This firm has two cars FI.29729 and 24746 FI. with a regular circulation permit which are now pratically still lacking tyres and tubes. As these two cars are used by the General Management and the Technical Management which have continually to go from one to the other of their plants to inspect and to direct the work of rebuilding these plants damaged by the war and also to attend to withdraw the money from the administrativ office of Florence(as there are no banks in that zone) and to carry it to the works to pay the staff, besides they have to remain in touch with the Mother House of Rome there-afore we ask for :

N. IO tyres and tubes 6,00 x I6 or 5,50 x I5

possibly new or second hand if in good conditions.

As our Works are, as you know, very important for they produce electric power by condensing the steam of the underground, we trust in a favourable answer.

We thank you beforehand and awaiting your kind answer.

Subject: Material for Larderello

To : MINISTERO DELL'INDUSTRIA COMMERCIO
E LAVORO
Via Flavia - Roma
(Att. Dr. Pellegrini)

1. The undermentioned materials are urgently required for the rehabilitation of Larderello power plant:
20 Kgs guarnizioni manganesite (corda)
10 B.S.Z. Pirelli oppure Magnalega o qualunque altro prodotto simile per saldature alluminio
25 mq guarnizione per vapore altezza 2/3 mm tipo Burmand
50 m filo ottone 5 mm diametro
50 m " " 5.5 mm "
2 Kgs cotone corda 2 mm "

2. It is requested that this demand be treated with urgency as it is anticipated to have this important plant in operation by the end of February 1945.

1325

Declassified E.O. 12356 Section 3.3/NND No. 785019

LARDERELLO NOV. 26TH 1944

To complete the Castelnuovo plant masonry works needed for 1 x 15000 KVA set operation (refrigerator - machine hall - substation) 50 workables days with 10 skilled workmen and 45 commun workmen are required.

It will also be necessary to transport:

to Castelnuovo:
- 70 cum. gravel from the Cecina River
- 8 tons lime from Monterotondo
- 3000 Perrat (roof) from Sinalunga
- 2100 Marsigliesi (roof) to Sinalunga
- 2000 holed bricks from Cecina or Sinalunga
- 24000 bricks from Cecina or Sinalunga
- 7 tons. cement (6000 are urgent) from C.vecchia
- 12 tons. lead plates for roof from Larderello

from Piombino to Larderello:
- 5,3 tons. steel

The above scheduled transportations require a 7 tons. truck during 30 workable days, or a minor time if the 3 tons allied truck will be available for the Larderello Co. 15 days more. For the electrical-mechanical and thermal parts the following rehabilitation and mountage works will be onded before Dec. 31:

a) 1 x 15000 KVA 9/120 KV transformer repairs, mountage and transportation (only the oil treatment will be necessary).

b) 9 KV bus bars rehabilitation transformers connection with bars and generator.

c) pumps panel repairs, and motor supply bars connection.

d) 1 refrigerator and water pipes complete repair.

The other works required for the beginning of the set repairs will be ended at Jan. 15, as follow:

e) control panels
f) generators stator repairs
g) 3 turbine cylinder blades (if the blades will be available at Castelnuovo before Dec. 31).

132

Ettore

Declassified E.O. 12356 Section 3.3/NND No. 785019

h) 38 KV grid connection with the auxiliary services supply bars rehabilitation.

i) 850 HP motor pump (actually in Larderello underway repairs) mountage and testing.

Starting Jan. 15th the units mountage will be undertaken and the works will require 45 days (working 24 hrs.)

When the mountage will be completed, and after the necessary tests, the unit will operate, but 10 days will be required as above mentioned in para a) for driyng out the transformer oil.

At the end of February or at the first days of March the set may supply power on the 120 KV Railways grid.

It will be necessary that in same time the 120 KV Railways transmission lines for the connection of Larderello with the consumption centers may be ready for operation so as we have mentioned in our August report submitted to Col. Lapper.

For the above mentioned programm we require:

1) transportations 1 x 7 tons truck, during 6 workable days and 1 x 3 tons. truck during 8 workable days.

m) materials:

80 Kg. compound for cables (junctions and therminals)
3000 sheets blotting paper for filter
20 Kg manganesite (gasket)
X 5KG graphite do
X 1 Kg. tin soldering paste
10 Kg B3Z Pirelli or "Magnalega" or similar for aluminium soldering
25 sq.m. gasket for steam (2 - 3 mm. size) Burman type or other.
100 m. varnish cambix tape
200 m. paper tape
X 500 m. cotton tape

Price

All the above mentioned materials have been requested in August 1944 but until present time we could not be supplied with them.

50 m. brass wire 5 mm. diam.
50 m. brass wire 5.5 mm. diam.

X Found by Larderello locally: Other materials demanded to Italian Government.

102

Declassified E.O. 12356 Section 3.3/NND No. 785019

100 Kg. sulphuric acid (for battery)
2 Kg. cord 2 mm. diam. for windings and coils anchorage

The average daily expence for one skilled worker (engineer electric) extra expences included /general expences - food supply, family surcharges, insurances/ is of about 120 Lire.

3) 300 tons chemical products are availables in Larderello and ready 1000tons borax to be refined are stored in the different company factories. The actual production is of about 5,5 tons borax per day. The chemical workshops require 298 workmen, included 35 men working to the oxigen, hydrogen generation and to the boilers working also for the electric power generation. The actual requirement of power for the chemical workshops is 150 KW with 1500 KWh per day. With some arrangements we can cancel 50 KW with 600 KWh per day. The other 100 KW with 900 KWh may be spared during the day and supplied during the night. If, during the night, 100 KW will be supplied, the chemical generation could be the same and the workers not dismitted. If the electric supply is not admitted the staff should be reduced at 50% and it would be very difficult to apply the workers to other works. We are triyng to reduce the electric Consumption so that the above mentioned total of 900 KWh to be supplied during the night, may result not even totally required.

4) When the Castelnuovo plant (first unit) will start operation the daily borax generation will be increased of about 800 Kg.

ACC/158/PWU

6 Sept. 1944

Subject : Procurement of materials for Larderello Colle Val d'Elsa and Siena-Castelnuovo Transmission lines.

To : Chief, Electrical Division.

1. Because some details incident to the procurement of materials for the Larderello-Colle Val d'Elsa, and Siena-Castelnuovo transmission lines may be of interest in the future, the following facts are set out:

2. Major Lee, Regional Engineer, Region VIII, A.C.C. was asked by the Fifth Army, through Captain Gaither, Fifth Army A.M.G., on or about 30 August, to rehabilitate the Larderello-Colle Val d'Elsa and Siena-Castelnuovo transmission lines, as soon as possible. These lines normally operated at 30 KV, and their completion would insure two supplies to both Siena and Florence.

3. Fifth Army A.M.G. agreed to provide all necessary transport for the work. Major Lee planned to use civilians to do the work. He had received a release order prepared by the Commerce Sub-Commission for the following quantities of material at the plant of Spolettificio R.E. di Via Flaminia, Via Guido Reni, Rome:

- 6,000 Kilograms 50 sq.mm. stranded copper wire;
- 5,000 or 6,000 Kilograms 28 sq.mm. solid copper wire (Both figures appeared on the release order, in different places);
- 1,000 Kilograms (? sq.mm.) solid copper wire for binding;
- 15 Kilograms of pure tin.

4. Major Lee sent two 5th Army trucks to Rome on 2 September to transport the materials. At the Spolettificio plant, attaches said that such a quantity of copper had never been stored there, and that there had recently been received at the plant, several other orders emanating from the Commerce Sub-Commission, and requesting the release

Declassified E.O. 12356 Section 3.3/NND No. 785019

Subject : Procurement of materials for Lardarello Colle Val d'Elsa and Siena-Castelnuovo Transmission lines.

To : Chief, Electrical Division.

1. Because some details incident to the procurement of materials for the Lardarello-Colle Val d'Elsa, and Siena-Castelnuovo transmission lines may be of interest in the future, the following facts are set out:

2. Major Lee, Regional Engineer, Region VIII, A.C.C. was asked by the Fifth Army, through Captain Gaither, Fifth Army A.M.G., on or about 30 August, to rehabilitate the Lardarello-Colle Val d'Elsa and Siena-Castelnuovo transmission lines, as soon as possible. These lines normally operated at 30 KV, and their completion would insure two supplies to both Siena and Florence.

3. Fifth Army A.M.G. agreed to provide all necessary transport for the work. Major Lee planned to use civilians to do the work. He had received a release order prepared by the Commerce Sub-Commission for the following quantities of material at the plant of Spolettificio R.N. di Via Flaminia, Via Guido Reni, Rome:

- 6,000 Kilograms 50 sq.mm. stranded copper wire;
- 5,000 or 6,000 Kilograms 28 sq.mm. solid copper wire (Both figures appeared on the release order, in different places);
- 1,000 Kilograms (? sq.mm.) solid copper wire for binding;
- 15 Kilograms of pure tin.

4. Major Lee sent two 5th Army trucks to Rome on 2 September to transport the materials. At the Spolettificio plant, attaches said that such a quantity of copper had never been stored there, and that there had recently been received at the plant, several other orders emanating from the Commerce Sub-Commission, and requesting the release of copper.

1297

Declassified E.O. 12356 Section 3.3/NND No. 785019

5. Captain L.W. Laughlin, learning of the difficulty, telephoned Captain Austin of the Commerce Sub-Commission. According to Captain Laughlin, Captain Austin promised to look for other places where copper might be available and stated that he would be in his office on the following day, 3 September (Sunday). Twice during 2 September Eng. Colamarino went to the Spolettificio plant to learn whether copper was available.

6. Because the available information was not altogether clear, Eng. Colamarino and Errera went to the plant on Sunday morning, and satisfied themselves that no copper was on hand at the plant and that with the exception of an order for 1400 kilograms solid copper wire and 3000 metres of lead covered cable (no other details were available), there had not been other any requisitions for wire filled at the plant.

7. An unsuccessful effort was made to reach Captain Austin in his office. Captain Laughlin stated that he called Major Wood, Captain Austin's superior and elicited the information that "Captain Austin will be back tomorrow" (Monday 4 September).

8. Captain Laughlin and myself then visited the Commerce Sub-Commission offices. It was near lunch time and Colonel Evans was the only officer present. The urgency of the situation was explained to him and he promised to try to locate Captain Austin, and to have him come to the office.

9. At about 1500 hours, I called Captain Austin's office, received no reply, and called Major Wood. He was unfamiliar with the situation and I referred him to Col. Evans. He subsequently called me, stating that he had learned from the local Resources Branch that copper conductor was not known to be available in any other location, and that in his opinion, the material did not exist. He disclaimed knowledge as to the origin of the report stating that copper was on hand, stating that the report had come from the office of Captain Austin, who was not in. I asked him if the report might have come from Region IV. He agreed to inquire, and later called me, and said that he could locate no one in Region IV who knew of the report, believed that he had done everything possible, and would leave a message for Captain Austin to call me on the following morning.

10. In the meantime, I telephoned the following officers in order to try to locate some conductor material.

Declassified E.O. 12356 Section 3.3/NND No. 785019

6. Because the available information was not altogether clear, Eng. Colamarino and Ferrara went to the plant on Sunday morning, and satisfied themselves that no copper was on hand at the plant and that with the exception of an order for 1400 kilograms solid copper wire and 3000 metres of lead covered cable (no other details were available), there had not been other any requisitions for wire filled at the plant.

7. An unsuccessful effort was made to reach Captain Austin in his office. Captain Laughlin stated that he called Major Wood, Captain Austin's superior and elicited the information that "Captain Austin will be back tomorrow" (Monday 4 September).

8. Captain Laughlin and myself then visited the Commerce Sub-Commission offices. It was near lunch time and Colonel Evans was the only officer present. The urgency of the situation was explained to him and he promised to try to locate Captain Austin, and to have him come to the office.

9. At about 1500 hours, I called Captain Austin's office, received no reply, and called Major Wood. He was unfamiliar with the situation and I referred him to Col. Evans. He subsequently called me, stating that he had learned from the local Resources Branch that copper conductor was not known to be available in any other location, and that in his opinion, the material did not exist. Major William Rivett No 2 C.E.Works	Major Rivett unavailable.
Major A.W. Page 11 C.E. Works.	No wire. Said he had no stores and that it had always been necessary for him to strip other lines to obtain material.
Captain Dowberry Office D.D.W., A.A.I.	No wire available. Said he had discussed matter with Lt.Colonel W.A.E. Smith who said that there was a great deal of copper around and that he could see no reason for using material from other sources.
Captain Rose Advance P.B.S. Engineer Service.	Said Col. Cooky unavailable. Expressed belief that wire might be available at E-252 Dump, and suggested I talk to Col.Davis at P.B.S. Engineer Service.
Lt. Col. Davis P.B.S. Engineer Service	At first said no wire was available but after half hour reported that there was 1800 feet of one size of wire and 1200 feet of other size at E-252 Dump, and said that Colonel Cooky had much wire.
Captain Foley Advance P.B.S. Engineer Service.	Made second attempt to contact Colonel Cooky who was still unavailable but who would return at 1900 hours of the same day.
Colonel Cooky Advance P.B.S. Engineer Service.	Said no new wire was available; that much wire was on unused lines.

11. At the same time the telephone inquiries were being made, Eng. Toscano communicated with several engineers of the Societa' Romana di Elettricita' and learned that a quantity of aluminium wire was on hand in their stores. Eng. Toscano was instructed to go to the Romana offices on the following morning (4 September) and learn the details of the wire.

Declassified E.O. 12356 Section 3.3/NND No. 785019

1295

...

Declassified E.O. 12356 Section 3.3/NND No. 785019

12. On the morning 4 September, Major Price, Eng. Errera and myself went to the Azienda Comunale Elettricita' Acque offices in Rome and discussed the situation with Eng. Angeluccl e Bordoni. They stated that Azienda Comunale Elettricita' Acque had many cable connectors available but only between 9 and 10 kilometers of 50 sq.millimeters aluminium cable. We later asked them to make the arrangements for us to take 3 kilometers of cable, 100 conical cable clamps, 150 parallel clamps, and 5 kilograms of solder.

13. We then went to the Romana offices and informed Eng. Rovelli of our needs. He expressed willingness to help, notwithstanding the need which his own company has for the material. We asked him for 19 kilometers of wire, and he offered us 20, so that we could have complete reels. He also offered us 30 cable clamps. We accepted both. He told us that there is a considerable amount of wire, still on railway cars in Rome, and which had been removed by the Germans. He said that this wire belonged to his company, and asked that we help him to get it back. We promised that we would do this.

14. Eng. Colamarino went to the storehouses of each company to view the material, and also went to the Spolettificio plant where we arranged for the release of 15 kilograms of pure tin.

15. Sergeant Anzivino was present at the loading of the trucks. He signed a receipt for the pure tin at the Spolettificio plant. He did not sign receipts for the material removed from Azienda Comunale Elettricita' Acqua and Societa' Romana Elettricita' plants. I will arrange for these receipts to be sent to the respective companies, together with a thank you note. On 5 September, a letter was written to the Regional Engineer, Region VIII transmitting receipts and requesting that they be signed and returned.

16. In a discussion with Major Wood and Captain Austin on the Sept. 4th, I was told that they believe that the copper conductor never was at the Spolettificio plant; that they did not understand how the release order had been released, but it looked as if someone had "guessed" that the material was at Spolettificio.

17. As to the argument that the conductor should have been stripped from other lines, I do not feel that there was sufficient time to strip any lines before rebuilding others. Were more time available I would have asked that this be done.

INSTRUCTIONS FOR PREPARATION OF BID. - FORM TSC/3.

1. Bidding system is designed to provide positive control of transportation by rail or civil freight traffic (both ACC and Ordinary Italian). Careful reading of these instructions and preparation of Form TSC/3, also compliance with all requirements and instructions will materially assist all concerned to obtain best possible transportation.

2. Types of Civilian Freight Traffic. Civilian (i.e. all non military) traffic falls into two broad categories, viz:-

(a) ACC Traffic. Comprises commodities which ACC considers essential to meet vital needs, and over which ACC exercises a large measure of control, such as wheat, flour, sugar, olive oil and other basic foodstuffs or supplies. Salt, fuel, fertiliser, seeds, and essential products sponsored by Italian Government under ACC auspices are included in this category.

(b) Ordinary Italian Civilian Freight Traffic. Comprises all freight movements required by civilians, not coming under sub-para (a) above. Such movements must be limited to capacity available after requirements of sub-para (a) above, have been fully met.

3. Emergency Traffic of Extreme Urgency. Regular working of bidding system is essential. However, it is appreciated that there may arise emergencies requiring special movement arrangements. In such cases, form TSC/3 will be prepared, clearly marked "Emergency Request", and details of emergency clearly specified. Officers preparing form TSC/3 are responsible for determining that there is actual urgency.

4. ACC Official Wagon Labels. Attention is directed to the fact that wagons must bear official ACC WAGON LABELS, completed in ink. Two labels will be provided, upon acceptance of bid, for each authorised wagon. Labels will be supplied by ACC Tn. Representative to Regional and Provincial Supply Officers, who willendorse them with details of commodity, serial number of bid, date during which movement is authorised, stamp and sign them before issuing to consignor. The number of the railway wagon will be inserted in ink, by stationmaster, at time of loading. On any cancellation of movement, ACC official wagon labels must be returned to issuing authority.

5. WARNING. Italian railways have been seriously affected by ravages of war, there are critical shortages of coal, supplies and wagons, and military necessities must always receive preferance. Bids beyond reason or necessity must not bemade and quantities shall be limited to actual requirements, and must not exceed the quantity that can be loaded within any one seven day period. Mass bids for large quantites, to move at problematical date, or for which all details have not been fully determined, will NOT be submitted on form TSC/3. Letter giving details of such proposed or problematical shipments should be submitted to HQ. ACC Transportation Sub-Commission in advance, through usual channels, giving all known details.

SUBJECT: "LARDERELLO" S.A.

TO : Public Works & Utilities Subcommission

1. A list of materials required for the reactivation of "LARDERELLO" S.A., has been passed to this Subcommission by Industry Subcommission.

2. The only items of which we have a recorded availability are:

a) Tin - This is a controlled item and a demand must be submitted to this Subcommission on Form MAT 10 so that a bid can be made to HQ AAI, L.R.S. at the next Meeting of Engineering Materials Committee.

b) Electrodes for soldering - (industrie Chimiche Naz. Riunite), Via Flaminia, Rome.- Uncontrolled.

c) Colofonia (A. Giordi & Co., Via S. Paolo alla Regola, 36, Rome). Uncontrolled.

d) Carburo di Calcio - Controlled Material - See a).

3. An attempt is being made to uncover availability of the other items asked for, but enquiries will take some little time.

SUBJECT : Larderello Co. - Request for transformers.

TO : ECONOMIC COMMISSIONER NORTHERN ITALY.
(Att.: P.W.& Util. Electrical Division)

22

(21)

Ref. our 302/PWU dated 23 Nov 45, and your cable 2424-26 Nov 45.

1. Para 2 of our letter 302/PWU dated 23 Nov 45 made reference to para 2 of letter 6 Nov 45.

This is an error and should have been para 4 of letter 6 Nov 45.

2. Summarizing the correspondence of Larderello Company, which was attached to our letter 302/PWU dated 23 Nov 45, it will be noted that the two original 4750 KVA transformers, which were being built by the Breda Co. of Sesto S.Giovanni, for the Larderello Company, were taken by the Germans to the Lancia works at Bolzano.

Later they were taken to Austria and are reported to be in the territory under Russian control.

3. The Larderello Company is of the opinion, however, that the time required to recover these transformers from Austria, will likely be prolonged and as they now need transformers of this size and characteristics in connection with the rehabilitation of the Larderello plants, they are willing to purchase two others which, they state, could be obtained by C.E.M., from other sources upon authorization from A.C.

1277

Declassified E.O. 12356 Section 3.3/NND No. 785019

4. The transformers desired are two in number and must have the following characteristics :-

(a) Low voltage rating - 4,000 volts.

(b) High voltage rating - 38,000 volts.

(c) KVA capacity - 4,750 KVA.

(d) Frequency - 50 cycles.

(e) Connections - Star - Star or (Y - Y)

(f) Percentage taps on (a) or (b) are essential.

5. With respect to the two transformers, (para one your telegram 2424 dated 26 Nov 45) which were taken to Austria, the Lerderello Company desires that proceedings continue with respect to their recovery and return.

These transformers bore serial numbers 1441 and 1442 and were manifactured by the "Breda" Company. The characteristics of each are :-

(a) Low voltage rating - 4,250 volts.

(b) High voltage rating - 33,000/36,500/40,000 volts.

(c) KVA capacity - 4,750 KVA.

(d) Frequency - 50 cycles.

(e) Connections - Star - Star or (Y - Y)

The information (a) to (e) will appear on the plates attached to the transformers providing the plates have not been removed.

Each transformer will be a self contained unit and were no doubt shipped to Austria as complete units without any disassembling or packaging.

6. Ref. para 2 your telegram 26 Nov 45, the Lerderello Company agrees to make available, upon demand, all documentary evidence at their disposal. We have instructed them to get this in readiness pending such a demand.

1276

Declassified E.O. 12356 Section 3.3/NND No. 785019

7. In the meantime it is desired that the possibility of Lorderello Company purchasing substitute transformers, as outlined in para 3 and 4 above be taken up with C.E.M.

This sub-commission endorses the request.

"LARDERELLO"
S.A. Per Lo Sfruttamento delle Forze Endogene

Ufficio Approvvigionamenti

Firenze, 6 Novembre 1945

Colonnello
P A R K E R
ALLIED COMMISSION ELECTRICAL DIV.
R O M A

Alla Sezione Avanzata del Vs/ Ufficio di Firenze fu a suo tempo fatta pervenire la lettera che trasmettiamo in copia.

Dietro notizia che i trasformatori non si trovano più nello stabilimento Lancia a Bolzano, nostri funzionari si sono recati sul posto ed hanno appreso, dall'Ufficio Alleato C.E.M. di Bolzano, che detti trasformatori furono all'ultimo momento trasportati dai tedeschi in Austria e, trovandosi attualmente in una fabbrica nella zona occupata dall'Armata Sovietica, sono difficilment ricuperabili.

Lo stesso Vs/ Ufficio C.E.M. di Bolzano ci informa che sarebbe in condizioni di ricuperare altri trasformatori con caratteristiche simili.

Questa Società è disposta ad acquistare due trasformatori della potenza di 4.750 KVA o maggiore, rapporti base 4250/38.000 V, che verrebbero installati a Sasso Pisano e Monterotondo Marittimo per utilizzare sulla rete l'energia prodotta da due turboalternatori attualmente in montaggio. Prego pertanto codesto comando affinchè voglia dare nulla osta all'Ufficio Alleato di Bolzano C.E.M. perchè si interessi di detto recupero.

By : C.Catti/ct

LARDARELLO COMPANY, INC.
Purchasing Office.-

Florence, 6 Nov 45

TO : Col. PARKER,
HQ. Allied Commission,
Electrical Division.

Some time ago we wrote to your Advanced Section in Florence a letter, copy of which is transmitted herewith.

When we knew that the transformers were no longer located in the Lancia Works at Bolzano, our Officials went on the place and learned from the Allied Captured Ennemy Materials Office at Bolzano that the transformers were at the last moment trasferred by the Germans to Austria, and that, as they are at present in a zone occupied by the Russian Army, their recovery is almost impossible.

The above mentioned C.E.M. Office informs us that they would be able to recover other transformers with similar characteristics. ?

Our Company is willing to purchase two transformers with a power of 4,750 KVA or over, basic ratio 4,250/38,000 V., which would be installed at Sasso Pisano and Monterotondo Marittimo in view of utilizing on the grid the energy generated by the two turbo-alternators at present being assembled. Will therefore your Office please authorize the C.E.M. Office at Bolzano to carry out said recovery.

"LARDERELLO" CO, INC.

S.A. per lo Sfruttamento delle Forze Endogene

Ufficio Approvvigionamento — Firenze, 14 Agosto 1945.

ADVANCED SECTION
Electrical Division
ALLIED COMMISSION

F L O R E N C E

In data 15 Luglio 1942, con nostra nº 2210, ordinammo alla S.A. ERNESTO BREDA di Sesto S. Giovanni :

nº 2 TRASFORMATORI TRIFASI in olio della potenza di 4750 KVA - Rapporti fondamantali 4000/38000 - 50 Hz.

Tali trasformatori dovevano servirci per due nuovi gruppi turboalternatori da installarsi nelle nuove centrali Geotermoelettriche di Sasso Pisano e Monterotondo Marittimo. Senonchè, quando i trasforlatori stessi erano stati approntati, furono requisiti presso la Soc. Breda dal "Der Beauftrage für die Elecktroindustrie", Milano - Foro Bonaparte nº 16 - e, come da comunicazione fattaci in data 3 Maggio 1944 con lettera nº 131457 della Breda stessa, facendogli modificare i rapporti di trasformazione ed avviandoli in Germania.

Ci risulta che i 2 trasformatori si trovano attualmente a Bolzano, presso le offficine Lancia, i nostri trasformatori portano i numeri di targa 1441 - 1442 hanno :

Rapporto di trasformazione	4250/40.000-36.500 - 33.000
Potenza	4750 KVA
Frequenza	50 HZ
Collegamenti	Stella Stella

Vi saremmo pertanto grati se vorrete far mettere i trasformatori stessi a nostra disposizione, avndo già i turboalternatori sopra riferiti in corso di montaggio, in modo da poter incrementare la produzione dell'energia elettrica secondo il programma a Voi noto.

TRANSLATION By : C[illegible]atti/ct

LARDARELLO CO. INC.
Purchasing Office.

Florence, 14 August 1945

TO : Advanced Section,
Electrical Division
Allied Commission.

On 15 July 1942, by letter N° 2210, we ordered to ERNESTO BREDA CO. of Sesto S. Giovanni :

2 each, THREE-PHASED transformers, oil immersed, 4,750 KVA - Basic Ratio 4,000/38,000 - 50 Hz.

Such transformers had to be used for two new turbo-alternator units to be installed in the new power plants at Sasso Pisano and Monterotondo Marittimo. But, when the transformers were completed, they were requisitioned from Breda Company by the "Der Beauftrage für die Elektroindustrie", Milan, Foro Bonaparte No. 16 and, as per letter ref. 131457 dated 3 May 1944 from: Breda Co, the transforming ratio was modified and the transformers shipped to Germany.

We understand that the trasformers are at present at Bolzano at the Lancia Works. Their reg. Nos. are ж : 1441 - 1442, and their characteristics :

Transforming ratio	: 4,250/40,000 - 36,500 - 33,000
Power	: 4,750 KVA
Frequency	: 50 Hz
Connections	: Star Star

We would therefore be grateful if you could have the transformers made available to us, as the a/m turbo-alternators are being mounted, so to increase the electric power output in accordance to the program known by you.

TRANSLATION

By : C.Tatti/ct

"LARDERELLO" COMPANY

Reference : 01003

31 July '45

To : Electrical Division,
Allied Commission.
(Attn. Col. Renton)

We beg to call your attention on the fact that we essentially need to keep efficient the following motor vehicles for reconstruction of our Geothermal Plants :

1) Fiat 1100 Reg. No. 29729
2) Fiat 1100 " " 26532
3) Fiat 1500 " " 24746
4) Fiat 1100 " " 29856 (ambulance)
5) Fiat 626 - two trucks - Reg. No. 29081 and 29321

Vehicles are used for the following essential services :

1,2,3.- Liaison between our Management and our Plants in the Soffioni Area -
Liaison of our Management with Commercial and Adm. Office at Florence -
Transport of specialized personnel and equipment for urgent repairs to Electric Plants -

4) For transport of our ill and wounded workers from our Plants to the nearest hospital (100 Km minimum)

5) For transport of war damaged machinery to Genoa (Ansaldo) Torino (Savigliano Works) and Legnano (Tosi) for repairs, and transport from said places of new or repaied machinery.

In order to have said vehicles (which are now unoperating due to complete lack of tyres), following tyres and tubes are needed :

1-2-3-4- No. 24 Tyres 5.50 x 15 (or 6.00 x 16) with tubes-

5- No. 14 Tyres 34 x 7 (or corresp. dim.) " "

We beg you to grant allocation of above mentioned tyres, in order to enable us to carry out the reconstruction programme agreed upon with the Allied Command.

Yours truly,

"LARDERELLO" Co.
