"S.S. BARON CAWDOR"
Naples 25 June/4 Jul 1945

1. The following were the items of cargo carried by the above ship:

Salvaged machinery	16 tons
Roller	28 Tons
Concrete Mixer	5 tons
Tractor	5 tons
Crushers	9.5 tons
Compressor	1 Tons
Babcock & Wilcox Parts	4 tons
Marine Engine	5 tons

2. I.C.E. inform us that they did not handle these goods and that they were landed by the Port Authorities and disposed in accordance with instructions received from you.

3. If this is the case it is unreasonable for us to continue to press ICE for receiving reports for the goods and we shall be obliged if you will inform us if the statements of ICE are correct.

4. As this matter has been outstanding over six months and is keeping us from closing the July accounts we shall be obliged if you will let us have your reply by return.

Edward Capt. RASC.,

SUBJECT : Termination of Property Accounting and/or Responsibility of Public Works and Utilities Section, Industry and Utilities Sub-Commission, Allied Commission.

TO : Chief Accountant
Allied Supply Accounting Agency
Finance Sub-Commission, A.C.
(Attn.: Lt. Col. Rhyman)

1. There are forwarded herewith copies of the "Final Report on Highway Equipment Disposals", dated 11 January 1946, (an earlier copy of which was presented to you on 11 January 1946) a report covering disposition of wrecked jeep No. 20105389, dated 4 January 1946, both indorsed to you; papers covering circumstances surrounding loss of jeeps Nos. 20153399 and 30112827, and true copies of forms "Declaration of Global Surplus Stores" covering transfer of outstanding Utilities property as receipted for by Chief Disposal Officer, (Surplus), Ministry of Supply.

2. With the transmittal of these papers, P.W. & Utilities Section, Ind. & Utilities Sub-Commission, A.C. completes its accounting for supplies as directed by you, following letter from this office to you, subject "Termination....etc.", dated 17 December 1945, file ref. AD/1/120.

3. These matters were discussed in full at our meeting, 11 January 1946, with Mr. F.O. Griffith, Highway Equipment Officer, present, at which time, you stated that in so far as your records reveal, P.W. & Utilities Section, Ind. & Utilities Sub-Commission, had completed its

11 January 1946

Ref. AD/1/136

SUBJECT: Final Report on Highway Equipment Disposals

TO : Maj. N. W. Hyland, Chief
Public Works Section

FROM : F. C. Griffith
Highway Equipment Officer

1. Attached is the final report of material and equipment received by this Headquarters and transferred to the Ministry of Public Works. Please note that this report shows material originally indicated on approved requisition ENG 180, that actually received and that which was delivered to the Ministry. Items marked with "x's" are materials which did not occur on Requisition 180 but were consigned to Public Works and Utilities Sub-Commission and disposed of as directed.

2. Some losses have occured in equipment of which this office had records. A description of these items follows:

Item no. 3. 1 rotary sweeper. The Public Works & Utilities S/C notified this Headquarters that this sweeper was in Naples. Our agent in Naples notified that it had been transshipped to Livorno, and in turn when we called Livorno, it was indicated that it had been shipped to Genoa. I personally checked every warehouse in Genoa and was unable to locate this piece of equipment. Therefore, it was not signed for by this Headquarters and was dropped from our accountability.

Item no. 12. Grader, patrol, motorized. Requisition ENG 180 called for 25 of these graders. Instead, we received 37. We have in our files correspondence concerning 41. 2 of these additional 4 were turned over to Maj. Hasie last April by order of your Headquarters for use on airport roads in the vicinity of Foggia. They were later abandoned by Maj. Hasie and picked up by PBS. Copy of the letter of acknowledgment by PBS is attached in the correspondence regarding 2 asphalt kettles in the same category. The other 2 of these 4 were shipped to Naples, unloaded, and collected by the Army. This Office received notice from Headquarters, Public Works & Utilities S/C that they were in Naples, but when we reported to Naples, it was learned that they had been taken by Ordnance to Aversa and we were never able to locate them. They were not signed for by this Headquarters and, therefore, were not picked up in our accountability.

0 3 6 31

Declassified E.O. 12356 Section 3.3/NND No. 785019

Item no. 16. Thornycroft diesel, 3-ton, 4x4, British lorry. This vehicle was sent to Foligno early in July of 1945 to pull in another vehicle which had broken down in process of convoying equipment from Ancona to Rome. The truck threw 2 piston rods simultaneously and completely wrecked the engine. It was turned over to R.A.S.C. at Foligno and correspondence covering this transaction is attached. The RLR certificate indicated in the final letter of acknowledgment of receipt of this vehicle has never been received by this Headquarters.

Item 23. Kettles, asphalt, trailer mounted. 2 of these kettles indicated as missing were transferred by order of the Public Works & Utilities S/C to Maj. Basie for use on roads in conjunction with airfields near Foggia. They were abandoned by name and later collected by PBS. Copies of correspondence attached covers this transaction.

Item 25. Mixers, concrete, 7-5 Rex, trailer mounted. This Headquarters received notice that 30 of this type mixer were in Naples in April of 1945. At that time we were in the process of transferring our Headquarters together with such equipment and vehicles as we had at that time accumulated from Naples to Rome, and it was expedient to have these mixers transferred to Rome by rail. Therefore, previous to their entering into our possession orders were issued that they be so shipped. When they were received in Rome, it was found that the shipment consisted of only 25 mixers. Your Headquarters was notified of this shortage and efforts were made by Capt. Sheppard to locate the other 5. Later it was found that 4 of these mixers had been picked up by a British organization and we were ordered to repossess them. The matter was turned over to Mr. Townsend since they were in the Naples area for this action. Mr. Townsend reported back to this Headquarters that the British organization which was supposed to be in possession did not have them. Public Works & Utilities S/C was so notified and it is not known what further action was taken. The other mixer was never located. Therefore, only 25 mixers were picked up on our accountability. Correspondence covering the transaction of these 4 mixers in British Army possession is attached.

Item no. 26. Asphalt plant. Requisition MIG 180 showed 4 4-unit plants available. Later availability was indicated for 3 as of January 1946 and these three were, therefore, cancelled. One plant was received from PBS Army stores. Later a second unit consisting of a 3-unit plant (minus soil stabilizer) were abandoned by 5th Army on Route 65 north of Florence and was picked up by Genio Civile in Florence. Since this Headquarters knew that Genio Civile had it in their possession and should pay for it, we required them to sign for the same on Temporary Memorandum Receipt. This 3-unit plant was later brought to Rome by this Headquarters, turned over to the Ministry of Public Works, and has been signed for on Permanent Transfer Receipt by the Ministry.

3. Therefore, with this report we are giving complete accountability for all items for which we are accountable to the Finance Sub-Commission.

SUBJECT: Loss of Crushing and Screening Plants

TO : Maj. N. W. Ryland
Chief, Public Works Section

1. Capt. Milani has returned from Florence where he has made a check to ascertain the location of the primary and secondary crushing plants which were in the hands of British authorities and had not been turned over to the Ministry of Public Works.

2. Plant No. 79, Eng. No. 4904157, U.S. no. 0831472, is reported to be at Foligno in G.E. stores; and Plant No. 74, Eng. No. 4904182, U.S. no. 0831471, is reported to be at Cancello in R.E. stores. Capt. Milani was instructed to contact 104 C.R.E. in Rome. Please note in our letter of 11 December, AD/1/108, that an attempt was made to locate this equipment through British 104 C.R.E. and that no success was made since they neither had knowledge nor were concerned with the matter.

3. It is suggested that perhaps your office would have more success in dealing with this British Army organization than we. Since we are making every effort to close out our accounts, it is hoped that this matter will be immediately clarified, either we be given credit for this plant and it be left in the hands of the British authorities, or that steps be taken to have the British deliver them to the Ministry of Public Works.

7 (29)

Major Hyland:

(a) Major Morsello reports that the three graders are in operation at Concello by Genio Civile operators and only loaned to Br., to be returned.

(b) Ferretti refuses to sign MRs for items in use by contractors until he completes contracts. This is no concern of ours and since he know the items are there and is in negotiation with them there is no excuse to delay MRs any longer. In the case of one contractor, an agreement has been made but MRs not returned to cover. (Grecco - 4 trucks)

(c) I made a letter report to you concerning two missing crushers. Please prepare letters covering the two at the Br. organizations indicated and Milani will go to Foligno and Morsello to Concello Thursday. Suggest they be ordered to release them to nearest Depo and Milani and Morsello can see they know where they are and can return statements for Ferretti. 7/19

(d) It is quite apparent that Ferretti is playing a delay

Declassified E.O. 12356 Section 3.3/NND No. 785019

no concern of ours and since he know the items are there and if in negotiation with them there is no excuse to delay NIRs any longer. In the case of one contractor, an agreement has been made but NIRs not returned to cover. (Grecco - 4 trucks)

(c) I made a letter report to you concerning two missing crushers. Please prepare letters covering the two at the Br. organizations indicated and Milani will go to Foligno and Marsella to Cancello Thursday. Suggest they be ordered to release them to nearest Capo and Milani and Marsella can see they know where they are and can return statements to Ferretti. 7:19

(d) It is quite apparent that Ferretti is playing a deliberate waiting for reasons unknown. Claims now he has not been told by his authorities he should sign for any of the things for which you state your people social signatures were forthcoming.

SUBJECT: Accounting for Supplies Issued from British Army Depots to A.C. for the Italian Government for Utilities

TO : Chief Accountant
Allied Supply Accounting Agency
Finance Sub-Commission
(Attn: Maj. Hyman)

1. Your letter, Subject: Issues from British Army Depots to the A.C. Sub-Commissions for the Italian Government, dated 18 December 1945, and our subsequent related conversation, refers.

2. It is noted that this Office is being requested to account for such supplies from 8 to 10 months after transfer thereof to A.C., as indicated on your copies of British Depot Issue Vouchers.

3. This Section now holds no property of this category in storage under its control. All such property known to exist, the accounting position of which is indefinite, has been impounded by the British FM, RAAC, in connection with an investigation regarding the disposition of this and similar property; the exact nature of such impounded property is not known to this Section, but it is believed to have been inventoried by the British FM, RAAC, in connection with the investigation mentioned, and further, it is believed that some of the impounded property may constitute a part of that which in your letter is asked to be accounted for. Moreover, the files of this Section have been scanned and copies of the only correspondence bearing on this subject are attached. Accordingly, it is recommended that the accounting for this property be referred jointly to the British Ministry of Supply and the British FM, RAAC; paragraphs 2 and 7, letter, Headquarters, Allied Commission, Subject: Cutoff Date Combined Civil Affairs Supplied, dated 14 December 1945, refers.

4. If further action in this matter is desired of this Office, information is requested, as follows:

a. What orders or instructions were issued or published prior to Executive Memorandum No. 6, 8 November 1945, Subject: Handling of Civilian Supplies Drawn from Depots of U.S. Army and British Army, which covers accounting for such supplies.

7418

05731

Declassified E.O. 12356 Section 3.3/NND No. 785019

b. What procedure is to be followed at this time in accounting for such supplies handled prior to Executive Memorandum No. 6, in the absence of file data bearing thereon.

c. What is the sum total of all such supplies furnished prior to 6 November 1945, which it is desired this Section account for. Such a list will serve to avoid duplication in accounting procedure and assist this Section in completing its accounts on or before 1 January 1946.

Ref. AD/1/120

17 December 1945

SUBJECT: Termination of all Accountability and Responsibility for Divisions of Public Works and Utilities Department Re Property and Supplies Furnished by the Allied Governments for the Italian Government.

TO : Director
Finance Sub-Commission
(Attn: Lt. Col. Bradley, Accounting Section)

1. It is the desire of the Public Works and Utilities Department to terminate its functions in connection with the accountability and responsibility re property and supplies furnished by the Allied governments for the Italian Government, at the earliest practical date. Every effort is being made by this Department to complete such termination by January 1, 1946.

2. In connection with the foregoing, the undersigned visited the Accounting Section, Finance Sub-Commission, Allied Commission, on November 30, 1945, at which time Maj. Lyman of that Section was advised of the foregoing desires of Public Works and Utilities Department and was requested to advise this Department of any property or supplies so furnished, and not already accounted for by Finance Sub-Commission to the Allied governments, which the records of Finance Sub-Commission indicate this Department accountable and/or responsible for, until proper receiving reports, signed by a representative of the Italian Government for such property are forwarded by this Department to Finance Sub-Commission. At this meeting some of the various aspects of Finance Sub-Commission's existing accounting records were discussed, and it was agreed that some duplication of receipting for property had occurred in the past, and that such a list as requested would serve to crystallize this Department's present accountability position. The interview was concluded when Maj. Lyman instructed Sgt. Timms of the Finance Sub-Commission Accounting Section to prepare such a list.

3. On December 4, 1945, Lt. Col. Bradley and Sgt. Timms, both of the Accounting Section, Finance S/C, contacted the undersigned relative to the preparation of the list mentioned above and promised to forward it to the undersigned as soon as completed.

4. This morning, Private Yurowitz of this Office was sent to inquire about the present status of the list mentioned and was told that Lt. Col. Bradley desired to see me. In the afternoon, Lt. Col. Bradley advised me that he had delivered the list to Mr. Frampton of Public Works Section and that I should obtain it from him. Mr. Frampton was contacted immediately and the said list obtained.

7.1

Declassified E.O. 12356 Section 3.3/NND No. 785019

5. A preliminary study of the list has revealed that from an accounting standpoint, the list, as presented, is unintelligible in part due to the use of indefinite descriptions, for example, asphalt kettles are referred to in terms of an over all tonnage--the number, size, type, etc., not being shown. This deficiency in the list was brought to the attention of Sgt. Timms, who informed me that he had advised Lt. Col. Bradley of the matter and that Lt. Col. Bradley would clarify same.

6. Pending receipt by the undersigned of more detailed information regarding the list as set forth above, this Department is continuing to expedite the termination of its accountability and responsibility position by completing transfer to the Italian Government of such supplies and property as are believed to require action at this time. These in effect are comprised by and large of certain imports, since Finance Sub-Commission advises that supplies derived from military stores have been accounted for by the military.

7. With the rapid turnover of personnel in the military services and in Allied Commission, with resultant consolidation of offices, records, and responsibilities, it is considered most important that every effort be made now by the local related accountable agencies to close this matter while the personnel remaining who are intimately experienced in these matters are available to complete the records.

RESTRICTED

HEADQUARTERS
TWENTY FIRST ENGINEER AVIATION REGIMENT
APO 528

WJE/ewr
11 August, 1945

SUBJECT: Disposition of Asphalt Kettles.

TO : Allied Commission, Public Works and Utilities Section, Naples, Italy. ATTENTION: Mr. Townsend.

1. In the early part of the current year, two (2) 110 Gal. Asphalt Kettles were placed in this area for use on highway work for the Allied Commission under the supervision of this regiment. No paper work was executed on this equipment. One kettle bore serial number 6304T and registration W-0777622; the second bore serial number 6031T136, registration number obliterated.

2. On 26 June 1945, a letter was sent from this headquarters to Allied Commission, Rome, requesting that the kettles be shipped on paper to this organization or other disposition be indicated.
No answer has been received to this letter to date.

3. In the absence of instruction from Allied Commission, and in accordance with MTOUSA policies on disposition of engineer equipment not in operational use, one kettle was shipped to a unit alerted for redeployment to an active theatre and the other was turned in to Depot E2N50, Naples, for credit on 25 July 1945.

4. Information received on Thursday, 9 August 1945, at Public Works and Utilities Office, Allied Commission, Naples indicated that subject kettles are technically the property of the Italian government. As Depot E250 states that asphalt kettles are currently a critical item, it is suggested that Allied Commission clear it's responsibility, by shipping the kettles on Shipping Ticket to this regiment and in turn, arrange a monetary credit to the Italian government through appropriate channels.
Should the redeployment program be altered by current developments in the Pacific, other kettles can undoubtedly be made available to Allied Commission by Depot E250 at a later date.

For the Commanding Officer:

R. G. CHAMBERS
Capt., 21st Engr. Avn. Regt.
Adjutant

SUBJECT: Missing Concrete Mixers

TO : Lt. Col. Quartier, QMC
Supply and Property Officer
Through: Maj. H. W. Hyland
Chief, Public Works Section

1. This Office was notified of the receipt of 30 concrete mixers on 10 April 1945, which had arrived on the SS.Stanford in Naples. At that time the headquarters of the Highway Equipment Section was being moved from Naples to Rome and the concrete mixers were ordered moved by rail by Capt. Sheppard from Naples to Rome. With the exception of one concrete mixer, which was erroneously collected by the 250th Engineers, PBS, and later turned over to this Headquarters and transported by truck from Naples to Rome, this shipment from Naples by rail was received 5 machines short of the 30 indicated in communication of 10 April. One of these concrete mixers has never been located.

2. In a letter dated 2 October 1945, copy of which is attached together with letter dated 21 September 1945, same subject, the 4 concrete mixers were located as being with the 214th Group RAF, and it was requested that this Office take steps to obtain them.

3. This matter was turned over for action to Mr. Townsend in Naples by telephone, who later reported that he had not been able to either locate or obtain possession.

4. Letter report, dated 11 October 1945, ref. AD/1/57, was submitted on this matter to Lt. Col. Wm. W. Spann, Engineering Div., Public Works & Utilities S/C.

11 December 1945

SUBJECT: Loss of Crushing and Screening Plants

TO : Lt. Col. H. C. Quartier, CMP
Supply & Property Officer
Through: Maj. N. H. Fyland
Chief, Public Works Section

1. References our conversation of 6 December regarding the 2 crushing and screening plants that have disappeared from the Toscana area, the following information is submitted.

2. The missing pieces are: one secondary crusher, Cedar Rapids make, Iowa Manufacturing Co., capacity of 25 tons per hour, Plant No. 79, engine no. 4904137, serial no. U.S. 0831472, makers serial no. 8538; and primary crusher, same make and manufacture, Plant no. 74, engine no. 4904182, U.S. serial no. 0831471, maker's serial no. 8540.

3. These two pieces of plant were turned over to the First District, British on April 10, 1945 by PWB, who had received them for the Public Works and Utilities Sub-Commission at Livorno. Receiving reports, consigning these and six other crushers to Genio Civile, Rome, were signed by Cpl. T. H. Jones, for Major Prelaim, 854th Quarry Coy, R. E. In accordance with previously directed procedure issued by P.W. & U. S/C. this Office early in June ordered the Genio Civile at Florence to employ personnel and take over the operation of this and other similarly placed equipment in the Toscana area. On 20 June it was learned that British personnel in charge of this plant would not permit Genio Civile to take possession, reference my letter AC/7/23, dated 23 June 1945, to Chief, Public Works Division, Public Works & Utilities S/C. Correspondence between P. W. & U. S/C. resulted in an instructive directive being issued by Brig. C.S. on 1 July 1945.

4. In July this plant was moved from Cammuscia Quarry to Siena without previous authority from the Public Works & Utilities S/C, as directed in letter dated 5 April 1945, from Chief, Engineering Division. My report on this matter is in AC/7/33, 30 July 1945, to Maj. Morsella, Liaison Officer, Highway Equipment Section, with copy to Public Works & Utilities S/C.

5. Later, at an unknown date the plant was transferred to Gualdo Tadino, at which point this Office located it by inquiry from Genio Civile authorities. On October 15, Maj. Morsella learned that the plant had been removed to an

03-8-91

Declassified E.O. 12356 Section 3.3/NND No. 785019

unknown destination. Two British soldiers at the headquarters of 24th CRE informed Maj. Morsella that they believed the equipment had been transferred to Foligno to be held for shipment to Bari. This matter was reported to Public Works & Utilities S/O. and also verbally to Capt. Hodges, A. C. Liaison Officer, First District, who promised to look into the situation. Nothing further has been heard. In late November Maj. Morsella was sent to check with various British authorities in that area to learn if possible what had become of this equipment. He was told by Maj. Lewis of D.C.R.E., Perugia, that the latter did not know if the plant is at Foligno, Bari, or Cancello, and suggested that Capt. Woodward, 10th CRE, Rome, be contacted. Capt. Woodward referred us to Capt. Hatchett in the same office, who states that he has no knowledge or concern in the matter.

6. This plant has been signed for in good faith on temporary memorandum receipts by the Chief Engineer, U.S.F.S., Florence. We cannot, however, transfer it on permanent memorandum receipts. Advice is requested of your office.

SUBJECT: Turnover of Equipment and Operation of Highway Equipment Division

TO : Maj. H. W. Hyland
Chief, Public Works Section

1. Reference your AG2/PWU, dated 7 December 1945, above subject. Please be informed that all equipment, materials, and supplies have been physically turned over to the Ministry of Public Works under the direction of Ing. Ferretti, Chief, Highway Equipment Division, and that such material and equipment have been in this status for some time past.

2. While the necessary documents, as indicated in paragraph 2 of your letter, are at this time in the hands of Ing. Ferretti, it is not believed that they will be executed and returned by the deadline indicated as 22 December 1945. This process has been very slow because Ing. Ferretti, being unfamiliar with operations previous to his entry into his present responsibilities, is reluctant to sign for equipment until he has ascertained its location and its condition, and other matters which he feels are in his best interests and for his personal protection. However, it is felt that in many instances this reluctance is far fetched in that some documents have been in his hands a longer time than is necessary to make proper investigations. Two letters have been submitted by this Office to Ing. Ferretti urging him to take all possible action in expediting the completion of all documents previous to January 1, copies of such letters have been forwarded to your office (Ref. AD/2/140 and AD/2/151).

29 November 1945

Ref. AD/1/101

SUBJECT: Trucks for Sale by Ministry of Public Works

TO : Col. E. J. Risted, Asst. Director
Industry & Utilities S/C

51

1. Attached is a copy of a circular issued to the contractors over Italy by the Ministry covering trucks for sale. The origin of these trucks is not known, but it is understood they are new. They are of Dodge make and probably sell in the States for $2500 and $4000. Please note that they are being offered at $8,600 and $14,000, respectively.

2. Insofar as this Office can learn, contractors have not indicated any desire to purchase these trucks because of their exorbitant cost. Since transport is so badly needed by contractors on rehabilitation work, it would seem that some means could be devised to control the sale of trucks originating in the States so as to avoid unnecessary delay and expense in rehabilitation work. We are frequently asked why new trucks are being sent from the States at this time when so many thousands of usable and new war service vehicles are available for this purpose, but apparently are not being released.

Respectfully submitted.

F. O. GRIFFITH
Highway Equipment Officer

Tel: Ext. 268 FOO/hab

Ref. AD/1/107 6 December 1945

SUBJECT: Receiving Reports, I.C.E.

TO : Col. H. C. Quartier, CMC
Supply and Property Officer

1. Reference your visit to Finance Sub-Commission relative to procedure in issuance of receiving reports to I.C.E. for action of the Finance Sub-Commission.

2. In the past and in accordance with instructions received from the Finance Sub-Commission, the following procedure has been in effect:

a. Materials received in transports and warehouses were receipted for by a representative of the Public Works & Utilities Sub-Commission. In some instances these receipts were I.C.E. receiving reports.

b. The equipment or materials issued were receipted from memorandum receipts and receiving reports which were to be submitted to I.C.E.

c. I.C.E. in turn issued a receiving report to the Highway Equipment Section indicating they had accepted the responsibility for the monetary transaction; copies were sent to Finance Sub-Commission.

3. At the time this policy was clarified numerous requests had been received from I.C.E. for signature to receiving reports which their Rome office had issued for materials and equipment received by this office. In conversations with the Finance Sub-Commission, it was brought out that should receiving reports be a second time receipted that there was a possibility that I.C.E. would take credit for items two times and, therefore, payment would not be made for the same to twice the amount actually involved.

4. An example of such possibilities is indicated in the attached letter and receiving report from I.C.E. This transaction covers the matter of 150 batteries which were received at the port of Livorno by this Headquarters. Receiving report for this material was given at that time by the Transportation Liaison Officer at Livorno and we took possession by signing standard invoice and release. Since I.C.E. in Livorno had already been given one receiving report covering this consignment of batteries, the object in asking for a second receipt for the same shipment

7 pp.

Declassified E.O. 12356 Section 3.3/NND No. 785019

was questioned. It will be noted that a receiving report does not identify the shipment in any way and that it would be possible for I.C.E. to show that Public Works and Utilities had received 300 batteries instead of 150 batteries, as actually was the case. In this transaction the batteries were received by this Headquarters, disposed of to contractors and Genio Civile, the prices indicated by Commerce Sub-Commission, and the funds so collected turned over to the Purchases and Contracts Section of the Finance Sub-Commission; therefore, since the batteries were sold and the money credited to the agency authorized to collect, the transaction should end with I.C.E. having a port receipt for 150 batteries, the Commerce Sub-Commission clearing their records by issuing orders, and this Office clear their obligation by having receipted invoiced and accounts.

5. This has occurred in a number of cases and so far, on the advice of the Finance Sub-Commission, we have ignored such requests after notifying I.C.E. of the indicated procedure. Should we issue receiving reports covering materials and equipment as indicated by your verbal instructions of last week, we shall be issuing receiving reports for many of these items twice. It is requested that the matter be clarified in all respects and this Office be given written instructions of the proper procedure.

F. O. GRIFFITH

SUBJECT: The Removal of War Tanks and Trucks, Latina

TO : Maj. Hyland, Chief, Public Works Section

1. Attached is correspondence from Genio Civile at Latina and covering letter from Ing. Ferretti, Highway Equipment Division, Ministry of Public Works, relative to the necessity for removing tanks and trucks that have been immobilized and are at this time halting reconstruction activities.

2. Please note that in the last paragraph of Ing. Ferretti's letter he states that they might send personnel and equipment to Latina to handle this salvage operation and in turn obtain surplus scrap materials and spare parts. This has been further discussed with Ing. Ferretti and we have convinced him that such operations would be unfeasible, especially since he does not have the proper equipment, including welding equipment and cutting tools to salvage such heavy items.

3. It is not known by this Office if such items are tied up by Army control. If they are, Ing. Ferretti should be so notified.

4. This Office, not having access to any source of assistance to give these people, submit the matter to any action you may see fit to take.

P R O M E M O R I A

Da parte del Genio Civile di Latina.

In seguito ai noti avvenimenti bellici succedutisi dal 22 gennaio al 5 giugno 1944 il Comune di Aprilia ha subito notevoli danni. Attualmente l'Ufficio del Genio Civile di Latina sta provvedendo a riparare diversi fabbricati meno colpiti per dare ricovero ai senza tetto; ma prima di poter svolgere con sollecitudine detti lavori è necessario sgombrare il centro di Aprilia sia dalle macerie e dai muri pericolanti, sia dai carri armati e camions che intralciano nelle piazze e nelle vie l'opera di riparazione e di ricostruzione intrapresa.

Il suddetto ufficio del G.C. ha già appaltato alle imprese alcuni lotti di sgombri ma non può far rimuovere i suddetti relitti di guerra perchè le imprese non hanno l'attrezzatura necessaria. Si prega pertanto un interessamento da parte degli Alleati.-

1. Reference your letter No. 28367/R.M.A/2 of 29 November.

2. We have checked the procedure in the transfer of materials which you indicate in your letter and find this is in accordance with existing policies at this time. We have only a few of the receiving reports which you have sent to this office, covering such materials, and the balance, issued by your office at various times before, were sent to the Finance Sub-Commission and are no longer available.

3. It is requested that this office be given a complete list of all the material and equipment appearing in your records for which receiving reports will be submitted to you. This should be done at your earliest convenience since this office is closing out its affairs.

SUBJECT: Contractors Equipment

TO : Maj. A. J. Greene
Public Works & Utilities Office, AMG
Lombardia Region

1. Reference your letter of 31 October, MI/PWU/POL, subject, Contractors Equipt.

2. In reference to our recent conversation relative to your letter, as above, please be informed that we have up to this time found no source of equipment for contractors. It is indicated at this time that all requirements must eventually be made through the Italian Government. In conversations with the Minister of Supply, Italian State Railways, the time of such opportunity is not known and will presumably be a long time off. When equipment is placed for the availability of individuals or contractors, it is to be placed for sale to highest bidders. Should anything develop other than this arrangement whereby contractors may obtain badly needed equipment, we shall advise you.

3. With regard to the crushing plant recently sent to Milan, your care, this also falls under the same category and it will not be possible for the contractor to purchase the crushing plant other than through the Italian Ministry. It is suggested that the contractor contact Ing. Ferretti of the Highway Equipment Division, Ministry of Public Works, and see if some arrangement may be made with that agency whereby the contractor may obtain the same.

4. Please have the memorandum receipts covering this issuance completed with signatures and return them to this office at your earliest convenience.

F. O. GRIFFITH 7383

SUBJECT: Highway maintenance equipment
MOC Airgram 109 of 8 September 1945.

TO : Headquarters Allied Commission APO 394
(Attn: Economic Section).

file

1. Reference is to CAL 1494 (signal 5407 of 26 September 1945) from CCS to AFHQ repeated to AICOM Rome. This cable was received in reply to AFHQ signal IAC 1305 (C18242 of 10 September 1945) to CCS requesting expeditious action be taken on Requisition CIAC I-253, Highway maintenance equipment, transmitted by MOC Airgram 109 of 8 September 1945.

2. In view of CAL 1494 and COM 224 (signal 5408 of 26 September 1945) and in order to effect expeditious transfer of the equipment listed in MOC Airgram 109 to the Italian Government, Allied Commission should:

a. consult with the Italian Government on the availability of funds to purchase the equipment through ANLC/Ministry of Supply Disposal Officer.

b. consult with ANLC regarding transfer of U. S. equipment. ANLC should be requested to extract to PBS all items not already declared surplus to ANLC in order to determine availability and to arrange sale.

c. consult with Chief Disposal Officer, Ministry of Supply, regarding transfer of British equipment.

3. A copy of War Department TM 38-420 referred to in CAL 1494 is being forwarded to Allied Commission under separate cover.

4. Allied Commission is advised to keep CLAC informed of action taken on CLAC I-253.

7387

5. It is desired that Allied military units be relieved of responsibility for highway maintenance as soon as possible. Request that this Section be promptly advised of action taken in reference to paragraph 2 above.

M E M O R A N D U M

SITUATION REGARDING A.C. EQUIPMENT SOLD TO ITALIAN GOVERNMENT

47

1. The Allied Commission Office set up to sell the Italian Government equipment of all kinds for road maintenance and general emergency repairs, will cease to function on the 1st January 1946. Little or no new equipment is being imported at the moment, but it is expected that a very considerable quantity of equipment will become available through War Disposal Board (A.R.A.R. - U.R.M.I.E.) and Ufficio Ricupero.

2. However after checking with Headquarters Allied Commission investigations prove that on the 20th Nov? 1945 quite a quantity of equipment already issued to the Italian Government Engineers is not being put to use. It is known further more that some of the equipment is needed in the Venezia Region, and it is recommended that such equipment as is not in use should be re-deployed.

3. The following list of equipment gives the situation:-

(a)	Bull dozers	1	Florence	idle
		1	Bologna	idle
(b)	Shovels ¾ yd	1	Florence	idle
		1	Bologna	idle
(c)	Scrapers 8 yds	2	Bologna	idle
(d)	Motor Petrol Gridders	2	Florence	idle
		6	Bologna	idle
(e)	Graders towed	5	Florence	idle
(f)	Asphalt Distributors	1	Florence	idle
		2	Rome	idle
(g)	Air Compressors 210 cu.ft.	1	Cisno	idle
		1	Bologna	idle

SUBJECT: Snow Plows

TO : Ing. Ferretti, Chief Engineer
Ministry of Public Works

1. Attached is a copy of a letter from the Surplus Property Disposal Officer relative to snow plows requested by your Office. Subsequent developments in this matter will be brought to your attention as they occur. Mr. Dickens stated to us verbally that the request had reached his Office rather late and that it was questionable if the snow plows would be made available to the Ministry of Public Works since bids have already been accepted and one may have been designated for purchase previous to the receipt of our request.

Ref. AU/1/87 13 November 1945

SUBJECT: Snow Plows

TO : Albert R. Dickens, Chief
Surplus & Special Materials Section
Economic Section, HQ, A.C.

1. In the interest of assuring snow clearance on highways of military importance, this office on 19 October notified the Ministry of Public Works of the availability for purchase from ANLC of five snow plows listed in Lot No. 18 of the 15 October ANLC Catalog.

2. A communication received today from the Ministry of Public Works states that they had requested the Ministry of Transport (Ing. SCIATTI) to arrange for the purchase of the five snow plows for the account of the Ministry of Public Works. This communication further states that a reply was received from the Ministry of Transport with the declaration that Transport had been informed there was as yet no assurance that this equipment would be made available to the Italian Government, but might rather, be sold to some other nation.

3. It is desired by the Highway Equipment Officer, P. W. & U. S/C., A.C., that every necessary action be taken to assure that the five snow plows be made available to the Italian Works at the earliest possible date. It is requested that your office make strong recommendation to effect this arrangement, informing the Highway Equipment Officer of developments.

4. Identification of the equipment in question is made in ANLC Catalog as follows:

Lot No. 18, Declaration No. X508

Item No. 1	Stock No. 78-6515.4-0	Plow, snow single blade, rotary type (new) 2 @ $5375.
Item No. 2	No. 78-6525.5-0	Plow, snow, V-blade, motor grader mounting (new) 1 @ $937.50.
Item No. 3	No. 78-6505.5	Plow, snow single blade, 1½ truck mounting (new) 2 @ $562.50.

SUBJECT: Rock Crusher for Milan

TO : Maj. A. J. Greene
Regional Public Works Officer
Milan

1. In conformance with your letter of request dated 26 October, reference PWO/IL, we have sent you one crusher of 35 yards capacity, together with all attachments under the control and direction of Ing. Argentiere, who will report to you. He is instructed to deliver the crusher for you to such locations as you may indicate. Ing. Argentiere has Allied Commission orders and may be able to obtain billeting and rations. The men with him, however, are employees of Genio Civile and no provisions are possible for their billeting or rations. It will be much appreciated if you will assist them in any way you can since they are all short of funds.

2. Any instructions in the operation of the crushing plant that may be required will be furnished by this Office upon request from you. However, to avoid the expense to persons who are not adequately compensated for special trips, it is suggested that you might find some personnel in Milan, as Army Engineers personnel who are familiar with the operation of such machines and could supply such direction as indicated.

3. Memorandum receipts have been brought by Ing. Argentiere who is instructed to obtain proper signatures from the person to whom they are addressed. Will you please assist Ing. Argentiere in locating this Chief Engineer?

SUBJECT: Rock Crusher for Milano

TO : Ing. Ferretti, Ministry of Public Works

1. We have been ordered by the Public Works & Utilities S/C to move one of the rock crushers at present stored at Farnesina to Milano for the use of Genio Civile and under the military control of Major Green, Public Works & Utilities S/C.

2. We are at present awaiting the return of the mechanic who was engaged by the contractor at Cassino to operate the shovel you sent there. He must be returned to Rome at once to avoid delay in the movement of the rock crusher to Milano.

3. It will be necessary that you furnish 2 prime mover operators, a helper, and one of the 6 x 6 trucks with a driver. This expedition will be under the charge of Ing. Argentiere who has orders to proceed by military authority. It is requested that every assistance be given this action so that the rock crusher may reach Milano at the earliest date possible.

SUBJECT: Heavy Lift 1 & 2 Crawler Cranes ex Naples Docks

TO : Director of Transportation (Br) Main, C.M.F.
Attn: S/Capt. R. L. Griffiths

1. In reference to your tn.A.2/9/6, of 26 October 1945, subject as above, a careful examination of our records shows that the numbers listed in your paragraph 2, above letter, in no way coincide with identifying numbers of the 3 cranes which are under discussion.

2. Since, as indicated in your paragraph 7, complete confirmation of property responsibility has not yet been established and in view of the differences in identifying numbers, as indicated above in paragraph 1, it is felt by this Office that some further confirmation should be forthcoming from higher authority.

3. This office is immediately forwarding a communication to the Engineer Depot at Bari for full information on the transaction referred to in your paragraph 2 and will immediately advise you of the results of this inquiry. It is desired to cooperate with you in any manner possible in settling this matter, but before any further movement of this heavy equipment is attempted all details of ownership should be completely confirmed.

SUBJECT: F & H Crawler Cranes Released to British Engineering Section

TO : Commanding Officer
ABC Main Engineer Depot
Bari, APO 388

1. Reference is made to enclosures as regards the release from your depot of 2 heavy lift F & H Crawler cranes as per statement in paragraph 2 of enclosure No. 1.

2. As indicated in paragraph 1 of enclosure No. 2, doubt exists as to the identity of the equipment in question, and in the interest of satisfactory settlement of the claim made by the British (enclosure No. 1), it is desired that this office be informed if possible as to the exact identifying numbers, particularly the U.S.A. Registration numbers of the cranes released on the British Requisition, Voucher No. 1085, Demand Note No. RE/351, 16 March 1945 (paragraph 2, enclosure No. 1).

3. An immediate communication from you in this matter will be highly appreciated by this Office, and if the information desired is not at present available, please inform us to whom we may refer in the matter.

LOWELL H. FRAMPTON

Subject :- Heavy Li[illegible] & H Crawler Cranes ex Naples Docks

Transportation (Br.) Main, CMF
Tel:- Fir[illegible] 9328

Tn.A.2/9/6

26 Oct 45

To :- H.Q. Allied Commission Rome
for Public Works & Utilities Sub-Commission,
(Highways Equipment)
for attention - Mr Griffith

Copy to:- 3 Tn Stores Group, R.E.
Tn.5 (Mech)

1. Reference telephone conversation of this morning S/Capt. Griffiths of this H.Q. and Mr. Griffith of the P.W. and U. Sub-Commission, regarding the movement from Naples Docks of 2 of the 3 Heavy Type P & H Crawler Cranes to the Port of Genoa.

2. Three Cranes of this type, Nos. 8322-8390-8355 were released to this H.Q. from the Engineer Depot at Bari on 16 March 1945 against A.F.H.Q., Br. Eng. Sect., Voucher No. 1085, Demand Note No. RE/351.

3. The cranes were collected from Bari and moved to Naples on a Craft for eventual shipment to Genoa for Military use at that Port.

4. However it was later found that these Cranes were not required at Genoa and the shipment was cancelled. Instructions were issued to our representative at Naples that the cranes were to remain at that Port pending further instructions.

5. These cranes were to be used by the British Military against their commitment at Naples Docks and upon arrival there the Company concerned found that 2 of these Cranes had been moved on authority of a Capt. Ramsay, U.S.A. A.C., after instructions received direct from you.

6. It is now essential that the 2 cranes in question are returned by the fastest possible means to Naples as their loss is seriously affecting the efficient working of the Port.

7. The matter has been raised with the Department concerned at G.H.Q., C.M.F. and their confirmation that the 2 cranes are the property of this Directorate is awaited.

8. Please advise when we may expect the return of the cranes to Naples.

(Signed) R. L. Griffiths
R. L. GRIFFITHS, S/Capt.,
for Brigadier,
Director of Transportation.

SUBJECT: Salvage Disposal to Contractors

TO : Capt. Vaughn, Sales Officer
Quartermaster, Salvage, Livorno

1. This will introduce to you Capt. Emanuele Milani, Field Assistant to this Office. Capt Milani is in direct contact with contractors engaged in rehabilitation work of military importance to which this Section has supplied various materials and equipment. These contractors from time to time need materials and equipment which occur in salvage disposal lists. It would be very much appreciated if Capt. Milani be permitted to bring contractors to your office at such times as materials become available for disposal whom he recommends as persons to whom the material would be of extreme value in rehabilitation work.

2. It is suggested that Major Feldman, AC/PBS Liaison Officer, be consulted in this matter.

SUBJECT: Spare Parts for Jeeps

TO : Ing. Luigi Forretti, Ministry of Public Works

1. Capt. Milani has made arrangements in Florence whereby he can obtain spare parts for jeeps provided he turns in old parts. If at present you have old jeep parts on hand for which replacements are needed, it is suggested that you immediately collect them and turn them over to Capt. Milani to take to Florence. For future requirements it is suggested that spare parts taken from jeeps for replacement be sent to Capt. Milani by special courier for the new parts required.

2. This matter of spare parts in exchange for parts which you have on hand at the present time must be taken care of today since Capt. Milani plans to return to Florence tomorrow. At this time no other source for spare parts for jeeps is known by this office.

SUBJECT: Spare Parts for Graders

TO : Ing. Enrico Neri, Chief Engineer
U.S.V.S., Bologna

1. Your letter of 20 October regarding spare parts for your 6 graders and oil for hydraulic equipment has been referred to this Office by Ing. Ferretti. Capt. Milani, our field Assistant at Florence will contact you and furnish you a catalog of spare parts for such graders. If you will immediately inform Capt. Milani of the exact parts you will require, they will be sent to you by special courier. It is requested, however, that no requisition be made by you for more parts than you require for your immediate needs since spare parts are very scarce, and at this time unavailable.

2. We do not have at this time any of the hydraulic fluid to which you refer. A request is going forward to our Headquarters for special supplies, and when they become available, your office will be allocated for such as will be available for the plants you have in your possession. This matter should be handled as quickly as possible since Capt. Milani is being withdrawn to Rome for temporary assignment and will not be readily available to you.

SUBJECT: Spare Parts for Graders

TO : Ing. Ferretti, Ministry of Public Works

1. We have your letter of 20 October together with a letter from Ing. Neri at Bologna regarding the spare parts and brake fluid for Callion graders. I have instructed Capt. Milani to contact Ing. Neri with a catalog on Callion graders for the purpose of identifying the parts required. Ing. Neri has been instructed to give Capt. Milani a requisition for such parts, against which parts will be issued by this Office on Memorandum Receipts from existing stores.

2. The oil requested for brakes is not at this time available, but a request is being made to A. C. Headquarters to obtain the same. If it is obtainable, it will be allocated to the places where the possession of equipment requiring it is indicated.

MINISTRY OF TRANSPORTATION

Rome August 7 1945

To the Ministry for the Reconstruction
To the Excequer
To the Ministry for Industry
To the Prime Minister's Office
To the Ministry for Public Works

ROME

Subject: Import of trucks from U.S.A.

Since April 30 ,1945 the Foreign Economic Administration in agreement to the authority granted with letter dated March 26,1945,addressed to Admiral Stone, has placed with the " Procurement Agency " of our Excequer a requisition for the Trucks indicated below,to be paid with the credits granted by U.S.A. to the Italian Government :

I- N. 268 three tons Trucks
2- N. 386 five tons light heavy Trucks

the total amount of this supply being reckoned $ 2.Ioo.000 inclusive of body,tires,accessories.A spare tire was asked for and we hope it may be included too in the cost.

The average trucks carry a wooden body - stake- while light heavy Trucks carry a metal body -cargo - to the exception of II5 of them supplied with a Dump body.

The Italian board of technicians now in U.S.A. has informed us that 500 Trucks are ready and are dispatched to harbours for shipment.Their arrival in Italy may be expected this month,while the balance may be released during the year.

I think it convenient to suggest the directions indicated below concerning issue of Trucks that will be made through the " Ispettorato Generale della Motorizzazione " a branch of our Ministry:

I.- An allotment,say 300 units,on preferential request to the Railways managed by private Companies and Industries at present partially or totally interrupted by War damages,in order to start transportation of goods by truck, replacing or improving transportation by railway,affording extension to mountain areas and villages destituted of any communication commodity.

These Companies my employ at once their personnel use equipment,stations etc. and provide transportation

0527

Declassified E.O. 12356 Section 3.3/NND No. 785019

within reasonable tarifs with the best guarantee of a regular service and equal condition to everybody requiring transportation.

2- Another allotment ,say 300 units too, might be placed either with firms entitled to public transportation of travelers,or with Companies that for equipment and fit personnel may be considered adequate for the management of goods transportation.

3.- A third allotment might be entrusted to the Ministry of Public Works for its own purposes and the requirements of building yards under its control.

4.- Finally an allotment might be reserved to first class Companies working in connection with the Italian Government showing that they require transportation of their own; and to Industries specially concerned with food supply to,and reconstruction of,their Country; and to shipyards working for the Navy.

We are compiling a special contract form both for renting or sale of the above vehicles,bearing convenient guarantee for their exclusive use by the people to whom vehicles were allotted,any resale of vehicles,in the whole or in part (as tires) being strictly forbidden .

The Excequer is asked to urgently examine the cost at which vehicles will be released to firms requiring them and to people entitled to transportation of goods.

Please let me know your opinion concerning the above program.

THE MINISTER

SUBJECT: Spare Parts for 6 x 6's

To : Ing. Luigi Ferretti, Chief
Highway Division, Ministry of Public Works

1. Attached are requisition forms for 153 sets of spare parts for a period of 6 months for 6 x 6 American trucks. In accordance with instructions from our headquarters it will be necessary that you take this requisition to the Comitato Italiano per la Ricostruzione who must give you a letter stating that they will accept charges as required. This action is necessary since no doubt this equipment will be drawn on Army surplus dumps which will, therefore, have to be paid.

2. Before returning these requisitions and the letter from the above agency to this office, you should sign on that portion of the requisition where it says "requisitioned by." When the same is returned to this office, we will submit it to our Headquarters and you will be in turn notified by this office where the spare parts may be collected.

3. It is respectfully suggested that this be done immediately since due to changes in our military organization, this process may not be possible in the immediate future and you will be, therefore, unable to obtain the so badly needed parts.

SUBJECT: Road Maintenance Equipment - MGS-180-ENG (Concrete Mixers)

TO : Lt. Col. Wm. M. Spann, Engineering Division, P.W. & U. S/C

1. In reply to a letter from Lt. Col. R. C. Carson, Economic & Supply Division, G-5, please be informed that the 4 concrete mixers missing from a shipment of 30 on the SS Stanford were at the time we signed for them all at the Port of Naples. Railway bids were made for their shipment to Rome, but when they were received, 4 were missing. The skips and spare parts for this machinery, however, were received in Rome and are still held by this office. After the shipment was received 4 mixers short, this office checked with the Port of Naples Transportation Officer, Allied Commission, who stated that in so far as he knew all the mixers ready for shipment were shipped to Rome. The matter was then brought to the attention of Captain Shepherd who said he would check with the Transportation Sub-Commission in Rome. No reply was received and Capt. Shepherd was asked a number of times after that if any information had been obtained.

2. We have located the mixers, as indicated in letter dated 21 September 1945, from Capt. C. R. Mackenzie, RE, and Mr. Townsend has been requested to pick them up and store them in the Genio Civile warehouse in Naples, pending their transfer to Genio Civile, Public Works, in Rome.

SUBJECT: MMIA Material at Contin Plant

TO : Ing. L. Ferretti, Chief
Highway Division, Ministry of Public Works

16

1. There are still considerable material and equipment from MMIA sources stored at the Contin plant, which have been made available to you but which has not been transferred. An inventory will be made of this material by this office in the immediate future and will be presented to you for checking, at which time it will be appreciated if you will take the responsibility of the distribution of such commodities. Please advise if this meets your approval.

SUBJECT: Equipment Pool

TO : Ing. L. Ferretti, Chief
Highway Division, Ministry of Public Works

1. Reference your letter dated October 9, above subject.

2. This matter of a safeguarded storage pool for the equipment stored at Tudini & Talenti, Farnesina, has been brought up a number of times since this office has known that no adequate control or safeguard was possible in that yard. At the present time part of the equipment stored there has had parts stripped, which makes it inoperable since parts are not available. This office believes that the action you indicate in your letter should be taken as quickly as possible to safeguard operable equipment still stored there. However, we do not have access to the materials you request for your warehouse at the U.S.V.S. yard. The barbed wire you request is in storage at Contin yard and may be delivered to you by the signing of a receipt by your office for the same.

3. Please keep this office informed of any action taken since part of the equipment in the Farnesina yard still remains under our responsibility.

TRANSLATION:

Subject: Jeep & GMC Trucks spare parts.

1. - As you know our 158 GMC truck and 15 jeeps have no tool bag, a lot of spare parts are missing, and only very few spare wheels are available.

2. - I have asked Ing. Vallecchi (Transportation Ministry, via Nomentana 591) to supply the a/m materials, but they have in store very few spare parts or tools.

3. - I kindly ask you to consider if it is possible that Mr. Lorenzo E. Holmes, Lt. Col. QMC Supply Officer, Rome, may release to this office at least 29 tool bags, jacks, for GMC 6 x 6, 50 spare wheels and as many as possible spare parts.

SUBJECT: Highway maintenance equipment
MOC Airgram 109 of 6 September 1945.

TO : Headquarters Allied Commission APO 394
(Attn: Economic Section).

1. Reference is to CAL 1494 (signal 5407 of 26 September 1945) from CCS to AFHQ repeated to ALCCM Rome. This cable was received in reply to AFHQ signal LAC 1305 (C18242 of 10 September 1945) to CCS requesting expeditious action be taken on Requisition CIAC I-253, Highway maintenance equipment, transmitted by MOC Airgram 109 of 6 September 1945.

2. In view of CAL 1494 and CCM 224 (signal 5408 of 26 September 1945) and in order to effect expeditious transfer of the equipment listed in MOC Airgram 109 to the Italian Government, Allied Commission should:

a. consult with the Italian Government on the availability of funds to purchase the equipment through ANLC/Ministry of Supply Disposal Officer.

b. consult with ANLC regarding transfer of U. S. equipment. ANLC should be requested to extract to PBS all items not already declared surplus to ANLC in order to determine availability and to arrange sale.

c. consult with Chief Disposal Officer, Ministry of Supply, regarding transfer of British equipment.

3. A copy of War Department TM 38-420 referred to in CAL 1494 is being forwarded to Allied Commission under separate cover.

4. Allied Commission is advised to keep CIAC informed of action taken on CIAC I-253.

5. It is desired that Allied military units be relieved of responsibility for highway maintenance as soon as possible. Request that this Section be promptly advised of action taken in reference to paragraph 2 above.

A.C. PUBLIC WORKS
HIGHWAY EQUIPMENT

202

REF : AD/2/92

FCO/cm

September 28, 1945

SUBJECT : Equipment Issues.

TO : Ing. FERRETTI, Chief Engineer,
Highway Equipment Division,
Min. of Public Works.

FROM : F.C. GRIFFITH, Highway Equipment Officer,
HQ. AC. PW.& U. Sub-Commission.

1. Reference your request that three bulldozers be sent to the Florence Area, Ing. Giunta, to be used as snow plows.

2. Three bulldozers are available for transfer to you. The transportation you request us to arrange is no longer a function of this office but must be arranged by your office with the Ministry of Transportation. Should you experience difficulty in obtaining such transportation, the P.W.& U. Sub-Commission are anxious to give you any assistance in the matter possible.

3. The matter of using bulldozer for snow plows was verbally discussed with you. I feel it is my duty to again remind you that bulldozer cannot be succesfully used for snow plows, that they are only an earth moving and excavating machine and to use them for other purposes is a waste of costly equipment. I am quite sure that Col. Broyles, P.B.S., did not know that Ing. Giunta contemplated using bulldozers when he requested Ing. Giunta provide snow plows. An angle blade, constructed of wooden planks and bladed with a metal strip, mounted on the bumber of an American 6x6 truck or a patrol grader will operate on snow clearance in a much more efficient manner than the slower bull-dozer. It is a further known fact that only a most expectly experienced bulldozer operator can operate in snow drifts without burrying his machine in the snow and thus blocking further clearance work until a means is available to extricate the heavy machine. In isolated localities where a second bulldozer is not readily available it may only be extricated by the slow process of hand shoveling it out. Too, the bull-dozer you have are equipped with metal cleats and will destroy the asphaltic surfacing of your roads.

4. This Office very strongly recommends that you not use bulldozers for snow plows except in cases of absolute necessity where no other facilities are available.

A.C. PUBLIC WORKS
HIGHWAY EQUIPMENT

202

REF : AD/2/91

FOG/cm

SUBJECT : Equipment Issues

September 28, 1945

TO : Ing. FERRETTI, chief Engineer,
Highway Equipment Division ,
Min. of Public Works.

FROM : F.O. GRIFFITH, Highway Equipment Officer
HQ. AC. PW.& U. Sub-Commission.

1. In conformance with your request, the new construction equipment, obtained by the P.W.& U. Sub-Commission for rehabilitation work by the Ministry of Public Works, which was received and made available for issue, which has been issued on memorandum receipt and which is still on hand for disposal is indicated on the attached list.

2. Acknowledgement is given to the statement in your letter that both a part of the equipment issued and remaining on hand for disposal is not acceptable to the Ministry of Public Works; that such equipment is not acceptable in that, its size and type are not adaptable to their existing construction program. This matter has been verbally given to the attention of the Director, P.W.& U. Sub-Commission and it has been agreed that the Ministry does not have toaccept equipment they do not need. The signing of Memorandum Receipts by Ministry representatives for equipment already issued does not constitute an obligation to purchase such equipment and it may be released and withdrawn for disposal to agencies needing it.

3. An immediate reply in which an official selection of the equipment the Ministry desires to retain is imperative. This selection must be considered as final to avoid confusion in future planning and in the disposal of equipment not wanted by the Ministry.

4. The lists as shown attached do not represent all the equipment that will become available. There are at present a number of pieces in Ancona and Naples that will be listed for selection and disposal after they have been released to the P.W. & U. Sub-Commission and have been brought into Official identification records. We also anticipate that futher availabilities will be made from Military sources against the requirements given on existing approved requisitions.

P.W. & U. S/C.

F.O. GRIFFITH
Highway Equipment Officer
HQ. AC. PW. & U. S/C.

TO : Lt. Col. WILLIAM M. SPANN
Chief Public Works & U. Sub-Commission
Allied Commission
A P O 394

Reference your memo dated 18 september 1945.

1. Engineer Neri was informed by engineer Ferretti's telegram from Rome, on 15th of september 1945, that two scrapers were arrived to Bologna Station. Engineer Neri knew just when he went to the Station, that the two machines were arrived 11 days before to Bologna and they were still staying there on railroad cars.

2. The FF.SS. were not able to inform engineer Neri that the two scrapers were arrived, because they did not know his right address.

3. The engineer Neri has taken away the two scrapers from the Station on 17th of September and recovered them at U.S.V.S's.

4. Taking care of this job, engineer Neri was able do'nt pay the amount of demurrage (L. 70.000), but he paid the amount of transport (L. 40.000) only.

5. When engineer Neri received the two scrapers, he informed at once engineer Ferretti at Rome by telegram and sent contemporary a letter explaining him what it was happened.

6. We do'nt feel any necessity to remove Engineer Neri from office as we believe he has followed the right way for all people concerned.

Reference 214 Group RAF message Q547 dated 17 Sep, copy on reverse.

1. It would appear from detail given that the 4 Concrete Mixers are part of the consignment of 30 machines shipped from UK on "SS" STANFORD in KS 92 which berthed for discharge at NAPLES 4 Apr 45.

2. The 30 machines were demanded on WO by this branch under reference SD/ER/3 dated 25 Jan. Authority for UK procurement was given on WX 59490 CAL 933 of 8 Nov 44 against LAC Airgram 35, Requisition No. MGS-180-EIG of 15 Jun 44, item number 25.

3. It is requested that disposal instructions for the 4 No held by 214 Group be given direct and this office be advised of action taken.

C.R.MACKENZIE,

To: A.F.H.Q. C.E.

Originator's No. Q547 Date 17 Sep 1945

No 378 Maintenance Unit, a Unit under the control of this Headquarters, is in possession of quantity 4 Concrete Mixers (.) Full detail available is as follows :

Qty 4 Rex Mixers (Knox Ltd. LONDON), 4 Scoops and 4 Starting Handles not received. Chassis Numbers 3474, 3475, 3490, 3506 ex S.S. STANFORD from UK May 1945.

It would appear from enquiries made that these Mixers were forwarded to No 378 M.U. by the Embarkation Unit under the impression that they were Mechanical Transport. They were contained in four Crates which had been badly marked and no markings were legible.

It is suggested that these Mixers are intended for Engineer Services and it is requested that you will advise this Headquarters if the items can be identified and disposal instructions obtained(.)

for Brigadier,
Director of Engineer Stores.

MOC AFHQRAM 109: Cont'd.

	Stock No.	Nomenclature	Unit	Required	Remarks
10.	Fig. 137 in FYS-10 War Dept. Field Manual. Type B.	Shop motorized, general purpose repair, complete with tools, truck mounted, standard 2½ ton, 6x6, including lathe, generator air compressor, etc. self powered, Make and Model Unspecified:	ea.	4	Avail U.S.
11.	78-3295.100-0	Truck, 2½ ton, tank 750-800 gal capacity, Make and Model Unspecified:	ea.	4	Avail U.K.
12.	40-9514.3-0	Welding equipment, electric arc, trailer mounted, complete with tools and accessories, Make and Model Unspecified:	ea.	4	Avail U.S.

AFHQ advise that items 1,2,3,4,8,9,10,12 are immediately available from U.S. Army Theatre Stocks without replacement and British equivalent of items 1,2,3,8,9,11 are immediately available from British Army theatre stocks without replacement.

Authority is requested:

a. For transfer of the U.S. Army equipment listed as immediately available in the theatre to Foreign Economic Administration for sale to the Italian Government.

b. For sale of the British Army equipment listed as being immediately available to the Italian Government through the appropriate British agency.

c. For sale to the Italian Government the balance of the items listed as they become available from either British or United States Army Theatre Stocks. It is not proposed to requisition any of this equipment for import into Italy.

Please advise the quantity of each item in para a and b that may be transferred to the Italian Government.

Allied military forces have been maintaining main and subsidiary highways throughout Italy in order to keep the highways in condition to carry military and essential civilian traffic.

AFHQ have advised that it is imperative that military service units be relieved of this function as soon as practicable and have also stated that it is essential that highway maintenance be not permitted to fall below a level sufficient to support British and U.S. redeployment.

It is also necessary that withdrawal of military maintenance unit will not interrupt the internal distribution of essential civilian supplies. Much of the automotive stock available for movement of civil supplies is in poor condition and failure to maintain the road network in reasonable condition will result in rapidly increasing rate of deterioration

11.	78-5295.100-0	Truck, 2½ ton, tank 750-800 gal capacity, Make and Model Unspecified:	ea.	4	Avail U.S.
12.	40-9514.3-0	Welding equipment, electric arc, trailer mounted, complete with tools and accessories, Make and Model Unspecified:	ea.	4	Avail U.S.

AFHQ advise that items 1,2,3,4,8,9,10,12 are immediately available from U.S. Army Theatre Stocks without replacement and British equivalent of items 1,2,5,8,9,11 are immediately available from British Army theatre stocks without replacement.

Authority is requested:

a. For transfer of the U.S. Army equipment listed as immediately available in the theatre to Foreign Economic Administration for sale to the Italian Government.

b. For sale of the British Army equipment listed as being immediately available to the Italian Government through the appropriate British agency.

c. For sale to the Italian Government the balance of the items listed as they become available from either British or United States Army Theatre Stocks. It is not proposed to requisition any of this equipment for import into Italy.

Please advise the quantity of each item in para a and b that may be transferred to the Italian Government.

Allied Military Forces have been maintaining main and subsidiary highways throughout Italy in order to keep the highways in condition to carry military and essential civilian traffic.

AFHQ have advised that it is imperative that military service units be relieved of this function as soon as practicable and have also stated that it is essential that highway maintenance be not permitted to fall below a level sufficient to support British and U.S. redeployment.

It is also necessary that withdrawal of military maintenance unit will not interrupt the internal distribution of essential civilian supplies. Much of the automotive stock available for movement of civil supplies is in poor condition and failure to maintain the road network in reasonable condition will result in rapidly increasing rate of deterioration which will further jeopardise the movement of essential civilian supplies.

Ruined railways and lack of adequate deep water ports have placed great reliance on the highway system which itself has been badly worn and damaged.

With the termination of military responsibility for civilian supply it is desired that the Italian Government assume full responsibility for highway maintenance, and thus for internal civilian supply distribution which is dependent on the highway system. This can only be accomplished by transfer of the necessary equipment to the Italian Government.

SUBJECT: Salvage Machinery

TO : Ing. Luigi Ferretti, Chief Engineer
Highway Division, Ministry of Public Works

1. In confirmation of your conversation and verbal agreement with Mr. Griffith on 20 September 1945, herewith is letter of the firm Ing. Luciano Tosi, listing salvage machinery to be purchased by that firm.

2. Paragraph 2 of the letter indicates the acceptable prices of said salvage machinery and totals to the sum of Lire 27,000.

3. According to agreement, Ing. Tosi is to hand you a check for the indicated amount, Lire 27,000, made payable to the Ministry of Public Works, for which you will hand him a receipt. This receipt will then be used by Ing. Tosi for presentation at the Contin plant as release for the machinery, to be delivered to his warehouse.

Subject: Equipment and Materials.

To : Mr. F. O. Griffith.

1. Reference is made to our plan for turnover of operational matters on all equipment, supplies and materials to the Italian Ministry and the assumption of advisory control by us.

2. A conference will be held at this Headquarters at an early date with the Minister himself to discuss matters of basic policy. In the meantime you will please issue no equipment, materials or supplies without prior consultation with and approval of Ministry representative. It is further desired that a list be prepared at your earliest convenience reflecting all such items that have been issued to date. This list will be subject to review with possible reconsideration and recall of items if not urgently required by the receiver.

3. It is proposed to establish a Board composed of a representative of this Headquarters, one nominated by the Constractors and one from the Ministry to review requests for materials, equipment and supplies and to act in an advisory capacity in making all allocations.

4. It is desired to bring the Ministry actively into the operation as rapidly as possible and the decisions outlined above should expedite this program.

SUBJECT: Inventory and Registry of Released Equipment

TO : Ing. L. Ferretti, Chief Engineer
Highway Division, Ministry of Public Works

1. I have your letter of 9 September regarding the inventory and the registering of equipment that have been and will be released. Our record is not entirely complete, but is being brought up to date as rapidly as possible. The bulk of the equipment on hand at present for which Mr. Crocetta had at numerous times been requested to indicate allocation for memorandum receipt responsibilities will be turned over to you within the next ten days to two weeks. At this time our records will be complete and you will be furnished copies of the information therein on which you may establish your files.
