Ref. H-2

SUBJECT: Road Maintenance Equipment
(Recn. MGS-160-ENG/LAC Airgram 35)

TO : Headquarters, Allied Commission, APO 394
(Attn. Economic Section)

1. Attached at Appendix "A" is a summary showing what items and amounts derived from a/q requisition are being met from the U.S.Z.I. from Persian Gulf Command, and from U.S. theatre stocks.

2. Information as to detailed shipments, by items and pieces, against MGS-160-ENG. is urgently required.

3. For your guidance it is here pointed out that items 1,6,10,11, 15 & 24 in full of L.A. 35 were cancelled, as also were 3 units each of items 26 thru 29. Our letters H-2 of 23 Jan. para 6, and H-2 of 27 March refer.

4. Your letters ref RD and RB -400.191-ES dated 12 April, 11 May, and 11 June are referred which contain acknowledgements of shipments received during the previous months. In nearly all cases however receipts are shown in bulk tonnage and not in pieces of equipment.

5. Details should be included in your reply of the 2 tons Rotary Sweepers which have arrived in UGS 93, BA 225 CAPE FARO at NAPLES since the preparation of your last monthly summary.

6. The equipment shown at Appendix "A" as due from Persian Gulf Command is being carried, at least in part, by the BARON CAMMOR which is now en route to NAPLES from EL SHATT and is due to arrive during period 25 June - 4 July. If this consignment has been received in time it is requested that you include details in your reply. If it does not arrive in time, this shipment should be the subject of a separate letter earliest.

7. The information requested in paras 1 thru 6 above is required in order that authentication of deliveries against items of ENGS.(U.S.) procurement responsibility may be established, and action taken regarding undelivered items. For this purpose the summary appearing at Appendix "A" only refers to action taken by that Service.

8. It is desirable however, in order to check receipts against this requisition as a whole, that you include in your reply the followings

a. Confirmation that the 3 Trucks, Tractor 5/6 ton at item 5, and the 25 Jeeps at item 17 which were requisitioned by ORD(U.S.) on the Z.I. under requisition JJ302 have been received. (It is noted that some tractors

have been included by bulk tonnage in your monthly reports against MGS-180-ENG., but a similar acknowledgement for 25 Jeeps shipped on the TIMOTHY WIGHT, BA 121 in UGS 82 against item 17 cannot be traced).

b. Confirmation that the 30 Concrete Mixers have been received in full from U.K. against item 25. Your RB-400.191-25 of 11 May acknowledged receipt of 74 DLT on MK200, MGS-92. (Receipt of remaining items of U.K. procurement responsibility - items 16 & 18 - made available in the theatre, have been separately acknowledged by Public Works & Utilities Sub-Commission in letters ref 202/PWU, of 4 May and 2 June. It is not necessary to make further reference to these items therefore).

c. Advice as to whether spare parts have been shipped with all equipment in accordance with item 31 of LAC Airgram 35.

For the Assistant Chief of Staff, G-5:

R. C. CARLSON,
Major, C.A.C.,
Economics & Supply Division.

1. Herewith is a copy of a letter from Consorzio Attrezzature Edilizie to the Minister of Public Works. Please note this organization is a branch of an associated contractors group and represent, the interests of 3000 Italian Contractors.

2. This is in line with our recent discussion when it was agreed the Genio Civile and their Chief Engineers are demonstrating an inability and a total lack of understanding in the matter of taking over and operating most of the equipment we are issuing to them. Therefor the clause in your directive which authorizes renting equipment to the contractors by the Ministry should be made more effective so the equipment may be quickly and efficiently operated as is intended for existing military need and eventual Italian Government benefit.

Therefor it is respectfully recommended that a directive be sent to the Ministry by the Chief, Engineering Division, suggesting that equipment that they have been slow in activating be rented to these people for distribution under our direction to projects of Military importance.

HIGHWAY EQUIPMENT.

SUBJECT : Assignment of construction equipment.

We have been informed that the Allied Commission has assigned to your Ministry machinery and motor vehicles for execution of road works to be leased to firms engaged in works depending from your ministry.

Our "Consorzio" which has been organized and is operating under the supervision of the A.N.C.I. (Italian Contractor Association) to which contractors from all Italy belong, informs your ministry that it has been organized to the end of helping members to get their equipment without any profit or speculative purpose.

As it may be seen in the attached "Statuto" of our Consorzio a copy of which has been already given to Comm. Puliti, our Consorzio wants to effect the use of machinery in order to get the maximum of efficienty with a minimum of machinery by leasing or selling it to firms or by organizing units of the Consorzio to which the machinery may be entrusted.

Our management is favored by the fact that the members of the "Consorzio" have, already an organization (warehouses, workshops, skilled labour) which shall be put at the disposal of our "Consorzio" so that machinery and motor vehicles can be kept in full efficiency.

With the management of the Consorzio, the firms which control the Consorzio technically and administratively, shall have all their rights granted and being rightly helped, may show advantages on prices of the works entrusted to them.

Our belief is that your ministry considers a management held by government agencies will encounter serious difficulties in carrying out assignments and repair and maintenance of said machinery due either to the particular structure of the Genio Civile Offices, and to the difficulties of applying the present regulations, or due to lack of skilled personnel for keeping efficient a complex equipment, and in order to avoid new arguments with the firms to which said machinery should be assigned.

On.le MINISTERO DEI LAVORI PUBBLICI - R O M A
e, per conoscenza;
A.C. PUBLIC WORKS
HIGHWAY EQUIPMENT - R O M A
Via Monzambano 10

OGGETTO: Assegnazione attrezzature edilizie.-

Siamo venuti a conoscenza che da parte della Commissione Alleata verrebbero assegnati a cotesto On.le Ministero macchinari per l'esecuzione di lavori stradali ed automezzi, perché ne effettui il noleggio a ditte interessate alla esecuzione dei lavori dipendenti da cotesto On.le Ministero.

Questo Consorzio, sorto per iniziativa e sotto l'egida della Associazione Nazionale Costruttori Italiani (A.N.C.I.) della quale fanno parte costruttori di tutta Italia, si pregia comunicare a cotesto On.le Ministero che esso fu costituito con lo scopo precipuo di agevolare l'attrezzatura dei propi soci, senza fini speculativi. In effetti - come rilevasi dallo statuto, che si allega, e di cui a suo tempo fu consegnata copia al Comm. Puliti, il Consorzio si propone di effettuare la gestione dei macchinari in modo da svilupparne al massimo il rendimento col minimo impiego di mezzi, sia con noleggi che con cessioni parziali, sia con la creazione di nuclei consortili ai quali appoggiare i diversi gruppi di macchinari.

Tale gestione é facilitata dal fatto che le esisbenti organizzazioni degli appartenenti al Consorzio (Magazzini, officine, operai specializzati) ecc. sarebbero messe a profitto della gestione stessa in modo da tenere in piena efficenza i macchinari e gli automezzi.

Con la gestione consortile le ditte interessate, ammesse al controllo del funzionamento tecnico e amministrativo del Consorzio, sarebbero garantite nei loro diritti e potrebbero quindi, equamente agevolate, far sentire gli effetti dei vantaggi ottenuti sui prezzi e sul costo delle opere appaltate.

Tanto ci pregiamo comunicare perché pensiamo che cotesto On.le Ministero ritenga che una gestione, direttamente effettuata dagli organi governativi, troverebbe non lievi difficoltà nel disimpegno, oltre che delle assegnazioni anche delle manutenzioni e della tenuta in efficienza dei macchinari, sia per la speciale struttura degli uffici del Genio Civile sia per le difficoltà dipendenti dalla applicazione delle norme regolamentari vigenti, sia per l'assenza di personale specializzato nella tenuta in efficienza di una complessa attrezzatura, sia per evitare nuova fonte di vertenze con le ditte assegnatarie.

Per tutte le esposte ragioni questo Consorzio prega cotesto On.le

Ministero di volere cortesemente esaminare la possibilità e la convenienza «nell'interesse della pubblica amministrazione e della economia generale» di cedere a questo Consorzio, in seguito a opportuni accordi con la On.le Commissione Alleata, l'assegnazione degli automezzi, attrezzi e macchinari che venga comunque effettuata dalla Commissione stessa, perché ne provveda la distribuzione in base alle direttive opportunamente concordate.

Subject : Equipment for Road maintenance

To : Director, Public Works & Utilities Sub-Commission
HQ, Allied Commission
A P O 394

1. Reference is made to possibility of securing certain equipment, vouchered to the Italian Government, controlled by the Allied Commission for use in Emilia Region.

2. We have had the U.S.V.S. engineer make a study of the situation and attached in duplicate is tabulated data requesting assignment of -

6 Power shovels
24 Bitumen heaters
24 Bitumen spi sptayers
7 Road groders (power driver)
6 Rock crushers (with power)

3. No road rollers are listed, but it is felt that if any are available at least 6 should be added to the request.

4. Information is also requested as to availability jack former duties and power driven air compressors and earth moving equipment. The should have at least 6 of each.

5. Your consideration of our needs will be appreciated, as we are in need of more than ordinary help due to the fact that this territory have the brunt of the winter fighting and materials and equipment are very scarce. Lack of trucks is a serious matter.

1. Reference your inquiry in weekly report, 3 June 1945, concerning crushing plants at Cortona.

2. In compliance with the desires of the Ministry this plant will remain under the control of the Chief Engineer, U.S.V.S., Rome. This plant is to remain at Cortona only so long as it is needed by first Dist. and will presumably then be shifted into the Rome Area.

3. Should Ing. Giunta wish to operate the Cortona quarry after the shift of plant is made you might suggest that equipment in other quarries that have been taken over by him can be placed of Cortona as for example the plant at Collinn which is understood to be idle.

1. In accordance with instructions from HQ. AC. P.W. & U. Sub-Commission, you are directed to have the spares, accessories and repair parts turned over to you with the various piecepoof equipment, which have been or are being operated by Military, inventoried at the earliest time possible.

2. Check such inventories against packing lists of such items for each piece of plant and supply this office with lists of the items that are missing.

3. Through arrangements between the Chief, Engineering Division, H.Q. A.C. Public Works, and the Chief, Engineering Division, P.B.S., all items of missing spares, accessories and etc, will be supplied upon requisition by P.B.S. Your attention is directed to the great importance of obtaining these supplies so operation of plant may be continued without serious or lengthy interruptions due to shortage of parts. Therefor give this instruction priority over all but the most important of your present activities.

4. This applies only to plant being operated by U.S. Army Organizations and not those under First District, British.

1. Our Field Assistant, Captain E.A.Milani, G.A.R.I., Florence, reports to us that a Sergeant Johnes, who is operating the quarry at Cave Chelli has not received instructions to permit Genio Civile to place personnel in his quarry. Therefor, this change over is being inconveniently delayed since personnel has been employed and are awaiting authority to start work.

2. Captain Milani further reports that our three compressors have not been returned for operation with A.C. plant as directed by the C.R.E. Instead they are located at:

a) One at Levano
b) One 3. Eraclio
c) One 13th Vehicles Park near Foliano.

CO's contacted state orders to move them have not been received.

2. The above plant is the property of the Italian Government by virtue of purchase through the Instituto Commercio Estero and has been officially given to the possession of the Ministry of Public Works. It was loaned on a temporary basis to the Military Authorities, for use by them, during the emergency incurred by the final Military offensive in Northern Italy, through P.B.S., by agreement between the Director, Public Works and Utilities Sub-Commission and Col. Donald S.Burns, Chief, Engineering Division, P.B.S.

3. That emergency no longer exists and it is understood Fifth Army have identical equipment of military ownership idle in the vicinity and have not recently been operating the Italian owned equipment. It is therefor imperative that this equipment belonging to the Italian Government be immediately released to proper authorities and that this Headquarters be informed when such release be instituted.

(Attn.: Captain Brownlee)

FROM : F.O. Griffith, Highway Equipment Officer, H.Q. A.C. P.W.

SUBJECT : Equipment Issues.

REF : AD/6

DATE : 29 May 1945

68

1. Equipment coming to our agency for distribution to the Italian Government is not to be loaned or issued to other organizations. This conforms to HQ.A.C.P.W. policy and is intended to prevent delay in the transfer of such equipment to the Ministry of Public Works.

2. Organizations requesting the use of any items of equipment should be referred to the Chief Engineer, U.S.V.S., who may make such issues since it is the property of the Ministry. This should in all possible cases however be discouraged, because it does not permit conformance to policies given in letter from the Chief, P.W.Div., dated 5 April 1945.
Too; it has been extremely difficult to regain control of equipment loaned to Military Agencies and in most cases equipment has been abused and spare parts have been lost.

1. Herewith are memorandum receipts for the following equipment:

(a) Nine Primary Crushing Plants.
(b) Nine Secondary Crushing Plants.
(c) Ten compressor Units.

2. This equipment is handed over to your control and to the ownership of the Italian Government Ministry of Public Works. Since it has been under the control and operation of the Military you are not made responsible for tools, spares and accessories which may have been taken. Existing stores of such items will be collected by this Agency and removed to Florence for inventory at which time it will be properly transferred to you by memorandum receipt.

A. C. PUBLIC WORKS
ASPHALT

TO : HQ. A.C. P.W.& U. Sub-Commission.

FROM : F.O. GRIFFITH, Highway Equipment Officer, P.W. Asphalt.

SUBJECT: Equipment Deliveries.

REF : AD5/10

DATE : 27 May 1945

I. We have been telephonically informed by the Transportation Officer, A.C., Ancona that the transportation of a shipment of equipment from Ancona to Rome has been delayed due to, first, the unavailability of special cars for the shovels, and second, to interference by the P.W. Officer, Captain John Walsh, who claims this equipment for use in the Ancona Area.

2. We will send men and trucks to Ancona to-morrow and are dis-assembling the shovels for ordinary shipment. Accessories, tools, small parts, spares, batteries will be transported to Rome in our trucks, since we find our equipment is being stripped during transit by rail.

3. Prior application was made by me in Ancona for rail bid but the matter was not completed. Please make application for the shipment of the following from Ancona to Rome:

a) Eight graders - 102 Tons.
b) Four shovels - 72 Tons.
c) One Compressor - 6 Tons.

4. It is not understood by what authority Captain Walsh is holding up the shipment of this equipment. At no time has the assignment of any of this shipment been contemplated for distribution in the Ancona Area. It will be much appreciated if Captain Walsh be instructed to not concern himself with any of the equipment received in Ancona unless ordered to do so by your Headquarters.

F.O. Griffith.

SUBJECT: JEEP ISSUE.

DATE : 26 May 1945

54

I. We have recently issued one jeep, Plant No. 180 to Captain John Walsh, Public Works Officer, A.C. Ancona.

2. It is understood that Captain Walsh's territory consists only of the Harbor Area in Ancona and that besides this jeep he also has a car assigned to his use. It is believed this jeep should be returned to this station for issue to the Ministry of Public Work, to whom it belongs, and where transportation is more urgently needed in conjunction with our heavy equipment schedules.

Respectfully

F.O. GRIFFITH
Highway Equip. Officer

FOOT NOTE :

In a conference of 19 May 1945 with the Ministry of Public Works, that Agency was requested to state immediately their desires as to the distribution of equipment awaiting disposal in Rome and Florence. This information will be available by 21 May 1945. It is anticipated all existing equipment stocks will be transferred to Ministry Agencies within a fortnight and transported as they indicated in the next 30 to 40 day period. This does not include any future planning with regard to moving equipment to areas forward of Bologna but, since by that time all the equipment will have become the property of the Italian Government, will be a matter of ordering the Ministry to move equipment as is desired. The principal indeaour now and in the immediate future is to accomplish a transfer of existing stocks to the responsibility of the Ministry of Public Works.

PUBLIC WORKS
ASPHALT

TO : V.S. THOMPSON, Lt.Col.,R.C.E., Chief,Public Works, HQ.AC.
FROM : F.O. Griffith, Highway Equipment Officer.
SUBJECT : Salvage Tires Issues.
DATE : 23 May 1945.

1. The following is in reply to your verbal state= ment of even date that this Agency has been responsible for confusing the salvage tire issue.

2. Salvage tires were transported to Rome in our trucks as covered by requisitions presented by Captain Green and Major Sapp. Both issues were short of indicated quantities because of unavailability and in some cases oversize tires were substituted for reg ar sizes.

3. These stocks were stored in a storeroom under our protection and presumably under our control to issue as directed. A stock record was established. Releases issued by you against the Captain Green stock were honored as received. In one case however the Contractor's representa= tive called for tires during the absence of Cagnazzo and de= livery could not be immediately made but was arranged for the following morning. This man reported back to you that he could not get his tires because Cagnazzo would not give them to him. You then ordered the full release of all salvage stocks to Genio Civile for issue by them as you directed. This was immediately accomplished.

4. The tires drawn against the requisition for Major Sapp were held under the control of this office subject to disposal. Verbal agreement between you and the writer, in a telephonic conversation, Roma-Florence, was made as follows:

a) Marche Compartmente was no longer a Military responsibi= lity.

b) The Toscania Area was still a Military territory.

c) The tires consigned to Marche could be used to better advantage in the Florence area in conjunction with our crushing plant units.

:/:

Declassified E.O. 12356 Section 3.3/NND No. 785019

d) The 600 x 16 tires were needed to complete the change of civilian tires on asphalt kettles; the civilian tires to be issued to Genio Civile.

e) The stock to be issued as need indicated.

5. On returning to Rome it was learned that during the absense of myself and Lt.Cagnazzo or anyone else of responsibility from this office, the Sapp tires had been delivered to a truck furnished from Ancona by Major Sapp, on your authority.

6. Major Sapp's letter, dated 15 May 1945, indicates that Genio Civile issued his tires to him. He has tire sizes which did not occur on his requisition and it may be presumed Captain Green's stock is short these sizes. We did not check the stocks after they left our control.

7. Under those circumstances any confusion existing in the salvage tire situation cannot be the responsibility of this office. Should you choose to do so, we may again be made responsible for the control and issue of this stock as it exists at present, after an inventory has been properly made, and shall see that no further discrepancies occur. It is respectfully suggested however that such an order be issued in letter form as a matter of record since it is to be presumed that other discrepancies and unaccounted losses have occurred through careless handling.

SUBJECT : Equipment Operations.
REF : AD/7/6
DATE : 19 May 1945.

1. You are hereby instructed to place Genio Civile Organizations in the following locations. It is essentially important that this be accomplished as quickly as is possible; particularly with respect to operators and supervisory members, since the military may move existing personnel at any time and the instruction the Genio Civile personnel must have would no longer be conveniently available.

A. CORTONA QUARRY - Camucia. 854th. Quarry Coy.
(a.1.) Primary Crusher plant.
(a.2.) Secondary Crusher plant.
(a.3.) One Compressor 105 cu.ft. truck mounted with pneumatic tools, accessories etc..

2. Existing military organizations have experienced Italian Civilian personnel in all of their quarries. It is suggested that, is order to save time and lesson confusion in the change, you utilize as such of such personnel as is possible at the beginning of your operations and then eliminate them from your organizations later as you may see fit.

3. Spares and accessories have been in Military possession and therefore are not complete. These have been removed to a Genio Civile establishment in Florence for inventory and part belonging to the plant at CORTONA will be sent to the Chief Engineer of the area for his disposal as quickly as inventory is completed at which time he will submit memorandum reciepts for same.

1. Vi diamon con la presente istruzioni per stabilire le organizzazioni del Genio Civile nelle località spoficiate in appresso: E' di essenziale importanza che ciò sia fatto al più presto possibile, in particolar modo l'invio dei tecnici e personale di controllo, poichè i militari possono spostare il loro personale ad ogni momento e l'istruzione che i dipendenti del Genio Civile debbono avere non sarebbe più allora comodamente ottenibile.

A. CAVA DI CORTONA - Località Camucia. 854 th. Quarry Coy.
(a.1) Impianto frantoio primario.
(a.2) Impianto frantoio secondario.
(a.3) 1 compressore montato su camion da 105 piedi cubici con attrezzi pneumatici, accessori ecc.

2. Le organizzazioni militari esistenti hanno provato personale civile italiano nelle loro cave.

Si suggerisce di adoperare il più possibile di detto personale all'inizio per evitare perditempi e diminuire la confusione inevitabile derivante dal cambio.

Eliminerete detti operai se lo ritenete opportuno appena vi sentirete a posto.

3. Pezzi di ricambio ed accessorii erano di proprietà dei militari che operavano l'impianto e non sono completi. Sono stati tolti dalla cava e portati ad un magazzino del Genio Civile a Firenze per inventario; quanto appartiene a questo impianto verrà inviato all'Ing.Capo della zona perchè li tenga a disposizione; ciò verrà fatto non appena l'invetario sarà completato ed allora verrà anche inviata la dettagliata bolla di consegna da firmare per detti.

SUBJECT : Attachment of Italian Troops.

TO : Land Forces Sub-Commission.

1. Request is made to have a unit of Italian troops, if possible assigned to AFHQ, and attached to the Public Works and Utilities Sub-Commission. This unit should number approximately 300 officers and men who will be trained to service, maintain, and operate the heavy road and construction equipment now being received from the United States.

2. About 4000 tons of road equipment valued at several million dollars was requisitioned originally about a year ago but revision and cancellations reduced this somewhat. The equipment includes rock crushing plants primary and secondary, air compressors with rock drill and other attachments, asphalt mixing plants, concrete mixers, motorised road graders, scrapers, tractors, trailers, trucks, and other accessory equipment. Some of this equipment is now here and more arriving. It is to become the property of the Italian Government but is to be allocated and operated under the control and supervision of the Public Works Division of this Sub-Commission.

3. An American specialist was placed in charge of co-ordinating the program and training the civilian personnel of the Ministry of Public Works. Experience is bringing forth a number of difficulties.

(a) Inability of the Ministry of Public Works to secure the services of properly qualified personnel at the established salary scales they are permitted to pay.

(b) Unwillingness of civilian workmen to move from their homes to points throughout Northern Italy as required.

(c) Confusion and delays occurring for reason of passes, billets, rations when endeavoring to circulate civilians in Army Areas.

23481

Declassified E.O. 12356 Section 3.3/NND No. 785019

(d) Lack of control of labor turnover with civilians who are partially or completely trained, but quit to accept better pay rates.

4. It is believed that by the assignment of an Italian military construction or mechanical service unit to this duty, these difficulties will be eliminated. Such a unit to have the necessary complement of officers for administrative as well as operational purposes and composed of personnel qualified to supervise and act as skilled operators of this mechanical equipment. They would not be used as ordinary labor; such laborers can be recruited in the locality in which the equipment operates. An experienced officer of this Sub-Commission would be assigned to supervise and coordinate the tasks with the officers of the Italian unit.

5. The advantages of such an assignment :

(a) The service, maintenance, and operation of this heavy equipment will be more continuous and much more efficient. The supply of parts more easily controlled. Too frequently a $10,000 machine is immobilized and valueless for want or neglect of a minor part.

(b) Problems of quarters and messing will be greatly simplified.

(c) Entry into and movements within forward areas will be expedited.

(d) Personnel turnover will be practically eliminated.

(e) The Allied War Effort, the Italian Army, and the post reconstruction program will be enhanced by training a unit which will carry out and pass on that training instead of losing or dissipating it in frequent personnel shifts or turnovers as are commonly found with civilian operators.

6. This letter has the approval of the Executive Commissioner. 680

1. You are hereby instructed to place Genio Civile Organizations in the following locations. It is essentially important that this be accomplished as quickly as is possible; particularly with respect to operators and supervisory members, since the military may move existing personnel at any time and the instruction the Genio Civile personnel must have would no longer be conveniently available.

a) PORRETTA - 175th. U.S. Engineers.
(a.1) Asphalt Plant and pug mill.
(a.2) Aggregate dryer with elevator.
(a.3) One primary crusher plant.
(a.4) One secondary crusher plant.
(a.5) Two Le Roi, truck mounted, 105 Cu.ft. compressors with pneumatic tools, accessories and etc.
(a.6) Soil Stabilizing plant. (It will not be necessary to employ personnel for this unit at present).

b) COLLINA - 175th. Engineers.
(b.1) Primary Crushing plant.
(b.2) Secondary Crushing plant.

c) MONTELUNGO. - 345th. U.S. Engineers.
(c.1) Primary Crusher plant.
(c.2) Secondary Crushing plant.

d) MONTECATINI.- 338th. U.S. Engineers.
(d.1) Primary Crusher plant.
(d.2) Secondary Crusher plant.
(d.3) Two compressors, 105 Cu. ft., truck mounted, together with pneumatic tools, accessories and etc.

e) SAN GIULIANO. 338th. U.S. Engineers.

(f.1) Primary Crusher plant.
(f.2) Secondary Crusher plant.
(f.3) 310 Cu.ft.compressor, trailer mounted, with pneumatic tools, accessories and etc.

g) MURAGLIONE. - 854 quarry Coy. R.E.
(g.1) Primary Crusher plant
(g.2) Secondary Crusher plant.
(g.3) Compressors will shortly be available to this quarry.

2. Three additional quarries in District. No. one will become available to you as soon as equipment inventories are completed and your office will be so advised. It is suggested that personnel be organised for these installations so little delay will ensue when instruction reaches you. These should be ready for your personnel within the next week.

3. Existing military organizations have experienced Italian civilian personnel in all of their quarries. It is suggested that, in order to save time and lessen confusion in the change, you utilize as much of such personnel as is possible at the beginning of your operations and then eliminate them from your organizations later as you may see fit.

2. Spare parts, accessories, drilling equipment with the compressors, is being held by the various regimental units to which they are assigned. As quickly as passes may be obtained to permit our trucks to go to Florence, this material will be collected and placed in a warehouse to the control of Genio Civile distribution as required but under the technical direction of an Engineer on our staff who will be placed at my next trip to Florence. Accessories for the two crusher units, assigned to 175th. Engineers, have been used to overhaul two machines belonging to Fifth Army and steps should be taken to compel the replacement of such parts, if possible, as suggested by the Director P.W. and U. Sub-Commission, since it remains the responsibility of P.B.S., who assigned the equipment to them.

Subject: Maintenance of Road Machinery.

25

To : Chief Engineer, Allied Force Headquarters
(Att: Lt.Col. Davis, Supply Officer).

1. To effectively maintain and operate the various items of road machinery being made available to Public Works and Utilities Sub-Commission on Requisition N°.MGS-180-ENG., for use on highways of Military Priority, it is imperative that a policy be established whereby stores can be requisitioned from Ordnance or other Military Depots.

2. This authority should cover the issue of small tools, maintenance supplies, parts and servicing equipment. It should also permit the responsible representative of the Sub-Commission to borrow from equipment stores such items as prime movers, large trailers and truck cranes for emergency use in equipment movement. These items are not available from other sources. Authority should also be granted for the Sub-Commission to call upon Military Units for emergency repairs for which proper facilities are not available in the field such as welding and major repairs to plant.

3. The basic purpose of the subject policy would be the authority to call upon military units for only emergency assistance as required and not anticipated. Since the operation of the road machinery will, for the present, be restricted to the maintenance of Military Highways in strict compliance with the desires of Military Districts and Base Sections, it is essential for all concerned that the same or similar assistance be received upon request, as would be available to military organizations functioning in like manner.

Subject: Vehicles Released in Theatre against MGS-180-ENG/LAC Airgram 35.

To : Allied Force Headquarters, G-5 Section
Att: Economics and Supply Division.
Thru: Economic Section.

1. Reference your letter H-2 dated 8 February transmitting release notes on 30 - 3 ton lorries and 3-15 CWT trucks from British Theatre stocks to Allied Commission.

2. Transfer has been completed on these vehicles except for 13 - 3 ton 6x4 lorries and 1 - 15 CWT truck from 409 R.V.P. Our representative has been in frequent contact with 409 R.V.P. and the vehicles are not yet available. Advice was offered by 409 R.V.P. that the remaining vehicles probably will not become available as the existing policy is to service all class 5 vehicles to class 1 which cannot be released under our present authority.

3. As the effective operation of other equipment now available is dependent upon transport it is requested that early authority be granted transferring 13 - 3 ton 6x4 lorries and 1 - 15 CWT truck from some source other than 409 R.V.P. preferably in the Central Italy Area for easier availability.

20 April 1945.

Memo to Col. Thompson, H.Q. A.C. P.W.E.S.
Sub-Commission.

1. I recently have been informed by G4 in Naples that we could be permitted to requisition stores from Ordnance and other Military Establishments Dumps provided a policy is established for us by A.F.H.Q. This policy to be in the form of a letter to be presented by the writer in which the organisations be directed to honor my requisitions or requests for issue or assistance.

2. This authority should cover the issue of small tools, maintenance supplies, servicing equipment and, in a few cases, possibly small equipment. It also should permit us to borrow from equipment stores such equipment for emergency use in equipment movement included in our distribution plans as perhaps prime movers, large trailers and [illegible] truck cranes; plant we do not have. It

67623

2 3 9 8 1

Declassified E.O. 12356 Section 3.3/NND No. 785019

should include authority to call on the Military for emergency repairs for which we will not be equipped in the field, as welding and major repairs to our plant.

3. The strict purpose of this policy would be the authority to call upon the Military for only emergency assistance, as required and not anticipated. Since our operations comprise solely the reconstruction of Military Highways in strict cooperation with the desires of the Military, it is essential for all concerned that we receive the same or similar assistance, upon request, as would be granted a Military Organization functioning in like manner. Without such assistance our equipment soon would become inoperative and our program of assisting both the Military operations and the Italian Civilian economy will gradually cease to exist to the detriment of all concerned.

Respectfully

PENINSULAR BASE SECTION
APO 782

AG 475.4 BPENG (23 Apr 44) 23 April 1944.

SUBJECT: Highway Construction Equipment.

TO : Chief Commissioner, ACC, APO 394.
(Attention: Public Works and Utilities Sub-Commission.)

1. Reference is made to list, attached, of equipment which you propose to procure for the maintenance by the Italian Government of roads on the Italian mainland.

2. It is recommended that the following revisions be made in the requirements:

a. Item #3, Tractor, D-7 (Heavy) shows a total of ten (10) desired. Recommend reduction to six (6).

b. Item #4, Tractor RD-4 (Light) shows a total of ten (10) desired. Suggest reduction of this total to six (6).

Since no new road construction will be involved and tractors will be required only for the removal of debris and as prime movers, it is believed that the above numbers of D-7's and RD-4's should suffice.

c. Item #12, Distributor, bituminous, 1250 gallon, self-propelled, shows a total of sixteen (16) desired. Recommend reduction of this total to ten (10).

d. Item #22, Crusher, rock, portable, 25 cu. yd. per hour, shows a total of 25 desired. Recommend reduction of this total to 15.

e. Item # 23, Crusher, rock, portable, 25 cu. yd. per hour, secondary, shows a total of twenty (20) required. Recommend reduction of this total of ten (10).

f. Item #29, Mixers, Concrete, 5 to 10 cu. ft., self-powered, trailer mounted, shows a total of forty (40) desired. It is recommended reducing this total to thirty (30).

3. Except as noted in paragraph 2, above, it is the opinion of this Headquarters that the items listed are not in excess of needs.

4. Insofar as the maintenance of roads in the Peninsular Base Section is concerned, it is considered that the equipment indicated in the attached list under the appropriate column should be sufficient.

5. In general, none of the equipment desired by you is available for issue from Peninsular Base Section stocks.

6. It is recommended that steps be taken to procure your equipment needs with the least practicable delay in order that troops now engaged in road repair and maintenance may be released for other assignments.

For the Commanding General:

(Sgd) L.F. NICKEL,
L.F. NICKEL,
Lt.Colonel, A.G.D.,
Adjutant General.

1 Incl.-
Hwy. Constr. Equip. Reqn., ACC.

NOTE.
On lists attached Items 12 and 29 (mentioned above) are now 14 and 25 respectively.
