ASSOCIAZIONE NAZIONALE DISTILLATORI CARBONI E DERIVATI

Ga/Ni

Roma, li 11 Agosto 1945

OGGETTO:

VIA DEI GIARDINI, 42 - TEL. 40-507

COMMISSIONE ALLEATA
SOTTOCOMMISSIONE INDUSTRIA
Public Work Utilities
R o m a

128

In conformità della richiesta verbale da Voi fatta-
ci, Vi alleghiamo un prospetto contenente, per ciascuna del-
le officine da gas private e municipalizzate del Piemonte,
Lombardia e 3 Venesie, i seguenti dati:

Consumi di fossile estero dell'anno 1939
" giornalieri di fossile estero dell'anno 1939
Consumi previsti di fossile per una distribuzione giornaliera
di gas di 3 ore
Consumi di carbon coke per il pre-riscaldamento dei forni.

I consumi sono esposti in cifra media giornaliera, ma
devesi tener conto dei consumi stagionali specie quando si
procede a stabilirne le assegnazioni officina per officina.

Facciamo presente che nel calcolo del consumo di fos-
sile per la distribuzione di gas per tre ore, abbiamo seguito
criteri molto restrittivi, tenuto conto delle possibilità te-
cniche delle singole officine, del tipo di forni, nonché delle
particolari condizioni di consumi locali. I quantitativi espo-
sti rappresentano quindi il minimo indispensabile per una di-
stribuzione di gas ai privati ridotta a tre ore giornaliere.

Non abbiamo previsti i consumi industriali non conoscen-
do se le industrie potranno o meno riprendere subito la loro
attività. Ad esempio per l'officina di Torino è escluso anche
nel consumo di fossile del 1939 il consumo per il gas agli sta-
bilimenti Fiat. Qualora il gas dovesse essere distribuito an-
che per l'industria, occorre maggiorare i quantitativi riporta-
ti da adeguate quote in relazione alle necessità dell'industria
di ogni singolo centro.

Restiamo a disposizione di codesto spett. Ufficio per
offrire la ns/ collaborazione anche nel caso che i dati rimessi
Vi occorran per le officine della Liguria.

Distinti saluti.

MEMORANDUM.

To: Col. E. J. Histedt.

124A

1. Referring to letter Piemonte Region dated 26 July referring to operation of gas plants.

2. It is suggested that this Sub-Commission request the Coal Section, Industry Sub-Commission, to allocate sufficient coal to permit operation for 3 hours daily of gas plants in Piemonte, Liguria, Lombardia and Venezia. (Note: 3 hours daily operation requires approx. 50% of coal normally used for 24 hours operation).

60%

3. It is further suggested that cables be sent to Regional Commissioners in Liguria, Lombardia and Venezia, requesting information similar to that furnished by Piemonte.

4. An excellent case can be made for the allocation of coal to gas plants, particularly in the metropolitan areas. Reasons for doing so include:-

- (e) (a) Relief of unemployment in the gas industry.
- (b) (b) Gas supplied thru existing distributing mains provides the most economical source of fuel for cooking.
- (a) (c) If no gas is provided, the use of electric ranges, hot-plates, etc. will be widespread and the local electric distribution systems will be unable to carry the additional load.
- (f) (d) Gas is now available in a number of cities in Italy. Including Rome, Naples, Florence, and approximately ten other cities. If service is continued in these cities this coming winter, and no service is available in the metropolitan centers of the North, justified criticism will undoubtedly result.
- (c) (e) Coke is in short supply. A portion of the coke required for industry ~~should~~ be provided by the distillation of coal in the gas plants. *could*

5. Thirty to sixty days will be required to bring the ovens up to generating temperatures. If gas is to be supplied this winter coal or coke should be made available for pre-heating the ovens in September.

(d) - Bitumen, also, is in short supply. Tar, a by-product of gas plant operation is equally good for road work, and the entire production can be used by the Benito Mussolini organization.

Subject: Coal for Gas Works

To: HQ.AC. Industry Sub Commission
HQ.AC. Commerce Sub Commission - Coal Section
Public Works & Utilities Sub Commission
AC. Northern HQ.
AF.HQ. Coal Section - Attached Movements - Genoa

1. The attached copy of letter received from Region Engineer - Piemonte Region - is forwarded for consideration.
2. With regard to par. 3 of the attached letter which refers to Industrial use of gas, the additional coal would supply the high pressure system 24 hrs./day and in the case of Fiat Mirafiori and Fiat Torriero would enable a saving of 40 Tons/day of coal at present consumed on these plants. The supply of gas to Phillips is an additional expenditure as this factory is not at present operating. The factory is, however, capable of starting up at any time and it is desirable that it should do so to alleviate unemployment; it is closed down now because of the lack of gas and the fact that a surplus of bulbs exists in stock.
3. With regard to the programme generally, it is highly desirable that gas be available as soon as domestic heating becomes necessary due to colder weather, as domestic ^{electric} circuits, transformers etc. are already overloaded because of the additional consumption for cooking purposes in-

659.

-2-

posed by lack of fuel. Gas would ease the strain of these circuits which if they have the additional load of domestic heating imposed will certainly break down.

4. It is emphasized that the preheating period in the case of Turin is 45 days and 20 days in the case of smaller plants and for this reason an early decision on the policy to be adopted is requested.

5. The total coal required by Piemonte Region for 3 hrs. gas/day is 300 Tons/day which represents 33% of the coal allotted for August 1945.

It follows, therefore, that this programme will, unless supported by additional coal allotment, involve serious curtailment in the coal allotted to industry at a time when industries are just getting into stride with the imported raw materials which are expected to be arriving during the winter.

Turin, 25 July 1945

PR/ENG/7.43

SUBJECT: Coal and coke for Piemonte Gasworks

TO: Piemonte Regional Representative to
Milan Coal Committee

1. Enclosed prospectus is showing the requirements of coke for the preheating of ovens or retorts of Piemonte gasworks. The total amount is of 942.6 tons, preferably of size 20 to 70 mm.
2. It is also showing the minimum amount of gas coal necessary for a 3 hours daily gas distribution, for domestic purposes only. Said minimum amount is of 307.3 Tons/day. If 450 tons a day of coal were available a four hours daily gas distribution could be done; and with 540 tons a full service of 24 hours could be carried on.
3. As far as industrial load is concerned (Town of Turin only) a 20 tons more coal a day (that is a total of about 330 tons), would allow the service to all small industrial consumers connected to the low pressure distribution system; while 100 tons still more, (that is a total of 430 tons), would allow a more disposability of about 70,000 c.m. of gas a day (about 2,500,000 c.f.) to be distributed to the big industries (Fiat Mirafiori, Fiat Ferriere, Philips through the high pressure system.
4. The approximated disposal of coke available for sale (that is the production less the requirements for gas generators, boilers, etc.) and by-products, is shown by the following table, supposing that all the by-product plants can be operated and keeping in mind that most of the small gasworks are not equipped with by product plants.

126 refers

P.T.O.
1076

-2-

Distilled coal tons/day	Coke for sale Tons/day	Crude tar Tons/day	Crude Benzole Kg/day	Sulfate of Ammonia Kg/day
310	100	12	1,800	2,000
330	105	13	2,000	2,200
430	170	17	2,600	2,800
450	180	18	2,730	2,950
800	300	32	5,000	5,500

5. Time requested for preheating will be about 45 days for Turin gasworks; about 30 days for Novara and Asti, about 20 days for the remaining works.
Coke for preheating should be available daily in time, to start distillation as soon as coal will be available.
6. Gas for industrial use is badly needed. Gas production for domestic use in fall and winter months will be necessary either to relieve the electric load, that is already so high to menace the electric distribution system; either for allowing coke production necessary for domestic heating.

REPORT.

31 July 45

122

MEETING OF COAL REQUIREMENTS AND ALLOCATIONS COMMITTEE. (Chairman, Col P.R. Evans)

1. The first meeting of the Coal Requirements and Allocations Committee was held at H.Q. A.C. (Coal Division 7th floor) on July 31st 45 at 1200 hours.
2. The object of the Committee is to review coal requirements from figures supplied by the Italian Ministry and to decide allocations against availabilities. The functions of the Committee will eventually be handed over to the Italian Ministry.
3. It was agreed, for the month of August, to deduct 4000 tons from the chemical industry Lombardia, and 5000 tons from the chemical industry Piedmonte, and increase the allocations to general engineering each Region, by the respective amounts. (see items 10 and 12, schedule "B2") because it is considered that, owing to the expected import of cotton it will not be necessary to boost the manufacture of rayon, therefore the coal can be used to better advantage in engineering, and so relieve unemployment.
4. It is expected that there will be an increased availability of coal for September but, any increase will go to the North, the South and Central Italy will receive no more than at present.
5. The Ministry were invited to submit figures for September as soon as possible.
6. The meeting closed at 1325 hours.

L.G. Price, Major R.E.

OGGETTO: Consumo carbone per le centrali della Sardegna -

In relazione alla richiesta verbale fattami, comunico che il consumo di carbone per le centrali termoelettriche della Sardegna può essere definito nella quantità necessaria per produrre la quantità di energia risultante per differenza tra le richieste del consumo e le possibilità della produzione idrica.

In base alle statistiche del servizio idrografico è possibile accertare che per il semestre luglio-dicembre 1945 dovranno essere prodotti termicamente circa 46 milioni di Kwh., con un consumo di circa 41.000 tonn. di carbone così distribuite nei vari mesi:

Luglio	=	Tonn. 7000	(S. Caterina)
Agosto	=	Tonn. 7000	(S. Caterina)
Settembre	=	Tonn. 7000	(S. Caterina)
		Tonn. 3000	(S. Gilla)

Ottobre = Tonn. 8000

OGGETTO: Consumo carbone per le centrali della Sardegna -

In relazione alla richiesta verbale fattami, comunico che il consumo di carbone per le centrali termoelettriche della Sardegna può essere definito nella quantità necessaria per produrre la quantità di energia risultante per differenza tra le richieste del consumo e le possibilità della produzione idrica.

In base alle statistiche del servizio idrografico è possibile accertare che per il semestre luglio-dicembre 1945 dovranno essere prodotti termicamente circa 46 milioni di Kwh., con un consumo di circa 41.000 tonn. di carbone così distribuite nei vari mesi:

Luglio =	Tonn. 7000	(S. Caterina)
Agosto =	Tonn. 7000	(S. Caterina)
Settembre =	Tonn. 7000	(S. Caterina)
	Tonn. 3000	(S. Gilla)
Ottobre =	Tonn. 8000	(S. Caterina)
Novembre =	Tonn. 5000	(S. Caterina)
Dicembre =	Tonn. 4000	(S. Caterina)

Naturalmente le previsioni sono assai più difficili per il semestre gennaio-giugno 1946 essendo impossibile prevedere l'andamento idrologico a così lunga scadenza.

Sulla base degli elementi statistici che si possiedono, si può tuttavia prevedere per tale semestre il funzionamento della sola

%

centrale termica di S.Caterina, con un consumo complessivo di circa 25.000 Tonn. di carbone. Non è assolutamente possibile prevederne la distribuzione mensile, che per una prima ipotesi potrà essere considerata uniforme.

Sub. : Coal needed for electric generating
stations in Sardinia

To : P.W. & U. S/C, AC (Att. Lt.Col. Renton)

Reference to your verbal request I am hereby informing you that the amount of coal needed for the electric generating stations in Sardinia is based on the quantity necessary to produce the energy resulting in difference between demand for consumption and hydroelectric production.

On statistical basis of the hydrographic service it is possible to ascertain for the next six months July-December 1945 a thermal output of about 46,000,000 kWh with a consumptive capacity of 41,000 tons of coal, distributed as follows :

July	-	7,000 tons	-	S.Caterina Station
August	-	7,000 "	-	" "
September	-	7,000 "	-	" "
		3,000 "	-	S.Gilla Station
October	-	8,000 "	-	S.Caternia Station
November	-	5,000 "	-	" "
December	-	4,000 "	-	" "

Naturally it is more difficult to estimate the coal consumption for the six months January-June 1946 not being predictable the stream flow for this period.

On the base of the statistical data on hand it is estimated to operate for the period January-June 1946 only the S. Caterina Station with a consumptive total capacity of about 25,000 tons. It is not possible to foresee the monthly distribution, but it can be considered uniformly.

Public Works and Utilities Sub-Commission

Reference : 099/PWU

17 July 1945

Subject : Estimated coal requirementsTo : MINISTRY OF PUBLIC WORKS
(Att. Eng. Visentini)

1. Confirming the telephone conversation of to-day between your office and an employee of the Public Works and Utilities Sub-Commission it would be appreciated if information could be furnished as soon as possible concerning the monthly quantities of coal needed for each of the electric generating stations in Sardinia for the period of the next twelve months.
2. Because of the wide spread fuel shortage, quantities should be kept to a minimum.
3. Information is also requested if it is necessary to operate the S. Caterina Generating Station.

Copy to: Allied Commission
Electrical Sub-Commission,
Florence.

With reference to my letter Tn.A.3. (E) 12-105 of
6th June 1945 to Section Tn.2.

We have been advised by the Coal Section of Allied
Force Headquarters that an allotment of 500 tons of coal per
month has already been made to Richard-Ginori.

This quantity was demanded by Richard-Ginori through
the Allied Commission in Florence.

The Coal Section A.F.H.Q. request that if the
firm requires more than 500 tons of coal per month, an
additional demand should be submitted through A.C. for the
required amount, stating the orders for which it is required.

Will you please inform Richard Ginori accordingly.

Inter Office Memo.

102

26 May 45.

REFERENCE: 099.
SUBJECT : Coal for Solvay & G.
TO : Commerce Sub-Commission,
Coal-Div. (att: Col. Evans)
FROM : P.W. & U. S/O.

1. Ref. attached letter dated 7 May from Rosignano Solvay concerning coal delivery to Solvay.
2. We have communicated with Col. Cooley of P.B.S. and he states that it is correct that P.B.S. informed Solvay the coal was to be reserved for electricity purposes.
3. P.B.S. have now agreed that all coal at Solvay and future deliveries will be for industrial use and no further call will be made for coal for electricity supply.

TRANSLATIONSOLVAY & C.

Rosignano Solvay, 7th May, 1945.

TO : CENTRAL COAL OFFICE
MINISTRY OF COMMUNICATIONS

= ROME =

SUBJECT = Debiting for Sardinian Coal.-

Our Rome Office has passed us information regarding your letter dealing with an order for payment which was drawn on us by your Agenzia Marittima of Piombino, amounting to some 8.211.000 lire, in respect of 3887 tons of Sardinian coal consigned in April last to our Rosignano Works,

On this matter, we have to inform you that:

- 1) having signalled to the Command of the P.B.S. of Leghorn the arrival of the coal in question (for which, anyhow, our Firm was not in possession of any information) the said Command told us that such fuel had been destined solely for the production of electric power for Allied Military Units. For this reason the said coal should have been considered as deposited in our yards and we could not have used it in any way for our normal industrial purposes.-
- 2) Subsequently, with letter dated 19th April 1945, the A.C.H.Q. Coal Division informed the Industry Sub-Commission that the parcel of coal in question was to be destined for our chemical production. We suppose that, on this basis, you may have received the communication according to which payment for the a/m coal should be borne by us.
- 3) However, with letter of the 21st April, the P.B.S. of Leghorn confirmed us that this coal must be used for the production of electric power.

Under these circumstances, we are sorry to refuse acceptance of the order of payment issued by your Agenzia Marittima of Piombino and, moreover, we declare that we do not intend, in any case, to accept the charge for deferred payment which might be added to the said amount, in consequence of the delay in settling the question.

It will be our duty to revert on the matter as soon as a definite settlement of the question is reached.-

23 MAY 1945

Coal Division

Public Works & Utilities S/C AC
Ministry of Industry, Commerce & Labour

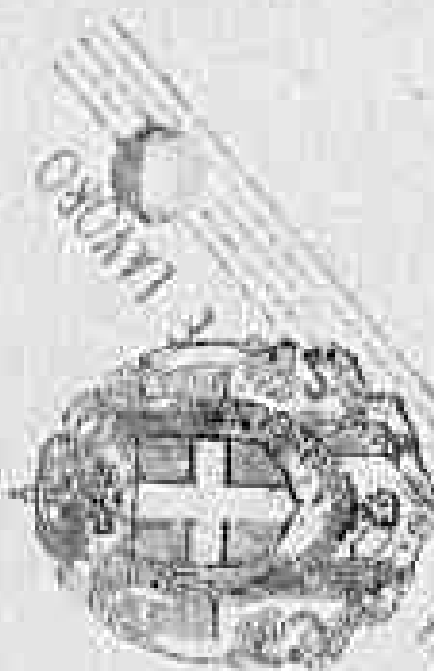

1. Agreement has been reached with the Ministry of Industry, Commerce and Labour on the quantity of coal to be supplied to Gas Works operating in territory under control of the Italian Government. Works in AMI territory will be supplied on a similar basis i.e., approximately 50% of normal consumption to those plants able to accept and operate.
2. A list of the works involved is attached. Against each is shown the quantity of coal to be consumed during May and monthly until further notice. Supplies from the ports of discharge will be regulated accordingly.
3. Ports of supply for Bologna and Perugia are Ancona and Civitavecchia respectively.

OGGETTO: Carbone Fiumicino

- 1) La A.C.E.A. e la S.R.E. hanno ricevuto dalla Coal Division la lettera che uniamo in copia.
- 2) Ci riferiamo al promemoria già trasmesso al riguardo il 24 Aprile al Maggiore Barry e al Maggiore Price.
- 3) Preghiamo notificarci se le due Centrali siano autorizzate a consentire alla S.tà Romana Gas il prelievo dai loro depositi delle 5.170 Tonn. di carbone estero.
- 4) A prelievo effettuato la scorta delle due Centrali si ridurrà da circa 9.000 a circa 3.800 Tonn. di carbone; tale scorta è sufficiente per 15 giorni di funzionamento con produzione giornaliera di circa 150.000 kWh.
- 5) Confermiamo che una scorta di carbone di lunga durata non può essere costituita con carbone sardo o con lignite senza pericolo di autocombustione e di conseguenti danni agli impianti.

Subject: Coal from Fiumicino

To : Headquarters Allied Commission
 P.W.&. Utilities Subcommittee.

- 1) AGEA and SRE have received from the Coal Section the alleged letter.
- 2) Reference to memorandum regard to subject, already presented on 24 th Avril to Maj Barry and to Maj Price.
- 3) We should like to know if the Power Stations are authorised to permit that Gas Company takes away from their stores 5170 tons of Imported Coal.
- 4) If the mentioned quantity will be delivered to Gas Company, the stocks of the Power Stations will be reduced from 9000 tons to 3800 tons; such quantity is sufficient for a fourtnight of fonctionnement With a daily production of 150.000kWh.
- 5) We confirme the impossibility to make a lasting coal-store with Sardinian coal on lignite for the danger of the spontaneous combustion, and consequently damages to the establishings.

Subject: Coal from Fiumicino.

TO : Società Romana per il Gas.
28, via Regina Elena, Rome.

1. Your letter of 27 April ref. Ing/EE/db d39/486 is acknowledged.
2. We note that a tonnage of 5170 tons of Imported Coal from Civitavecchia and consigned to you has been actually delivered to the yards of the two Electric Power Stations. You will recollect that at the relevant time, large quantities of coal were being brought in both from Gaeta and Fiumicino, but it is pointed out that the responsibility for delivering is that of the Italian State Railway and not this Headquarters.
3. It is requested that an agreement on the actual quantity said to have been incorrectly delivered be come to between yourselves and the Power Companies. Such agreed quantity shall be regarded as Gas Works stock and you will proceed to draw upon it as soon as possible for current consumption in order to make space available for Sardinian coal and lignite which is the fuel authorised for use at the Power Plants.

ALTO COMMISSARIATO PER LA SARDEGNA

C A G L I A R I

Cagliari, 16 APRILE 1945

Prot.No.10035 Div.II/Ep

All'INDUSTRY SUB-COMMISSION
MINING DIVISION A.C.HQ. = ROMAe p.c. MINISTERO DELL'INDUSTRIA, COMMERCIO E LAVORO
Direzione Generale Industria e Miniere
VII/Divisione = ROMA

REGIONAL MINING DIVISION = CARBONIA

OGGETTO: Carbone Sulcis

A seguito del foglio 9592, in data 8 corr.m. di questo Alto Commissariato, ed a parziale modifica di quanto esposto al 3° capoverso dello stesso foglio, causa l'andamento delle piogge contrario a tutte le più nere previsioni (in quest'anno l'altezza dell'acqua piovuta e' la più bassa finora registrata dalla costruzione della diga del Tirso, circa 25 anni) ha conseguentemente portato alla messa in marcia delle centrali termiche nel corrente mese anziche' ai primi del prossimo maggio, con un anticipo quindi di circa 20 giorni sul previsto.

Cio' posto le richieste di carbone Sulcis inviate alla Regional Mining Division di Carbonia (ridotte a 10,000 tonn. per ordine della stessa R. Mining D.) con l'entrata in marcia delle centrali termiche non possono più coprire i fabbisogni isolani.

Pertanto a dette richieste ^mamontanti a Tonn. 10,300 bisogna aggiungere almeno 4,000 Tonn. di minuto (-10) per la centrale di S. Caterina e Tonn. 2,500, sempre di minuto, per la centrale di S. Gilla che entrera' pero' in marcia ai primi del prossimo maggio.

In base ai nuovi dati forniti dalla S. Elettrica Sarda, e nella quasi certezza che per quest'anno non si avranno più piogge, la produzione di energia termoelettrica prevista dovra' essere elevata da Kwh 70.000.000 a Kwh 85.000.000 importanti un consumo di carbone Sulcis pari a 85.000 tonn. presumibilmente così divise:

Aprile	Tonn.	6,500
Maggio	"	8,500
Giugno	"	10,000
Luglio	"	10,000
Agosto	"	10,000
Settembre	"	10,000
Ottobre	"	10,000
Novembre	"	10,000
Dicembre	"	10,000
TOTALE	"	85,000

1033

transmission
attached

-2-

Per quanto sopra si prega codesta On/Commissione affinché voglia, con tutta urgenza, disporre che per il corrente mese possano essere prelevate in aggiunta alle 10,000 Tonn. già concesse altre 6,500 Tonn. di carbone Sulcis minuto (-10,, anche in considerazione che:

- a) la qualità del carbone occorrente non è del tipo normalmente richiesto per l'esportazione;
- b) il mancato funzionamento delle centrali termiche porterebbe come conseguenza l'arresto della maggior parte delle aziende industriali isolate Carboniera Sarda compresa.

L'ALTO COMMISSARIO PER LA SARDEGNA

(Gen. di Squadra Aerea: Pietro Pinna)

HIGH COMMISSION FOR SARDINIA
Cagliari

16 April 1945.

Prot. No. 10035

INDUSTRY SUB-COMMISSION
MINING DIVISION, HQ. A.C.
ROMA
MINISTERO INDUSTRIA COMM.
E LAVORO ROMA
REGIONAL MINING DIVISION
CARBONIA

SUBJECT: Sulcis Coal.

Reference our letter 9592, dated 8 April, and partially modifying para. 3 of the above, because of the poor rains worse than the darkest forecast (this year the rain fall is the lowest registered since the construction of the Tirso dike, about 25 years ago), we have been forced to put in operation the thermic centrals now rather than on first days of May, anticipating therefore of about 20 Days.

Consequently the requests of Sulcis coal send to the Regional Mining Division of Carbonia (reduced to 10,300 tons by order of the same Reg. Mining Division) are insufficient for the needs of the Island. Therefore the request of 10,300 tons must be augmented by at least 4,000 tons of minuto (-10) for the power station of S. Caterina and 2,500 tons (-10) for the power station of S. Gilla which will re-enter operations on the first of May.

According to the new data given by the S. Elettrica Sarda, and almost sure that for this year

1028

we will not have rains anymore, the production of power foreseen must be raised from KWH 70,000,000 to KWH 85,000,000 with a consumption of Sulcis coal of 85,000 tons presumably so divided:

April	tons	6,500
May	"	8,500
June	"	10,000
July	"	10,000
August	"	10,000
September	"	10,000
October	"	10,000
November	"	10,000
December	"	10,000
Total	"	85,000

In consideration of the above, we beg you to be allotted for April, beyond the 10,300 tons already gotten, 6,500 other tons of sulcis coal (-10), also considering that:

- a. The quality of coal needed is not the type usually required for exportation.
- b. The stoppage of the thermic centrals would be followed by the stoppage of the greater part of industries comprising the Carbonifera Sarda.

THE HIGH COMMISSIONER FOR SARDINIA
/s/ Pinna

(att: Coal Division)
FROM : P. Wks. & U. 3/C.

1. Attached is laboratory analysis of coal which is being used at the electric power stations in Sicily. This is the matter which I spoke to Col. Evans about informing him that the Sicilian company had complained about the poor quality of coal which they stated contained 40% ash.

2. This analysis has been handed to me by Eng. Asta of the Ministry of Public Works and I have informed him that on the basis of this analysis we are satisfied that the coal is quite suitable for burning on any of the boiler plants in Sicily.

3 May 45

89

1. Ref. your letter AC/CD/134/Commerce dated 1st May 45. It is noted that only 10% of the coal which Sarda Company complain about is being mixed with the output of Sardinian coal and this information will be passed to them.
2. With regard to the operation of two thermal power stations in Sardinia you may be assured that the company would not run thermal power plants if ample water was available. The poor quality of coal together with the lack of rainfall is, I am informed, the reason for the operation of the two thermal stations in Sardinia at this time.

Produzione termica

L'Ing. Fiorelli ci telefona che l'Ufficio di Carbonia della A.C. ha comunicato sarà fornito alle ns/ Centrali termiche soltanto carbone Sulcis "di ricupero". Sembra che questo sia il carbone che cominciava a bruciare nei depositi e fu annegato in mare.

Il ns/ Direttore fa presente che tale combustibile non può essere adoperato da noi perchè

- a) a S. Caterina siamo già con i mulini rovinati, non abbiamo pezzi di ricambio e questo carbone che provoca una forte usura del macchinario ci metterebbe in breve tempo fuori servizio.
- b) a S. Gilla sulle griglie questo carbone non brucia.
- c) il carico massimo producibile a S. Caterina con questo carbone scenderebbe al 60% dell'attuale e non saremmo più in grado di provvedere alle richieste della Sardegna.

Distinti saluti.

Società Elettrica Sarda

SOCIETA' ELETERICA SARDA

Rome, 25 April 1945

Subject : Steam stations generation

To : Eng. Asta - Vice-Chairman (Adv. Comm. on Elec. Power (Sardinia

Eng. Fiorelli telephoned and reported that, according to information received from A.C. office at Barbonia: our steam stations will only be supplied with selvege Sulcis coal.

It seems that this coal was taking fire in the stores and was consequently drowned into the sea.

Our Director points out that this coal cannot be used by us because :

- 1) At S. Caterina all coal crushers are damaged and no spares are available. This coal also seriously affects the efficiency of the machinery which would then be shortly out of service.
- 2) At S. Gilla this coal cannot be burned on the stokers.
- 3) Peak load at S. Caterina, using this coal, would drop down to 60% thus making it impossible to meet the Sardinia's requirements.

GENERAL MANAGER OF SARDA CO.

Eng. Casini

TO : Public Works & Utilities Sub-Commission. <

1. Your 099/PWU is acknowledged. (88)
2. The truth is that about 10% of this coal, stock submerged to avoid the danger of spontaneous combustion, is now being mixed with all the disposable output of Sardinian coal, and is being sent to Sicily and Italy and must be used in Sardinia itself.
3. This Division has already noted with surprise that this moment has been chosen, at the very time that large tonnages of output are being lost thro' strikes, to start operating 2 Thermal Power Station (S.Caterina and S.Gilla) instead of 1. Any information you may have on the proceeding would be welcome.

P.R. EVANS,

Subject: Coal- Home Power Plants

To: Director, Industry Sub Commission
(Coal Division)

1. Reference conference held in the room of Chief Electrical Division 43 HQ 15 April 1945 (Colonel Treas is attendance).
2. It is confirmed that the solid fuel stocks at the Home Power Plants are approximately 8000 Tons which amount is sufficient for 40 days running of the plants at anti-nated present output.
3. It is intended that the Home Power Plants shall be run daily at 10,000 KW for 16 hours per day turning out 160,000 kWh at an estimated consumption of 1.4 Kgs of coal per kWh which means that the amount of coal required daily will be 224 Tons. We shall be glad, therefore, if you will arrange to deliver not less than 200 Tons of Coal daily to the above plants until further notice.
4. We will bear in mind to give you timely notice if it is proposed to deviate from the above quoted consumption.
5. This letter cancels our 6/1-159/PMU dated 13 April 1945.

Per esigenze di regolarità amministrativa, si prega avvertire gli interessati delle eventuali assegnazioni di carbone emesse direttamente da cotesto Spett/ Comando presso questa Società, di passare dal nostro Ufficio Amministrativo in Via Regina Elena, 28 per espletare le pratiche necessarie al ritiro del carbone stesso; e ciò prima di recarsi alle nostre Officine.

SOCIETÀ ITALIANA per il Gas
Esercizio Romana Gas
Il Direttore Generale

For the sake of management regularity, we beg (you) to ask the persons concerned with the allocations of coal issued direct by your Command against our stocks, to call at our management Office at 28, Via Regina Elena, in order to carry out the procedure for withdrawal of coal. This must be made before calling to our works.

✓ 278 94

CONDIZIONI GENERALI DI VENDITA

1. — La merce è sempre venduta franco Officina, e quindi quando sia spedita franco domicilio del committente essa viaggia sempre a rischio e pericolo di quest'ultimo. La Società non garantisce la consegna a data fissa.

2. — Nel prezzo è sempre esclusa qualsiasi dazio comunale. Le eventuali comunicazioni che la Società, faccia periodicamente o meno, circa i prezzi di trasporto, hanno carattere di semplice informazione e non impegnano in alcun modo la Società.

3. — La merce deve essere ritirata nel termine fissato e — salvo pattuizione speciale derogatoria — ripartitamente in quantitativi mensili pressoché eguali.

Trattandosi di sottoprodotti della fabbricazione del gas, la Società avrà sempre facoltà di ridurre (secondo disponibilità che risulteranno dalla fabbricazione) i quantitativi fissati.

Se i ritiri da parte dell'acquirente non sono eseguiti nel tempo convenuto, la Società potrà — a sua scelta — rescindere il contratto per parte o per tutta la quantità che rimane a fornire, o costringere l'acquirente a prenderne consegna senza previa intimazione e senza pregiudizio di danno ed interessi.

Sono considerati casi di forza maggiore, tra gli altri, la deficienza nel numero dei vagoni occorrenti nonché la restrizione di produzione, dovute a qualsiasi causa.

4. — Le vendite sono fatte esclusivamente per le necessità commerciali dell'acquirente, il quale ultimo si impegna di non vendere al dettaglio, né in blocco, a prezzi inferiori a quelli che la Società del Gas pratica alla propria clientela.

5. — Nessun reclamo sulla qualità e quantità della merce sarà ammesso dopo la sua uscita dal Gazometro anche se venduta o spedita in porto franco.

6. — Il pagamento sarà fatto per contanti alla ordinazione, salvo patto contrario. In quest'ultimo caso, trascorso il termine convenuto, decorrono gli interessi commerciali.

Qualsiasi ritardo nei pagamenti autorizza la Società a sospendere od annullare totalmente o parzialmente il contratto.

7. — Le eventuali deroghe alle presenti condizioni generali di vendita dovranno esplicitamente risultare dalle conferme di ordinazioni da parte della Società.

8. — Per ogni contestazione si intende accettata la esclusiva competenza del Foro di Roma.

9. — Il prezzo si intende per i ritiri fino a nuovo ordine, riservandosi, la Società di modificarlo in qualunque momento in dipendenza di variazioni che potessero verificarsi, sia nel costo della materia prima, sia per noli, trasporti, dogane, dazi, tasse, variazione cambi, od altre indipendenti dalla volontà della Società.

Con rogito del Notaio Avv. Carlo Capo, il giorno 12 febbraio c.a. si è costituita in Roma questa Associazione Naz. Distillatori Carboni e Derivati.

All'Associazione fanno capo le Officine del gas gestite dall'industria privata, nonché le cokerie e le distillerie di catrame.

Gli scopi dell'Associazione, previsti dallo statuto e dall'atto costitutivo, si compendiano nella tutela delle Aziende Associate in ogni loro campo di attività economico-industriale. Particolarmente in questo momento la principale attività che l'Associazione propone è quella di potenziare al massimo possibile i compiti della ricostruzione degli Stabilimenti industriali danneggiati dalla guerra, accentrando i rapporti con le Autorità preposte alla ricostruzione e promuovendo se necessario, d'accordo con esse, una intensa cooperazione fra le Aziende associate.

Saranno inoltre fra i nostri compiti principali quelli concernenti i problemi dei rifornimenti di materie prime e di materiali e della determinazione dei prezzi di vendita.

Poichè lo Statuto provvisorio dell'Associazione prevede che, in attesa della liberazione di tutto il territorio italiano, la gestione dell'Associazione

*See Col. Bopp - 451**It seems as if they are copying your letter. Committee plan. - more power to them. I think we should work with them as they might be most helpful, particularly when we have May 29/2*

1002

stessa sia affidata ad un Commissario; gli industriali riuniti in Assemblea costitutiva hanno nominato a Commissario dell'Associazione il Dr. Luigi Nerbini. Questi a sua volta, ai sensi dello Statuto, ha nominato reggente dell'Associazione quale Segretario Generale, il Dott. Alessandro Chiarusi.

Abbiamo la certezza che cotesto Ente d'ora innanzi vorrà far capo a questa Associazione per la trattazione di tutti i problemi che interessano le categorie da noi rappresentate e, da parte nostra, assicuriamo la più pronta e fattiva collaborazione per facilitare il compito della ricostruzione industriale nel campo della distillazione dei carboni.

Con osservanza.

By : CT/ct

NATIONAL ASSOCIATION OF COAL DISTILLERS

TO :
 : Public Works and Utilities Sub-Commission, AC.
 :

By deed of Notary Avv. Carlo Capo, this National Association of Coal Distillers and derivatives has been established in Rome on 12 Feb.

The Association is composed of the Gas Works managed by the private industry, and the coke plants and tar distilleries.

The Association's purposes, as per incorporation act and articles of associations, are summed up in the protection of the Associated Companies in all the fields of their economical and industrial activity. The main activity that the Association intends to carry out, specially now, is to develop at the utmost the reconstruction of industrial plants damaged by the war, centralizing all the relations with the authorities in charge of the reconstruction and promoting, if necessary in agreement with them, an efficient cooperation amongst the Associated Companies.

Other principal tasks of our Association will be those concerning the problems of raw materials and supplies and the determination of sale prices.

Since the temporary articles of association states that, awaiting the liberation of all the Italian territory, the Management is to be entrusted to a Commissioner, the Assembly Constitutiva elected as Commissioner Dr. Luigi Nerbini. On his turn this later has appointed, as per Incorporation Act, Dr. Alessandro Chiarusi as Secretary General Deputy Manager.

We are confident that your Body will correspond with this Association for dealing all the problems concerning the categories represented by us. On our part we convey assurance that you can rely on us for the most earnest cooperation in the field of reconstruction of the coal industry.

Truly yours

THE COMMISSIONER

100

Sgd. Luigi Nerbini.

1. The firm Fornaci di Trisano are situated in Civitavecchia and are producing lime for which there is a great demand, particularly for rebuilding electrical buildings damaged by war.

2. In order to carry on production it is necessary that the works receive 20 Tons of Coal per month but we are informed that lignite can be used.

3. Will you please state if the above quantity can be supplied monthly at Civitavecchia port.

4. Fornaci di Trisano will supply own transport, docks to works site.

INTER OFFICE MEMORANDUM

Reference : 099/PWU

Subject : Gas Coal

To : COAL DIVISION, INDUSTRY SUB-COMMISSION

From : Public Works and Utilities Sub-Commission

- 1) - In reply to your letter AG/IND/CD/48 dated 14 March and in accordance with conversation with Col. Oxley we are transmitting request of the Italian Government for coal to be used in the production of gas.
- 2) - Your division is undoubtedly familiar with the temporary rules relative to distillation of gas coal issued by the "Ministero Industria, Commercio e Lavoro", under date of 24 October 1944, which provided for certain definite regulations at the National level. Hours of distribution, normal and minimum pressures, etc. are quite properly made the function of communal offices and the Management of Gas Companies involved.
- 3) - Where gas plants can be operated, they are the most convenient and economical method of providing the population with a means of cooking. This is particularly true in Italy because of the acute shortage of electric energy, and the lack of transport to convey wood and charcoal to the consumers. For these reasons our recommendations transmitted to you on the 10th March suggested that allocations be based on the average normal coal consumption, adjusted to the % operating capacity of the particular plant.
- 4) - If it is not deemed possible to supply the necessary amount of coal to meet our previous recommendation, then it is suggested that the following policy be adopted :
- (a) - Plants capable of operating at from 80 to 100% of normal - Allocate coal on basis of 80% of normal consumption.
 - (b) - Plants capable of operating at 80% or less of normal - Allocate coal on basis of operating capacity.

./.

- 2 -

(c) - Local Committees, (as provided for in the temporary rules referred to in par. 2), to be responsible for rationing in the various communities.

- 5) - According to this plan all cities in liberated Italy will be placed on exactly the same basis as far as the allocation of gas coal is concerned.

The inclosed table lists the various cities and the recommended average monthly coal allocations.

L.A. JENNY
Colonel, G.E.
Director

enclosures :

- 1 - table - recommended coal allocations based on 80% production.
- 1 - Letter Italian Ministry of Public Works dated 16 March.
- 1 - Inter Office Memorandum dated 10 March and tables.

OGGETTO Fabbisogno di fossile.=
Requirement of Coal

Per il funzionamento delle officine produttrici di gas nell'Italia liberata si richiede che venga importata una certa quantità di carbon fossile.

In via preventiva, tenuto conto del consumo medio nel periodo normale prima della guerra, della efficienza attuale degli impianti e del probabile loro ripristino, la quantità richiesta viene definita nella misura del 90% di quella consumata nell'anno 1939 la quale risulta di Tonn. 39330 medie mensili.

I L M I N I S T R O

TRANSLATION

We request the import of a certain quantity of coal to be used by the Gas Works of Liberated Italy. Taking into account the average consumption in the normal pre-war period, the actual efficiency of plants, and of their probable restoration, the quantity required is estimated to be 90% of the one consumed during 1939, which appears to amount at an average of 39300 tons per month.

SUBJECT: Allocation of coal to Prato. ←

1. It has been agreed by AFHQ that coal should be supplied for the Gas Works at Prato. Allocation of coal will be made directly from steamers arriving at Leghorn and the quantity will depend upon rail and port capacity.

2. Maj. Richardson, Deputy Regional Engineer Toscana Region should be advised to communicate directly with Maj. Parsons, Coal Section AFHQ who has recently opened an office in Leghorn. The exact location of the office has not yet been advised to us.

 099

In evasione alla richiesta telefonica, si trasmette, in duplice copia, un elenco dei consumi di carbone fossile da gas effettuati durante l'anno 1939 dalle Officine da gas situate nel territorio dell'Italia Liberata.

I dati segnati per approssimazione si riferiscono alle officine da gas municipalizzate, e per le quali data l'indisponibilità di elementi precisi, si è fatto il calcolo tenendo presenti i dati di consumo degli anni 1941-1942.

(Attention Major Rosson)Subject : Coal Consumption Data.

In compliance with your telephone request, forwarded herewith two copies of a tabulation listing the quantities of coal consumed during year 1939 by the Gas Works located in Liberated Italy Territory.

The data marked as " approximate " are referred to the "Municipalizzate" Gas Works (viz. Owned by the Communes) on which we have no exact information. The figures are calculated taking as a basis the consumption during years 1941 - 1942.

SUBJECT : Coal.

TO : Allied Commission.

1. We would like to raise a point which we have already many times discussed and which if settled could considerably improve our difficult position.

2. We think especially for Sardinian coal what we ask could be done.

3. The Sardinian coal which is being supplied at present has two chief defects.

a) It is not washed and it therefore has too high an ash content which could be reduced by washing. The difficulty applies to all the coal supplied.

b) It is not the size suitable and this causes damage especially at Catania where in the boilers with rotary furnaces we need selected coal of regular size of nuts. It is necessary that it be fine.

4. We guarantee that with coal of this type used for boilers of Catania, we shall have an increase in yield of about 30% and we shall function also with more efficiency. That is, with the same boilers in service we could have a production of about 30% more than we are now able to have. The importance of what we asked is therefore evident.

5. To summarize, we need a Sardinian coal as follows:

a) Palermo and Port Empedocle
(small washed)

b) Catania 25% (small washed)
75% selected coal of any variety of nuts which suits for a boiler (a griglia). The small washed suits all pulverized coal boilers.

6. We ask that our request be examined seriously.

7. The coming summer season will prove more difficult than ever for the state of the machinery and for the always greater difficulties in obtaining material to have a more suitable coal would be a considera=

ble help.

8. Trusting in your aid and thanking you.

OGGETTO Assegnazione di carbone per lavori
inerenti ad impianti elettrici.

Viene segnalata a questo Ministero la necessità della ditta Corradini di Napoli di avere una assegnazione di 27 tonnellate di carbone coke e di 34 tonnellate di fossile a lunga fiamma per procedere alla trafilatura di conduttori di rame per conto della Società elettrica della Campania.

Detti conduttori dovrebbero servire per ricostruire la rete di distribuzione di Formia e Gaeta, dove dovrebbero essere attivati tra altro i cantieri per costruzione di naviglio.

Attesa l'importanza dello scopo, pregasi codesta Commissione di esaminare la possibilità di accordare la suddetta assegnazione.

Nel caso in cui la questione fosse di competenza di altro Ente o Commissione, pregasi ~~volerne~~

Subject : Allocation of coal for works in connection
with electrical plants.

*Attilio Cappon**Feb 24/2*

This Ministry understands that the firm Corradini of Naples needs an allocation of 27 tons of coke and 34 tons of long-flame coal for wiredrawing copper cables for account of the Società Elettrica della Campania.

The said cables should be used for the reconstruction of the distribution network of Formia and Gaeta, where the ship-building yards should be rehabilitated.

Considering the importance of the purpose, we beg this Sub-Commission to take into consideration the possibility of allocating the said amount.

Should the matter lie within the competence of another Agency or Commission, we beg you to let us know it as soon as possible, so to enable us to get in touch with it

Si prega di voler prendere in benevola considerazione la richiesta di assegnazione di Qli. 50 di carbone fossile da utilizzarsi per lavori accessori di fonderia della Ditta Meloni che così sollecitamente ha provveduto alla esecuzione di 300 Qli. di fusioni in ghisa occorrenti per il ripristino e la manutenzione degli impianti di Tivoli, Subiaco, S. Paolo e Selvena.

Tale assegnazione permetterà alla fonderia di dar corso ai nuovi lavori inerenti all'esecuzione del nuovo programma in data 6/12/44 da noi presentato a codesto Comando.

SUBJECT: Coal allotment for Naples Gas Works.

TO : Southern Region, Economics & Supply

1. With reference to your letter of the 9th inst., and the enclosures thereto, we have today discussed this with Coal Section, AFHQ and obtained agreement whereby commencing with the receipt of this letter you are authorized to inform the Gas Company that they may increase production on the basis of a monthly coal consumption of:

4000 tons imported coal
600 " sardinian "

2. With regard to the future, as you are aware the position at the port is at the moment rather unsatisfactory but it is hoped that we shall be able to review the position with a view to a further increase during early January.

For the Chief Commissioner:

W.B. VAUGHAN
Director, 956
Industry Sub-Commission.

REC'D
P.W. & M. B. C. A. C.
9 DEC 1944 099

VISIT OF MAJOR RYAN TO SARDINIA.

In accordance with instructions and according to AFHQ letter of 2nd November 44 HQ AG 453.3/175 GSG-O I proceeded to Sardinia arriving at Cagliari on the 27th November at 0600 hrs.

I reported at 0900 hrs to the Regional Commissioner and explained my mission.

He took the opportunity of drawing my attention to the position which had arisen regarding the production of Sardinian Coal. AFHQ instructions were that the production was to be maintained at 50,000 tons per month but up to the last few days this figure had never been reached, production having been in the region of 35,000 tons per month and unless some action was quickly taken on the various reports sent in, such an increase would be impossible. Repeatedly letters and reports had been sent emphasising the need for further labour and also for the fulfillment of the innumerable requests that had been made for expendible stores. Further Labour is not available in Sardinia and must perforce be supplied from Sicily or preferable the mainland.

I took the opportunity of visiting the mines and port at Carbonia and St. Antiocho and had a long discussion with Major Matthews. It is very definite that though they have during the last few days acceded to ATRQ request and have stepped production up to 50,000 tons per month yet production will drop to the very lowest figures around 15th December entirely due to the exhaustion of expendible stores. I examined the mine reports and for example in the case of explosives they will be completely out of stock on the 15th of December and from then on will have to depend on hand picking.

I have seen the repeated requests for various expendable stores but I gather that up to date none whatever have been forthcoming.

Further examples are the electric cables on the dock-side. These are in the last stages and the advent of wet weather will produce very bad shorts to the detriment of

I reported at 0900 hrs to the Regional Commissioner and explained my mission.

He took the opportunity of drawing my attention to the position which had arisen regarding the production of Sardinian Coal. ATHQ instructions were that the production was to be maintained at 50,000 tons per month but up to the last few days this figure had never been reached; production having been in the region of 35,000 tons per month and unless some action was quickly taken on the various reports sent in, such an increase would be impossible. Repeatedly letters and reports had been sent emphasising the need for further labour and also for the fulfillment of the innumerable requests that had been made for expendable stores. Further labour is not available in Sardinia and must therefore be supplied from Sicily or preferable the mainland.

I took the opportunity of visiting the mines and port at Carbonia and St. Intino and had a long discussion with Major Matthews. It is very definite that though they have during the last few days acceded to ATHQ request and have stepped production up to 50,000 tons per month yet production will drop to the very lowest figure around 15th December entirely due to the exhaustion of expendable stores. I examined the mine reports and for example in the case of explosives they will be completely out of stock on the 15th of December and from then on will have to depend on hand picking.

I have seen the repeated requests for various expendable stores but I gather that up to date none whatever have been forthcoming.

Further examples are the electric cables on the dockside. These are in the last stages and the advent of wet weather will produce very bad shorts to the detriment of the main plant.

I had preliminary discussions as follows:

ARMY. The Allied Forces both British and American have moved out and but for a small RAF detachment, AG personnel and a few odd bodies very few personnel now remain here.

-2-

I discussed their requirements with the Officer i/c D.I.D. and their monthly requirement is estimated by him to be

12 or maximum 15 tons Sardinian Coal per month

RAILWAYS - Captain Matson

Captain Matson who had very considerable experience of similar work in Sicily is certainly doing everything in his power to reduce the need for imported coal on the Railways by: -

1. Repair of locos able to burn Sardinian Coal. In this connection four more locos have recently been brought into service. It is noted that the main repair sheds at Cagliari suffered very badly during the air bombardment and up to the present all repairs are having to be carried out at Oristano. I visited these repair shops and these too are having to be improvised to a very great extent. I discussed with Dott. Ing. Sollano, Capo Delegazione Ferrerie dello Stato his plans for reactivating the main shops at Cagliari and find that all he really needs is the timber for roofing and the necessary carpenter tools; the former is therefore a matter for arrangements between the Ministry of Communication and the Ministry of Industry and Commerce and the latter a domestic one of the Ministry of Communication.
2. The instance, that where locos had previously burned wood that they should again do so. Wood is plentiful on the island. It is appreciated that they cannot run entirely on wood but they are being forced to use a very considerable proportion.
3. The use of Diesel trains wherever possible for passenger trains.

The consumption during August, September and October were as follows:

	AUGUST	SEPTEMBER	OCTOBER
Imported coal	3351 tons	3117 tons	2347 tons

power to reduce the need for imported coal on the Railways by: -

1. Repair of Locomotives to burn Sardinian Coal
In this connection four more Locomotives have recently been brought into service. It is noted that the main repair sheds at Cagliari suffered very badly during the air bombardment and up to the present all repairs are having to be carried out at Oristano. I visited these repair shops and these too are having to be improvised to a very great extent. I discussed with Dott. Ing. Sollano, Capo Delegazione Ferrerie del-Lo Stato his plans for reactivating the main shops at Cagliari and find that all the really needs is the timber for roofing and the necessary carpenter tools; the former is therefore a matter for arrangements between the Ministry of Communication and the Ministry of Industry and Commerce and the latter a domestic one of the Ministry of Communication.
2. The instance, that where Locomotives had previously burned wood that they should again do so. Wood is plentiful on the island. It is appreciated that they cannot run entirely on wood but they are being forced to use a very considerable proportion.
3. The use of Diesel trains wherever possible for passenger trains.

The consumption during August, September and October were as follows:

	AUGUST	SEPTEMBER	OCTOBER
Imported coal	3351 tons	3117 tons	2347 tons
Sardinian Coal	1888 "	1887 "	2331 "

It is noted the gradual reduction of imported coal and the increase of the use of Sardinian.

The final figures for November will show an even greater swing over and an estimation of the month under consumer categories is as follows:

	IMPORTED	SARDINIAN
Allied Forces	50	nil
Italian "	105	375
Civil freight	545	1875
Passenger	500	250

The above figure for civil freight only covers the movement of 25,000 tons of Sardinian coal. This however having now been stepped up to 50,000 tons per month will necessitate a further 200 tons of imported coal per month.

Concerning the future it is not anticipated that there will be any appreciable increase of traffic other than the above mentioned Sardinian coal traffic. The Allied Forces are practically non-existent and the transportation of Italian Forces, civil freight and passengers is expected to remain reasonable constant.

It is therefore recommended that the Railways on the Island should be allotted as from 1st December a monthly figure of

1350 tons imported coal
2500 " sardinian "

This will cover their requirements as follows:

	IMPORTED	SARDINIAN
Allied and Italian Forces.....	105 tons	375 tons
Civil freight to include 50,000 tons Sardinian coal movement.....	745 "	1875 "
Passenger trains.....	500 "	250 "
	1350 tons	2500 tons

The stock on hand on the railways as at 30 November is estimated at:

imported coal - 4,000 tons which is approximately three months supply.

approximately a further 200 tons of imported coal per month.

Concerning the future it is not anticipated that there will be any appreciable increase of traffic other than the above mentioned Sardinian coal traffic. The Allied Forces are practically non-existent and the transportation of Italian Forces, civil freight and passengers is expected to remain reasonable constant.

It is therefore recommended that the Railways on the Island should be allotted as from 1st December a monthly figure of

1350 tons imported coal
2500 " Sardinian "

This will cover their requirements as follows:

	IMPORTED	SARDINIAN
Allied and Italian Forces.....	105 tons	375 tons
Civil freight to include 50,000 tons Sardinian coal movement.....	745 "	1875 "
Passenger trains.....	500 "	250 "
	<u>1350 tons</u>	<u>2500 tons</u>

The stock on hand on the railways as at 30 November is estimated at:

imported coal - 4,000 tons which is approximately three months supply.

There has been a little borrowing and repaying for the purpose of bunkering. This has now been squared up. I discussed this with Mr. Thomas of M.W.F., he has now the use of the Naval stock which is estimated at at least 1500 tons so there is little likelihood of there being any difficulties in this direction.

As it is possible that Captain Matson will shortly be withdrawn from this Region, Capt Newby will be taking over this work. The whole position is and will be made clear to

him so that he is in complete possession of all facts as to future working.

INDUSTRY - Capt. Turner

Since the visit of Lt. Col. Walker of Coal Section AFHQ there has been a considerable advance in industry. The low temperature distillation plant of St. ANTONIO, the Cement plant and several lime works having been started ^{exp.} and additionally several firebricks works are in production the output of which is to ^a great extent taken by A.A.I.

The approximate monthly consumption figures are as follows. It is to be noted that they are shown under grades as they are able to draw from the mines in this manner:

	SARDINIAN			
	1 and 2	3	4	Modified run of mine
Cement plant				
Distillation	650		1500	
Various mines			2500	
Firebricks	148		328	1450
Lime		416	163	
Bakeries and Pasta	400	250	20	
Hospitals and		10		
small industries	120			
Chemicals		370	60	
Salt		80		
Fishing		20		
Textiles		90		
Electrical works	50	100		
	1368	1346	4571	1450

Concerning imported coal requirements these are limited to innumerable small foundries and smiths of which there are in the number of 600.

started *up*, and additionally several firebrick works are in production the output of which is to great extent taken by A.I.I.

The approximate monthly consumption figures are as follows. It is to be noted that they are shown under grades as they are able to draw from the mines in this manner:

	CARDINIAN			
	1 and 2	3	4	Modified run of mine
Cement plant				
Distillation	650		1500	
Various mines			2500	
Firebricks	148			1450
Lime		416	328	
Bakeries and Pasta	400	260	163	
Hospitals and		10	20	
Small industries	120			
Chemicals		370	60	
Salt		80		
Fishing		20		
Textiles		90		
Electrical works	50	100		
	1368	1346	4571	1450

Concerning imported coal requirements these are limited to innumerable small foundries and smiths of which there are in the region of 600 on the island and who are kept busy on agricultural repairs. Their consumption has been up to 150 tons per month but it is agreed that with the use of coke they can manage with 100 tons of imported coal per month.

The stock of imported coal on hand for industries is 228 tons being two and a quarter months supply.

There is a need for a small quantity of Metallurgical coke at a maximum 25 tons per month for certain forges etc. and it is recommended that this be supplied.

-5-

Metallurgical coke is also needed for the Montiponi Pigment Works. They have been receiving via St. Antioco approximately 360 tons per month which has covered their current requirements. This figure is shown in the final summary but it must be borne in mind that if the requirements of pigment for export are increased, the supply of metallurgical coke must be increased accordingly.

It is recommended that the allocation of Sardinian coal to the island be maintained at

8735 tons for Industrial purposes and
to the above mentioned breakdown

PUBLIC UTILITIES - Capt. Turner

Electric - Of the 3 stations mentioned by Lt. Colonel Walker, the one at St. Caterina is now operating and there is no need to consider the other two. Their requirements of coal are entirely dependent upon the output of Hydro power but it must be borne in mind that much of the Hydro power is needed for the Ammonia distillation plant. The consumption to date has been as follows:

February	1760 tons Sardinian Coal
May	1337 "
June	4640 "
July	3800 "
August	4400 "
Sept.	4500 "
October	3400 "

Up to the present the rainfall has been very slight and little of the rain experienced on the mainland has been felt in Sardinia. Therefore the reservoirs are very low.

It is therefore recommended that the Electric Works

It is recommended that the allocation of Sardinian coal to the island be maintained at

8735 tons for Industrial purposes and to the above mentioned breakdown

PUBLIC UTILITIES - Capt. Turner

Electric - Of the 3 stations mentioned by Lt. Colonel Walker, the one at St. Caterina is now operating and there is no need to consider the other two. Their requirements of coal are entirely dependent upon the output of Hydro power but it must be borne in mind that much of the Hydro power is needed for the Ammonia distillation plant. The consumption to date has been as follows:

February	1760 tons Sardinian Coal
May	1337 "
June	4640 "
July	3800 "
August	4400 "
Sept.	4500 "
October	3400 "

Up to the present the rainfall has been very slight and little of the rain experienced on the mainland has been felt in Sardinia. Therefore the reservoirs are very low.

It is therefore recommended that the Electric Works be allotted a winter figure of from 5,000 to 7,000 tons per month Sardinian coal according to Hydro output.

Gas - There are two gas works, one at Sassari and one at Cagliari; both are operating and giving supply from 0700 to 1000 hours and from 1800 to 2100 hours daily. Their consumption has remained static each consuming 150 tons imported coal and 30 tons Sardinian coal per month.

The stock of imported coal held for the Gas works is 900 tons being sufficient for three months for both works.

-5-

Attached is a summary of recommended allocations for the month and which are summarised as follows:

Imported steam coal	1450 tons per month
Imported Gas coal	300 " "
Sardinian coal	16310 " "
Metallurgical coke	385 " "

Taking this into consideration and the existing stocks in hand it is suggested that as in Sicily and the mainland it is endeavoured to keep a stock pile of two months supply, in which case a shipment will be needed in early January.

GENERAL.

It appears that the system of handling the distribution has to an extent already been arranged along the lines of the old Monopoly system.

They are employing, and have done so for some time, the distributing group of PERNIS. This headed by a Dr. Pernis who has his own agents in various parts of the Island. It seems fairly conclusive that this was the old system for although he has been operating in conjunction with AC for some time no other concern has ever come forward to claim a share of the work. It is admitted that he was an ardent Fascist but from all reports he is carrying out the work in an honest and conscientious manner.

I have had a long discussion with him in conjunction with Dott. Ing. G. Sollano, Capo Delegazione Ferrovie dello Stato and Ing. Venutti of the Agenzia Marittima, Ferrovie dello Stato (the latter in the absence of Ing. Rossetti- absent in Rome).

It appears that the Railways have received all necessary instructions from their Headquarters in Rome together with copies of all forms and returns that are to be made and arrangements have been made whereby they commence operations at once. They have already commenced to make all required returns to their HQ in Rome and additionally will ensure that the following

Taking this into consideration and the existing stocks in hand it is suggested that as in Sicily and the mainland it is endeavored to keep a stock pile of two months supply, in which case a shipment will be needed in early January.

GENERAL.

It appears that the system of handling the distribution has to an extent already been arranged along the lines of the old Monopoly system.

They are employing, and have done so for some time, the distributing group of PERNIS. This headed by a Dr. Perini who has his own agents in various parts of the Island. It seems fairly conclusive that this was the old system for although he has been operating in conjunction with AC for some time no other concern has ever come forward to claim a share of the work. It is admitted that he was an ardent Fascist but from all reports he is carrying out the work in an honest and conscientious manner.

I have had a long discussion with him in conjunction with Dott. Ing. G. Sollano, Capo Delegazione Ferrovie dello Stato and Ing. Venutti of the Agenzia Marittima, Ferrovie dello Stato (the latter in the absence of Ing. Rossetti - absent in Rome).

It appears that the Railways have received all necessary instructions from their Headquarters in Rome together with copies of all forms and returns that are to be made and arrangements have been made whereby they commence operations at once. They have already commenced to make all required returns to their HQ in Rome and additionally will ensure that the following two returns will be made and transmitted to Rome through AC channels. This has been arranged with Capt. Turner who has full details of the required returns and who will also ensure that the returns are forthcoming.

Monthly to reach us on the 6th of each month -

The names of ships discharged, showing the quality and quantities discharged as at midnight, the last day of the previous month and the quantity remaining on board any vessel not completed on that date. The type of consumer to which the quantity has been or is being delivered

-7-

Within 7 days of completion of discharge of a vessel, report according to the program handed to them.

The Burns group will act as the distributing group for the Railways and take over the distribution to all small consumers.

With regard to Gardiner Coal distribution on the Island, this will be carried on as heretofore, that is to say the mines will deliver and account direct to the larger consumers consisting of:

Public Utilities
Cement Plant
Distillation Plant
Various other mines.

The other industries as enumerated on page 3 will be supplied by the Burns Group. The Group will purchase from the mines and deliver and account with the smaller consumers. It is gathered though not officially, that the mining company have been considering the formation of their own marketing organization which is eventually approved and formed. would handle all Gardiner coal deliveries on the Island in which case the Burns group would not then handle Gardiner coal.

The representative of the Ministry of Commerce and Industry is the High Commissioner and in his absence I had a discussion with Major Firoze who will be attending to this particular side:

They have three provincial offices on the Island. The High Commissioner is away in Rome but it is anticipated that he will be returning with full particulars from the Ministry. In the presence of Capt. Turner I explained the system whereby they will receive all future requirements of coal and coke via their provincial offices. These will be screened by the provincial offices and passed to the High Commissioners Office for re-screening and collating according to instructions they will be receiving from the Ministry. I explained fully the use of form "E" and the importance of adhering to the priority list as laid

Larger concerns consisting of:

Public Utilities
Cement Plant
Distillation Plant
Various other mines.

The other industries as enumerated on page 3 will be supplied by the Furnia Group. The Group will purchase from the mines and deliver and account with the smaller consumers. It is gathered though not officially, that the mining company have been considering the formation of their own marketing organization which if eventually approved and formed, would handle all Sardinian coal deliveries on the Island in which case the Furnia Group would not then handle Sardinian coal.

The representative of the Ministry of Commerce and Industry is the High Commissioner and in his absence I had a discussion with Major Birole who will be attending to this particular side.

They have three provincial offices on the Island. The High Commissioner is away in Rome but it is anticipated that he will be returning with full particulars from the Ministry. In the presence of Capt. Turner I explained the system whereby they will receive all future requirements of coal and coke via their provincial offices. These will be screened by the provincial offices and passed to the High Commissioners Office for re-screening and collating according to instructions they will be receiving from the Ministry. I explained fully the use of form "SM" and the importance of adhering to the priority list as laid down in the Ministry instructions.

I emphasized the fact that the prospect of any increase of supply was very remote and on the final approval of the requirements by AG coal would be released by them on their release order and delivery would be effected by Furnia.

I discussed the question of the two returns we needed. These were fully understood and it is arranged that these will be in the hands of Capt. Turner in time to reach

913

-8-

us as required. The two returns being:

To be signalled each Monday morning

- a- Total of imported and Sardinian coal on hand as at noon the following Wednesday
 - b- Average daily consumption of imported and Sardinian coal
 - c- Amount of coal by ships and ports awaiting discharge
- Figures for imported and Sardinian to be given separately.

To be sent as soon after the end of the month as possible:

- a -The monthly consumption of coal by the following classes of consumers: (1) Railways (2) Electricity (3) Gas (4) Cement Brick and tile making (5) Distillation plant (6) other industries (7) Army
- b)-Stocks in hand of each class of consumer at end of month
- c -Stocks at port at end of each month

For the purpose of compiling of all reports both by railways and High Commissioners Office, the Furnis group has shown willingness to assist having many of the figures available in their records.

Having seen all concerned individually a final meeting was called to give them an opportunity of raising any question and to once and finally run through the whole operation.

Naples, 20th november 1944

To Col. H E N S L E Y

Director P.U. Section - Southern Region

N A P L E S

Dear Sir,

As you are aware, even before August of this year, 3.500 Tons of foreign fossil and 350 of national coal had been assigned to this Company monthly, these quantities being then sufficient for gas distribution to the town of Naples.

However, on the 15th August, upon your authoriza, we extended the service to a further zone of the town with about 8.000 users. We should have received therefore, since that time, an higher quantity of fossil but owing to the hot session and as well as for breaking of a great deal of pipes which prevented users from using gas, we had been succesful in limiting consumption of gas according to the supply allotted.

At present, however, we find ourselves in a position to be quite unable to meet the consumption requirements of the town unless an higher supply of fossil is not allotted to us, in view of the following three reasons:

- 1) Lowering of temperature for the coming winter.
- 2) Extension of service to the area for which authorization for re-suming distribution has been duly granted.
- 3) Increase of consumption by the Allied Forces.

Further, in the month of December, as appearing from statements often sent you and as realised by yourself through your several vi-

= 2 =

sits to our Laboratory, by repairing the Gasholder of 80.000, we could be in a position to better so far the service in connection with the areas operated and extend it to others, subject, of course, to your approval.

In view of the above, we shall be glad if you will kindly take all of your interest in the matter and, through your valuable authority, to obtain that, in addition to the supply of national coal, be also assigned to us the following quantities of foreign fossil coal:

For November Tons. 4.000

" December " 5.000

Hoping our request will receive you kind attention and thanking you in advance, we beg to remain, Dear Sir,

Yours faithfully

Il Direttore della C. S.
(Eugenio Henry)
