out that the employment of a further 18 mobile plants by MAAF would fully cover the existing deficiency between total requirements of all services in Italy and the present output from all civilian and mobile plants in operation.

14. MAAF stated that their object in attending meetings of the Local Resources Board was to obtain the maximum available allotment from local resources in order to avoid the use of their mobile plants and so conserve these plants for use in emergencies only.

15. PBS pointed out that they were already making full use of their mobile equipments. Ord (Br) stated that they had applied to AFHQ for two mobile plants to be supplied from North Africa with the object of employing these plants in the forward area and so effect a saving in the transport now required to move cylinders between the forward area and base.

16. Representatives of RN, Ord (Br), PBS and ACC were agreed that the present serious situation must be considered by MAAF as an emergency in which all available equipment should be used for the general benefit of the Armed Forces.

17. The acetylene position was then reviewed and the situation with regard to requirements and production in terms of cu.ft. per month summarised as follows:-

ACETYLENE Service		West Italy Required	Produced	East Italy Required	Produced	
R.N.		60.000	-	180.000	Taranto	43.000
Ord (Br)	(i)	418.000	Avis Caproni	295.000	232.000	Bari 96.000
PBS	(ii)	995.000	Mobile Plants	457.000	-	Taranto 64.000
MAAF	(iii)	-	S.O.N.	418.000	-	-
		1.471.000		1.170.000	632.000	Taranto 50.000
						203.000

(i) Includes RAF
(ii) Includes US Navy & USAAC W. Italy.
(iii) USAAC for E. Italy only.

Total production mobile and civilian plants	1.453.000
Total deficiency for Italy all services	650.000

18. Ord (Br) stated that the C.M.I. plant at Castellamare [illegible]

Declassified E.O. 12356 Section 3.3/NND No. 785019

14. MAAF stated that their object in attending meetings of the Local Resources Board was to obtain the maximum available allotment from local resources in order to avoid the use of their mobile plants and so conserve these plants for use in emergencies only.

15. FDS pointed out that they were already making full use of their mobile equipments. Ord (Br) stated that they had applied to AFHQ for two mobile plants to be supplied from North Africa with the object of employing these plants in the forward area and so effect a saving in the transport now required to move cylinders between the forward area and base.

16. Representatives of RN, Ord (Br), FDS and ACC were agreed that the present serious situation must be considered by MAAF as an emergency in which all available equipment should be used for the general benefit of the Armed Forces.

17. The acetylene position was then reviewed and the situation with regard to requirements and production in terms of cu.ft. per month summarised as follows:-

ACETYLENE Service	West Italy Required	Produced		East Italy Required	Produced	
R.N.	60.000					
Ord (Br) (i)	416.000	Avis Caproni	295.000	180.000	Taranto	43.000
				232.000	Bari	96.000
FDS (ii)	995.000	Mobile Plants	-		Taranto	64.000
			457.000	-		-
		S.O.N.	418.000			
MAAF (iii)	-		-	220.000	Taranto	50.000
	1.471.000		1.170.000	632.000		253.000

(i) Includes RAF
(ii) Includes US Navy & USAAC W. Italy.
(iii) USAAC for E. Italy only.

Total requirements all Services	2.103.000
Total production mobile and civilian plants	1.453.000
Total deficiency for Italy all services	650.000

18. Ord (Br) stated that the C.M.I. plant at Castellamare was nearing completion and that its estimated production was not less than that of AVIS CAPRONI i.e. 295.000 cu.ft.

19. It was considered that if every effort be made to obtain the maximum output from existing plants, the completion of the CMI plant would enable Ord (Br) to cover their own existing deficiency and assist other services to meet the total deficiency in West Italy of 301.000 cu.ft.

20. In considering the deficiency of 350.000 cu.ft. in East Italy it was stated by Ord (Br) that the report submitted by the Staff Captain, Industrial Gases Ord (Br) AFHQ after his recent visit to Italy indicated that the production from the Bari plant could be immediately increased by not less than 100% by the replacement of a high pressure valve which was available.

1. Ord (Br) stated that this point would be given early attention and invited Capt. Martin, Engineer Supply Officer, Adriatic Base Depot, USAAC to contact Ord

INDUSTRIAL GASES SUB-COMMITTEE

REF:- Ord/6636(32)

8 April 1944

1. It has been observed that whilst all items on the Agenda circulated under reference Ord/6636 (31) of 4 April 1944 were fully discussed at the meeting held on Thursday, 6th April 44, no firm recommendation was prepared for submission to the Allied Forces Local Resources (Italian) Board for the re-allocation of Industrial Gases produced in civilian factories in Liberated Italy, as called for in item 1 of the Agenda.

2. In the circumstances, an emergency meeting of the Industrial Gases Sub-Committee will be held on MONDAY 10 APRIL 1944 at 09.30 hours in Ordnance Branch, HQ AAI (Adm Ech) to consider a recommendation to be proposed by Ord (Br).

3. The decision of the Sub-Committee on this recommendation will be incorporated in the minutes of the meeting held on Thursday 6 April 44.

4. Please ensure the attendance of your representative.

Industrial Gases Sub-Committee.

Ref:-
Ord/6636

10 April 1944.

1. Minutes of an emergency meeting held in Ordnance Branch on Monday 10th.April 1944 at 09.30 hrs.

Prsent:	Lt.Col R.C.L.Greggains	Ord(Br) Chairman.
	Lt.Cdr(E) Thomson	FCNIT
	Major R.E.Macdonald	Engr. Sec. P.B.S.
	Lt.Weems	AAFSC/MTO
	Capt.W.E.Mydens	ACC
	Major R.N.J.Burgess	Ord (Br) Secretary.

The representative of Hq 214 Group R.A.F. was not present.

2. The Chairman pointed out that this emergency meeting had been called in order that the Sub-Committee might prepare the recommendation required by the Allied Forces Local Resources (Italian) Board for the re-allocation of Industrial Gasses produced in civilian factories in Italy.

3. The existing allocations had been fully discussed at the meeting held on Thursday 6th. April but no progress could be made towards a solution of the serious problem faced by all services without the submission of a firm recommendation for the consideration of the Board.

4. The minutes of the meeting held on the 6th. April 1944 were then considered and on the proposal of Ord(Br) supported by PBS the following recommendations were approved by the Sub-Committee on a majority vote:-

(a) That of the production available from civilian factories in liberated Italy the output of Oxygen from the S.I.O. plant Bagnoli (Naples) be placed under the joint control of P.B.S. and Ord (Br), to be available in equal proportions to the services concerned.

(b) That MAAF retain full control of the ILVA plant and that any surplus production from the S.I.O. Plant after the commitments of PBS and Ord (Br), including the Royal Navy, have been met, shall also be placed at the disposal of MAAF as breathing Oxygen.

(c) That Ord(Br) forego their control of the Taranto oxygen plant in favour of MAAF, subject to the provision by MAAF of the following monthyl allotments to the services concerned, viz:

Royal Navy	400000 cu. ft.
Ord(Br)	75000 cu. ft.

(d) That the existing control of factories other than the Taranto and

Declassified E.O. 12356 Section 3.3/NND No. 785019

1. Minutes of an emergency meeting held in Ordnance Branch on Monday 10th.April 1944 at c9.30 hrs.

Present: Lt.Col R.C.D.Greggains — Ord(Br) Chairman.
Lt.Cdr(E) Thomson — FOWIT
Major R.E.Macdonald — Lt. Sec. P.B.S.
Lt.Weems — AAFSC/MTO
Capt.W.E.Mydans — ACC
Major R.N.J.Burgess — Ord (Br) Secretary.

The representative of HQ 214 Group R.A.F. was not present.

2. The Chairman pointed out that this emergency meeting had been called in order that the Sub-Committee might prepare the recommendation required by the Allied Forces Local Resources (Italian) Board for the re-allocation of Industrial Gasses produced in civilian factories in Italy.

3. The existing allocations had been fully discussed at the meeting held on Thursday 6th. April but no progress could be made towards a solution of the serious problem faced by all services without the submission of a firm recommendation for the consideration of the Board.

4. The minutes of the meeting held on the 6th. April 1944 were then considered and on the proposal of Ord(Br) supported by PBS the following recommendations were approved by the Sub-Committee on a majority vote:-

(a) That of the production available from civilian factories in liberated Italy the output of Oxygen from the S.I.O. plant Bagnoli (Naples) be placed under the joint control of P.B.S. and Ord (Br), to be available in equal proportions to the services concerned.

(b) That MAAF retain full control of the ILVA plant and that any surplus production from the S.I.O. Plant after the commitments of PBS and Ord (Br), including the Royal Navy, have been met, shall also be placed at the disposal of MAAF as breathing Oxygen.

(c) That Ord(Br) forego their control of the Taranto oxygen plant in favour of MAAF, subject to the provision by MAAF of the following monthyl allotments to the services concerned, viz:

Royal Navy	400000 cu. ft.
Ord(Br)	75000 cu. ft.

(d) That the existing control of factories other than the Taranto and S.I.O. oxygen plants shall remain unchanged.

5. It was recorded that MAAF opposed the above recommendations on the grounds that they have insufficient trained personnel to operate all their mobile plants; that certain repairs had been necessary before the S.I.O.plant as originally taken over by them could be put into operation, and that these repairs had been carried out under arrangements made by them.

6. It was accepted by the Sub-Committee that the reallocation of oxygen from civilian plants as now recommended would probably necessitate the operation by MAAF of two of their mobile plants now held in reserve in order to compensate them for the reduced quantity of oxygen which they would receive from civilian plants.

7. This would, however, be offset by any increased production at Taranto since the combined demands of Ord(Br) and Royal Navy on the Taranto output had been fixed at 475.000 cu. ft. per month.

6237

Declassified E.O. 12356 Section 3.3/NND No. 785019

8. MAAF confirmed that they were able to provide the personnel for two mobile plants should these be required to offset any reduction to be obtained by them from local resources by reason of the revised allocations now recommended by the Sub-Committee.

AGENDA

A SPECIAL MEETING (the ninth) of the Board will be held in the Conference Room, HQ AAI (Adm Ech), at 11.30 hours on MONDAY, 10 APRIL 44, to consider the following Agenda:-

1. To discuss the recommendations of the Labour & Wages Control Committee on the question of the increase in food ration to Italian Heavy Workers arising out of the proposal made by HQ ACC.

2. To consider:-

   (a) The position with regard to the labour situation in Electric Power Companies with special reference to pay and feeding of their employees.

   (b) Control of operation of Electric Power Companies.

   (c) Provision of staff for Central Electrical Board.

2. The Minutes of the previous meeting of the 20 MARCH 44 were read and approved.

3. The Committee decided to refer the study of the position regarding recommendations from areas other than Naples for percentage variations of the Naples rate to allow for increase or decrease in the cost of living in those areas to the Wages Sub-Committee. The Sub-Committee to submit its recommendations to the Committee at the next meeting. The suggested variations submitted by formations are attached at Appendix "A."

4. At the request of DDL (Br) the Chairman directed that Item 3 of the Agenda be deleted.

5. A letter from HQ ACC, Labour Sub-Commission, on the increase in food ration to Italian Heavy Workers - reference LAB 091.467, dated 28 MARCH 44 - was received.

The Chairman stated that before this letter was considered he desired, with the approval of the Committee, to take stock of the present situation as regards the supply of food to Italian civilians and to place on record certain basic facts and principles. In his opinion:-

(a) The primary requirement of the Armed Forces is that an adequate supply of satisfied labour is available for military purposes.

(b) At the present time the standard civilian ration is inadequate to produce maximum efficiency from the worker especially in the heavy classes.

(c) Extra food is not supplied as additional pay, as a morale builder, to assure equality with others, as an inducement or bribe, or as result of pressure brought about by labourers through threatened strikes, or for any other purpose than with/

6234

Declassified E.O. 12356 Section 3.3/NND No. 785019

with the sole object of giving the labourer sufficient strength to do the maximum amount of work required of him, when it is evident that the normal civil ration will not do this.

(d) He must be given these extra calories in kind and not in cash.

(e) It is primarily the responsibility of ACC to feed the civil population.

(f) The Armed Forces have not, at the present time, sufficient reserves within the theatre to permit them to issue food to the civilian labour employed by them.

(g) It therefore appears only reasonable to admit that ACC has the final decision as to what rationed food shall be given to any type of civilian, subject to any over-riding direction by AFHQ.

(h) ACC have stated that they are prepared to give extra rations to workers known as "pesanti" and "pesantissimi," but that they are not at present in a position to do so for "operai leggeri" or "impiegati" (Appendix "B" attached).

(i) AFHQ Signal 44980, dated 30 JAN 44, authorises a mid-shift meal for Italian Civilians employed at hard labour by Allied Forces and for no others (Appendix "C" attached). Hard labour, or as we have termed it manual labour, is heavy physical labour of sufficiently sustained nature to require so high a degree of expenditure of physical energy that above-normal food intake is required to sustain the strength of the labourer to perform the work for which he is hired.

(j) The supplementary ration is not a free issue and ACC state that it must be paid for by the worker.

A motion that the proposals set out in the ACC letter under discussion be rejected fell out for lack of a seconder.

It was suggested that the following amendments be made to ACC's letter:-

Para.1 be amended to read:-

> "As a result of several recent wage increase demands a conference was called by Lieut.General Sir Mason MacFarlane, Chief Commissioner, ACC, at which it was re-affirmed that the real issue is food and it was agreed to increase the present food ration to all heavy workers connected with the war effort, whether directly hired by the Armed Services or not. At a conference ..... "

That para.5 be amended to read:-

Declassified E.O. 12356 Section 3.3/NND No. 785019

(g) It therefore appears only reasonable to admit that ACC has the final decision as to what rationed food shall be given to any type of civilian, subject to any over-riding direction by AFHQ.

(h) ACC have stated that they are prepared to give extra rations to workers known as "pesanti" and "pesantissimi," but that they are not at present in a position to do so for "operai leggeri" or "impiegati" (Appendix "B" attached).

(i) AFHQ Signal 44[illegible], dated 30 JAN 44, authorises a mid-shift meal for Italian Civilians employed at hard labour by Allied Forces and for no others (Appendix "C" attached). Hard labour, or as we have termed it manual labour, is heavy physical labour of sufficiently sustained nature to require so high a degree of expenditure of physical energy that above-normal food intake is required to sustain the strength of the labourer to perform the work for which he is hired.

(j) The supplementary ration is not a free issue and ACC state that it must be paid for by the worker.

A motion that the proposals set out in the ACC letter under discussion be rejected fell out for lack of a seconder.

It was suggested that the following amendments be made to ACC's letter:-

Para.1 be amended to read:-

"As a result of several recent wage increase demands a conference was called by Lieut.General Sir Mason MacFarlane, Chief Commissioner, ACC, at which it was re-affirmed that the real issue is food and it was agreed to increase the present food ration to all heavy workers connected with the war effort, whether directly hired by the Armed Services or not. At a conference ..... "

That para.5 be amended to read:-

"Entitlement of extra rations will be granted to workers known as "pesanti" or "pessantissimi" or to others jointly at the discretion of Base Section or Area Commanders and the local ACC authorities, provided that the total workers involved receiving the increased ration do not exceed 10% of the population of the Province or Region concerned."

That para.3 be amended to read:-

"At General MacFarlane's meeting it was determined that the present midday meal be eliminated with the exception of the dehydrated soup which shall be available to all personnel, qualified as above, employed by the Allied Armed Forces, and its components incorporated in a supplemental ration issue which, however, would give an overall increase. Specifically ..... "

That/

Declassified E.O. 12356 Section 3.3/NND No. 785019

That para.4 be amended to read:-

"It is proposed to have the issue considered an extra privilege earned by a heavy worker; that distribution depots ..... "

HQ ACC agreed, in order to clarify the position, to withdraw the original letter and to submit another incorporating the above amendments only.

With the above amendments the Committee recommended to the Board that the provisions and conditions of ACC's letter be accepted.

6. The proposition submitted by DDL (Br), HQ AAI (Adm Sch), reference 98/LAB, dated 24 MARCH 44, regarding the formation of labour camps (circulated as Appendix "E" to the Agenda of the meeting) was considered by the Committee and the proposal was recommended to the Board for acceptance in principle, subject to the condition that a suitable ration scale, to be agreed by the Supply Services, be accepted and to the over-riding condition that such labour camps would only be established for operational reasons.

7. The following letters were received by the Committee:-

HQ AAI letter 1047/17/Q1, dated 22 March 44.
No.3 District letter 713Q, dated 16 March 44.
No.2 District letter 1427Q, dated 15 March 44.

and it was decided that in view of the acceptance by the Committee of ACC's proposals (para.5 above), the proposals contained therein were already answered.

8. The Committee recommended to the Board that ACC be requested to bring all possible pressure to bear on the Italian Government to publish the draft order already laid before the Labour Department of the Italian Government directing the requisitioning of civil labour.

9. The next meeting of the Committee will be held on MONDAY, 1 MAY 44, at 14.30 hours in the Conference Room, HQ AAI (Adm Sch).

2 APR 44

6232

Declassified E.O. 12356 Section 3.3/NND No. 785019

SUBJECT:- Rates of Pay - Civilian Labour

Rear HQ Eighth Army,
CMF.

HQ AAI (Adm Echelon)

R 2552 Q

25 March 44

Ref para.5 of Adm Instr No. 24 dated 24 Jan 44, the following recommendations are forwarded:-

1. As the cost of living is very much cheaper on the Eastern L of C, the higher rates of pay as authorised by the a/q Adm Instr were not promulgated in Eighth Army Area. The existing rates for unskilled labour on the east coast (viz: Head Gangér 70 Lire, Ganger 60 Lire, Unskilled Labourer 50 Lire, Unskilled Woman 40 Lire, Boy 30 Lire) remain in force.

2. Increases of pay above the minimum rate for all classes of labour other than unskilled were permitted when absolute necessity was proved and on application being made on AFC 370.

The following was the appropriate scale of increases allowed:-

Good Craftsmen	5 Lire per day
Very Good Craftsmen	10 Lire per day
Exceptional cases (i.e. Charge hands)	15 Lire per day

3. No rations or mid-day meals were issued to civilian labourers.

4. It is strongly recommended that the rates outlined in para.1 remain in force in the area recently vacated by Eighth Army.

5. The following percentage decreases on the basic rates for NAPLES are strongly recommended for the late Eighth Army Area with the exception of those grades quoted in para.6.

Supervisory and Clerical Grades	-	No change
Artisan Grades and all other Grades	-	Min rate 17%, max rate 19% except unskilled labour
Unskilled labour	-	Male 30% Female 25% Boys 16%

6. The rates of the following grades should remain unchanged from those quoted in Adm Instr No.24:

(a) Minimum rates for: Foundryman, Machine Minder (Asst), Permanent Way inspector.

Declassified E.O. 12356 Section 3.3/NND No. 785019

Ganger 70 Lire, Ganger 60 Lire, Unskilled Labourer 50 Lire, Unskilled Woman 40 Lire, Boy 30 Lire) remain in force.

2. Increases of pay above the minimum rate for all classes of labour other than unskilled were permitted when absolute necessity was proved and on application being made on AFC 370.

The following was the appropriate scale of increases allowed:-

Good Craftsmen	5 Lire per day
Very Good Craftsmen	10 Lire per day

List of Male Workers' Qualifications Displaying Hard Works

(Heavy Works - "lavori pesanti")

Premise: The following list points out, for each industry's category, the specific qualifications of workers displaying hard works. Then the workers belonging to following categories must be considered displaying hard work even if they work near Commercial, Agricultural or State Concerns and independently of Firm of worker's syndical settlement.

General qualifications: Persons displaying work for the conveyance, loading and unloading of weighty goods and fatiguing works of cleanness.

Specific qualifications in industry's various sectors:

1. Millers, Soup-past makers, rice-workers and threshers: Kneading workers, wheat-washers, kneading machine workers, drivers of engines for cereal's thrashing and for agricultural mechanical works (season-works).

2. Agriculture and foodstuffs: (milk, its derivatives and meat working) Cellar workers, can-workers, distributors, cheese-makers, slaughterers, refrigerator-workers, flaying workers.

3. Soda,waters, beer, ice, saltus: Refrigerator-workers.

4. Wins and liquors: Packing-workers.

5. Wood: Hand-sawyers.

6. Paper and printing: Driver and Fireman Steam Roller, Engine, wood hands, machine workers.

7. Chemistry: pyrites furnaces feeding workers, carbide of calcium furnaces feeding and casting workers, phosphates packing workers, oily seeds pressing workers, pressing filters workers.

8. Tanning: Hand cleaning workers, soles refining workers, pressing machine

Pws a Lew 9/12

Subject:- Local Resources in Italy - Mainland and Islands.

A. AAI (Main E.B.)
C.M.F.

2059/1/Q2.

24 Mar 44.

1. As the result of the cancellation of AFHQ Adv Adm Echelon Administrative Instruction No. 26, dated 7 Feb 44, and of the issue of AAI Administrative Instruction No. 8 dated 20 Mar 44, on Procedure in regard to the Procurement and Allocation of Local Resources in Italy - Mainland and Islands - the Lists of Controlled and Restricted Items published as Annexures to the former Administrative Instruction are no longer in force.

2. It is therefore notified in accordance with paragraph 4 of AAI Administrative Instruction No. 8, that the items shown in Annexure "A" to this letter are declared to be either CONTROLLED or RESTRICTED within the Mainland of Italy. Lists of further items declared to be CONTROLLED or RESTRICTED within the Mainland of Italy will be published as annexures to this letter.

3. The procedure in regard to promulgation of lists of items declared to be either CONTROLLED or RESTRICTED in Sicily or in Sardinia is also set out in paragraph 4 of the Administrative Instruction in question.

(V Howard)
for Major General,
Chief Administrative Officer.

AAI ADMINISTRATIVE INSTRUCTION NO. 8

LOCAL RESOURCES IN ITALY - MAINLAND AND ISLANDS

1. Further to ACC Administrative Instruction No.1 and with special reference to para 9, the following procedure will be adopted, as far as local conditions permit, by:-

AFLR (ITALIAN) BOARD
AFLR (SICILIAN) BOARD
AFLR (SARDINIAN) BOARD

in order to co-ordinate the procurement and allocation of Local Resources within the territory under command HQ AAI.

2. This co-ordination will be performed by the Local Resources Section of this HQ - this Staff Section is responsible to the CAO, through the D/CAO or DCMG, for carrying out the policies laid down by this HQ or by AFHQ. It may correspond with and receive instructions from Allied Force Local Resources Section, AFHQ, direct on matters of a technical nature as laid down in AFHQ Administrative Memorandum No. 77 of 11 Nov 43.

Generally, this Section will supervise the activities of the three Boards in their respective territories and will co-ordinate their relations with one another and with HQ ACC.

3. DEFINITIONS

The following definitions, as applied to commodities/materials required by the Procurement Services and Agencies of the Allied and Co-belligerent Forces, will be adopted in all communications regarding Local Resources:-

(a) FROZEN. Stocks of a commodity/material in short supply, located in civilian hands, required by the Allied or Co-belligerent Forces, will be FROZEN by ACC/AMG if so requested by the appropriate Committee of the Local Resources Board concerned, i.e., direct procurement by civilians will be prohibited.

(b) CONTROLLED items are those the allocation of which as between all consumers, military and civilian, must be made by the appropriate Local Resources Board, or by a duly authorised Committee of that Board.

(c) RESTRICTED items are those which can only be procured by the Allied and Co-belligerent Forces after the essential needs of the civilian population have been met. Available balances, within its territory, will be declared and allocated by the Board, or by a duly authorised Committee of the Board.

(d) UNCONTROLLED items are those in sufficient supply to meet both military and civilian needs, and, consequently, not scheduled as either CONTROLLED or RESTRICTED.

Declassified E.O. 12356 Section 3.3/NND No. 785019

in order to co-ordinate the procurement and allocation of Local Resources within the territory under command HQ AAF.

2. This co-ordination will be performed by the Local Resources Section of this HQ - this Staff Section is responsible to the CAO, through the D/CAO or DCMG, for carrying out the policies laid down by this HQ or by AFHQ. It may correspond with and receive instructions from Allied Force Local Resources Section, AFHQ, direct on matters of a technical nature as laid down in AFHQ Administrative Memorandum No. 77 of 11 Nov 43.

Generally, this Section will supervise the activities of the three Boards in their respective territories and will co-ordinate their relations with one another and with HQ ACC.

3. DEFINITIONS

The following definitions, as applied to commodities/materials required by the Procurement Services and Agencies of the Allied and Co-belligerent Forces, will be adopted in all communications regarding Local Resources:-

(a) FROZEN. Stocks of a commodity/material in short supply, located in civilian hands, required by the Allied or Co-belligerent Forces, will be FROZEN by ACC/AAF if so requested by the appropriate Committee of the Local Resources Board concerned, i.e., direct procurement by civilians will be prohibited.

(b) CONTROLLED items are those the allocation of which as between all consumers, military and civilian, must be made by the appropriate Local Resources Board, or by a duly authorised Committee of that Board.

(c) RESTRICTED items are those which can only be procured by the Allied and Co-belligerent Forces after the essential needs of the civilian population have been met. Available balances, within its territory, will be declared and allocated by the Board, or by a duly authorised Committee of the Board.

(d) UNCONTROLLED items are those in sufficient supply to meet both military and civilian needs, and, consequently, not scheduled as either CONTROLLED or RESTRICTED.

4. Schedules of CONTROLLED and RESTRICTED items will be issued through Command Channels on the recommendation of the Board concerned and will be circulated, in triplicate, by each Board to the other two Boards. Separate lists of CONTROLLED and RESTRICTED items will be maintained in respect of each Committee established. Each schedule will bear a serial number, and every item in a schedule will also bear a running serial number. They will be frequently reviewed by the Committee concerned and every effort will be made to keep the lists as small as possible.

6227

An item declared RESTRICTED or CONTROLLED in one territory need not necessarily be either controlled or restricted in another.

2/..... PROCEDURE: .....

Declassified E.O. 12356 Section 3.3/NND No. 785019

5. PROCEDURE

The following procedure in connection with allocations will be adopted:-

(i) Applications for controlled and restricted items in regular demand will be submitted by interested Services and Agencies monthly on a day to be fixed, but not less than 72 hours before the date of meeting of the Local Resources Board or of the Committee concerned, as the case may be. Bulk demands for civil requirements will be submitted by HQ ACC.

At the same time the organisation responsible for the submission of figures of availabilities will lodge particulars.

Applications for items not in regular demand, or emergency requirements, may be submitted at any time.

(ii) Applications will be submitted in duplicate on a proforma similar to that at Appendix "A". The stock on hand will be listed together with the estimated days of supply. To aid in assessing priorities, applications will indicate whether requirements are:-

(a) Urgent operational
(b) Normal maintenance
(c) Stockpiling requirements

(iii) After allocation by the Board/Committee, the Board will issue release orders, in duplicate, signed by a Vice-Chairman, endorsed, where necessary, by ACC/ AMG or other appropriate agency, to the Demanding Service or Agency, copy to ACC or other controlling agency. Any balance not drawn within the specified period will be forfeited.

(iv) When Services or Procurement Agencies are unable otherwise to obtain stocks of items required by them which are manufactured by, or held under the control of, a particular Service or Agency, the Board or Committee concerned may direct that such stocks will be held either in whole or part pending allocation. This allocation will be evidenced by the issue of an official Release Note signed by a Vice-Chairman of the Board. This authority does not extend to the case of items imported from outside the command by Services on military tonnage.

6. In general, when assessing the relative priorities of demands for CONTROLLED or RESTRICTED items, the following table should be used as a guide:-

CATEGORY	PRIORITY	
	Restricted	Controlled
Requirements of the Armed Forces within, or based upon, the territory for which the Board is responsible.	2	1
Essential civilian requirements within the territory for which the Board is responsible.	1	2

Declassified E.O. 12356 Section 3.3/NND No. 785019

[illegible] items not in regular demand, or emergency requirements, may be submitted at any time.

(ii) Applications will be submitted in duplicate on a proforma similar to that at Appendix "A". The stock on hand will be listed together with the estimated days of supply. To aid in assessing priorities, applications will indicate whether requirements are:-

(a) Urgent operational
(b) Normal maintenance
(c) Stockpiling requirements

(iii) After allocation by the Board/Committee, the Board will issue release orders, in duplicate, signed by a Vice-Chairman, endorsed, where necessary, by ACC/AMG or other appropriate agency, to the Demanding Service or Agency, copy to ACC or other controlling agency. Any balance not drawn within the specified period will be forfeited.

(iv) When Services or Procurement Agencies are unable otherwise to obtain stocks of items required by them which are manufactured by, or held under the control of, a particular Service or Agency, the Board or Committee concerned may direct that such stocks will be held either in whole or part pending allocation. This allocation will be evidenced by the issue of an official Release Note signed by a Vice-Chairman of the Board. This authority does not extend to the case of items imported from outside the command by Services on military tonnage.

6. In general, when assessing the relative priorities of demands for CONTROLLED or RESTRICTED items, the following table should be used as a guide:-

CATEGORY	PRIORITY	
	Restricted	Controlled
Requirements of the Armed Forces within, or based upon, the territory for which the Board is responsible.	2	1
Essential civilian requirements within the territory for which the Board is responsible.	1	2
Those of the Armed Forces, other than 1, under command AAI.	4	3
Essential civilian requirements in other Italian territory.	3	4
Those of the Armed Forces, other than 1 and 3, under command AFHQ	5	5
Exportation, other than 3, 4 and 5.	6	6

All proposals for exportation of RESTRICTED or CONTROLLED items accepted by any one of the three Boards will first be referred to the Local Resources Section, this HQ, who, on approval, will issue the appropriate release instruction to HQ ACC.

3/..... 7. SURPLUS STOCKS .....

Declassified E.O. 12356 Section 3.3/NND No. 785019

14538

7. SURPLUS STOCKS

Stocks surplus to requirements under priorities 1 and 2 (para 6 above) of items appearing in lists of CONTROLLED and RESTRICTED items issued through the intermediary of another Board, will be notified to the interested Board on proforma as Appendix "B", with two copies to Local Resources Section, this HQ.

Interested Boards will notify their demands, in duplicate, for such items direct to Local Resources Section, this HQ, stating the purposes for which the items are required. Local Resources Section will collate such demands and make allocations between Boards as necessary.

Surplus stocks of items not appearing on any CONTROLLED or RESTRICTED lists, but which might possibly be of interest to other Boards, should also be promptly notified to Local Resources Section, this HQ, in duplicate.

8. AFHQ has agreed that the Local Resources of SICILY shall be made available to the islands of MALTA and GOZO. For the purpose of assessing priorities MALTA and/or GOZO shall be deemed to be a part of SICILY. Demands should be submitted direct to the Sicilian Board by the Lieut-Governor, Malta.

9. Questions within the scope of the TO/WE of AFLRS, AFHQ, regarding officer and enlisted other rank personnel, arms and equipment, vehicles and the like - other than those of local administration - will be referred to the Local Resources Section, this Headquarters.

10. AFHQ Adv Adm Echelon letter 59/19 of 21 Nov 43, and Administrative Instruction No. 26, of 7 Feb 44, are cancelled.

11. INTERCOMMUNICATION

All communications intended for the Allied Force Local Resources (Italian) Board, or its Committee, will be addressed to Local Resources Section, this HQ.

ENGINEERING MATERIALS COMMITTEE.

MINUTES OF ENGINEERING MATERIALS COMMITTEE MEETING.

1. The fourth meeting of the Engineering Materials Committee was held at 0930 hours 14 January 44 in the Conference Room, FLAMBO.

Present :-

Brigadier D.L. ANDERSON, D.D.W., FLAMBO (Chairman) and representatives of :-

R.N. (FOWIT)
D.D.W., FLAMBO
C.E., P.B.S.
C.E., No. 2 District
D.G.M.R. (Inc. Tn.) (Br)
ORD (Br)
M.G.S. (Adv)
A.M.G., HQ., C.M.F.

in attendance :-

Vice Chairman (Am) Allied Force Local Resources (Italian) Board
Vice Chairman (Br) Allied Force Local Resources (Italian) Board

and five others.

2. The Minutes of the last meeting of 20 Dec 43 were accepted.

3. The formation of a Miscellaneous Purposes Committee was noted. There were no other matters arising out of the meeting of the Board of 28 Dec 43.

4. Reports were received from AMG/ACC on

(a) Taking over cement works. AMG/ACC stated that they hoped to take over, commencing about Feb 15, on a plant by plant basis. Necessary details to be arranged by AMG/ACC with appropriate Military authority.
(b) Selling price of coal. It was stated that the price of coal had been fixed by C.E.C. and would be published in the course of the next few days.
(c) Increase of Oxygen production. The report was received.

ENGINEERING MATERIALS COMMITTEE.

MINUTES OF ENGINEERING MATERIALS COMMITTEE MEETING.

1. The fourth meeting of the Engineering Materials Committee was held at 0930 Hours 14 January 44 in the Conference Room, FLAMBO.

Present :-

Brigadier D.L. ANDERSON, D.D.W., FLAMBO (Chairman) and representatives of :-

R.N. (POWIT)
D.D.W., FLAMBO
C.E., P.B.S.
C.E., No. 2 District
D.G.M.R. (Inc. Tn.) (Br)
OHD (Br)
H.G.S. (Adv)
A.M.G., HQ., C.M.F.

in attendance :-

Vice Chairman (Am) Allied Force Local Resources (Italian) Board
Vice Chairman (Br) Allied Force Local Resources (Italian) Board

and five others.

2. The Minutes of the last meeting of 20 Dec 43 were accepted.

3. The formation of a Miscellaneous Purposes Committee was noted. There were no other matters arising out of the meeting of the Board of 28 Dec 43.

4. Reports were received from AMG/ACC on

(a) Taking over cement works. AMG/ACC stated that they hoped to take over, commencing about Feb 15, on a plant by plant basis. Necessary details to be arranged by AMG/ACC with appropriate Military authority.

(b) Selling price of coal. It was stated that the price of coal had been fixed by C.E.C. and would be published in the course of the next few days.

(c) Increase of Oxygen production. The report was received.

5. A report was received from the Sub-Committee established at the last meeting 20 Dec 43 on the possibilities of increasing the production of oxygen and acetylene.

(a) OXYGEN.
The present production is approximately 2,200,000 cu ft less than monthly requirements, but the report indicated that production can be increased to cover these requirements. The Sub-Committee was instructed to recommend a method of increasing the production taking into account the report of AMG/ACC (referred to in para 4 above). The Electric Power Committee was to be requested to state whether adequate electric power could be made available to CROTONE from SILA.

6222

Declassified E.O. 12356 Section 3.3/NND No. 785019

The Local Resources Section was instructed to write to M.A.A.F. requesting that skilled technical personnel of Military Gas Generating Units at present unemployed through mechanical breakdown of military plants, be spared to assist civilian manufacturers in increasing production.

(b) ACETYLENE.
The monthly requirements exceed the present production by approximately 400,000 cu ft. The Local Resources Section was asked to request the D.Q.M.G. to give the proposed extension of the Castellammare plant the highest priority. The Sub-Committee was instructed :-

(i) To recommend a method of increasing production taking into account the report submitted by AMG/ACC.
(ii) To investigate possibilities of substituting Hydrogen in place of Acetylene for appropriate military uses.
(iii) To study the possibilities of employing low pressure generators, plans of which have been received from Middle East.

6. Matters arising out of the allocation made at the previous meeting (20 Dec 43) were discussed

(a) TIMBER.
No change in existing arrangements.

(b) CEMENT.
Present allocation satisfactory but it was pointed out to AMG/ACC that in future individual requests would not be accepted. AMG/ACC undertook to instruct their representatives to group all civilian requirements so that they would be submitted in bulk to the Committee.

(c) GLASS.
AMG/ACC stated that they were taking steps to have the SALERNO plant commence production in three months time, when ample supplies should be available.

(d) GASES.
No change in existing allocation arrangements.

7. Report of availability from AMG/ACC was received (Appendix A). The following allocations were made :-

STEEL BILLETS - D.D.W. and P.B.S. to share on basis of milling capacities.
LEAD SHEETS & BILLETS - No allocations necessary. AMG/ACC undertook to reserve for military requirements 1,200 tons.
TANKS - D.D.W. and P.B.S. to explore together the possibility of the use of CARMINO SALVATORE EU VINCENZO, Naples for the manufacture of tanks for military needs. A limited quantity of aeroplane fuel tanks are available at Salvage dumps.
STRUCTURAL STEEL. - As most of the structural steel notified as available is under the control of the R.N., users of this material were instructed to submit their requirements to R.N.
TUBULAR SCAFFOLDING - D.D.W. and other users to contact P.B.S. who will assist in meeting requirements.
WELDING ROD. - Availability notified in SICILY to be applied for through

Declassified E.O. 12356 Section 3.3/NND No. 785019

place of Acetylene for appropriate military uses.

(iii) To study the possibilities of employing low pressure generators, plans of which have been received from Middle East.

6. Matters arising out of the allocation made at the previous meeting (20 Dec 43) were discussed

(a) TIMBER.
No change in existing arrangements.

(b) CEMENT.
Present allocation satisfactory but it was pointed out to AMG/ACC that in future individual requests would not be accepted. AMG/ACC undertook to instruct their representatives to group all civilian requirements so that they would be submitted in bulk to the Committee.

(c) GLASS.
AMG/ACC stated that they were taking steps to have the SALERNO plant commence production in three months time, when ample supplies should be available.

(d) CASES.
No change in existing allocation arrangements.

7. Report of availability from AMG/ACC was received (Appendix A). The following allocations were made :-

STEEL BILLETS - D.D.W. and P.B.S. to share on basis of milling capacities.
LEAD SHEETS & BILLETS - No allocations necessary. AMG/ACC undertook to reserve for military requirements 1,200 tons.
TANKS - D.D.W. and P.B.S. to explore together the possibility of the use of CARMINO SALVATORE FU VINCENZO, Naples for the manufacture of tanks for military needs. A limited quantity of aeroplane fuel tanks are available at Salvage dumps.
STRUCTURAL STEEL. - As most of the structural steel notified as available is under the control of the R.N., users of this material were instructed to submit their requirements to R.N.
TUBULAR SCAFFOLDING - D.D.W. and other users to contact P.B.S. who will assist in meeting requirements.
WELDING ROD. - Availability notified in SICILY to be applied for through service channels.
ZINC - The 700 tons reported available at CROTONE was released to AMG/ACC at their request.
ANTIMONY - In view of small availability interested services were requested to declare their requirements at next meeting. The Local Resources Section to ascertain the requirements of R.E.M.E., and to direct the latter to freeze existing stocks pending allocation.
PLUMBING FIXTURES - To P.B.S.
BELTING - Availability notified in SICILY to be applied for through service channels.

8. The requirements of services for :-

6227

LEAD were 1,200 tons for 1944.
ZINC were negligible.

Declassified E.O. 12356 Section 3.3/NND No. 785019

9. The following list of priority articles was received :-

Pitch for caulking.
Tin.
Brass rods.
Monel metal.
Molybdenum.
Manufacturing facilities for matting for aerodrome runways.
Resin.
Horseshoes and horseshoe nails. (AMG was instructed to notify P.B.S. and ORD (Br) direct, immediately any of these were located).
Chromium.
Nickel.
Sulphuric acid.
Pure mercury.
Raw materials for paint.

10. Royal Navy agreed to report on availability of steel air cylinders at ANSALDO WORKS POZZUOLI, for storage of gas.

11. It was decided that priority items notified in previous meetings were to be considered as controlled items, i.e., the allocation of these items must be recommended to the Board by the Committee.

12. The election of Tn(Br) as a member of the Committee was recommended to the Board.

13. The next meeting to be held at 0930 hours 11 Feb 44 in the Conference Room, FLAMBO.

Major J.C. RAMSDEN,
Joint Secretary (Am)

Capt. S.J.B. LOUDEN,

ALLIED FORCE LOCAL RESOURCES (ITALIAN) BOARD.

Ref: 7/2/LR

Date: 3 Dec. 43.

A Meeting of the Engineering Materials Committee will be held in the Conference Room, this H.Q. on Monday, 6th Dec. 43 at 1030 hrs to consider the following Agenda:-

1. Minutes of the Previous Meeting.

2. Matters arising out of the Meeting of the Board held on 29th Nov. 43.

3. To receive a report from MAC/ACC regarding availability of Timber, Cement, Glass, and Industrial Gases.

4. To decide on a list of next priority articles.

5. To propose a list of articles to be controlled.

6. To receive estimates of requirements and to recommend allotments.

7. To consider the machinery by which these allotments shall be effected.

NUMBER 78)

ALLIED FORCE LOCAL RESOURCES (ITALIAN) BOARD

1. Pursuant to Administrative Memorandum No. 77, this headquarters, as, the Allied Force Local Resources (Italian) Board is hereby set up to carry out the policies of this headquarters in regard to the local procurement and allocation of supplies, facilities and services, except rail and water transport and petroleum, required by the military within the Italian Mainland, now or in the future, occupied by the Armed Forces under the command of this headquarters.

2. The Board will coordinate all Navy, Army and Air Forces requirements from local resources and decide on policies and procedure for the procurement of them. It will allocate to the interested agencies of the Armed Forces the local resources available for each.

3. In giving effect to paragraph 3 of Administrative Memorandum No. 77, this headquarters, as, the Board will work in liaison with the Allied Control Commission and Allied Military Government.

4. Nothing in this Administrative Memorandum shall abrogate the responsibility of the Allied Control Commission, or Allied Military Government to utilise and develop the local resources of ITALY.

5. The Board will be constituted as follows:

Chairman — Major General Sir Brian H. Robertson, Bt, D/C.A.C.

Vice Chairmen — Lt. Colonel Thomas R. Gibbon, U.S.)) Lt. Colonel, J.L. Prescott, RE.)

Members — D.F./C.A.C.
Commanding General, Peninsular Base Section.
General Officer Commanding, No. 2 District.

ADMINISTRATIVE INSTRUCTION
NUMBER 77

ALLIED FORCE LOCAL RESOURCES SECTION

1. The Allied Force Local Resources Section (A.F.L.R.S.) is hereby established as a Staff Section of this headquarters under the supervision of G-4, this headquarters.

2. The Section will:

a. Be responsible for the organization within various designated territories in this theater of operations, of local Boards to coordinate the procurement and allocation of all forms of local resources and services, except such as are allocated to other agencies available to the Armed Forces.

b. Assist the respective boards in the development of information concerning local supplies and facilities and aid the Boards in the procurement of local supplies and facilities required for the Armed Forces.

c. Through the Allied Force Headquarters Middle East Administrative Information Section (A.F.M.A.I.S.) obtain information concerning the Middle East Supply Center resources which may be made available to this headquarters.

3. The local Boards will ascertain what is available to the Armed Forces and coordinate prices to be paid, in liaison with the Allied Control Commission, Allied Military Government, or other government authority responsible for controlling the economy of the territory in which the Board is operating.

4. The Section will recommend to G-4, this headquarters, the basic policies under which the local Boards will operate. It will be responsible for the execution of these policies by the local Boards. Any matters for decision by higher authority will be forwarded by the Chairman to this headquarters.

5. The Chairman of local Boards will be appointed by this headquarters.

6. Each Board will be composed of a Chairman, Vice Chairman or Vice Chairman (U.S. and British) as the case requires, a Secretariat and such members of the Board as the Chairman may, from time to time designate.

7. By direction of the respective Chairman, the Vice-Chairman will be responsible for providing A.F.L.R.S. with copies of all minutes of the Board Meetings and such other reports as may from time to time be required.

(AG 321(AFHQ) GRD-AGO)

together with such other persons as the Chairman of the Board may from time to time designate.

6. The Vice Chairman shall be officers designated for full time duties with the Board.

7. Members of the Board may designate one permanent officer to act as substitute for them in the event of their absence.

8. The Board shall meet regularly, as directed by the Chairman or Vice Chairmen.

9. There will be a permanent joint U.S. and British Secretariat of the Board responsible for maintaining records of all meetings and furnishing the secretarial requirements of the Sub-Committees referred to in paragraph 12 below.

10. The Allied Control Commission will provide the Board with information regarding local resources of all kinds and also state the minimum needs of civilian requirements. The Board will, in coordinating the needs of all interested agencies of the Armed Forces with the needs of the Control Commission, allocate to the Military Agencies concerned the local resources available for each.

11. Any matters for decision by higher authority will be forwarded by the Chairman to this headquarters.

12. To assist it to carry out its functions, the Board may establish Sub-Committees as necessary. The membership and duties of these Sub-Committees will be determined by the Board, which will insure that all interested parties are represented.

13. Additional Boards, where necessary, under the Chairmanship of the Base Section Commander (American) or Commander Base Sub-Area (British), as the case may be, may on the advice of the Board, be set up as necessary to deal with local questions. The name of any additional Boards set up will indicate the areas for which they are responsible to the Allied Force Local Resources(Italie) Board set up by this memorandum. (AG 321(AFHQ) OPD-ACS)
