AG 463.7 PET-O

30 October 1945

SUBJECT: POL and Container Accounting.

TO: All Concerned.

1. In order to comply with directives from the Joint Chiefs of Staff to terminate Lend-Lease supplies, the Common Pool of petroleum products in the area under control of Petroleum Section, Allied Force Headquarters has been dissolved. Stocks on hand as of 31 August 1945 will be charged to nations by Petroleum Section, Allied Force Headquarters in accordance with instructions.

2. Service accounting will therefore be installed with effect from 1 September 1945. All issues from one national agency to another, or to a multi-national organization such as AC and MTO will be reported, together with supporting receipts through normal fiscal channels for final agreement and settlement among nations involved.

3. Until such time as national status are fully implemented and imports directly charged by the shipping nations to the respective receiving nations, the Italian, Greek and Jugoslav civil economies and military forces will continue to be supplied through the recognized petroleum distributing organizations. Allocations will be made by, and releases reported to, Petroleum Section, Allied Force Headquarters, in accordance with the provisions of AFHQ Administrative Memorandum Number 49, 1944. Such issues will be recorded by Petroleum Section, Allied Force Headquarters as a credit against stocks charged to nations as of 31 August 1945.

4. Italian Naval requirements of naval fuels and lubricants will be supplied from Allied Naval stocks as directed by Commander-in-Chief Mediterranean until 30 October 1945, such subsequent issues will be made in accordance with paragraph 3, above.

5. Certain physical transfers of stocks will be made on authority of Petroleum Section, Allied Force Headquarters between United States and British stocks; such transfers will NOT be reported by stock holding agencies through fiscal channels but will be accounted for by Petroleum Section, Allied Force Headquarters.

6. Issues made to Greek and Jugoslav civil economies and military forces will be considered for US Account.

7. Up to and including 30 September 1945, Petroleum Section, Allied Force Headquarters will account for all issues made to Italian GRUFFI format[illegible] such issues should therefore be reported to Petroleum Section, Allied Force Headquarters.

Subject : Request of Transformer Oil.
Bonificazione "Parmigiana Moglia",
Reggio Emilia.

To : HQ. A.C. PUBLIC WORKS AND UTILITIES
SUB COMMISSION.

1. The above Firm has requested CIP an allocation of :

6,000 Kgs. of Transformer Oil.

2. The applicant declares that this quantity is necessary to reinstate the charge of 1 Transformer of 1950 KVA - KV 60/10/6.5 .

3. Most of the pre-existing charge was lost following war operations, the recovered quantity was used to reinstate the level of 2 Transformers of 3600 KVA, which also were damaged by war operations.

4. CIP thinks that the request is justified.

5. We are awaiting your decisions on the matter.

SUBJECT: Fuel for Naples Power Plants - Capuana.

TO: HQ. A.C., Public Works and Utilities Sub-Commission, Electrical Division, APO 394.

171

1. Reference your 189/PWU dated 26 October 1945.

2. The Theater fuel position has not improved during October. In fact, it has deteriorated materially due to non-arrival of expected stocks. In view of this fact, this Section is not able to offer any encouragement that more fuel will be available in November for the Capuana plant than was allowed for October.

3. In regard to building up stocks at this point, there is no possibility of doing that at this time until the general Theater stock position improves.

4. It would appear that conservation could be practiced in the Naples area by cutting out some of the excess illumination, elevators, Fiestas, etc., which would make the available supply of fuel oil sufficient.

To : A.F.H.Q. Petroleum Section H.A.A.C.

1. Reference is made to your PET 30/A/5 dated 29 Sept 45, addressed to C.I.P. Rome, copy to this office.

2. The position with regard to the basic fuel requirements for the above plant for the month of November, remains the same as for October. The supply of electricity from the hydro plants has not improved, and is not expected to improve in any appreciable amount for the month of November, but the Naples area load, due to seasonable increase, is now in excess of that allocated.

3. We would point out that, boiler repairs have been effected during October and the Capuana Plant boiler capacity is now 23,000 KW which can efficiently produce 5,500,000 KWhs of energy per month, but in order to produce this amount it is necessary to furnish the Capuana Plant with 3,300 tons of fuel each month.

4. We would also point out the desirability of building up a stock of fuel oil at Capuana, in the event of interruptions of transmission lines and winter conditions at the reservoirs, in which case, the Capuana Plant would be called upon to give maximum output.

SUBJECT: Diesel Oil for Power Plant, Naples.

TO : Petroleum Section AFHQ
APO 512.

1. The Electric Engineer of HQ-A.C., Public Utilities Sub-Commission, has been in touch with this Section demanding an additional allocation of Diesel Oil for the month of October amounting to 100 tons. He states that due to the serious water shortage at the reservoirs the quantity of Diesel Oil being burnt per day at present is 15 tons and that should the position at the reservoirs not improve by November 15, the plant will have to be used to full capacity.

2. Your immediate advice is requested as to whether the additional 100 tons demanded may be allocated, and, further, whether the November allocation may or should be increased from 234 tons to 450 tons.

3. It is understood, of course, that should sufficient rain fall between now and early November, the quantity above estimated for November can be reduced accordingly.

OGGETTO: Allocation for Power Plants-Naples-October 45

We are in receipt of your letter of the 2nd inst, reference 189/PWU, and note the contents.

We beg to point out that the allocation of 234 tons of fuel oil for October, 1945, to our Doganella Thermal station is not sufficient to meet the requirements of our production which is increasing as winter approaches.

We are at present consuming about 15 tons of fuel oil a day, so that the 234 tons as allocated will only suffice for a fortnight at the present rate of consumption, which is lower than the average rate over the whole month of October.

We therefore kindly request you to fully grant our request as made to you with our letter dated the 3rd October, 1945, viz 600 tons.

We take this opportunity to inform you that our present stock level of fuel oil is 100 tons only, as compared with the 1000 tons referred to in our above mentioned letter as our desired stock level.

We are at present consuming about 15 tons of fuel oil a day,so that the 234 tons as allocated will only suffice for a fortnight at the present rate of consumption,which is lower than the average rate over the whole month of October.

We therefore kindly request you to fully grant our request as made to you with our letter dated the 3rd October,1945,viz 600 tons.

We take this opportunity to inform you that our present stock level of fuel oil is 100 tons only,as compared with the 1000 tons referred to in our above mentioned letter as our desired stock level.

Yours faithfully

OGGETTO: Assegnazione per impianti generatori di energia Napoli Ottobre 1945

Siamo in possesso della Vostra lettera del 2 corr.,del cui contenuto abbiamo preso nota.

Ci pregiamo di rendervi noto che l'assegnazione di sole 234 tonnellate di nafta per ottobre 1945 alla nostra centrale termica Doganella non è sufficiente a far fronte alle esigenze della nostra produ-

zione,la quale aumenta a misura che si avvicina l'inverno.Presentemente consumiamo circa 15 tonnellate di nafta al giorno,cosicchè le 234 tonnellate che ci avete assegnate basteranno soltanto per una quindicina di giorni col consumo giornaliero attuale,inferiore però al consumo medio giornaliero per l'intero mese di ottobre.

Vi preghiamo pertanto di voler soddisfare per intero la richiesta contenuta nella nostra lettera in data 3 ottobre 1945,cioè 600 tonnellate.

Cogliamo l'occasione per informarVi che la nostra attuale riserva di nafta è di sole 100 tonnellate in luogo delle 1000 tonnellate indicate nella nostra lettera surriferita come entità desiderata della riserva.

Distinti saluti.

To : EQ. A.C. PUBLIC WORKS AND UTILITIES
SUB COMMISSION.

1. The above Firm has requested CIP an allocation of :

800 Kgs. of Transformer Oil.

2. The applicant states that this quantity is necessary to reinstate the level of 1 Transformer of 1600 KVA - 8.200/412 V, to compensate the losses due to the filtering and drying operation.

3. CIP thinks that 510 Kgs. of oil would be sufficient to cover the real needs.

1. Reference your letter dated 5 October 1945, file PET 30/6/3, subject: "Release of Fuel Oil," addressed to Headquarters, A.C., Public Works & Utilities Sub-Commission, with copy to Military Railway Service, Rome, for attention of Lt Col De Lisle.

2. Wish to advise that there was no Navy special fuel oil received by the Italian State Railway from the A.C.M.A. Rome Power Station on the 120-ton authorization per above-mentioned letter.

3. The reason for not obtaining the oil as authorized was that the spur track leading into the installation was out of service, and, therefore, the empty tank cars could not be placed for loading.

4. Your cooperation in this instance was greatly appreciated, and the oil would have been obtained if it had been humanly possible to do so, because it was only by speedy movement of a few cars of oil from other points and very lucky circumstances that a serious suspension of traffic was averted.

8 OCT 1945 189

1. The above Acquedotto has requested CIP an allocation of :

600 Kgs. of Transformer Oil.

2. The applicant declares that this quantity is necessary for the total filling of the undermentioned apparatus :

- 1 Transformer of 200 KVA - transformation rate 11.750/220 V.
- 1 " " 7,5 KVA - " " 12.000/220 V.

3. The pre-existing charges were lost following war operations.

4. It is CIP's opinion that 500 Kgs. of oil would prove sufficient to cover the real needs.

5. We are awaiting your decisions in this respect.

To : C.E. 5 District — 24 Sep 45

Reference our RE/2002 dated 11 Sep 45.

1. Pet Sec R.A.A.C. have replied to this letter in the following terms :-

"It is expected that it will be possible to make an allocation for the power plants for the month of October amounting to 18,765 bbls. This quantity, it is hoped, will enable you to take care of the 5 days additional requirements for the line diversion referred to, to be carried out".

2. Putting the Sp.G. at.949 and 35 Imp Galls to a barrel, the increased allocation appears to be 410 long tons.

3. We have no figures here for the exact allocation of fuel to the S.M.E. for past months, so this figure will have to be checked with them.

4. Will you please advise this HQ if the S.M.E. can make do with this allocation, having due regard to the shortage of heavy fuel oil at present.

1. Thankyou for the increased allocation of fuel oil which appears to amount to 410 long tons on the September allocation.

2. It is realised that there is an acute shortage of fuel oil at the moment, and that the E.H.P. will probably have to make do. It is however really not quite enough. Could you possibly find another 3,400 bbls please.

Il sottoscritto è proprietario e gestore della Ditta "Ing. Nicola Coccoli Impresa Elettrica e Frigoriferi" che distribuisce, fra l'altro, energia elettrica per luce e forza motrice nel comune di Castellabate (Salerno) (SIECI) con centrale presso Novi Velia ed Uffici in Napoli - Via G. Verdi 35- ad potenziale di 15 mila Volt, che abbassa a 260/150 per lo esercizio nelle tre cabine di trasformazione site in S. Maria di Castellabate, Castellabate, S. Marco. Nella prima cabina di S. Maria sono installati un trasformatore trifase in olio del Tecnomasio Italiano Brown-Boveri da 50 K V A con rapporti di trasformazione 15000/260 V. ed un secondo trasformatore pure trifase in olio della Ditta Sampietro di Trento da 30 KVA 15000/5000. Tale ultimo trasformatore alimenta le frazioni vicine. Nella cabina di Castellabate è installato un trasformatore trifase in olio della Ditta Clerici di Milano da 15 KVA 5000/260 V. Nella cabina di S. Marco due trasformatori pure trifasi in olio di cui uno della ditta Pellizzari da 15 KVA-5000/260 ed un secondo della Clerici da 10 KVA. 5000/260-150 Volt.
In complesso sono sotto corrente 5 trasformatori trifasi in olio della potenza complessiva di 120 K.V.A.
In tali macchine non è stato nè aggiunto nè sostituito olio dal 1920, data della loro installazione.
Attualmente i trasformatori sotto carico riscaldano ed il livello dell'olio è molto al di sotto del livello normale.
Per garanzia dell'esercizio, occorre togliere a turno l'olio dai trasformatori, filtrarlo, rimetterlo a posto con l'aggiunta del nuovo fino alla indicazione del livello.
Si richiedono pertanto Kg. 130 (centotrenta) di olio per trasformatori.
Con stima
